(a) *Requirement.* While it is not required that inland coastal management boundaries of contiguous States be coterminous, States must indicate that there has been consultation with adjoining coastal States during the program development process to manage a common resource compatibly or to minimize the possibility of incompatible uses occuring at the juncture of each State's boundary.

(b) *Comment.* A summary of State consultation efforts with neighboring States will suffice to meet this requirement. Also acceptable are minutes from meetings, copies of letters or other written material where interstate boundaries have been discussed. This information should be contained in an Appendix to the program document submitted for approval.

Subpart E—Authorities and Organization

§ 923.40 **General.**

(a) The authorities and organizational structure on which a State will rely to administer its management program are the crucial underpinnings for enforcing the policies which guide the management of the uses and areas identified according to the previous subparts. There is a direct relationship between the adequacy of authorities and the adequacy of the overall program. On the one hand, the authorities need to be broad enough to implement the enforceable policies called for by the program. On the other hand, these enforceable policies must be sufficiently comprehensive and specific to regulate land and water uses, control development, and resolve conflicts among competing uses in order to assure wise use of the coastal zone. (Issues relating to the adequate scope of the program are dealt with in § 923.3.)

(b) The entity or entities which will exercise the authorities required above is a matter of State determination and may be the State agency designated pursuant to section 306(c)(5) of the Act, other State agencies, regional or interstate bodies, and/or local governments. The major approval criterion is a determination that such entity or entities are required to exercise their authorities in conformance with the policies of the management program. Accordingly, the essential requirement is that the State demonstrate that there is a means of ensuring such compliance. This demonstration will be in the context of one or more of the three control techniques specified in section 306(e)(1) of the Act and as further described in section 923.42 of these regulations.

(c) The authorities requirements of the Act dealt with in this subpart are those contained in subsections 305(b)(4)—Means of Control; 306(c)(7)—Authorities; 306(d)(1)—Control Development and Resolve Conflicts; 306(d)(2)—Powers of Acquisition; 306(e)(1)—Techniques of Control; 306(e)(2)—Uses of Regional Benefit; and 307(f)—Air and Water Quality Control Requirements. The organizational requirements of the Act dealt with in this subpart are those contained in subsections 305(b)(6)—Organizational Structure; 306(c)(5)—Designated State Agency; and 306(c)(6)—Organization.

§ 923.41 **Identification of authorities.**

(a) *Requirement.* States must identify relevant constitutional provisions, statutes, regulations, case law (both judicial and administrative) and such other legal instruments (including executive orders and interagency agreements) that will be used to carry out the State's management program. This identification will include the authorities required pursuant to sections 306(d) and 306(e) of the Act.

(b) *Comment.* Statutory Citation, Subsection 305(b)(4):

> The management program for each coastal state shall include * * * (4) An identification of the means by which the state proposes to exert control over the land uses and water uses referred to in paragraph (2), including a listing of relevant constitutional provisions, laws, regulations, and judicial decisions.

(1) A clear identification of the authorities relied upon to implement the management program is necessary in order for the Associate Administrator to determine legal adequacy of the program. When, in the opinion of the Associate Administrator, there is serious question as to the enforceability of any of the authorities asserted to be part of the management program, the Associate Administrator may request the designated State agency (for program development purposes) to seek an opinion from the State's Attorney General.

(2) Another purpose of this listing is to assure that there is a clear identification of laws and other authorities which

expressly are a part of the management program and to which the Federal consistency provisions of the Act will be applied.

(c) *Requirement.* Irrespective of the control technique chosen pursuant to subsection 306(e)(1) of the Act, States must have adopted at the time of program approval the legal authorities called for in section 306(d) in order to assure that management of coastal land and water uses will be in accordance with and pursuant to the policies of the management program. These authorities must include the ability to:

(1) Administer land and water use regulations in conformance with the policies of the management program;

(2) Control such development as necessary to ensure compliance with the management program;

(3) Resolve conflicts among competing uses. At a minimum, the program submission shall describe how use conflicts can be resolved;

(4) Acquire appropriate interests in lands, waters or other property as necessary to achieve management objectives. Where acquisition will be a necessary technique for accomplishing particular management program policies and objectives, the management program must indicate for what purpose acquisition will be used (i.e., what policies or objectives will be accomplished); the type of acquisition (e.g., fee simple, purchase of easements, condemnation); and what agency (or agencies) of government have the authority for the specified type of acquisition.

(d) *Comment.* Statutory Citation, Subsection 306(c)(7):

> Prior to granting approval of a management program submitted by a coastal state, the Secretary shall find that * * * (7) The state has the authorities necessary to implement the program, including the authority required under subsection (d) of this section.

(e) *Comment.* Statutory Citation, Subsection 306(d):

> Prior to granting approval of the management program, the Secretary shall find that the state, acting through its chosen agency or agencies, including local governments, areawide agencies designated under section 204 of the Demonstration Cities and Metropolitan Development Act of 1966, regional agencies, or interstate agencies, has authority for the management of the coastal zone, in accordance with the management program. Such authority shall include power:
>
> (1) to administer land and water use regulations, control development in order to ensure compliance with the management program, and to resolve conflicts among competing uses; and
>
> (2) to acquire fee simple and less than fee simple interests in lands, waters, and other property through condemnation or other means when necessary to achieve conformance with the management program.

(f) *Comment.* Examples of acceptable conflict resolution mechanisms, as referred to in (c)(3) above, include, but are not limited to, mediation procedures, an administrative review board, or judicial appeal provisions. Since the policies, standards and criteria of the management program will form the basis for conflict resolution, it will be important that these be clearly and specifically stated. This will be particularly true when the primary means of resolving conflicts is to be judicial.

(g) *Comment.* Where the acquisition technique, referred to in (c)(4) above, will be a significant element of a State's management program, the State may be required to submit a specific acquisition plan with evidence of the availability of adequate funding for those acquisitions.

(h) *Comment.* Given the provisions of section 315(2) of the Act authorizing acquisition funds for shorefront access and for preservation of islands. States should indicate in their management program the acquisition authorities available for these two purposes. Such a list also will help to meet the requirements of § 923.25(a)(6) for identifying techniques that can be used to meet shorefront access or island preservation needs.

§ 923.42 **Control techniques.**

(a) *Requirement.* A State must choose to implement and enforce its program through any one or a combination of the techniques provided for under section 306(e)(1) of the Act. The differences among the techniques raise different issues that States must resolve. These issues are discussed below.

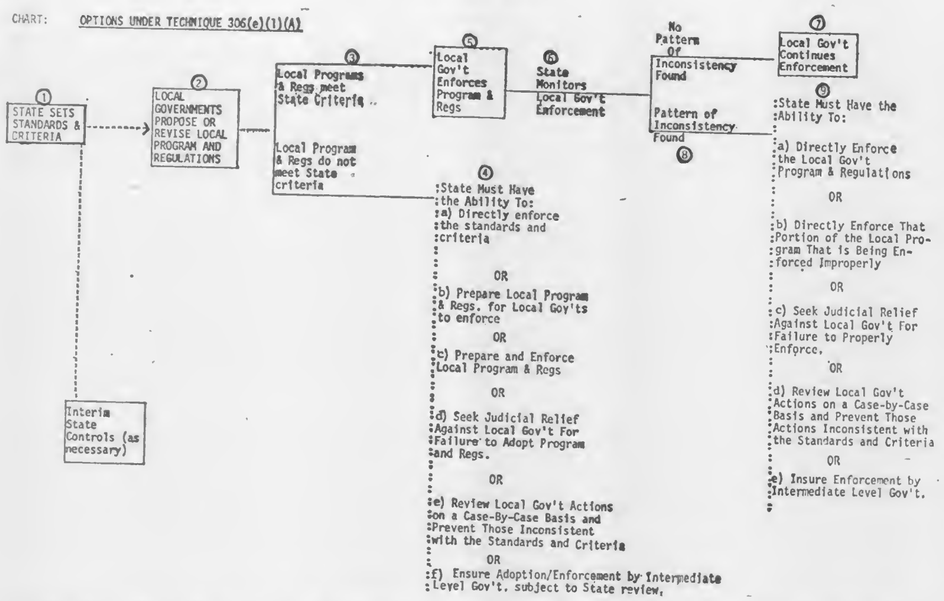
(b) *Comment.* Statutory Citation, Subsection 306(e)(1):

> Prior to granting approval, the Secretary shall also find that the program provides:
>
> (1) for any one or a combination of the following general techniques for control of land and water uses within the coastal zone:
>
> (A) State establishment of criteria and standards for local implementation, subject to administrative review and enforcement of compliance;
>
> (B) Direct state land and water use planning and regulation, or
>
> (C) State administrative review for consistency with the management program of all development plans, projects, or land and water use regulations, including exceptions and variances thereto, proposed by any state or local authority or private developer, with power to approve or disapprove after public notice and an opportunity for hearings.

(c) *Comment.* Local implementation—Technique A

(1) Control technique 306(e)(1)(A) of the Act allows for State establishment of policies, criteria and standards for local implementation, subject to administrative review and enforcement of compliance. The critical issues related to this technique are:

(i) the degree of specificity required in the State criteria and standards,



(ii) the extent to which local programs, ordinances or regulations must be in place prior to approval of the State's management program by the Associate Administrator, and

(iii) the means for State administrative review and enforcement of compliance.

The chart and discussions below are meant to guide State responses to these issues and to indicate the type and degree of latitude OCZM will find acceptable.

V 42 167 AUG 29 77 UMI

CHART: OPTIONS UNDER TECHNIQUE 306(e)(1)(A)

(2) *Specificity of standards.* Under Technique A the State establishes policies, standards and criteria regarding management of particular coastal resources, uses and areas for local governments to implement. (Item 1 on chart.) This implementation can consist of development or revision of local programs, laws, ordinances or regulations provided that these are based on the State policies, standards and criteria and are enforceable. The State policies, criteria and standards must be adopted as part of the coastal management program, either pursuant to legislation or binding executive action. These criteria must be adopted by the State at the time of submission of a program to the Associate Administrator for approval and must be sufficiently specific to provide those who will be affected by the management program with a reasonable understanding of how land and water activities and uses will be managed once local programs and/or ordinances are adopted. At a minimum, the State guidelines must provide for, or incorporate, at least the degree of specificity and predictability provided by the general State coastal policies developed pursuant to § 923.3 of these regulations. Following are two examples of State guidance to localities that is sufficiently specific:

(i) New development shall assure stability and structural integrity, and neither create nor contribute significantly to erosion, geologic instability, or destruction of the site or surrounding area or in any way require the construction of protective devices that would substantially alter natural landforms along bluffs and cliffs;

(ii) The scenic and visual qualities of coastal areas shall be considered and protected as a resource of public importance. Permitted development shall be sited and designated to protect views to and along the ocean and scenic coastal areas, to minimize the alteration of natural land forms, to be visually compatible with the character of surrounding areas, and, where feasible, to restore and enhance visual quality in visually degraded areas.

(3) States using Technique A may seek section 306 approval after all requisite local ordinances or programs have been reviewed and approved. In such cases, only items 5–9 of the chart apply.

(4) *Interim controls.* Alternatively, States may seek program approval prior to final approval of all local ordinances and programs provided that:

(i) a reasonable time and procedure for local compliance has been established (what constitutes a reasonable time period shall be agreed to by the State and the Associate Administrator);

(ii) the State policies, standards and criteria are sufficiently specific (as discussed in (2) above); and

(iii) there is sufficient interim authority to insure that land and water use decisions subject to the management program will be consistent with the policies, goals and objectives of the management program between the time of section 306 approval and the time when all local programs are adopted. The adequacy of these interim authorities will be judged on the same basis as specified for direct State controls (Technique B), discussed in (d) below, or as specified for case-by-case reviews (Technique C), as discussed in (e) below, as appropriate.

During the interim period while local programs, ordinances, etc. are being adopted or revised and approved, agencies and applicants must be consistent only with those State policies, standards, criteria and authorities that are in effect in the interim. However, as each local program, ordinance, etc. is adopted by the locality and approved by the appropriate State agency, thereafter consistency with approved local programs, ordinances, etc. will be required.

(5) *Review/Approval Process.* Once State policies, standards and criteria have been adopted, local governments propose plans, programs and/or regulations to implement the policies and standards. (Item 2 on chart.) This effort may include the preparation of new comprehensive plans, zoning ordinances, by-laws, subdivision regulations, special purpose regulations (as for example, sand dune protection ordinances), or the revision of existing plans, ordinances, or regulations. The State entity empowered by legislative or executive mandate to review local programs (which may include plans, laws, ordinances and/or regulations) must determine if the programs meet the requirements of the State policies, standards and criteria. (Item 3 on chart.) If the localities do not develop program consistent with the policies, standards and criteria, the State must have the authority to take action

to assure that management program is implemented, either by the State or by the local government. (Item 4 on chart.) To insure implementation, the State must have the ability to do at least one of the following:

(i) Directly enforce the State standards and criteria. To use this alternative, a State would need enough State authorities to be able to control directly land and water uses which have a direct and significant impact upon the coastal waters;

(ii) Prepare a local program for the local government to enforce. To use this alternative the State must have (a) statutory authority to prepare and adopt a program for a local government, and (b) a mechanism by which the State can cause the local government to enforce the State-created program. (See (iv) below for a potential enforcement mechanism);

(iii) Prepare and enforce a program and regulations on behalf of a local government. Here the State must have the authority to (a) prepare and adopt a plan, regulations, and ordinances for the local government and (b) enforce such plans, regulations and ordinances. The distinction between this approach and the preceding one is that in this case the State both adopts and implements while in the preceding case, the State adopts but the local government implements;

(iv) Seek judicial relief against the local government for failure to comply with a management program;

(v) Review local government actions on a case-by-case basis or on appeal, and prevent actions inconsistent with the standards and criteria. Under this option, when a local government fails to adopt an approvable program, the State must have the ability to review activities in the coastal zone subject to the management program and the power to prohibit, modify or condition those activities based on the policies, standards and criteria of the management program; or

(vi) If a locality fails to adopt a management program, the State could devise a procedure whereby the responsibility for preparing a program shifts to an intermediate level government, such as a county. If this intermediate level of government fails to produce a program, then the State must have the ability to take one of the actions described above. This alternative cannot be used where county government lacks the legal authority to adopt and implement regulations necessary to implement State policies, standards and criteria.

(6) *Enforcement.* Once a local program is approved, implementation and enforcement begin. (Item 5 on chart.) To ensure that local actions continue to comply with the State management policies, the State must establish a monitoring system. (Item 6 on chart.) While there is a more generalized discussion of monitoring in § 923.46, with specific reference to monitoring of local implementation the State agency designated pursuant to subsection 306(c)(5) of the Act will be responsible for establishing a monitoring system capable of detecting patterns of noncompliance. Given the substantive differences that can be expected in State programs with respect to what constitutes compliance with State policies, it will be up to each State to develop an appropriate monitoring system. The monitoring system and the determination of what constitutes a pattern of noncompliance should take into account such considerations as the number of activities improperly managed, the size and type of such activities, their proximity to coastal waters and to special management areas, and whether they constitute uses of regional benefit. Following are some monitoring techniques States may want to use, either singly or in combination. The list is not exhaustive and does not limit States to adopting only these techniques:

(i) Periodic reports—monthly reports submitted by each local government listing all building permits issued, variances and exceptions granted, subdivision plats approved, etc. during the preceding month,

(ii) Spot checks by State agency,

(iii) Procedures for submission of citizen complaints followed by State review of complaint,

(iv) Establishment of citizen "overview" committees, or

(v) Selective review of local decisions. The State would review only those decisions it defines as "major."

If no pattern of noncompliance is found, local governments continue implementation of local authorities and the State's role is confined to continued monitoring. (Item 7 on chart.) If, however, monitoring reveals a pattern of noncompliance, the State must be able to insure that its standards and criteria are adhered to. (Item 8 on chart.) The State need not assure this adherence each and every time improper enforcement occurs. The State must be capable of assuring such compliance only when a pattern of deviation is detected. (Item 9 on chart.) When State action is required because of failure by a local government to enforce its program, the State has the following options available to enforce compliance:

(i) Directly enforce the entire local program;

(ii) Directly enforce that portion of the local program that is being enforced improperly. State intervention here would be necessary only in those local government activities that are violating the policies, standards or criteria. For example, if a subdivision regulation were the only part of a program that was being enforced improperly, State enforcement could be limited to that regulation. In such a case, the State would need to have the statutory authority to ensure compliance of subdivision applications;

(iii) Seek judicial relief against local government for failure to properly enforce;

(iv) Review local government actions on a case-by-case basis or on appeal and the power to prevent those actions inconsistent with the policies and standards. The same authorities as those noted in connection with § 923.42(c)(5)(v) above would be necessary; or

(v) Provide a procedure whereby the responsibility for enforcing a program shifts to an intermediate level of government, assuming statutory authority exists to enable the immediate level of government to assume this responsibility.

(d) *Comment.* Direct state control—Technique B.

(1) Under Technique B, a State may control land and water uses subject to the management program on the basis of direct State authority. This authority may be derived from a single, comprehensive piece of legislation specific to coastal management and the requirements of this Act or on the basis of several different, often pre-existing, State authorities which are coordinated with and applied on the basis of comprehensive coastal management policies developed pursuant to § 923.3. This latter approach has been referred to informally as networking.

(2) *Comprehensive legislation.* While it is possible that a State will be able to put together into a single piece of legislation all the authorities needed to meet the requirements of this subpart, it is more likely that even a single, major piece of coastal legislation will be supplemented with other State authorities to meet all the legal requirements. Where this will be the case, States are advised to review the commentary on networking that follows. Also, in cases where a State will be relying primarily—but not exclusively—on a single piece of legislation, it is important to be explicit about those other authorities included in the management program as part of the listing called for in § 923.41.

(3) *Networking.* The critical issues related to networking are:

(i) the extent to which existing, special purpose laws adequately reflect and will be operated in conformity with the State's comprehensive management policies;

(ii) the extent to which and when rules and regulations of networked authorities need to be altered; and

(iii) the extent to which executive orders intradepartmental or interagency agreements, memoranda of understanding or agreement are binding and enforceable. Even though each agency is statutorily mandated to carry out its own, often more narrowly focused policies, the effect of networking is to tie the implementation of these individual authorities into a comprehensive framework that addresses more than the individual responsibilities of each agency and that makes these authorities part of an overall, unified strategy for managing coastal land and water resources. In applying existing authorities, the State must determine that they can be used to implement the full range of policies identified as necessary for coastal management purposes.

(4) *Enforceability.* Each State agency which exercises statutory authority that is to be incorporated into the management program must be legally bound to exercise its authority in conformance

V 42 167 AUG 29 77 UMI

with the State's coastal policies. This can be achieved through an executive order or an interagency agreement (including memoranda of understanding or agreement) provided that such order or agreement binds the affected parties to conformance with relevant management program policies. In States where affected agency heads report directly to the Governor and where the Governor has a legal policy making responsibility, an executive order will be an acceptable instrument to assure the coordination of networked activities.

(5) Interagency agreements (such as memoranda of understanding or agreement) must be binding and enforceable in order to constitute acceptable legal authorities. Interagency agreements will be considered enforceable if the management program and State authorities in support of the program provide grounds for bringing an action to ensure compliance of networked agencies with the program. It will be sufficient if any of the following can bring suit: the State agency designated pursuant to subsection 306(c)(5) of the Act, the State's Attorney General, another State agency, a local government, or a citizen.

(6) It is anticipated that executive orders and interagency agreements will focus on either or both of the following:

(i) tie in of an enforcement mechanism; as for example, tying in an existing enforcement mechanism of an agency to serve as the basic compliance mechanism for coastal management purposes, or, more likely;

(ii) establishment of conformance requirements of other State agency activities or authorities to management program policies. In order for interagency agreements to be considered binding, States should include the following:

(A) a description of how the networked agency, in implementing or enforcing its particular authorities, will operate those authorities in conformance with the management program's policies;

(B) a discussion of procedures to be followed to resolve conflicts between agency activities and management program policies or conflicts between agencies regarding what constitutes conformance with the policies;

(7) If networked State agencies can enforce the management program policies at the time of section 306 approval without first having to revise their operating rules and regulations, then any proposed revisions to such rules and regulations which would enhance or facilitate implementation need not be accomplished prior to program approval. However, where State agencies cannot enforce coastal policies without first revising their rules and regulations, then these reveisions must be made prior to program approval. An example clarifying the distinction between these two statements follows: Assume State X has established as a management program policy that only specified types of development henceforth will be permitted on barrier islands. Assume further that such a policy statement is contained in State legislation that proclaims such policy to be effective immediately and directs all State agencies to revise their existing operating procedures (including rules and regulations) within a certain time period to conform with the policy. In this case, the policy is enforceable at time of management program approval and the revision of associated rules and regulations could occur after program approval. Now, however, assume the same policy is part of the management program but the corresponding State legislation states the policy becomes effective when State regulations have been revised to reflect this policy mandate. In this example, rule revision would be necessary prior to program approval.

(e) *Comment.* Case-by-case reviews—Technique C.

(1) Under Technique C States review individual private or public plans or projects which have been defined in the management program as subject to review for consistency with the management program. The State must have the power to approve or disapprove such actions or the power to seek court review. The State must provide public notice of the action and must provide opportunity for a public hearing prior to rendering a decision. Under this technique the critical issues that must be addressed are:

(i) The basis on which the designated State agency will decided to review particular plans or projects;

(ii) The criteria by which plans and projects will be approved or disapproved; and

(iii) The procedures under which the case-by-case reviews will be conducted.

(2) This technique requires the greatest degree of policy specificity because compliance with the program will not require any prior actions on the part of anyone affected by the program. Specificity also is needed to avoid challenges that decisions (made pursuant to the management program) are unfounded, arbitrary or capricious.

(3) Under this technique it is not necessary that each and every plan or project be reviewed by the State agency but the authority to do so must exist. The State must define in the management program the type of actions or projects it will review, based on the significance of an action in terms of its impacts on coastal resources, its potential for incompatibility with the State's coastal management policies, and its greater than local significance.

(4) *Procedures.* Certain minimal procedural requirements are dictated by the lanaguage of section 306(e)(1)(C) of the Act. These are that:

(i) Prior to approving or disapproving the consistency of a development plan or project with the management program, public notice be provided. Such public notice should be provided in those communities most likely to be affected by the proposal. Further, such public notice should provide information on the nature of the proposal (such as size, location, type, etc.), where further information is available, and notice of hearing dates, if any;

(ii) There be the opportunity for hearings. Hearings may be defined as public hearings or such other hearings format as may be permitted under a State's Administrative Procedures Act or pursuant to an agency's administrative or operating regulations, or provisions for providing written comments.

§ 923.43 Authorities related to uses of regional benefit.

(a) *Requirement.* In addition to the requirement of section 923.13 to determine what constitute uses of regional benefit, States must provide for a method of assuring that local land and water use regulations within the coastal zone do not unreasonably restrict or exclude land and water uses of regional benefit. In order to meet the requirements of this section, States must identify those techniques, including legal authorities, that will be used to assure that unreasonable restrictions or exclusions by local land and water use regulations shall not occur.

(b) *Comment.* Statutory Citation, Subsection 306(e)(2):

> Prior to granting approval, the Secretary shall also find that the program provides: * * * (2) for a method of assuring that local land and water use regulations within the coastal zone do not unreasonably restrict or exclude land and water uses of regional benefit.

(c) *Comment.* Following are some examples of acceptable techniques that may be used to assure that local regulations do not unreasonably restrict or exclude uses of regional benefit. These examples are not exclusive, but rather are illustrative of approaches that will meet the requirements of this section:

(1) Statewide siting laws that supercede local regulations when necessary;

(2) Assurance that an adequate (or excessive) amount of specific sites are set aside to meet a projection of reasonable and forseeable demand for different uses of regional benefit through:

(i) State acquisition programs for sites as the need arises for particular uses of regional benefit;

(ii) provision of sites in local maps or ordinances; or

(iii) State guidelines defining uses of regional benefit and requiring their consideration as local implementation programs are developed.

If a State follows examples (ii) or (iii), that State must have the ability to assure that if local maps, ordinances or programs are changed, such changes will not result in an insufficient number of sites throughout the coastal zone to meet projected demands;

(3) Definition of what constitutes unreasonable restrictions or exclusions and establishment of an administrative or judicial mechanism to deal with such restrictions or exclusions as they occur. Under this approach, the two essential elements are:

(i) A specific definition of what constitutes an unreasonable restriction or exclusion in order to provide the basis for an appeal or other action to the administrative or judicial mechanism. States may wish to define "an unreasonable restriction or exclusion" along similar lines to what would constitute "arbitrary or capricious" zoning action in order to provide the same grounds for action;

(ii) Provision of standing to some party—either a State agency, a local government, a landowner, or an aggrieved party—to challenge an allegedly unreasonable restriction or exclusion.

§ 923.44 Air and water pollution control requirements.

(a) *Requirement.* In order to fulfill the requirements of section 307(f) of the Act, States must incorporate into their programs requirements established pursuant to the Federal Water Pollution Control Act (FWPCA) as amended, and the Clean Air Act (CAA) as amended.

(b) *Comment.* Statutory Citation, Subsection 307(f):

> Notwithstanding any other provision of this title, nothing in this title shall in any way affect any requirement (1) established by the Federal Water Pollution Act as amended, or the Clean Air Act as amended, or (2) established by the Federal Government or any state or local government pursuant to such Acts. Such requirements shall be incorporated in any program developed pursuant to this title and shall be the water pollution control and air pollution control requirements applicable to such program.

(c) *Comment.* Incorporation. (1) With respect to the document submitted for approval, it is sufficient that the program state that the requirements of the FWPCA and CAA are the minimum water and air pollution control requirements applicable to the management program and are incorporated by reference. However, to be truly meaningful, incorporation of the air and water quality requirements should involve their consideration during program development, especially with respect to use determinations and designation of areas for special management.

(2) Following is a table of the most important Clean Air Act requirements. These requirements are categorized as either uniform, nationwide requirements or non-uniform requirements applicable to a specific State or local area. The first category of requirements is established in the Clean Air Act or by the Environmental Protection Agency (EPA), pursuant to provisions of the Act, and applies uniformly in all areas of the country. The second category of requirements is based on the nature of air quality problems that exist or are forecast in coastal areas, in locations where emission sources may affect air quality in coastal areas, and in other areas of a State. The majority of the second category of requirements will be included in the State Implementation Plans (SIPs) required by the Clean Air Act.

TABLE.—*Clean Air Act requirements*

Uniform, statewide requirements	*Nonuniform requirements (SIP's)*
National ambient air quality standards.	New source review.
Motor vehicle emission standards (except California).	Emissions or air quality standards more stringent than Federal standards.
New source performance standards.	Prevention of significant deterioration.
National emissions standards for hazardous air pollutants.	Prevention of deterioration in nonattainment areas.
	Other attainment or maintenance such as transportation control measures.

(3) Water quality standards are established by promulgation or EPA approval of State standards, taking into consideration public water supplies, protection and propagation of fish, shellfish and wildlife, recreation, agriculture, industry and navigation. EPA itself develops standards on effluent limitations, new source performance standards, pre-treatment standards and toxic pollutant discharge standards.

(4) More stringent standards must be incorporated into a management program where such are developed pursuant to procedures provided for in the Clean Air Act and Federal Water Pollution Control Act and where such standards can be enforced under State authorities.

(i) In such cases, if incorporation of these more stringent standards leads to the restriction or exclusion of some facilities in which there is a national interest in their siting, such exclusion or restriction is established pursuant to the requirements of the Clean Air Act and Federal Water Pollution Control Act in which there is also a national interest.

(ii) Where more stringent requirements are incorporated, these should be explicitly referenced as such in the management program. Whether or not the additional requirements per se must be included in the body of the management program document, as an appendix, or as a separate reference will depend on the nature and detail of these requirements. States should consult with OCZM on this matter.

§ 923.45 Organizational structure.

(a) *Requirement.* In order to fulfill the requirements of subsections 305(b)(6) and 306(c)(6) of the Act, States must describe the organizational structure that will be used to implement and administer the management program. This description must include a discussion of those State and other agencies, including local governments, that will have responsibility for administering, enforcing and/or monitoring those authorities or techniques required pursuant to the following subsections of the Act: 306(c)(2)(B); 306(c)(7); 306(d)(1) and (2); 306(e)(1) and (2) and 307(f). Further, the State must describe the relationship of these administering agencies to the State agency designated pursuant to subsection 306(c)(5) of the Act.

(b) *Comment.* Statutory Citation, Subsection 305(b)(6):

> The management program for each coastal state shall include * * * (6) A description of the organizational structure proposed to implement such management program including the responsibilities and interrelationships of local, areawide, state, regional and interstate agencies in the management process.

(c) *Comment.* Statutory Citation, Subsection 306(c)(6):

> Prior to granting approval of a management program submitted by a coastal state, the Secretary shall find that * * * (6) the state is organized to implement the management program required under paragraph (1) of this subsection.

(1) The main purpose of this requirement is to provide a clear understanding of the entities that have responsibility for administering various aspects of the management program and the interrelationship of these entities.

§ 923.46 Designated State agency.

(a) *Requirement.* In order to fulfill the requirement of subsection 306(c)(5) of the Act, the Governor must designate a single State agency to receive and administer section 306 grants. This State agency shall be fiscally and programmatically responsible for the grants and further must have the following capabilities:

(1) the fiscal and legal capability to accept and administer grant funds, to make contracts or similar arrangements (such as passthrough grants) with participating agencies for the purpose of carrying out specific management tasks and to account for the expenditure of implementation funds by any recipient of such monies.

(2) the administrative capability to monitor and evaluate the management of the State's coastal resources by the various agencies and/or local governments with specified responsibilities under the management program (irrespective of whether such entities receive section 306 funds); to make periodic reports to OCZM, the Governor, or the State legislature, as appropriate, regarding the performance of all agencies involved in the program. The agency must be capable of presenting evidence of adherence to the management program or justification for deviation from the program as part of the review of State performance required by section 312 of the Act; and

(3) the ability to request approval from the Associate Administrator for amendments or refinements to the management program, if and when appropriate.

(b) *Comment.* Statutory Citation, Subsection 306(c)(5):

V42167 AUG 29 77 UMI

Prior to granting approval of a management program submitted by a coastal state, the Secretary shall find that • • • (5) The Governor of the state has designated a single agency to receive and administer the grants for implementing the management program required under paragraph (1) of this section.

(c) *Comment.* The last two requirements in (a) above should be read in close conjunction with those of Subpart J—Review of Approved Management Programs, which reals with review of performance after approval, amendments, or refinements to management programs, and termination and withdrawal of funding.

(d) *Comment.* The 306 agency designation is designed to establish a single point of accountability for prudent use of administrative funds in the furtherance of the management program and for monitoring of management activities. Designation does not imply that this single agency need be a "super agency" or the principal implementation vehicle. It is, however, the focal point for proper administration and evaluation of the State's program and the entity to which OCZM will look when monitoring and re-evaluating a State's program during the administration phase.

(e) *Comment.* The requirements for the single designated agency contained herein need not be viewed as confining or otherwise limiting the role and responsibilities which may be assigned to this agency. It is up to the State to decide in what manner and to what extent the designated State agency will be involved in actual program implementation or enforcement. In determining the extent to which this agency should be involved in program implementation or enforcement, specific factors should be considered, such as the manner in which local, municipal and regional authorities are involved in program implementation, the administrative structure of the State, the authorities to be relied upon and the agencies administering such authorities. Because the designated State agency may be viewed as the best vehicle for increasing the unity and efficiency of a management program, the State may want to consider the following in arriving at a designation.

(1) Whether the designated State entity has a legislative mandate to coordinate other State or local programs, plans and/or policies within the coastal zone;

(2) To what extent linkages already exist between the entity, other agencies, and local governments;

(3) To what extent management or regulatory authorities affecting the coastal zone presently are administered by the agency; and

(4) Whether the agency is equipped to handle monitoring, evaluation and enforcement responsibilities.

§ 923.47 Documentation.

(a) *Requirement.* In order to fulfill the requirements of subsections 306(c)(4), (5), (6) and (7), documentation is required to the effect that the Governor:

(1) Has reviewed and approved as State policy the management program, and any changes thereto, submitted for the approval of the Associated Administrator;

(2) Has designatd a single State agency to receive and administer implementation grants;

(3) Attests to the fact that the State has the authorities necessary to implement the management program; and

(4) Attests to the fact that the State is organized to implement the management program.

This documentation may be contained in the transmittal signed by the Governor which accompanies the management program submission.

(b) *Comment.* This requirement for a statement of endorsement by the Governor is intended to make clear that the management program is an enforceable instrument of State policy and to assure gubernatorial commitment in carrying out the program.

Subpart F—Coordination, Public Involvement and National Interests

§ 923.50 General.

(a) Coordination with governmental agencies having interests and responsibilities affecting the coastal zone, and involvement of interest groups as well as the general public are essential elements in the development and administration of a coastal management program. The coordination requirements of this subpart are intended to lead to substantive inputs into the management program as submitted for approval. Evaluation and incorporation of these inputs is necessary to achieve a proper balancing of diverse interests. The policies of section 303 of the Act require that a balancing of varying, sometimes conflicting, interests be achieved, including:

(1) The preservation, protection, development and, where possible, the restoration or enhancement of coastal resources;

(2) The achievement of wise use of coastal land and water resources with full consideration having been given ecological, cultural, historic, and esthetic values and needs for economic development; and

(3) The involvement of the public, of Federal, State and local governments and of regional agencies in the development and implementation of coastal management programs.

(b) *Comment.* Statutory Citation, Section 303:

The Congress finds and declares that it is the national policy (a) to preserve, protect, develop, and, where possible, to restore or enhance the resources of the Nation's coastal zone for this and succeeding generations, (b) to encourage and assist the states to exercise effectively their responsibilities in the coastal zone through the development and implementation of management programs to achieve wise use of the land and water resources of the coastal zone giving full consideration to ecological, cultural, historic, and esthetic values as well as to needs for economic development, (c) for all Federal agencies engaged in programs affecting the coastal zone to cooperate and participate with state and local governments and regional agencies in effectuating the purposes of this title, and (d) to encourage the participation of the public, of Federal, state and local governments and of regional agencies in the development of coastal zone management programs. With respect to implementation of such management programs, it is the national policy to encourage cooperation among the various state and regional agencies including establishment of interstate and regional agreements, cooperative procedures, and joint action particularly regarding environmental problems.

(c) Coordination with and participation by various units and levels of government, interest groups and the general public shall begin early in the program development process and shall occur continuously throughout the process on a timely basis to assure that such efforts will result in substantive inputs into a State's management program. State efforts should be devoted not only to obtaining information necessary for developing the management program but also to obtaining views on what is proposed for implementation and to responding to concerns by interested parties. The requirements for intergovernmental coordination and public participation continue after program approval. This subpart, therefore, deals with requirements for coordination with governmental and private bodies to assure that their interests are fully articulated and considered during the program development process and that procedures are created to insure continued consideration of their viewpoints during program implementation. In addition, this Subpart deals with mediation procedures for serious disagreements that occur during program development. Accordingly, this Subpart deals with the following subsections of the Act: 306(c)(1)—Opportunity for Full Participation; 306(c)(2)(A)—Plan Coordination; 306(c)(2)(B)—Continued State-Local Consultation; 306(c)(3)—Public Hearings; 306(c)(8)—Consideration of National Interests; 307(b)—Federal Consultation; and 307(h)—Mediation.

§ 923.51 Federal-State consultation.

(a) *Comment.* The requirements of subsections 306(c)(1) and 307(b) of the Act and those of subsections 307 (c) and (d) establish reciprocal State-Federal relationships. It is in the context of these relationships that the requirements of this section should be read. In exchange for providing relevant Federal agencies with the opportunity for full participation during program development and for adequately considering the views of such agencies, States can effectuate the Federal consistency provisions of subsections 307 (c) and (d) of the Act (See 15 CFR Part 930).

(b) *Requirement.* In order to meet the requirements of section 306(c)(1) of the Act for the opportunity of full participation by relevant Federal agencies in the development of a State's management program and in order to meet the requirements of subsection 307(b) of the Act that the views of Federal agencies principally affected by a State's management program have been adequately considered, States must:

(1) Contact the office of each relevant Federal agency listed in § 923.2(d) and such other Federal agencies as may be relevant, owing to a State's particular circumstances, early in the development of its management program. The purpose of such contact is to develop mutual arrangements or understandings regarding that agency's participation during program development;

(2) Provide for Federal agency input on a timely basis as the program is developed. Such input shall be related both to information required to develop the management program and to evaluation of and recommendations concerning various elements of the management program;

(3) Summarize the nature, frequency and timing of contacts with relevant Federal agencies, including attempts to resolve differences, if any;

(4) Evaluate Federal comments received during the program development process and, where appropriate, accommodate the substance of relevant comments in the management program; and

(5) Indicate the nature of major Federal agency comments provided during program development (either by including copies of comments or by summarizing comments) and state any major comments or conflicts between the management program proposals and Federal views that have not been accommodated or resolved at the time of program submission and the reasons therefor.

(c) *Requirement.* With respect to the requirements of (b)(4) above, States must consider and evaluate relevant Federal agency views or comments about the following:

(1) The management of coastal resources for preservation, conservation, development, enhancement or restoration purposes, including statements of national interest policies or claims related thereto;

(2) Statements of national interests in the planning for or siting of facilities which are more than local in nature;

(3) Uses which are subject to the management program;

(4) Areas which are of particular concern to the management program; and

(5) Federally developed or assisted plans that must be coordinated with the management pursuant to subsection 306(c)(2)(A) of the Act. (See § 923.56 for more detail on this last requirement).

(d) *Requirement.* In order to fulfill his/her responsibilities under subsection 306(c)(1), the Associate Administrator shall find that adequate opportunity for full participation by relevant Federal agencies has been provided if a State has:

(1) Contacted relevant Federal agencies;

(2) Provided timely opportunities for relevant Federal agency participation and input; and

(3) Advised these agencies of public hearings on the management program.

(e) *Requirement.* In order to fulfill his/her responsibilities pursuant to subsection 307(b), the Associate Administrator shall determine whether State consideration of relevant Federal agency views, during program development, has been adequate, based on the nature and reasonableness of a State's evaluation of and response to relevant Federal agency views that relate to:

(1) The substantive requirements of the Act contained in section 305. These requirements pertain to boundaries, uses subject to management, areas of particular concern, legal authorities, guidelines on priorities of uses, organization, shorefront planning process, energy facility planning process, and erosion planning process;

(2) Federal agency statements of national interests. Federal agency assertions that inadequate consideration has been afforded their views, when such views relate to matters not within the purview of the Act or these regulations, will not deter the Associate Administrator from making the findings necessary pursuant to subsection 307(b) of the Act.

(f) *Comment.* Statutory Citation, Subsection 306(c)(1):

Prior to granting approval of a management program submitted by a coastal state, the Secretary shall find that:

(1) the state has developed and adopted a management program for its coastal zone • • • with the opportunity for full participation by relevant Federal agencies.

(1) Following are some procedures States should use to insure the effectiveness of their consultation efforts. Officially designated regional or field contacts of relevant Federal agencies should be informed early of the management program's overall design and specific applicable issues and should be briefed periodically at important stages in the program development process. Policies, criteria for determining use permissibility, designations or areas of particular concern and other major elements of the management program should be made available for agency review as these elements are developed and considered by the States. Individual consultation, as well as group presentations, should become more substantive and specific as the program moves toward submission. Individual consultations with relevant Federal agencies should be particularly useful as the State establishes its Federal consistency procedures and as it determines which Federal activities, projects, licenses, permits, and assistance it will want subject to the consistency requirements of subsection 307 (c) and (d) of the Act.

(2) At the earliest practicable time in the process of developing the management program relevant Federal agencies should advise the State agency of the extent of their interests in the development of the management program. In particular, Federal agencies should discuss with the State agency the extent to which Federal activities, projects, regulatory actions and/or assistance programs may affect coastal resources. Federal agencies are encouraged to provide the State agency with their interpretations of various national interests related to the planning for and siting of facilities that are more than local in nature and/or the conservation of various coastal resources. (See section 923.52 for more detail on national interest.) Federal agency statements on national interests should be directed to those policies and issues a State's management program proposes to address or those which a Federal agency believes the management program should address. Federal agencies should provide technical information and other forms of assistance to aid States in their program development efforts.

(g) *Comment.* Statutory Citation, Subsection 307(b):

The Secretary shall not approve the management program submitted by a State pursuant to section 306 unless the views of Federal agencies principally affected by such program have been adequately considered.

(1) In addition to the consideration of relevant Federal agency views required during program development, Federal agencies will have the opportunity to provide further comment during the program review and approval process. (See Subpart H for details on this process.) Moreover, in the event of a serious disagreement between a relevant Federal agency and designated State agency that relates to those elements required in a State's management program pursuant to subsection 305(b) of the Act or that relates to adequate consideration of national interests pursuant to subsection 306(c)(8) of the Act, the mediation provisions of subsection 307(h)(1) of the Act are available. (See § 923.54 for details on mediation.)

§ 923.52 Consideration of national interests.

(a) *Requirement.* The requirements of subsection 306(c)(8) to consider adequately the national interest involved in the planning for and siting of facilities which are necessary to meet other than local requirements must be met within the context of balancing a national interest in the planning for and siting of such facilities with other national interests related to coastal resource conservation and protection. This balancing is necessary to meet the national policy objectives of section 303 of the Act. Therefore, in meeting the requirements of this section, States must:

(1) Describe national interests considered during program development and the sources thereof;

(2) Indicate how competing national interests have been weighed and how this weighing is reflected in the substance of the management program;

(3) Describe a process for continued consideration of national interests during program implementation.

(b) *Requirement.* With specific reference to meeting the requirement for adequate consideration of the national interest in the planning for and siting of energy facilities in, or which significantly affect, a State's coastal zone, States shall, in addition to the requirements of (a) above:

(1) Consider any applicable interstate energy plan or program; and

V 42 167 AUG 29 77 UMI

(2) Meet the requirements for an energy facility planning process pursuant to the requirements of 923.14, except that:

(i) States seeking approval of a management program prior to October 1, 1978 that do not meet the requirements of subsection 305(b)(8) of the Act shall:

(A) Describe existing or developing management program standards or policies as these apply to energy facility planning and siting considered to be in the national interest; and

(B) Describe briefly the status of the planning process required pursuant to subsection 305(b)(8) of the Act and how it has dealt with or will deal with the consultation and evaluation that are necessary for the consideration of national interests related to energy facility planning and siting.

(c) *Comment.* The 1976 amendments to subsection 306(c)(8) of the Act stress adequate consideration of the national interest in the planning for and siting of energy facilities in or significantly affecting a State's coastal zone. The 1976 amendments also provide in subsection 305(b)(8) of the Act for a specific process related to energy facilities including a process for anticipating and managing the impacts for such facilities. The requirements for that planning process are set forth in section 923.14 and in more detail in 15 CFR 920.18. The Congress intended this planning process to complement the evaluation of varying national interests pursuant to subsection 306(c)(8) of the Act. It is for this reason that the more specific requirements of (b) above are imposed.

(d) *Comment.* Statutory Citation. Subsection 306(c)(8):

Prior to granting approval of a management program submitted by a coastal state, the Secretary shall find that: • • • (8) The management program provides for adequate consideration of the national interest involved in planning for, and in the siting of, facilities (including energy facilities in, or which significantly affect, such state's coastal zone) which are necessary to meet requirements which are other than local in nature. In the case of such energy facilities, the Secretary shall find that the state has given such considerations to any applicable interstate energy plan or program.

(e) *Comment.* In determining the nature of national interests associated with the planning for and siting of facilities that are more than local in nature, States should consult with Federal and other State agencies having responsibilities related to these interests as well as with industries and other relevant entities to determine the potential regional, interstate, national and/or international demand for such facilities in each State. Moreover, in determining the nature of national interests involved in the planning for and siting of certain facilities, States also should consult with Federal and other State agencies involved in resource conservation and protection as well as with other relevant entities to determine the nature of resource conservation and protection interests affecting siting considerations. Other factors that should enter into a State's consideration of national interests involved in planning for and siting of certain facilities are the configuration and size of a State's coastal zone; the quantity, quality and distribution of various coastal resources; and the coastal-dependent nature of those facilities. Below are two tables that list (1) uses that may have facilities associated with them, the planning for and siting of which may be in the national interest and (2) resources in which there may be a national interest. The basis for determining the nature of the national interests associated with these facilities and resources is discussed in the commentaries that follow.

TABLE 1.—*Facilities in which there may be a national interest in planning or siting*

Uses	Associated facilities	Associated Federal agencies
National defense and aerospace	Military bases and installations; defense manufacturing facilities; aerospace facilities.	Department of defense, National Aeronautics and Space Administration.
Energy production and transmission	Oil and gas rigs, storage, distribution and transmission facilities; power plants; deep-water ports; LNG facilities; geothermal facilities; coal mining facilities.	Federal Energy Administration, Federal Power Commission, Nuclear Regulatory Commission, Energy Research and Development Administration, Department of Interior, Department of Commerce, Department of Transportation, Corps of Engineers.
Recreation	National seashores, parks, forests; large and outstanding beaches and recreational waterfronts.	Department of Interior, Department of Agriculture.
Transportation	Interstate highways, railroads; airports; ports; aids to navigation.	Department of Transportation, Department of Commerce, Corps of Engineers.
Regional water treatment Plants.	Sewage treatment plants; desalinization plants.	Environmental Protection Agency

TABLE 2.—*Resources in which there may be a national interest*

Resource	Major related Federal legislation	Associated Federal agencies
Water	Federal Water Pollution Control Act	Environmental Protection Agency, Corps of Engineers.
Air	Clean Air Act	Environmental Protection Agency.
Wetlands	Federal Water Pollution Control Act; Fish and Wildlife Coordination Act.	Corps of Engineers, Environmental Protection Agency, Department of Interior, Department of Commerce.
Endangered flora and fauna	Endangered Species Act	Department of Interior, Department of Commerce.
Floodplains and erosion hazard areas.	Flood Insurance Act	Housing and Urban Development, Corps of Engineers, Department of Agriculture.
Barrier islands	Coastal Zone Management Act	Department of Interior, Department of Commerce.
Historic sites and districts	National Historic Preservation Act	Advisory Council on Historic Preservation.
Wildlife refuges and reserves	Pitman-Robinson Act; Dingall-Johnson Act; Land and Water Conservation Fund Act.	Department of Interior, Department of Commerce.
Areas of unique cultural significance.	National Historic Preservation Act	Advisory Council on Historic Preservation.
Minerals	Mineral Leasing Act	Department of Interior.
Prime agricultural lands	Homestead Act	Department of Agriculture.
Forests	National Forest Management Act	Department of Agriculture, Department of Interior.
Living marine resources	Fisheries Conservation and Management Act.	Department of Commerce, Department of Interior.

(f) *Comment.* The sources for deriving national interests to be considered during program development and implementation, as required in (a)(1) and (3) above, are numerous. In considering expressions of national interests, States should evaluate the following:

(1) Policy statements from the President, as for example the National Energy Plan; the National Environmental Message and associated executive orders on wetlands and floodplains; the National Outdoor Recreation Plan;

(2) Federal laws and legislation, as for example, the Federal Water Pollution Control Act; the Clean Air Act; the National Historic Preservation Act; the Outer Continental Shelf Lands Act; the Energy Production and Conservation Act;

(3) Statements from Federal agencies regarding national interests, including such statements as may be provided by NOAA;

(4) Plans, reports and studies from Federal, State, interstate agencies or from interstate groups, as for example interstate energy plans; Department of Interior's "Islands of America" report;

(5) Testimony from public hearings or other public input.

(g) *Comment.* The requirements of this section are intended to assure that national interests in facilities and resources are recognized and evaluated as part of the development of the management program and that these interests continue to be considered after a program is approved. Accordingly, in evaluating the adequacy of a State's consideration during program development of national interests involved in the planning for or siting of facilities which may be more than local in nature, the Associate Administrator shall assess the reasonableness of:

(1) The claims made and sources used to determine national interests;

(2) Consideration given in the management program to varying national interests, including the relative weighing of competing interests; and

(3) Responses to major siting concerns raised by Federal agencies or other

interested parties, including consideration of any applicable interestate energy plan or program.

States are not required to accommodate the siting of a particular facility in a specific location by virtue of these requirements. Thus, for example, adequacy of response to siting demands shall be evaluated within the requirements of the Federal Water Pollution Control Act, as amended, and the Clean Air Act, as amended, because of the requirements imposed on State programs by section 307(f) of the Act. Accordingly, restrictions or exclusions imposed on facilities in which there may be a national interest, that are result of adherence to the Federal Water Pollution Control Act or the Clean Air Act or are developed pursuant to the procedures of those Acts will not result in a finding of inadequate consideration of the national interest in the siting of such facilities.

§ 923.53 Federal consistency procedures.

States shall include in their management program submission the procedures they will use to implement the Federal consistency provisions of subsection 307(c) and (d) of the Act once their programs are approved. States also shall include listings of those Federal activities, development projects, licenses, permits, and assistance programs that will be subject to these provisions. For further guidance on structuring the implementing procedures, see 15 CFR Part 930.

§ 923.54 Mediation.

(a) The Act provides for the mediation of "serious disagreements" between any Federal agency and a coastal State during the development or initial implementation of a management program. This provision in the Act further reinforces Congress' acknowledgement that State-Federal differences may arise and should be resolved during program development or implementation. In certain cases, mediation by the Secretary or his/her designee, with the assistance of the Executive Office of the President, may be an appropriate forum for conflict resolution. This section describes the conditions of and processes for mediation of serious disagreements that may arise during program development. Mediation provisions for handling serious disagreements during full program implementation are quite similar and are discussed in 15 CFR Part 930.

(b) *Comment.* Statutory Citation, Subsection 307(h):

In the case of serious disagreement between any Federal agency and a coastal state:
(1) in the development or the initial implementation of a management program under section 305• • •

The Secretary, with the cooperation of the Executive Office of the President, shall seek to mediate the differences involved in such disagreement• • •

(c) State-Federal differences that arise during program development should be addressed initially by the parties involved. The Office of Coastal Zone Management shall be available to assist the parties to resolve informally any disagreement that may arise. Whenever such a disagreement is identified, the Federal and State parties shall inform the Associate Administrator in writing, stating the point(s) of disagreement, and the reason(s) therefor, and may request OCZM's informal assistance.

(d) In the event a serious disagreement persists, after having been subject to informal attempts at resolution, either the head of the Federal agency or the Governor or the head of the State agency designated pursuant to 15 CFR 920.52(b) may notify the Secretary in writing of the continued existence of the serious disagreement, and may request that the Secretary seek to mediate the disagreement. A copy of the written request must be sent to the disagreeing agency and to the Associate Administrator.

(e) Within 15 days following receipt of a request for mediation, the disagreeing agency shall transmit a written response to the Secretary, and to the agency requesting mediation indicating whether it wishes to participate in the mediation process. The Secretary will not provide mediation assistance unless all parties to the serious disagreement agree to participate.

(f) If both parties agree to mediation, the Secretary shall schedule a mediation conference to be attended by representatives from the Office of the Secretary, and the disagreeing Federal and State agencies. The Secretary shall provide the parties at least 10 days notice of the time and place set for the mediation conference.

(g) Secretarial mediation efforts shall last only so long as the parties agree to participate. The Secretary shall confer with the Executive Office of the President, as necessary, during the mediation process.

(h) Mediation shall terminate: (1) At any time the parties agree to a resolution of the serious disagreement, (2) if one of the parties withdraws from mediation, (3) in the event the parties fail to reach a resolution of the serious disagreement within 15 days following Secretarial mediation efforts, and the parties do not agree to extend mediation beyond that period, or (4) for other good cause.

(i) If the conflict resolution efforts described above do not resolve the disagreement, the Associate Administrator shall determine whether inclusion in the management program of the State agency's position in the disagreement affects the Associate Administrator's ability to approve the State's management program. The Associate Administrator shall communicate his/her determination in writing, with the reason(s) therefor, to the parties to the disagreement.

§ 923.55 Full participation.

(a) *Requirement.* In addition to consultation with Federal agencies, subsection 306(c)(1) of the Act requires that the opportunity for full participation in program development be provided State agencies, local governments, regional organizations, port authorities and other interested public or private parties. To meet this requirement, States shall:

(1) Develop and make available general information regarding the program design, its content and its status throughout program development;

(2) Provide a listing, as comprehensive as possible, of all governmental agencies, regional organizations, port authorities and public and private organizations likely to be affected by or have a direct interest in the development and implementation of the management program;

(3) Indicate the nature of major comments received from interested or affected parties and the nature of the State's response;

(4) Coordinate the contents of the management program with local, areawide or interstate plans applicable to areas within the coastal zone existing on January 1 of the year in which the State's management program is submitted to the Associate Administrator;

(5) Establish a mechanism to provide for continuing coordination with affected parties after program approval, including specifically establishment of a mechanism for State-local consultation with respect to State activities that may conflict with local zoning; and

(6) Hold public hearings during the development of the management program, at least one of which shall be on the entire program.

These requirements are discussed in greater detail in the commentary that follows and in the three sections that follow.

(c) *Comment.* Statutory Citation, Subsection 306(c)(1):

Prior to granting approval of a management program submitted by a coastal state, the Secretary shall find that: (1) the state has developed and adopted a management program for its coastal zone • • • with the opportunity of full participation by • • • state agencies, local governments, regional organizations, port authorities, and other interested parties, public and private • • •

(d) *Comment.* As noted in the general introduction to this subpart, the most effective means for assuring that the opportunity for full participation has been provided is to initiate appropriate activities early during program development and to continue such efforts on a timely basis throughout the program development process. Moreover, the requirement to provide opportunities for input from and participation by interested or affected parties does not end with program approval, as witness subsection 306(c)(2)(B) of the Act which requires the establishment of a mechanism for continuing State-local consultation on particular matters after program approval. (See § 923.57 for details on the requirements of subsection 306(c)(2)(B).)

(e) *Comment.* Public information may take many forms, among which the following should be given consideration:

(1) Brochures and reports made available in places of public congregation such as libraries, government buildings, stores or transit facilities;

(2) Radio, television and personal presentations;

(3) Press announcements;

(4) Public meetings or hearings;

(5) Exhibits;

(6) Telephone "hot lines;" and

(7) Films and slide shows.

V42167A AUG 29 77 UMI

(f) *Comment.* States should also consider establishing advisory committees and/or technical advisory boards comprised of public citizens representing specific interests, local government representatives, and/or State and Federal agency representatives. These committees and boards may serve a number of useful purposes: providing information needed to develop the management program; serving as a conduit and evaluator of public interests and concerns; and determining major program directions.

§ 923.56 Plan coordination.

(a) *Requirement.* In order to meet the requirements of subsection 306(c)(2)(A) of the Act and the associated requirements of § 923.55(a)(4), States shall coordinate the contents of the management program with local, areawide or interstate plans applicable to areas within the coastal zone existing on January 1 of the year in which the State's management program is submitted to the Associate Administrator for approval. Evidence of coordination shall be documented in the management program by:

(1) Identifying local governments, areawide agencies designated pursuant to regulations established under section 204 of the Demonstration Cities and Metropolitan Development Act of 1966, regional agencies or interstate agencies which have plans affecting the coastal zone in effect on January 1 of the year in which the management program is submitted.

(2) Listing or providing a general summary of substantive contacts with these entities to coordinate the management program with their plans; and

(3) Identifying conflicts with those plans of a regulatory nature that are unresolved at the time of program submission and the means that will be used to attempt further coordination.

(b) *Comment.* Statutory Citation, Subsection 306(c)(2)(A):

Prior to granting approval to a management program submitted by a coastal state, the Secretary shall find that • • •

(2) The State has: (A) coordinated its program with local, areawide, and interstate plans applicable to areas within the coastal zone existing on January 1 of the year in which the state's management program is submitted to the Secretary, which plans have been developed by a local government, and areawide agency designated pursuant to regulations established under section 204 of the Demonstration Cities and Metropolitan Development Act of 1966, a regional agency, or an interstate agency • • •

(c) *Comment.* The process envisioned by this subsection of the Act should enable a State not only to avoid duplication of and conflict between its program and other plans applying within its coastal zone but also to draw upon the planning capabilities of and work already completed by a wide variety of local governments and other agencies. Particular attention shall be given to land use plans prepared pursuant to section 701 of the Housing and Urban Development Act of 1968, as amended; State and areawide waste treatment facility or management plans prepared pursuant to sections 201 and 208 of the Federal Water Pollution Control Act, as amended; plans and designations made pursuant to the Flood Insurance Act of 1974; and any interstate energy plans or programs adopted by a governmental entity as of January 1 of the year in which the management program is submitted. States shall take into consideration the contents of such Federal interagency agreements as OCZM has entered into with respect to this Act, as for example the OCZM–HUD; OCZM–EPA interagency agreements.

(d) *Comment.* In order to meet the requirements of (a) (2) and (3) above use of State and areawide clearinghouses, established pursuant to OMB Circular A–95 (revised) will suffice: (1) as a means of contacting all relevant entities provided that such entities are among the recipients of clearinghouse notices and (2) as a mechanism to provide for the identification and resolution of conflicts.

§ 923.57 Continuing consultation.

(a) *Requirement.* In order to meet the requirements of subsection 306(c)(2)(B) of the Act and the associated requirements of section 923.55(a)(5), States shall:

(1) Establish a mechanism which will provide for continuing consultation and coordination after program approval between local governments, regional, areawide, interstate and other State agencies with activities affecting the coastal zone and the State agency designated pursuant to subsection 306(c)(5) of the Act; and

(2) Establish a mechanism specifically designed to insure continued State-local government consultation on State management program decisions that would conflict with any local zoning ordinance, decision or other action.

(b) *Comment.* Statutory Citation, Subsection 306(c)(B):

Prior to granting approval to a management program submitted by a coastal state, the Secretary shall find that • • •

(2) The state has • • •

(B) established an effective mechanism for continuing consultation and coordination between the management agency designated pursuant to paragraph (5) of this section and with local governments, interstate agencies, regional agencies, and area-wide agencies within the coastal zone to assure the full participation of such local governments and agencies in carrying out the purposes of this title; except that the Secretary shall not find any mechanism to be "effective" for purposes of this subparagraph unless it includes each of the following requirements:

(i) Such management agency is required, before implementing any management program decision which would conflict with any local zoning ordinance, decision, or other action, to send a notice of such management program decision to any local government whose zoning authority is affected thereby.

(ii) Any such notice shall provide that such local government may, within the 30-day period commencing on the date of receipt of such notice, submit to the management agency written comments on such management program decision, and any recommendation for alternatives thereto, if no action is taken during such period which would conflict or interfere with such management program decision unless such local government waives its right to comment.

(iii) Such management agency, if any such comments are submitted to it, within such 30-day period, by any local government:

(I) is required to consider any such comments,

(II) is authorized, in its discretion, to hold a public hearing on such comments, and

(III) may not take any action within such 30-day period to implement the management program decision, whether or not modified or the basis of such comments.

(c) *Comment.* In meeting the requirement of (a)(1) above for establishing a general mechanism for continuing consultation and coordination, States should consider use of the OMB Circular No. A–95 (revised) Project Notification and Review System as the required mechanism provided that affected local governments, areawide, regional, interstate and other State agencies are part of the notification system.

(d) *Comment.* The purposes of the State-local consultation mechanism contained in subparagraphs (i), (ii) and (iii) of subsection 306(c)(2)(B) of the Act are:

(1) To provide explicitly in a State's management program for a mechanism to inform local governments with zoning authority of management program plans or policies which could conflict with such zoning authority;

(2) To allow local governments an opportunity to comment on State management program plans and policies which conflict with local government zoning;

(3) To require the State management agency to consider such comments, during which time it may hold a public hearing (at its discretion) on the matter, and to refrain from taking action to implement the proposed management program plan or policy during the comment period; and

(4) To permit the State management agency to implement the management program decision in the event the local government waives its right to comment, concurs with the proposed action, or takes action during the comment period which conflicts or interferes with the proposed State management program decision (in which case, a local government forfeits its right to comment).

(e) *Comment.* Coastal zone management development and implementation is a dynamic process. Congress recognized that an effective means for pursuing this process required not only increased efforts by coastal State governments, but also participation by local governments. In its amendment of section 306(c)(2)(B) of the Act, Congress specifically developed a provision that major State policies and plan decisions to be implemented pursuant to an approved State management program require notice to legal governments when such decisions could conflict with local government zoning. For the purposes of this section, the following terms shall have the following meanings:

(1) "Management agency" refers to the State agency designated by the Governor pursuant to subsection 306(c)(5) of the Act and to any other State agency responsible for implementing a management program decision;

(2) "Management program decision" refers to any major, discretionary policy decisions on the part of a management agency, such as the determination of permissible land and water uses, the designation of areas of particular concern or areas for preservation or restoration, or the decision to acquire property for public uses. Regulatory actions dictated by State legislation, such as individual permit actions, which are taken pursuant to these major decisions are not subject to the State-local consultation mechanism. Examples of what might constitute a major management program decision include, but are not limited to:

(i) A State management agency decision that a certain class of wetlands may not be filled and/or developed;

(ii) A decision prohibiting the development of non-water dependent facilities on certain shoreline areas;

(iii) A decision requiring that new development on the shoreline may not interfere with existing public rights of access to the sea, and that new developments of a certain magnitude are required to provide public access as part of the development;

(iv) A decision to acquire urban shoreland for recreational purposes; or

(v) Designation of coastal historic landmarks or natural areas as areas for preservation or restoration, when any of these are discretionary, and not legislatively mandated, decisions of a management agency.

(3) "Conflict" (with a local zoning ordinance, decision or other action). A State management program decision may be considered to be in conflict with a local zoning ordinance if the decision is incompatible with or contradictory to that ordinance. However, a State management program decision that consists of additional but different requirements shall not be considered to be in conflict with a local zoning ordinance, decision or other action;

(4) "Local zoning ordinance, decision or other action" refers to any local government land or water use action which regulates or restricts the construction, alteration or use of land, water or structures thereon or thereunder. These actions include zoning ordinances, variances, special exceptions, master plans and official maps. Accordingly, a local government has the right to comment on a State management program decision when such decision conflicts with the above specified actions;

(5) "Written comment" from local governments shall be submitted in writing to the State management agency and may include recommendations for alternative actions and/or a request for a public hearing on the management program decision.

(6) "Waiver" of the right of a local government to comment (thereby permitting a State agency to proceed immediately with implementation of the management program decision) shall result:

(i) following State agency receipt of a written statement on the part of local government:

(A) Waiving its right to comment; or

(B) concurring wth the management program decision; or

(C) Indicating the local government intends to take action which conflicts or interferes with the management program decision; or

(ii) Following a public statement by a local government to the effect of (A), (B) or (C) above; or

(iii) Following an action by a local government that conflicts or interferes with the management program decision.

A waiver of the right to comment or a waiver indicating concurrence may also be presumed if the local government fails to submit written comments to the State agency within the 30-day comment period. OCZM strongly encourages local governments not to effect a waiver by silence as this process causes needless delay in implementing a management program decision.

(f) *Comment.* The purpose of this notice and comment procedure is to enable State agencies and local governments to achieve a consensus, when appropriate and possible, with respect to proposed State land and water use decisions. Local governments are encouraged to submit comments to State agencies in order to try to assure that policies and plans developed at the State level have sufficient flexibility to accommodate the various and diverse needs of coastal communities. For example, in response to a State agency management decision proposing to prohibit development of non-water dependent commercial uses on the shoreline within the jurisdiction of a local government, that loacl government might comment that the restriction conflicts with an urban waterfront zoning ordinance that selectively permits such developments as a means of promoting the economic viability of a redeveloping area. Based on such comments, the State management agency might be persuaded to modify its original proposal. It should be noted, however, that the requirements of subsection 306(c)(2)(B) are not intended to deflect from one of the basic purposes of the Act—that of encouraging States to exercise effectively their responsibilities to achieve wise use of land and water resources of the coastal zone. Accordingly, while the purpose of this specific consultation requirement is to establish a process for discussion of differences, the ultimate administrative authority to resolve conflicts shall be the State management agency.

(1) State programs must detail a procedure whereby local governments with zoning authority are notified of management program decisions which will affect their jurisdiction. For purposes of this consultation mechanism, local governments are those defined in section 304(10) of the Act which have some form of zoning authority. Such notice must be in writing and must inform the local government of its right to submit comments to the State management agency in the event the proposed State management program decision conflicts with a local zoning ordinance decision or other action. States are encouraged to use, where possible, existing procedures such as those established in administrative procedures acts. The effect of providing such notice is to stay State action to implement its management decision for at least a thirty-day period unless the local government waives its right to comment.

(2) State management programs also must provide that the management agency adequately consider all comments received by local government(s). This consideration should include a written response by the management agency to the local government(s), within a reasonable period of time following receipt of local comments, as to the outcome of that agency's consideration of local comments. Such consideration may include a decision, at the discretion of the management agency, to hold a public hearing. The State management program also must set forth public notice and other hearing procedure requirements. In the event that a local government requests a public hearing and such a request is granted, the State management program may provide or require that the local government requesting such hearing shall provide the required public notice and/or meeting facility. In the event a public hearing is held, the management agency shall provide written response to the affected local government, within a reasonable period of time and prior to implementation of the management program decision, on the results of the agency's consideration of public hearing comments.

(3) State management programs shall include a provision indicating the procedures to be followed by a management agency regarding implementation of a management program decision following receipt of a local government's comments.

(4) State management programs are encouraged to include a provision requiring notification in writing from local governments to the appropriate State agency of any action taken during the 30-day comment period which conflicts or interferes with the proposed management program decision. State management programs also should include a provision for local governments to waive their right to comment. In those instances where the local government chooses to waive is opportunity to comment, or concurs with the State management decision, there is no need for further delay in implementing the proposed State management decision. In order to apprise the State agency of these views, local governments are strongly encouraged to transmit such views in writing to the State agency (using the procedure described in the State's management program). Otherwise, the State agency will be compelled to await unnecessarily the expiration of the 30-day comment period before proceeding with the proposed decision. A

V 42167 AUG 29 77 UMI

local government forfeits its right to comment on a proposed management agency decision and to request a public hearing when the local government takes action during the comment period which conflicts or interferes with the proposed management decision. Where a local government intends to take such conflicting or interfering action, OCZM strongly encourages local governments to so advise the State agency in writing.

(5) State management programs should indicate what action the State agency will take in the event a local government pursues a conflicting or interfering action. States are encouraged to develop their responses to conflicting local actions within the framework of sections 306(d)(1) and 306(d)(2) of the Act. Section 306(d)(1) of the Act provides, inter alia, that the State has the management authority to resolve conflicts among competing uses. Section 306(e)(2) of the Act requires that the management program provide for a method of assuring local land and water use regulations within the coastal zone do not unreasonably restrict or exclude land or water uses of regional benefit.

§ 923.58 Public hearings.

(a) *Requirement.* In order to meet the requirements of subsections 306(c)(1) and (c)(3) and section 311 of the Act and the associated requirements of section 923.55(a)(6), States shall:

(1) Hold a minimum of two public hearings during the course of program development, at least one of which will be on the total coastal management program;

(2) Provide a minimum of 30 days public notice of hearing dates and locations; and

(3) Make available, at the time of public notice, all agency materials pertinent to the hearings.

(b) *Comment.* Statutory Citation, Subsection 306(c)(1):

> Prior to granting approval of a management program submitted by a coastal state the Secretary shall find that:
> (1) The state has developed and adopted a management program for its coastal zone • • • after notice • • •

(c) *Comment.* Statutory Citation, Subsection 306(c)(3):

> Prior to granting approval of a management program submitted by a coastal state, the Secretary shall find that • • •
> (3) The state has held public hearings in the development of the management program. •

(d) *Comment.* Statutory Citation, Section 311:

> All public hearings required under this title must be announced at least thirty days prior to the hearing date. At the time of the announcement, all agency materials pertinent to the hearings, including documents, studies, and other data, must be made available to the public for review and study. As similar materials are subsequently developed, they shall be made available to the public as they become available to the agency.

(1) Notification of public hearings should provide the public the longest period of notice practical, but in no event should notice be less than the 30 day statutory minimum. Announcement of the hearings should be through media designed to inform the public—not merely to provide "technical notice." Therefore, in addition to any publication of legal notice as required by State law, resonably informative news releases should be made available to the news media in the affected communities.

(2) At the time of the announcement, all agency materials pertinent to the hearings, including documents, studies, the agenda for the hearings, and other data, must be made available to the public for review and study in the locale where the hearings are to be conducted.

(3) Hearings on the total management program do not have to be held on the actual document submitted to the Associate Administrator for section 306 approval. However, such hearing(s) must cover the substance and content of the proposed management program in such a manner that the general public, and particularly affected parties, have a reasonable opportunity to understand the impacts of the management program.

(4) Hearings should be held in those geographic areas which would be most affected by the issues under consideration at the hearing. Hearings on the total management program should be held in places within the State where all citizens of the State may have an opportunity to comment.

(5) In many cases, the population of the coastal zone fluctuates significantly with the seasons of the year. Efforts should be made to insure that hearings were held when those populations most likely to be affected are present.

(6) A verbatim transcript of the hearings need not be prepared but a comprehensive summary should be made available to the public within 45 days after the conclusion of the hearings. A copy of these summaries shall accompany the management program when it is submitted to the Associate Administrator for approval.

Subpart G—Miscellaneous

§ 923.60 General.

The purposes of this subpart are to provide guidance on (a) meeting the requirements of subsection 306(h) of the Act dealing with segmented management programs and (b) fulfilling the requirements for an environmental impact assessment which all management program submissions, whether for a State's total coastal zone or a segment, must contain.

§ 923.61 Segmentation.

(a) If a State intends to adopt its management program in two or more segments, it shall so advise the Associate Administrator as early as practicable, stating the reasons for segmenting the program and requesting the Assoicate Administrator's approval. In addition to meeting the approval requirements of these regulations, each segment of a management program must demonstrate that:

(1) The segment includes a geographic area on both sides of the coastal land-water interface;

(2) A timetable and budget have been established for the timely completion of the remaining segment(s); and

(3) The State will exercise policy control over each segment of its management program prior to and following its integration into a complete State management program. Demonstration of this control will include (i) completion of the management boundary determination for the entire coastal zone throughout the State and (ii) consideration of the national interest throughout the State's entire coastal zone in the planning for and siting of facilities cited in § 923.52.

(b) *Comment.* Statutory Citation, Section 306(h):

> At the discretion of the state and with the approval of the Secretary, a management program may be developed and adopted in segments so that immediate attention may be devoted to those areas within the coastal zone which most urgently need management programs: Provided, that the state adequately provides for the ultimate coordination of the various segments of the management program into a single, unified program, and that the unified program will be completed as soon as reasonably practicable.

(1) This section of the Act reflects a recognition that it may be desirable for a State to develop and adopt its management program in segments rather than all at once because of a relatively long coastline, developmental pressures or public support in specific areas, or earlier regional management programs already developed and adopted. It is important to note, however, that the ultimate objective of segmentation is completion of a management program for the coastal zone of the entire State in a timely fashion. Segmentation is at the State's option, but requires the approval of the Associate Administrator. States should notify the Associate Administrator as early as possible regarding intention to prepare a management program in segments.

(c) *Comment.* Continuing involvement at the State as well as local level in the development and implementation of segmented programs is essential. This emphasis on State participation and coordination with the program as a whole should be reflected in the individual segments of a management program. Regional agencies and local governments may play a large role in developing and carrying out such segmented programs, but there must be a continuing State voice throughout this process. This State involvement shall be expressed in the first segment of the management program in the form of evidence that (i) the boundaries of the coastal zone for the entire State have been defined (pursuant to Subpart D) and (ii) there has been adequate consideration of the national interest involved in the planning for and siting of facilities necessary to meet requirements which are other than local in nature (pursuant to § 923.52) for the State's entire coastal zone. These requirements are designed to assure that

the development of a Statewide coastal Zone management program proceeds in an orderly fashion and that segmented programs reflect accurately the needs and capabilities of the State's entire coastal zone which are represented in that particular segment.

(1) It is recognized that small islands may form separate and unique ecological units for which a segment of the management program may be established with relatively few problems. The Associate Administrator may waive certain requirements under this section related to segmented approval for islands. The requirements that the State must (1) provide an adequate consideration of the national interest in the planning for and siting of facilities necessary to meet requirements which are other than local in nature for the State's entire coastal zone and (2) define the boundaries of the coastal zone for the entire State may be waived if the Associate Administrator determines that their completion would serve no useful purpose in evaluating the merits of the application for approval of a small island segment.

(d) *Comment.* One of the distinguishing features of a coastal zone management program is its recognition of the relationship between land uses and their effect upon coastal waters, and vice versa. Segments should likewise recognize this relationship between land and water by including at least the dividing line between them, plus the lands and waters on either side which are mutually affected. In the case of a segment which is predominantly land, the boundaries shall include those waters which are directly and significantly impacted by land uses in the segment. Where the predominant part of the segment is water, the boundaries shall include the adjacent shorelands strongly influenced by the waters, including at least islands, transitional and intertidal areas, salt marshes, wetlands and beaches (or similar such areas in Great Lakes States). A segmented management program shall not be developed solely for the purpose of protecting or controlling a single coastal resource or use, however desirable that may be.

(e) *Comment.* Segmented management programs submitted for approval will be reviewed and approved in exactly the same manner as programs for complete coastal zones, utilizing the same approval criteria, plus those of this section.

§ 923.62 Environmental Impact assessments.

(a) *Requirement.* All State management program submissions must contain an environmental impact assessment that, following Council on Environmental Quality guidelines, will address the following items (although not necessarily in the same order presented below):

(1) A description of the proposed action;

(2) A description of the environment affected;

(3) The relationship of the proposed action to land and water use plans, policies, and controls for the area;

(4) The probable impact of the proposed action on the environment;

(5) Alternatives;

(6) Probable adverse environmental effects which cannot be avoided;

(7) The relationship between local, short-term uses of the environment and the maintenance and enhancement of long-term productivity;

(8) Irrevocable or irretrievable commitments of resources that would be involved in the proposed action should it be implemented; and

(9) Consultation and coordination with others.

(b) *Comment.* A number of these items should already be addressed in the State's program submission. In these cases a simple cross-referencing will be sufficient:

(1) The State's "description of the proposed action" should focus on the issues that the managament program is designed to address and the means by which these issues will be addressed through implementation of the management program. This should already be part of the basic program submission. Accordingly in the environmental impact assessment appendix, this item can be cross-referenced to the appropriate page(s) or section(s) of the submission. If a State is following the format for submission suggested in § 923.71, references to relevant portions of the "Summary," "Framework of Program Development," and "Policies" would be appropriate.

(2) The "description of the environment affected"—the State's coastal zone and the natural and manmade resources therein—also should already be part of the program document submitted for approval. Cross-reference should be made to relevant sections. If following the format suggested in § 923.71, reference to "Framework of Program Development" would be appropriate.

(3) Again, cross-reference to relevant sections of the program submission should suffice to explain "the relationship of the proposed action to land and water use plans, policies and controls to the areas." Particular reference should be made to those sections addressing the requirements of §§ 923.3—General Requirements; 923.11—Uses Subject to Management; 923.13—Uses of Regional Benefit; 923.41—Identification of Authorities; 923.42—Control Techniques; 923.43—Authoritics Related to Uses of Regional Benefit; and 923.56—Plan Coordination.

(4) The discussion of "the probable impact of the proposed action on the environment" is the major aspect a State will need to address as part of the environmental impact assessment appendix attached to its submission. The purpose of this discussion is to indicate, to the extent possible given data and time constraints, the environmental, social and economic changes that can be expected to result from implementation of the State's management program. In turn, this will provide information, either explicitly or implicitly, on both the level and distribution of costs and benefits to affected parties. In effect, this discussion should make explicit many of the assumptions that have gone into developing and framing a State's management program. The environmental and corresponding socio-economic impacts that can be expected to result from program implementation will depend, in large measure, on the nature of proposed implementation techniques. Moreover, not all aspects of the State's management program will necessarily involve changes and/or environmental impacts. This may be so particularly where States will be relying on pre-existing management and regulatory techniques. However, to the extent these existing techniques are applied in new ways and thereby create new impacts (such as greater efficiencies in permit processing or, conversely, increased time required for permit reviews), these changes should be noted. The level of specificity regarding probable impacts will vary depending on (i) the level of specificity contained in the management program itself, (ii) the size of the area to be managed, and (iii) the amount of time, money and personnel allocated to this task.

(5) The discussion of "alternatives" should focus on those alternatives that have been considered seriously and reviewed at some length by OCZM. In addition, alternatives which raised substantial public debate as a result of consultation and public participation during program development should be discussed. Usually these alternatives will relate to management techniques, boundaries and uses subject to management. To the extent these alternatives are discussed in the body of the management program document, cross-reference will suffice.

(6) Since the program document probably will not contain an explicit discussion of "probable adverse environmental impacts which cannot be avoided," this aspect should be addressed in the environmental impact assessment appendix. Where the program encourages certain uses or development activities which may have a probable adverse environmental impact, these should be identified. In addition, since "environmental impacts" may include socio-economic impacts of an adverse nature, these also should be discussed. This discussion may be done in conjunction with a discussion of the "relationship between local, short-term uses of the environment and the maintenance and enhancement of long-term productivity." It is also possible to combine both of these discussions with that of "probable impact of the proposed action on the environment" provided that it is clearly stated that all three aspects have been combined into one discussion in the environmental impact assessment.

(7) In discussing the "relationship between local, short-term uses of the environment and the maintenance and enhancement of long-term productivity," it may be reasonable to assume that, while

V42I167 AUG 29 77 UMI

there may be short-term negative impacts on particular aspects of the environment, over the long-term, effectuation of the State's management program should contribute to maintenance, and possibly enhancement, of productivity. However, where short-term environmental disruptions can be identified, such identification should be made and discussed.

(8) Again, since the program document probably will not contain an explicit discussion of "irretrievable commitments of resources," this aspect should be addressed in the environmental impact assessment appendix. The option exists to include this discussion in with some of the other aspects indicated above.

(9) Discussion of "consultation and coordination with others" should already be addressed in the program document and/or as an appendix documenting opportunities for full participation. Accordingly, appropriate cross-referencing should be made, especially to those sections that address the requirements of Subpart F.

(c) *Comment.* OCZM will use the information provided in a State's environmental impact assessment and such other information as may be necessary to develop a draft environmental impact statement covering the Associate Administrator's proposed action of approving the management program, except in the case of segmented management programs where the information will be used to determine if an environmental impact statement is appropriate. The timing and review procedures for the environmental impact statement are discussed in § 923.72.

Subpart H—Review/Approval Procedures

§ 923.70 General.

The purpose of this subpart is to describe the process of State program review and approval following submission of a State's management program. Because the review process usually involves preparation and dissemination of draft and final environmental impact statements and lengthy Federal agency review, States should anticipate that it normally will take 7 months between the time a State first submits a draft management program to OCZM for threshold review and the point at which the Associate Administrator makes a final decision on approving the management program. Certain factors will contribute to lengthening or shortening this timetable; these factors are discussed in the sections that follow. In addition, this subpart provides guidance on a recommended format for the program document submitted to the Associate Administrator for review and approval.

§ 923.71 Recommended format for program submissions.

(a) This guidance is provided in response to requests from a number of States for a suggested format. States should note, however, that this format is not mandatory. As long as States address all the sections of the Act and associated requirements of these regulations, the presentation of their management program may be in such format as best suits their situation provided that such format has been discussed with and agreed to by OCZM.

(b) At a minimum, States should include an index with their program submission that indicates where in the management program document the information can be found which is necessary to make the findings required by the Act and associated requirements of these regulations. A chart is provided below of the findings required by the Act and associated requirements of these regulations. This chart should assist States in developing the index.

CHART.—*Findings necessary for sec. 306 approval*

Section of the act	*Associated section(s) of these regulations*
Sec. 306(a) which includes the requirements of sec. 305:	
305(b)(1): Boundaries	923.31, 923.32, 923.33, 923.34
305(b)(2): Uses subject to management	923.11, 923.12
305(b)(3): Areas of particular concern	923.21, 923.23
305(b)(4): Means of control	923.41
305(b)(5): Guidelines on priorities of uses	923.22
305(b)(6): Organizational structure	923.45
305(b)(7): Shorefront planning process [1]	923.25
305(b)(8): Energy facility planning process [1]	923.14
305(b)(9): Erosion planning process [1]	923.26
Sec. 306(c) which includes:	
306(c)(1): Notice; full participation; consistent with sec. 303	923.58, 923.51, 923.55, 923.3
306(c)(2)(A): Plan coordination	923.56
306(c)(2)(B): Continuing consultation mechanisms	923.57
306(c)(3): Public hearings	923.58
306(c)(4): Gubernatorial review and approval	923.47
306(c)(5): Designation of recipient agency	923.46, 923.47
306(c)(6): Organization	923.45, 923.47
306(c)(7): Authorities	923.41, 923.47
306(c)(8): Adequate consideration of national interests	923.52
306(c)(9): Areas for preservation restoration	923.24
Sec. 306(d) which includes:	
306(d)(1): Administer regulations, control development; resolve conflicts	923.41
306(d)(2): Powers of acquisition, if necessary	923.41
Sec. 306(e) which includes:	
306(e)(1): Technique of control	923.41, 923.42
306(e)(2): Uses of regional benefit	923.13, 923.41, 923.43
Section 306(h): Segments [2]	923.61
Section 307 which includes:	
307(b): Adequate consideration of Federal agency views	923.51
307(f): Incorporation of air and water quality requirements	923.44

[1] Not required before Oct. 1, 1978.
[2] Applicable only to segmented management programs.

(c) OCZM recommends the following format for coastal management program submissions: Summary; Framework of Program Development; Policies; and 306 Requirements. OCZM also recommends the following items as appendices: Documentation of Governmental Consultation and Public Participation Efforts; Summaries of Required Public Hearings; Text of Relevant Legal Authorities; Environmental Impact Assessment (EIA); and such other Technical Reports, Maps, Organizational Charts or other materials as a State feels would be useful in reviewing the management program. The elements of the main body of the management program are discussed in greater detail below:

(1) Summary—This section should serve as an executive summary of the program and should describe briefly the major elements of the State's management program and what the State seeks to accomplish pursuant to the management program if it is approved.

(2) Framework of Program Development—This section should address the major coastal issues and problems identified during the program development process, the nature of those issues and problems, and how the management program can help to resolve them. This section should include a discussion of the major coastal natural resources and human activities which are important, unique and/or subject to intense pressures or conflicts. A brief discussion of the institutional setting within which the program was developed and some of the major considerations or alternatives that led to particular management approaches is appropriate as part of this section. In addition, there should be a brief discussion of those issues and problems which the program may not address initially but which will be taken into consideration during program implementation and/or future program refinements.

(3) Policies—This section should contain those policies that provide the basis for a comprehensive, enforceable and predictable management program. These policies should be tied to issues and problems (discussed in (2) above) and to

legal authorities (discussed in (4) below). This section also should discuss the management programs goals and objectives, especially those that are quantifiable, that the State expects to achieve as a result of implementation of the management program.

(4) 306 Requirements—In this section States should demonstrate that the sections of the Act and these regulations necessary for approval have been met. The following contents are suggested:

(i) Boundaries—The requirements of subsection 305(b)(1) of the Act and Subpart D of these regulations should be addressed. States may want to indicate here, or as part of the EIA, major boundary alternatives considered. Generalized maps of the management boundaries and of excluded Federal lands, if provided, are recommended for inclusion in this section (or if more easily handled as a separate appendix, their location in the appendix should be indicated in this section).

(ii) Areas Subject to Management—The requirements of subsections 305(b)(2), 305(b)(8) and 306(e)(2) of the Act and related sections 923.11–923.14, 923.41 and 923.43 of these regulations should be addressed in terms of the process used to determine uses subject to the management program and how these uses will be managed.

(iii) Special Management Areas—The requirements of subsections 305(c)(3), 305(b)(5), 305(b)(7), 305(b)(9), and 306(c)(9) and the associated requirements of Subpart C of these regulations should be addressed. States are encouraged to include generalized maps locating designated Areas of Particular Concern.

(iv) Authorities and Organization—The requirements of subsections 305(b)(4), 305(b)(6), 306(c)(5)–306(c)(7), 306(d), 306(e) and 307(f) of the Act and the associated requirements of Subpart E of these regulations should be addressed through a narrative synopsis of the administrative and legal bases that will be used to implement and insure enforcement of and compliance with the policies and the use and area determinations of the management program. This section should include, as applicable, discussion of six types of legal authorities: State legislation, State agency regulations, gubernatorial executive orders, interagency agreements, significant judicial decisions and significant constitutional provisions. With respect to the organizational structure that will be used to implement the management program, this section should include a discussion of the roles and responsibilities during the program implementation of the State agency designated pursuant to subsection 306(c)(5) of the Act and of other State, local or regional agencies that will be involved in carrying out the management program. The relationship of the designated State agency to these other agencies also should be described.

(v) Consultation, Participation and National Interests—The requirements of subsections 306(c)(1)–306(c)(3), 306(c)(8) and 307(b) of the Act and the related requirements of Subpart F of these regulations should be addressed. Included herein should be a summary of consultation efforts with relevant Federal and State agencies, local governments, regional, areawide and/or interstate entities. A summary of public information and participation during program development should be included, including an indication of where and when required public hearings were held and a brief summary of those hearings. Also included herein should be discussions of national interest considerations; what procedures the State will use to implement the Federal consistency provisions of the Act; and what mechanisms will be used to insure continued governmental consultation and public participation after program approval. Detailed documentation regarding a number of the requirements addressed in this section can be reserved for appendices.

(vi) Miscellaneous—Normally, States will address the requirements of subsection 306(c)(4) and related § 923.41 in the gubernatorial transmittal that will accompany the program submission. For a segment submission, the same format should be used. All the requirements of the Act and these regulations apply unless otherwise noted in § 923.61. Segment submissions must also address the requirements of subsection 306(h) of the Act and the associated requirements of § 923.61.

§ 923.72 Review/approval procedures.

(a) Upon submission by a State of its draft management program, OCZM and NOAA will review the document to determine if it adequately meets the requirements of the Act and these regulations. These reviews normally will take three weeks or longer. Assuming positive findings are made and major revisions to the State's draft management program are not required, OCZM will prepare its portion of a Draft Environmental Impact Statement (DEIS). (If major revisions are necessary, this initial review period will extend beyond three weeks.) The DEIS will incorporate the State's program document. This combined document, hereinafter referred to as the DEIS, will be distributed to principally affected Federal agencies and DEIS reviewers. Preparation of the DEIS, printing of the document, notification of the Council on Environmental Quality, and publication in the FEDERAL REGISTER of notice of availability of the DEIS and notice of date and location of public hearing on the DEIS normally will take 45 days. Since States will be responsible for printing the DEIS, the time involved will vary depending on State printnig capabilities.

(b) From the time of receipt of the DEIS, each Federal agency, other person or entity normally has 45 days to provide comments, if any, on the management program and/or on the DEIS to the Associate Administrator. During this time period, a public hearing will be held in one or more locations in the coastal State whose program is under review. At least thirty days notice will be provided, including announcement of availability of the DEIS. Following the public hearing(s), the comment period normally will remain open for fifteen days.

(c) Following the close of Federal agency and DEIS comment periods, the Associate Administrator will review and evaluate comments received in keeping with the requirement of subsection 307(b) of the Act, that a State's management program not be approved unless the views of principally affected Federal agencies have been adequately considered, and in keeping with the requirements of the National Environmental Policy Act (NEPA). Preparation of response to comments, revisions to the State's management program (if appropriate), submission of a final program, and preparation and printing of a Final Environmental Impact Statement (FEIS) normally will take a minimum of three months. Factors that will vary this time frame are: the nature of comments received on the DEIS, the nature and extent of revisions necessary to the management program, and State capabilities with respect to printing the FEIS.

(d) Notice of the availability of the FEIS will be published in the FEDERAL REGISTER. The Associate Administrator shall send a copy of such statement to each Federal agency, other person or entity which received a copy of the DEIS. From the time of receipt, each receiving agency, entity or person has thirty days to review the statement prior to final action by the Associate Administrator.

(e) The Associate Administrator will review and evaluate any comments received during the thirty day review in keeping with the requirements of subsection 307(b) of the Act and with NEPA. The Associate Administrator shall then approve or disapprove a State's management program. In the event of approval, the Associate Administrator shall prepare a set of findings with respect to the requirements of the Act. These findings shall be available upon request.

§ 923.73 Miscellaneous.

(a) The timelines laid out in § 923.72 may be shortened if any of the following occur:

(1) reduction of the time alloted to review environmental impact statements is proposed consistent with applicable procedures and guidelines and concurrence is requested from the Council on Environmental Quality. Reductions in review time normally are limited to emergency circumstances or conditions which would result in impaired program effectiveness; or

(2) A draft environmental impact statement has been issued in connection with preliminary approval pursuant to subsection 305(d) of the Act (see 15 CFR 920.40) and a supplementary or final impact statement is all that is necessary for full approval pursuant to subsection 306(a) of the Act; or

(3) In the case of segmented programs only, a determination is made that the proposed segment management program will not significantly affect the environ-

V 42167 AUG 29 77 7 UMI

ment. In such cases a negative declaration will be prepared. The program submission still shall be sent to principally affected Federal agencies for their review and comment.

(b) The Associate Administrator shall follow the procedures of § 923.72 in reviewing for approval any amendments or modifications to an approved management program submitted by a State. (See Subpart J for details on amendment procedures).

Subpart I—Applications for Administrative Grants

§ 923.80 General.

(a) The primary purpose of administrative grants made pursuant to sections 306(a) or 306(h) of the Act is to assist coastal States in implementing coastal management programs following their approval by the Associate Administrator. The purpose of the guidelines in this subpart is to define the procedures by which grantees apply for and administer grants under the Act. These guidelines shall be used and interpreted in conjunction with the Grants Management Manual under the Coastal Zone Management Act, hereinafter referred to as the "Manual."

(b) The Manual incorporates a wide range of Federal requirements, including those of the Office of Management and Budget, the General Services Administration, the Department of the Treasury, the General Accounting Office and the Department of Commerce. In addition to specific policy requirements of these agencies, the Manual includes recommended policies and procedures for grantees to use in submitting a grant application.

(c) Grants awarded to a State must be expended for the administration of a management program that meets the requirements of the Act.

(d) Grants shall not exceed eighty per cent of the annual total cost of the program.

(e) For purposes of this subpart, the terms "administrative grant" and "implementation grant" are used interchangeably.

§ 923.81 Administration of the program.

The Congress assigned the responsibility for the administration of the Act to the Secretary of Commerce who has designated NOAA to manage the program. NOAA has established the Office of Coastal Zone Management for this purpose. Requests for information on grant applications and the applications themselves should be directed to:

National Oceanic and Atmospheric Administration, Office of Coastal Zone Management, Grants and Loans, Operations Staff, 3300 Whitehaven Street NW., Washington, D.C. 20235

§ 923.82 State responsibility.

(a) Applications for program administrative grants shall be submitted by the Governor of a participating State or by the head of the State agency or entity designated by the Governor pursuant to subsection 306(c)(5) of the Act.

(b) One State application will cover all program implementation activities, irrespective of whether these activities will be carried out by State agencies, areawide or regional agencies, local governments, or interstate entities.

(c) The designated State entity is fiscally responsible for all expenditures made under the grant, including expenditures by subgrantees and contractors.

§ 923.83 Allocation.

(a) A State may allocate a portion or portions of its administrative grant to other State agencies, local governments, areawide or regional agencies, interstate entities, or Indian tribes if the work to result from such allocation(s) contributes to the effective implementation of the State's management program.

(b) *Local governments.* Where a State will be relying on direct State controls as provided for in subsection 306(e)(1)(B) of the Act, pass-throughs to local governments for local planning, regulatory or administrative efforts cannot be made, unless they are subject to adequate State overview and are part of the approved management program. Where the approved management program provides for specified local activities or one-time projects, again subject to adequate State overview, then a proportional amount of administrative grant funds can be allocated to local governments.

(c) *Areawide agencies.* If a State wishes, it may allocate a portion of its administrative grant to an areawide agency, and absent State law to the contrary, preference shall be given to those agencies recognized or designated as areawide comprehensive planning or development agencies under the provisions of the Office of Managment and Budget Circular No. A–95, under section 204 of the Demonstration Cities and Metropolitan Development Act of 1966.

(d) *Indian Tribes.* In furtherance of the policy enunciated in § 923.33(e), individual tribes or groups of tribes may be considered regional agencies and may be allocated a portion of a State's grant in the form of a contract or subgrant for the development of independent tribal coastal management programs or the implementation of specific management projects provided that:

(1) The State certifies that such tribal programs or projects are compatible with its approved coastal management policies; and

(2) On excluded tribal lands, the State demonstrates that the tribal program or project would or could directly affect the State's coastal zone.

(e) *Comment.* Statutory Citation, Subsection 306(f):

With the approval of the Secretary, a state may allocate to a local government, an areawide agency designated under section 204 Demonstration Cities and Metropolitan Development Act of 1966, a regional agency, or an interstate agency, a portion of the grant under this section for the purpose of carrying out the provisions of this section: Provided, that such allocation shall not relieve the state of the responsibility of ensuring that any funds so allocated are applied in furtherance of such state's approved management program.

§ 923.84 Geographic segments.

Application procedures for a grant to be awarded pursuant to subsection 306(h) of the Act for a geographic segment of a State's coastal zone are the same as those set forth in this subpart for a grant to administer the approved management program of the entire coastal zone of a State.

§ 923.85 Eligible costs.

(a) Costs claimed must be beneficial and necessary to the objectives of the grant project. As used herein the terms cost and grant project pertain to both the Federal and the matching share. Allowability of costs will be determined in accordance with the provisions of Federal Management Circular (FMC) 74–4: Cost Principles Applicable to Grants and Contracts with State and Local Governments.

(b) Federal funds awarded pursuant to section 306 of the Act may not be used for construction or land acquisition purposes.

(c) Equipment purchases of more than five hundred dollars per item require NOAA approval prior to purchase. Such purchases may be deemed eligible costs if the State:

(1) Has examined lease, rental or other non-purchase alternatives and purchase represents an equal or lesser cost alternative, and

(2) The equipment is essential to management activities that are anticipated to continue for more than 1 year.

(d) States are encouraged to undertake administrative tasks that will resolve coastal problems and issues related to fisheries management, coastal hazards, resource protection, shorefront access and urban waterfronts, including ports.

(e) States are encouraged to coordinate administrative funding requests with funding possibilities pursuant to sections 308, 309, 310 and 315 of the Act. When in doubt as to the appropriate section of the Act under which to request finding, States should consult with OCZM.

§ 923.86 Application for initial grant.

(a) The form SF–424, Preapplication for Federal Assistance, may be used at the applicant's option. If used, the Preapplication form should be submitted 120 days prior to the beginning date of the requested grant. The preapplication shall include documentation, signed by the Governor, designating the State office, agency or entity to apply for and administer the grant. Copies of the approved management program are not required. The preapplication form may be submitted prior to the Associate Administrator's approval of the applicant's management program provided that, after consultation with OCZM, approval is anticipated within 60 days of submittal of the preapplication.

(b) All applications are subject to the provisions of OMB Circular A–95 (revised). The Form SF–424, Preapplication for Federal Assistance, will be transmitted to the appropriate clearinghouses at the time it is submitted to OCZM.

The Preapplication form shall include an attachment indicating the date copies of the preapplication form were submitted to the State and areawide clearinghouses. The Preapplication form may be used to meet the project notification and review requirement of OMB Circular A–95 with the concurrence of the appropriate clearinghouses. In the absence of such concurrence, the project notification and review procedures established by State and areawide clearinghouses should be implemented simultaneously with the distribution of the Preapplication form.

(c) The Form SF–424, Application for Federal Assistance (Non-Construction Programs) constitutes the formal application and must be submitted 60 days prior to the desired grant beginning date. The application must be accompanied by evidence of compliance with A–95 requirements including the resolution of any problems raised by the proposed project. OCZM will not accept applications substantially deficient in adherence to A–95 requirements.

(d) In Part IV—Program Narrative of the Form SF–424, the applicant shall describe clearly and briefly the activities that will be undertaken with grant funds in support of implementation and administration of the management program. This description shall include:

(1) An identification of those elements of the approved management program that are to be supported in whole or in part by the Federal and the matching share,

(2) A clear statement of the major tasks required to implement each element,

(3) For each task:

(i) Specify how it will be accomplished and by whom;

(ii) Identify any subgrantees or contractors that will be allocated responsibility for carrying out all or portions of the task, and indicate the estimated cost of the subgrant or contract for each allocation. Identify, if any, that portion of the task that will be carried out under contract with private firms or individuals and indicate the estimated cost of such contract(s);

(iii) Indicate the estimated total cost. Also indicate the estimated total person-months if any, allocated to the task from the applicant's staff;

(iv) Indicate the percent estimated to be completed during the grant period.

(4) The sum of all task costs in subparagraph (3) above should equal the total estimated grant project cost.

(5) Using two categories, Professional and Clerical, indicate the total number of personnel in each category on the applicant's staff that will be assigned to the grant project. Also indicate the number assigned full time and the number assigned less than full time in the two categories. Additionally, indicate the number of new positions created in the two categories as a result of the grant project.

§ 923.87 Applications for subsequent grants.

Second and subsequent year applications will follow the procedures set forth in this subpart except that:

(1) The Preapplication form may be used at the option of the applicant. If used, the procedures set forth in section 923.86(a) shall be followed:

(2) The Governor's document designating the State agency to receive and administer the grant is not required unless there has been an approved change of designation; and

(3) Copies of the approved management program or approved amendments or refinements are not required.

§ 923.88 Grant amendments.

Amendments to a grant award must be submitted to, and approved by, the Associate Administrator prior to initiation of the contemplated change. Requests for substantial changes should be discussed with the Associate Administrator well in advance. While all amendments to the grant must be approved in writing by the NOAA Grants Officer, approval may be presumed for minor amendments if the grantee has not been notified of objections within 30 working days of receipt of the request.

Subpart J—Review of Approved Management Programs

§ 923.90 General.

(a) This section establishes the procedures by which approved management programs will be reviewed annually pursuant to section 312 of the Act. This section also establishes the criteria and procedures by which funding for approved management programs may be made, pursuant to subsection 306(g) and section 312 of the Act, respectively.

§ 923.91 Review of performance.

(a) The primary purposes of a continuing review by States and the Associate Administrator of management programs approved pursuant to section 306 of the Act are to:

(1) Reassess and reconfirm the basic soundness and viability of a State's management program, given State and national goals and objectives;

(2) Evaluate State progress towards achievement of specific management goals through implementation of policies and other techniques described in the approved management program; and

(3) Provide an opportunity for amendment or refinement, if appropriate, of a State's management program.

Both the Associate Administrator and the States will be involved in this continuing review.

(b) *Comment.* Statutory Citation, Section 312(a)(1):

The Secretary shall conduct a continuing review of (1) The management programs of the coastal states and the performance of such states with respect to coastal zone management * * *

(1) The Associate Administrator's review of program performance will focus on both procedural and substantive aspects of coastal management. The Associate Administrator's primary concerns will be to assess a State's performance in achieving the goals and objectives contained in the approved management program, in adhering to the program policies, and in carrying out the work task items contained in a State's grant application/work program. Satisfactory performance will consist of determinations that the State's coastal management program is being implemented procedurally in the manner described in the State's approved management program and approved grant award, and further, that this implementation is effective in terms of operational efficiency. Determinations of substantive program performance will include findings that the State's coastal management program policies and implementation techniques are in fact addressing the coastal management problems, goals and objectives identified by the State in its management program, and further that adequate progress towards achievement of these goals has occurred over the course of the grant year. In setting these as the primary evaluation criteria, the Associate Administrator recognizes that these are not readily translatable into quantifiable indices of performance or progress, except to the extent a State's management program goals and objectives are quantifiable. To the extent States can set quantifiable goals, they are encouraged to do so. It is further recognized that the adequacy of State performance with respect to any one aspect of the management program must be assessed in the context to overall performance in all areas as well as in the context of time scales required to accomplish particular objectives.

(2) To assist the Associate Administrator in reviewing performance pursuant to its management program, a State should develop specific program evaluation objectives and criteria, in consultation with the Associate Administrator. In addition States should use their progress reports to the Associate Administrator and their grant refunding applications to discuss progress and/or problems encountered in achieving program goals, objectives and policies. The level of reporting detail necessary will be determined by consultation between the Associate Administrator and the State management agency designated pursuant to section 306(c)(5) of the Act.

(3) States must build into their management program their own monitoring systems for reviewing compliance by other State and local entities responsible for portions of program administration and implementation, for reporting violations of the management program, and for insuring public participation in the operation and evaluation of the management program. States may want to include a hearing and appeals procedure and/or a public hearing procedure as monitoring mechanisms.

V42167 AUG 29 77 7 UMI

(4) The Associate Administrator's assessment of State performance will consist of evaluation of the reports submitted by the State and periodic reviews, at the discretion of the Associate Administrator, of State implementation efforts, utilizing any of the following:

(i) Site visits by OCZM;

(ii) Meetings with or reviews by other State agencies and/or units of local governments involved in or affected by program implementation; and

(iii) Public hearings or meetings with interest groups and the general public.

In cases where meetings with Federal agencies, other State agencies, local governments or the general public are requested, the designated State management agency shall be a co-sponsor of such meetings. Where the Associate Administrator's assessment of State performance, particularly with respect to continued effectiveness and relevancy of the management program, differs from the State's assessment, the Associate Administrator shall so advise the designated State management agency in order that the State agency may further assess management program objectives and/or submit amendment or refinements, as and if appropriate, to the program.

§ 923.92 Amendments or modifications to approved management programs.

(a) Amendments or modifications to approved management programs may be justified if they are in response to changes in coastal zone needs, problems, issues, priorities, social or political expectations, or other factors bearing on the relevancy and viability of a State's coastal management program, provided that such amendments/modifications are consistent with the findings and policies of section 302 and 303 of the Act and with the requirements of section 306 of the Act.

(b) Amendments or modifications will represent one of these types of changes to the management program: (1) Changes in basic program goals, objectives or policies;

(2) Changes in techniques (for achieving goals, objectives or policies) that result in an environmental impact significantly different from previously approved techniques; or

(3) Changes in techniques (for achieving goals, objectives or policies) that result in significantly altered intergovernmental relationships not reviewed by and/or concurred with by affected agencies or units of government at the time of proposed modification.

(c) *Amendment procedures.* Prior to formal submission of an amendment, the State shall inform the public as well as affected parties of the proposed change in order to determine the degree and nature of public interest. Following evaluation of public and private reactions, if a State decides to proceed with a request for a program amendment, it shall submit the following to the Associate Administrator:

(1) A written request from the Governor for the amendment;

(2) A description of the proposed change;

(3) justification for the change in terms of the factors noted in (a) above;

(4) evidence of public notice and a discussion of the degree and nature of public interest; and

(5) discussion of the environmental impact of the proposed change.

The Associate Administrator then shall review the requested change pursuant to the requirements of subsection 306(g) of the Act. Pursuant to this section, amendments to approved management programs are to be reviewed and approved according to the same procedures utilized for initial management program approvals. The specifics of these procedures are contained in Subpart H. It should be noted that this procedure includes Environmental Impact Assessment (EIA) and Federal agency review requirements. The Associate Administrator will make a case-by-case determination as to the necessity of issuing an Environmental Impact Statement (EIS) prior to approving any amendments or modifications.

(d) *Comment.* Statutory Citation, Subsection 306(g):

> Any coastal state may amend or modify the management program which it has submitted and which has been approved by the Secretary, under this section, pursuant to the required procedures described in subsection (c).

(e) Federal consistency, as provided for in section 307 of the Act, shall not apply to proposed amendments unless and until such amendments are approved, pursuant to the procedures in Subpart H, and are thereby incorporated as part of the approved management program.

(f) In cases where an amendment relates to an already approved program goal, objective, policy, authority or other technique and the State acts to implement that amendment prior to approval by the Associate Administrator, such action may represent cause for notification by the Grants Officer of intent to terminate and withdraw financial assistance pursuant to § 923.94. In cases where an amendment relates to a new goal, objective, policy or authority not previously contained in a State's approved coastal management program, the State may initiate implementation of such amendment provided it does not conflict with or contradict any existing approved management program goal, objective, policy or authority and with the understanding that section 306 funding for and Federal consistency relative to that amendment are not available unless and until approval is conferred.

(g) States are encouraged to use their progress reports to inform the Associate Administrator in a timely manner of potential amendments or refinements (see § 923.93) and the reasons therefor.

(h) State management programs that have been or will be approved, pursuant to section 306 of the Act, prior to October 1, 1978, without meeting the requirements of subsection 305(b)(7), 980 and (9) and related §§ 923.14, 923.25 and 923.26 of these regulations will need to be amended to incorporate these three planning requirements into their approved management programs.

§ 923.93 Refinements to approved management programs.

(a) Since one of the primary purposes, as stated in § 923.91, of conducting a continuing review of program performance is to reassess and reconfirm the basis, soundness, and viability of a State's coastal management program, States may make minor refinements to their management programs without following the formal amendment procedures specified in § 923.92 and Subpart H. Such refinements may be made following consultation with and approval by the Associate Administrator.

(b) Refinements are changes relating to programs or techniques for attaining particular goals and objectives or for implementing particular policies (but not changes in these goals, objectives or policies themselves). In addition, these refinements will not have an environmental impact significantly different from previously approved programs or techniques and will not significantly alter previously approved intergovernmental arrangements with other State agencies, local governments and/or Federal agencies, unless the affected agencies/units of government and the Associate Administrator concur in these alterations.

(c) States shall use the following procedure in making refinements to their management programs:

(1) States shall consult with the Associate Administrator prior to proceeding with a formal request for a refinement to determine that the change represents a refinement rather than an amendment and that the change is both reasonable and justifiable.

(2) Upon such a determination, the State shall submit a written request from the head of the designated State agency which shall contain:

(i) A description of the proposed change;

(ii) Justification for the change;

(iii) Discussion of the parties most seriously affected by the change and their reactions to it; and

(iv) A determination that the proposed change will not have environmental impacts significantly different from the already approved management program.

§ 923.94 Termination and withdrawal of administrative funding.

(a) In addition to the provisions contained in FMC 74-7 relating to termination and withdrawal of funding awarded pursuant to a grant award, the Associate Administrator may recommend to the NOAA Grants Office that section 306 grant funding be terminated and withdrawn if the Associate Administrator determines that:

(1) A State has failed or is failing to adhere to and was or is not justified in deviating from its approved management program; and

(2) That State has been provided notice of intent to terminate and withdraw funding; and

(3) That State has been provided an opportunity to demonstrate adherence, or justification for program alteration or modification.

(b) *Comment.* Statutory Citation, Subsection 312(b):

> The Secretary shall have the authority to terminate any financial assistance extended under section 306 and to withdraw any unexpended portion of such assistance if (1) he determines that the state is failing to adhere to and is not justified in deviating from the program approved by the Secretary; and (2) the state has been given notice of the proposed termination and withdrawal and given an opportunity to present evidence of adherence or justification for altering its program.

(1) Situations which may lead to notice of intent to terminate and withdraw funding include:

(i) In evaluating a State's performance as part of the continuing review function pursuant to section 312 of the Act, the Associate Administrator determines that the State has not adhered to its management program approved pursuant to section 306 of the Act, and such lack of adherence is not justified;

(ii) In evaluating a State's performance as part of the continuing review function, the Associate Administrator determines that the State is not adhering to its approved work program, and such lack of adherence is not justified;

(iii) In going through the amendment process where the amendment relates to a previously approved program goal, objective, policy, authority or other technique, a State acts to implement that amendment prior to approval by the Associate Administrator.

(2) In the event there is cause for terminating and withdrawing section 306 funding, notice in the form of written documents from the Associate Administrator and the NOAA Grants Officer to the Governor of the State in question or the head of the designated State agency shall be provided advising of the intent to terminate an approved grant and to withdraw any unexpended portions of funding assistance. Included in this notice will be the reasons for the proposed termination and withdrawal of funds as well as notice of opportunity for the State to present evidence of adherence or justification for alteration or refinement of its program. Such opportunity to present evidence as referred to in subsection 312(b) of the Act shall consist of a thirty day period, commencing on a receipt of notice, within which the State may respond by providing written materials demonstrating adherence to or justification for refining or modifying its program. Within this thirty day period, a State may request additional time beyond the thirty day period to present evidence of adherence or justification for alteration or refinement. Such additional time shall not extend beyond a subsequent thirty days from the termination of the first thirty day period. In total then, a State may have a maximum of sixty days, from receipt of notice, in which to respond. Following receipt and evaluation of a State's evidence with respect to adherence or justification for alteration, a final determination shall be made by NOAA with respect to termination and withdrawal of funding assistance. If termination and withdrawal of funding is deemed apropriate, the NOAA Grants Office shall take appropriate action to terminate or withdraw funds.

[15 CFR Part 930]

FEDERAL CONSISTENCY WITH APPROVED COASTAL MANAGEMENT PROGRAMS

Proposed Policies and Procedures

AGENCY: National Oceanic and Atmospheric Administration (NOAA), Department of Commerce.

ACTION: Proposed rule.

SUMMARY: These proposed regulations provide coastal States, Federal agencies and other affected parties with policies and procedures for the implementation of the Federal consistency provisions of the Coastal Zone Management Act of 1972, as amended.

DATE: Deadline for submission of written comments: October 28, 1977.

FOR FURTHER INFORMATION CONTACT:

Michael E. Shapiro, Acting Chief, National Policy Development Branch, Federal Programs Division, Office of Coastal Zone Management, 3300 Whitehaven Street, Washington, D.C. 20235 (202–634–4249).

SUPPLEMENTARY INFORMATION:

I. EXPLANATORY STATE

The National Oceanic and Atmospheric Administration (NOAA) is reissuing today, in proposed form, regulations to implement the Federal consistency provisions of the Coastal Zone Management Act of 1972, as amended (16 U.S.C. 1451 et seq.), hereafter referred to as the "Act." Proposed regulations for subsections 307(c) through (h) of the Act were originally published in the FEDERAL REGISTER on September 28, 1976 (41 FR 42879). The introductory material within that draft discussed the need for adoption of these regulations and in the intended effects of NOAA's proposed action. The reader is referred to that draft for background information.

Numerous comments were received on NOAA's proposed Federal consistency regulations. All comments were given full consideration, and while some recommendations were adopted in their entirety or in modified form, others were rejected as being inappropriate or legally impermissible. NOAA would like to take this opportunity to express its gratitude to each government agency, organization, and individual that submitted comments.

Extensive changes were made in the regulations in response to the comments. NOAA has determined that the significant modifications to the original draft warrant reissuance of the regulations in proposed form. This will provide the public with an additional opportunity to review and comment on the regulations prior to their issuance in final form. Numerous minor changes were made and will not be discussed. The discussion below addresses major comments and the changes made in the regulations in response to such comments.

II. DISCUSSION OF MAJOR COMMENTS AND NOAA RESPONSES

General Comments. A number of commentators urged NOAA to consult with other Federal agencies to assure that, in the event those agencies issued regulations related to the Federal consistency provisions of the Act, all regulations were uniform in nature and adhered to the requirements of the Act and to NOAA's regulations. A few commentators urged NOAA to retract its regulations and to permit States and other interested parties to rely upon the individual efforts of other Federal agencies to issue regulations implementing the consistency requirements of the Act. The latter recommendation was rejected because, in the absence of NOAA guidance, the issuance of numerous sets of independently developed consistency regulations can lead to confusion, unnecessary duplication of effort, lack of uniformity, and, in some instances, inadvertent failure to comply fully with the requirements of the Act. Responsibility for administering the Act is assigned to the Secretary of Commerce and, through delegation, to NOAA. In order to assure uniform understanding of an adherence to the consistency requirements of the Act by all Federal agencies and other parties subject to such requirements, NOAA has determined it necessary to issue these regulations. While strongly commending the efforts of other Federal agencies to issue regulations integrating their responsibilities with the requirements of the Act, NOAA requests other agencies to postpone issuance of proposed or final regulations related to the consistency provisions of the Act until these regulations are issued in final form, except in instances where NOAA waives the request.

Many commentators requested that the regulations include commentary and other clarification. Many sections of the regulations are now followed by comments, and this preamble contains examples and additional specific guidance.

Many commentators criticized the regulations for being too detailed, inflexible, administratively burdensome and likely to cause unnecessary delay in the administration of Federal programs. The regulations have been simplified and restructured to minimize these effects whenever appropriate.

A number of commentators requested broader public notice and public participation opportunities. The regulations now provide additional public notice and public participation requirements at several critical points.

A number of commentators pointed out that the regulations failed to discuss instances where more than one Federal agency would be undertaking an activity, or instances where more than one State would be affected. In response, we note that the consistency requirements of the Act apply in both these instances: each participating Federal agency must comply with the requirements of the Act (§ 930.41), and each affected coastal State with an approved management program is entitled to participate in the review of Federal actions (§ 930.59)).

A number of reviewers urged that Federal activities, licenses, permits and assistance should be subject to State agency review only if such actions "caused substantial and unacceptable adverse impacts on the coastal zone," "seriously threatened the quality of coastal zone resources," etc. Commentators argued that without some limitation on the ability of States to review activities, numerous inconsequential Federal actions would be delayed. Other reviewers pointed out that the imposition of qualifying requirements on the right of coastal States to review Federal actions could lead to numerous disputes over whether such actions were "substantial and adverse," "seriously threatening," etc., before State agency review would ever begin. The Act permits State review of (i) Federal activities "directly affecting" the coastal zone, and (ii) Federal license, permit and assistance activities "affecting" the coastal zone. These terms have been construed broadly (§§ 930.32, 930.53, 930.73, 930.93). The appropriate time for determining whether Federal actions will, in fact, cause "unacceptable adverse" effects on the coastal zone is during State agency review when the action is measured against the requirements of the management program. We note also that the regulations direct State agencies to list Federal actions which they wish to review (§§ 930.35, 930.54, 930.75) and, thus far, State program submissions indicate that States are selectively choosing to review only significant actions. In addition, the regulations provide an opportunity for States to issue "general concurrences" to avoid repeated review for minor Federally permitted activities which cumulatively cause substantial adverse effects on coastal resources (§ 930.67). Rather than limiting the ability of States to review Federal actions, the regulations adopt a process favoring State agency discretion to select significant activities subject to review (under NOAA supervision), with this discretion exercised in conjunction with cooperative efforts among State and Federal agencies and affected parties to facilitate expeditious review of selected activities.

In the September draft, NOAA requested comments on whether a State could incorporate into its coastal management program water and air quality standards more stringent than those established by the Environmental Protection Agency (EPA) under the Federal Water Pollution Control Act, as amended (FWPCA), and the Clean Air Act, as amended (CAA). In response, a few commentators argued against such inclusion while many others, including the EPA, argued that neither the Act, the FWPCA, nor the CAA limited the right of a State to establish water and air quality standards more stringent than those established by the EPA. NOAA has accepted

EPA's comments and references to this position will be made in NOAA's revisions to the regulations in 15 CFR Part 923 dealing with management program air and water pollution control requirements.

SUBPART A—OBJECTIVES

Subpart A has been significantly modified and now deals exclusively with the general "Objectives" of these regulations. The originally proposed sections in Subpart A covering "Definitions," "Requirements," "Authority," and "Purpose" have been either deleted to avoid repetition or set out in appropriate subparts of the regulations. The purpose of this restructuring is to simplify the regulations.

SUBPART B—GENERAL DEFINITIONS

Many of the earlier proposed definitions, and some new definitions, are now included within subparts where those terms have specific relevance. The subpart on "General Definitions" includes an index for these terms as well as definitions for terms which have general application.

In response to a number of comments, the term "OMB" (Office of Management and Budget) has been replaced with the term "Executive Office of the President" to permit the Executive Office greater flexibility in designating the entity within that Office which will participate with the Secretary in seeking to mediate serious disagreements which arise between a Federal and State agency (§ 930.14).

Some reviewers urged that the term "State agency" be defined to minimize the potential burden on Federal agencies and applicants for securing the views of State and local government agencies regarding the consistency of a proposed activity. Others argued that the regulations should be sufficiently flexible to allow State, regional or local units of government to be delegated authority in the management program to review the consistency of Federal activities. In response to these comments NOAA has provided for the delegation of consistency review responsibility to State, regional or local agencies subject to the qualification that the management program may not require submission of consistency information to more than one designated agency. The single reviewing agency, and not the Federal agency or applicant, will be responsible for soliciting comments from other interested agencies. In addition, only the single reviewing agency is authorized to declare a disagreement with a Federal agency or to object to the consistency of a Federal license, permit or assistance application. The regulations also point out that this qualification does not remove a party's responsibility for following procedures to secure State and local government permits when required in addition to a Federal permit (§ 930.18(c)). In order to avoid conflict of interest situations following delegation of consistency review responsibility to State, regional or local government agencies, the regulations also provide that the State agency designated pursuant to Section 306(c)(5) of the Act is responsible for reviewing the consistency of applications for Federal licenses, permits and assistance submitted by agencies that have received delegation authority (§ 930.18(d)).

A number of reviewers expressed concern that management programs may lack sufficient guidelines and criteria to use as a basis for making consistency determinations. Some reviewers urged that the definition of "management program" require that each program incorporate specific criteria to review Federal actions subject to State agency consistency review. No changes were made in response to these comments. NOAA's regulations regarding State qualifications for receiving administrative grants under section 306 of the Act (15 CFR Part 923) set forth the required elements which must be included within a management program. State agency consistency review is to be measured against these elements—such as requirements related to permissible land and water uses, areas of particular concern, wetland and floodplain protection, facility siting, prevention of shoreline erosion, beach access, air and water pollution control, etc. However, we note the following: The consistency obligations imposed by the Act are only as effective as the management program. Therefore, to the extent a Federal action relates to coastal issues which are not addressed by the requirements of the management program, the State agency will not have a basis for concurring with or objecting to the consistency of the proposed Federal action (§ 930.40 (b)(6)).

A number of reviewers objected to an earlier proposal directing each Federal agency, in consultation with States, to develop specific guidelines for assessing the consistency of their activities. The reviewers argued that this process could lead to Federal agency development of review standards at variance with the requirements of the management program. In response to these comments, the earlier proposal has been deleted. The basis for making a consistency determination is the management program (§ 930.19). Federal agencies are encouraged to seek State agency assistance in identifying the relevant management program requirements during their consistency assessments (§ 930.37).

Many reviewers requested further certification on the issue of excluded Federal lands. On August 10, 1976, the U.S. Department of Justice rendered an opinion concluding that all Federal lands were excluded from the coastal zone as a result of section 304(1) of the Act. NOAA interpreted this opinion as being limited to Federal lands owned by the United States, while other Federal agencies argued that the exclusion covered all lands owned, leased or otherwise used by the Federal Government. During Federal interagency review of these regulations the issue was resubmitted to the Justice Department and NOAA was informally advised that the exclusion was to be applied broadly to cover all lands used by the Federal Government. Accordingly, the definition of the term "coastal zone" now points out that all lands owned, leased or otherwise used by the United States are excluded from the coastal zone. However, the definition also notes that (i) Federal land actions causing significant offsite effects on coastal zone resources are subject to the Federal consistency requirements of this Part, and (ii) in excluding Federal lands from the coastal zone for the purposes of the Coastal Zone Management Act, a State does not relinquish or in any way impair its rights or authority over Federal lands that exist outside of the context of the coastal management program (§ 930.20).

Restructuring the Consistency Requirements. In the September draft, Subpart B included consolidated procedures for reviewing (i) direct Federal activities including development projects, (ii) Federal license and permit activities including those on the outer Continental Shelf, and (iii) Federal assistance to State and local governments. To simplify the regulations, each major type of Federal action is now covered by a separate subpart. The matrix diagram below portrays the distinctions among the various Federal actions subject to the consistency requirements of the Act, and highlights major procedural and substantive differences. The matrix also points out the distinction between use of the voluntary Secretarial mediation process following a serious disagreement between a Federal and State agency concerning the consistency of a Federal activity, and use of the Secretarial appellate review process following a State agency consistency objection to a proposed Federally licensed, permitted or assisted activity.

FEDERAL REGISTER, VOL. 42, NO. 167—MONDAY, AUGUST 29, 1977

UMI

The remaining material in the preamble discusses specific comments as they relate to the newly proposed subparts.

SUBPART C—CONSISTENCY FOR FEDERAL ACTIVITIES

A number of commentators recommended that the terms "Federal activity" and "Federal development project" be defined in a simpler form. In response, Subpart C has a modified definition of the term "Federal activity" which includes examples (§ 930.31). The examples highlight the fact that the term "Federal activity" encompasses all Federal actions, including development projects, which are not subject to the consistency provisions of Section 307(c)(3) (Subpart D and E—Federal license or permit activities), or Section 307(d) (Subpart F—Federal assistance to State and local governments).

In response to comments requesting additional clarification, the term "directly affecting the coastal zone" has been defined (§ 930.32). The importance of this term is that only Federal activities "directly affecting the coastal zone" need be consistent to the maximum extent practicable with approved management programs. A precise definition for this term is impossible to develop. The legislative history of the Act does not express Congressional intent regarding the terms' interpretation. However, an analogy does exist. In its discussion of the coastal zone boundary determination, Congress expressed the intent to include shorelands the use of which have a "direct impact" on coastal waters. In construing this term, Congress indicated that "(t)he phrase 'direct impact' is intended to cover only those impacts of a *significant* nature." (Emphasis added). In addition, it is helpful to examine the origin of the Federal consistency provisions. The provisions first appeared as part of proposed national land use planning legislation which provided that "Federal projects and activities *significantly affecting* land use shall be consistent with State land use programs." (Emphasis added).

In light of the above, NOAA proposes to define the term "directly affecting the cosatal zone" in terms of the significance of the effects upon coastal resources. In this regard, we have followed the example provided within the Council on Environmental Quality's guidelines (40 CFR Part 1500) which deal with a similar provision under the National Environmental Policy Act (NEPA) (i.e., major Federal actions "significantly affecting" the quality of the human environment). The guildelines point out that significant effects include primary, secondary and cumulative impacts, and actions which may have both beneficial and detrimental effects, even if on balance the agency believes that the effect will be beneficial. While we emphasize the similarity between these two requirements, it is also important to note the differences. For example, under the Coastal Zone Management Act the Federal activity need not be "major" in scope. It is sufficient that its effects are significant in terms of changes in or limitations on the use of coastal zone resources.

In response to comments, the terms "affecting land or water uses in the coastal zone" (Section 307(c)(3)(A)), "affecting any land use or water use in the coastal zone" (Section 307(c)(3)(B)), and "affecting the coastal zone" (Section 307(d)) have also been defined, all under the general heading of "affecting the coastal zone" (§§ 930.53, 930.73, 930.93). After reviewing the legislative history of the Act, NOAA has determined that these terms have all been used interchangeably and have the same meaning. Again, however, the precise meaning intended for these terms is left unclear. To distinguish this term from the term "directly affecting the coastal zone," NOAA proposes to permit States the option of using a more expansive definition of "significant effect" to cover a broad range of resource, social and economic effects which are considered in the management program to be significant.

An important point should be recognized with respect to the definitions of the terms "directly affecting the coastal zone" and "affecting the coastal zone." These terms describe a relationship between a Federal action and its impact upon the coastal zone which triggers a Federal agency's or applicant's responsibility to notify the State agency of the proposed action. The fact that signifcant coastal zone effects result from an activity does not lead to the conclusion that the activity is either consistent or inconsistent with the management program. This latter question is to be resolved during State agency review on the basis of applying the requirements of the management program to the proposed Federal action. Accordingly, a determination that proposed Federal action significantly affects the coastal zone leads to two important benefits. First, this finding requires the Federal agency or applicant to consider the consistency of the action with the approved management program and, second, the consistency notification (i.e., the Federal agency's consistency determination or the applicant's consistency certification) will provide the State agency with an opportunity to concur with or object to the proposed activity, and will assist the State in planning for and managing the significant coastal zone effects resulting from consistent Federal actions.

A number of commentators objected to the narrow manner in which the term "consistent to the maximum extent practicable" was defined. In response, NOAA has partially modified the definition, but has generally retained its narrow interpretation consistent with the guidance provided in the legislative history of the Act (§ 930.33). In addition a new subsection has been added to the definition in order to interrelate the term "consistent to the maximum extent practicable" with the provisions of Section 307(e) of the Act (§ 930.33(b)). Section 307(e) sets forth Congressional intent not to diminish, supersede, or modify existing Federal and State authority. When Section 307(e) is read in conjunction with the consistency requirements imposed upon Federal agencies, the result is that each Federal agency must undertake its activities consistent to the maximum extent practicable with an approved management program unless compliance with the management program is prohibited based upon the requirements of existing law. As noted in the earlier draft, "(t)he duty the Act imposes upon Federal agencies is not set aside by virtue of this Section (307(e)). The Act was intended to effect substantive changes in Federal agency decisionmaking within the context of the discretionary powers residing within such agencies."

In response to comments requesting clarification, Subpart C makes clear that Federal agencies, rather than coastal States, have the authority to determine whether their activities "directly affect" the coastal zone (§ 930.34), and if so, whether such activities are "consistent to the maximum extent practicable" with an approved management program (§ 930.37). The regulations include criteria, examples and procedures to guide Federal agencies in making these determinations in cooperation with State agencies. In essence, each Federal agency must measure its proposed activity against the objectives, policies, standards and other elements within the approved management program. Joint review with the State agency is encouraged as this agency has the expertise to identify the relevant requirements of the management program. In the exent of a serious disagreement between a Federal agency and a State agency over whether an activity (i) directly affects the coastal zone or (ii) is consistent to the maximum extent practicable with management program, either party may request the voluntary Secretarial mediation services provided in Subpart G (§§ 930.36, 930.44).

A number of commentators urged NOAA to clarify how the consistency requirements would apply to Federal activities commenced prior to approval of a management program but not completed at the time of approval. NOAA has proposed that ongoing Federal activities other than development projects (e.g., waste disposal practices) are subject to the consistency requirements of the Act when the activities are governed by statutory authority under which the Federal agency retains discretion to assess and modify the activity (§ 930.38(a)). In these cases regulations or regional directives may have to be revised and NOAA's regulations provide Federal agencies with a reasonable time following management program approval to take appropriate action. NOAA has also proposed that the consistency requirements apply to ongoing development projects whenever, following program approval, new, major project decisions are being made and such decisions are subject to Federal agency discretion to implement alternate means for completing the activity (§ 930.38(b)). For example, if project planning was completed prior to program approval but a major design decision is still to be made following approval, this

latter decision would be subject to the consistency review requirements. This provision, however, would not apply to a phased Federal project decision implemented after management program approval which was specifically described considered and approved prior to management program approval (e.g., in a final environmental impact statement issued pursuant to NEPA). Federal agencies should consult with State agencies during the management program development stage to ensure that the program, as finally approved, adequately considers ongoing Federal projects.

A number of commentators recommended that NOAA expand and clarify the discussion in the proposed regulations related to Federal agency responsibility to notify State agencies of their consistency decisions. In response, NOAA has restructured the regulations to direct Federal agencies to provide State agencies with either "negative determinations" (§ 930.35(c)) or "consistency determinations" (§ 930.39) for all Federal activities identified by a State agency as directly affecting the coastal zone. The regulations permit the State agency to list in the management program significant Federal activities which, in the opinion of the State agency, require consistency review, and the State agency may monitor unlisted activities to inform Federal agencies of additional significant actions which the State agency believes require consistency review. In the latter case, the State agency must notify the Federal agency within 45 days from notice of the Federal activity, otherwise it waives its right to request a consistency review (§ 930.35(b)). This proviso was added in response to a number of comments requesting a limited time period to assure timely requests for review for unlisted actions. Similar provisions have been added to apply to unlisted Federal license and permit activities (§ 930.55(a)), and to Federal assistance projects outside of the geographic area described in the management program (§ 930.99).

In response to comments requesting clarification, the regulations now point out that Federal agencies may choose whatever notification procedures they wish, such as the OMB A–95 process, NEPA environmental impact statements, memoranda of understanding, etc., so long as such procedures are modified or supplemented as necessary to satisfy the requirements of these regulations (§ 930.39). In this regard, a few Federal agency reviews indicated that they would rely upon the NEPA process to comply with the consistency requirement of the Act. NOAA again points out that NEPA and the Act do not have identical requirements and that those agencies intending to rely upon NEPA impacts statements will have to supplement their efforts in cases where an impact statement is not required but a consistency determination is required.

A number of commentators were concerned about the lack of certainty regarding the consistency notification and review period which a State agency would have. Some reviewers argued that the period should be at least six months, similar to the review period required for Federal licenses and permits. Others argued that the regulations should adopt the shorter review period recommended in the OMB A–95 process. Still others suggested that the period be flexible and left open to Federal and State agency agreement. To provide parties with certainty on this issue and to avoid needless and time-consuming disputes regarding the adequacy of notice, the regulations require the Federal agency to provide State agencies with a consistency notification at the earliest practicable time in the planning of an activity, and notification must in all cases be submitted at least 90 days before final approval of the activity unless the Federal and State agencies agree to an alternative notification schedule (§ 930.39). Federal and State agencies are encouraged to agree upon flexible procedures for extending the period beyond 90 days for major activities requiring a substantial period for adequate review, and for lessening the period for less significant activities.

In response to a request by one commentator, the regulations now explicitly indicate that in developing a consistency determination, Federal agencies may apply standards which are more restrictive than standards contained in the management program (§ 930.40(c)).

In response to a number of comments related to State agency response to Federal agency notifications, the regulations impose time limits within which the State agency must contact the Federal agency (§ 930.42). In the event the State agency disagrees with the Federal agency's consistency determination, the regulations require the State agency to describe (i) how the activity is inconsistent with specific elements to the management program, and (ii) alternative measures (if they exist) which, if adopted by the Federal agency, would allow the activity to be consistent with the management program (§ 930.43). Similar requirements are imposed regarding the content of State agency objections to Federal license and permit activities (§§ 930.66, 930.70) and Federal assistance projects (§ 930.91).

In response to a number of comments requesting explicit clarification within the regulations, NOAA has included commentary indicating that, in the event of State agency disagreement, Federal agencies are not required to suspend approval of Federal activities (§ 930.43). In cases of disagreement, Federal agencies are encouraged to suspend implementation of the activity beyond the 90–day notice period pending resolution of the disagreement. Neither coastal States nor the Secretary of Commerce are authorized by the Act to halt approval for Federal activities following a disagreement. In the event informal negotiations or voluntary Secretarial mediation efforts fail or are not utilized, judicial review where otherwise available by law may be sought by the State agency to enforce its position that the Federal agency is violating the consistency requirements of the Act (§ 930.116).

In response to numerous comments requesting additional clarification, the regulations have been modified and now provide that the voluntary Secretarial mediation services (Subpart G) may be used in the event of a serious disagreement between a Federal and State agency regarding a Federal activity which was previously reviewed and approved by the State agency but later determined by the State agency to be conducted in a substantially different and inconsistent manner (§ 930.45). Similar mediation provisions are provided for previously reviewed Federal license and permit activities (§ 930.69) and Federal assistance projects (§ 930.102). If there is a serious disagreement between a State and Federal agency regarding a previously reviewed Federal activity, license, permit or assistance project, the State agency must first request that the Federal agency take appropriate remedial action. If, after a reasonable time following a request for remedial action, the State agency continues to maintain that a serious disagreement exists, either party may request Secretarial mediation. Again, the availability of Secretarial mediation does not preyent the State agency from seeking to enforce its position through alternative proceedings.

SUBPART D. CONSISTENCY FOR ACTIVITIES REQUIRING A FEDERAL LICENSE OR PERMIT

Numerous comments were received regarding the manner of applying Federal consistency to oil and gas lease sales under the provisions of the Outer Continental Shelf (OCS) Lands Act. Some commentators argued that while Federal licenses and permits described in detail in OCS exploration and development plans were to be covered by Section 307(c)(3)(B) of the Act (see Subpart E), the issuance of individual leases to lessees was still to be considered a "Federal license or permit" action subject to the certification and appeal requirements of Section 307(c)(3)(A) of the Act (see Subpart D). Other commentators argued that by virtue of the 1976 Amendments to the Act, Congress intended that OCS leases were not to be treated as Federal license or permit activities. NOAA is considering a position which treats the Department of the Interior's pre-lease sale decisions, such as tract selections and choice of lease stipulations, as a "Federal activity" subject to the requirements of Section 307(c)(1) of the Act (see Subpart C). This proposal would require the Secretary of the Interior to initiate such decisions in a manner consistent to the maximum extent practicable with approved coastal management programs when those decisions would directly affect the coastal zone. The process of considering the coastal management program could be done concurrent with the environmental impact statement effort preceding the lease sale. Neither a lessee certification on individual leases nor an appeal to the Commerce Secretary would be applicable. The Office of the Solicitor within the Department of the Interior has issued an opinion arguing that the OCS

V 42167 A AUG 29 77 7 UMI

leasing process is neither covered by the "Federal license or permit section" nor the "Federal activity" section of the Act. In light of the present uncertainty regarding legislative intent, NOAA has decided to refrain from taking a position on this issue at the present time. The matter can be further considered at such time as OCS lease sales are proposed adjacent to States with approved management programs. More importantly, NOAA and the Department of the Interior are working with the Congress to clarify this issue in the form of amendments to the OCS Lands Act. NOAA welcomes further comments on this issue.

Numerous Federal agencies have commented that the term "applicant" should not be defined to include Federal agencies. These commentators have pointed out that (i) Congress has defined the term "person" to include Federal agencies and could have been similarly explicit if it intended the term "applicant" to include Federal agencies ("persons" are subject to the requirements of Subsection 307(c)(3)(B)—(§ 930.72)); (ii) while generally providing limited guidance, the legislative history of the Act suggests that only the provisions of Sections 307(c)(1) and (2) are meant to apply to direct Federal agency actions; and (iii) recent Supreme Court decisions (*EPA* v. *California*, 8 ERC 2089 (1976), *Hancock* v. *Train*, 8 ERC 2100 (1976)) have held that Federal agencies are not to be subjected to State procedural requirements (e.g., State review of consistency certifications or their equivalent) unless Congress directs such result in a clear and unambiguous manner—and such clarity is lacking in the Act. Other commentators have urged NOAA to retain Federal agencies within the definition of the term "applicant." These reviewers point out that Section 401 of the Federal Water Pollution Control Act, as amended (FWPCA), has a similar consistency provision regarding applicants for Federal licenses or permits, but the FPCA provision includes an explicit the FWPCA provision includes an explicit caveat stating that "No Federal agency shall be deemed to be an applicant * * *." (33 U.S.C. § 1341(a)(6)). No similar qualification is provided in the Coastal Zone Management Act. In light of these comments, NOAA proposes to exclude Federal agencies from the definition of "applicant" pending receipt of additional comments and further review of the issue (§ 930.52). In the interim, Federal agency activities requiring Federal licenses or permits are subject to the consistency requirements of Subpart C (Section 307(c)(1) and (2) "Federal activities"). Both the Federal permitting agency and the Federal agency conducting the activity should consult with the State agency to assess the consistency of such activities.

A number of commentators urged that the regulations exclude from State agency review Federal license and permit applications which were submitted prior to management program approval, but not yet approved at the time of program approval. NOAA has rejected this recommendation as the language in Section 307(c)(3)(A) does not compel this result. Until a party has received approval from the Federal permitting agency, the party is still an "applicant" for purposes of consistency review and may be required to provide a consistency supplement to the application (§ 930.52). "Applicant agencies" seeking Federal assistance (§ 930.92) are treated in a similar manner. Accordingly, the State agency may request that a Federal agency submit review applications pending at the time of management program approval. However, to assure timely action on pending applications, the regulations require the State agency to notify the Federal agency within 45 days of management program approval of a decision to review such applications, otherwise the State agency waives its rights to review such activities. Furthermore, if States choose to review pending applications, they must consider carefully the time and resources invested by the applicant prior to management program approval (§§ 930.56, 930.100).

In response to comments, the regulations now require that a management program listing of Federal license and permit activities subject to State agency review must be described not only in terms of type of activity (e.g., Coast Guard bridge permits, Corps of Engineers dredge and fill permits, etc.), but also in terms of general location when the State agency wishes to review activities outside of the coastal zone which are likely to significantly affect coastal resources (e.g., activities on excluded Federal lands, within coastal counties, etc.). The necessity for specifying location is to avoid consistency review for Federal license and permit activities unlikely to significantly affect the coastal zone. Refinements to the list are subject to prior consultation with the affected Federal agency and approval by the Associate Administrator (§ 930.54). A similar location provision is utlized in the Federal assistance Subpart (§ 930.95).

Many commentators requested modifications and further clarification regarding the responsibility of the applicant to submit sufficient information to support a consistency certification. The earlier draft of the regulations did not include any limitation on the authority of the State agency to require information from the applicant. In response to objections, the reulations now state that the State agency may not require submission of confidential and proprietary information (§ 930.58). However, applicants are encouraged to submit such information when it has relevance for making a consistency determination and when the State agency can ensure that such information will be protected from public disclosure (§ 930.60(d)).

In response to comments, the regulations include a new section encouraging applicants to consolidate for State agency review related Federal license and permit activities affecting the coastal zone (§ 930.61). Similarly, State agencies are encouraged to provide applicants with a one-stop multiple permit review system to minimize duplication of effort and to avoid unnecessary delays (§ 930.61).

In response to numerous comments, the Federal license and permit public notice requirements have been modified to provide States additional flexibility in this area. The public notice section now permits the State agency (i) to issue the public notice, (ii) to direct the applicant to provide the public notice, or (iii) to rely upon the public notice provided by the Federal permitting agency (§ 930.63).

In response to requests for explicit clarification within the body of the regulations, NOAA has indicated that following State agency concurrence with a consistency certification, the Federal permitting agency is not required to approve the license or permit application (§ 930.65(c)). For example, notwithstanding State agency concurrence, a proposed Federally permitted project may still require Federal agency rejection on NEPA, Endangered Species Act, Fish and Wildlife Coordination Act, or other overriding national interest grounds.

Numerous State agency reviewers criticized the original draft's procedure which in all cases required submission of a consistency certification by the applicant. Reviewers urged that a flexible system be permitted which would allow for the use of equivalent procedures to satisfy this requirement. In response to these comments, the regulations have been modified (i) to permit the State agency, at the request of the applicant, to assume the responsibility for developing a consistency certification (§ 930.60), and (ii) to permit the State to declare in the management program that an applicant's receipt of State or local government permits required in addition to the Federal permit is the equivalent of receiving a State agency concurrence for a consistency certification (§ 930.67). State agencies should bear in mind that the second option will be workable only when State or local government permits are also required for the proposed Federally permitted activity. If a Federal permit subject to State agency consistency review is required for an activity where no State or local government permit is required (e.g., on excluded Federal lands, on the outer Continental Shelf, on upland areas outside of the coastal permit jurisdiction, etc.) the State agency must rely upon the applicant's consistency certification or some other equivalent procedure to review the consistency of the proposed activity.

SUBPART E—CONSISTENCY FOR OUTER CONTINENTAL SHELF (OCS) EXPLORATION, DEVELOPMENT AND PRODUCTION ACTIVITIES.

Numerous industry reviewers commented that the application of consistency requirements to OCS activities could have a substantial adverse impact on the national effort to promote expeditious offshore energy development. Accordingly, these reviewers generally urged that the regulations be narrowly drafted to limit the ability of coastal States to use the consistency requirements to review OCS operations. NOAA has rejected this recommendation because it is contrary to the intent of the Act. All potentially affected coastal States have informed NOAA of their support for orderly and timely OCS development, subject to the provision of adequate protection for their coastal and marine environments and their existing economic resources and industries. In relation to this issue, the Act requires that management programs give adequate consideration to the national interest in the planning for and siting of facilities (including energy facilities) necessary to meet regional requirements. In addition, each management program must ensure that local land and water use regulations do not unreasonably restrict or exclude uses of regional benefit. With the cooperation of industry, Federal agencies and other interested parties, a policy for accommodating reasonable OCS activities can be reflected within coastal management programs. Through cooperative planning efforts and sound principles of management, OCS resources can be discovered and brought into production in a timely manner while at the same time valuable coastal resources and industries can be protected.

Finally, two additional elements within the Act may potentially promote and protect the interest of the oil and gas industry. First, in the 1976 amendments to the Act, Congress created the Coastal Energy Impact Fund (Section 308) to provide financial assistance to meet State and local needs resulting from new or expanded energy activity affecting the coastal zone. The legislative history indicates that fiscal inducements under Section 308 were provided to encourage prompt State approvals of OCS operations. Second, State agency objections to Federal license or permit activities described in detail in OCS plans may be reviewed by the Secretary of Commerce to determine whether such activities may nonetheless be approved based on overriding national interest grounds (see Subpart H). In light of the Act's many checks, balances, and incentives relating to energy development, NOAA believes that it is both unnecessary and inappropriate to limit the ability of coastal States to broadly utilize the consistency provisions with respect to OCS activities affecting the coastal zone.

In response to comments requesting further clarification, the term "Federal license or permit activity described in detail" has been defined to include those activities which the Secretary of the Interior requires to be described in detail within an OCS plan (§ 930.71). The significance of this term is that only activities described in detail within such plans are subject to the special requirements of Section 307(c)(3)(B) (Subpart E). Presently, the U.S. Geological Survey generally requires OCS plans to describe activities requiring permits for drilling, design plans for installation of platforms, and installation of gathering and flow lines. OCS-related permits which are not presently described within OCS plans can be reviewed by the State agency under Section 307(c)(3)(A) procedures (Subpart D) or, as described below, can be consolidated for consistency review with activities described in detail within OCS plans. Examples of OCS-related permits are: (i) Bureau of Land Management pipeline rights-of-way on the OCS, (ii) Corps of Engineers Section 10 Rivers and Harbors Act permits required for construction of any structures in navigable waters; (iii) Corps of Engineers Section 4(f) OCS Land Act permits required for artificial islands and fixed structures located on the OCS; (iv) Federal Aviation Administration permits for the construction of OCS-related towers which may affect air traffic safety, and (v) other OCS-related permits for waste discharge and dredging and transportation of dredged material, both offshore and onshore.

The legislative history of the Act indicates that consolidated review under the new OCS consistency provision can significantly expedite OCS oil and gas development: "* * * Federal permits are required for a large number of individual activities, including geophysical exploration, bottom sampling, well drilling for exploration or production, pipeline right-of-way, structure placement, waste discharge, and dredging and filling operations. Thus, separate consistency determinations on each activity, described in detail in an exploration, development or production plan, will not be necessary."

In response to comments requesting certainty regarding OCS information requirements, the regulations now include appendices which identify data and information which must be submitted along with the OCS plan to enable the State agency to assess the consistency of the proposed activities (Appendices A and B). Another important purpose of the appendices is to effectuate the objective, expressed by the Conferees to the 1976 Coastal Zone Management Act amendments, to "satisfy state needs for complete information, on a timely basis, about the details of the oil industry's offshore plans," thereby permitting states to plan for and manage coastal zone impacts caused by OCS activities.

To coordinate NOAA efforts with those of the Department of the Interior, the appendices state that OCS lessees and operators are encouraged, but not required, to submit interpretative data which, pursuant to regulations issued by the Secretary of the Interior, constitute confidential or privileged information. In addition, the Department of the Interior is presently in the process of amending its regulations (30 CFR Part 250) dealing with exploration, development and production plans, environmental assessments, and information to be provided to affected States. During the review and comment period on NOAA's proposed regulations, we intend to work closely with the Interior Department with a view towards consolidating into one set of Federal regulations the description of OCS-related information which is to be provided to affected coastal States. This consolidation effort will seek to eliminate confusing and possibly repetitious and inconsistent Federal requirements on this issue.

A number of commentators requested information on the effect of a State agency objection to some but not all of the license and permit activities described in detail in an OCS plan. The Act states that no Federal official shall grant "any" license or permit for an activity described in detail in an OCS plan until the State agency concurs or is conclusively presumed to concur with the consistency certification for the entire OCS plan, or until the Secretary of Commerce finds that "each" activity may be approved (Section 307(c)(3)(B)). Accordingly, the regulations preclude issuance of any of the license or permit activities described in detail in the plan until all have been approved by the State agency or the Secretary of Commerce (§ 930.81). However, an objection to the consistency certification for an OCS plan does not prevent the person from receiving Federal agency approval for those OCS-related license or permit activities not described in the plan which are found by the State agency to be consistent with the management program. Conversely, a State agency objection to one or more of the OCS-related permits submitted for consolidated review does not prevent Federal agency approval for other OCS-related permits found by the State agency to be consistent and for the permits described in detail within a consistent OCS plan (§ 930.82).

In response to comments, the regulations include a new section which addresses the issue of a person's failure to comply substantially with an approved OCS plan (§ 930.86). The section sets forth both criteria and procedures which the Secretary shall rely on in making this determination. The significance of this issue is that a finding of failure to comply substantially with an OCS plan leads to the requirement that the person submit to the Department of the Interior and the State agency a new or amended OCS plan accompanied by a new consistency certification. Prior to any Secretarial review on this matter, the State agency must first request the Department of the Interior to take appropriate remedial action.

SUBPART F—CONSISTENCY FOR FEDERAL ASSISTANCE TO STATE AND LOCAL GOVERNMENTS

A number of reviewers objected to the fact that the term "Federal assistance" excluded coverage of assistance provided under the Coastal Zone Management Act. This initial position was proposed in light of the Act's language which states that Federal assistance "under other Federal programs" shall be subject to the consistency requirements. NOAA agrees that there is no justification for excluding Federal assistance under the Act from these requirements, particularly in view of the significant amount of coastal related Federal assistance to be granted under the Coastal Energy Impact Program (Section 308). Accord-

V 42167 AUG 29 77 UMI

ingly, the Federal assistance subpart has been modified to remove the exception (§§ 930.90, 930.91).

A number of commentators recommended that the Federal assistance procedures be modified to more fully adhere to the procedures utilized in the Office of Management and Budget Circular A-95 for the evaluation, review and coordination of Federal assisted programs. NOAA has followed this recommendation and the A-95 process is relied upon in the regulations (§§ 930.94, 930.96).

Some reviewers urged NOAA to require State and local government applicants for Federal assistance to consult with the State agency prior to commencement of the A-95 review process. No changes were made in response to these comments. However, NOAA strongly encourages early coordination efforts among the applicant agency, State and Federal agencies to ensure timely disbursement of Federal assistance. These efforts will be particularly critical when the assisted project will require a Federal license or permit subject to the consistency requirements discussed in Subpart D. The applicant agency, State agency and participating Federal agencies should consult at the earliest practicable time in the planning of the project to make certain that management program, Federal assistance, and Federal permit requirements will all be satisfied.

In response to comments to assure consistency for phased Federal assistance projects, the regulations require the applicant agency to use the OMB A-95 notification process for every major funding phase entailing substantial modifications to previously reviewed phases (§ 930.96(b)).

A number of Federal agencies expressed concern regarding the need to modify existing agency methods for reviewing Federal assistance proposals. In response, we point out that to the extent Federal agencies presently (i) use the OMB A-95 procedure and (ii) conform their decisions to State requirements affecting the proposal, then there would be no need to modify existing agency practices.

SUBPART G—SECRETARIAL MEDIATION

In response to numerous comments, a new subpart concerning Secretarial mediation has been added, and the mediation process has been significantly modified.

A number of reviewers pointed out that the consistency notification and review period would give the parties an adequate opportunity to informally resolve their differences; if conflict resolution did not occur within that period, the parties should have immediate access to Secretarial assistance. In response to these comments, the proposed mandatory 30-day waiting period prior to seeking mediation assistance has been deleted (§ 930.112).

In response to comments, the mediation process has been changed to indicate that Secretarial assistance will only be provided if all parties to the series disagreement agree to participate (§ 930.112). Reviewers pointed out that "mediation" (as opposed to binding arbitration) should be a voluntary process.

In response to comments, the public hearing procedures have been modified. The pre-hearing conference and the hearing officer proposed resolution procedures have been deleted. The hearing process is now constructed to foster an informal, information gathering proceeding (§ 930.113).

A number of reviewers objected to the excessive length of time that mediation would require. In response to these comments, unnecessary conflict resolution procedures have been deleted and the regulations now indicate that mediation efforts will last only so long as the parties agree to participate (§ 930.114).

A number of reviewers argued that the mediation provisions within the Act were not intended to preclude a party from seeking judicial enforcement to compel a Federal agency to adhere to the consistency requirements imposed by the Act. In response to these comments, the regulations now clearly indicate that judicial review where otherwise available may be sought by any party to a serious disagreement without first having exhausted the mediation process provided in the regulations (§ 930.116).

SUBPART H—SECRETARIAL REVIEW RELATED TO THE OBJECTIVES OR PURPOSES OF THE ACT AND NATIONAL SECURITY INTERESTS

In response to numerous comments, a new subpart concerning Secretarial review of Federal license and permit activities and Federal assistance projects has been added, and some changes in review procedures and criteria have been made.

A number of reviewers pointed out that the consistency certification review period would give the parties an adequate opportunity to informally resolve their differences; if informal negotiations failed, the applicant should have immediate access to Secretarial review. In response to these comments, the proposed mandatory 30-day waiting period prior to filing an appeal has been deleted (§ 930.125).

A number of reviewers objected to the excessive length of time that the appellate process would require. In response to these comments, the regulations declare that the Secretary shall make all reasonable efforts to complete consideration of an appeal within 90 days from the date of public notice (§ 930.130).

A number of reviewers objected to NOAA's proposed definition of the term "consistent with the objectives or purposes of the Act." This term represents one of the criteria which the Secretary uses to determine whether a State agency objection may be set aside. Some reviewers argued that the definition was too narrow and would limit the Secretary's ability to approve critical Federal activities which furthered the national interest. Other reviewers argued that the definition was too broad and would lead to Secretarial approval of Federal activities which could cause unjustified severe and harmful effects on coastal resources. A number of changes were made in response to these comments, and the term is now defined to permit Secretarial approval of a Federal activity when: (i) It furthers one or more of the competing national objectives or purposes contained in Sections 302 or 303 of the Act, (ii) when performed separately or when its cumulative effect is considered, it will not cause an adverse impact on the coastal zone substantial enough to outweigh its contribution to the national interest, (iii) it will not violate any requirements of the Clean Air Act or the Federal Water Pollution Control Act, and (iv) there is no reasonable alternative available which would permit the activity to be conducted in a manner consistent with the management program (§ 930.120).

On appeal to the Secretary, the appellant will normally be able to establish that the activity promotes one or more of the competing national objectives declared by Congress in the Act. This results because Congress has broadly defined the national interest in coastal zone management to include both protection and development of coastal resources. However, Congress has also declared that an objective of the Act is to permit coastal States to strike a balance between competing demands on coastal resources. Accordingly, while the appellant's proposed action may be among one of the many elements of the national interest described by Congress, the Secretary will not set aside a State agency objection unless she determines, on balance, that the national interest benefits of the proposed inconsistent activity significantly outweigh the negative effects upon coastal zone resources. In essence, the Secretarial role is to provide a variance when justified by overriding national interest grounds. The variance, however, may not be used to undermine the requirements of Federal law, particularly the requirements of the Clean Air Act (CAA) and the Federal Water Pollution Control Act (FWPCA) (see Section 307(b) of the Act).

After finding that proposed activity (i) is in the national interest, (ii) will not cause an adverse impact substantial enough to outweigh the benefits to the national interest, and (iii) will not violate the requirements of the CAA and FWPCA, the Secretary may set aside the State agency objection if the appellant also establishes that there is no reasonable alternative available. This last requirement was added based upon reviewer comments arguing that the Secretary should not find that an inconsistent activity is compatible with the intent of the Act if a reasonable alternative is available to the appellant.

In response to comments requesting clarification, the definition of the term "necessary in the interest of national security" has been modified. This term represents the second criterion which the Secretary may use to determine whether a State agency objection may be set aside. The regulations now indicate that the Secretary will consult with the Department of Defense and other interested Federal agencies to determine whether a national defense or other national security interest would be seriously threatened if an objected to Federal activity were not permitted to go forward as proposed (§ 930.122).

A number of reviewers requested clarification on how national security concerns would be addressed with regard to direct Federal activities (Subpart C) where no appellate review before the Secretary exists. In these cases the Federal agency in making its consistency determination will consider the extent to which national security requirements affect the agency's ability to undertake the activity in a manner consistent to the maximum extent practicable with the management program. Federal agency activities related to national security objectives may, at times, have to be undertaken in a manner inconsistent with an approved management program if existing law applicable to the agency's operations prohibits compliance with the program (§ 930.33(b)).

In response to the concerns of one commentator, the regulations clearly state that a Secretarial decision to override a State agency objection simply permits, but does not require, the Federal agency to approve the Federal license, permit or assistance application (§§ 930.128, 930.131(a)).

A number of reviewers requested a response to the following question. If a State refuses to issue a State or local government permit, and this denial is the equivalent of a State agency objection to the consistency of a Federal permit (§ 930.67), is the State compelled to issue its State or local government permit if the Federal permit applicant appeals to the Secretary of Commerce and she finds that the Federal permit may be issued on overriding national interest or national security grounds (Subpart H)? NOAA's answer to this questions is no. Throughout the legislative history of the Act, Congress clearly indicated that the Act was not intended to preempt existing State authority. By receiving Federal approval and assistance for its management program, a State does not consent to lose its existing authority to deny the issuance of coastal-related permits. NOAA considered two measures for addressing this issue. First, the regulations could require the Secretary to dismiss an appeal in the event the applicant failed to secure State or local government permits required in addition to the Federal permit. Second, the Secretary could review an activity notwithstanding State or local government permit denial, and could provide the applicant with an opportunity to secure a favorable Secretarial determination which could be used to persuade the State to grant the applicant an exception or variance. The latter approach was adopted. We point out that this issue does not arise in cases where concurrent State and local permits are not required (e.g., on the outer Continental Shelf, on excluded Federal lands, etc.)

A number of reviewers recommended that the regulations include a provision permitting direct appeals to the Secretary without awaiting review and objection by the State agency. Reviewers urged that this should be available in cases where the applicant declared in the consistency certification that the proposed activity would be inconsistent with the management program but would satisfy the objectives or purposes of the Act or be in the intrest of natioanl security. No changes were made in response to these comments. The regulations presently provide for independent Secretarial review of an activity, and this review need not be preceded by a formal State agency objection (§ 930.132). Accordingly, the Secretary in her discretion could initiate review when notified that State agency consideration may be unnecessary in light of the declared inconsistenecy of an activity. The initiation of review is left to the discretion of the Secretary to permit her to defer action when it appears that negotiations and discussions of alternatives during State agency review could lead to the activity going forward (§ 930.124). NOAA does not wish to encourage direct appeals to the Secretary which circumvent the public notice, review and accommodation efforts which take place during State agency review.

A number of commentators objected to the narrow grounds which the Secretary will use to review an appeal. Some reviewers urged that appellants should be able to argue on appeal that the State agency's consistency objection was not in accordance with the requirements of the management program. Other parties urged that the appeal process should be open to third-party challenges to State agency concurrences which violate the requirements of the management program. No changes were made in response to these comments, and the regulations now clearly indicate that the Secretary will only consider appeals which are based on grounds that the activity either (i) is consistent with the objectives or purposes of the Act, or (ii) is necessary in the interest of national security (§ 930.128). The Secretarial case-by-case review process created by Sections 307 (c) and (d) of the Act was only intended for the reviews of inconsistent Federal license, permit and assistance activities which may be eligible for Federal approval based upon the overruling national interest concerns cited above. The general manner in which a State agency implements its management program, including the manner in which consistency concurrences and objections are issued, shall be reviewed by the Office of Coastal Zone Management (OCZM) pursuant to its responsibilities under Section 312 of the Act, which requires the continuing review of management programs. Under this provision of the Act, OCZM will determine whether a State is failing to adhere to and is not justified in deviating from the approved program, and appropriate remedial action will be taken as necessary. Applicants and other interested parties may submit comments to OCZM regarding alleged State failure to properly implement a management program. Finally, the continuing OCZM review efforts do not preclude a person from seeking judicial relief where otherwise available in the event a State agency, in reviewing Federal license, permit, or assistance activities, fails to properly enforce management program requirements.

SUBPART I—ASSOCIATE ADMINISTRATOR REPORTING OF FEDERAL ACTIONS WHICH ARE NOT CONSISTENT WITH APPROVED MANAGEMENT PROGRAM

A number of reviewers recommended that the discussion of the Act's reporting requirements regarding inconsistent Federal actions not be included within the mediation discussions. In response to these comments, a new subpart has been added to the regulations. The new provisions invite the public to submit comments related to alleged inconsistent Federal actions (§ 930.141), and permit the Associate Administrator for Coastal Zone Management to issue advisory statements indicating whether a particular activity will be reported as being inconsistent with an approved management program (§ 930.143).

ENVIRONMENTAL AND INFLATIONARY IMPACT STATEMENTS

NOAA has reviewed these proposed regulations pursuant to the National Environmental Policy Act of 1969 and has determined that promulgation of these regulations will have no significant impact on the environment. NOAA has also determined that this document does not contain a major proposal requiring preparation of an Inflationary Impact Statement under Executive Order 11821 and OMB Circular A-107.

PUBLIC REVIEW AND COMMENT

NOAA invites public review of and comments on these proposed regulations so that they again may be modified, where neeessary and legally permissible, to fully satisfy the requirements of the Act in a manner which addresses the concerns of all parties affected by the Federal consistency provisions. Written comments should be submitted to the Federal Programs Division, Office of Coastal Zone Management, National Oceanic and Atmospheric Administration, U.S. Department of Commerce, 3300 Whitehaven Street NW., Washington, D.C. 20235, on or before October 28, 1977.

Following the close of the comment period and review of the comments, the Administrator may amend these regulations as necessary and will publish final regulations in the FEDERAL REGISTER.

THEODORE P. GLEITER,
Assistant Administrator for Administration.

AUGUST 23, 1977.

In consideration of the foregoing, it is proposed to add a new Part 930 to read as follows:

V42167 AUG 29 77 UMI

PART 930—FEDERAL CONSISTENCY WITH APPROVED COASTAL MANAGEMENT PROGRAMS

Subpart A—Objectives

Sec.
930.1 Overall Objectives.

Subpart B—General Definitions

930.10 Index to definitions.
930.11 Act.
930.12 Section.
930.13 Secretary.
930.14 Executive Office of the President
930.15 OCZM.
930.16 Associate Administrator.
930.17 Federal agency.
930.18 State agency.
930.19 Management program.
930.20 Coastal Zone.

Subpart C—Consistency for Federal Activities

930.30 Objectives.
930.31 Federal Activity.
930.32 Directly affecting the coastal zone.
930.33 Consistent to the maximum extent practicable.
930.34 Identifying Federal activities directly affecting the coastal zone.
930.35 Federal and State agency coordination.
930.36 Availability of mediation for negative determination disputes.
930.37 Federal agency consistency determinations for proposed activities.
930.38 Applicability to activities initiated prior to management program approval.
930.39 State agency receipt of consistency determinations.
930.40 Content of a consistency determination.
930.41 Multiple Federal agency participation.
930.42 State agency response.
930.43 State agency disagreement.
930.44 Availability of mediation for disputes concerning proposed activities.
930.45 Availability of mediation for previously reviewed activities.

Subpart D—Consistency for Activities Requiring a Federal License or Permit

930.50 Objectives.
930.51 Federal license or permit.
930.52 Applicant.
930.53 Affecting the coastal zone.
930.54 Management program license and permit listing.
930.55 Unlisted Federal license and permit activities.
930.56 Pending applications.
930.57 Availability of mediation for license or permit disputes.
930.58 State agency guidance and assistance to applicants.
930.59 Federal license and permit activities having interstate effects.
930.60 Consistency certifications.
930.61 Multiple permit review.
930.62 Commencement of State agency review.
930.63 Public notice.
930.64 Public hearings.
930.65 State agency concurrence with a consistency certification.
930.66 State agency objection to a consistency certification.
930.67 Management program equivalents for consistency review.
930.68 Federal permitting agency responsibility.
930.69 Availability of mediation for previously reviewed activities.

Subpart E—Consistency for Outer Continental Shelf (OCS) Exploration, Development and Production Activities

Sec.
930.70 Objectives.
930.71 Federal license or permit activity described in detail.
930.72 Person.
930.73 Affecting the coastal zone.
930.74 OCS plan.
930.75 OCS activities subject to State agency review.
930.76 State agency assistance to persons.
930.77 Submission of an OCS plan and consistency certification.
930.78 Commencement of State agency review; public notice.
930.79 State agency concurrence or objection.
930.80 Effect of State agency concurrence.
930.81 Federal permitting agency responsibility.
930.82 Multiple permit review.
930.83 Amended or new OCS plans.
930.84 Review of amended or new OCS plans; public notice.
930.85 Continuing State agency objections.
930.86 Failure to comply substantially with an OCS plan.

Subpart F—Consistency for Federal Assistance to State and Local Governments

930.90 Objectives.
930.91 Federal assistance.
930.92 Applicant agency.
930.93 Affecting the coastal zone.
930.94 OMB A-95 process.
930.95 Federal assistance geographic provision in the management program.
930.96 OMB A-95 project notification and review.
930.97 Consistency review.
930.98 Federal assisting agency responsibility.
930.99 Federally assisted projects outside of the described geographic area.
930.100 Pending applications.
930.101 Availability of mediation for Federal assistance disputes.
930.102 Availability of mediation for previously reviewed projects.

Subpart G—Secretarial Mediation

930.110 Objectives.
930.111 Informal negotiations.
930.112 Request for mediation.
930.113 Public hearings.
930.114 Secretarial mediation efforts.
930.115 Termination of mediation.
930.116 Judicial review.

Subpart H—Secretarial Review Related to the Objectives or Purposes of the Act and National Security Interests

930.120 Objectives.
930.121 Consistent with the objectives or purposes of the Act.
930.122 Necessary in the interest of national security.
930.123 Appellant.
930.124 Informal discussions.
930.125 Appeals to the Secretary.
930.126 Federal and State agency responses to appeals.
930.127 Public notice; receipt of comments.
930.128 Dismissal of appeals.
930.129 Public hearings.
930.130 Secretarial review.
930.131 Federal agency responsibility.
930.132 Secretarial review in the absence of an appeal.
930.133 Public notice; receipt of comments; public hearings.
930.134 Secretarial review; Federal agency responsibility.

Subpart I—Associate Administrator Reporting of Federal Actions Which Are Not Consistent With Approved Management Programs

Sec.
930.140 Objectives.
930.141 Notification to the Associate Administrator.
930.142 Associate Administrator reporting.
930.143 Associate Administrator advisory statements.

Appendix A—Information To Be Submitted With an OCS Exploration Plan

Appendix B—Information To Be Submitted With an OCS Development Plan

Authority: Sections 307, 316 and 317, Coastal Zone Management Act of 1972, Public Law 92-586, 86 Stat. 1280, 16 U.S.C. § 1451 et seq., as amended by Public Law 94-370, 90 Stat. 1013.

Subpart A—Objectives

§ 930.1 *Overall objectives.*

The objectives of these regulations are: (a) To describe the obligations of all agencies, individuals and other parties who are required to comply with the Federal consistency provisions of the Coastal Zone Management Act;

(b) To implement the Federal consistency provisions in a manner which strikes a balance between the need to ensure consistency for Federal activities with approval coastal zone management programs and the need to promote Federal programs affecting the coastal zone;

(c) To provide flexible procedures which foster intergovernmental cooperation and minimize duplicative effort and unnecessary delay, while making certain that the objectives of the Federal consistency provisions of the Act are satisfied;

(d) To interpret significant terms in the Federal consistency provisions so that they can be uniformly understood and adhered to by all agencies, individuals and other affected parties;

(e) To provide procedures to make certain that all Federal agency and State agency consistency determinations are directly related to the objectives, policies, standards and other criteria set forth in, or referenced as part of, approved coastal zone management programs;

(f) To provide procedures which the Secretary, in cooperation with the Executive Office of the President, may use to mediate serious disagreements which arise between Federal and State agencies during the administration of approved coastal zone management programs;

(g) To provide procedures which permit the Secretary to review Federal license or permit activities, or Federal assistance projects, to determine whether they are consistent with the objectives or purposes of the Act, or are necessary in the interest of national security; and

(h) To provide procedures which permit interested parties to notify the Associate Administrator for Coastal Zone Management of Federal actions believed to be inconsistent with approved coastal zone management programs, and for the reporting of such actions found by the Associate Administrator to be inconsistent with such programs.

Subpart B—General Definitions

§ 930.10 Index to definitions.

The following list includes all terms defined in Part 930 of his title keyed to the section or paragraph in which they are defined.

Term	*Section*
Act	930.11
Affecting the coastal zone	930.53, 930.73, 930.93
Appellant	930.123
Applicant	930.52
Applicant agency	930.92
Associate Administrator	930.16
Coastal Zone	930.20
Consistent to the maximum extent practicable	930.33
Consistent with the objectives or purposes of the Act	930.121
Development project	930.31(b)
Directly affecting the coastal zone	930.32
Executive Office of the President	930.14
Failure substantially to comply with an OCS plan	930.86(c)
Federal activity	930.31
Federal agency	930.17
Federal assistance	930.91
Federal license or permit	930.51
Federal license or permit activity described in detail	930.71
Management program	930.19
Necessary in the interest of national security	930.122
OCS plan	930.74
OCZM	930.15
OMB A-95 process	930.94
Person	930.72
Secretary	930.13
Section	930.12
State agency	930.18

§ 930.11 Act.

The term "Act" means the Coastal Zone Management Act of 1972, as amended (16 U.S.C. 1451 *et seq.*).

§ 930.12 Section.

The term "Section" means a section of the Coastal Zone Management Act of 1972, as amended.

§ 930.13 Secretary.

The term "Secretary" means the Secretary of the U.S. Department of Commerce.

§ 930.14 Executive Office of the President.

The term "Executive Office of the President" means the office, council, board, or other entity within the Executive Office of the President which shall participate with the Secretary in seeking to mediate serious disagreements which may arise between a Federal agency and a coastal State.

§ 930.15 OCZM.

The term "OCZM" means the Office of Coastal Zone Management, National Oceanic and Atmospheric Administration, U.S. Department of Commerce.

§ 930.16 Associate Administrator.

The term "Associate Administrator" means the Associate Administrator for Coastal Zone Management, National Oceanic and Atmospheric Administration, U.S. Department of Commerce.

§ 930.17 Federal agency.

The term "Federal agency" means any department, agency, board, commission, council, independent office or similar entity within the executive branch of the Federal Government, or any wholly owned Federal Government corporation.

§ 930.18 State agency.

(a) The term "State agency" means the agency designated pursuant to Section 306(c)(5) of the Act to receive and administer grants for an approved management program. The 306(c)(5) State agency is responsible for reviewing the consistency of Federal actions.

(b) The management program may permit the 306(c)(5) State agency to delegate the consistency review responsibility to:

(1) A single State agency or clearinghouse which will review all Federal actions;

(2) A number of State agencies with each reviewing certain types of Federal actions;

(3) Regional agencies (local, county, areawide) with each reviewing Federal actions affecting a particular region;

(4) Any combination of or alternative to the above examples which is approved by the Associate Administrator.

Unless otherwise noted, the term "State agency" shall be used throughout the remainder of this Part to mean the Section 306(c)(5) State agency as well as any other State, regional or local agency which has been delegated consistency review authority.

Comment: Section 306(e)(1)(A) of the Act permits "local implementation" of the management program subject to administrative review and enforcement of compliance by the section 306(c)(5) State agency.

(c) The management program may not require a Federal agency, applicant, or person to submit a consistency determination or certification to more than one agency. The single reviewing agency shall be responsible for securing necessary review and comment from other State, regional and local government agencies. Only the single reviewing agency is authorized to declare a disagreement with a Federal agency consistency determination issued for a Federal activity (see Subpart C), or object to the consistency of a Federal license, permit or assistance activity (see Subparts D, E and F).

Comment: This limitation does not remove the responsibility of an applicant or person to follow required procedures for securing State or local government permits when such permits are required in addition to a Federal permit.

(d) State, regional or local government agencies delegated consistency review responsibilities are prohibited from approving the consistency of their own applications of Federal licenses, permits and assistance which are subject to the requirements of this Part. Consistency review for such applications must be conducted by the State agency designated pursuant to Section 306(c)(5) of the Act.

§ 930.19 Management program.

(a) The term "management program" means a State coastal zone management program adopted by a coastal State in accordance with the provisions of Section 306 of the Act, approved by the Associate Administrator, and which includes objectives, policies, standards, State ad local government laws, rules, regulations, plans or other criteria set forth within or referenced as being part of the program, at the time of approval, subsequent amendment or refinement to guide public and private uses of resources within the State's coastal zone.

§ 930.20 Coastal zone.

(a) The term "coastal zone" means the coastal zone as defined in a State's management program.

(b) All lands owned, leased or whose use is otherwise by law subject solely to the discretion of the Federal Government, as well as lands held in trust by the Federal Government, are excluded from the coastal zone.

(c) Federal activities including development projects undertaken on excluded Federal lands which "directly affect the coastal zone," and Federal license, permit and assistance activities on such lands which "affect the coastal zone" are subject to the Federal consistency requirements of the Act and require review to determine consistency with approved management programs in accordance with the regulations in this Part.

(d) By excluding Federal lands from the coastal zone for the purposes of the Act, the coastal State does not relinquish or in any way impair its rights or authority over Federal lands that exist outside of the context of the coastal management program.

Subpart C—Consistency for Federal Activities

§ 930.30 Objectives.

The provisions of this Subpart are provided to assure that all Federal activities including development projects directly affecting the coastal zone are undertaken in a manner consistent to the maximum extent practicable with approved State coastal management programs.

(*Comment:* Statutory citation. Subsection 307(c)(1): "Each Federal agency conducting or supporting activities directly affecting the coastal zone shall conduct or support those activities in a manner which is, to the maximum extent practicable, consistent with approved state management programs."

Subsection 307(c)(2):

"Any Federal agency which shall undertake any development project in the coastal zone of a state shall insure that the project is, to the maximum extent practicable, consistent with approved state management programs.")

§ 930.31 Federal activity.

(a) The term "Federal activity" means any functions performed by or on be-

V 42167 AUG 29 77 UMI

half of a Federal agency in the exercise of its statutory responsibilities.

(b) A Federal development project is a Federal activity involving the planning, construction or modification of public works, physical facilities, or other structures, and land and water resource development, or water resources.

(c) The term "Federal activity" does not include the issuance of a Federal license or permit to an applicant or person (see Subparts D and E), or the granting of Federal assistance to an applicant agency (see Subpart F).

(*Comment:* Federal activities other than development projects may be viewed as a residual category covering Federal actions which are neither direct Federal development projects nor activities covered by the license, permit and assistance Subparts.

Examples could include:

(1) Regulations regarding Federal waste management practices (not a development project);

(2) Federal agency activities requiring a Federal license or permit (not covered by the Federal license and permit Subpart);

(3) Federal assistance to entities other than State and local governments, such as to Indian tribes (not covered by the Federal assistance Subpart.)

§ 930.32 Directly affecting the coastal zone.

(a) The term "directly affecting the coastal zone" describes the coastal zone effect caused by a Federal activity which is sufficient to trigger Federal agency responsibility for making a consistency determination and notifying the State agency of such determnation.

(b) A Federal activity will directly affect the coastal zone if the activity causes significant (i) changes in the manner in which waters, lands or other coastal zone resources are used, (ii) limitations on the range of uses of coastal zone resources, or (iii) changes in the quality of coastal zone resources. The significance of the effect on the coastal zone shall be considered in terms of the primary, secondary and cumulative consequences of the activity. A Federal activity which causes significant changes in or limitations on coastal zone resources directly affects the coastal zone even when the activity causes both beneficial and detrimental effects, and on balance the Federal agency determines that the effect will be beneficial.

§ 930.33 Consistent to the maximum extent practicable.

(a) The term "consistent to the maximum extent practicable" describes the requirement for Federal activities directly affecting the coastal zone of States with approved management programs to be consistent with such programs except to the extent that deviations are justified because some unforeseen circumstance arising after the approval of the management program present the Federal agency with a substantial obstacle that prevents complete adherence to the approved program.

(*Comment:* The legislative history of the Act states that Congress does not anticipate "that there will be any considerable number of situations where as a practical matter a Federal agency cannot conduct or support activities without deviating from approved State management programs." This anticipated result stems from Congress' intent that Federal agencies consult with the Secretary and State agencies during program development so that "any aspects or phases of the proposed program which are deemed by any agency to be impractical to carry out or support will be brought to the attention of the Secretary and steps will be taken at that point to iron out whatever difficulties appear to be established." Congress, however, recognized a need to permit deviations from a management program in limited cases where (i) circumstances arise which were not foreseen at the time of program approval, and (ii) such circumstances create a substantial obstacle preventing complete adherence to approved program. Accordingly, complete consistency with the management program is the general rule with exceptions permitted only for the special circumstances described above.)

(b) The term "consistent to the maximum extent practicable" shall be construed in conjunction with the provisions of section 307(e). Sections 307(c) (1) and (2), and 307(e). When read together, preserve for each Federal agency the responsibility for carrying out its statutory obligations subject to the additional requirements imposed by the Act. Therefore, each Federal agency shall consider State management programs as supplement requirements to be adhered to in addition to existing agency mandates, and shall conduct Federal activities directly affecting the coastal zone in a manner consistent to the maximum extent practicable with approved management programs, unless compliance with the management program is prohibited based upon the requirements of existing law applicable to the agency's operations. If a Federal agency asserts that compliance with the management program is prohibited, it must clearly describe to the State agency the legislative provisions, legislative history, or other legal authority which limits the Federal agency's discretion to comply with the requirements of the management program.

(*Comment:* Statutory citation: Section 307(e): "Nothing in this title shall be construed: (1) To diminish either Federal or state jurisdiction, responsibility, or rights in the field of planning, development, or control of water resources, submerged lands, or navigable waters; nor to displace, supersede, limit, or modify any interstate compact or the jurisdiction or responsibility of any legally established joint or common agency of two or more states or of two or more states and the Federal Government; nor to limit the authority of Congress to authorize and fund projects;

(2) As superseding, modifying, or repealing existing laws applicable to the various Federal agencies; nor to affect the jurisdiction, powers, or prerogatives of the International Joint Commission, United States and Canada, the Permanent Engineering Board, and the United States operating entity or entities established pursuant to the Columbia River Basin Treaty, signed at Washington, January 17, 1961, or the International Boundary and Water Commission, United States and Mexico.")

§ 930.34 Identifying Federal activities directly affecting the coastal zone.

(a) Federal agencies shall determine which of their activities directly affect the coastal zone of States with approved management programs.

(b) Federal agencies shall consider all development projects within the coastal zone to be significant activities directly affecting the coastal zone. All other types of activities within the coastal zone are subject to Federal agency review to determine whether they directly affect the coastal zone.

(*Comment:* Some Federal activities, such as a particular resource procurement practice, may not have the potential for causing a significant effect upon the coastal zone even when undertaken within the coastal zone.)

(c) Federal activities outside of the coastal zone (e.g., on excluded Federal lands, on the outer Continental Shelf, or landward of the coastal zone) are subject to Federal agency review to determine whether they directly affect the coastal zone.

(*Comment:* Federal agencies should determine whether a Federal activity outside of the coastal zone directly affects coastal zone resources by considering the location, magnitude and type of activity contemplated. A direct effect usually will be found when the proposed activity is large in magnitude and is adjacent or in close proximity to the coastal zone. The smaller the magnitude of the activity and the further it is from the coastal zone, the less likely is the potential for significant effects on coastal zone resources. However, even in cases where a proposed activity is a great distance from the coastal zone, the Federal agency must still make a consistency determination and notify the State agency of such determination if the proposed activity will directly affect the coastal zone (e.g., upland stream modification significantly affecting the quality of coastal waters). Federal agencies are encouraged to refer to the Council on Environmental Quality's guidelines in 40 CFR Part 1500 for assistance towards developing a method for identifying Federal activities directly affecting the coastal zone.)

§ 930.35 Federal and State agency coordination.

(a) State agencies may list in their management programs Federal activities which, in the opinion of the State agency, directly affect the coastal zone and require a Federal agency consistency determination. Listed Federal activities shall be described in terms of type and general location (e.g., Federal reclamation projects in coastal counties). During management program development, Federal agencies are encouraged to develop agreements with State agencies regarding Federal activities directly affecting the coastal zone to be listed in the management program. This joint effort should be carried out with a view towards avoiding consistency reviews for Federal activities which will normally have minimal and insignificant impacts upon the coastal zone, both in an individual and cumulative sense.

(b) State agencies may monitor unlisted Federal activities (e.g., by use of OMB Circular A-95 review, review of National Environmental Policy Act (NEPA) environmental impact statements, etc.) and should notify Federal agencies of unlisted Federal activities which Federal agencies have determined are not subject to consistency review, but which in the opinion of the State agency directly affect the coastal zone and require a Federal agency consistency determination. State agencies must notify Federal agencies within 45 days from notice of the unlisted Federal activity, otherwise the State agency waives its right to request a consistency determination.

(c) If a Federal agency decides that a consistency determination is not required for a Federal activity (i) identified by a State agency on its list or through case-by-case monitoring, or (ii) which is the same as or similar to activities for which consistency determinations have been prepared in the past, the Federal agency shall provide the State agency with a notification, at the earliest practicable time in the planning of the activity, briefly setting forth the reasons for its negative determination. A negative determination shall be provided to the State agency at least 90 days before the proposed activity reaches a decision stage likely to restrict the use of alternative measures for undertaking the activity, unless both the Federal agency and the State agency agree to an alternative notification schedule.

(*Comment:* A determination that a proposed Federal activity directly affects the coastal zone leads to two significant benefits. First, this finding requires the Federal agency to review the activity to assure that it will be undertaken in a manner consistent to the maximum extent practicable with an approved management program and, second, the consistency determination will provide the State agency with an opportunity to review and comment on the proposed activity, and will assist the State in planning for and managing the anticipated coastal zone effects. Given the benefits to be derived from this process, Federal agencies are encouraged to construe liberally the "directly affecting" test in a manner which favors inclusion of activities subject to consistency review.)

§ 930.36 Availability of mediation for negative determination disputes.

In the event of a serious disagreement between a Federal agency and a State agency regarding a determination related to whether a proposed activity directly affects the coastal zone, either party may seek the voluntary Secretarial mediation services provided for in Subpart G.

§ 930.37 Federal agency consistency determinations for proposed activities.

(a) Federal agencies shall review their proposed Federal activities which directly affect the coastal zone in order to develop consistency determinations which indicate whether such activities will be undertaken in a manner consistent to the maximum extent practicable with approved State management programs. Federal agencies are encouraged to consult with State agencies during their efforts to assess whether such activities will be consistent to the maximum extent practicable with such programs.

(b) In cases where Federal agencies will be performing an activity other than a development project (e.g., issuing regulations or regional directives regarding resource management practices), the agency may develop one general consistency determination thereby avoiding the necessity of issuing separate consistency determinations for each incremental action controlled by the major activity. If a Federal agency decides to issue a general consistency determination, it shall thereafter periodically consult with the State agency to discuss the manner in which the major activity is being undertaken.

(c) In cases where the Federal agency has sufficient information to determine the consistency of a proposed development project from planning to completion, only one consistency determination will be required. However, in cases where major Federal decisions related to a proposed development project will be made in phases based upon developing information, with each subsequent phase subject to Federal agency discretion to implement alternative decisions based upon such information (e.g., planning, siting, and design decisions), a consistency determination will be required for each major decision. In cases of phased decision-making, Federal agencies shall ensure that the development project continues to be consistent to the maximum extent practicable with the State's management program.

§ 930.38 Applicability to activities initiated prior to management program approval.

(a) A consistency determination will be required for ongoing Federal activities other than development projects (e.g., resource management practices) initiated prior to management program approval, which are governed by statutory authority under which the Federal agency retains discretion to reassess and modify the activity. In these cases the consistency determination must be made by the Federal agency at the earliest practicable time following management program approval, and the State agency must be provided with a consistency determination no later than 120 days after program approval for ongoing activities which the State agency identifies as subject to consistency with the management program.

(*Comment:* In these cases Federal agencies should consider general modification of Federal regulations or regional directives to reflect the consistency obligations which result following approval of management programs.)

(b) A consistency determination shall be required for major, phased Federal development project decisions described in § 930.37(c) which are made following management program approval and are related to development projects initiated prior to program approval. In making these new decisions, Federal agencies shall consider coastal zone effects not fully evaluated at the outset of the project. This provision shall not apply to phased Federal decisions which were specifically described, considered and approved (e.g., in a final environmental impact statement issued pursuant to the National Environmental Policy Act) prior to management program approval.

§ 930.39 State agency receipt of consistency determinations.

(a) Federal agencies shall provide State agencies with consistency determinations for all Federal activities directly affecting the coastal zone. The Federal agency may provide the State agency with this information in any manner it chooses so long as the requirements of this Subpart are satisfied.

(*Comment:* Federal agencies are strongly encouraged to provide consistency determinations to State agencies through use of existing notification procedures (e.g., OMB Circular A-95, NEPA environmental impact statements, memoranda of understanding, etc.) in order to avoid waste, duplication of effort, and to reduce Federal and State agency administrative burdens. The use of existing procedures is permissible so long as such procedures are modified or supplemented as necessary to satisfy the requirements of this Subpart.)

(b) Federal agencies shall provide State agencies with a consistency determination at the earliest practicable time in the planning or reassessment of the activity. A consistency determination should be prepared following development of sufficient information to determine reasonably the consistency of the activity with the State's management program, but before the Federal agency reaches a significant point of decision-making in its review process. The consistency determination shall be provided to State agencies at least 90 days before the Federal activity reaches a decision stage likely to restrict the use of alternative measures for undertaking the activity, unless both the Federal agency and the State agency agree to an alternative notification schedule.

(*Comment:* Federal and State agencies are encouraged to agree upon flexible procedures for extending the notification requirement beyond 90 days for major activities requiring a substantial period for adequate review, and for lessening the notification period for minor activities.)

§ 930.40 Content of a consistency determination.

(a) The consistency determination shall include a statement indicating whether or not the proposed activity will be undertaken in a manner consistent to the maximum extent practicable with the management program and a discussion relating to coastal zone effects of the activity to the relevant elements of the management program. The consistency determination shall also include a detailed description of the activity and comprehensive data and information sufficient to support the Federal agency's consistency decision. The amount of detail provided in the description and in the supporting information shall be commensurate with the expected effects of the activity on the coastal zone.

(b) In making its consistency determination, the Federal agency shall be guided by the examples set out below (which are not meant to be exhaustive).

V 42167 AUG 29 77 UMI

The first three examples emphasize issues related to project siting, design and associated coastal zone effects. Examples 4 and 5 draw a distinction between functionally dependent, associated facilities (i.e., the use of the primary project is dependent upon the construction of the associated facility) and independent facilities induced by the primary project (i.e., the primary project can function independent of, and is not justified by, the induced facilities). In the former case, the existence of the inconsistent associated facility warrants a finding by the Federal agency that the primary project may not be declared to be consistent with the management program until the facility is modified or the proposal revised to substitute the associated facility with an acceptable activity. In the latter case, the example points out that the primary project may be declared to be consistent with the management program, and the inconsistent induced facilities can be controlled through alternate means. Finally, the last example highlights the situation where the Federal activity causes adverse effects upon coastal zone resources but the management program does not contain requirements related to these effects. In this instance the Federal agency may declare the activity to be consistent with the management program. The examples below do not address situations where the Federal agency determines that deviations from the requirements of the management program are justified in accordance with the exceptions permitted under § 930.33 ("Consistent to the maximum extent practicable").

(1) If the activity will not cause unacceptable adverse effects on coastal zone resources in terms of the requirements of the management program (e.g., the project is sited in a permissible area and meets management program performance standards), the Federal agency may declare the activity to be consistent with the management program;

(2) If the siting of the activity in the coastal zone, or its design, results in an unacceptable adverse effect on coastal zone resources (e.g., the project is sited in an area of particular concern where development is prohibited, or its design will violate wetland or floodplain protection policies), the Federal agency may not declare the activity to be consistent with the management program;

(3) If the siting of the activity is (i) permissible (e.g., a shoreline project is coastal-dependent and a permitted use), or (ii) not subject to the requirements of the management program (e.g., the facility is sited on excluded Federal lands), but the primary coastal zone effects do not conform to the requirements of the management program (e.g., the project as proposed would cause air or water quality violations), the Federal agency may not declare the activity to be consistent with the management program;

(4) If the siting of the project is permissible or not subject to the requirements of the management program (see Example 3), but a proposed associated, functionally dependent facility located in or primarily affecting the coastal zone is not consistent with the requirements of the management program (e.g., a proposed pipeline connection to the project does not meet erosion control performance standards), the Federal agency may not declare the project to be consistent with the management program until the necessary supporting facility is modified to conform to the requirements of the management program. If the proposed pipeline connection is redesigned to conform to erosion control requirements, or if the pipeline is replaced by an alternate, permissible transport method, the Federal agency may declare the project to be consistent with the management program;

(5) If the activity is permissible (e.g., Corps of Engineers harbor dredging) and this project creates an incentive for functionally independent residential development around the harbor area, and the onshore development will not conform to the requirements of the management program (noncoastal-dependent residential development limited by the management program), the Federal agency may nevertheless declare the primary activity to be consistent with the management program. This results because the proposed project has an independent purpose (e.g., rehabilitate the existing harbor channel to facilitate commercial (and incidental recreational) vessel traffic), and the additional onshore development demanded in response to increased recreational opportunities is neither a necessary associated facility (see Example 4) nor a justification for undertaking the dredging project. This result is not adverse since the State, through the requirements of the management program, has the authority to prohibit or control inconsistent onshore development (e.g., by restrictive zoning, by denying the issuance of State coastal permits, by objecting to the consistency of Federal permits that might be required, etc.);

(6) If the activity is not subject to the requirements of the management program (e.g., National Park Service expansion of recreation facility on excluded Federal lands) and this project creates an incentive for the development of motel and other commercial facilities in an adjacent coastal zone urban area, but the management program does not contain policies, objectives or standards controlling such urban development (e.g., not prohibited or controlled despite potential for adverse impacts), then the Federal agency may declare the primary activity to be consistent with the management program. This results because the State agency has no basis for objecting to the adverse effects since the management program does not address the issue.

(c) When Federal agency standards are more restrictive than standards or requirements contained in the State's management program, the Federal agency may continue to apply its stricter standards (e.g., restrict project development or design alternatives notwithstanding permissive management program policies). In such cases the Federal agency should inform the State agency in the consistency determination of the statutory, regulatory or other basis for the application of the stricter standards.

§ 930.41 Multiple Federal agency participation.

Whenever more than one Federal agency is involved in a Federal activity directly affecting the coastal zone, or is involved in a group of such activities related to each other because of their functional interdependence or geographic proximity, consideration should be given to the preparation of one consistency determination for all the Federal activities involved. In such cases, Federal agencies should consider joint preparation or lead agency development of the consistency determination. In either case, the consistency determination (i) must be transmitted to the State agency at least 90 days before major decisions are taken by any of the participating agencies, (ii) must indicate whether or not each of the proposed activities is consistent to the maximum extent practicable with the management program, and (iii) must include information on each proposed activity sufficient to support the consistency determination.

§ 930.42 State agency response.

(a) A State agency shall inform the Federal agency of its agreement or disagreement with the Federal agency's consistency determination at the earliest practicable time. If a final response has not been developed and issued within 45 days from receipt of the Federal agency notification, the State agency should at that time inform the Federal agency of the status of the matter and the basis for further delay. The Federal agency may presume State agency agreement if the State agency fails to provide a response within 45 days from receipt of the Federal agency notification.

(b) State agency agreement shall not be presumed in cases where the State agency, with the 45 day period, requests an extension of time to review the matter. Federal agencies shall approve one request for an extension period of 30 days or less. In considering whether a longer or additional extension period is appropriate, the Federal agency should consider the magnitude and complexity of the information contained in the consistency determination.

§ 930.43 State agency disagreement.

(a) In the event the State agency disagrees with the Federal agency's consistency determination, the State agency shall accompany its response to the Federal agency with its reasons for the disagreement and supporting information. The State agency response must describe (i) how the proposed activity will be inconsistent with specific elements of the management program, and (ii) alternative measures (if they exist) which, if adopted by the Federal agency, would allow the activity to proceed in a manner consistent to the maximum extent practicable with the management program.

(b) State agencies shall send to the Associate Administrator a copy of responses which describe disagreements with Federal agency consistency determinations.

(c) In the event of a disagreement, the Federal and State agencies should utilize the remaining portion of the 90-day notice period to attempt to resolve their differences. In cases of continuing State agency disagreement, Federal agencies are encouraged to suspend implementation of the activity beyond the 90-day period pending resolution of the disagreement.

§ 930.44 Availability of mediation for disputes concerning proposed activities.

(a) In the event of a serious disagreement between a Federal agency and a State agency regarding the consistency of a proposed Federal activity directly affecting the coastal zone, either party may request the voluntary Secretarial mediation services provided for in Subpart G.

§ 930.45 Availability of mediation for previously reviewed activities.

(a) The State agency shall request that the Federal agency take appropriate remedial action following a serious disagreement resulting from a State agency's objection to a Federal activity which was: (1) previously determined to be consistent to the maximum extent practicable with the State's management program, but which the State agency later maintains is being conducted or is having a coastal zone effect substantially different than originally proposed and, as a result, is no longer consistent to the maximum extent practicable with the State's management program, or (ii) previously determined not to be a Federal activity directly affecting the coastal zone, but which the State agency later maintains is being conducted or is having a coastal zone effect substantially different than originally proposed and, as a result, the activity directly affects the coastal zone and is not consistent to the maximum extent practicable with the State's management program.

(b) If, after a reasonable time following a request for remedial action, the State agency still maintains that a serious disagreement exists, either party may request the voluntary Secretarial mediation services provided for in Subpart G.

Subpart D—Consistency for Activities Requiring a Federal License or Permit

§ 930.50 Objectives.

The provisions of this Subpart are provided to assure that Federally licensed or permitted activities affecting the coastal zone are conducted in a manner consistent with approved management programs.

(*Comment:* Statutory citation: Subsection 307(c)(3)(A): "After final approval by the Secretary of a state's management program, any applicant for a required Federal license or permit to conduct an activity affecting land or water uses in the coastal zone of that state shall provide in the application to the licensing or permitting agency a certification that the proposed activity complies with the state's approved program and that such activity will be conducted in a manner consistent with the program. At the same time, the applicant shall furnish to the state or its designated agency a copy of the certification, with all necessary information and data. Each coastal state shall establish procedures for public notice in the case of all such certifications and, to the extent it deems appropriate, procedures for public hearings in connection therewith. At the earliest practicable time, the state or its designated agency shall notify the Federal agency concerned that the state concurs with or objects to the applicant's certification. If the state or its designated agency fails to furnish the required notification within six months after receipt of its copy of the applicant's certification, the state's concurrence with the certification shall be conclusively presumed. No license or permit shall be granted by the Federal agency until the state or its designated agency has concurred with the applicant's certification or until, by the state's failure to act, the concurrence is conclusively presumed.")

§ 930.51 Federal license or permit.

The term "Federal license or permit" means any authorization, certification, approval, or other form of permission, and any removal thereof, which any Federal agency is empowered to issue to an applicant.

§ 930.52 Applicant.

The term "applicant" means any individual, public or private corporation, partnership, association, or other entity organized or existing under the laws of any State, or any State, regional, or local government, who has applied for but has not yet received a Federal license or permit to conduct an activity affecting the coastal zone. The term "applicant" does not include Federal agencies applying for Federal licenses or permits. Federal agency "activities" requiring Federal licenses or permits are subject to the consistency requirements of Subpart C.

§ 930.53 Affecting the coastal zone.

(a) The term "affecting the coastal zone" describes the coastal zone effect caused by a Federal license or permit activity which will trigger the applicant's responsibility for complying with the Federal consistency procedures of this Subpart. The criteria set forth within § 930.32 for determining whether a Federal activity "directly affects the coastal zone" apply to this determination. In addition, State agencies have the option of using a more expansive definition of "significant effect" to cover a broad range of resource, social and economic effects which are considered in the management program to be significant.

(*Comment:* If a State utilizes this term in a broad fashion, the result will be increased ability for State review of proposed Federal license and permit activities. This ability to review Federal license and permit actions should be distinguished from the issue of whether or not the proposed activity is consistent with the requirements of the management program. Concurrence with or objection to the consistency of the activity must still be related to the requirements of the management program. The benefit of an expansive application of this term is that it will assist the State in planning for and managing the significant coastal zone effects resulting from consistent Federal license and permit activities.)

§ 930.54 Management program license and permit listing.

(a) During management program development, Federal agencies should assist State agencies in identifying Federal license and permit activities affecting the coastal zone.

(b) State agencies shall develop a list of Federal license and permit activities affecting the coastal zone which the State wishes to review for consistency with the management program. The list shall be included as part of the management program, and the Federal license and permit activities shall be described in terms of the specific licenses or permits involved. In the event the State chooses to review Federal licenses and permits for activities outside of the coastal zone but likely to significantly affect the coastal zone, it must generally describe the geographic location of such activities.

(*Comment:* The location element should encompass only areas where Federal license and permit activities are likely to cause significant effects on coastal zone resources. For example, the management program could list a Federal landuse permit (e.g., Forest Service right-of-way permits for logging roads) and require review whenever such a permit is requested along riverine areas where development is likely to significantly affect downstream areas within the coastal zone. The State agency should exclude geographic areas outside of the coastal zone where Federal license and permit activities generally will have insignificant impacts on coastal zone resources both in an individual and cumulative sense.)

(c) The license and permit list may be refined by the Section 306(c)(5) State agency (see § 930.18) following consultation with the affected Federal agency and approval of additions or deletions by the Associate Administrator. The State agency shall provide copies of the list and any refinements to Federal agencies and shall make the information available to the public.

(d) No Federal license or permit on an approved list shall be issued by a Federal agency until the requirements of this Subpart have been satisfied.

§ 930.55 Unlisted Federal license and permit activities.

(a) State agencies should monitor unlisted Federal license and permit activities (e.g., by use of OMB Circular A-95 review, review of NEPA environmental impact statements, etc.) and shall immediately notify Federal agencies and applicants of unlisted activities significantly affecting the coastal zone which require State agency review. State agencies must inform the Federal agency and applicant within 45 days from notice of the license or permit application, otherwise the State agency waives its right to review the unlisted activity. Notification shall also be sent by the State agency to the Associate Administrator.

V 42167 AUG 29 77 UMI

(b) If the State agency notifies a Federal agency and applicant of an unlisted license or permit activity requiring State agency review, the Federal agency may not issue the license or permit until the requirements of this Subpart have been satisfied, unless the Associate Administrator disapproves the State agency's decision to review the activity. The Associate Administrator's approval shall be presumed if no objection is issued to the State agency by the Associate Administrator within 15 days from receipt of the notice. In the event of an objection, the Associate Administrator shall send copies to the applicant and Federal agency.

(c) Following receipt of the State agency notice and presumed approval by the Associate Administrator, the applicant shall comply with the consistency certification procedures of this Subpart. The State agency will be entitled to a 6-month review period beginning from the date of the original notice (see Subsection (a)) of the license or permit application.

§ 930.56 Pending applications.

(a) State agencies must notify Federal agencies, applicants and the Associate Administrator within 45 days of management program approval of a decision to review pending applications for listed or unlisted Federal licenses and permits, otherwise the State agency waives its right to to review such activities.

(b) If within the permitted time period the State agency notifies a Federal agency and applicant of its decision to review a pending application, the Federal agency shall not issue the license or permit until the requirements of this Subpart have been satisfied, unless the Associate Administrator disapproves the State agency's decision to review the activity. The Associate Administrator's approval or objection shall be indicated in accordance with the procedures described in § 930.55(b).

(c) Following receipt of the State agency notice and presumed approval by the Associate Administrator, the applicant shall comply with the consistency certification procedures on this Subpart. The State agency will be entitled to a 6-month review period beginning from the date of the original notice of the license or permit application, except that regardless of the notification date the State agency shall have, at a minimum, a period of review for the three months following management program approval.

(d) In instances where State agencies choose to review pending applications, they shall consider carefully the time and resources invested by the applicant prior to management program approval.

§ 930.57 Availability of mediation for license or permit disputes.

In the event of a serious disagreement between a Federal and State agency regarding whether a listed or unlisted Federal license or permit activity is subject to consistency review, either party may request the voluntary Secretarial mediation services provided for in Subpart G. The existence of a serious disagreement will not relieve the Federal agency from the responsibility for withholding approval of the license or permit application pending satisfaction of the requirements of this Subpart.

§ 930.58 State agency guidance and assistance to applicants.

As a preliminary matter, any applicant for a Federal license or permit selected for review by a State agency should obtain the views and assistance of that agency regarding the means for ensuring that the proposed activity will be conducted in a manner consistent with the State's management program. The State agency may develop requirements regarding the data and information necessary to assess the consistency of Federal license and permit activities. State agency information requirements are subject to approval by the Associate Administrator. Required data and information shall not include confidential and proprietary material.

§ 930.59 Federal license and permit activities having interstate effects.

(a) In preparing consistency certifications for a license or permit activity affecting the coastal zone of more than one State, the applicant should determine whether the requirements of the management programs are in conflict with each other with respect to the proposed activity. If such a determination is made, the applicant should notify the State agencies, the Federal agency and OCZM of such conflict at the earliest practicable time.

(b) Upon receiving notification from an applicant that a license or permit activity may be subject to conflicting requirements from more than one management program, the agencies identified in subsection (a) shall consult with each other and with the applicant in an attempt to identify alternative means for complying with the requirements of the management programs.

§ 930.60 Consistency certifications.

(a) Except in cases covered by the provisions within § 930.67 (management program equivalents for consistency review), all applicants for Federal licenses and permits subject to State agency review shall provide the Federal agency with a consistency certification along with the Federal application, and shall furnish the State agency with a copy of the consistency certification.

(b) The consistency certification shall describe whether or not the proposed activity will be conducted in a manner consistent with the State's management program and shall contain a discussion relating the coastal zone effects of the activity to the relevant elements of the management program. In developing the consistency certification, the applicant shall be guided by the examples described in § 930.40(b). Upon request of the applicant, the State agency may provide assistance for developing the consistency certification.

(c) The consistency certification shall be accompanied by a detailed description of the proposed activity and information and data sufficient to support the applicant's consistency certification. At the request of the applicant, the Federal agency or other interested parties may provide the State agency with all or part of the information required.

(d) When satisfied that adequate protection against public disclosure exists, applicants are encouraged to provide the State agency with confidential and proprietary information which the State agency maintains is necessary to make a reasoned decision on the consistency of a proposed activity. State agency requests for such information should be related to the necessity of having such information to assess adequately the coastal zone effects of the proposed activity.

§ 930.61 Multiple permit review.

(a) Applicants are encouraged to consolidate related Federal license and permit activities affecting the coastal zone for State agency review. State agencies should provide applicants with a "one-step" multiple permit review to minimize duplication of effort and to avoid unnecessary delays.

(b) A State agency objection to one or more of the license or permit activities submitted for consolidated review shall not prevent the applicant from receiving Federal agency approval for those license and permit activities found to be consistent with the management program.

§ 930.62 Commencement of State agency review.

Except as provided in §§ 930.55 and 930.56, State agency review of an applicant's consistency certification begins at the time the State agency receives a copy of the consistency certification, and information and data required pursuant to §§ 930.58 and 930.60.

§ 930.63 Public notice.

(a) Following receipt of the material decribed in § 930.62, the State agency shall ensure timely public notice of the proposed activity. At a minimum, public notice shall be provided in the immediate area of the coastal zone which is likely to be significantly affected by the proposed activity. Public notice shall be expanded in proportion to the degree of likely public interest resulting from the unique geographic area involved, the substantial commitment of or affect on coastal resources, the complexity or controversy of the proposal, or for other good cause.

(b) Public notice shall facilitate public comment by providing a summary of the proposed activity, by announcing the availability for inspection of the consistency certification and accompanying public information and data, and by requesting that comments be submitted to the State agency.

(c) A number of procedural options are available to State agencies to satisfy the public notice requirements of this Subpart. They include, but are not limited to:

(1) the State agency providing the public notice;

(2) the State agency requiring the applicant to provide the public notice; or

(3) the State agency relying upon the public notice provided by the Federal agency reviewing the application for the Federal license or permit (e.g., A–95 public notices, notice of availability of NEPA environmental impact statements) if such notice satisfies the minimum requirements set forth in subsections (a) and (d) above.

(d) Federal and State agencies are encouraged to issue joint public notices whenever possible to minimize duplication of effort and to avoid unnecessary delays.

§ 930.64 Public hearings.

(a) At the discretion of the State agency, public notice may include the announcement of one or more public hearings. Public hearings shall be scheduled with a view towards (1) allowing access to the consistency certification and accompanying public information within a reasonable time prior to the hearing, (2) facilitating broad public attendance and participation at the hearing, and (3) affording the applicant expeditious consideration of the proposed activity.

(b) Federal and State agencies are encouraged to hold joint public hearings in the event both agencies determine that a hearing on the action is necessary.

§ 930.65 State agency concurrence with a consistency certification.

(a) At the earliest practicable time, the State agency shall notify the Federal agency and the applicant whether the State agency concurs with or objects to a consistency certification. Concurrence by the State agency shall be conclusively presumed in the absence of a State agency objection within six months following commencement of State agency review.

(b) State agencies should restrict the period of public notice, receipt of comments, hearing proceedings and final decision-making to the minimum time necessary to inform the public, obtain sufficient comment, and develop a reasonable decision on the matter. If the State agency has not issued a decision within three months following commencement of State agency review, it shall notify the applicant and the Federal agency of the status of the matter and the basis for further delay.

(c) If the State agency issues a concurrence or is conclusively presumed to concur with the applicant's consistency certification, the Federal agency may approve the Federal license or permit application. Notwithstanding State agency concurrence with a consistency certification, the Federal permitting agency may deny approval of the Federal license or permit application.

§ 930.66 State agency objection to a consistency certification.

(a) If the State agency objects to the applicant's consistency certification within six mointh following commencement of review, it shall notify the applicant and Federal agency of the objection.

(b) State agency objections must describe (i) how the proposed activity is inconsistent with specific elements of the management program, and (ii) alternative measures (if they exist) which, if adopted by the applicant, would permit the proposed activity to be conducted in a manner consistent with the management program.

(c) During the period when the State agency is reviewing the consistency certification, the applicant and the State agency should attempt to agree upon conditions which, if met by the applicant, would permit State agency concurrence. The parties should also consult with the Federal agency responsible for approving the Federal license or permit to ensure that proposed conditions satisfy Federal as well as State management program requirements.

(d) A State agency objection may be based upon a determination that the applicant has failed to supply the information required pursuant to §§ 930.59 and 930.60. If the State agency objects on the grounds of insufficient information, the objection must describe the nature of the information requested and the necessity of having such information to determine the consistency of the activity with the management program. If necessary existing information is being withheld by the applicant, the parties should attempt to agree upon conditions which would permit submission of such information (e.g., State agency protection of confidential information from public disclosure). If sufficient information is simply not available at the time of State agency review, the parties should attempt to agree upon conditions for monitoring the activity, and for providing the State agency with furher information as it becomes available. In these special cases, the State agency may conditionally concur and reserve the right to object and compel modifications, or withdraw its concurrence if monitoring disloses that the activity is not consisent with the management program.

(e) A State agency objection shall include a statement informing the applicant of a right of appeal to the Secretary on the grounds described in Subpart H, and the State agency shall send a copy of the objection to the Associate Administrator.

§ 930.67 Management program equivalents for consistency review.

(a) A State agency may include within the management program equivalent procedures to satisfy the consistency review procedures of this Subpart. Any equivalent procedure adopted by a State agency must satisfy the public notice requirements of this Subpart. In addition, the State reviewing agency, regardless of the equivalent procedure used, must clearly indicate in writing to the applicant and the Federal agency that its affirmative or negative decision constitutes the equivalent of a concurrence with or objection to a consistency certification for the proposed Federal license or permit activity.

(b) Equivalent consistency review procedures may include, but are not limited to:

(1) Applicant receipt of State or local government permits which are required in addition to the Federal license or permit is declared to be the equivalent of receiving State agency concurrence with a consistency certification. In this instance the Federal agency could issue the Federal license or permit following the applicant's receipt of the State or local government permit;

(2) State review and approval of a Federal permit in accordance with review requirements of a Federal law other than the Act is declared to be the equivalent of receiving State agency concurrence with a consistency certification. For example, State certification of a Federal permit pursuant to the requirements of Section 401 of the Federal Water Pollution Control Act, as amended (FWPCA), could also serve as the State agency's procedure for declaring the consistency of the Federal permit so long as the review considered all management program requirements including those related to the FWPCA;

(3) Federal licenses and permits subject to a State agency "general concurrence" are declared to have received consistency certification approval. If a State agency wishes to avoid repeated review of and concurrence with consistency certifications required for minor Federally permitted activities which cumulatively cause substantial adverse effects on the coastal zone, the State agency, after developing conditions allowing concurrence for such activities, may issue a general public notice and general concurrence permitting similar minor work in the same geographic area to proceed without prior State agency review. In such cases, the State agency must notify the appropriate Federal agency that license or permit activities satisfying the conditions set forth in the general concurrence are consistent with the management program and do not require submission of a consistency certification.

§ 930.68 Federal permitting agency responsibility.

Following receipt of a State agency objection to a consistency certification or an objection under an equivalent procedure describe in the management program, the Federal agency shall not issue the Federal license or permit except as provided in Subpart H.

§ 930.69 Availability of mediation for previously reviewed activities.

(a) The State agency shall request that the Federal agency take appropriate remedial action following a serious disagreement resulting from a State agency objection to a Federally licensed or permitted activity which was: (i) Previously determined to be consistent with the State's management program, but which the State agency later maintains is being conducted or is having coastal zone effects substantially different than originally proposed and, as a result, is

V 42 167 AUG 29 77 UMI

no longer consistent with the State's management program; or (ii) previously determined not to be an activity affecting the coastal zone, but which the State agency later maintains is being conducted or is having coastal effects substantially different than originally proposed and, as a result, the activity affects the coastal zone in a manner inconsistent with the State's management program.

(b) If, after a reasonable time following a request for remedial action, the State agency still maintains that a serious disagreement exists with the Federal agency, either party may seek the voluntary Secretarial mediation services provided for in Subpart G.

Subpart E—Consistency for Outer Continental Shelf (OCS) Exploration Development and Production Activities

§ 930.70 Objectives.

The provisions of this Subpart are provided to assure that all Federal license and permit activities described in detail in OCS plans and which affect the coastal zone are conducted in a manner consistent with approved coastal zone management programs.

(*Comment:* Statutory citation: Subsection 307(c)(3)(B):

"After the management program of any coastal state has been approved by the Secretary under Section 306, any person who submits to the Secretary of the Interior any plan for the exploration or development of, or production from, any area which has been leased under the Outer Continental Shelf Lands Act (43 U.S.C. 1331, 3t seq.) and regulations under such Act shall, with respect to any exploration, development, or production described in such plan and affecting any land use or water use in the coastal zone of such state, attach to such plan a certification that each activity which is described in detail in such plan complies with such state's approved management program and will be carried out in a manner consistent with such program. No Federal official or agency shall grant such person any license or permit for any activity described in detail in such plan until such state or its designated agency receives a copy of such certification and plan together with any other necessary data and information, and until:

(i) Such state or its designated agency, in accordance with the procedures required to be established by such state pursuant to subparagraph (A), concurs with such person's certification and notifies the Secretary and the Secretary of the Interior of such concurrence; or

(ii) Concurrence by such state with such certification is conclusively presumed, as provided for in subparagraph (A); * * *

"If a state concurs or is conclusively presumed to concur, * * *, the provisions of subparagraph (A) are not applicable with respect to such person, such state, and any Federal license or permit which is required to conduct any activity affecting land uses or water uses in the coastal zone of such state which is described in detail in the plan to which such concurrence * * * applies. If such state objects to such certification, * * * or if such person fails substantially to comply with such plan, as submitted, such person shall submit an amendment to such plan, or a new plan, to the Secretary of the Interior. With respect to any amendment or new plan submitted to the Secretary of the Interior pursuant to the preceding sentence, the applicable time period for purposes of concurrence by conclusive presumption under subparagraph (A) is 3 months.")

§ 930.71 Federal license or permit activity described in detail.

The term "Federal license or permit activity described in detail" means any activity requiring a Federal license or permit, as defined in § 930.51, which the Secretary of the Interior determines must be described in detail within an OCS plan.

§ 930.72 Person.

The term "person" means any individual, corporation, partnership, association, or other entity organized or existing under the laws of any State, the Federal government, any State, regional, or local government, or any entity of such Federal, State, regional or local government, who submits to the Secretary of the Interior, following management program approval, an OCS plan which describes in detail Federal license or permit activities.

§ 930.73 Affecting the coastal zone.

The term "affecting the coastal zone" describes the coastal zone effect caused by a Federal license or permit activity described in detail within an OCS plan which will trigger the person's responsibility for complying with the Federal consistency procedures of this Subpart. The criteria referenced and described within § 930.53 apply to this determination.

§ 930.74 OCS plan.

The term "OCS plan" means any plan for the exploration or development of, or production from, any area which has been leased under the Outer Continental Shelf Lands Act (43 U.S.C. Sec. 1331 et seq.), and the regulations under that Act, which is submitted to the Secretary of the Interior following management program approval and which describes in detail license or permit activities.

§ 930.75 OCS activities subject to State agency review.

(a) State agencies may include, pursuant to § 930.54, Federal license and permit activities described in detail in OCS plans on the management program list of Federal license and permit activities affecting the coastal zone which are subject to State agency consistency review.

(b) State agencies may monitor, pursuant to § 930.55, unlisted Federal license and permit activities described in detail OCS plans to identify and select individual cases where State agency consistency review is required.

§ 930.76 State agency assistance to persons.

As a preliminary matter, any person intending to submit to the Secretary of the Interior an OCS plan which describes in detail Federal license or permit activities selected for review by a State agency should obtain the views and assistance of that agency regarding the means for ensuring that such activities will be conducted in a manner consistent with the State's management program.

§ 930.77 Submission of an OCS plan and consistency certification.

Any person submitting to the Secretary of the Interior any OCS plan shall:

(a) Identify all Federal license and permit activities described in detail in the plan which are subject to State agency review;

(b) Provide the Secretary of the Interior with a consistency certification along with the OCS plan, and shall furnish the State agency a copy of the OCS plan (excluding proprietary information) and consistency certification. The consistency certification shall describe whether or not each of the proposed activities described in paragraph (1) will be conducted in a manner consistent with the State's management program and shall contain a discussion relating the coastal zone effects of each activity to the relevant elements of the management program. Upon request by the person, the developing the consistency certification;

(c) Accompany the consistency certification with data and information sufficient to (i) support the person's consistency determinaton and (ii) permit the State agency to plan for and manage coastal zone impacts caused by OCS activities. Such data and information shall include, but not be limited to, the material specified in Appendix A for exporation plans, and the material specified in Appendix B for development plans. At the request of the person, the Secretary of the Interior or other interested parties may provide the State agency with all or part of this information.

§ 930.78 Commencement of State agency review; public notice.

(a) Except as provided in § 930.55, State agency review of the person's consistency certification begins at the time the State agency receives a copy of the OCS plan, consistency certification, and required supporting data and information.

(b) Following receipt of the material described in subsection (a), the State agency shall ensure timely public notice of the proposed activities in accordance with the directives within §§ 930.63–930.64.

§ 930.79 State agency concurrence or objection.

(a) The State agency shall concur with or object to the person's consistency certification in accordance with the directives within §§ 930.65–930.66.

(b) If a State agency issues a concurrence for a person's consistency certification, the State agency shall notify both the Secretary of Commerce and the Secretary of the Interior of such concurrence.

(c) If a State agency objects to one or more of the Federal license or permit activities described in the consistency certification, it must provide a separate discussion for each objection in accordance with the directives within § 930.66 (b) and (d).

§ 930.80 Effect of State agency concurrence.

(a) If a State agency issues a concurrence or is conclusively presumed to concur with the person's consistency certification, the person will not be required to submit additional consistency certifications for State agency review at the time Federal applications are actually filed for the Federal licenses and permits to which such concurrence applies.

§ 930.81 Federal permitting agency responsibility.

Following receipt of a State agency objection to a consistency certification related to Federal license or permit activties described in detail in an OCS plan, the Federal agency shall not issue any of such licenses or permits except as provided in Subpart H.

§ 930.82 Multiple permit review.

(a) A person submitting a consistency certification for Federal license or permit activities described in detail in an OCS plan is strongly encouraged to work with other Federal agencies in an effort to include, for consolidated State agency review, consistency certifications and supporting data and information applicable to OCS-related Federal license and permit activities affecting the coastal zone which are subject to State agency consistency review (e.g., Corps of Engineer permits for the placement of structures on the OCS and for dredging and the transportation of dredged material, Environmental Protection Agency air and water quality permits for offshore operations and onshore support and processing facilities, etc.). In the event the person does not consolidate such OCS-related activities with the State agency's review of the OCS plan, such activities will be subject to individual State agency review under the requirements of Subpart D.

(*Comment:* Persons are encouraged to consolidate permits for State agency review as this process can (1) minimize the delay in the review and approval of both OCS plan and OCS-related Federal licenses and permits, (ii) provide the State agency with comprehensive information on all aspects of OCS operations, thereby assisting the State in planning for and managing these activities, and (iii) provide the person with added certainty regarding the manner in which all OCS operations may proceed consistent with the management program.)

(b) A State agency objection to one or more of the OCS-related Federal license or permit activities submitted for consolidated review shall not prevent the person from receiving Federal agency approval (i) for those OCS-related license or permit activities found by the State agency to be consistent with the management program, and (ii) for the license and permit activities described in detail in the OCS plan provided the State agency concurs with the consistency certification for such plan. Similarly, a State agency objection to the consistency certification for an OCS plan shall not prevent the person from receiving Federal agency approval for those OCS-related license or permit activities determined by the State agency to be consistent with the management program.

§ 930.83 Amended or new OCS plans.

If the State agency objects to the person's OCS plan consistency certification, and if, pursuant to Subpart H, the Secretary does not determine that each of the objected to Federal license or permit activities described in detail in such plan is consistent with the objectives or purposes of the Act, or is necessary in the interest of national security, the person shall submit an amended or new plan to the Secretary of the Interior and to the State agency along with a consistency certification and data and information necessary to support the new consistency determination. The data and information shall specifically describe modifications made to the original OCS plan, and the manner in which such modifications will ensure that all of the proposed Federal license or permit activities described in detail in the amended or new plan will be conducted in a manner consistent with the State's management program.

§ 930.84 Review of amended or new OCS plans; public notice.

(a) After receipt of a copy of the amended or new OCS plan, consistency certification, and accompanying data and information, State agency review shall begin.

(b) Following receipt of the material described in subsection (a), the State agency shall ensure timely public notice of the proposed activities in accordance with the directives within §§ 930.63–930.64.

(c) The State agency shall concur with or object to the person's consistency certification in accordance with the directives within § 930.79, except that the applicable time period for purposes of concurrence by conclusive presumption shall be three months instead of six months.

(d) If the State agency issues a concurrence or is conclusively presumed to concur with the person's new consistency certification, the person will not be required to submit additional consistency certifications for State agency review at the time Federal applications are actually filed for the Federal licenses and permits to which such concurrence applies.

§ 930.85 Continuing State agency objections.

If the State agency objects to the consistency certification for an amended or new OCS plan, the prohibition in § 930.81 against Federal agency approval of licenses or permits for activities described in detail in such a plan applies, further Secretarial review pursuant to Subpart H may take place, and the development of an additional amended or new OCS plan and consistency certification may be required pursuant to §§ 930.83–930.84.

§ 930.86 Failure to comply substantially with an approved OCS plan.

(a) If a State agency claims that a person is failing substantially to comply with an approved OCS plan subject to the requirements of this Subpart, and such failure allegedly involves the conduct of activities affecting the coastal zone in a manner that is not consistent with the approved management program, the State agency shall transmit its claim to the U.S. Geological Survey supervisor for the area involved. Such claim should include (i) a description of the specific activity involved and the alleged lack of compliance with the OCS plan, and (ii) a request for appropriate remedial action. A copy of the claim shall be sent to the Associate Administrator.

(b) If, after a reasonable time following a request for remedial action, the State agency still maintains that the person is failing to comply substantially with the OCS plan, the Governor or Section 306(c)(5) State agency (see § 930.18) may file a written objection with the Secretary. If the Secretary finds that the person is failing to comply substantially with the OCS plan, the person shall submit an amended or new OCS plan along with a consistency certification and supporting information to the Secretary of the Interior and to the State agency. Following such a finding by the Secretary, the person shall comply with the originally approved OSC plan pending approval of the amended or new OCS plan. The directives within §§ 930.83–930.85 shall apply to further State agency review of the consistency certification for the amended or new plan.

(c) A person shall be found to have failed substantially to comply with an approved OCS plan if the State agency claims and the Secretary finds that one or more of the activities described in detail in the OCS plan which affects the coastal zone are being conducted or are having a coastal zone effect substantially different than originally described by the person in the plan or accompanying information and, as a result, the activities are no longer being conducted in a manner consistent with the State's management program. The Secretary may make a finding that a person has failed substantially to comply with an approved OCS plan only after providing a reasonable opportunity for the person and the Secretary of the Interior to review the State agency's objection and to submit comments for the Secretary's consideration.

Subpart F—Consistency for Federal Assistance to State and Local Governments

§ 930.90 Objectives.

The provisions of this Subpart are provided to assure that Federal assistance to State and local governments for projects affecting the coastal zone is granted only when such activities are consistent with approved coastal zone managements programs.

(*Comment:* Statutory citation: Section 307(d):

"State and local governments submitting applications for Federal assistance under

V 42 167 AUG 29 77 UMI

other Federal programs affecting the coastal zone shall indicate the views of the appropriate state or local agency as to the relationship of such activities to the approved management program for the coastal zone. Such applications shall be submitted and coordinated in accordance with the provisions of title IV of the Intergovernmental Cooperation Act of 1968 (82 Stat. 1098) [which provides authority for the Office of Management and Budget Circular A-95 (41 FR 2052 (1976))]. Federal agencies shall not approve proposed projects that are inconsistent with a coastal state's management program • • •."

Although the Coastal Energy Impact Program (CEIP) under Section 308 of the Act is not a form of Federal assistance under an "other Federal" program, it will be the policy of OCZM to subject the CEIP to the consistency requirements of this Subpart.)

§ 930.91 Federal assistance.

The term "Federal assistance" means assistance provided under a Federal program to an applicant agency through grant or contractual arrangements, loans, subsidies, guarantees, insurance, or other form of financial aid.

§ 930.92 Applicant agency.

The term "applicant agency" means any unit of State or local government, or any related public entity such as a special purpose district, which intends to apply for, or which has applied for but has not yet received, Federal assistance.

§ 930.93 Affecting the coastal zone.

The term "affecting the coastal zone" describes the effect caused by a Federal assistance project which will trigger the applicant agency's responsibility for complying with the Federal consistency procedures of this Subpart. The criteria referenced and described in § 930.53 apply to this determination.

§ 930.94 OMB A-95 process.

The term "OMB A-95 process" describes the project notification and review procedures set forth in the Office of Management and Budget Circular A-95 for the evaluation, review and coordination of Federally assisted programs (41 FR 2052 (1976)).

§ 930.95 Federal assistance geographic provision in the management program.

(a) The State agency shall develop a Federal assistance provision within the management program generally describing the geographic area (e.g., within the coastal zone, within coastal counties, etc.) where Federal assistance projects will be deemed to affect the coastal zone. The provision may be refined by the Section 306(c)(5) State agency (see § 930.18) following approval by the Associate Administrator.

(*Comment:* State agencies are encouraged to include within the management program a listing of specific types of Federal assistance programs subject to consistency review. Such a listing, and any refinements, will require prior 306(c)(5) State agency consultation with affected Federal agencies and approval by the Associate Administrator.)

(b) The State agency shall provide copies of the Federal assistance provision, and any refinements, to Federal agencies, units of State or local government empowered to undertake Federally assisted projects within the described geographic area, and to the A-95 State and areawide clearinghouses.

§ 930.96 OMB A-95 project notification and review.

(a) Pursuant to the OMB A-95 process, an applicant agency shall notify the appropriate State and areawide clearinghouses of its intent to apply for Federal assistance for a project located in the described geographic area.

(b) The applicant agency shall utilize the OMB A-95 process for every major funding phase of the Federal assistance project entailing substantial modifications to previously reviewed phases (e.g., planning and design).

(c) The clearinghouses shall ensure that the State agency is afforded an opportunity to review a notification for a project located in the described geographic area to determine whether the project is consistent with the management program.

§ 930.97 Consistency review.

(a) If pursuant to the OMB A-95 process the State agency does not object to the proposed project, the Federal agency may grant the Federal assistance to the applicant agency. Notwithstanding State agency consistency approval for the proposed project, the Federal agency may deny assistance to the applicant agency.

(b) If pursuant to the OMB A-95 process, the State agency objects to the proposed project, the clearinghouse shall notify the applicant agency and the Federal agency of the objection.

(c) State agency objections must describe (i) how the proposed project is inconsistent with specific elements of the management program, and (ii) alternative measures (if they exist) which, if adopted by the applicant agency, would permit the proposed project to be conducted in a manner consistent with the management program.

(d) State agency objections shall include a statement informing the applicant agency of a right of appeal to the Secretary on the grounds described in Subpart H, and a copy of the objection shall be sent to the Associate Administrator.

§ 930.98 Federal assisting agency responsibility.

Following receipt of a State agency objection, the Federal agency shall not approve assistance for the project except as provided in Subpart H.

§ 930.99 Federally assisted projects outside of the described geographic area.

(a) State agencies should monitor proposed Federal assistance projects outside of the described geographic area (e.g., by use of the OMB A-95 process, review of NEPA environmental impact statements, etc.) and shall immediately notify applicant agencies, Federal agencies, and the appropriate clearinghouse of proposed projects significantly affecting the coastal zone which the State agency is reviewing for consistency with the management program. Notification shall also be sent by the State agency to the Associate Administrator. State agencies must inform the clearinghouse and other parties of objections within the time period permitted under the OMB A-95 process, otherwise the State agency waives its right to object to the proposed project.

(b) If within the permitted time period the State agency notifies the Federal agency of its objection to a proposed Federally assisted project, the Federal agency shall not provide assistance to the applicant agency except as provided in Subpart H, unless the Associate Administrator disapproves the State agency's decision to review the project. The Associate Adminstrator's approval shall be presumed if no objection is issued to the State agency by the Associate Administrator within 15 days from receipt of notice. In the event of an objection, the Associated Administrator shall send copies to the applicant agency and Federal agency.

§ 930.100 Pending applications.

(a) State agencies must notify Federal agencies, applicant agencies, State and areawide clearinghouses and the Associate Administrator within 45 days of management program approval of objections to pending applications for proposed Federal assistance projects affecting the coastal zone, otherwise the State agency waives its right to object to such projects.

(b) If within the permitted time period the State agency notifies a Federal agency of its objection to a proposed Federally assisted project, the Federal agency shall not provide assistance to the applicant agency except as provided in Subpart H, unless the Associate Administrator disapproves the State agency's decision to review the project. The Associate Administrator's approval or objection shall be indicated in accordance with the procedures described in § 930.99 (b).

(c) In instances where State agencies choose to review pending applications, they shall consider carefully the time and resources invested by the applicant agency prior to management program approval.

§ 930.101 Availability of mediation for Federal assistance disputes.

In the event of a serious disagreement between a Federal and State agency regarding whether a Federal assistance project is subject to consistency review, either party may request the voluntary Secretarial mediation services provided for in Subpart G. The existence of a serious disagreement will not relieve the Federal agency from the responsibility for withholding Federal assistance for the project pending satisfaction of the requirements of this Subpart.

§ 930.102 Availability of mediation for previously reviewed projects.

(a) The State agency shall request that the Federal agency take appropriate remedial action following a serious disagreement resulting from a State agency objection to a Federally assisted project which was: (i) Previously determined to be consistent with the State's management program, but which the State agency later maintains is being conducted or is having a coastal zone effect substantially different than originally proposed and, as a result, is no longer consistent with the State management program, or (ii) previously determined not to be a project affecting the coastal zone, but which the State agency later maintains is being conducted or is having a coastal zone effect substantially different that originally proposed and, as a result the project affects the coastal zone in a manner inconsisten with the State's management program.

(b) If, after a reasonable time following a request for remedial action, the State agency still maintains that a serious disagreement exists with the Federal agency, either party may seek the voluntary Secretarial mediation services provided for in Subpart G.

Subpart G—Secretarial Mediation

§ 930.110 Objectives.

The purpose of this Subpart is to describe mediation procedures which Federal and State agencies may use to attempt to resolve serious disagreements which arise during the administration of approved management programs.

(*Comment:* Statutory citation: Section 307(h):

"In case of serious disagreement between any Federal agency and coastal state • • •

(2) in the administration of management program approved under Section 306; the Secretary, with the cooperation of the Executive Office of the President, shall seek to mediate the differences involved in such disagreement. The process of such mediation shall, with respect to any disagreement described in paragraph (2), include public hearings which shall be conducted in the local area concerned.")

§ 930.111 Informal negotiations.

The availability of mediation does not preclude use by the parties of alternative means for resolving their disagreement. In the event a serious disagreement arises, the parties are strongly encouraged to make every effort to resolve the disagreement informally. OCZM shall be available to assist the parties in these efforts.

§ 930.112 Request for mediation.

(a) The Secretary or other head of a Federal agency, or the Governor or the Section 306(c)(5) State agency (see § 930.18), may notify the Secretary in writing of the existence of a serious disagreement, and may request that the Secretary seek to mediate the serious disagreement. A copy of the written request must be sent to the agency with which the requesting agency disagrees, and to the Associate Administrator.

(b) Within 15 days following receipt of a request for mediation the disagreeing agency shall transmit a written response to the Secretary, and to the agency requesting mediation, indicating whether it wishes to participate in the mediation process. The Secretary will not provide mediation assistance unless all parties to the serious disagreement agree to participate.

§ 930.113 Public hearings.

(a) If the parties agree to the mediation process, the Secretary shall appoint a hearing officer who shall schedule a hearing in the local area concerned. The hearing officer shall give the parties at least 30 days notice of the time and place set for the hearing and shall provide timely public notice of the hearing.

(b) At the time public notice is provided, the Federal and State agencies shall provide the public with convenient access to public data and information related to the serious disagreement.

(c) Hearings shall be informal and shall be conducted by the hearing officer with the objective of securing in a timely fashion information related to the disagreement. The Federal and State agencies, as well as other interested parties, may offer information at the hearing subject to the hearing officer's supervision as to the extent and manner of presentation. Unduly repetitious or irrelevant information may be excluded at the discretion of the hearing officer. Hearings will be recorded and the hearing officer shall provide transcripts to the Federal and State agency parties. The public may inspect and copy the transcripts provided to these agencies.

§ 930.114 Secretarial mediation efforts.

(a) Following the close of the hearing, the hearing officer shall transmit the hearing record to the Secretary. Upon receipt of the hearing record, the Secretary shall schedule a mediation conference to be attended by representatives from the Office of the Secretary, and the disagreeing Federal and State agencies. The Secretary shall provide the parties at least 10 days notice of the time and place set for the mediation conference.

(b) Secretarial mediation efforts shall last only so long as the parties agree to participate. The Secretary shall confer with the Executive Office of the President, as necessary, during the mediation process.

§ 930.115 Termination of mediation.

Mediation shall terminate (i) at any time the parties agree to a resolution of the serious disagreement, (ii) if one of the parties withdraws from mediation, (iii) in the event the parties fail to reach a resolution of the serious disagreement within 15 days following Secretarial conference efforts, and the parties do not agree to extend mediation beyond that period, or (vi) for other good cause.

§ 930.116 Judicial review.

The availability of the voluntary mediation services provided in this Subpart is not intended expressly or implicitly to limit the parties' use of alternate forums to resolve disputes. Specifically, judicial review where otherwise available by law may be sought by any party to a serious disagreement without first having exhausted the mediation process provided for in this Subpart.

Subpart H—Secretarial Review Related to the Objectives or Purposes of the Act and National Security Interests

§ 930.120 Objectives.

The provisions of this Subpart provide procedures by which the Secretary may find that a Federal license or permit activity, or a Federal assistance project, which is inconsistent with a management program, may be Federally approved because the activity is consistent with the objectives or purposes of the Act, or is necessary in the interest of national security.

(*Comment:* Statutory citations: Subsection 307(c)(3)(A):

"No license or permit shall be granted by the Federal agency until the state or its designated agency has concurred with the applicant's certification or until, by the state's failure to act, the concurrence is conclusively presumed, unless the Secretary, on his own initiative or upon appeal by the applicant, finds, after providing a reasonable opportunity for detailed comments from the Federal agency involved and from the state, that the activity is consistent with objectives of this title or is otherwise necessary in the interest of national security."

Subsection 307(c)(3)(B):

"No Federal official or agency shall grant such person any license or permit for any activity described in detail in such [OCS] plan until such state or its designated agency receives a copy of such certification and plan, together with any other necessary data and information, and until—

(i) the State agency concurs;

(ii) the State agency is conclusively presumed to concur; or

(iii) the Secretary finds, pursuant to subparagraph (A), that each activity which is described in detail in such plan is consistent with the objectives of this title or is otherwise necessary in the interest of national security."

Section 307(d):

"Federal agencies shall not approve proposed projects that are inconsistent with a coastal state's management program, except upon a finding by the Secretary that such project is consistent with the purposes of this title or necessary in the interest of national security."

§ 930.121 Consistent with the objectives or purposes of the Act.

The term "consistent with the objectives or purposes of the Act" describes a Federal license or permit activity, or a Federal assistance project which, although inconsistent with a State's management program, is found by the Secretary to be permissible because:

(a) The activity furthers one or more of the competing national objectives or purposes contained in Sections 302 or 303 of the Act,

(b) When performed separately or when its cumulative effect is considered, it will not cause an adverse impact on the coastal zone substantial enough to outweight its contribution to the national interest,

(c) The activity will not violate any requirements of the Clean Air Act or the Federal Water Pollution Control Act, and

V 42 167 AUG 29 77 UMI

(d) There is no reasonable alternative available which would permit the activity to be conducted in a manner consistent with the management program.

§ 930.122 Necessary in the interest of national security.

The term "necessary in the interest of national security" describes a Federal license or permit activity, or a Federal assistance project which, although inconsistent with a State's management program, is found by the Secretary to be permissible because a national defense or other national security interest would be seriously threatened if the activity were not permitted to go forward as proposed. Secretarial review of national security issues shall be aided by information submitted by the Department of Defense or other interested Federal agencies. The views of such agencies, while not binding, shall be given considerable weight by the Secretary. The Secretary will seek information to determine whether the objected to activity directly supports national defense or other essential national security objectives.

§ 930.123 Appellant.

The term "appellant" refers to an applicant, person or applicant agency submitting an appeal to the Secretary pursuant to the provisions of this Subpart.

§ 930.124 Informal discussions.

In the event the State agency informs the applicant, person or applicant agency that it intends to object to the proposed activity, the parties should consult informally to determine whether the proposed activity should nevertheless be approved by the State agency because it is consistent with the objectives or purposes of the Act, or is necessary in the interest of national security. The parties are encouraged to attempt to resolve the matter in a manner which avoids the necessity of appealing the issue to the Secretary. OCZM shall be available to assist the parties in these discussions.

§ 930.125 Appeals to the Secretary.

(a) An appellant may file a notice of appeal with the Secretary within 30 days of the appellant's receipt of a State agency objection. The notice of appeal shall be accompanied by a statement in support of the appellant's position, along with supporting data and information. The appeallant shall send a copy of the notice of appeal and accompanying documents to the Federal and State agencies involved.

(b) No extension of time will be permitted for the filing of a notice of appeal.

(c) The Secretary may approve a reasonable request for an extension of time to submit supporting information so long as the request is filed with the Secretary within the 30-day period. Normally, the Secretary shall limit an extension period to 15 days.

§ 930.126 Federal and State agency responses to appeals.

(a) Upon receipt of the notice of appeal and supporting information, the Federal and State agencies shall have 30 days to submit detailed comments to the Secretary. Copies of such comments shall be sent to the appellant and other agency within the same time period.

(b) Requests for extensions may be made pursuant to § 930.125(c).

§ 930.127 Public notice; receipt of comments.

(a) Upon receipt of the notice of appeal, the Secretary shall provide timely public notice of the appeal. At a minimum, public notice shall be provided in the immediate area of the coastal zone which is likely to be significantly affected by the proposed activity. At the time public notice is provided, the Federal and State agencies shall provide the public with convenient access to copies of the appellant's notice of appeal and accompanying public information, and to the public information in the agencies' detailed comments.

(b) Interested persons may submit comments to the Secretary within 30 days from the date of public notice, with copies provided to the appellant and to the Federal and State agencies within the same time period.

(c) Requests for extensions may be made pursuant to § 930.125(c).

§ 930.128 Dismissal of appeals.

The Secretary may dismiss an appeal for good cause. Good cause shall include, but is not limited to:

(a) Failure of the appellant to submit a notice of appeal within the required 30-day period;

(b) Failure of the appellant to submit the supporting information within the required period or approved extension period;

(c) Secretarial receipt of a detailed comment from the Federal agency stating that the agency will not approve the Federal license, permit or assistance even if the Secretary determines that the activity is permissible; and

(d) Failure of the appellant to base the appeal on grounds that the proposed activity either (i) is consistent with the objectives or purposes of the Act or (ii) is necessary in the interest of national security.

§ 930.129 Public hearings.

The Secretary may order a hearing independently or in response to a request. If a hearing is ordered by the Secretary it shall be guided by the procedures described within § 930.113.

§ 930.130 Secretarial review.

(a) In reviewing an appeal, the Secretary shall find that a proposed Federal license or permit activity, or a Federal assistance project, is consistent with the objectives or purposes of the Act, or is necessary in the interest of national security, when a preponderance of the information submitted supports this conclusion.

(b) The Secretary shall make all reasonable efforts to complete consideration of an appeal within 90 days from the date of public notice.

(c) Following consideration of the appeal, the Secretary shall issue a decision in writing to the appellant and to the Federal and State agencies indicating whether the proposed activity is consistent with the objectives or purposes of the Act, or is necessary in the interest of national security; the decision shall include the basis for such finding. The Secretary shall provide public notice of the decision.

(d) The decision of the Secretary shall constitute final agency action for the purposes of the Administrative Procedure Act.

§ 930.131 Federal agency responsibility.

(a) If the Secretary finds that the proposed activity is consistent with the objectives or purposes of the Act, or is necessary in the interest of national security, the Federal agency may approve the activity.

(b) If the Secretary does not make either of these findings, the Federal agency shall not approve the activity.

§ 930.132 Secretarial review in the absence of an appeal.

(a) In the absence of an appeal the Secretary may choose to consider whether a Federal license or permit activity, or a Federal assistance project, is consistent with the objectives or purposes of the Act, or is necessary in the interest of national security. If the Secretary decides to initiate independent review, notification shall be sent to the applicant, person or applicant agency, and to the Federal and State agencies, with a request for submission of detailed comments within 30 days from receipt of the notification. Copies of comments shall be exchanged among the parties.

(b) Requests for extensions may be made pursuant to § 930.125(c).

§ 930.133 Public notice; receipt of comments; public hearings.

(a) Upon receipt of detailed comments from the parties, the Secretary shall provide public notice and request comments in accordance with the provisions in § 930.127.

(b) The Secretary may order a hearing in accordance with the provisions in § 930.129.

§ 930.134 Secretarial review; Federal agency responsibility.

(a) Secretarial review shall be undertaken in accordance with the provisions in § 930.130.

(b) Federal agencies are responsible for adhering to the provisions in § 930.131 when deciding to approve or deny an application for an activity objected to by a State agency and independently reviewed by the Secretary.

Subpart I—Associate Administrator Reporting of Federal Actions Which Are Not Consistent With Approved Management Programs

§ 930.140 Objectives.

The provisions of this Subpart provide procedures (i) to permit interested parties to notify the Associate Administrator of any Federal activities including

development projects, Federal license or permit activities, or Federal assistance projects which are believed to be inconsistent with an approved management program, and (ii) for the reporting of any such actions found by the Associate Administrator to be inconsistent with such programs.

(*Comment:* Statutory citation: Subsection 316(a)(5):

"The Secretary shall prepare and submit to the President for transmittal to the Congress * * * a listing of all activities and projects which, pursuant to the provisions of subsection (c) or subsection (d) of section 307, are not consistent with an applicable approved state management program * * *." The reporting responsibility under Section 316 of the Act has been delegated by the Secretary to the Associate Administrator for Coastal Zone Management.)

§ 930.141 Notification to the Associate Administrator.

(a) Interested parties are invited to submit to the Associate Administrator detailed comments related to the alleged inconsistency of Federal activities including development projects, Federal license or permit activities, and Federal assistance projects which are subject to the requirements of this Part. Copies of such comments should be sent to relevant Federal and State agencies, and to the applicant, person or applicant agency as appropriate.

(b) Comments need not conform to any particular form, but should be specific, substantive and factual, and should describe how the Federal action is or would be inconsistent with an approved management program.

(c) Commentators are encouraged to recommend modifications or alternatives to the existing or proposed action which would enable it to be consistent with the management program.

(d) The Associate Administrator shall assure that public information within such comments is made available for public inspection.

§ 930.142 Associate Administrator reporting.

After considering the views of interested parties, the relevant Federal agency, State agency, and the applicant, person or applicant agency, as appropriate, the Associate Administrator shall determine whether the Federal action will be included in the annual report listing of inconsistent Federal actions.

§ 930.143 Associate Administrator advisory statements.

Upon request, the Associate Administrator may issue an advisory statement prior to the issuance of the annual report indicating whether a Federal action will be listed within the annual report as being inconsistent with an approved management program.

APPENDIX A—INFORMATION TO BE SUBMITTED WITH AN OCS EXPLORATION PLAN

At the time of submission to the Secretary of the Interior of an OCS exploration plan which describes in detail Federal license or permit activities affecting the coastal zone of a State with an approved management program, the person must submit to the State agency a consistency certification accompanied by the nonproprietary information set forth below. This information, as well as the information described in Appendix B, is required in order to permit the State agency to (i) assess the consistency of the proposed activities and (ii) plan for and manage coastal zone effects caused by OCS activities.

It is recognized that the person may not be in possession of a significant amount of information relative to the proposed activities at the pre-exploration stage. Subject to this limitation, the person shall submit to the State agency all current and available information respecting the items decribed below unless the State agency informs the person that any part or all of such information will not be required. In addition, the person shall provide the State agency with updated nonproprietary information whenever in the course of exploration operations on the OCS leased area, or in conducting supporting operations nearshore or onshore, the person discovers new information or proposes major modifications significantly different than described in information earlier submitted to the State agency. At a minimum, the person shall consult with the State agency on a semiannual basis to inform the State agency of issued OCS Federal permits and licenses and to discuss new information and modifications to determine their significance in terms of likely effects upon coastal zone resources.

When satisfied that adequate protection against public disclosure exists, the person is encouraged, but not required, to provide the State agency with information which, pursuant to regulations promulgated by the Secretary of the Interior, is considered to be confidential or privileged. State agency requests for such information should be related to the necessity of having such information to assess adequately the coastal zone effects of the proposed activities. In making such requests, the State agency should consult with the appropriate field office of the U.S. Geological Survey.

The person shall provide the State agency with the following information to the extent that it was not previously supplied to the State agency:

(1) A description of the affected ocean area, including a general description of water depth, currents, water quality, submarine geology, weather patterns, and ambient air quality;

(2) With the greatest possible accuracy, the approximate number and locations of wells to be drilled;

(3) The estimated start-up date for the first well and the approximate completion date for the last well;

(4) A description of exploratory rigs, structures and associated equipment used offshore, describing their location and major features including those features pertaining to safety and to pollution prevention and control;

(5) A description of drilling procedures including the anticipated mud programs, blowout prevention and related well control equipment, and types of drilling fluids;

(6) A description of environmentally sensitive or hazardous areas discovered and a description of the alternatives considered and the actions to be taken to preserve or assure safety for such areas. Areas shall include, but are not limited to, those of cultural, biological (e.g., fisheries), archeological, or geological (e.g., seismic) significance;

(7) A description of procedures, personnel, and equipment for preventing, reporting, and cleaning up spills of oil or waste materials, including information on response time, capacity and location for equipment;

(8) A description of the affected onshore area including a description of the location, size and number of onshore support and storage facilities and their land requirements, including related rights-of-way and easements; a timetable describing when land areas are to be acquired and when facilities are to be acquired, constructed or expanded;

(9) The number of persons expected to be employed in support of offshore, onshore and transportation activities, the approximate number of local personnel who will be employed in such capacity indicating the major skills, services and crafts required, and the approximate number of new employees likely to move into the affected coastal area indicating an estimate of the resulting demand for housing, public services and public facilities; this information shall be broken down on a year-by-year basis and shall be described with regard to likely geographic impact;

(10) A description of the most likely travel routes for boat and aircraft traffic between offshore and onshore facilities, the frequency such routes will be traversed, on a monthly basis, and the probable onshore location of terminals;

(11) A description of the quantity and composition of air, liquid and solid waste pollutants likely to be generated by offshore, onshore and transport operations, and a description of treatment and disposal alternatives considered and actions to be taken to limit pollution effects;

(12) An estimate of any significant demand for major supplies, equipment, goods, services, water, aggregate, energy or other resources within coastal areas of the State, and a description of the types of major suppliers and contractors required to satisfy this demand; and

(13) The name, address and telephone number of an individual employee of the person to whom inquiries by the State agency may be made.

APPENDIX B—INFORMATION TO BE SUBMITTED WITH AN OCS DEVELOPMENT PLAN

At the time of submission to the Secretary of the Interior of an OCS development plan which describes in detail Federal license or permit activities affecting the coastal zone of a State with an approved management program, the person must submit to the State agency a consistency certification accompanied by the nonproprietary information and data set forth below unless the State agency informs the person that any part or all of such information will not be required. Submission of updated nonproprietary information and State agency consultation are required in accordance with the directives in Appendix A. In addition, the person is encouraged, but not required, to submit to the State agency the confidential and privileged information referenced in Appendix A.

The person shall provide the State agency with the following information to the extent that it was not previously supplied to the State agency:

(1) All nonproprietary information required by sections 1, 2, 3, 5, 6, 7, 10, 11, 12 and 13 in Appendix A as it relates to development/production operations, refined in more detail by new information developed during the exploration/discovery phase and by up-dated information developed during the development/production phase;

(2) A description of offshore development/production platforms, structures and associated equipment to be placed, constructed, expanded or more fully utilized, describing their location and major features including those features pertaining to safety and to pollution prevention and control; a descrip-

V 42 167 AUG 29 77 UMI

tion of offshore operations including any measures for offshore storage of oil and gas resources;

(3) The estimated timing and sequence of development/production operations, including: (i) the projected type and quantity of anticipated production, (ii) the anticipated timing and sequence for offshore and onshore development with an estimate of changing rates in production levels, and (iii) the likely timing for completion of production and abandonment activities;

(4) The alternatives considered and the means chosen to transport oil and gas to shore, the reasons for choosing the transport method, the routes such transportation will follow, and the estimated quantity of oil and gas moving along such routes; if pipeline transport is to be used, a description of pipeline protection and safety features, and mitigation measures designed to reduce interference with competing offshore and nearshore operations;

(5) A description of the location, design, number and size of onshore facilities to be placed, constructed, expanded or more fully utilized as a result of development, production, processing and disposition operations, including a description of staging areas, crew and supply bases, assembly plants, initial oil and gas processing facilities, storage depots, tank farms, refinery complexes, pipelines, and tanker facilities; the description shall include an estimate of the land required within coastal areas for such facilities, including acreage requirements for rights-of-way and easements; and

(6) The labor requirements for the support of offshore, onshore and transportation activities which shall include an estimate of (i) the approximate number of persons who will be employed in support of such activities, (ii) the approximate number of local personnel who will be directly or indirectly employed in support of such activities, disaggregated with an estimate of direct and indirect employment, with an indication of major skills, services, and crafts required, (iii) the approximate number of new employees who are likely to move to the affected coastal area, and an estimate of resulting demand for housing, public services and public facilities. This information shall be broken down on a year-by-year basis and shall be described with regard to likely geographic impact.

TARIFF OF TOLLS

Public Hearing on Proposed Revision

V42167A AUG 29 77 UMI

DEPARTMENT OF TRANSPORTATION

Saint Lawrence Seaway Development Corp.

TARIFF OF TOLLS

Public Hearing on Proposed Revision

The Saint Lawrence Seaway Development Corporation, after discussions with representatives of the Government of Canada, proposes to revise the tariff of tolls which the Corporation establishes and administers jointly with the St Lawrence Seaway Authority of Canada for the use of the St. Lawrence Seaway. The proposed action would expand the number of categories into which all cargo is classified and upon which tolls are assessed from two to six; reestablish commodity tolls on the all-Canadian Welland Canal section of the St. Lawrence Seaway and eliminate the present lockage [illegible]

COMMENTS INVITED

Persons or organizations who do not desire to be heard or will be unable to be heard or wish to supplement statements made at the hearings may present views or data on the subject matter of the hearings by filing written comments (in two legible copies) with the Corporation on or before October 31, 1977. If the hearings are continued to a date later than October 19, 1977, the date by which written comments may be filed will be extended to 10 days after the close of hearings.

The Corporation particularly urges the submission of comments relative to any negative affects the proposed action may have on the movement of waterborne commerce via the Seaway.

It is requested that data provided include total transportation costs for movements of cargo via the St. Lawrence Seaway and should result [illegible]

the 1970 navigation season; and that all vessels would have the option to calculate gross registered tons according to either Canadian or United States rules of measurement.

THE PROPOSAL

The subject matter of the presently scheduled hearings will be the rates of charges for transit of the Seaway under the Schedule to the St. Lawrence Seaway Tariff of Tolls. The Corporation and the Authority have agreed, for the purpose of the hearing, to propose a revision of the charges in the Tolls Schedule which will be subject thereafter to joint review to determine the extent to which the proposal will form the basis of recommendations to the Governments of the United States and Canada. To the extent that such recommendations are adopted by the Governments, they will become effective at the [illegible] of the

V 4216

tion of offshore operations including any measures for offshore storage of oil and gas resources;

(3) The estimated timing and sequence of development production operations, including: (i) the projected type and quantity of anticipated production, (ii) the anticipated timing and sequence for offshore and onshore development with an estimate of changing rates in production levels, and (iii) the likely timing for completion of production and abandonment activities;

(4) The alternatives considered and the means chosen to transport oil and gas to shore, the reasons for choosing the transport method, the routes such transportation will follow, and the estimated quantity of oil and gas moving along such routes; if pipeline transport is to be used, a description of pipeline protection and safety features, and mitigation measures designed to reduce interference with competing offshore and nearshore operations;

(5) A description of the location, design, number and size of onshore facilities to be placed, constructed, expanded or more fully utilized as a result of development, production, processing and disposition operations, including a description of staging areas, crew and supply bases, assembly plants, initial oil and gas processing facilities, storage depots, tank farms, refinery complexes, pipelines, and tanker facilities; the description shall include an estimate of the land required within coastal areas for such facilities, including acreage requirements for rights-of-way and easements; and

(6) The labor requirements for the support of offshore, onshore and transportation activities which shall include an estimate of (i) the approximate number of persons who will be employed in support of such activities, (ii) the approximate number of local personnel who will be directly or indirectly employed in support of such activities, disaggregated with an estimate of direct and indirect employment, with an indication of major skills, services, and crafts required, (iii) the approximate number of new employees who are likely to move to the affected coastal area, and an estimate of resulting demand for housing, public services and public facilities. This information shall be broken down on a year-by-year basis and shall be described with regard to likely geographic impact.

PART VI

DEPARTMENT OF TRANSPORTATION

St. Lawrence Seaway Development Corporation

■

TARIFF OF TOLLS

Public Hearing on Proposed Revision

V42167A AUG 29 77 UMI

DEPARTMENT OF TRANSPORTATION

Saint Lawrence Seaway Development Corp.

TARIFF OF TOLLS

Public Hearing on Proposed Revision

The Saint Lawrence Seaway Development Corporation, after discussions with representatives of the Government of Canada, proposes to revise the tariff of tolls which the Corporation establishes and administers jointly with the St. Lawrence Seaway Authority of Canada for the use of the St. Lawrence Seaway. The proposed action would expand the number of categories into which all cargo is classified and upon which tolls are assessed from two to six; reestablish commodity tolls on the all-Canadian Welland Canal section of the St. Lawrence Seaway and eliminate the present lockage charges on that section; provide for the assessment of tolls on the basis of metric tons (1000 kilograms, 2204.62 pounds) rather than short tons (2000 pounds); and increase the level of tolls.

Toll increases are necessary to meet increased costs in both countries. As a result of inflation since 1959, operating expenses have increased to the point where revenues are no longer adequate to meet the costs of the Seaway entities.

The U.S. Seaway Corporation expects to recover about $11 million per year as its new 29-percent share of revenues on the Montreal-Lake Ontario section. This recovery is expected to permit the Corporation to continue to meet its operations, maintenance and most of the other current expenses which are required by statute to be paid from charges on vessels and cargoes moving through the Corporation's facilities.

The Corporation will hold public hearings on the rates of tolls in Room 301, 800 Independence Avenue, S.W., Washington, D.C. on October 13, 1977, and in the Auditorium, 31st Floor, Federal Building, 1240 East 9th Street, Cleveland, Ohio on October 19, 1977. Both hearings will begin at 10:00 a.m. EDT and run until concluded, subject to adjournment from day to day or otherwise at the discretion of the Administrator. Oral presentations at both hearings will be limited to 15 minutes. Persons or organizations desiring to present testimony at the hearing shall submit to the Corporation on or before October 6, 1977, a written notice of their intent to appear.

Notices of appearance, views, data and supplementary statements may be submitted to the Saint Lawrence Seaway Development Corporation, 800 Independence Avenue, S.W., Washington, D.C. 20591 (Attention: Director, Office of Systems and Economic Analysis).

COMMENTS INVITED

Persons or organizations who do not desire to be heard or will be unable to be heard or wish to supplement statements made at the hearings may present views or data on the subject matter of the hearings by filing written comments (in two legible copies) with the Corporation on or before October 31, 1977. If the hearings are continued to a date later than October 19, 1977, the date by which written comments may be filed will be extended to 10 days after the close of hearings.

The Corporation particularly urges the submission of comments relative to any negative affects the proposed action may have on the movement of waterborne commerce via the Seaway.

It is requested that data provided include total transportation costs for movements of cargo via the St. Lawrence Seaway and should detail individually all pertinent components thereof including all inland freight costs (rail, truck or water), terminal or elevator charges and handling costs, ocean freight costs, and other significant transportation costs. It would be helpful if each analysis also detailed similar transportation costs by alternative routes in order that the potential for diversion can be adequately evaluated.

BACKGROUND

Pursuant to the authority contained in Section 12(a) of Public Law 358, 83rd Congress, approved May 13, 1954 (33 USC 988), the Corporation and the St. Lawrence Seaway Authority of Canada, on January 29, 1959, promulgated an agreement to levy tolls on vessels and cargo for use of the St. Lawrence Seaway. That agreement stipulated that the Seaway entities would subsequently review the Tariff and report to their respective Governments on the sufficiency of the tolls to meet statutory requirements no later than July 1, 1964. After the joint review of the first five Seaway navigation seasons, the toll review period was extended for two years by further agreement. Following public hearings in both Canada and the United States in May and June 1966, respectively, the Seaway entities filed reports to their Governments and subsequently agreed that the existing tolls schedule for the Montreal-Lake Ontario section of the St. Lawrence Seaway be continued unchanged; that the division of tolls received from operation of the Montreal-Lake Ontario section would be 73 percent to the Authority and 27 percent to the Corporation; that a lockage fee of $100 per lock, phased in over five (5) years, be instituted on the Welland Canal; that the sufficiency and division of tolls would be reviewed at the end of the 1970 navigation season; and that all vessels would have the option to calculate gross registered tons according to either Canadian or United States rules of measurement.

THE PROPOSAL

The subject matter of the presently scheduled hearings will be the rates of charges for transit of the Seaway under the Schedule to the St. Lawrence Seaway Tariff of Tolls. The Corporation and the Authority have agreed, for the purpose of the hearing, to propose a revision of the charges in the Tolls Schedule, which will be subject thereafter to joint review to determine the extent to which the proposal will form the basis of recommendations to the Governments of the United States and Canada. To the extent that such recommendations are adopted by the Governments, they will become effective at the opening of the 1978 navigation season.

Under the proposed action the corresponding toll charges per short ton (2,000 pound) for full transit of both the Montreal-Lake Ontario and Welland Canal sections of the Seaway would be: Bulk Cargo, 90¢; General Cargo, $1.95; Grain (a new classification, formerly charged as bulk cargo), 65¢; Containers (a new classification, formerly charged as general cargo), 90¢; and Government aid cargoes (a new classification, including cargoes which were formerly charged at both rates), 65¢. The existing lockage charge of $100 per vessel per each of the eight locks on the Welland Canal would be eliminated. A charge totaling 7¢ per gross registered ton would be assessed on vessels transiting each section of the Seaway.

DRAFTING INFORMATION

The principal authors of this document are Robert J. Lewis, Director, Office of Systems and Economic Analysis, and Robert D. Kraft, Deputy General Counsel.

FURTHER INFORMATION

Detailed information regarding the proposed revision to the St. Lawrence Seaway Tariff of Tolls may be acquired from the Corporation by contacting Mr. Lewis, at 202/426-2884 or Mr. Kraft at 202/426-3574.

NOTE.—The Saint Lawrence Seaway Development Corporation has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A-107.

Issued in Washington, D.C. on August 24, 1977.

D. W. OBERLIN,
Administrator.

would you like to know

if any changes have been made in certain titles of the CODE OF FEDERAL REGULATIONS without reading the Federal Register every day? If so, you may wish to subscribe to the "Cumulative List of CFR Sections Affected," the "Federal Register Index," or both.

Cumulative List of CFR Sections Affected
$10.00
per year

The "Cumulative List of CFR Sections Affected" is designed to lead users of the Code of Federal Regulations to amendatory actions published in the Federal Register, and is issued monthly in cumulative form. Entries indicate the nature of the changes.

Federal Register Index **$8.00**
per year

Indexes covering the contents of the daily Federal Register are issued monthly, quarterly, and annually. Entries are carried primarily under the names of the issuing agencies. Significant subjects are carried as cross-references.

A finding aid is included in each publication which lists Federal Register page numbers with the date of publication in the Federal Register.

Note to FR Subscribers: FR Indexes and the "Cumulative List of CFR Sections Affected" will continue to be mailed free of charge to regular FR subscribers.

Mail order form to:
Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402

There is enclosed $ _____ for _____ subscription(s) to the publications checked below:

_____ CUMULATIVE LIST OF CFR SECTIONS AFFECTED ($10.00 a year domestic; $12.50 foreign)

_____ FEDERAL REGISTER INDEX ($8.00 a year domestic; $10.00 foreign)

AGENCY PUBLICATION ON ASSIGNED DAYS OF THE WEEK

The six-month trial period ended August 6. The program is being continued on a voluntary basis (see OFR notice, 41 FR 32914, August 6, 1976). The following agencies have agreed to remain in the program:

Monday	Tuesday	Wednesday	Thursday	Friday
NRC	USDA/ASCS		NRC	USDA/ASCS
DOT/COAST GUARD	USDA/APHIS		DOT/COAST GUARD	USDA/APHIS
DOT/NHTSA	USDA/FNS		DOT/NHTSA	USDA/FNS
DOT/FAA	USDA/REA		DOT/FAA	USDA/REA
DOT/OHMO	CSC		DOT/OHMO	CSC
DOT/OPSO	LABOR		DOT/OPSO	LABOR
	HEW/ADAMHA			HEW/ADAMHA
	HEW/CDC			HEW/CDC
	HEW/FDA			HEW/FDA
	HEW/HRA			HEW/HRA
	HEW/HSA			HEW/HSA
	HEW/NIH			HEW/NIH
	HEW/PHS			HEW/PHS

Documents normally scheduled on a day that will be a Federal holiday will be published the next work day following the holiday.

Comments on this program are still invited. Comments should be submitted to the Day-of-the-Week Program Coordinator, Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408.

ATTENTION: For questions, corrections, or requests for information please see the list of telephone numbers appearing on opposite page.

federal register

Area Code 202 Phone 523-5240

Published daily, Monday through Friday (no publication on Saturdays, Sundays, or on official Federal holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C., Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The FEDERAL REGISTER provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The FEDERAL REGISTER will be furnished by mail to subscribers, free of postage, for $5.00 per month or $50 per year, payable in advance. The charge for individual copies is 75 cents for each issue, or 75 cents for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the FEDERAL REGISTER.

Title 3—The President

PROCLAMATION 4515

Women's Equality Day, 1977

By the President of the United States of America

A Proclamation

August 26, 1977, is the 57th anniversary of the adoption of the 19th Amendment to the Constitution guaranteeing that the right of United States citizens to vote shall not be denied or abridged by the Federal Government or any state on account of sex.

This was the successful culmination of the struggle of the American Women's Suffrage movement. The right to vote, to participate in the process of framing the laws under which we all live, is fundamental. But it was only the first step in achieving full equality for women. The late Dr. Alice Paul realized this, drafted the Equal Rights Amendment in 1923 and had it introduced in Congress over a period of 49 years, until it passed on March 22, 1972.

Dr. Paul and other early leaders of the movement who did not live to see their work completed were reviled and imprisoned, endured hunger strikes and force-feeding in order to further their cause. Their commitment is an inspiration to women and men today who seek to finally make their dreams a reality. Equal rights for women are an inseparable part of human rights for all.

Strong action is needed to guarantee women total equality in the areas of politics and government, education, employment and related benefits, health care, housing and justice. The needs, hopes and problems of a complex society demand the talents, imagination and dedication of all its citizens without regard to sex. As women achieve equality, men, too, are liberated from ancient prejudices and relieved of arbitrary barriers to personal fulfillment.

This is a crucial point in the struggle to achieve full equality for women under the law. Ratification of the Equal Rights Amendment must be completed by the required number of states by March 1979. The successes of the past were dearly bought, and this final effort will not be easy. Achievement of this goal is essential in order to secure meaningful equality for all our citizens.

NOW, THEREFORE, I, JIMMY CARTER, President of the United States of America, do hereby proclaim August 26, 1977, as Women's Equality Day and do hereby call upon the people of the United States to observe this day with appropriate ceremonies and activity. I further urge all our people to dedicate themselves anew to the goal of achieving equal rights for women under the law.

IN WITNESS WHEREOF, I have hereunto set my hand this twenty-sixth day of August, in the year of our Lord nineteen hundred seventy-seven, and of the Independence of the United States of America the two hundred and second.

Jimmy Carter

rules and regulations

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

Title 5—Administrative Personnel

CHAPTER I—CIVIL SERVICE COMMISSION

PART 213—EXCEPTED SERVICE

Department of State

AGENCY: Civil Service Commission.

ACTION: Final rule.

SUMMARY: This amendment extends the period of employment for the IBC temporary and intermittent field personnel from 130 to 180 working days as it more realistically reflects the amount of time required to accomplish the tasks of the position.

EFFECTIVE DATE: August 30, 1977.

FOR FURTHER INFORMATION CONTACT:

William Bohling, 202–632–4533.

Accordingly, 5 CFR 213.3104(d)(1) is amended as set out below:

§ 213.3104 Department of State.

* * * * * *

(d) *International Boundary Commission, United States and Canada.*

(1) Temporary and intermittent field employees such as instrumentmen, foremen, recorders, packers, cooks, and axemen, for not to exceed 180 working days within any 1 calendar year.

(5 U.S.C. 3301, 3302; EO 10577, 3 CFR 1954–1958 Comp., p. 218)

UNITED STATES CIVIL SERVICE COMMISSION,
JAMES C. SPRY,
Executive Assistant to the Commissioners.

[FR Doc.77-25157 Filed 8-29-77;8:45 am]

Title 9—Animal and Animal Products

CHAPTER I—ANIMAL AND PLANT HEALTH INSPECTION SERVICE, DEPARTMENT OF AGRICULTURE

SUBCHAPTER E—VIRUSES, SERUMS, TOXINS, AND ANALOGOUS PRODUCTS; ORGANISMS AND VECTORS

PART 113—STANDARD REQUIREMENTS

CFR Correction

In Title 9 of the Code of Federal Regulations, revised as of January 1, 1977, on page 306 the following material was inadvertently omitted.

§ 113.163 Fowl Laryngotracheitis Vaccine.

(d) * * *

(2) * * *

(i) Twenty-five 3 to 4 week old laryngotracheitis susceptible chickens shall be injected intratracheally with 0.2 ml of vaccine rehydrated at the rate of 30 mls for 1,000 doses. Chickens shall be observed each day for 14 days. Deaths shall be counted as failures. Two-stage sequential testing may be conducted if the first test (which then becomes stage one) has five, six, or seven failures.

(ii) The results shall be evaluated according to the following table:

Cumulative totals

Stage	Number of chickens	Failures for satisfactory serials	Failures for unsatisfactory serials
1	25	4 or less	8 or more.
2	50	10 or less	11 or more.

(iii) If unfavorable reactions occur which are not attributable to the product, the test shall be declared inconclusive and repeated or in lieu thereof, the serial declared unsatisfactory.

PART 113—STANDARD REQUIREMENTS

Miscellaneous Amendments

AGENCY: Animal and Plant Health Inspection Service (APHIS).

ACTION: Final rule.

SUMMARY: Some extraneous pathogens can be detected in poultry vaccines by using a chicken embryo inoculation test, but success depends upon neutralizing the vaccine virus with a specific antiserum. The present regulations prescribe a repeat test if the first test is inconclusive although the fault may be due to the inability of the antiserum which is used to neutralize the vaccine virus. These amendments eliminate the necessity of repeating a useless and wasteful test.

EFFECTIVE DATE: This amendment becomes effective August 30, 1977.

FOR FURTHER INFORMATION CONTACT:

Dr. R. J. Price, 301–436–8245.

SUPPLEMENTARY INFORMATION: The present regulations in § 113.160(d)(1), § 113.162(d)(1), § 113.163(d)(1), and § 113.164(d)(1) include requirements that Avian Encephalomyelitis Vaccine, Bronchitis Vaccine, Fowl Laryngotracheitis Vaccine, and Newcastle Disease Vaccine be tested for pathogens by the chicken embryo inoculation test prescribed in § 113.37. If the test results are inconclusive because of a vaccine virus override, the chicken inoculation test in § 113.36 cannot be used as a substitute until the first test has been repeated and found inconclusive for the same reason.

A virus override occurs when the specific antiserum used in the test does not neutralize the vaccine virus. Since the success of this test depends upon the neutralizing ability of the antiserum, repeat testing using the same antiserum is useless and wasteful.

These amendments delete the necessity for a repeat chicken embryo inoculation test and permit the use of the chicken inoculation test as a substitute for the chicken embryo inoculation test when the results of the first test are inconclusive because of a vaccine virus override without repeating the inconclusive test.

Each word in the heading for § 113.160, § 113.162, § 113.163, and § 113.164 shall be capitalized.

Sections 113.160, § 113.162, § 113.163, and § 113.164 are amended as follows:

1. In § 113.160, paragraph (d)(1) is revised to read as follows:

§ 113.160 Avian Encephalomyelitis Vaccine.

* * * * * *

(d) * * *

(1) Final container samples from each serial shall be tested for pathogens by the chicken embryo inoculation test prescribed in § 113.37, except that, if the test is inconclusive because of a vaccine virus override, the chicken inoculation test prescribed in § 113.36 may be conducted and the vaccine judged accordingly.

* * * * * *

2. In § 113.162, paragraph (d)(1) is revised to read as follows:

§ 113.162 Bronchitis Vaccine.

* * * * * *

(d) * * *

(1) Final container samples from each serial shall be tested for pathogens by the chicken embryo inoculation test prescribed in § 113.37, except that, if the test is inconclusive because of a vaccine virus override, the chicken inoculation test prescribed in § 113.36 may be conducted and the vaccine judged accordingly.

* * * * * *

3. In § 113.163 paragraph (d)(1) is revised to read as follows:

§ 113.163 Fowl Laryngotracheitis Vaccine.

* * * * * *

(d) * * *

(1) Final container samples from each serial shall be tested for pathogens by the chicken embryo inoculation test prescribed in §113.37, except that, if the test is inconclusive because of a vaccine virus override, the chicken inoculation test prescribed in § 113.36 may be conducted and the vaccine judged accordingly.

* * * * * *

V 42168 AUG 30 77 UMI

4. In § 113.164 paragraph (d) (1) is revised to read as follows:

§ 113.164 Newcastle Disease Vaccine.

* * * * *

(d) * * *

(1) Final container samples from each serial shall be tested for pathogens by the chicken embryo inoculation test prescribed in § 113.37, except that, if the test is inconclusive because of a vaccine virus override, the chicken inoculation test prescribed in § 113.36 may be conducted and the vaccine judged accordingly.

* * * * *

(21 U.S.C. 151 and 154; 37 FR 28477, 28646; 38 FR 19141.)

These amendments make deletions in each of four test requirements to eliminate unnecessary and useless testing. It does not appear that public participation in this rulemaking proceeding would make additional relevant information available to the Department. Further, in order for the amendments to be of maximum benefit, they must be made effective immediately.

Accordingly, under the administrative procedure provisions in 5 U.S.C. 553, it is found upon good cause that notice and other public procedure concerning these amendments are impracticable and unnecessary, and good cause is found for making these amendments effective less than 30 days after publication in the FEDERAL REGISTER.

The foregoing amendment shall become effective upon issuance.

Done at Washington, DC, this 23rd day of August, 1977.

NOTE.—The Animal and Plant Health Inspection Service has determined that this document does not contain a major proposal requiring preparation of an Inflation Impact Statement under Executive Order 11821 and OMB Circular A-107.

NORVAN L. MEYER,
Acting Deputy Administrator,
Veterinary Services.

Title 13—Business Credit and Assistance

CHAPTER III—ECONOMIC DEVELOPMENT ADMINISTRATION, DEPARTMENT OF COMMERCE

PART 305—PUBLIC WORKS AND DEVELOPMENT FACILITIES PROGRAM

Procurement Standards for State and Local Governments

AGENCY: Economic Development Administration, Department of Commerce.

ACTION: Final rule.

SUMMARY: This regulation revises certain portions of an existing regulation on procurement standards for recipients of assistance under title I of the Public Works and Economic Development Act of 1965, as amended. These changes are made to conform the existing regulation with Federal Management Circular 74-7. The implementation of these changes will clarify the scope of applicability and the nature of the requirements of the present regulation.

DATES: Effective date: August 18, 1977. Comments by: September 29, 1977.

ADDRESSES: Send comments to: Assistant Secretary for Economic Development, U.S. Department of Commerce, Room 7800B, Washington, D.C. 20230.

FOR FURTHER INFORMATION CONTACT:

James F. Marten, U.S. Department of Commerce, Room 7009, Washington, D.C. 20230 (202-377-5441).

SUPPLEMENTARY INFORMATION: The following changes are being made to § 305.95.

1. The title of this section now reads: "Procurement standards for State and local governments." This change specifies the types of recipients to whom these procurement standards apply.

2. Section 305.95(c)(3) is revised to follow more closely the language of FMC 74-7.

Because this regulation relates to the EDA grant and loan program, it is exempted from the procedures described in section 553 of the Administrative Procedure Act (5 U.S.C. 553). However, in the spirit of the public policy set forth in that Act, interested persons may submit written suggestions regarding this regulation to the above address.

EDA has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A-107.

Accordingly, 13 CFR 305.95 is amended to read as follows:

§ 305.95 Procurement standards for State and local governments.

* * * * *

(c) * * *

(3) "Positive efforts shall be made by the grantees to utilize small business and minority-owned business sources of supplies and services."

* * * * *

(AUTHORITY: Sec. 701, Pub. L. 89-136, 70 Stat. 570 (42 U.S.C. 3211); Department of Commerce Organizatoin Order 10-4, as amended (40 FR 56702, as amended).)

Dated: August 18, 1977.

ROBERT T. HALL,
Assistant Secretary
for Economic Development.

[FR Doc.77-25112 Filed 8-29-77;8:45 am]

PART 309—GENERAL REQUIREMENTS FOR FINANCIAL ASSISTANCE

Procurement Standards for Nonprofit Organizations

AGENCY: Economic Development Administration, Department of Commerce.

ACTION: Final rule.

SUMMARY: This regulation sets forth procurement standards to be followed by nonprofit organizations receiving assistance under titles I, II, III, and IX of the Public Works and Economic Development Act of 1965, as amended. These standards have been established to comply with the requirements of OMB Circular A-110. The implementation of this regulation will promote consistency and uniformity in the administration of grants to non-profit organizations.

DATES: Effective date: August 18, 1977. Comments by: September 29, 1977.

ADDRESSES: Send comments to: Assistant Secretary for Economic Development, U.S. Department of Commerce, Room 7800B, Washington, D.C. 20230.

FOR FURTHER INFORMATION CONTACT:

James F. Marten, U.S. Department of Commerce, Room 7009, Washington, D.C. 20230 (202-377-5441).

SUPPLEMENTARY INFORMATION: Because this regulation relates to the EDA grant and loan program, it is exempted from the procedures described in Section 553 of the Administrative Procedure Act (5 U.S.C. 553). However, in the spirit of the public policy set forth in that Act, interested persons may submit written suggestions regarding this regulation to the above address.

EDA has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A-107.

Accordingly, 13 CFR Part 309 is amended by adding a new § 309.28 to read as follows:

§ 309.28 Procurement standards for nonprofit organizations.

The following standards shall apply to nonprofit organizations receiving assistance under titles I, II, III and IX of the Act. Recipients may use their own procurement policies and procedures, provided that procurements made with Federal grant funds adhere to the following standards.

(a) The recipient shall maintain standards of conduct which shall govern the performance of its officers, employees or agents in awarding and administering contracts using Federal funds. Such standards shall include the following provisions.

(1) No employee, officer or agent shall participate in the selection, award or administration of a contract in which Federal funds are used, when, to his knowledge, he or his immediate family, partners, or an organization in which he or his immediate family or partners has a financial interest or with whom he is negotiating has any arrangement conaminer as evidence of the pilot's concerning prospective employment.

(2) The recipient's officers, employees, or agents shall neither solicit nor accept gratuities, favors or anything of monetary value from contractors or potential contractors.

(3) The recipient's standards of conduct shall provide for disciplinary actions to be applied for violations of such standards by the recipient's officers, employees or agents.

(b) All procurement transactions shall be conducted in a manner to provide, to the maximum extent practicable, open and free competition.

(c) In order to ensure objective contractor performance and eliminate unfair competitive advantage, contractors that develop or draft specifications, requirements, statements of work, invitations for bids and/or requests for proposals should be excluded from competing for such procurements.

(d) Awards shall be made to the bidder/offeror whose bid/offer is responsive to the solicitation and is most advantageous to the recipient, price and other factors considered.

(e) Solicitations shall clearly set forth all requirements that the bidder/offeror must fulfill in order for his bid/offer to be evaluated by the recipient. Any and all bids/offers may be rejected when it is in the recipient's interest to do so.

(f) Procurement procedures shall meet the following minimum requirements.

(1) They shall avoid unnecessary or duplicatory items.

(2) They shall contain a clear and accurate description of requirements ("Brand Name-or-Equal" may be used).

(3) They shall utilize small business and minority-owned business sources of supplies and services.

(4) The procurement contract shall be appropriate for the particular procurement and the project. The "cost-plus-a-percentage-of-cost" contract shall not be used.

(5) All proposed sole source contracts, or contracts for which only one bid or proposal is received and for which the aggregate expenditure is expected to exceed $5,000, shall be subject to prior approval at the discretion of the Federal sponsoring agency.

(6) Procurement records and files for purchases in excess of $10,000 shall include the following:

(i) The basis for contractor selection:

(ii) A justification for lack of competition when competitive bids or offers are not obtained; and

(iii) The basis for the award cost or price.

(g) The recipient shall include both of the following provisions in all contracts and sub-contracts in excess of $10,000:

(1) Provisions for administrative, contractual and legal remedies, and provisions for sanctions and penalties, as appropriate for instances in which contractors violate or breach contractual terms, and

(2) Provisions for termination by the recipient as well as provisions for termination for default and for circumstances beyond the control of the contractor.

(h) In contracts for construction or facility improvement for more than $100,000, recipients shall observe the bonding requirements provided in Attachment B to OMB Circular A-110.

(i) Contracts and subgrants of amounts in excess of $100,000 shall contain a provision requiring recipients to agree to comply with applicable standards, orders or regulations issued pursuant to the Clean Air Act of 1970 (42 U.S.C. 1857 et seq.) and the Federal Water Pollution Control Act (33 U.S.C. 1251 et seq.) as amended. Violations shall be reported to the Federal sponsoring agency and to the Regional Office of the Environmental Protection Agency.

(Sec. 701, Pub. L. 89-136, 79 Stat. 570 (42 U.S.C. 3211); Department of Commerce Organization Order 10-4, as amended (40 FR 56702, as amended).)

Dated: August 18, 1977.

ROBERT T. HALL,
Assistant Secretary
for Economic Development.

Title 14—Aeronautics and Space

CHAPTER II—CIVIL AERONAUTICS BOARD

SUBCHAPTER A—ECONOMIC REGULATIONS

[Reg. ER-1019, Amdt. 2]

PART 244—UNIFORM SYSTEM OF ACCOUNTS AND REPORTS FOR AIR FREIGHT FORWARDERS AND INTERNATIONAL AIR FREIGHT FORWARDERS; FILING OF REPORTS BY FOREIGN AIR FREIGHT FORWARDERS AND COOPERATIVE SHIPPERS ASSOCIATIONS

Elimination of Schedules T-4, T-5, and T-6 of CAB Form 244

Adopted by the Civil Aeronautics Board at its office in Washington, D.C.

AGENCY: Civil Aeronautics Board.

ACTION: Final rule.

SUMMARY: This amendment terminates the special reports (Schedules T-4, T-5, and T-6 of CAB Form 244) prescribed for long-haul motor and railroad air freight forwarders and those affiliated with them as set forth in Section 8 of Part 244. The rule implements a part of the Board's decision in the "Long-Haul Motor/Railroad Carrier Air Freight Forwarder Authority Case", Docket 26907, decided June 27, 1977, Order 77-6-126.

DATES: Effective: August 25, 1977. Adopted: August 25, 1977.

FOR FURTHER INFORMATION CONTACT:

Raymond Kurlander, Director, Bureau of Accounts and Statistics, Civil Aeronautics Board, 1825 Connecticut Avenue NW., Washington, D.C. 20428 (202-673-5270).

SUPPLEMENTARY INFORMATION: In the "Motor Carrier-Air Freight Forwarder Investigation," Order 69-4-100, the Board authorized long-haul motor carriers of general commodities to engage in air freight forwarding and international air freight forwarding on a trial basis for a period of five years under a plan of monitored entry, including the submission of special reports, designed to assure that their participation would benefit rather than harm air transportation. The program was extended to railroad carriers in the "Southern Pacific-Santa Fe Air Freight Forwarder Case," Order 70-10-100. The program establishing the special reports was incorporated in Part 244 by ER-595 (November 12, 1969, 34 FR 19340) and ER-703 (October 12, 1971, 36 FR 20154).

In the "Long-Haul Motor/Railroad Carrier Air Freight Forwarder Authority Case," the Board reviewed the effectiveness of its experiment and decided, among other things, that the special reports called for by the program should be terminated. On page 7 of the Opinion in Order 77-6-126, the Board stated that technical amendments to Part 244 would be made in the near future to delete the special reporting requirements and that such requirements would not be enforced in the meantime. Since this amendment eliminates reporting requirements and imposes no burdens, it is being made effective immediately. Accordingly, the Civil Aeronautics Board amends Part 244 of the Economic Regulations (14 CFR Part 244) effective August 25, 1977 as follows:

Section 8 [Amended]

1. Amend Section 8—Reports as follows:

A. Delete the following lines from the "List of Schedules."

Schedule No.	Title	Applicability level		
		1	2	3
*	* * *	*	*	*
T-4	Originating Air Station Data.	(1)	(1)	(1)
T-5	Supplemental Operating Statistics	(1)	(1)	(1)
T-6	Analysis of Traffic by Weight Breaks.	(1)	(1)	(1)
*	* * *	*	*	*

B. Delete footnote 1 to the "List of Schedules."

2. Amend Section 8-1—General Instructions by revising paragraph (d) to read:

Sec. 8-1 General Instructions.

* * * * *

(d) The CAB Form 244 report shall be due at the Civil Aeronautics Board on February 15 of each year. If a due date falls on a Saturday, Sunday, or national holiday, the due date will change to the first following workday.

* * * * *

Sec. 8 [Amended]

3. Amend Section 8-2——Specific Instructions to delete the instructions for the following schedules in their entirety:

Schedule T-4—Originating Air Station Data. [Deleted]

Schedule T-5—Supplemental Operating Statistics—Long-Haul Motor Carriers or Railroad Carriers as Air Freight Forwarders. [Deleted]

Schedule T-6—Analysis of Traffic by Weight Breaks. [Deleted]

(Secs. 204(a), 407, Federal Aviation Act of 1958, as amended, (72 Stat. 743, 766, as amended, (49 U.S.C. 1324(a) 1377).)

By the Civil Aeronautics Board.

PHYLLIS T. KAYLOR,
Secretary.

[Docket No. 26907 et al.; ER-1003, Amdt. 2]

PART 296—CLASSIFICATION AND EXEMPTION OF AIR FREIGHT FORWARDERS, INTERNATIONAL AIR FREIGHT FORWARDERS, AND COOPERATIVE SHIPPERS ASSOCIATIONS

Correction

AGENCY: Civil Aeronautics Board.

ACTION: Final rule; correction.

SUMMARY: This document corrects a final rule that appeared at page 33274 in the FEDERAL REGISTER of Thursday, June 30, 1977 (FR Doc. 77-18769)..

EFFECTIVE DATE: August 26, 1977.

FOR FURTHER INFORMATION CONTACT:

Gary J. Edles, Office of the General Counsel, Civil Aeronautics Board, 1825 Connecticut Avenue NW., Washington, D.C. 20428 (202-673-5206).

The following correction is made:

Effective: August 26, 1977.

Adopted: June 27, 1977.

A citation in the Supplementary Information on page one is incorrect. In the next to the last line the citation "ER-791 (October 12, 1970, 36 F.R. 20155)" should read "ER-701, October 12, 1971, 36 F.R. 20155)."

By the Civil Aeronautics Board.

Dated: August 25, 1977.

PHYLLIS T. KAYLOR,
Secretary.

SUBCHAPTER F—POLICY STATEMENTS

[Docket No. 26907 et al.; Reg. PS-74, Amdt. 53]

PART 399—STATEMENTS OF GENERAL POLICY PROCESSING OF APPLICATIONS OF LONG-HAUL MOTOR CARRIERS OR RAILROAD CARRIERS FOR AUTHORITY AS AIR FREIGHT FORWARDERS OR INTERNATIONAL AIR FREIGHT FORWARDERS

Correction

AGENCY: Civil Aeronautics Board.

ACTION: Final rule; correction.

SUMMARY: This document corrects a final rule that apeared at page 33275, in the FEDERAL REGISTER of Thursday, June 30, 1977 (FR Doc. 77-18768).

EFFECTIVE DATE: August 26, 1977.

FOR FURTHER INFORMATION CONTACT:

Gary J. Edles, Office of the General Counsel, Civil Aeronautics Board, 1825 Connecticut Avenue NW., Washington, D.C. 20428 (202-673-5205).

The following correction is made:

Effective: August 26, 1977.

Adopted: June 27, 1977.

The words "or railroad carriers" were inadvertently omitted from § 399.20(d) following the word "carrier" in line two. The provision should read:

"(d) *Applications for acquisition of control.* Where a long-haul motor carrier or railroad carrier applies for Board approval to acquire control of an air freight forwarder or international air freight forwarder, the Board's policy in ordinary circumstances will be as follows: * * *."

By the Civil Aeronautics Board.

Dated: August 25, 1977.

PHYLLIS T. KAYLOR,
Secretary.

Title 21—Food and Drugs

CHAPTER I—FOOD AND DRUG ADMINISTRATION, DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

SUBCHAPTER A—GENERAL

[Docket No. 77C-0126]

PART 73—LISTING OF COLOR ADDITIVES EXEMPT FROM CERTIFICATION

PART 81—GENERAL SPECIFICATIONS AND GENERAL RESTRICTIONS FOR PROVISIONAL COLOR ADDITIVES FOR USE IN FOODS, DRUGS, AND COSMETICS

β-Carotene; Confirmation of Effective Date

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: This document confirms the effective date of August 2, 1977, of an order concerning the use of β-carotene in externally applied drugs and in cosmetics generally, including those drugs and cosmetics intended for use in the area of the eye.

DATE: Effective date confirmed: August 2, 1977.

FOR FURTHER INFORMATION CONTACT:

Gerad L. McCowin, Buerau of Foods (HFF-334), Food and Drug Administration, Department of Health, Education, and Welfare, 200 C St. SW., Washington, D.C. 20204 (202-472-5740).

SUPPLEMENTARY INFORMATION: A regulation published in the FEDERAL REGISTER of July 1, 1977 (42 FR 33722) amended § 73.1095 and added § 73.2095 in Subparts B and C, respectively, of Part 73 (21 CFR Part 73) to provide for the safe use of β-carotene in externally applied drugs and in cosmetics generally, including those drugs and cosmetics intended for use in the area of the eye. The regulation also amended § 81.1(g) (21 CFR 81.1(g)), by deleting carotene from the provisionally listed colors.

Under the Federal Food, Drug, and Cosmetic Act (sec. 706 (b), (c), and (d), 74 Stat. 399-403 (21 U.S.C. 376 (b), (c), and (d))) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.1), notice is given that no objections or requests for hearing were filed in response to the regulation of July 1, 1977. Accordingly, the amendments promulgated thereby became effective on August 2, 1977.

Dated: August 23, 1977.

WILLIAM F. RANDOLPH,
Acting Associate Commissioner for Compliance.

[Docket No. 77C-0198]

PART 73—LISTING OF COLOR ADDITIVES EXEMPT FROM CERTIFICATION

PART 81—GENERAL SPECIFICATIONS AND GENERAL RESTRICTIONS FOR PROVISIONAL COLOR ADDITIVES FOR USE IN FOODS, DRUGS, AND COSMETICS

Carmine; Confirmation of Effective Date

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: This document confirms the effective date of July 26, 1977, of a regulation concerning the use of carmine in cosmetics generally, including those intended for use in the area of the eye.

DATE: Effective date confirmed: July 26, 1977.

FOR FURTHER INFORMATION CONTACT:

Gerad L. McCowin, Bureau of Foods (HFF-334), Food and Drug Administration, Department of Health, Education, and Welfare, 200 C St. SW., Washington, D.C. 20204 (202-472-5740).

SUPPLEMENTARY INFORMATION: A regulation published in the FEDERAL REGISTER of June 24, 1977 (42 FR 32228) added § 73.2087 to Subpart C of Part 73 (21 CFR Part 73) to provide for the safe use of carmine in cosmetics generally, including those cosmetics intended for use in the area of the eye. The order also amended § 81.1(g) (21 CFR 81.1(g)), by deleting carmine from the provisionally listed colors.

Under the Federal Food, Drug, and Cosmetic Act (sec. 706 (b), (c), and (d), 74 Stat. 399-403 (21 U.S.C. 376 (b), (c), and (d))) and under authority delegated to the Commissioner (21 CFR 5.1), notice is given that no objections or requests for hearing were filed in response to the order of June 24, 1977. Accordingly, the amendments promulgated thereby became effective on July 26, 1977.

Dated: August 23, 1977.

WILLIAM F. RANDOLPH,
Acting Associate Commissioner for Compliance.

SUBCHAPTER B—FOOD FOR HUMAN CONSUMPTION

[Docket No. 76F-0461]

PART 177—INDIRECT FOOD ADDITIVES: POLYMERS

Styrene Block Polymers

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: Based on a petition by Phillips Petroleum Co., the agency is amending the food additive regulations to provide for safe use of additional styrene block polymers.

DATES: Effective August 30, 1977; objections by September 29, 1977.

ADDRESS: Written objections to the Hearing Clerk (HFC-20), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT:

John J. McAuliffe, Bureau of Foods (HFF-334), Food and Drug Administration, Department of Health, Education, and Welfare, 200 C St. SW., Washington, D.C. 20204 (202-472-5690).

SUPPLEMENTARY INFORMATION: Notice was given in the FEDERAL REGISTER of January 4, 1977 (42 FR 855) that a petition (FAP 6B3171) had been filed by Phillips Petroleum Co., Bartlesville, OK 74004, proposing that § 177.1810 (21 CFR 177.1810) be amended to provide for the safe use of additional analogous styrene block polymers and to provide an alternate method for the determination of glass transition points of styrene block polymers.

The Commissioner of Food and Drugs, having evaluated data in the petition and other relevant material, concludes that § 177.1810 should be amended as set forth below.

In the FEDERAL REGISTER of June 3, 1977 (42 FR 28533), subsequent to the filing of FAP 6B3171, § 177.1810 was amended in paragraph (b)(1) to provide for the safe use of additional analogous with 1,3-butadiene as a component of pressure sensitive adhesives intended to contact nonfatty foods. The Commissioner concludes that the proposed changes regarding extractable fraction, glass transition points, and analytical method are also applicable to the styrene block polymers used as a component of pressure sensitive adhesives subject to the use limitations prescribed in the text of item 1(ii) of § 177.1810(b).

Accordingly, § 177.1810 is being amended: (1) In the table in paragraph (b) by increasing the maximum extractable fraction of styrene block polymers with 1,3-butadiene in 50 percent ethanol at 150° F for 2 hours on a 0.075 inch thick sample from "0.005 mg/in² of surface" to "0.01 mg/in² of surface"; (2) in the same table by extending the ranges of glass transition points of styrene block polymers with 1,3-butadiene from "—86° C to —80° C and 92° C to 98° C" to "—98° C to —71° C and 86° C to 122° C" and of styrene block polymers with 2-methyl-1,3-butadiene from "—52° C to —47° C and 92° C to 98° C" to "—65° C to —47° C and 86° C to 122° C"; and (3) in paragraph (c)(2) by adding an alternate analytical method for the determination of glass transition points.

Therefore, under the Federal Food, Drug, and Cosmetic Act (sec. 409(c)(1), 72 Stat. 1786 (21 U.S.C. 348(c)(1))) and under authority delegated to the Commissioner (21 CFR 5.1), Part 177 is amended in § 177.1810 by revising paragraphs (b) and (c)(2) to read as follows:

§ 177.1810 Styrene block polymers.

* * * * *

(b) Specifications:

Styrene block polymers	Molecular weight (minimum)	Solubility	Glass transition points	Maximum extractable fraction in distilled water at specified temperatures, times, and thicknesses	Maximum extractable fraction in 50 pct ethanols at specified temperatures, times, and thicknesses.
1. (i) Styrene block polymers with 1,3-butadiene; for use as articles or as components of articles that contact food of types I, II, IV-B, VI, VII-B, and VIII identified in table 1 in sec. 176.170 (c) of this chapter under conditions of use D, E, F, and G described in table 2 in sec. 176.170(c) of this chapter.	29,000	Completely soluble in toluene.	−98° C to −71° C and 86° C to 122° C.	0.025 mg/in² of surface at reflux temperature for 30 min on a 0.075 in thick sample.	0.01 mg/in² of surface at 150° F for 2 hr on a 0.075 in thick sample.
(ii) Styrene block polymers with 1,3-butadiene; for use as components of pressure sensitive adhesives that contact food of types I, II, IV-B, VI, VII-B, and VIII identified in table 1 in sec. 176.170(c) of this chapter under conditions of use C, D, E, F, and G described in table 2 in sec. 176.170(c) of this chapter, provided the pressure sensitive adhesives be applied only to closure tapes for sealing containers having a capacity of not less than 5.5 fluid ounces and that the area of the adhesive exposed to food shall not exceed 0.625 in². The pressure sensitive adhesive may contain terpene resins as identified in sec. 175.125(b)(2) of this chapter.	29,000	do	do	do	Do.
2. Styrene block polymers with 2-methyl-1,3-butadiene; for use as articles or as components of articles that contact food of types I, II, IV-B, VI, VII-B, and VIII identified in table 1 in sec. 176.170(c) of this chapter under conditions of use D, E, F, and G described in table 2 in sec. 176.170(c) of this chapter.	29,000	do	−65° C to −47° C and 86° C to 122° C.	0.01 mg/in² of surface at reflux temperature for 2 hr on a 0.028 in thick sample.	0.01 mg/in² of surface at 150° F for 2 hr on a 0.028 in thick sample.
3. Styrene block polymers with 1,3-butadiene, hydrogenated; for use as articles or as components of articles that contact food of types I, II, IV-B, VI, VII-B, and VIII identified in table 1 in sec. 176.170(c) of this chapter.	16,000	do	−50° C to −30° C and 92° C to 98° C.	0.01 mg/in² of surface at reflux temperature for 2 hr on a 0.028 in thick sample.	Do.

(c) * * *

(2) *Glass transition points.* The glass transition points shall be determined by either of the following methods:

(i) ASTM Method D 2236-70 [1] modified by using a forced resonant vibration instead of a fixed vibration and by using frequencies of 25 to 40 cycles per second instead of 0.1 to 10 cycles per second.

(ii) Direct reading viscoelastrometric method [2] by which the glass transition points are determined in the tensile mode of deformation at a frequency of 35 hertz using a Rheovibron Model DDV-II (or equivalent) Direct Reading Viscoelastometer. Take maxima in the out-of-phase component of the complex modulus as the glass transition points. For block polymers of low styrene content or for simple block polymers, the polymer may be treated with 0.3 part per hundred dicumyl peroxide and cured for 30 minutes at 153° C to accentuate the upper transition point.

* * * * *

Any person who will be adversely affected by the foregoing regulation may at any time on or before September 29,

[1] Copies may be obtained from: American Society for Testing and Materials, 1916 Race St., Philadelphia, PA 19103.

[2] Copies may be obtained from: Director, Division of Food and Color Additives, Bureau of Foods (HFF-330), Food and Drug Administration, 200 C St. SW., Washington, DC 20204.

V42168A AUG 30 77 UMI

1977, submit to the Hearing Clerk (HFC–20), Food and Drug Administration, Rm. 4–65, 5600 Fishers Lane, Rockville, MD 20857, written objections thereto and may make a written request for a public hearing on the stated objections. Each objection shall be separately numbered and each numbered objection shall specify with particularity the provision of the regulation to which objection is made. Each numbered objection on which a hearing is requested shall specifically so state; failure to request a hearing for any particular objection shall constitute a waiver of the right to a hearing on that objection. Each numbered objection for which a hearing is requested shall include a detailed description and analysis of the specific factual information intended to be presented in support of the objection in the event that a hearing is held; failure to include such a description and analysis for any particular objection shall constitute a waiver of the right to a hearing on the objection. Four copies of all documents shall be submitted and shall be identified with the Hearing Clerk docket number found in brackets in the heading of this regulation. Received objections may be seen in the above office between the hours of 9 a.m. and 4 p.m., Monday through Friday.

Effective date. This regulation shall become effective August 30, 1977.

(Sec. 409(c)(1), 72 Stat. 1786 (21 U.S.C. 348 (c)(1)))

Dated: August 22, 1977.

WILLIAM F. RANDOLPH,
Acting Associate Commissioner for Compliance.

NOTE.—Incorporation by reference provisions approved by the Director, Office of the Federal Register on April 29, 1974 and August 19, 1977. The incorporated provisions are on file in the Federal Register Library.

Title 24—Housing and Urban Development

SUBTITLE A—OFFICE OF THE SECRETARY, DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. R–77–285]

PART 20—BOARD OF CONTRACT APPEALS

Rules of Procedure for Handling Appeals

AGENCY: HUD Board of Contract Appeals.

ACTION: Final rule.

SUMMARY: This rule establishes a Board of Contract Appeals and prescribes its jurisdiction, authority, and procedures. The rule adopts, with appropriate changes for HUD's requirement, the Uniform Rules of Procedure for Boards of Contract Appeals drafted by the National Conference of Boards of Contract Appeals members. The changes are primarily editorial and are intended to improve clarity and to incorporate recent developments in the Board's organization.

EFFECTIVE DATE: September 29, 1977.

FOR FURTHER INFORMATION CONTACT:

B. Paul Cotter, Jr., Administrative Judge, HUD Board of Contract Appeals, Washington, D.C. 20410, (202–755–6318).

SUPPLEMENTARY INFORMATION: On May 12, 1977, the Secretary of the Department of Housing and Urban Development published a proposed rule (42 FR 24200) to revise the provisions establishing the HUD Board of Contract Appeals and its procedures (24 CFR Part 20). As the Secretary stated at the time, the original provisions were adopted shortly after the inception of the Board in February, 1975. Since 1975 the Uniform Rules of Procedure were issued, the Board's membership was expanded, and problems characteristic of HUD contract appeals have been identified. The primary purpose of the proposed change was to incorporate those three developments and to make the Board's Rules more understandable to the layman who elects to present his appeal to the Board himself.

No comments were received in response to the proposed changes. However, further editorial changes have been made in the final rule to make its provisions easier to understand. None of the editorial changes are substantive.

The Department has also determined in accordance with OMB Circular A–107 that this proposal does not have an economic impact. A copy of the Economic Finding of Inapplicability is also available for inspection at the above address.

Accordingly, 24 CFR Part 20 is amended to read as follows:

Subpart A—Department of Housing and Urban Development Board of Contract Appeals

Sec.
20.1 Scope of part.
20.2 Establishment of Board.
20.3 Organization, membership and location of the Board.
20.4 Jurisdiction and authority of the Board.
20.5 Procedure.

Subpart B—Rules of the Department of Housing and Urban Development Board of Contract Appeals

20.10 Rules.

PRELIMINARY PROCEDURES

Rule
1. How to appeal a contracting officer's decision.
2. Contents of notice of appeal.
3. Forwarding of appeals by the contracting officer.
4. Preparation, contents, organization, forwarding, and status of appeal file.
5. Service of documents.
6. Computation and extension of time limits.
7. Dismissal for lack of jurisdiction.
8. Pleadings and motions.
9. Amendments to pleadings or record.
10. Hearing election.
11. Prehearing briefs.
12. Prehearing or presubmission order and conference.
13. Submission of appeal without a hearing.
14. Optional accelerated procedure.
15. The record of the appeal.
16. Discovery—depositions.
17. Interrogatories to parties, admission of facts, production and inspection of documents.

HEARINGS

18. Time and place of hearing.
19. Notice of hearings.
20. Unexcused absence of a party.
21. Nature of hearings.
22. Examination of witnesses.
23. Copies of papers.
24. Posthearing briefs.
25. Transcript of proceedings.
26. Withdrawal of exhibits.

REPRESENTATION

27. The appellant.
28. The respondent.

DECISIONS

29. Decisions.
30. Motion for reconsideration.

DISMISSALS

31. Dismissal without prejudice.
32. Dismissal for failure to prosecute.

MISCELLANEOUS

33. Ex parte communications with the Board.
34. Sanctions.
35. Remand from court.

AUTHORITY: Sec. 7(d) of the Department of Housing and Urban Development Act; 42 U.S.C. 3535(d).

Subpart A—Department of Housing and Urban Development Board of Contract Appeals

§ 20.1 Scope of part.

This part establishes a Board of Contract Appeals, sets forth policies and procedures regarding matters to be considered by the Board, and prescribes the rules of the Board.

§ 20.2 Establishment of Board.

There is hereby established in the Office of the Secretary the Housing and Urban Development Board of Contract Appeals ("the Board").

§ 20.3 Organization, membership and location of the Board.

(a) *Organization and membership.* The Board shall be comprised of a Chief Administrative Judge, who shall be Chairman, and such other Administrative Judges as may be appointed by the Secretary. The Board shall employ support personnel as needed. All members of the Board shall be attorneys at law admitted to practice before the highest court of the District of Columbia or any State, commonwealth, or territory of the United States. Contract appeals are assigned to a panel of at least two (2) members of the Board. However, under the optional accelerated procedure set forth in Rule 14 of Subpart B of this Part 20, a decision may be rendered by a single Administrative Judge.

(b) *Location.* The Board is located in Washington, D.C., and its mailing address is U.S. Department of Housing and Urban Development, Board of Contract Appeals, Room 7150, 451 7th Street SW., Washington, D.C. 20410.

§ 20.4 Jurisdiction and authority of the Board.

(a) *Contract Appeals.* The Board shall consider and determine appeals from decisions of Contracting Officers arising under contracts which contain provisions requiring the determination of appeals by the Secretary of Housing and Urban Development or the Secretary's duly authorized representative or board. The Board has authority to determine contract appeals falling within the scope of its jurisdiction as fully and finally as might the Secretary.

(b) *Other matters.* The Board or its individual members shall have jurisdiction over other matters assigned to it by the Secretary. Determinations in other matters shall have the finality provided by applicable statute, regulation or agreement.

(c) *Decisions on questions of law.* When an appeal is taken pursuant to a Disputes clause in a contract which limits appeals to disputes concerning questions of fact, the Board, in its discretion, may hear, consider, and decide all questions of law necessary for the complete adjudication of the issues. If an appeal involves a claim which is not cognizable under the terms of the contract or applicable regulation, the Board may make findings of fact with respect to such a claim without expressing an opinion on the question of liability.

(d) *Board powers.* The Board shall have all powers necessary and incident to the proper performance of the duties assigned to it by this Part.

(e) *Final decision.* In each case, the Board shall make a final decision which is just and is supported by the record in the case and the law. The decision of a majority of a panel constitutes the decision of the Board. The Administrative Judge or Judges assigned to consider an appeal have authority to act for the Board in all matters with respect to such appeal. No Administrative Judge may act for the Board or participate in a decision if, prior to the time the appeal was filed, he or she has participated in the matter in any manner whatsoever.

(f) *Subpoena power.* Any Board member presiding over a contract appeal under § 20.4(a) may seek the issuance of subpoenas pursuant to 5 U.S.C. 304, for witnesses or documents relating to that appeal.

§ 20.5 Procedure.

(a) *Rules.* Appeals referred to the Board will be conducted in accordance with the rules of the Board set forth in Subpart B of this Part 20, unless otherwise provided by applicable statute or regulation. The provisions of the Administrative Procedure Act, 5 U.S.C. 551, et seq., as amended, shall not apply to contract appeals before the Board.

(b) *Administration and interpretation of rules.* These rules will be interpreted to secure a just and inexpensive determination of appeals without unnecessary delay. The Board shall decide procedural issues in accordance with the spirit of these rules, and, in its discretion, it may follow specific provisions of the Rules of Civil Procedure for the United States District Courts in dealing with such issues.

(c) *Preliminary procedures.* Preliminary procedures are provided to encourage full disclosure of relevant and material facts and to discourage unwarranted surprise.

Subpart B—Rules of the Department of Housing and Urban Development Board of Contract Appeals

§ 20.10 Rules.

These rules govern the procedure in all matters before the Department of Housing and Urban Development Board of Contract Appeals unless otherwise provided by applicable law or regulation. They shall be construed to secure the just, speedy, and inexpensive determination of every matter.

PRELIMINARY PROCEDURES

Rule 1. *How to appeal a Contracting Officer's decision.*

Notice of an appeal must be in writing, addressed to the Secretary, and the original, together with two copies, should be filed with the Contracting Officer from whose decision the appeal is taken. The notice of appeal must be mailed or otherwise filed, within the time specified therefor in the contract or allowed by applicable provision of directive, regulation or law.

Rule 2. *Contents of notice of appeal.*

A notice of appeal should indicate that an appeal is thereby intended, and should identify the contract by number, the headquarters, regional or area office cognizant of the dispute, and the decision from which the appeal is taken. The notice of appeal should be signed personally by the contractor taking the appeal ("the appellant"), or by an officer of an appellant corporation or member of an appellant firm, or by an appellant's authorized representative or attorney.

Rule 3. *Forwarding of appeals by the Contracting Officer.*

When a notice of appeal in any form has been received by the Contracting Officer, he shall endorse thereon the date of mailing of the notice by the appellant or date of receipt, if otherwise conveyed, and within 10 days shall forward the notice of appeal to the Board. Following receipt by the Board of the original notice of an appeal, whether through the Contracting Office or otherwise, the appellant, the Contracting Officer and Government ("respondent") counsel will be promptly notified of its receipt and docketing by the Board. The Board will furnish the contractor with a copy of these rules.

Rule 4. *Preparation, contents, organization, forwarding, and status of appeal file.*

(a) *Duties of Contracting Officer.* Within 30 days of receipt of notice that an appeal has been docketed, the Contracting Officer shall file with the Board an appeal file consisting of all documents pertinent to the appeal, including:

(1) The Contracting Officer's decision and findings of fact from which the appeal is taken;

(2) The contract, including pertinent specifications, amendments and plans and drawings;

(3) All correspondence between the parties pertinent to the appeal, including the letters of claim in response to which the decision was issued;

(4) Transcripts of any testimony taken during the course of proceedings, and affidavits or statements of any witnesses on the matter in dispute made prior to the filing of the notice of appeal with the Board; and

(5) Any additional information considered pertinent. Within the 30 days specified above, the Contracting Officer shall furnish the appellant a list of each document he transmits to the Board, with a copy of each document not already in the contractor's possession except for lengthy documents described in subparagraph (d) below.

(b) *Duties of the appellant.* Within 30 days after receipt of a copy of the appeal file assembled by the Contracting Officer, the appellant may supplement the same by transmitting to the Board any documents not contained therein which it considers pertinent to the appeal and shall furnish two copies of such documents to the respondent's trial attorney.

(c) *Organization of appeal file.* Documents in the appeal file may be originals or legible facsimiles or authenticated copies thereof, and shall be arranged in chronological order where practicable, numbered sequentially, tabbed, and indexed to identify the contents of the file. The first two documents in every appeal file shall be the Contracting Officer's final decision and the contract.

(d) *Lengthy documents.* The Board may waive the requirement of furnishing to the other party copies of bulky, lengthy, or out-of-size documents in the appeal file when a party has shown that doing so would impose an undue burden. At the time a party files with the Board a document as to which such a waiver has been granted, he shall notify the other party that the same or a copy is available for inspection at the offices of the Board or of the party filing same.

(e) *Status of documents in appeal file.* Documents contained in the appeal file shall be, without further action by the parties, a part of the record upon which the Board will render its decision, unless a party objects to the consideration of a particular document in advance of hearing or, in the event there is no hearing on the appeal, of settling the record. If objection to a document is made, the Board will rule upon its admissibility into the record as evidence in accordance with rules 15 and 21, hereof.

Rule 5. *Service of documents.*

A copy of every written communication submitted to the Board shall be sent to every other party to the dispute. Such communications shall be sent by delivering in person or by mailing, properly addressed with postage prepaid, to the opposing party or, where the party is represented by counsel, to its counsel. Each communication with the Board shall be accompanied by a statement, signed by the originating party, saying when, how, and the name and address of the party to whom a copy of the communication was sent.

Rule 6. *Computation and extension of time limits.*

(a) *General.* All time limitations specified for various procedural actions are computed as maximums and are not to be fully exhausted if the action described can be accomplished in a lesser period. At the discretion of the Board, these time limitations may be extended in appropriate circumstances for good cause shown.

(b) *Computation.* Except as otherwise provided by law, in computing any period of time prescribed by these rules or by any order of the Board, the day of the event from which the designated period of time begins to run shall not be included, but the last day of the period shall be included unless it is a Saturday, Sunday, or a legal holiday, in which event the period shall run to the end of the next business day.

V 42168 AUG 30 77 UMI

(c) *Extensions.* All requests for extensions of time shall be submitted to the Board in writing and shall state good cause therefor.

Rule 7. *Dismissal for lack of jurisdiction.*

Any motion addressed to the jurisdiction of the Board shall be promptly filed. Hearing on the motion shall be afforded on application of either party, unless the Board determines that its decision on the motion will be deferred pending hearing on both the merits of the appeal and the motion. The Board shall have the right at any time and on its own motion to raise the issue of its jurisdiction to proceed with a particular case and shall do so by an appropriate order, affording the parties an opportunity to be heard thereon.

Rule 8. *Pleadings and motions.*

(a) *Complaint.* Within 30 days after receipt of notice of docketing of the appeal, the appellant shall file with the Board an original and two copies of a complaint setting forth simple, concise and direct statements of each of its claims, alleging the basis, with appropriate reference to contract provisions, for each claim, and the dollar amount claimed. This pleading shall fulfill the generally recognized requirements of a complaint, although no particular form or formality is required. If the complaint is not received within the 30 days and, in the opinion of the Board, the issues before the Board are sufficiently defined, the appellant's claim and notice of appeal may be deemed to set forth its complaint, and the parties shall be so notified.

(b) *Answer.* Within 30 days from receipt of said complaint or a Rule 8(a) notice from the Board, respondent shall prepare and file with the Board an original and two copies of any answer thereto, setting forth simple, concise, and direct statements of respondent's defenses to each claim asserted by appellant. This pleading shall fulfill the generally recognized requirements of an answer and shall set forth any affirmative defenses or counter-claims as appropriate. Should the answer not be received within 30 days, the Board may, in its discretion, enter a general denial on behalf of the respondent, and the parties shall be so notified.

(c) *Motions.* (1) The Board may entertain any timely motion for an appropriate order. Application to the Board for an order shall be by motion which, unless made during a hearing, shall be made in writing, shall state with particularity the grounds therefore, and shall set forth the relief or order sought. The requirement of writing is fulfilled if the motion is stated in a written notice of the hearing of the motion.

(2) The Board may, on its own motion, initiate any action by notice to the parties.

(3) Unless otherwise specified by the Board, a party who receives a motion shall file any answering material within 20 days after the date of receipt. The Board may require the presentation of briefs or arguments. The Board shall make an order on each motion that is appropriate and just to the parties and upon conditions that will promote efficiency in disposing of the appeal.

(4) Affidavits in support of motions shall set forth such facts as would be admissible in evidence and shall show affirmatively that the affiant is competent to testify to the matters stated therein. When a motion is made and supported as probided in this rule, a party opposing the motion who is represented by counsel may not rest upon the mere allegations or denials of his pleading; his response, by affidavits or as otherwise provided in this rule, must show that there is a genuine issue of fact or of law for decision. Should it appear from the affidavits of a party opposing the motion that for reasons stated he cannot present by affidavit facts essential to justify his opposition, the Board may deny the motion or may order a continuance to permit affidavits to be obtained or discovery to be had or may make such other order as is just.

Rule 9. *Amendments of pleadings or record.*

(a) *Pleadings.* The Board upon its own initiative or upon application by a party may, in its discretion, order a party to make a more definite statement of the complaint or answer, or to reply to an answer. The application for such an order will suspend the time for responsive pleading. The Board may, in its discretion and within the proper scope of the appeal, permit either party to amend its pleading upon conditions just to both parties.

(b) *Record.* When an issue within the proper scope of the appeal, but not raised by the pleadings or the documentation described in Rule 4, is tried by consent of the parties or by permission of the Board, the issue shall be treated in all respects as if it had been raised therein. In that event a motion to amend the pleadings to conform to the proof may be made but is not required. If evidence is objected to at a hearing on the ground that it is not within an issue raised by the pleadings or the Rule 4 documentation (which shall be deemed part of the pleadings for this purpose), it may be admitted within the proper scope of the appeal, but the objecting party may be granted a continuance if necessary to enable him to meet such evidence.

Rule 10. *Hearing election.*

Upon receipt of a respondent's answer or of the notice that the Board has entered a general denial on behalf of the Government, appellant shall advise the Board in writing whether he desires a hearing as prescribed in Rules 18 through 26, or whether, in the alternative, he elects to submit his case on the record without a hearing, as prescribed in Rule 13. In appropriate cases, the appellant shall also elect whether he desires the optional accelerated procedure prescribed in Rule 14.

Rule 11. *Prehearing briefs.*

The Board may, in its discretion, require the parties to submit prehearing briefs in any case in which a hearing has been elected pursuant to Rule 10. In the absence of a Board requirement therefore, either party may, in its discretion and upon appropriate and sufficient notice to the other party, furnish a prehearing brief to the Board. In any case where a prehearing brief is submitted, it shall be furnished so as to be received by the Board at least 15 days prior to the date set for hearing, and a copy shall simultaneously be furnished to the other party as previously arranged.

Rule 12. *Prehearing or presubmission order and conference.*

(a) *Prehearing Order.* Normally, in cases set for hearing, the Board will issue an order requiring that, prior to the day of the hearing, the parties will:

(1) Exchange a list of witnesses giving titles and a brief description of the subject matter of the testimony;

(2) Exchange proposed exhibits and prepare an additional set of such exhibits to be delivered to the board member at the beginning of the hearing;

(3) Exchange a list of expert witnesses with a summary of their qualifications and testimony; and

(4) Explore the possibilities of agreements on settlement, facts or issues not in dispute, or ways of disposing of portions of the appeal.

Any of the foregoing requirements may be waived by the Board if they conflict with Rule 14 governing the optional accelerated procedure or if they will cause undue hardship to the appellant.

(b) *Complex Case Order.* In appropriate cases, the Board will issue a more comprehensive pretrial order. Examples of complex cases are where it appears that the issues are confused or complex, where the dollar amount involved is very large or the hearing will be unduly long for any other reason and also, in most cases involving quantum where the Board must decide the amount of money owed by either party. In addition to items (1), (2), (3) and (4) referenced in the preceding paragraph, the complex case order will require the parties to (5) submit a stipulation of all facts not in dispute; and (6) attempt preparation of an agreed statement of factual and legal issues and, failing therein, submit separate statements. Where the issue of the amount of money owed will be heard, the Board may issue an additional pretrial order requiring the parties to state the monetary claim in detail with accounting schedules and explanations. The parties shall exchange the statements called for by this paragraph, permit audits of their respective records relating to the contract, and exchange audit reports.

(c) *Conference.* Whether the case is to be submitted pursuant to Rule 13, or heard pursuant to Rules 18 through 26, the Board, upon its own initiative or upon the application of either party, may call upon the parties to appear before an Administrative Judge of the Board for a conference to consider:

(1) The simplification or clarification of the issues;

(2) The possibility of obtaining stipulations, admissions, agreements on documents, understandings on matters already of record, or similar agreements which will avoid unnecessary proof;

(3) The limitation of the number of expert witnesses and the avoidance of similar cumulative evidence, if the case is to be heard;

(4) The possibility of agreement disposing of all or any of the issues in dispute; and

(5) Such other matters as may aid in the disposition of the appeal.

The results of the conference shall be set forth in an appropriate order.

Rule 13. *Submission of appeal without a hearing.*

Either party may elect to waive a hearing and to submit its case upon the record before the Board, as settled pursuant to Rule 15. Submission of a case without hearing does not relieve the parties from the necessity of proving the facts supporting their allegations or defenses. Affidavits, depositions, admissions, answers to interrogatories, and stipulations may be employed to supplement other documentary evidence in the Board record. The Board may permit such submission to be supplemented by oral argument (transcribed if requested) and by briefs in accordance with Rule 24.

Rule 14. *Optional accelerated procedure.*

(a) *Application.* In appeals involving $25,000 or less, either party may elect to have the appeal processed under a shortened and accelerated procedure. The election shall be in writing filed with the Board prior to commencement of hearing or settlement of the record. For application of this rule the amount in controversy will be determined by the sum of the amounts claimed by each party against the other in the appeal proceeding. If no specific amount of claim is stated, a case will be considered to fall within this rule if the sum of the amounts which each party represents in writing that it could recover as a result of a Board decision favorable to it does not exceed $25,000. In addition, this optional accelerated procedure may be employed, at the discretion of the Board and regardless of the amount involved, for other reasons including, but not limited to financial hardship or location of appellant in an area of concentrated unemployment, underemployment, or substantial or persistent labor surplus. An accelerated case shall be processed under this rule unless the other party objects and shows good cause why the substantive nature of the dispute requires processing under the Board's regular procedures and the Board sustains the objection. In cases proceeding under this rule, parties are encouraged, to the extent possible and consistent with adequate presentation of their factual and legal positions, to waive pleadings, discovery, and briefs.

(b) *Decisions.* Written decisions by the Board in cases proceeding under this rule normally will be brief and contain summary findings of fact and conclusions of law only. The Board will endeavor to render its decision within 30 days after the appeal is ready for decision. Decisions will be rendered for the Board by a single Administrative Judge with the concurrence of the Chairman or a designated member. However in cases involving $5,000 or less where there has been a hearing, the single Administrative Judge presiding at the hearing may, in his discretion, at the conclusion of the hearing and after entertaining such oral arguments as he deems appropriate, render on the record oral summary findings of fact, conclusions of law and a decision of the appeal. In the latter instance, the Board will subsequently furnish the parties a typed copy of the oral decision for record and payment purposes and to establish the date from which the period for filing a motion for reconsideration under Rule 30 commences.

(c) *Applicable rules.* Except as modified herein, these rules apply to accelerated cases in all respects.

Rule 15. *The Record of the appeal.*

(a) *Contents.* The record upon which the Board's decision will be rendered consists of the appeal file described in Rule 4 and, to the extent the following items have been filed, pleadings, prehearing conference memoranda or orders, prehearing briefs, depositions and interogatories and answers to interogatories received in evidence, admissions, stipulations, transcripts of conferences and hearings, hearing exhibits, posthearing briefs, and documents which the Board has specifically made a part of the record. The record will at all reasonable times be available for inspection by the parties at the office of the Board.

(b) *Time of closing the record.* Except as the Board may otherwise order in its discretion, no proof shall be received in evidence after completion of the oral hearing of the appeal or, in cases submitted on the record, after notification by the Board that the case is ready for decision.

(c) *Weight of the evidence.* The weight to be attached to any evidence of record will rest within the sound discretion of the Board. The Board may in any case require either party, with appropriate notice to the other party, to submit additional evidence on any matter relevant to the appeal.

Rule 16. *Discovery—Depositions.*

(a) *Definition.* As used in these rules, the term "discovery" shall mean the methods described in this rule and Rule 17 whereby the appellant contractor or the respondent Government may require the other party to disclose the facts, documents, papers, things, and other information within that party's knowledge or possession prior to an oral hearing or a determination on the record.

(b) *General policy and protective orders.* The parties are encouraged to engage in voluntary discovery procedures. In connection with any deposition or other discovery procedure, the Board may make any order which justice requires to protect a party or person from annoyance, embarrassment, oppression, or undue burden or expense, and those orders may include limitations on the scope, methods, time and place for discovery, and provisions for protecting the secrecy of confidential information or documents.

(c) *When depositions permitted.* After an appeal has been docketed and a complaint filed, the parties may mutually agree to, or the Board may, upon application of either party and for good cause shown, order the taking of testimony of any person by deposition upon oral examination or written interrogatories before any officer authorized to administer oaths at the place of examination, for use as evidence or for purposes of discovery. The application for order shall specify whether the purpose of the deposition is discovery or for use as evidence.

(d) *Orders on depositions.* The time, place, and manner of taking depositions shall be as mutually agreed upon by the parties, or failing such agreement, governed by order of the Board.

(e) *Use as evidence.* No testimony taken by deposition shall be considered as part of the evidence in the hearing of an appeal unless and until such testimony is offered and received in evidence at the hearing. Testimony by deposition will not ordinarily be received in evidence if the deponent is present and can testify personally at the hearing. However, the deposition may be used to contradict or impeach the testimony of the witness given at the hearing. In cases submitted on the record, the Board may, in its discretion, receive depositions as evidence to supplement the record.

(f) *Expenses.* Each party shall bear its own expenses associated with discovery, unless, in the discretion of the Board, the expenses shall be apportioned otherwise.

Rule 17. *Interrogatories to parties, admission of facts, production and inspection of documents.*

(a) *General.* The scope and use of interrogatories to parties, admissions of facts and production and inspection of documents shall be controlled by Rule 16.

(b) *Interrogatories to parties.* After an appeal has been filed with the Board, a party may serve on the other party written interrogatories (that is, questions) to be answered separately in writing, signed under oath and returned within 30 days of receipt by the answering party. Upon timely objection by the party, the Board will determine the extent to which the interrogatories will be permitted.

(c) *Admission of facts.* After an appeal has been filed with the Board, a party may serve upon the other party a written request for the admission of specified facts. Copies of documents shall be served with the request unless they have been or are otherwise furnished or made available for inspection and copying. Within 30 days after receipt of the request, the party served shall answer each requested admission of fact or file objections thereto in writing. The factual propositions set out in the request shall be deemed admitted upon the failure of a party to respond to the request for admission within the time specified.

(d) *Production and inspection of documents.* Upon motion of any party showing good cause therefore, and upon notice, the Board may order the other party to produce and permit the inspection or photographing of any specifically identified documents or objects, not privileged, which are shown by the moving party either to be relevant to the subject matter of the appeal or to be reasonably calculated to lead to the discovery of admissible evidence.

HEARINGS

Rule 18. *Time and place of hearing.*

Hearings will ordinarily be held in Washington, D.C., except that upon timely request and for good cause shown, the Board may, in its discretion, set the hearing at another location. Hearings will be scheduled at the discretion of the Board with due consideration to the regular order of appeals and other pertinent factors. At the request of either party and for good cause shown, the Board may, in its discretion, advance a hearing.

Rule 19. *Notice of hearings.*

The parties shall be given at least fifteen (15) days notice of the time and place set for hearings. In scheduling hearings, the Board will give due regard to the desires of the parties and to the requirement for a just and inexpensive determination of appeals without unnecessary delay. Notices of hearing shall be promptly acknowledged by the parties.

Rule 20. *Unexcused absence of a party.*

The unexcused absence of a party at the time and place set for hearing will not be occasion for delay. In the event of such absence, the hearing will proceed and the case will be regarded as submitted by the absent party as provided in Rule 13.

Rule 21. *Nature of hearings.*

Hearings shall be as informal as may be reasonable and appropriate under the circumstances. Appellant and respondent may offer at a hearing on the merits such relevant evidence as they deem appropriate and as would be admissible under the Rules of Evidence for United States Courts and Magistrates, as amended, subject, however, to the sound discretion of the presiding Administrative Judge in supervising the extent and manner of presentation of such evidence. In general, admissibility will be decided on the grounds of relevancy and materiality. Letters or copies thereof, affidavits, or other evidence not ordinarily admissible under the above rules of evidence, may be admitted in the discretion of the presiding Administrative Judge. The weight to be attached to evidence presented in any particular form will be within the discretion of the Board, taking into consideration all the circumstances of the particular case. Stipulations of fact agreed upon by the parties may be used as evidence at the hearing. The parties may stipulate the testimony that would be given by a witness if the witness were present. The Board may in any case require evidence in addition to that offered by the parties.

Rule 22. *Examination of witnesses.*

Witnesses before the Board will be examined orally under oath or affirmation, unless the facts are stipulated, or the Board member shall otherwise order. If the testimony of a witness is not given under oath, the Board shall warn the witness that his statements may be subject to the provisions of Title 18, United States Code, Sections 287 and 1001, and any other provision of law imposing penalties for knowingly making false representations in connection with claims against the United States or in connection with any matter within the jurisdiction of any department or agency thereof.

Rule 23. *Copies of papers.*

When books, records, papers, or documents have been received in evidence, a true copy thereof or of such part thereof as may be

V 42 168 AUG 30 77 UMI

material or relevant may be substituted therefor, during the hearing or at the conclusion thereof.

Rule 24. *Posthearing briefs.*

Posthearing briefs may be submitted upon such terms as may be agreed upon by the parties and the presiding member at the conclusion of the hearing. Ordinarily, they will be simultaneous briefs, exchanged within 30 days after receipt of transcript.

Rule 25. *Transcript of proceeding.*

Testimony and argument at hearings shall be reported verbatim, unless the Board otherwise orders. Transcripts or copies of the proceedings shall be supplied to the parties without cost and to others at such rates as may be fixed by the Board.

Rule 26. *Withdrawal of exhibits.*

After a decision has become final the Board may, on its own motion or upon request and after notice to the other party, in its discretion, direct or permit the withdrawal of original exhibits, or any part thereof, by the party entitled thereto. The substitution of true copies of exhibits or any part thereof may be required by the Board in its discretion as a condition of withdrawal.

REPRESENTATION

Rule 27. *The appellant.*

An individual appellant may appear before the Board in person, a corporation by an officer thereof, a partnership or joint venture by a member thereof, or any of these by an attorney at law admitted to practice before the highest court of the District of Columbia or any state, commonwealth or territory of the United States. An attorney representing an appellant shall file a written notice of appearance with the Board. The Board in its discretion may authorize the appearance of other designated individuals.

Rule 28. *The respondent.*

Government counsel may, in accordance with their authority, represent the interest of the Government before the Board. They shall file notices of appearance with the Board. Whenever at any time it appears that the appellant and Government counsel are in agreement as to disposition of the controversy, the Board may suspend further processing of the appeal. However, if the Board is advised thereafter by either party that the controversy has not been disposed of by agreement, the case shall be restored to the Board's calendar without loss of position.

DECISIONS

Rule 29. *Decisions.*

Decisions of the Board will be rendered in writing, and copies thereof will be forwarded simultaneously to both parties. The rules of the Board and all final orders and decisions shall be open for public inspection at the offices of the Board in Washington, D.C. Decisions of the Board will be made solely upon the record, as described in Rule 15.

Rule 30. *Motion for reconsideration.*

A motion for reconsideration by either party, shall set forth specifically the ground or grounds relied upon to sustain the motion and shall be filed within 30 days from the date of the receipt of a copy of the decision of the Board by the party filing the motion.

DISMISSALS

Rule 31. *Dismissal without prejudice.*

In certain cases, appeals docketed before the Board are required to be placed in a suspense status, and the Board is unable to proceed with disposition thereof for reasons not within the control of the Board. In any case where the suspension has continued, or it appears in the discretion of the Board that it will continue, for a period in excess of one year, the Board may dismiss the appeal from its docket without prejudice to its restoration when the cause of suspension has been removed. Unless either party or the Board acts within three years from the date of dismissal to reinstate any appeal dismissed without prejudice, the dismissal shall automatically be converted to a dismissal with prejudice without further action by the parties or the Board.

Rule 32. *Dismissal for failure to prosecute.*

Whenever a record discloses the failure of either party to file documents required by these rules, respond to notices or correspondence from the Board, comply with orders of the Board, or otherwise indicates an intention not to continue the prosecution or defense of an appeal, the Board may issue an order requiring the offending party to show cause why the appeal should not be either dismissed or granted, as appropriate. If the offending party shall fail to show such cause, the Board may take such action as it deems reasonable and proper under the circumstances.

MISCELLANEOUS

Rule 33. *Ex parte communications with the board.*

Ex parte communications, that is, written or oral communications with the Board by or for one party only without notice to the other, shall not be permitted. No member of the Board or of the Board's staff shall entertain, nor shall any person directly or indirectly involved in an appeal submit to the Board or the Board's staff, off the record, any evidence, explanation, analysis, or advice, whether written or oral, regarding any matter at issue in an appeal. This provision does not apply to consultation among Board members nor to ex parte communications concerning the Board's administrative functions or procedures.

Rule 34. *Sanctions.*

If any party fails or refuses to obey an order issued by the Board, the Board may make such order in regard to the failure as it considers necessary to the just and expeditious conduct of the appeal, including dismissal with prejudice.

Rule 35. *Remand from Court.*

Whenever any matter is remanded to the Board from any court for further proceedings, each of the parties shall, within 20 days of such remand, submit a report to the Board, recommending procedures to be followed in order to comply with the court's order. The Board will review the reports and enter special orders governing the handling of matters remanded to it for further proceedings by any court. To the extent the court's directive and time limitations will permit, such orders will conform to these rules.

Issued at Washington, D.C.

JAY JANIS,
Under Secretary of Housing and Urban Development.

[FR Doc.77-25077 Filed 8-29-77;8:45 am]

Title 29—Labor

SUBTITLE A—OFFICE OF THE SECRETARY OF LABOR

PART 40—FARM LABOR CONTRACTOR REGISTRATION

Issuance by States of Certificates of Registration and Employee Identification Cards

AGENCY: Department of Labor.

ACTION: Final rule.

SUMMARY: The Farm Labor Contractor Registration Act of 1963, as amended, authorizes the Secretary to enter into agreements with Federal and State agencies to utilize their facilities and services, and to delegate to such agencies certain authority, other than rulemaking, as the Secretary deems necessary in carrying out the provisions of the Act. Under that authority, and by this final action, the Secretary is providing the method and procedure for entering into such agreements with any State.

DATES: This final rule is effective September 29, 1977.

FOR FURTHER INFORMATION CONTACT:

Paul E. Myerson, Counsel for Employment Standards, Division of General Legal Services, Office of the Solicitor, Room N-2464, New Department of Labor Building, 200 Constitution Avenue NW., Washington, D.C. 20210, telephone No. 202-523-8244.

SUPPLEMENTAL INFORMATION: The authority conferred by Section 8 of the Farm Labor Contractor Registration Act of 1963, as amended (7 U.S.C. 2047), does not require the issuance of regulations to authorize the Department to enter into agreements with States involving the use of their facilities and services. However, regulations are deemed necessary to inform the various States and the public in general that the Department will consider the execution of such agreements, and to explain the provisions thereof. Accordingly, a proposed regulation was published in the May 13, 1977, FEDERAL REGISTER, 42 FR 24289, which invited comments thereon. The only comment submitted in response to the invitation suggested combining paragraphs (d) and (e) of § 40.43 in the interest of clarity and brevity. This suggestion has been adopted. This document, representing final action on the rule, was prepared under the direction and control of Donald S. Shire, Associate Solicitor for General Legal Services, Office of the Solicitor, Department of Labor.

Accordingly, there is hereby added to 29 CFR Part 40 an amended § 40.41 and a new § 40.43.

1. Section 40.41 is amended to read as follows:

§ 40.41 Office of filing, action.

(a) Each application for a Certificate of Registration or a Farm Labor Contractor Employee Identification Card filed at any of the offices designated in §§ 40.11 and 40.31 respectively shall be transmitted promptly to the appropriate regional office of the Wage and Hour Division, Employment Standards Administration, except as provided in paragraph (b) of this section.

(b) Each application for a Certificate of Registration or a Farm Labor Contractor Employee Identification Card filed in a State authorized to issue such documents on behalf of the Administrator shall be processed by the appropriate State agency. See § 40.43 of this Part.

2. A new § 40.43 is added which reads as follows:

§ 40.43 Issuance of Farm Labor Contractor Certificates of Registration and Farm Labor Contractor Employee Identification Cards by States.

(a) Pursuant to Section 8 of the Act, the Secretary may enter into an agreement with any State authorizing that State to issue Certificates of Registration and Farm Labor Contractor Employee Identification Cards on behalf of the Administrator.

(b) Every agreement entered into pursuant to this Section shall require that Certificates of Registration and Farm Labor Contractor Employee Identification Cards be issued by the State in conformity with the provisions of the Act, and the regulations, interpretations and guidelines issued thereunder.

(c) Any agreement entered into pursuant to this Section shall be terminated, without hearing, after written notice by the Secretary, the Administrator, or the appropriate State official.

(d) Every Certificate of Registration and every Farm Labor Contractor Employee Identification Card, whether issued by a State pursuant to this Section or issued by the Administrator under § 40.42 of this Part, shall be valid in any State.

(e) The Secretary, in accordance with the provisions of this Section, has entered into an agreement with each State listed herein below:

New Jersey.

(f) Every agreement entered into pursuant to this Section is available for public inspection and copying in accordance with 29 CFR Part 70.

Signed at Washington, D.C., on this 25th day of August 1977.

RAY MARSHALL,
Secretary of Labor,
U.S. Department of Labor.

CHAPTER X—NATIONAL MEDIATION BOARD

PART 1208—AVAILABILITY OF INFORMATION

Miscellaneous Amendments

AGENCY: National Mediation Board.

ACTION: Notice of final rulemaking.

SUMMARY: These amendments provide reference to the Chairman, National Mediation Board, for purposes of perfecting an appeal of a denied Freedom of Information Act request. An editorial change has been made to reflect the Board's current mailing address.

The amendments additionally provide revised fee schedules and procedures for the search and duplication of National Mediation Board and National Railroad Adjustment Board records which are available to the public under this part. In essence, the Board has determined that the direct cost of staff searches has increased to $1.80 per quarter-hour for clerical searches and $4.10 per quarter-hour for non-clerical searches. These costs are reflected in the subject regulations, as well as a duplication charge of fifteen cents per copy. No fee shall be charged for producing records pursuant to this part where the total direct cost to the agency is less than $5.00 or under other specified circumstances.

A notice of proposed rulemaking with respect to these amendments was published in the FEDERAL REGISTER on July 13, 1977. No comments were received from the public during the advance comment period which ended August 19, 1977. The final text reflects only minor non-substantive editorial changes from the proposed language.

DATES: The effective date of these regulations is August 29, 1977.

FOR FURTHER INFORMATION CONTACT:

Rowland K. Quinn, Jr., Executive Secretary, National Mediation Board; Tel: 202-523-5920.

SUPPLEMENTARY INFORMATION: The regulations are issued pursuant to the authority of 5 U.S.C. 552(a)(4)(A) and 44 Stat. 577, as amended (45 U.S.C. 151 et seq.).

Dated: August 24, 1977.

ROWLAND K. QUINN, Jr.,
Executive Secretary.

29 CFR 1208.2 and 29 CFR 1208.6 are hereby amended to read as follows:

§ 1208.2 Production or disclosure of material or information.

(a) *Requests for identifiable records and copies.* (1) All requests for National Mediation Board records shall be filed in writing by mailing the request or delivering it to the Executive Secretary, National Mediation Board, Washington, D.C. 20572, except that requests for records of the National Railroad Adjustment Board shall be in writing and addressed to the Administrative Officer, National Railroad Adjustment Board, 220 South State Street, Chicago, Illinois 60604.

(2) The request shall reasonably describe the records being sought in a manner which permits identification and location of the records.

(i) If the description is insufficient to locate the records, the National Mediation Board will so notify the person making the request and indicate the additional information needed to identify the records requested.

(ii) Every reasonable effort shall be made by the Board to assist in the identification and location of the records sought.

(3) Upon receipt of a request for records the Executive Secretary shall maintain records in reference thereto which shall include the date and time received, the name and address of the requester, the nature of the records requested, the action taken, the date the determination letter is sent to the requester, appeals and action thereon, the date any records are subsequently furnished, the number of staff hours and grade levels of persons who spent time responding to the request and the payment requested and received.

(4) All time limitations established pursuant to this section with respect to processing initial requests and appeals shall commence at the time a written request for records is received at the Board's offices in Washington, D.C., except for requests directed to the National Railroad Adjustment Board pursuant to § 1208.2(a)(1) in which case the time limit shall commence when the request is received at the NRAB's office in Chicago.

(i) An oral request for records shall not begin any time requirement.

(b) *Processing the Initial Request.* (1) Time limitations. Within 10 working days (excepting Saturdays, Sundays, and working holidays) after a request for records is received, the Executive Secretary shall determine and inform the requester by letter whether or the extent to which the request will be complied with, unless an extension is taken under paragraph (b)(3) of this section.

(2) Such reply letter shall include:

(i) A reference to the specific exemption or exemptions under the Freedom of Information Act authorizing the withholding of the record, a brief explanation of how the exemption applies to the record withheld.

(ii) The name or names and positions of the person or persons, other than the Executive Secretary, responsible for the denial.

(iii) A statement that the denial may be appealed within thirty days by writing to the Chairman, National Mediation Board, Washington, D.C. 20572, and that judicial review will thereafter be available in the district in which the requester resides, or has his principal place of business, or the district in which the agency records are situated, or the District of Columbia.

(3) Extension of time. In unusual circumstances as specified in this paragraph, the Executive Secretary may extend the time for initial determination on requests up to a total of ten days (excluding Saurdays, Sundays, and legal public holidays). Extensions shall be granted in increments of five days or less and shall be made by written notice to the requester which sets forth the reason for the extension and the date on which a determination is expected to be dispatched. As used in this paragraph "unusual circumstances" means, but only to the extent necessary to the proper processing of the request:

(i) The need to search for and collect the requested records from field facilities or other establishments that are separate from the office processing the request;

(ii) The need to search for, collect, and appropriately examine a voluminous amount of separate and distinct records which are demanded in a single request; or

(iii) The need for consultation, which shall be conducted with all practicable speed, with another agency or another division having substantial interest in the determination of the request, or the need for consultation among components

V 42 168 AUG 30 77 UMI

of the agency having substantial subject matter interest therein.

(4) Treatment of delay as a denial. If no determination has been dispatched at the end of the ten-day period, or the last extension thereof, the requester may deem his request denied, and exercise a right of appeal, in accordance with § 1208.2c. When no determination can be dispatched within the applicable time limit, the responsible official shall nevertheless continue to process the request; on expiration of the time limit he shall inform the requester of the reason for the delay, of the date on which a determination may be expected to be dispatched, and of his right to treat the delay as a denial and to appeal to the Chairman of the Board in accordance with § 1208.2(c) and he may ask the requester to forego appeal until a determination is made.

(c) *Appeals to the Chairman of the Board.* (1) When a request for records has been denied in whole or in part by the Executive Secretary or other person authorized to deny requests, the requester may, within thirty days of its receipt, appeal the denial to the Chairman of the Board. Appeals to the Chairman shall be in writing, addressed to the Chairman, National Mediation Board, Washington, D.C. 20572.

(2) The Chairman of the Board will act upon the appeal within twenty working days (excluding Saturdays, Sundays and legal public holidays) of its receipt unless an extension is made under paragraph (c)(3) of this section.

(3) In unusual circumstances as specified in this paragraph, the time for action on an appeal may be extended up to ten days (excluding Saturdays, Sundays and legal public holidays) minus any extension granted at the initial request level pursuant to § 1208.2(b)(3). Such extension shall be made by written notice to the requester which sets forth the reason for the extension and the date on which a determination is expected to be dispatched. As used in this paragraph "unusual circumstances" means, but only to the extent necessary to the proper processing of the appeal:

(i) The need to search for and collect the requested records from field facilities or other establishments that are separate from the office processing the request;

(ii) The need to search for, collect, and appropriately examine a voluminous amount of separate and distinct records which are demanded in a single request; or

(iii) The need for consultation, which shall be conducted with all practicable speed, with another agency or another division having substantial interest in the determination of the request or the need for consultation among components of the agency having substantial subject matter interest therein.

(4) Treatment of delay as a denial. If no determination on the appeal has been dispatched at the end of the twenty-day period or the last extension thereof, the requester is deemed to have exhausted his administrative remedies, giving rise to a right of review in a district court of the United States as specified in 5 U.S.C. 552(a)(4). When no determination can be dispatched within the applicable time limit, the appeal will nevertheless continue to be processed; on expiration of the time limit the requester shall be informed of the reason for the delay, of the date on which a determination may be expected to be dispatched, and of his right to seek judicial review in the United States district court in the district in which he resides or has his principal place of business, the district in which the Board records are situated or the District of Columbia. The requester may be asked to forego judicial review until determination of the appeal.

(d) *Indexes of Certain Records.* (1) The National Mediation Board at its office in Washington, D.C. will maintain, make available for public inspection and copying, and publish quarterly (unless the Board determines by order published in the FEDERAL REGISTER that such publication would be unnecessary or impracticable) a current index of the materials available at the Board offices which are required to be indexed by 5 U.S.C. 552(a)(2).

(i) A copy of such index shall be available at cost from the National Mediation Board, Washington, D.C. 20572.

(2) The National Railroad Adjustment Board at its offices in Chicago, Illinois will maintain, make available for public inspection and copying, and publish quarterly (unless the Board determines by order published in the FEDERAL REGISTER that such publication would be unnecessary or impracticable) a current index of the materials available at the Board offices which are required to be indexed by 5 U.S.C. 552(a)(2).

§ 1208.6 Fees—duplication costs and search.

(a)(1) Unless waived in accordance with the provisions of § 1208.62, the following fees shall be imposed for the reproduction of any record disclosed pursuant to this part.

(i) *Copying of records.* Fifteen cents per copy of each page.

(ii) *Copying of microfilm.* Fifty cents per microfilm frame.

(iii) *Clerical searches.* $1.80 for each one quarter hour spent by clerical personnel searching for and producing a requested record, including time spent copying any record.

(iv) *Non-clerical searches.* $4.10 for each one quarter hour spent by professional or managerial personnel searching for and producing a requested record, including time spent copying any record.

(v) *Certification or authentication of records.* $1.00 per certification or authentication.

(vi) *Forwarding material to destination.* Postage, insurance and special fees will be charged on an actual cost basis.

(2)(i) No charge shall be assessed for time spent in resolving legal or policy questions relating to the documents or in examining records for the purpose of deleting nondisclosable portions thereof.

(ii) No charge shall be assessed for time spent in monitoring an individual who examines documents at the Board's offices.

(3) Payment shall be made by check or money order payable to "United States Treasury."

(b)(1) No fee shall be charged for disclosure of records pursuant to this part where:

(i) The cost of providing the records is less than $5.00.

(ii) The records are requested by a congressional committee or subcommittee, a Federal court, a Federal department or agency, or the General Accounting Office.

(2)(i) The Executive Secretary may waive payment of fees, in whole or in part, when he determines that the person making the request is indigent.

(ii) A person seeking such a determination shall petition the Executive Secretary in writing stating the reasons therefore.

(iii) Determinations made pursuant to this provision will be made within the discretion of the agency.

(3)(i) The Executive Secretary may reduce or waive payment of fees in whole or in part when he determines that such reduction or waiver is in the public interest because furnishing the information can be considered as primarily benefiting the general public.

(ii) Determinations pursuant to this provision shall be made within the discretion of the agency.

(4) No fee shall be charged if a record requested is not found or for any record that is determined to be totally exempt from disclosure.

CHAPTER XVII—OCCUPATIONAL SAFETY AND HEALTH ADMINISTRATION, DEPARTMENT OF LABOR

PART 1952—APPROVED STATE PLANS FOR ENFORCEMENT OF STATE STANDARDS

Approval of the Puerto Rico Plan

AGENCY: Occupational Safety and Health Administration, Department of Labor.

ACTION: Final rule.

SUMMARY: The Puerto Rico plan for Occupational Safety and Health is hereby approved as a developmental plan under Section 18(c) of the Occupational Safety and Health Act of 1970. Under the approved plan, the Commonwealth of Puerto Rico will assume responsibility for the development and enforcement of occupational safety and health standards, with the exception of certain maritime issues, throughout the jurisdiction, with Federal enforcement continuing to the degree necessary to assure occupational safety and health protection to all employees in the Commonwealth.

EFFECTIVE DATE: August 15, 1977.

FOR FURTHER INFORMATION CONTACT:

Mabel Stanton, Project Officer, U.S. Department of Labor, Occupational Safety and Health Administration, 200

Constitution Avenue NW., Room N-3112, Washington, D.C. 20210.

A copy of the plan may be inspected and copied during normal business hours at the following locations: Office of the Director, Federal Compliance and State Programs, Room N-3112, 200 Constitution Avenue NW., Washington, D.C. 20210; Office of the Regional Administrator, Occupational Safety and Health Administration, Room 3445, 1515 Broadway (1 Astor Plaza), New York, N.Y. 10036; Department of Labor, Occupational Safety and Health Office, 414 Barbosa Avenue, Sixth Floor, Hato Rey, Puerto Rico 00917.

SUPPLEMENTARY INFORMATION:

BACKGROUND

Section 18 of the Occupational Safety and Health Act of 1970 (29 U.S.C. 667, hereinafter referred to as the Act), provides that a State (under section 4(a) of the Act, Puerto Rico is defined as a State) which desires to assume responsibility for the development and enforcement of occupational safety and health standards shall submit a plan to the Assistant Secretary of Labor for Occupational Safety and Health (hereinafter referred to as the Assistant Secretary) describing in detail the proposed program. The Assistant Secretary will evaluate the proposed plan to determine whether it meets the criteria of the Act and the implementing regulations at 29 CFR 1902. The criteria generally require that a State plan must provide for occupational safety and health standards, and the enforcement of those standards, as least as effective as Federal occupational safety and health standards and enforcement.

The Commonwealth of Puerto Rico submitted a plan on February 25, 1977. After review by the Regional and National Offices of the Department of Labor, notice was published in the FEDERAL REGISTER of the submission of the Puerto Rico plan and its availability for public comment (June 7, 1977, 42 FR 29024).

ISSUES

The Puerto Rico Occupational Safety and Health Act is similar to the Federal Act and few issues were raised by either Regional or National Office review. However, the Puerto Rico Act does contain certain provisions which differ from the Federal. Among these are the administrative review of citations, abatement requirements, and proposed penalties, which is conducted by a Hearing Examiner appointed by the Puerto Rico Secretary of Labor. This differs from the comparable Federal provision which establishes a review commission, independent from the Assistant Secretary, to hear all contested cases, with appeal from the Review Commission directly to the U.S. Courts of Appeal.

An intra-agency review process has been approved in several State plans, including South Carolina (37 FR 25923), Maryland (38 FR 17837), and the Virgin Islands (38 FR 24896), with the requirement that investigative and prosecuting functions be clearly separated from the adjudicatory functions, and the Puerto Rico procedures are essentially identical to those approved in these States. Therefore the use of an agency administrative review process does not preclude initial plan approval, but the actual operation of the procedure will be carefully evaluated.

Further, the Puerto Rico Act provides an additional requirement that the owner of premises used as a place of employment comply with all occupational safety and health standards with respect to the parts of the premises under his control and not under the control of an employer, and a separate 15 day contest period for the citation and the notice of proposed penalties, rather than a single contest period which begins after the employer's receipt of the notice of proposed penalty, as in the Federal program.

Although the Federal Act contains no provision placing a compliance obligation on the owner of premises used for employment, it was determined that this provision could make the Puerto Rico Act more effective than the Federal. Further, since the fifteen day review period for contest under the Federal Act does not begin to run until after the receipt by the employer of the notice of proposed penalty, which occurs concurrent with, or shortly after the receipt of the citation, the dual time period provided by the Puerto Rico Act, will, in actual operation, operate essentially the same as the Federal provision, with the exception that employers in some cases could not wait for the notice of proposed penalty to exercise their contest rights to the citation. Therefore, it was determined that these differences do not preclude approval.

PUBLIC COMMENTS

In response to the June 7, 1977, notice, AIRCO, Inc., of Montrale, N.J., objected to the lack of an independent review commission, expressed concern over the use of two languages in Puerto Rico, and suggested that compliance materials and activities, as well as any notices, be in English. The Puerto Rico review system is discussed above. In addition, under the plan as approved, all significant materials, including the regulations, standards, Field Operations Manual and citations, will be available in both English and Spanish, which should alleviate AIRCO's concern.

The Puerto Rico Legal Services Unit also submitted comments objecting to the lack of an independent review commission and objected to the lack of a State advisory committee. In addition, they raised questions concerning public accessibility to hearings, pleadings and decisions of the hearing examiner and the Puerto Rico Secretary of Labor.

However, since no State has been required to have a State advisory committee as neither the Federal Act, nor the regulations require such a provision, and since Puerto Rico has provided assurances that it will adopt Federal standards and regulations essentially identical to 29 CFR Part 2200, which provide for public accessibility to review procedures and pleadings, and given assurance that all proceedings will be open to the public, these objections also do not preclude approval.

DECISION

After careful consideration, the Puerto Rico plan is hereby approved under section 18 of the Act and 29 CFR Part 1902.

The decision incorporates requirements of the Act and implementing regulations applicable to State plans generally. It also incorporates our intention as to continued Federal enforcement of Federal standards in areas covered by the plan and the State's developmental schedule as set out below. In addition, it incorporates our intention to continue to apply a sliding scale for "as effective as" evaluations which will require the State to continue to keep pace with improvements in all aspects of the Federal program. See 29 CFR 1902.3(d)(1), 1902.32 et seq. (40 FR 54780–86).

Pursuant to 29 CFR 1902.20(b)(1)(iii), the present level of Federal enforcement will not be diminished until the Puerto Rico plan has been determined to be operational under 29 CFR 1954.3. Thereafter, Federal enforcement activity will continue to be exercised to the degree necessary to assure occupational safety and health protection to employees in the Commonwealth of Puerto Rico.

Part 1952 is amended by adding a new Subpart FF, effective August 15, 1977, reading as follows:

Subpart FF—Fuerto Rico

Sec.
1952.380 Description of the plan.
1952.381 Where the plan may be inspected.
1952.382 Level of Federal enforcement.
1952.383 Developmental schedule.

AUTHORITY: Sec. 18, Pub. L. 91–596, 84 Stat. 1608; 29 U.S.C. 667.

Subpart FF—Puerto Rico

§ 1952.380 Description of the plan.

(a) The plan designates the Puerto Rico Department of Labor and Human Resources as the agency responsible for the administration and enforcement of the plan throughout the Commonwealth. This includes the responsibility for administration of a public employee program for which the same enforcement provisions and procedures used for the private sector will apply, with the exception of penalties. Penalties in the Commonwealth's Act for the private sector are essentially identical to those in the Federal Act, and Puerto Rico intends to adopt all Federal standards. The Commonwealth will exclude from coverage all industries included within the classifications of Marine Cargo Handling (SIC 4463) and Shipbuilding and Repairing (SIC 3713), but will adopt and enforce standards for boilers and elevators and other issues where no Federal OSHA standards exist. The plan provides that program personnel will be employed under a merit system and provides for a Management Information System. It also provides procedures for the development and promulgation of standards and procedures for the prompt restraint or elimination of imminent danger situations.

V 42168 AUG 30 77 7 UMI

(b) The Puerto Rico Occupational Safety and Health Act was enacted on July 7, 1975, and approved by the Governor on August 5, 1975. It is similar in most respect to the Federal Act. The Puerto Rico Act provides employers the right of administrative review of citations, abatement requirements, and proposed penalties, and employee review of abatement dates, by a hearing examiner appointed by the Puerto Rico Secretary of Labor. The decision by the Secretary may be appealed by the employer or employees to the civil courts. The plan contains a statement of support by the Governor and an opinion by the Secretary of Justice that the Act is consistent with the State's Law and Constitution. Federal procedural regulations will be incorporated into the Commonwealth's regulations and the Federal Compliance Manual will be adopted to fit Puerto Rico's Law. In addition, the Puerto Rico Act requires that a Spanish language version of OSHA standards be made available within three years of plan approval.

(c) The Puerto Rico Act provides for, among other things, inspections in response to employee complaints; an opportunity for employer and employee representatives to accompany inspectors in order to aid inspections, notification of employees or their representatives when no compliance action is taken as a result of a complaint; notification of employees of their protections and obligations; protection for employees against discharge or discrimination in terms and conditions of employment; adequate safeguards to protect trade secrets; sanctions against employers for violations of standards and orders; and review of citations by a hearing examiner, with appeal to the Secretary of Labor and the Commonwealth's courts.

(d) The plan also proposes a program of voluntary compliance by employers and employees, including a provision for on-site consultation.

(e) The Puerto Rico Plan includes the following documents as of the date of approval:

(1) The plan description documents, in two volumes.

(2) A copy of the enabling legislation as enacted on July 7, 1975, and signed by the Governor on August 5, 1975.

(3) An assurance of separability of the enforcement personnel from the hearing examiner.

(4) A letter of assurance of the authenticity of the English version of the Puerto Rico OSHA Act from John Cinque Sacarello, Assistant Secretary for Occupational Safety and Health, Puerto Rico Department of Labor, dated December 4, 1975.

§ 1952.381 Where the plan may be inspected.

A copy of the plan may be inspected and copied during normal business hours at the following locations: Office of the Director, Federal Compliance and State Programs, Room N-3112, 200 Constitution Avenue NW., Washington, D.C. 20210; Office of the Regional Administrator, Occupational Safety and Health Administration, Room 3445, 1515 Broadway (1 Astor Plaza), New York, N.Y. 10036; Department of Labor, Occupational Safety and Health Office, 414 Barbosa Avenue, Sixth Floor, Hato Rey, Puerto Rico 00917.

§ 1952.382 Level of Federal enforcement.

Pursuant to § 1902.20(b)(1)(iii) of this chapter, the present level of Federal enforcement in Puerto Rico will continue to be exercised to the degree necessary to assure occupational safety and health protection to employees in Puerto Rico.

§ 1952.383 Developmental schedule.

The Puerto Rico State plan is developmental. The following is the developmental schedule as provided by the plan:

(a) Translation of position description for State plan personnel by December 1978;

(b) Public Information Program (private sector), one month after plan approval;

(c) Analysis for inspection scheduling (private sector), one month after plan approval;

(d) Submit administrative regulations, two weeks after plan approval;

(e) Affirmative action plan by 1978;

(f) File and promulgate standards, one month after plan approval;

(g) Adopt the Field Operations Manual, one month after plan approval;

(h) Adopt Management Information System, upon plan approval;

(i) Internal training schedule, three months after plan approval;

(j) Employer, employee training schedule, six to twelve months after plan approval;

(k) Public information program (Government sector), six months after plan approval;

(l) Analysis for inspection scheduling (Government sector), seven months after plan approval;

(m) Implementation of public employee program, eight months after plan approval.

Signed at Washington, D.C., this 15th day of August 1977.

EULA BINGHAM,
Assistant Secretary of Labor.

Title 42—Public Health

CHAPTER I—PUBLIC HEALTH SERVICE, DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

PART 57—GRANTS FOR CONSTRUCTION OF HEALTH RESEARCH FACILITIES (INCLUDING MENTAL RETARDATION RESEARCH FACILITIES), TEACHING FACILITIES, STUDENT LOANS, EDUCATIONAL IMPROVEMENT AND SCHOLARSHIPS

Programs for Training of Physician Assistants

AGENCY: Public Health Service, HEW.

ACTION: Interim-final regulations.

SUMMARY: These regulations prescribe requirements for programs for the training of physician assistants pursuant to section 701(7)(B) of the Public Health Service Act (42 U.S.C. 292a(7)(B)), as amended by the Health Professions Educational Assistance Act of 1976 (Pub. L. 94-484). These requirements apply to all programs for the training of physician assistants supported under Title VII of the Public Health Service Act.

DATES: These regulations are effective immediately. As discussed below, comments on the regulations are invited. Comments must be received on or before October 31, 1977, in order to be considered.

ADDRESSES: Written comments preferably in triplicate, should be addressed to the Director, Bureau of Health Manpower, Health Resources Administration, 3700 East-West Highway, Center Building, 4th Floor, Hyattsville, Md. 20782. All comments received will be available for public inspection and copying at the Office of Program Operations, Bureau of Health Manpower, at the above address, weekdays (Federal holidays excepted) between the hours of 8:30 a.m. and 5 p.m.

FOR FURTHER INFORMATION CONTACT:

Dr. Daniel N. Masica, Deputy Director, Division of Medicine, Bureau of Health Manpower, Room 4-44, at the above address. Telephone: 301-436-6424.

SUPPLEMENTARY INFORMATION: The Assistant Secretary for Health, Department of Health, Education, and Welfare, with the approval of the Secretary of Health, Education, and Welfare, hereby deletes 42 CFR Part 57, Subpart I, entitled "Grants for Construction of Teaching Facilities for Allied Health Professions Personnel"[1] and substitutes therefor a new Subpart I, as set forth below, entitled "Programs for the Training of Physician Assistants."

The purpose of this new subpart is to comply with the requirement in section 701(7)(B) of the Public Health Service Act (42 U.S.C. 292a (7) (B)) that the Secretary, after consultation with appropriate professional organizations, prescribe regulations for programs for the training of physician assistants. The statute provides that the regulations, at a minimum, must require programs for the training of physician assistants to (1) extend for at least one academic year and consist of supervised clinical practice, and at least four months (in the aggregate) of classroom instruction directed toward preparing students to deliver health care and (2) have an enrollment of not less than eight students.

A notice of intent to issue regulations for programs for the training of physician assistants was published in the FEDERAL REGISTER on March 22, 1977 (42 FR 15433). Interested persons were invited to comment on the issues raised by the statutory provisions, and approximately 20 comments were received. The Department has taken these comments into consideration in developing the regulations set forth below. In addition, the Department has consulted with representatives of the American Academy of Physician's Assistants, the Association of Physician's Assistant Programs, the National Commission on Certification of Physician's Assistants, the American Medical Association, and the Association of American Medical Colleges.

The following is a brief summary of the major features of the regulations

1. The regulations in this subpart will apply to all programs for the training of physician assistants supported under title VII of the Public Health Service Act. Consequently, physician assistant training programs supported in the current fiscal year under section 774(a) of the Public Health Service Act (42 U.S.C. 295-4(a)), and programs to be supported beginning in fiscal year 1978 under section 783(a)(1) of the Act, as added by Pub. L. 94-484, must comply with the requirements in this subpart. Section 774(a) authorizes grants and contracts for Health Manpower Education Initiative Projects, while section 783(a)(1), (42 U.S.C. 295g-3(a)(1)), authorizes grants beginning in fiscal year 1978 for projects to plan, develop, and operate or maintain programs for the training of physician assistants, as defined in section 701(7). Programs for the training of physician assistants receiving grants under section 774(a) are also subject to the regulations in 42 CFR Part 57, Subpart AA, pertaining to grants for Health Manpower Education Initiative Projects. The Department is currently developing proposed regulations governing the award of grants under section 783(a)(1) of the Act to be published in the FEDERAL REGISTER at the earliest possible date.

2. The regulations in this subpart require programs for the training of physician assistants, for purposes of Title VII of the Act, to be programs which train assistants to the primary care physician. It is the Secretary's view that this policy is consistent with the concern of Congress, as expressed in the findings and declaration of policy as well as the legislative history of Pub. L. 94-484, for the availability of adequate numbers of qualified health professions personnel to deliver primary care in the United States.

3. In addition to the other requirements in this subpart, a program for the training of physician assistants must (1) be accredited by the American Medical Association's Committee on Allied Health Education and Accreditation as a program for the Assistant to the Primary Care Physician, or (2) have received a Letter of Support from the Joint Review Committee on Educational Programs for Physician's Assistants for its plans for such a program.

4. The regulations require programs for the training of physician assistants to develop and use (1) methods designed to encourage graduates of the program to work in health manpower shortage areas and (2) methods for placing graduates in positions for which they have been trained in health manpower shortage areas. The purpose of these requirements is to implement both the Department's priorities and the intent of Congress with respect to alleviating the geographic maldistribution of health professions personnel engaged in the delivery of primary care.

Although the Department was unable to prescribe regulations for programs for the training of physician assistants within 180 days after the date of enactment of the statutory provision (Oct. 12, 1976), as required by section 701(7)(B) of the Act, the Department wishes to be as responsive as possible to the desire of Congress for the timely promulgation of these regulations. In addition, issuance of these regulations is necessary in order to make them applicable to grants for programs for the training of physician assistants under section 774(a) of the Act which must be awarded prior to the close of fiscal year 1977. For these reasons, the Secretary has determined pursuant to 5 U.S.C. 553 and Department policy that it would be impracticable and contrary to the public interest to follow proposed rulemaking procedures or to delay the effective date of these regulations.

Notwithstanding the omission of proposed rulemaking procedures, interested persons are invited to submit written comments, data, views, and arguments relating to these regulations to the Director of the Bureau of Health Manpower at the address given above. All relevant material received on or before October 31, 1977, will be considered, and following the close of the comment period the regulations will be revised as warranted by the public comments received. It is intended that any such revision will be published within 90 days of the close of the comment period.

The regulations as set forth below will be applicable and effective on August 30, 1977. Revisions thereto, although applicable to grants for physicians assistant training programs awarded after publication of these regulations, will be applicable only with respect to activities conducted under such grants on or after the date that the revisions become effective.

NOTE.—The Department of Health, Education, and Welfare has determined that this document does not contain a major proposal requiring preparation of an Inflation Impact Statement Under Executive Order 11821 and OMB Circular A-107.

Accordingly, the existing Subpart I of 42 CFR Part 57 is deleted, and a new Subpart I is added to 42 CFR Part 57 and is adopted as set forth below.

Dated: August 16, 1977.

JULIUS B. RICHMOND,
Assistant Secretary for Health.

Approved: August 19, 1977.

HALE CHAMPION,
Acting Secretary.

Subpart I—Programs for the Training of Physician Assistants

Sec.
57.801 Purpose and scope.
57.802 Definitions.
57.803 Requirements.

AUTHORITY: Sec. 215, 58 Stat. 690, as amended, 63 Stat. 35 (42 U.S.C. 216); sec. 701(7)(B), 90 Stat. 2247 (42 U.S.C. 292a(7)(B)).

Subpart I—Programs for the Training of Physician Assistants

§ 57.801 Purpose and scope.

(a) Section 701(7)(B) of the Public Health Service Act (42 U.S.C. 292a(7)(B)) requires the Secretary to prescribe regulations for programs for the training of physician assistants. The purpose of this subpart is to comply with this requirement.

(b) The regulations in this subpart are applicable to all programs for the training of physician assistants supported under Title VII of the Public Health Service Act.

[1] The authority for making grants for construction of teaching facilities for allied health professions personnel (sec. 791, Public Health Service Act, 80 Stat. 1226, 42 U.S.C. 295h) has expired. Therefore, the regulations governing the award of such grants are deleted from the Code of Federal Regulations.

V42168 AUG 30 77 UMI

§ 57.802 Definitions.

For purposes of this subpart:

(a) "Academic year" means the approximately 9–12 month period of time during which the program is in session.

(b) "Full-time student" means a student who is enrolled in a program and pursuing a course of study which constitutes a full-time academic workload, as determined by the program, and which leads to a degree, diploma, or certificate of completion.

(c) "Health manpower shortage area" means (1) an area designated under section 332 of the Public Health Service Act or (2) prior to the designation of areas under section 332 of the Public Health Service Act, an area designated as a critical health manpower shortage area under section 329(b) of the Public Health Service Act, as in effect on September 30, 1977.

(d) "Medical director" means the individual responsible for providing competent medical direction of the program.

(e) "Physician assistant" means an individual who is qualified by academic and clinical training to provide primary care patient services under the supervision and responsibility of a doctor of medicine or osteopathy. At a minimum, the physician assistant is competent to:

(1) Do the initial and follow-up evaluation of a patient of any age group in any setting to elicit a detailed and accurate history, perform an appropriate physicial examination, and record and present pertinent data, including interpretive recommendations, in a manner meaningful to the physician;

(2) Perform or assist in the performance of routine laboratory and related studies as appropriate for a specific practice setting, such as blood studies, urinalyses, and electrocardiographic tracings;

(3) Perform routine therapeutic procedures such as injections, immunizations, and the assessment, suturing, and care of wounds;

(4) Instruct and counsel patients regarding physical and mental health, including matters such as nutrition, illness, treatment, normal growth and development, and age, sex, or lifestyle risk factors;

(5) Perform the following functions in a hospital setting: patient work-ups, making patient rounds, recording patient progress notes, accurately and appropriately transcribing or executing standing orders and other specific orders at the direction of the supervising physician, and compiling and recording detailed progress reports and narrative case summaries;

(6) Deliver or assist in the delivery of services, including the review and monitoring of treatment and therapy plans, to patients requiring initial or continuing care in settings other than a hospital, such as the home, nursing homes, and extending care facilities;

(7) Evaluate and treat life-threatening emergency situations; and

(8) Interact with those community health services and other community resources which will facilitate the patient's care and continuity of care.

(f) "Primary care" means health care which may be initiated by the patient or the provider, or both, in a variety of settings, and which consists of a broad range of personal health care services including promotion and maintenance of health, prevention of illness and disability, basic care during acute and chronic phases of illness, guidance and counseling of individuals and families, and referral to other health care providers and community resources when appropriate. In providing such services (1) The physical, emotional, social, and economic status of the patient is considered in the context of his or her cultural and environmental background, including the family and community, and (2) the patient is provided timely access to the health care system.

(g) "Supervised clinical practice" means direct participation in patient care by observation, examination, and performance of procedures as are appropriate for the assigned role of the student for the purposes of instruction, under the guidance and responsibility of a physician who holds a full and unrestricted license in the State in which the program is located.

§ 57.803 Requirements.

A program for the training of physician assistants must:

(a) (1) Be accredited by the American Medical Association's Committee on Allied Health Education and Accreditation as a program for the Assistant to the Primary Care Physician; or

(2) Have received a Letter of Support from the Joint Review Committee on Educational Programs for Physician's Assistants for its plans for a program for the Assistant to the Primary Care Physician:

(b) Have a medical director who is licensed to practice medicine or osteopathy in the State in which the program is located (or any State, if the program is conducted by a federal health facility) and who is experienced in the delivery of the type of health care services for which the program provides training;

(c) Have an enrollment of not less than eight full-time students in each class;

(d) Be a minimum of one academic year in length;

(e) Consist of supervised clinical practice and at least four months (in the aggregate) of classroom instruction;

(f) Develop and use methods designed to encourage graduates of the program to work in health manpower shortage areas, such as periods of supervised clinical practice in those areas;

(g) Develop and use methods for placing graduates in positions for which they have been trained, including methods for placing graduates in such positions in health manpower shortage areas and, to the extent possible, in the State in which the program is located;

(h) Develop and use a method for evaluating the effectiveness of the program in training physician assistants, including:

(1) Evaluation by faculty and students of the program in relation to its objectives,

(2) Evaluation of student performance in classroom instruction and supervised clinical practice, and

(3) Evaluation of the number of graduates employed and the characteristics of their employment, such as geographical location, setting, and functions performed; and

(i) Award a degree, diploma, or certificate of completion to individuals who have successfully completed the program.

Title 46—Shipping

CHAPTER II—MARITIME ADMINISTRATION, DEPARTMENT OF COMMERCE

SUBCHAPTER K—REGULATIONS UNDER PUBLIC LAW 91-469

[G.O. 109, Rev., Amdt. 6]

PART 390—CAPITAL CONSTRUCTION FUND

Updating of Regulations

AGENCY: Maritime Administration, Department of Commerce.

ACTION: Final Rule.

SUMMARY: The appendices to the capital construction fund regulations contain sample documents used in the administration of the program. Since adoption of the regulations in 1976, changes have been made in the existing documents used and a new supplementary document has been developed. This document updates two of the appendices to reflect the current agency documents used in the program.

EFFECTIVE DATE: August 30, 1977.

FOR FURTHER INFORMATION CONTACT:

Edward Uttridge, Department of Commerce, Maritime Administration, Washington, D.C. 20230, (202–377–4400).

SUPPLEMENTARY INFORMATION: The purpose of this action is to update two of the appendices to 46 CFR Part 390, the regulations which govern the administration of the Maritime Administration's CCF Program. Since adoption of the regulations in early 1976, changes have been made in the existing CCF documents and a new supplementary document has been developed.

To reflect these developments, the existing Appendices II and IV must be amended. Appendix II is amended by replacing the outdated sample CCF Agreement with the sample agreement presently in use. Appendix IV is amended to include the sample addendum to CCF agreements that is currently used. Prior to this amendment, Appendix IV was merely reserved and, consequently, included no sample addendum.

These amendments are being adopted without notice and opportunity for public comment because the CCF program

is exempted from the requirements of 5 USC 553. Furthermore, although it is the practice of the Maritime Administration to comply with such requirements on its own initiative, it has been determined that it is unnecessary to do so in this instance because these amendments are merely for informational purposes and do not involve changes in the substantive regulations. For these same reasons, it has also been determined that these amendments will be effective immediately.

Accordingly, Appendix II and Appendix IV of 46 CFR Part 390 are hereby amended as follows:

1. Amend Appendix II—Sample Capital Construction Fund Agreement, to read as follows:

APPENDIX II—SAMPLE CAPITAL CONSTRUCTION FUND AGREEMENT

[Contract No. MA/CCF—]

CAPITAL CONSTRUCTION FUND AGREEMENT WITH

This Capital Construction Fund Agreement ("Agreement"), made on the date hereinafter set forth, by and between the United States of America, represented by the Assistant Secretary of Commerce for Maritime Affairs ("Assistant Secretary"), and_____, a corporation organized and existing under the laws of the State of _____ ("Party"), a citizen of the United States of America.

Whereas: 1. The Party has applied for the establishment of a Capital Construction Fund ("Fund") under section 607 of the Merchant Marine Act, 1936, as amended ("Act");

2. The Party is the owner or lessee or has contracted for the construction of one or more eligible vessels as defined in section 607(k) of the Act, which vessels are listed in Schedule A hereof;

3. The Party has a program for the construction or acquisition of qualified agreement vessels as defined in section 607(k) of the Act, which program is described in Schedule B hereof;

4. The Assistant Secretary and the Party desire to enter into an Agreement for the purpose of providing replacement vessels, additional vessels, or reconstruction vessels, built in the United States and documented under the laws of the United States for operation in the United States foreign, Great Lakes, or noncontiguous domestic trade:

5. The Assistant Secretary has determined that the Party qualifies for an Agreement under the Act; and

6. The Assistant Secretary has authorized the award of an Agreement upon the terms and conditions set forth herein subject to the Act, as it may be amended from time to time, and such rules and regulations as shall be prescribed by the Secretary of Commerce or his delegate, either alone or jointly with the Secretary of the Treasury, as necessary to carry out the powers, duties, and functions vested in them by the Act ("rules and regulations").

Now, therefore, in consideration of the premises the Assistant Secretary and the Party hereby agree as follows:

1. *Establishment of a Fund:* (A) A fund is hereby established for the purposes set forth in Article 2 hereof, pursuant to such terms and conditions as shall be prescribed in this Agreement, the Act, or the rules and regulations.

(B) The Fund shall be established in the depositories listed in Schedule C hereof.

2. *Purpose of the Fund:* The Fund established hereunder shall be utilized to provide for replacement vessels, additional vessels, or reconstructed vessels, built in the United States and documented under the laws of the United States for operation in the United States foreign, Great Lakes, or noncontiguous domestic trade, and to provide for qualified withdrawals to achieve the program set forth in Schedule B hereof.

3. *Term of the Agreement:* This Agreement shall be effective on the date of execution by the Assistant Secretary and shall continue until terminated under Article 4

4. *Termination of Agreement.* (A) This Agreement may be terminated at any time under any of the following circumstances:

(1) Upon written mutual agreement by the parties;

(2) Upon written notice by the Party that a change has been made in the rules and regulations which would have a substantial effect upon the rights or obligations of the Party.

(B) This Agreement shall terminate upon completion of the program as set forth in Schedule B hereof.

(C) Upon termination of this Agreement pursuant to paragraphs (A) and/or (B) hereof all amounts remaining in the Fund shall be treated as if withdrawn in a nonqualified withdrawal (as that term is defined in the Act and the rules and regulations) on the date of termination of this Agreement.

5. *Deposits to be made into the Fund:* (A) Subject to any restrictions contained in the Act, the rules and regulations, or this Agreement, the Party may deposit, for each taxable year to which this Agreement applies, amounts representing:

(1) Taxable income attributable to the operation of the vessels listed in Schedule A or B hereof;

(2) The depreciation allowable under section 167 of the Internal Revenue Code of 1954 on the vessels listed in Section A or B hereof;

(3) The net proceeds from the sale or other disposition of any of the vessels listed in Schedule A or B hereof; and

(4) The net proceeds from insurance or indemnity attributable to the vessels listed in Schedule A or B hereof.

(B) The Party shall deposit for each taxable year to which this Agreement applies:

(1) All receipts from the investment or reinvestment of amounts held in the Fund, except that the Party shall not be permitted to deposit more than is necessary to complete its program set out in Schedule B hereof; and

(2) The net proceeds from the mortgage of any vessel listed in Schedule B hereof for which qualified withdrawals from the Fund have been made.

(C) Notwithstanding anything in paragraphs (A) or (B) hereof to the contrary, the Party shall make the minimum deposits set forth in Schedule D hereof at the time and in such amounts as may be set forth therein. The Party specifically agrees to deposit up to one hundred percent of allowable taxable income attributable to the operation of agreement vessels in order to meet its obligations under this paragraph.

(D) In the event that any leased vessel listed in Schedule A hereof is included in another capital construction fund agreement, the maximum amount of depreciation which the Party may deposit in respect to that vessel shall be calculated by using the allowable percentage of the depreciation ceiling listed for that vessel in Schedule A hereof.

6. *Withdrawals from the Fund:* (A) The Party may make such qualified withdrawals (as that term is defined in the Act and the rules and regulations) as shall be necessary to fulfill the obligations set forth in Schedule B hereof. Any such qualified withdrawal may be made without the consent of the Assistant Secretary, except as required by the rules and regulations.

(B) Any other withdrawal from the Fund shall be made only upon the prior written consent of the Assistant Secretary, as required by the rules and regulations.

7. *Investment of the Fund:* (A) The Party, at its discretion, may invest assets held in the Fund in accordance with the Act and the rules and regulations.

(B) The Party agrees, when investing assets held in the Fund, to make such investments as will insure that sufficient cash is available at the time qualified withdrawals are required in accordance with the program described in Schedule B hereof.

8. *Pledges, Assignments, and Transfers:* (A) The Party agrees not to assign, pledge, or otherwise encumber, either directly or indirectly or through any reorganization, merger, or consolidation, all or any part of this Agreement, the Fund, or any assets in the Fund without the prior written consent of the Assistant Secretary; provided, however, the Party may transfer the assets of the Fund, in whole or in part, to an investment trustee, as provided in the rules and regulations.

(B) The Party shall not obligate any assets in the Fund as a compensating balance.

(C) The Party may not sell, transfer, or otherwise dispose of any vessel, or part thereof, described in Schedule B hereof without the prior written consent of the Assistant Secretary.

9. *Records and Reports:* (A) The Party and each affiliate, domestic agent, subsidiary, or holding company connected with, or directly or indirectly controlling or controlled by the Party shall keep its books, records, and accounts relating to the maintenance, operation, and servicing of the vessel(s) and/or service(s) covered by this Agreement in such form as may be prescribed by the Assistant Secretary under the rules and regulations.

(B) The Assistant Secretary agrees not to require the duplication of books, records and accounts required to be kept in some other form by the Interstate Commerce Commission or the Secretary of the Treasury, so long as the information required in paragraph (A) hereof is made available to the Assistant Secretary.

(C) The Party agrees to file, upon notice from the Assistant Secretary, balance sheets, profit and loss statements, and such other statements of financial operations, special reports, charters, ships' logs, memoranda of facts and transactions, as in the opinion of the Assistant Secretary may affect the Party's performance under this Agreement.

(D) The Assistant Secretary may require by regulation that any of such statements, reports and memoranda shall be certified by independent certified public accountants acceptable to the Assistant Secretary.

(E) The Assistant Secretary may require the Party to establish and maintain systems of control of expenses and revenues in connection with the operation of the agreement vessel(s).

(F) The Party agrees to submit promptly to the Assistant Secretary any contract executed in connection with the program described in Schedule B hereof.

(G) The Assistant Secretary is hereby authorized to examine and audit the books, records, and accounts of all persons referred to in this Article whenever he may deem it necessary or desirable.

10. *Modification and Amendment:* This Agreement may be modified or amended at any time by mutual written consent.

11. *Incorporation of Schedules:* The attached Schedules A, B, C, and D are incor-

V 42 168 AUG 30 77 UMI

porated into and made a part of this Agreement.

12. *Liquidated Damages:* (A) In the event that the Party operates any qualified agreement vessel described in Schedule B hereof in geographic trades other than those permitted by section 607 of the Act, this Agreement, and/or the rules and regulations, the Party shall pay to the United States an amount of liquidated damages for each day of such impermissible geographic trading which shall constitute the time value of the deferral of Federal income tax which the Party has received. The amount shall be calculated in accordance with the rules and regulations.

(B) The Party agrees to pay the daily rate of liquidated damages to the Assistant Secretary, for deposit in the Treasury of the United States, within the time limits provided for in the rules and regulations.

(C) Nothing in this Article shall in any way be construed to diminish or waive any of the Assistant Secretary's other remedies for breach under the Act, the Agreement, or the rules and regulations.

(D) Notwithstanding the fact that the Agreement may be terminated pursuant to the provisions of Article 4 hereof, or otherwise, the provisions of this Article 12 shall continue in effect as follows:

(1) In the case of a vessel constructed or acquired within one year of final delivery from the shipyard after construction with the aid of qualified withdrawals, for a period of twenty (20) years from the date of such vessel's final delivery;

(2) In the case of a vessel reconstructed or acquired more than one year after final delivery from the shipyard after construction with the aid of qualified withdrawals, for a period of ten (10) years from the date of such vessel's final delivery from the shipyard after reconstruction or the date of such vessel's acquisition; and

(3) In the case of a vessel included in Schedule B hereof as a qualified agreement vessel in regard to which qualified withdrawals from the Fund have been made to pay existing indebtedness, for a period of ten (10) years from the date of the first qualified withdrawal in regard to such vessel, provided, however, that if such vessel was more than fifteen (15) years old on the date of the first qualified withdrawal in regard thereto, such conditions shall continue for a period of five (5) years in regard to such vessel.

13. *Warranties and Representations by the Party:* The Party hereby warrants and represents that:

(A) The Party is a citizen of the United States within the meaning of section 2 of the Shipping Act, 1916, as amended, and will continue to be so for the term of this Agreement. The Party agrees that each year, within thirty (30) days after the annual meeting of its stockholders, it shall file a supplemental affidavit as evidence of its continuing United States citizenship, provided that any changes in data last furnished with respect to officers, directors, and stockholders holding five percent or more of the issued and outstanding stock of each class or series which would result in a loss of the Party's status as a United States citizen shall be promptly reported to the Assistant Secretary.

(B) The Party owns, is the lessee, or has contracted for the construction of one or more eligible vessels (within the meaning of section 607(k) of the Act) as listed in Schedule A hereof.

(C) The qualified vessels described in Schedule B hereof: (1) Were or will be constructed or reconstructed in the United States, except as provided in the Act and the rules and regulations;

(2) Are or will be documented under the laws of the United States and will continue to remain so documented; and

(3) Will be operated in the foreign, Great Lakes or noncontiguous domestic trade of the United States within the meaning of the Act and the rules and regulations.

(D) The Party will meet its deposit obligations as agreed upon in Article 5 of this Agreement.

(E) The Party will promptly inform the Assistant Secretary, in writing, of any change in circumstances which would tend to adversely affect the ability of the Party to carry out its obligations under the Agreement.

(F) The Party will faithfully conform to all rules and regulations governing the Agreement and the Fund.

(G) Nothing of monetary value has been improperly given, promised, or implied for entering into this Agreement. The Party further warrants that no improper personal, political or other activities have been used or attempted in an effort to influence the outcome of the discussions or negotiations leading to the award of this Agreement. Breach of this warranty shall constitute an event of default for which the Assistant Secretary shall have the right, notwithstanding Article 4, to terminate this Agreement without liability to the United States.

14. *Default in Obligations:* (A) If the Assistant Secretary determines that any substantial obligation under this Agreement is not being fulfilled by the Party, he may, under the rules and regulations and after the Party has been given notice and an opportunity to be heard, declare a breach and treat the entire Fund, or any portion thereof, as an amount withdrawn in a nonqualified withdrawal.

(B) The Assistant Secretary shall provide an opportunity for the Party to cure a breach declared pursuant to Paragraph (A) of this Article 14.

(C) Events of breach by the Party shall include, but shall not be limited to: (1) Failure in any respect to use due diligence in performing the program set forth in Schedule B hereof;

(2) Obligating the assets in the Fund as a compensating balance;

(3) Failure to make deposits required in Schedule D hereof;

(4) Failure to secure written permission from the Assistant Secretary when such permission is required by the rules and regulations;

(5) Failure to submit reports and/or records on a timely basis as provided in Article 9 hereof;

(6) Any material misrepresentation made by the Party or any failure by the Party to disclose material information in connection with this Agreement whether before or after execution hereof and whether made in an application, report, affidavit, or otherwise; or

(7) Failure by the Party to comply with any provisions of section 607 of the Act, the rules and regulations, or this Agreement.

15. *Extension of Federal Income Tax Benefits:* The Assistant Secretary agrees that the Federal income tax benefits provided in the Act and the rules and regulations shall be available to the Party if the Party shall carry out its obligations under this Agreement.

APPENDIX IV—SAMPLE ADDENDUM TO MARITIME ADMINISTRATION CAPITAL CONSTRUCTION FUND AGREEMENT

This Agreement, made by the Assistant Secretary of Commerce for Maritime Affairs ("Assistant Secretary") and ---------- ("Party"), a citizen of the United States of America, as an Addendum to that certain agreement, Contract No. MA/CCF–

Whereas: 1. On ----------, the parties hereto entered into a Capital Construction Fund Agreement ("Agreement") under section 607 of the Merchant Marine Act, 1936, as amended ("Act");

2. The parties hereto desire to modify that Agreement in the manner hereinafter set forth;

3. The parties hereto have agreed to said amendment and desire to incorporate the same into the Agreement.

Now, therefore, in consideration of the premises the Assistant Secretary and the Party agree as follows:

Notwithstanding the provisions of Article 4(A)(2) of the Agreement, the Party may, within sixty (60) days after notice appears in the FEDERAL REGISTER that the Regulations jointly prescribed by the Secretary of the Treasury and the Secretary of Commece have been finalized, terminate the Agreement, if such Regulations have a substantial effect on the rights or obligations of the Party. Upon termination of the Agreement pursuant to this Addendum No. ---- the provisions of the Internal Revenue Code of 1954, the Act, and the rules and regulations shall apply to all funds remaining in the Fund as if such funds were withdrawn in a non-qualified withdrawal, as that term is defined in the Act and the rules and regulations.

In witness whereof, the Secretary and the Party have executed this addendum, in quadruplicate, effective as of the date indicated below.

Title 47—Telecommunication

CHAPTER I—FEDERAL COMMUNICATIONS COMMISSION

[Docket No. 21237; RM-2538]

PART 73—RADIO BROADCAST SERVICES

FM Broadcast Station in Wrens, Ga.; Changes in Table of Assignments

AGENCY: Federal Communications Commission.

ACTION: Report and order.

SUMMARY: This action assigns FM Channel 244A to provide a first local aural broadcast service to Wrens, Georgia, at the request of the Mayor of that city, J.J. Rabun. The assignment is based on a finding of first aural service, first FM service, need for an assignment, availability of a transmitter site, and statement of intention to construct and operate an FM station on the channel.

EFFECTIVE DATE: September 30, 1977.

ADDRESSES: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT:

James J. Gross, Broadcast Bureau, 202–632–7792.

SUPPLEMENTARY INFORMATION:

In the matter of amendment of § 73.202(b), Table of Assignments, FM Broadcast stations. (Wrens, Georgia).

REPORT AND ORDER

(PROCEEDING TERMINATED)

Adopted: August 16, 1977.

Released: August 22, 1977.

1. The Commission has before it the Notice of proposed rulemaking, 42 FR 26666 (pub. May 25, 1977) in this proceeding, proposing the assignment of FM Channel 244A to Wrens, Ga. (1970 pop. 2,204), as requested by Mayor J.J. Rabun (petitioner). Mayor Rabun states that this assignment would provide a first local aural service to Wrens, and a first FM service and first nighttime aural service to over 2,000 persons.

2. Wrens is located in Jefferson County (pop. 17,174) in eastern Georgia, about 24 kilometers (15 miles) north of Louisville, Ga. It is represented to be a manufacturing and industrial community which the petitioner informs us is increasing in population (a 35 percent increase between 1960 and 1970). The petitioner has also submitted demographic information on the businesses and institutions at Wrens to support his assertion of need for an assignment.

3. The petitioner has restated his intention to apply for a construction permit on Channel 244A if it is assigned to Wrens, and upon authorization to promptly construct and operate an FM broadcast station.

4. Because spacing limitations require use of a transmitter site at least 8 kilometers (5 miles) northwest of Wrens, the Notice requested a showing of the availability of such a transmitter site, free from obstructions from which a facility could serve Wrens. Petitioner has submitted an engineering study which indicates that there are several available sites meeting the Commission's spacing requirements which would permit a facility to provide an unobstructed principal city signal over the entire community of Wrens. Topographical maps confirm the fact that this area on the edge of the coastal plain of Georgia, is characterized by low hills and gentle slopes with no obstructions likely to interfere with FM transmission. The area is also primarily farm land and we are informed that several sites are available for purchase or lease for a broadcast station.

5. In consideration of the above showings, we find that it would be in the public interest to assign Channel 244A to Wrens, Georgia. This is consistent with our FM assignment priorities which place great importance on providing first aural service and first local FM assignments to small communities, where the need for such assignment is shown.

6. Authority for this action is contained in sections 4(i), 5(d)(1), 303 (g) and (r), and 307(b) of the Communications Act of 1934, as amended, and § 0.281 of the Commission's rules and regulations.

7. Accordingly, *it is ordered,* That effective September 30, 1977, § 73.202(b) of the Commission's Rules, the FM Table of Assignments, is amended, regarding the city named below, to read as follows:

§ 73.202 [Amended]

City:	*Channel No.*
Wrens, Georgia	244A

8. *It is further ordered,* That this proceeding is terminated.

FEDERAL COMMUNICATIONS COMMISSION,
WALLACE E. JOHNSON,
Chief, Broadcast Bureau.

[FR Doc.77-25160 Filed 8-29-77;8:45 am]

PART 74—EXPERIMENTAL, AUXILIARY, AND SPECIAL BROADCAST, AND OTHER PROGRAM DISTRIBUTIONAL SERVICES

Deferral of Effective Dates; Use of Type Accepted Equipment

AGENCY: Federal Communications Commission.

ACTION: Order.

SUMMARY: Order was issued to defer effective dates contained in Federal Communications Commission's Rules concerning the remote pickup broadcast and low power auxiliary stations. The affected rules were amended to provide an additional three months before the type acceptance requirements specified therein take effect. This action was taken to insure that sufficient time has been provided for manufacturers to receive Commission action on applications for transmitter type acceptance.

EFFECTIVE DATE: September 1, 1977.

ADDRESSES: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT:

Wilson A. LaFollette, Broadcast Bureau (202–632–9660).

SUPPLEMENTARY INFORMATION:

Adopted: August 19, 1977.

Released: August 24, 1977.

ORDER

Order. In the matter of deferral of effective dates set forth in Part 74, Subparts D and H, §§ 74.451(a), 74.451(d), 74.451(e), 74.452(d), 74.851(a), 74.851(d), 74.851(f), 74.852(c), and 74.861(b) of the Commission's rules concerning the use of type accepted equipment.

1. The above captioned rules all set forth dates concerning the use of type accepted equipment in the Remote Pickup Broadcast and Low Power Auxiliary

V42I168 AUG 30 77 UMI

Radio Services. For remote pickup broadcast stations, §§ 74.451(a), 74.451(d), 74.451(e), and 74.452(d) presently state:

Section 74.451 *Type acceptance of equipment.* (a) Applications for new remote pickup broadcast stations or systems or for changing equipment which are tendered after September 1, 1977, will not be accepted unless the equipment specified therein has been type accepted for use pursuant to provisions of this subpart, or which has been type accepted for licensing under Parts 21, 89, 91, or 93 of this chapter and which does not exceed the output power limits specified in § 74.461(b).

* * * * *

(d) All transmitters marketed after August 31, 1977, shall be type accepted by the Federal Communications Commission for use under this subpart. (Refer to Subpart I of Part 2 of the Commission's rules and regulations.)

(e) Remote pickup broadcast station equipment authorized to be used pursuant to an application accepted for filing prior to September 1, 1977, may continue to be used by the licensee or its successors or assignees: *Provided, however,* If operation of such equipment causes harmful interference due to its failure to comply with the technical standards set forth in this subpart, the Commission may, at its discretion, require the licensee to take such corrective action as is necessary to eliminate the interference.

Section 74.452 *Equipment changes.*

* * * * *

(d) All transmitters installed after August 31, 1977, must be type accepted for use in this service or other services as specified in § 74.451(a).

NOTE: Prior to September 1, 1977, Commission approval must be obtained before replacing an authorized transmitter with a transmitter which has not been type accepted for use in the remote pickup broadcast service or other services as specified in § 74.451(a).

2. Similar rules for low power auxiliary stations are contained in §§ 74.851 (a), 74.851(d), 74.851(f), 74.852(c), and 74.861(b) as follows:

Section 74.851 *Type acceptance of equipment.* (a) Applications for new low power auxiliary stations tendered after August 31, 1977, will not be accepted unless the equipment specified therein has been type accepted for use pursuant to provisions of this subpart. However, all applications specifying the use of the 174–216 MHz band must specify type accepted equipment.

* * * * *

(d) Low power auxiliary station equipment authorized to be used pursuant to an application accepted for filing prior to September 1, 1977, may continue to be used by the licensee or its successors or assignees: *Provided, however,* If operation of such equipment causes harmful interference due to its failure to comply with the technical standards set forth in this subpart, the Commission may, at its discretion, require the licensee to take such corrective action as is necessary to eliminate the interference.

* * * * *

(f) All transmitters marketed after August 31, 1977, shall be type accepted by the Federal Communications Commission for use under this subpart. (Refer to Subpart I of Part 2 of the Commission's rules and regulations.)

Section 74.852 *Equipment changes.*

* * * * *

(c) Prior to September 1, 1977, Commission approval must be obtained before replacing an authorized transmitter with a transmitter which has not been type accepted for use in the low power auxiliary broadcast service. Transmitters initially installed after August 31, 1977, must be type accepted for use in this service.

Section 74.861 *Technical requirements.*

* * * * *

(b) Each authorization for a new low power auxiliary station issued pursuant to an application accepted after August 31, 1977, shall require the use of type accepted equipment. Such equipment shall be operated in accordance with the emission specifications included in the type acceptance grant and as prescribed in paragraphs (c) through (k) of this section. However, all authorizations issued for the use of the 174–216 MHz band shall require the use of type accepted equipment.

3. The type-acceptance requirements set forth in §§ 74.451 and 74.452 as noted above for remote pickup stations were promulgated in the *Report and Order* of Docket 20189 (FCC 76-624) adopted June 29, 1976. The rules which were adopted therein had an effective date of August 31, 1976, and it was the Commission's intent to specify dates in the rules concerning type acceptance of equipment which would become effective one year from this date. Among other things, a year was deemed necessary to insure timely action by the Commission upon applications for type acceptance. However, due to a Petition for Reconsideration and a Motion for Stay of this Report and Order, the effective date of the new rules was postponed until November 22, 1976. As a result of this delay, the time frame has been insufficient for equipment manufacturers to design and build equipment, prepare type acceptance applications and receive Commission action on them by August 31, 1977. Therefore, there are no transmitters specifically type accepted pursuant to Part 74, Subpart D of the rules.

4. The type-acceptance requirements set forth in §§ 74.851, 74.852, and 74.861 as noted above for low power auxiliary broadcast stations were promulgated in the Report, Memorandum and Order of Docket 20195 (FCC 77–119), adopted February 10, 1977; the rules adopted in this proceeding became effective April 18, 1977. Also in this case, the Commission has not had sufficient time to act on applications for type acceptance which have been received, and, therefore, at this time there are no transmitters specifically type accepted pursuant to Subpart H, Part 74 of the rules.

5. To avoid hardship and inconvenience to applicants in the Remote Pickup and Low Power Auxiliary Radio Services, it is appropriate that the dates in these rules concerning type accepted equipment be deferred to provide additional time for Commission action. Prior notice of rulemaking and public participation thereon are unnecessary, pursuant to the Administrative Procedure and Judicial Review Act provisions of 5 U.S.C. (b)(3)(B), inasmuch as the amendments contained below impose no additional burdens and raise no issue upon which additional comments would serve any useful purpose.

6. Since the action herein modifies a procedural rule in a manner which relieves a restriction, the rule amendments may be made effective with less than 30 days notice (see 5 U.S.C. 533(d)). *Therefore, it is ordered,* That pursuant to sections 4(i), and 303 (g) and (r) of the Communications Act of 1934, as amended, and § 0.281 of the Commission's rules, Part 74 of the Commission's rules and regulations is amended as set forth below, effective September 1, 1977.

(Secs. 4, 303, 48 Stat., as amended, 1066, 1082; (47 U.S.C. 154, 303).)

FEDERAL COMMUNICATIONS COMMISSION,
WALLACE E. JOHNSON,
Chief, Broadcast Bureau.

1. Section 74.451, paragraphs (a), (d), and (e) are amended to change the dates contained therein as follows:

EQUIPMENT

§ 74.451 Type acceptance of equipment.

(a) Applications for new remote pickup broadcast stations or systems or for changing transmitting equipment which are tendered after November 30, 1977, will not be accepted unless the equipment specified therein has been type accepted for use pursuant to provisions of this subpart or has been type accepted for licensing under Parts 21, 89, 91, or 93 of this chapter and does not exceed the output power limits specified in § 74.461(b).

* * * * *

(d) All transmitters marketed after November 30, 1977, for use under this Subpart shall be type accepted by the Federal Communications Commission. (Refer to Subpart I of Part 2 of the Commission's rules and regulations.)

(e) Remote pickup broadcast station transmitting equipment authorized to be used pursuant to an application accepted for filing prior to December 1, 1977, may continue to be used by the licensee or its successors or assignees: *Provided, however,* If operation of such equipment causes harmful interference due to its failure to comply with the technical standards set forth in this subpart the Commission may, at its discretion, require the licensee to take such corrective action as is necessary to eliminate the interference.

* * * * *

2. Section 74.452(d) and the Note is amended to change the dates contained therein as follows:

§ 74.452 Equipment changes.

* * * * *

(d) All transmitters initially installed after November 30, 1977, must be type accepted for use in this service or other services as specified in § 74.451(a).

NOTE.—Prior to December 1, 1977, Commission approval must be obtained before replacing an authorized transmitter with a transmitter which has not been type accepted for use in the remote pickup broadcast service or other services as specified in § 74.451(a).

3. Section 74.851, paragraphs (a), (d), and (f) are amended to change the dates contained therein as follows:

EQUIPMENT

§ 74.851 Type acceptance of equipment.

(a) Applications for new lower power auxiliary stations tendered after November 30, 1977, will not be accepted unless the transmitting equipment specified therein has been type accepted for use pursuant to provisions of this Subpart. However, all applications specifying the use of the 174–216 MHz band must specify transmitting equipment type accepted for licensing under Part 74 in this band.

* * * * *

(d) Low power auxiliary station equipment authorized to be used pursuant to an application accepted for filing prior to December 1, 1977, may continue to be used by the licensee or its successors or assignees: *Provided, however,* If operation of such equipment causes harmful interference due to its failure to comply with the technical standards set forth in this Subpart, the Commission may, at its discretion, require the licensee to take such corrective action as is necessary to eliminate the interference.

* * * * *

(f) All transmitters marketed after November 30, 1977, for use under this Subpart shall be type accepted by the Federal Communications Commission for this purpose. (Refer to Subpart I of Part 2 of the Commission's rules and regulations.)

4. Section 74.852(c) is amended to change the date therein as follows:

§ 74.852 Equipment changes.

* * * * *

(c) Prior to December 1, 1977, Commission approval must be obtained before replacing an authorized transmitter with a transmitter which has not been type accepted for use in the low power auxiliary broadcast service. Transmitters initially installed after November 30, 1977, must be type accepted for use in this service.

5. Section 74.861(b) is amended to change the date therein as follows:

TECHNICAL OPERATION AND OPERATORS

§ 74.861 Technical requirements.

* * * * *

(b) Each authorization for a new low power auxiliary station issued pursuant to an application accepted after November 30, 1977, shall require the use of type accepted transmitting equipment. Such equipment shall be operated in accordance with the emission specifications included in the type acceptance grant and as prescribed in paragraphs (c) through (k) of this section. However, all authorizations issued for the use of the 174–216 MHz band shall require the use of type accepted transmitting equipment.

Title 49—Transportation

CHAPTER X—INTERSTATE COMMERCE COMMISSION

SUBCHAPTER A—GENERAL RULES AND REGULATIONS

[S.O. 1262; Amdt. 1]

PART 1033—CAR SERVICE

North Stratford Railroad Corp. Authorized to Operate Over Certain Tracks Owned by State of New Hampshire

AGENCY: Interstate Commerce Commission.

ACTION: Emergency order (Amendment to Service Order).

SUMMARY: Service Order No. 1262 authorizes the North Stratford Railroad Corporation to operate a line of railroad between North Stratford, New Hampshire, and Beecher Falls, Vermont, owned by the State of New Hampshire. Resumption of operation over this line restores rail service to shippers affected by its abandonment by the Maine Central, its former owner. Amendment No. 1 to Service Order No. 1262 extends for six months the emergency authority granted to the North Stratford Railroad for operation of this line.

DATES: *Effective:* August 31, 1977. *Expires:* October 31, 1977.

FOR FURTHER INFORMATION CONTACT:

C. C. Robinson, Chief, Utilization and Distribution Branch, Interstate Commerce Commission, Washington, D.C. 20423, telephone 202–275–7840, Telex 89–2742.

SUPPLEMENTARY INFORMATION: This order is printed in full below.

At a Session of the INTERSTATE COMMERCE COMMISSION, Railroad Service Board, held in Washington, D.C., on the 22nd day of August, 1977.

Upon further consideration of Service Order No. 1262 (42 FR 16780), and good cause appearing therefor:

It is ordered, That: Service Order No. 1262 be, and it is hereby, amended by substituting the following paragraph (f) for paragraph (f) thereof:

§ 1033.1262 Service Order 1262.

(a) North Stratford Railroad Corporation authorized to operate over certain tracks owned by the State of New Hampshire * * *

(f) *Expiration date.* The provisions of this order shall expire at 11:59 p.m., October 31, 1977, unless otherwise modified, changed, or suspended by order of this Commission.

Effective date: This amendment shall become effective at 11:59 p.m., August 31, 1977.

(Secs. 1, 12, 15, and 17(2), 24 Stat. 379, 383, 384, as amended; 49 U.S.C. 1, 12, 15, and 17 (2). Interprets or applies Secs. 1(10–17), 15 (4), and 17(2). 40 Stat. 101, as amended, 54 Stat. 911; 49 U.S.C. 1(10–17), 15(4), and 17(2).)

It is further ordered, That a copy of this amendment shall be served upon the Association of American Railroads, Car Service Division, as agent of all railroads subscribing to the car service and car hire agreement under the terms of that agreement, and upon the American Short Line Railroad Association; and that notice of this amendment be given to the general public by depositing a copy in the Office of the Secretary of the Commission at Washington, D.C., and by filing it with the Director, Office of the Federal Register.

By the Commission, Railroad Service Board, members Joel E. Burns, Robert S. Turkington and John R. Michael.

H. G. HOMME, Jr.,
Acting Secretary.

SUBCHAPTER B—PRACTICE AND PROCEDURE

[Ex Parte No. MC-19 (Sub. No. 30)]

PART 1100—GENERAL RULES OF PRACTICE

SUBCHAPTER D—TARIFFS AND SCHEDULES

PART 1307—FREIGHT RATE TARIFFS, SCHEDULES AND CLASSIFICATIONS OF MOTOR CARRIERS

Special Procedures for Tariffs Governing Rates and Charges on Household Goods

Correction

In FR Doc. 77-24465, appearing at page 42689 in the issue of Wednesday, August 24, 1977, the effective date should read, "October 25, 1977".

Title 50—Wildlife and Fisheries

CHAPTER 1—UNITED STATES FISH AND WILDLIFE SERVICE, DEPARTMENT OF THE INTERIOR

PART 32—HUNTING

Opening of Seney National Wildlife Refuge, Mich., to Hunting

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Special regulation.

SUMMARY: The Director has determined that the opening to big game hunting of Seney National Wildlife Refuge, Michigan is compatible with the objectives for which the area was established, will utilize a renewable natural resource, and will provide additional recreational opportunity to the public.

DATES: October 1, 1977 through December 31, 1977.

FOR FURTHER INFORMATION CONTACT:

John R. Frye, Refuge Manager, Seney National Wildlife Refuge, Seney, Michigan 49883, (906–586–9851).

SUPPLEMENTARY INFORMATION:

§ 32.32 Special regulations; big game hunting; for individual wildlife refuge areas.

Big game hunting is permitted on the Seney National Wildlife Refuge, Michigan, only on the areas designated by signs as being open to hunting. These

V42168A AUG 30 77 UMI

areas comprising 85,200 acres are delineated on maps available at the refuge headquarters and from the office of the Regional Director, U.S. Fish and Wildlife Service, Department of the Interior, Federal Building, Fort Snelling, Twin Cities, Minnesota 55111. Hunting shall be in accordance with all applicable State regulations subject to the following conditions:

1. Bow and arrow hunting is permitted only on 33,525 acres of the refuge designated as Area B, from October 1 through November 14; and on the 85,200 acres of the refuge designated as Area A and Area B from December 1 through December 31.

2. Bear may be taken by archers only from October 1 through November 14 and by gun hunters only from November 15 through November 30. Bear may not be taken with the aid of dogs.

3. Camping is permitted only west of the Driggs River except in designated Wilderness Area during the gun season. A Camp Registration Permit, obtainable at refuge headquarters, is required.

4. All motorized conveyances are prohibited from traveling on dikes or off established roads and trails. Motorized bikes, All-Terrain Vehicles and Snowmobiles are not permitted on the refuge.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally which are set forth in Title 50 Code of Federal Regulations, Part 32. The public is invited to offer suggestions and comments at any time.

NOTE.—The U.S. Fish and Wildlife Service has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11949 and OMB Circular A–107.

Dated: August 22, 1977.

JOHN R. FRYE,
Refuge Manager.

[FR Doc.77–25068 Filed 8–29–77;8:45 am]

PART 32—HUNTING

Opening of Seney National Wildlife Refuge, Michigan to Hunting

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Special regulation.

SUMMARY: The Director has determined that the opening to upland game hunting of Seney National Wildlife Refuge is compatible with the objectives for which the area was established, will utilize a renewable natural resource, and will provide additional recreational opportunity to the public.

DATES: September 15, 1977 through February 28, 1978.

FOR FURTHER INFORMATION CONTACT:

John R. Frye, Refuge Manager, Seney National Wildlife Refuge, Seney, Michigan 49883, (906–586–9851).

SUPPLEMENTARY INFORMATION:

§ 32.22 Special Regulations; upland game hunting; for individual wildlife refuge areas.

Upland game hunting is permitted on the Seney National Wildlife Refuge, Michigan, only on the areas designated by signs as being open to hunting. These areas comprising 33,525 acres are delineated on maps available at the refuge headquarters and from the office of the Regional Director, U.S. Fish and Wildlife Service, Department of the Interior, Federal Building, Fort Snelling, Twin Cities, Minnesota 55111. Hunting shall be in accordance with all applicable State regulations subject to the following conditions:

1. That portion of the refuge designated as Area A is closed to all hunting until November 15.

2. All motorized conveyances are prohibited from traveling on dikes or off established roads and trails. Motorized bikes, All-Terrain Vehicles and Snowmobiles are not permitted on the refuge.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally which are set forth in Title 50 Code of Federal Regulations, Part 32. The public is invited to offer suggestions and comments at any time.

NOTE.—The U.S. Fish and Wildlife Service has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11949 and OMB Circular A–107.

Dated: August 22, 1977.

JOHN R. FRYE,
Refuge Manager.

[FR Doc.77–25069 Filed 8–29–77;8:45 am]

proposed rules

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

[7 CFR Part 910]

LEMONS GROWN IN CALIFORNIA AND ARIZONA

Proposed Minimum Size Regulation

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Proposed rule.

SUMMARY: This notice invites written comment on a proposed minimum size regulation of 1.82 inches in diameter for shipments of lemons grown in California and Arizona to become effective September 25, 1977. This proposed regulation is the same as the one currently in effect, and is needed to provide for orderly marketing in the interest of producers and consumers.

DATES: Comments must be received on or before September 14, 1977. Proposed effective dates: September 25, 1977, through September 23, 1978.

ADDRESSES: Send two copies of comments to the Hearing Clerk, United States Department of Agriculture, Room 1077, South Building, Washington, D.C. 20250. Comments will be made available for public inspection at the office of the Hearing Clerk during regular business hours.

FOR FURTHER INFORMATION CONTACT:

Charles R. Brader, Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service, U.S. Department of Agriculture, Washington, D.C. 20250, 202–447–3545.

SUPPLEMENTARY INFORMATION: The proposed regulation was recommended by the Lemon Administrative Committee, established under the marketing agreement, as amended, and Order No. 910, as amended (7 CFR Part 910), regulating the handling of lemons grown in California and Arizona, effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), as the agency to administer its terms and provisions.

Shipments of lemons from the production area are now in progress, and such shipments are regulated by size through September 24, 1977, under Lemon Regulation 57 (41 FR 41918), which requires such lemons to be at least 1.82 inches in diameter. The proposed regulation, which would become effective September 25, 1977, would continue in effect this size requirement. The volume and size composition of the lemon crop in California and Arizona is such that ample supplies of the more desirable sizes are available to satisfy the demand in domestic fresh markets. The proposed regulation is designed to permit shipment of ample supplies of lemons of acceptable sizes, maturity, and juice content in the interest of both growers and consumers, and is necessary to maintain orderly marketing conditions and provide consumer satisfaction. Sales opportunities for very small fresh lemons in domestic markets are quite limited, as they have relatively low juice yields. Lemons failing to meet this minimum size requirement could be shipped to fresh export markets, left on the trees to attain further growth, or utilized in processing. The proposed regulation is consistent with the objective of the act of promoting orderly marketing and protecting the interest of consumers.

The proposed regulation reads as follows:

Order. (a) From September 25, 1977, through September 23, 1978, no handler shall handle any lemons grown in District 1, District 2, or District 3, which are of a size smaller than 1.82 inches in diameter, which shall be the largest measurement at a right angle to a straight line running from the stem to the blossom end of the fruit: *Provided*, That not to exceed 5 percent, by count, of the lemons in any type of container may measure smaller than 1.82 inches in diameter.

(b) As used in this section "handle", "handler", "District 1", "District 2", and "District 3" each shall have the same meaning as when used in said amended marketing agreement and order.

Dated: August 24, 1977.

FLOYD F. HEDLUND,
Director, Fruit and Vegetable Division, Agricultural Marketing Service.

[FR Doc.77–25088 Filed 8–29–77;8:45 am]

[7 CFR Part 926]

TOKAY GRAPES GROWN IN SAN JOAQUIN COUNTY, CALIFORNIA

Proposed Extension of Effective Period for Regulation of the Grade and Container Markings

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Proposed rule.

SUMMARY: This notice proposes to continue through December 31, 1977, the currently effective minimum grade requirements for Tokay grapes and the marking requirements for the containers in which the grapes are shipped. These requirements are necessary to ensure that the grapes shipped will be of suitable quality in the interest of consumers and producers.

EFFECTIVE DATE: Written comments must be received by September 16, 1977, Proposed effective dates: August 20, 1977, through December 31, 1977.

ADDRESSES: Comments may be addressed to: Hearing Clerk, United States Department of Agriculture, Room 1077, South Building, Washington, D.C. 20250. Two copies of all written comments should be submitted, and they will be made available for public inspection from the office of the Hearing Clerk during regular business hours (7 CFR 1.27 (b)).

FOR FURTHER INFORMATION CONTACT:

Charles R. Brader, Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service, U.S. Department of Agriculture, Washington, D.C. 20250; telephone 202–447–3545.

SUPPLEMENTARY INFORMATION: Tokay Grape Regulation 13 (§ 926.314; 42 FR 40678) sets forth the currently effective grade requirements on the handling of Tokay grapes and the marking requirements for the containers in which the grapes are shipped. This proposal would continue those requirements through December 31, 1977. Unless so continued, the regulation would end September 30, 1977. Under the regulation, Tokay grapes must meet the grade and size specifications of U.S. No. 1 Table grapes and at least 30 percent, by count, of the berries in the lower 25 percent, by count, of each bunch shall show characteristic color; and each container of such grapes must bear a Federal-State Inspection Service lot number in plain letters and figures on one outside end.

The proposed regulation was recommended by the Industry Committee under § 926.50 of the marketing agreement, as amended, and Order No. 926, as amended (7 CFR Part 926), regulating the handling of Tokay grapes grown in San Joaquin County, Calif. This program is effective under the Agriculture Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674).

The proposal is to amend § 926.314 (42 FR 40678) to read as follows:

§ 926.314 Tokay Grape Regulation 13.

(a) During the period August 20, 1977, through December 31, 1977, no handler shall ship:

(1) Any Tokay grapes, grown in the production area, which do not meet the grade and size specifications of U.S. No. 1 Table Grapes and the following addi-

V 42 168 AUG 30 77 UMI

tional requirement: Of the 25 percent, by count, of the berries of each bunch which are attached to the lower part of the main stem, including laterals, at least 30 percent, by count, shall show characteristic color; and

(2) Any container of Tokay grapes, grown in the production area, unless such container bears, in plain letters and figures on one outside end, a Federal-State Inspection Service lot stamp number showing that such grapes have been inspected in accordance with the established grade set forth in this section.

(b) *Definition.* As used herein, the terms "handler', "ship", and "production area" shall have the same meaning as when used in the amended marketing agreement and order; "U.S. No. 1 Table Grapes" and "characteristic color" shall have the same meaning as when used in the United States Standards for Table Grapes (7 CFR 51.880–51.912).

Dated: August 24, 1977.

FLOYD F. HEDLUND,
Director, Fruit and Vegetable Division, Agricultural Marketing Service.

[FR Doc.77–25089 Filed 8–29–77;8:45 am]

[7 CFR Part 932]

OLIVES GROWN IN CALIFORNIA

Proposed Expenses, Rate of Assessment and Carryover of Unexpended Funds

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Proposed rule.

SUMMARY: This notice invites written comments on proposed expenses of $675,000, a rate of assessment of $12.00 per ton of olives for the functioning of the Olive Administrative Committee for the 1977–78 fiscal year, and approval to carryover unexpended funds from the previous fiscal year as a reserve. The Committee locally administers a Federal marketing order regulating the handling of olives grown in California. The regulation would enable the Committee to collect assessments from handlers of all assessable olives handled and to use the resulting funds for its expenses.

DATES: Comments must be received by September 14, 1977. Proposed effective dates: September 1, 1977, through August 31, 1978.

ADDRESSES: Comments may be addressed to: Hearing Clerk, United States Department of Agriculture, Room 1077, South Building, Washington, D.C. 20250. Two copies of all written comments should be submitted, and they will be made available for public inspection at the Office of the Hearing Clerk during regular business hours (7 CFR 1.27(b)).

FOR FURTHER INFORMATION CONTACT:

Charles R. Brader, Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service, U.S. Department of Agriculture, Washington, D.C. 20250, telephone 202–447–3545.

SUPPLEMENTARY INFORMATION: The proposal was submitted by the Olive Administrative Committee, established under marketing order No. 932 (7 CFR Part 932), regulating the handling of olives grown in California, under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), as the agency to administer its terms and provisions.

The proposal would add a new section reading as follows:

§ 932.212 Expenses, rate of assessment, and carryover of unexpended funds.

(a) *Expenses.* Expenses that are reasonable and likely to be incurred by the Olive Administrative Committee during the period September 1, 1977, through August 31, 1978, will amount to $675,000.

(b) *Rate of assessment.* The rate of assessment for that period, payable by each first handler in accordance with § 932.39, is fixed at $12.00 per ton of olives.

(c) *Reserve.* Unexpended assessment funds in excess of expenses incurred during the fiscal period ending August 31, 1977, shall be carried over as a reserve in accordance with the applicable provisions of § 932.40.

Dated: August 24, 1977.

FLOYD F. HEDLUND,
Director, Fruit and Vegetable Division, Agricultural Marketing Service.

Rural Electrification Administration

[7 CFR Part 1701]

[REA Bulletin 183–1]

RURAL ELECTRIC PROGRAM

Depreciation Rates and Procedures

AGENCY: Rural Electrification Administration, USDA.

ACTION: Proposed rule

SUMMARY: This action concerns the revision of REA Bulletin 183–1, Depreciation Rates and Procedures. A recent review of current industry depreciation rates and practices indicated that certain rates and procedures prescribed by REA were in need of revision. The revised bulletin provides current depreciation rates and procedures to be used by REA borrowers.

DATE: Comments on or before September 16, 1977.

ADDRESS: Submit written comments to the Director, A counting and Auditing Division, Rural Electrification Administration, Room 4307, South Building, U.S. Department of Agriculture, Washington, D.C. 20250; submissions are available for public inspection at the above address during regular business hours.

FOR FURTHER INFORMATION CONTACT:

Mr. Sheldon Chazin, Director, Accounting and Auditing Division, Rural Electrification Administration, Room 4307, South Building, U.S. Department of Agriculture, Washington, D.C. 20250, telephone 202–447–7221.

SUPPLEMENTARY INFORMATION: Notice is hereby given that pursuant to the Rural Electrification Act, as amended (7 U.S.C. 901 et seq.), REA proposes to revise REA Bulletin 183–1, Depreciation Rates and Procedures. Accordingly, REA proposes to amend 7 CFR Part 1701 as follows:

REVISED REA BULLETIN 183–1

A complete revision of Bulletin 183–1, was last issued in November 1969. The proposed revision incorporates changes announced since that time plus the following additional changes:

1. The prescribed rate for steam production plant is changed from 2.82 percent to 3.10 percent.

2. The prescribed rate for transmission lines is changed from 2.60 percent to 2.75 percent.

3. The prescribed range of rates for Account 364, Poles, Towers and Fixtures is changed from a range of 3.0 to 3.5 percent to a range of 3.0 to 4.0 percent.

The revised bulletin requires REA Electric Borrowers to analyze, on an annual basis, the adequacy of the accumulated provision for depreciation of distribution plant.

The revision also requires that a proposed composite depreciation rate for nuclear production plant be submitted to REA for approval. For joint participation projects in which the borrower is a minor participant, the rate being used by the other participant(s), shall be used. Justification, including supporting studies and regulatory commission's order, for the proposed rate, shall be submitted to REA.

Dated: August 22, 1977.

JOSEPH VELLONE,
Acting Administrator.

Animal and Plant Health Inspection Service

[9 CFR Part 95]

UNRESTRICTED ENTRY OF WOOL, HAIR AND BRISTLES

Proposed Rulemaking

AGENCY: Animal and Plant Health Inspection, USDA.

ACTION: Proposed rule.

SUMMARY: This proposal would delete certain restrictions applicable to the importation of wool, hair, or bristles taken from animals at the time of slaughter and would permit the importation of wool and hair removed from live animals if such products are free from animal manure. This action is needed to clarify the regulations and to achieve uniform interpretation of requirements for entry of such products into the United States. The effect of this proposal is to update and clarify the regulations by deleting terms and provisions in the regulations which may be confusing and may no longer be necessary.

DATE: Comments on or before September 29, 1977.

ADDRESS: Written comments to Deputy Administrator, USDA, APHIS, VS, Federal Building, Room 824, Hyattsville, MD 20782.

FOR FURTHER INFORMATION CONTACT:

Dr. B. T. Deal, USDA, APHIS, VS, Room 824, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782, (301–436–8379).

SUPPLEMENTARY INFORMATION: The regulations now state in 9 CFR 95.7 (b) that wool or hair clipped from live animals or pulled wool or hair may be imported without restrictions provided the said wool or hair is reasonably free from animal manure in the form of dung locks or otherwise. Use of the term "reasonably" has caused confusion and lack of uniformity in interpretation of requirements. To clarify the intent of the regulation and to eliminate questions as to what constitutes "reasonably" the term "reasonably" would be deleted. Further, the terms "clipped" and "pulled" would be changed to "removed" and the phrase "in the form of dung locks or otherwise" have been deleted for the purposes of simplification. Additionally, the regulations in 9 CFR 95.7(c) requires for the importation of wool, hair, or bristles taken from sheep, goats, cattle or swine that such animals were slaughtered in a specified abattoir and were free from anthrax, foot-and-mouth disease, and rinderpest at the time of slaughter and that a certificate accompany such products certifying that such requirements have been met. Wool, hair, or bristles reported to have been removed from animals at the time of slaughter have not been imported into the United States for several years. Therefore, it is believed that these requirements for such wool, hair, or bristles has questionable value and serves no useful purpose, and that section (c) should be deleted from the regulations.

Notice is hereby given in accordance with the administrative procedure provisions in 5 U.S.C. 553, that, pursuant to sec. 2, 32 Stat. 794, as amended (21 U.S.C. 111), the Animal and Plant Health Inspection Service is considering amending Part 95, Title 9, Code of Federal Regulations, in the following respects:

In § 95.7, paragraph (c) would be deleted; paragraph (d) would be redesignated as paragraph (c); in the introductory paragraph the reference to paragraph (d) would be amended to refer to paragraph (c); and paragraph (b) would be amended to read:

§ 95.7 Wool, hair, and bristles; requirements for unrestricted entry.

(a) * * *

(b) Wool or hair removed from live animals may be imported without other restrictions if it is free from animal manure.

* * * * * *

All written submissions made pursuant to this notice will be made available for public inspection at the Federal Building, 6505 Belcrest Road, Room 824, Hyattsville, MD, during regular hours of business (8 a.m. to 4:30 p.m., Monday to Friday, except holidays) in a manner convenient to the public business (7 CFR 1.27(b)).

Comments submitted should bear a reference to the date and page number of this issue in the FEDERAL REGISTER.

Done at Washington, D.C., this 24th day of August 1977.

NOTE.—The Animal and Plant Health Inspection Service has determined that this document does not contain a major proposal requiring preparation of an Inflation Impact Statement under Executive Order 11821 and OMB Circular A–107.

NORVAN L. MEYER,
Acting Deputy Administrator, Veterinary Services.

DEPARTMENT OF COMMERCE

[15 CFR Part 16]

PROCEDURES FOR A VOLUNTARY CONSUMER PRODUCT INFORMATION LABELING PROGRAM

Proposed Amendment to Authorize the Secretary to Suspend Fees and Charges

AGENCY: Assistant Secretary of Commerce for Science and Technology, Commerce.

ACTION: Proposed amendment to rule.

SUMMARY: The proposed amendment to the Procedures for the Voluntary Consumer Product Information Labeling Program will authorize the Secretary at any time to suspend for any length of time the requirement for her to establish fees and charges for participation in the program. Accordingly, and in order to encourage participation by manufacturers and others in the program, it is the Secretary's intention to suspend such fees and charges at least for the duration of the program's pilot project.

DATES: Comments must be received on or before September 29, 1977.

FOR FURTHER INFORMATION CONTACT:

Dr. Howard I. Forman, Deputy Assistant Secretary for Product Standards, Room 3876, U.S. Department of Commerce, Washington, D.C. 20230 (202–377–3221).

SUPPLEMENTARY INFORMATION: On May 25, 1977, the Department of Commerce announced in the FEDERAL REGISTER (42 FR 26647) procedures under which a Voluntary Consumer Product Information Labeling Program administered by the Department will function. The Department determined that the program would be instituted on a limited pilot project basis. Subsection 16.6(a) of the procedures provides that the Secretary shall establish fees and charges for use of the Department of Commerce Label and Mark on each product.

Upon further study of the need to establish such fees and charges, it has been determined that it is in the public interest to dispense with all fees and charges at least for the duration of the limited pilot project in order to encourage participation by manufacturers in the program.

Accordingly, in order to provide the Secretary with authority to suspend the fees and charges required by §16.6(a) of the procedures, it is proposed to amend the procedures by adding a new paragraph (d) to §16.6 as set forth below.

Interested persons are invited to submit written comments in four copies to the Assistant Secretary for Science and Technology, Room 3862, U.S. Department of Commerce, Washington, D.C. 20230 on or before September 29, 1977.

Dated: August 24, 1977.

JORDAN J. BARUCH,
Assistant Secretary for Science and Technology.

15 CFR Section 16.6 is proposed to be amended by adding a new paragraph (d) to read as follows:

§ 16.6 Establishment of fees and charges.

* * * * * *

(d) The establishment of fees and charges under this section may, at any time, be suspended by the Secretary for any length of time.

[Docket No. 75P–0322]

CANNED VEGETABLES

Canned Peas; Standards of Identity, Quality, and Fill of Container; Extension of Time for Comment

AGENCY: Food and Drug Administration.

ACTION: Extension of time for comment.

SUMMARY: The Food and Drug Administration (FDA), based upon a request for extension of time submitted by National Canners Association, is extending to November 8, 1977 the time for comment on the proposed amendments to the canned pea standards of identity, quality, and fill of container.

DATE: New deadline for comments, November 8, 1977.

ADDRESS: Written comments to the Hearing Clerk (HFC–20), Food and Drug Administration, Rm. 4–65, 5600 Fishers Lane, Rockville, MD 20857.

V42168 AUG 30 77 UMI

FOR FURTHER INFORMATION CONTACT:

Prince G. Harrill, Bureau of Foods (HFF–411), Food and Drug Administration, Department of Health, Education, and Welfare, 200 C St. SW., Washington, DC 20204, (202–245–1164).

SUPPLEMENTARY INFORMATION: In the FEDERAL REGISTER of June 7, 1977 (42 FR 29014), the Commissioner of Food and Drugs proposed amendments to the standards of identity, quality, and fill of container for canned peas. Comments were to be filed by August 8, 1977.

The Commissioner has received a request for an extension of the comment period from the National Canners Assocaition to provide time for the gathering of data to study the impact on the canning industry of the proposed reduction in the maximum level of alcohol-insoluble solids from 23.5 percent to 21 percent for early peas. The Commissioner concludes that the request for the extension should be granted and hereby extends the comment period on the proposal to November 8, 1977.

Interested persons may submit to the Hearing Clerk, Food and Drug Administration, written comments regarding this proposal. Four copies of all comments shall be submitted, except that individuals may submit single copies of comments, and comments shall be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the Hearing Clerk's office between 9 a.m. and 4 p.m., Monday through Friday.

(Federal Food, Drug, and Cosmetic Act (secs. 401, 701(e), 52 Stat. 1046 as amended, 70 Stat. 919 as amended (21 U.S.C. 341, 371(e))) under authority delegated to the Commissioner (21 CFR 5.1).)

Dated: August 23, 1977.

WILLIAM F. RANDOLPH,
Acting Associate Commissioner for Compliance.

[Docket No. 77N-0035]

ACONITIC ACID

Proposed Affirmation of Gras Status as Direct Human Food Ingredient

AGENCY: Food and Drug Administration.

ACTION: Proposed rule.

SUMMARY: This is a proposal to affirm as generally recognized as safe (GRAS) aconitic acid as a direct human food ingredient. The safety of this ingredient has been evaluated pursuant to the comprehensive safety review being conducted by the agency. The proposal would list the ingredient as a direct food substance affirmed as GRAS.

DATES: Comments by October 31, 1977.

ADDRESSES: Written comments to the Hearing Clerk (HFC–20), Food and Drug Administration, Rm. 4–65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT:

Corbin I. Miles, Bureau of Foods (HFF–335), Food and Drug Administration, Department of Health, Education, and Welfare, 200 C St. SW., Washington, D.C. 20204, (202–472–4750).

SUPPLEMENTARY INFORMATION: The Food and Drug Administration is conducting a comprehensive safety review of direct and indirect human food ingredients classified as generally recognized as safe (GRAS) or subject to a prior sanction. The Commissioner of Food and Drugs has issued several notices and proposed regulations, published in the FEDERAL REGISTER of July 26, 1973 (38 FR 20040), initiating this review. Pursuant to this review, the safety of aconitic acid has been evaluated. In accordance with the provisions of § 170.35 (formerly § 121.40, prior to recodification published in the FEDERAL REGISTER of March 15, 1977 (42 FR 14302)), the Commissioner proposes to affirm the GRAS status of this ingredient.

Aconitic acid, 1,2,3-propenetricarboxylic acid, occurs in the leaves and tubers of *Aconitum napellus* L. and other Ranunculaceae. It is also found in yarrow (Achillea sp.) and horsetails (Equisetum sp.) as well as in other plants such as beets and sugarcane. Depending on the natural source, aconitic acid is also called achilleic acid, citridic acid and equisetic acid.

Trans-aconitic acid can be isolated during the processing of sugarcane by precipitating it as the calcium salt from cane syrup or molasses. The concentration in molasses ranges from 1.8 to 2.5 percent. Aconitic acid may be synthesized from citric acid by dehydration with sulfuric acid, or by catalytic dehydration. The cis form is somewhat unstable and is easily rearranged to the trans form by heating.

Aconitic acid is listed in §182.60 (formerly §121.101(g), prior to recodification published in the FEDERAL REGISTER of March 15, 1977 (42 FR 14302)), as GRAS for use in food as a synthetic flavoring agent and adjuvant, pursuant to a regulation published in the FEDERAL REGISTER of May 9, 1961 (26 FR 3991), and subsequently recodified.

A representative cross-section of food manufacturers was surveyed to determine the specific foods in which aconitic acid was used and at what levels. Information from surveys of consumer consumption was obtained and combined with the manufacturing information to obtain an estimate of consumer exposure to this substance. It was reported that the amount of aconitic acid used in food in 1970 was 229 pounds. Also, the data indicate that the use of this substance in nonalcoholic beverages, baked goods, and frozen dairy products may have increased from 1964 to 1970.

Aconitic acid has been the subject of a search of the scientific literature from 1920 to the present. The parameters used in the search were chosen to discover any articles that considered (1) chemical toxicity, (2) occupational hazards, (3) metabolism, (4) reaction products, (5) degradation products, (6) any reported carcinogenicity, teratogenicity or mutagenicity, (7) dose response, (8) reproductive effects, (9) histology, (10) embryology, (11) behavioral effects, (12) detection, and (13) processing. A total of 79 abstracts was reviewed and 10 particularly pertinent reports have been summarized in a scientific literature review.

The scientific literature review shows, among other studies, the following information as summarized in the report of the Select Committee on GRAS Substances (hereinafter referred to as the Select Committee), selected by the Life Sciences Research Office of the Federation of American Societies for Experimental Biology:

The form of aconitic acid used in foods is trans-aconitic acid; its isomer, cis-aconitic acid, is an intermediate in the tricarboxylic acid cycle of cellular metabolism. The conversion of the trans to the cis form is an endothermic reaction and does not occur spontaneously. While an isomerase for the interconversion has been detected in *Pseudomonas* sp. and sugar cane, the enzyme has not been identified in mammalian tissues.

There are few definitive studies on possible toxicity of trans-aconitic acid. For many years aconitic acid has been implicated in the ruminant syndrome, grass tetany, because the acid is present in *Equisetum arvense*, the common horsetail, as well as several grasses and other plants. Grass tetany results in toxic symptoms in cattle, sheep, and horses. However, Camp et al. were not able to produce the syndrome in six pregnant ewes by oral administration of either the free acid or potassium aconitate as a 25 percent solution in water. The dose of potassium salt was 1.0 g per kg body weight per day for 7 days and subsequently increased in increments of 0.5 g per kg body weight for each week until a level of 4.5 g per kg was reached. In sheep receiving potassium aconitate, there was a decrease in serum magnesium level and an increase in the serum phosphate level. There was a significant decrease in the average serum potassium level of sheep similarly treated with trans-aconitic acid, but no significant changes in serum levels of magnesium or phosphate occurred. Animals killed by lethal doses of either the free acid or salt (4 g per kg) showed nonspecific changes in kidneys, liver, heart and lungs.

In another study, Kennedy fed sheep diets containing 0.1 and 0.2 mole per day (about 387 to 774 mg per kg of body weight) of partially neutralized trans-aconitic acid for five days. Experimental animals appeared healthy and exhibited normal levels of blood citrate, ketones, and aconitate but increased urinary citrate. Kennedy also injected 1.0 millimole per kg doses of neutralized trans-aconitic, cis-aconitic, and citric acid into the jugular vein of sheep. The intravenous injection of 1.0 millimole (192 mg per kg) of citric acid was lethal to one of the five experimental animals. No adverse reaction followed the intravenous injection of 1.0 millimole (174 mg per kg) of trans-aconitic acid. It rapidly disappeared from the serum; 40 percent of the injected material was recovered in the urine in 24 hours. Subsequent experiments indicated that injection of 57.6 mg per kg of citric acid (0.3 millimole) over a 20 minute period was "close to the toxic dose", and resulted in excessive urinary calcium and citrate excretion without marked change in urinary magnesium excretion. Metabolic changes or toxic reactions to cis-aconitic acid were not mentioned. In another experiment, Kennedy noted that trans-aconitate was not affected by incubation with rumen fluid in vitro, but disappeared from the rumen following intra-ruminal administration in vivo.

Metabolic studies with other animals are less extensive. Lomba et al. perfused rabbits intravenously with a number of organic acids. They observed that trans-aconitic acid had approximately one-tenth the toxicity of citric acid and was less active in disturbing electrolyte balance of the blood. Wright and Wolff reported that single oral doses of sodium trans-aconitate slightly reduced the blood serum magnesium levels of guinea pigs dosed at 666 mg per kg, but did not reduce serum magnesium of sheep given 0.29 moles of the salt by stomach tube (equivalent to about 2.1 g per kg). No other effects were observed. In other experiments, guinea pigs fed a diet containing 6.8 percent trans-aconitate did not show any ill effects after 13 days of feeding. Weight gains were comparable to controls. Labeled citrate injected into guinea pigs previously dosed with trans-aconitate (560 mg per kg) did not effect release of radioactive CO_2.

Trans-aconitic acid competitively inhibits the enzyme aconitase in vitro and thus blocks the conversion of citric acid to isocitric acid by way of the intermediary formation of cis-aconitic acid. Wright and Wolff indicate that this effect has not been observed in vivo although increases in citric acid excretion have been observed occasionally.

Sodium trans-aconitate, in vitro, markedly increased the clotting time of blood although the increase was less than that produced by citrate.

No reports are available to the Select Committee that contain information on possible carcinogenic, mutagenic, reproductive or teratogenic effects from feeding aconitic acid to animals or man.

All of the available safety information on aconitic acid has been carefully evaluated by qualified scientists of the Select Committee. It is the opinion of the Select Committee that:

The limited data on trans-aconitic acid indicate it to be less toxic than citric acid. Trans-aconitate salts appear to be excreted readily by the kidneys. There is no direct evidence that trans-aconitic acid is utilized as is the cis-aconitic acid isomer in mammalian metabolism although non-specific oxidation probably occurs.

It is the conclusion of the Select Committee that there is no evidence in the available information on aconitic acid that demonstrates, or suggests reasonable grounds to suspect, a hazard to the public when it is used at levels that are now current or that might reasonably be expected in the future. Based upon his own evaluation of all available information on aconitic acid, the Commissioner concurs with this conclusion. The Commissioner therefore concludes that no change in the current GRAS status of aconitic acid is justified.

Copies of the scientific literature review on aconitic acid, and the report of the Select Committee are available for review at the office of the Hearing Clerk, Rm. 4–65, Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, and may be purchased from the National Technical Information Service, 5285 Port Royal Road, Springfield, VA 22151, as follows:

Title	Order No.	Price code	Price [1]
Aconitic Acid (scientific literature review)	PB-223-847/AS	A02	$3.50
Aconitic Acid (select committee report)	PB-254-534/AS	A02	3.50

[1] Price subject to change.

This proposed action does not affect the present use of aconitic acid for pet food or animal feed.

Therefore, under the Federal Food, Drug and Cosmetic Act (sec. 201(s), 409, 701(a), 52 Stat. 1055, 72 Stat. 1784–1788 as amended (21 U.S.C. 321(s), 348, 371 (a))) and under authority delegated to him (21 CFR 5.1), the Commissioner proposes that Parts 182 and 184 be amend as follows:

PART 182—SUBSTANCES GENERALLY RECOGNIZED AS SAFE

§ 182.60 [Amended]

1. In § 18260 *Synthetic flavoring substances and adjuvants* by deleting the entry for "Aconitic acid (equisetic acid, citridic acid, achilleic acid)".

PART 184—DIRECT FOOD SUBSTANCES AFFIRMED AS GENERALLY RECOGNIZED AS SAFE

2. By adding new § 184.1007 to read as follows:

§ 184.1007 Aconitic acid.

(a) Aconitic acid [1,2,3,-propenetricarboxylic acid ($C_6H_6O_6$), CAS Reg. No. 000499-12-7] occurs in the leaves and tubers of *aconitum napellus* L. and other *Ranunculaceae*. Trans-aconitic acid can be isolated during sugarcane processing, by precipitation as the calcium salt from cane sugar or molasses. It may be synthesized by sulfuric acid dehydration of citric acid, but not by the methanesulfonic acid method.

(b) The ingredient meets the following specifications:

(1) *Assay.* Not less than 98.0 percent of $C_3H_3(COOH)_3$, using the Food Chemicals Codex, 2d Ed. (1972)[1] test for citric acid and a molecular weight of 174.11.

(2) *Melting point.* Not less than 195° C and the determination results in decomposition of aconitic acid.

(3) *Heavy metals (as Pb).* Not more than 10 ppm.

(4) *Arsenic (as As).* Not more than 3 ppm.

(5) *Oxalate.* Passes test.

(6) *Readily carbonizable substances.* Passes Food Chemicals Codex, 2d Ed. (1972)[1] test for citric acid.

(7) *Residue on ignition.* Not more than 0.1 percent as determined by Food Chemicals Codex, 2d Ed. (1972)[1] test for citric acid.

[1] Copies may be obtained from: National Academy of Sciences, 2101 Constitution Ave. NW., Washington, DC 20037.

The substance should have infrared absorption bands at 3030, 2630, 1720, 1430, 1300, 1240, 910, 860, 780, and 750 cm^{-1} Also, an aqueous solution of the substance should have major absorption peaks at 411 and 432 nm with little or no absorption at 389 nm.

(c) The ingredient is used as a flavoring substance and adjuvant as defied in § 170.3(o)(12) of this chapter.

(d) The ingredient is used in food at levels not to exceed good manufacturing practices. Current good manufacturing practice results in a maximum level, as served, of 0.003 percent for baked goods as defined in § 170.3(n)(1) of this chapter, 0.002 percent for beverages and beverage bases, nonalcoholic as defined in § 170.3(n)(3) of this chapter, 0.0015 percent for frozen dairy products as defined in § 170.3(n)(20) of this chapter, 0.0035 percent for soft candy as defined in § 170.3(n)(38) of this chapter, and 0.0005 percent or less for all other food categories.

The Commissioner hereby gives notice that he is unaware of any prior sanction for the use of this ingredient in food under conditions different from those proposed herein. Any person who intends to assert or rely on such a sanction shall submit proof of its existence in response to this proposal. The regulation proposed will constitute a determination that excluded uses would result in adulteration of the food in violation of section 402 of the act, and the failure of any person to come forward with proof of such an applicable prior sanction in response to this proposal constitutes a waiver of the right to assert or rely on such sanction at any later time. This notice also constitutes a proposal to establish a regulation under Part 181 (21 CFR Part 181), incorporating the same provisions, in the event that such a regulation is determined to be appropriate as a result of submission of proof of such an applicable prior sanction in response to this proposal.

Interested persons may, on or before October 31, 1977, file with the Hearing Clerk, Food and Drug Administration, Rm. 4–65, 5600 Fishers Lane, Rockville, MD 20857, written comments (preferably in quadruplicate) regarding this proposal. Received comments may be seen in the above office during working hours, Monday through Friday.

NOTE.—The Food and Drug Administration has determined that this document does not contain a major proposal requiring preparation of an inflation impact statement under

MALIC ACID

Proposed Affirmation of GRAS Status as Direct Human Food Ingredient

AGENCY: Food and Drug Administration.

ACTION: Proposal.

SUMMARY: This is a proposal to affirm as generally recognized as safe (GRAS) malic acid as a direct human food ingredient. The safety of this ingredient has been evaluated pursuant to a comprehensive safety review being conducted by the agency. The proposal would list the ingredient as a direct food substance affirmed as GRAS.

DATE: Comments by October 31, 1977.

ADDRESS: Written comments to the Hearing Clerk (HFC-20), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT:

Corbin I. Miles, Bureau of Foods (HFF-335), Food and Drug Administration, Department of Health, Education, and Welfare, 200 C St. SW., Washington, D.C. 20204 (202-472-4750).

SUPPLEMENTARY INFORMATION: The Food and Drug Administration is conducting a comprehensive safety review of direct and indirect human food ingredients classified as generally recognized as safe (GRAS) or subject to a prior sanction. The Commissioner of Food and Drugs has issued several notices and proposed regulations, published in the FEDERAL REGISTER of July 26, 1973 (38 FR 20040), initiating this review. Pursuant to this review, the safety of malic acid has been evaluated. In accordance with the provisions of § 170.35 (21 CFR 170.35, formerly 21 CFR 121.40 prior to recodification published in the FEDERAL REGISTER of March 15, 1977 (42 FR 14302)), the Commissioner proposes to affirm the GRAS status of this ingredient.

Malic acid, 1-hydroxy-1,2-ethanedicarboxylic acid, is a white crystalline substance, the molecular structure of which (HOOC—CHOH—CH$_2$—COOH) contains one asymmetric carbon atom. The naturally occurring isomer, L(+) malic acid, referred to as L-malic acid, occurs in many common fruits, berries, and vegetables. L-malic acid also occurs in animal tissues and body fluids where it is an intermediary metabolite in the citric acid cycle. Racemic DL-malic acid does not occur naturally. Essentially all the malic acid added to foods in the United States is the synthetic racemic DL-malic acid, which is made commercially from fumaric acid or malic acid.

Malic acid is listed in § 182.1069 (21 CFR 182.1069, formerly listed in 21 CFR 121.101(d) prior to recodification published in the FEDERAL REGISTER of March 15, 1977 (42 FR 14302)), as FRAS for use as a miscellaneous or general purpose food additive, pursuant to a regulation published in the FEDERAL REGISTER of January 31, 1961 (26 FR 938) where the isomeric form is not specified. In addition L-malic acid is listed as GRAS in § 182.-60 (21 CFR 182.60), formerly listed in 21 CFR 121.101(g) prior to recodification published in the FEDERAL REGISTER of March 15, 1977 (42 FR 14302)), for use as a synthetic flavoring substance, pursuant to a regulation published in the FEDERAL REGISTER of May 9, 1961 (26 FR 3991).

A representative cross section of food manufacturers was surveyed to determine the specific foods in which malic acid was used and the levels of usage. Information from surveys of consumer consumption was obtained and combined with the manufacturing information to obtain an estimate of consumer exposure to this substance. It was reported that the amount of DL-malic acid used in food in 1970 was about 7 million pounds. Also, the data indicate that the annual use of this substance in all foods increased about eightfold from 1960 to 1970.

Malic acid has been the subject of a search of the scientific literature from 1920 to the present. The parameters used in the search were chosen to discover any articles that considered (1) chemical toxicity, (2) occupational hazards, (3) metabolism, (4) reaction products, (5) degradation products, (6) any reported carcinogenicity, teratogenicity or mutagenicity, (7) dose response, (8) reproductive effects, (9) histology, (10) embryology, (11) behavioral effects, (12) detection, and (13) processing. A total of 698 abstracts was reviewed and 62 particularly pertinent reports have been summarized in a scientific literature review.

The scientific literature review shows, among other studies, the following information as summarized in the report of the Select Committee on GRAS Substances (hereinafter referred to as the Select Committee), selected by the Life Sciences Research Office of the Federation of American Societies for Experimental Biology:

The metabolism of L-malic acid has been extensively investigated and is well documented in the biochemical literature. L-malic acid is synthesized via condensation of acetyl-CoA and glyoxylate and is oxidized to oxaloacetate in the Krebs cycle. Malic dehydrogenase, malic oxidase, and certain other enzymes of intermediary metabolism are specific for L-malic acid. However when grown on media containing D-malate, *Escherichia coli* can be induced to develop a D-malic acid enzyme which catalyzes an oxidative decarboxylation of D-malate to pyruvate and carbon dioxide. D-malic acid inhibits the soluble (non-mitochondrial) L-malic dehydrogenase, but a high D-malate/L-malate ratio is needed for a pronounced effect.

The fate of D-malic acid in mammals is not known. DL-malic acid given parenterally to rabbits and dogs resulted in the urinary excretion of D-malic acid. Incubation of DL-malic acid with muscle preparations in vitro showed that the L-isomer was preferentially metabolized. Although DL-malic acid added to diets low in carbohydrates resulted in increased liver glycogen of rats, the contribution of the D-isomer was not determined.

Relatively few studies are available in which the biological effects and toxicity of the D- and L-isomers of malic acid were compared, and unfortunately, in many studies of malic acid, the authors do not specify whether L-malic or DL-malic acid was used. Malic acid as a 0.25 N solution given intravenously to rabbits in a dose of 2.49 g per kg was acutely lethal. Intraperitoneal D-malic acid in rats at 1 g per kg was not lethal, but the same dose of D-malic acid killed rats within 20 to 25 minutes. DL-malic acid given subcutaneously to one rabbit in large amounts (3 g followed the next day by 1.5 g, and 1.5 g two days later with sacrifice four hours after the last dose) produced small areas of hemorrhage in the renal cortex, limited tubular degeneration, and some glomerular obliteration. Two other rabbits receiving similar subcutaneous doses showed increases in blood nonprotein nitrogen and decreases in phenolsulphonephthalein elimination rate. The authors considered that DL-malic acid was slightly nephropathic to rabbits. In view of the known nephrotoxicity of maleic acid, it is possible that the renal pathology could have been due to maleic acid residual from the preparation of DL-malic acid employed in these studies.

Rabbits receiving cholesterol, 70 mg per kg daily, were given malic acid intraperitoneally, 300 mg twice a week for five months. Animals receiving both malic acid and cholesterol developed twice as high blood cholesterol levels as did those receiving only cholesterol. No hypercholesterolemia resulted in a control group given malic acid without added dietary cholesterol, but degeneration of elastic fibers and the accumulation of acid mucopolysaccharides in the aorta, with atherosclerotic changes in the aortic wall, were noted. Similar pathological changes were noted in rabbit aortas when cholesterol feeding was combined with citric or fumaric acids, suggesting that these agents had similar deleterious effects.

When albino rats of the Charles River strain were fed DL-malic acid in the diet for 104 weeks at levels of 0.05, 0.5 and 5.0 percent, no significant pathology was noted. Beagle dogs fed diets with the same levels of added DL-malic acid for 104 weeks also showed no gross or microscopic pathological changes due to the consumption of DL-malic acid. The malic acid intake levels from these diets would be approximately 2, 20, and 200 mg per kg per day for rats after the eighth week, and 14, 140, and 1,400 mg per kg per day for the dogs. There were significant reductions in food consumption and weight gain in both male and female rats during the first year of receiving the highest malic acid diets, but no significant differences during the second year. Hematological, blood chemistry, and urine analyses did not show any compound-related effects in either rats or dogs. Male and female rats from all experimental and control groups primarily among those receiving the highest dosage of malic acid, exhibited hunched appearance and/or alopecia during the first year. In the second year, these signs were observed in most animals from all groups. Protruding eyes were noted in six male rats in the highest dosage group during the second year, but not in males of any other group. A few females from each test group and the controls also showed protruding eyes during the second year. Some organ weight and organ/body weight ratio variations of thyroid gland, heart, liver, spleen, kidneys, and testes were observed in male and female rats of the 5 percent dietary level groups. None of these changes was considered clearly related to malic acid intake and the gross and microscopic examinations revealed no histopathology or trends suggesting a direct relationship to the dose of malic acid ingested.

After either oral or intraperitoneal administration of doses of 2.5 mg per kg of L- or [^{14}C] DL-malic acid to rats, both forms were largely oxidized to carbon dioxide and less than 10 percent of the radioactivity was excreted in the urine. The author concluded that there should be no justification for discriminating against the use of D-malic acid as a food additive because the two preparations were metabolized at the same rate However, the doses used were relatively low, and it is possible that a limited capacity to metabolize D-malic acid might not have been detected by these experiments.

The injection of 1 mg or L-, or DL-malic acid into the yolks of chicken eggs showed a small but statistically significant increase in rumplessness (4.3±1.0 percent with L-malic acid and 3.9±1.0 percent with DL-malic acid) over the controls (1.3±0.5 percent). Injection of the D-isomer had no significant effect on the occurrence of rumplessness.

The permeability of mouse embryos to L-malic acid was studied by Wales and Biggers. Uniformly labeled [^{14}C] L-malic acid did not enter 2-cell embryos; the 8-cell embryos accumulated the labeled substrate and were able to convert some to CO_2. The data also suggested that the uptake of L-malic acid was by an active transport process.

In a reproduction study in rats, DL-malic acid added at levels of 0.1 and 1.0 percent of the diet (estimated intakes approximately 4 and 40 mg per kg per day) was fed for nine weeks before mating of the P_1 [F_1] generation and continued through the sacrifice of the F_2 pups at weaning. The appearance and behavior of the parental animals and their pups were generally comparable with the controls throughout the study. Reproduction indices of the test animals were similar to those of the controls. The F_2 fetuses delivered by Caesarean section showed no significant differences between the test and control groups in the number and placement of implantation and resorption sites, or the number, length and weight of the live fetuses. There were no dead fetuses, and no skeletal abnormalities or differences in skeletal development between the test and control fetuses.

Teratologic studies have been made on pregnant mice and rats following the oral administration of DL-malic acid. Commencing on day 6 of gestation, daily doses by intubation of up to 266 mg per kg for 10 days in mice, and up to 350 mg per kg for 10 days in rats had no clearly discernible effect on ndation or on maternal or fetal survival. The number of abnormalities in either soft or skeletal tissues of test animals did not differ from those occurring spontaneously in vehicle-treated controls.

Malic acid (isomeric form not indicated) did not show teratogenic activity when aqueous solutions were injected at levels if 100 to 200 mg per kg into the air cells or yolks of unincubated eggs and eggs after 96 hours of incubation. The LD_{50} of malic acid was estimated to be 230 mg per kg upon air cell injection in unincubated eggs; 8 mg per kg upon air cell injection after 96 hours of incubation.

Mutagenicity tests of DL-malic acid were conducted using *Salmonella typhimurium* and *Saccharomyces cerevisiae* microbial assays with and without the addition of mammalian metabolic enzyme preparation. DL-malic acid did not exhibit any mutagenic activity under the conditions employed in this invitro evaluation.

No information on possible carcinogenicity of L-, D-, or DL-malic acid was available to the Select Committee.

All the available safety information on malic acid has been carefully evaluated by qualified scientists of the Select Committee. It is the opinion of the Select Committee that:

In view of the natural occurrence of L-malic acid in a variety of fruits, vegetables, and certain other foods, its important role in intermediary metabolism as a component of the Krebs cycle, rather detailed knowledge of its formation and metabolism in animals and plants, its relatively low toxicity when given orally to animals, and its specialized uses in foods and nonalcoholic beverages as an acidulant or flavoring agent, there is no scientific basis for suspecting that the amounts of L-malic acid now added to foods would be hazardous. There is no indication that malic acid is added to any foods specifically designed for infant feeding.

The scientific literature is less satisfactory on D-malic acid, the unnatural isomer, and a co-constituent of the racemic DL-malic acid, which is the form now used as a food additive.

Very little is known about the metabolism, absorption, excretion, and biological effects of D-malic acid, or whether animal species differ in the way they can utilize and tolerate this compound. DL-malic acid was employed in several of the toxicological, reproductive, and teratological studies; results suggest that D-malic acid, as a component of DL-malic acid, is not likely to have adverse effects. Some concern has been expressed about the ability of young infants to metabolize D-malic acid, but fortunately, in current practice, this does not pose a problem since DL-malic acid is not now added to infant foods.

It is the conclusion of the Select Committee that for individuals beyond the age of infancy, there is no evidence in the available information on L-malic acid and DL-malic acid that demonstrates or suggests reasonable grounds to suspect a hazard to the public when they are used at levels that are now current or that might reasonably be expected in the future. Based upon his own evaluation of all available information on malic acid, the Commissioner concurs with this conclusion. The Commissioner therefore proposes to affirm the GRAS status of malic acid.

On the other hand, the Commissioner shares the concern of the Select Committee and the Food and Agriculture Organization/World Health Organization Expert Committee on Food Additives about the possible toxicity of D-malic acid as a component of DL-racemic malic acid when ingested by infants. It was reported that the enzyme responsible for converting D-malic acid to L-malic acid is deficient in infants. It was also reported, in a survey of food manufacturers on the use of GRAS ingredients in food, that DL-malic acid is not now added to infant foods. However, because DL-malic acid is being affirmed as GRAS for direct use in food, the Commissioner believes that he should emphasize that this GRAS affirmation does not apply to the addition of D- or DL-malic acid to infant foods.

Copies of the scientific literature review, mutagenic and teratogenic evaluations, and the report of the Select Committee on malic acid are available for review at the office of the Hearing Clerk (HFC-20), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, Md. 20857, and may be purchased from the National Technical Information Service, 5285 Port Royal Rd., Springfield, Va. 22151, as follows:

Document	Order No.	Price code	Price [1]
Malic acid (scientific literature review)	PB-223-865/AS	A05	$5.00
Malic acid (teratogenic evaluation)	PB-224-872/AS	A03	4.00
Malic acid (mutagenic evaluation)	PB-245-440/AS	A03	4.00
Malic acid (select committee report)	PB-262-662/AS	A02	3.50

[1] Price subject to change.

This proposed action does not affect the present use of malic acid for pet food or animal feed.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 201(s), 409, 701(a), 52 Stat. 1055, 72 Stat. 1784-1788 as amended (21 U.S.C. 321(s), 348, 371(a))) and under authority delegated to the Commissioner (21 CFR 5.1), it is proposed that Parts 182 and 184 be amended as follows:

PART 182—SUBSTANCES GENERALLY RECOGNIZED AS SAFE

1. In Part 182, as follows:

§ 182.60 [Amended]

a. In § 182.60 *Synthetic flavoring substances and adjuvants,* by deleting the entry for "1-Malic acid."

§ 182.1069 [Deleted]

b. By deleting § 182.1069 *Malic acid.*

PART 184—DIRECT FOOD SUBSTANCES AFFIRMED AS GENERALLY RECOGNIZED AS SAFE

2. In Part 184, by adding new § 184.-1069, to read as follows:

§ 184.1069 Malic acid.

(a) Malic acid ($C_4H_6O_5$, CAS Reg. No. of L-Form 97-67-6, CAS Reg. No. of DL-form 617-48-1) is the common name for 1-hydroxy-1,2-ethanedicarboxylic acid. L(+) malic acid, referred to as L-malic acid, occurs naturally in various foods. Racemic DL-malic acid does not occur naturally, and it is made commercially by hydration of fumaric acid or maleic acid.

(b) The ingredients meet the specifications of the Food Chemicals Codex,

V 42 168 A AUG 30 77 UMI

2d Ed. (1972), as amended by the Second Supplement (1975).[1]

(c) The ingredients are used as a flavor enhancer as defined in § 170.3(o)(11) of this chapter, flavoring agent and adjuvant as defined in § 170.3(o)(12) of this chapter, and pH control agent as defined in § 170.3(o)(23) of this chapter.

(d) The ingredients are used in food, except baby food, at levels not to exceed good manufacturing practice. Current good manufacturing practice results in a maximum level, as served, of 3.4 percent for nonalcoholic beverages as defined in § 170.3(n)(3) of this chapter; 0.8 percent for gelatins, puddings, and fillings as defined in § 170.3(n)(22) of this chapter; 0.9 percent for hard candy as defined in § 170.3(n)(25) of this chapter; 2.6 percent for jams and jellies as defined in § 170.3(n)(28) of this chapter; 3.5 percent for processed fruits and fruit juices as defined in § 170.3(n)(35) of this chapter; 3.0 percent for soft candy as defined in § 170.3(n)(38) of this chapter; and 0.7 percent for all other food categories.

The Commissioner hereby gives notice that he is unaware of any prior sanction for the use of these ingredients in food under conditions different from those proposed herein. Any person who intends to assert or rely on such a sanction shall submit proof of its existence in response to this proposal. The regulation proposed above will constitute a determination that excluded uses would result in adulteration of the food in violation of section 402 of the act, and the failure of any person to come forward with proof of such an applicable prior sanction in response to this proposal constitutes a waiver of the right to assert or rely on such sanction at any later time. This notice also constitutes a proposal to establish a regulation under Part 181 (21 CFR Part 181), incorporating the same provisions, in the event that such a regulation is determined to be appropriate as a result of submission of proof of such an applicable prior sanction in response to this proposal.

Interested persons may, on or before October 31, 1977 submit to the Hearing Clerk (HFC–20), Food and Drug Administration, Rm. 4–65, 5600 Fishers Lane, Rockville, Md. 20857, written comments regarding this proposal. Four copies of all comments shall be submitted, except that individuals may submit single copies of comments, and shall be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between the hours of 9 a.m. and 4 p.m., Monday through Friday.

NOTE.—The Food and Drug Administration has determined that this document does not contain a major proposal requiring preparation of an economic impact statement under Executive Order 11821 and OMB Circular A–107.

NOTE.—Incorporations by reference approved by the Director of the Office of the Federal Register on July 10, 1973 and June 20, 1977. Referenced materials are on file at the Federal Register's library.

Dated: August 23, 1977.

WILLIAM F. RANDOLPH,
Acting Associate Commissioner for Compliance.

Center for Disease Control

[30 CFR Parts 70 and 71]

COAL MINE HEALTH NOISE STANDARD

Public Hearing

AGENCY: National Institute for Occupational Safety and Health (NIOSH).

ACTION: Notice of public hearing.

SUMMARY: This notice announces that a public hearing will be held under the provisions of section 101(g) of the Federal Coal Mine Health and Safety Act of 1969 (30 U.S.C. 811(g)). The hearing is in response to objections filed concerning amendments to 30 CFR Parts 70 and 71 which propose to permit the use of noise dosimeters for determining noise exposure in coal mines.

DATES: The hearing will be held on September 29, 1977, beginning at 9 a.m. Requests to participate in the hearing must be received by September 22, 1977.

ADDRESSES: The hearing will be held in Conference Room "G" of the Department of Health, Education, and Welfare's Parklawn Building, 5600 Fishers Lane, Rockville, Md.

Those persons wishing to make statements at the hearing should apply in writing to Regulations Assistant, NIOSH, Room 8–11, 5600 Fishers Lane, Rockville, Md. 20857, stating the issues upon which the person wishes to be heard and the time requested.

FOR FURTHER INFORMATION CONTACT:

Ms. Mary L. Hough, Regulations Assistant, NIOSH, Phone: 301–443–6268.

SUPPLEMENTARY INFORMATION: In the FEDERAL REGISTER of June 2, 1977 (42 FR 28151), the Secretary of the Interior published proposed amendments to permit the use of noise dosimeters to meet the noise measurement requirements in Parts 70 and 71 of Title 30, Code of Federal Regulations. The proposed amendments had been transmitted to the Department of the Interior by the Secretary of Health, Education, and Welfare under section 101(d) of the Federal Coal Mine Health and Safety Act of 1969 (30 U.S.C. 811(d)).

Interested persons were afforded a period of 45 days within which to submit comments, suggestions, objections, and requests for public hearing. On August 23, 1977, the Secretary of the Interior published a notice specifying that prior to the last day of the period fixed for the submission of comments, he received written objections to the amendments, stating the grounds for such objections with sufficient particularity and requesting a public hearing on such objections (42 FR 42362).

Therefore, under section 101(g) of the Act, a public hearing will be held for the purpose of receiving relevant evidence on the following issues:

(1) Whether the proposed changes in the Coal Mine Health Noise Standard should not be promulgated until after the draft American National Standards Institute (ANSI) Standard Specification for Personal Noise Dosimeters S1.25 is finalized and approved;

(2) Whether the requirement in § 70.505, that sound level meters meet ANSI, "Specification for Sound Level Meters", S1.4–1971 (Type S2A) should be revised to require that only sound level meters certified by NIOSH be permitted to be used;

(3) Whether the noise dosimeter is a reliable and accurate instrument and whether its use in underground and surface coal mines is desirable; and

(4) Whether the cost of using noise doismeters to determine noise exposure in coal mines would be prohibitive.

The hearing will be conducted in an informal manner by a panel comprised of representatives from the National Institute for Occupational Safety and Health. The hearing will be chaired by Mr. B. Thomas Schelb, Acting Chief, Coal Mine Standards Activity, Division of Criteria Documentation and Standards Development, NIOSH.

Persons making statements need not be sworn or make affirmation. Each party shall be given an opportunity to make a statement concerning the issues under consideration, an opportunity to make supplementary statements which may include comments on or rebuttal of other parties' views, and an opportunity to make recommendations concerning the issues in any of his/her statements.

A verbatim transcript of the hearing proceedings will be maintained. All written statements, charts, tabulations, and other data shall be received in the record. The Chairman shall submit to the Secretary of Health, Education, and Welfare the verbatim transcript, including all charts, tabulations, and other exhibits that are part of the hearing record, together with recommended findings of fact. Within 60 days after the completion of the hearings, findings of fact concerning the issues presented at the hearing will be made public. Thereafter, amendments to 30 CFR Part 70, with such modifications as are appropriate, will be transmitted to the Secretary of the Interior for promulgation.

Dated: August 26, 1977.

WILLIAM A. FELSING, JR.,
Acting Director, National Institute for Occupational Safety and Health.

POSTAL SERVICE

[39 CFR Part 259]

SERVICES PERFORMED FOR OTHER GOVERNMENT AGENCIES

Reimbursement of Postal Service for Nonpostal Services Performed

AGENCY: Postal Service.

ACTION: Proposed rule.

SUMMARY: Under this proposed rule the Postal Service would elaborate in its regulations the policy it expects to follow in establishing reasonable fees and charges for nonpostal services performed for agencies of the Federal as well as state governments. Examples of these nonpostal services are the sale of food stamps, the sale of migratory bird stamps, the receipt of passport applications, performance of housing vacancy surveys for the Federal Home Loan Bank Board, etc. Our basic purpose in this matter is to devise a policy which will result in prices reasonably related to the services performed and in consistency of treatment among the various agencies for which services are provided.

DATE: Comments must be received on or before September 29, 1977.

ADDRESS: Written comments should be directed to Director, Office of Rates, Rates and Classification Department, U.S. Postal Service, Washington, D.C. 20260.

FOR FURTHER INFORMATION CONTACT:

Mr. Stuart J. Winston, (202–245–4422).

SUPPLEMENTAL INFORMATION: The proposed rule states that in establishing reasonable fees and charges for nonpostal services, the Postal Service "considers the value of the time of the personnel directly involved in the performance of the service, including direct supervision and supporting functions, plus the costs of materials and supplies specifically sold, used, or consumed." The Postal Service considers that the salaries, fringe benefits and expenses of the person performing the service would be encompassed by the phrase "value of the time of the personnel directly involved". We also consider that the time of these persons which is applicable to the service being priced would include any time spent preparing for and closing out after actual transactions. As to supervision, a portion of the time of only the first level of supervision would be included. However, a portion of the time of other personnel who are involved less directly in the service would be included, such as the time spent maintaining accounting or other records.

In accordance with standard principles of postal ratemaking, fees and charges for nonpostal services would also include a reasonable contribution to Postal Service overhead costs.

To carry out the above purposes the Postal Service proposes to delete the last sentence of 39 CFR 259.1(a), to add a new paragraph (b) describing the proposed procedure to be used for reimbursement of the Postal Service for services performed, and to redesignate existing paragraphs (b), (c) and (d).

Accordingly, although exempt from the notice and comment requirements of the Administrative Procedure Act (5 U.S.C. 553 (b), (c)) regarding proposed rulemaking by 39 U.S.C. 410(a), the Postal Service invites public comment on the following proposed revisions of title 39, Code of Federal Regulations:

In § 259.1 the last sentence of paragraph (a) is deleted; paragraphs (b), (c), and (d) are redesignated (c), (d), and (e) respectively; and new paragraph (b) is added reading as follows:

§ 259.1 Government.

* * * * *

(b) *Reimbursement.* The Postal Service establishes reasonable fees and charges for nonpostal services performed for agencies of the Federal as well as State governments. In establishing such fees and charges, the Postal Service considers the value of time of the personnel directly involved in the performance of the service, including direct supervision and supporting functions, plus the cost of materials and supplies specifically sold, used or consumed. Also included is an element representing a reasonable share of Postal Service general overhead costs which are not attributable or assignable specifically to any product or service. The establishment of such fees and charges shall be reasonably consistent with the methods employed in establishing rates and fees for postal services then in effect.

* * * * * *

(39 U.S.C. 401(2), 404(6), 411.)

ROGER P. CRAIG,
Deputy General Counsel.

Office of the Secretary

[41 CFR Parts 14–1, 14–7]

INDIAN PREFERENCE IN EMPLOYMENT, TRAINING, AND SUBCONTRACTING

Proposed Policies and Procedures

AGENCY: Department of the Interior.

ACTION: Proposed rule.

SUMMARY: The proposed rule prescribes policies and procedures to be added to the Interior Procurement Regulations to implement Sec. 7(b) of the Indian Self-Determination and Education Assistance Act. The rule proposed requires that preferences be given to Indians in employment, training, and subcontracting under certain types of contracts.

DATES: Comments on the proposed rule must be received in writing on or before September 29, 1977.

ADDRESS: Division of Procurement and Grants, Office of Administrative and Management Policy, Department of the Interior, 18th and C Streets NW., Washington, D.C. 20240.

FOR FURTHER INFORMATION CONTACT:

William Opdyke (202–343–5914).

SUPPLEMENTARY INFORMATION: The primary author of this document is William Opdyke, Division of Procurement and Grants, Office of Administrative and Management Policy (202–343–5914).

Section 7(b) of the Indian Self-Determination and Education Assistance Act (Sec. 7(b), Pub. L. 93–638, 88 Stat. 2205, 25 U.S.C. 450e(b)), requires that any contract or subcontract entered into pursuant to certain specified Acts or Acts authorizing contracts with Indian organizations or for the benefit of Indians shall, to the greatest extent feasible, require that preferences and opportunities be given for training and employment of Indians in connection with such contracts and that preference be given in the award of subcontracts to Indian organizations and Indian-owned economic enterprises under such contracts. The proposed rule amends Parts 14–1 and 14–7 of 41 CFR Chapter 14 (Interior Procurement Regulations) by adding implementing regulations.

Proposed regulations were sent to approximately 250 tribal leaders for review and comment. Comments were received from four tribes and one law firm. In general, the comments received recommended a broad interpretation of the applicability of Section 7(b); addition of record, reporting, and sanction requirements to the Indian Preference clause; revision of employment notice requirements to Tribes; addition of complaint procedures; strengthening of reporting requirements under the Indian Preference Program clause and lowering the originally proposed $100,000 threshold for inclusion of the clause in certain contracts; and recognition of Tribal preference requirements in certain types of contracts. All comments received were thoroughly reviewed and considered, and all significant recommendations were taken into account in these proposed regulations.

NOTE.—The Department of the Interior has determined that this document does not contain a major rule requiring preparation of an Inflation Impact Statement under Executive Order 11821 or OMB Circular A–107.

Dated: August 19, 1977.

RICHARD R. HITE,
Deputy Assistant Secretary of the Interior.

Accordingly, pursuant to the authority of the Secretary of the Interior contained in 5 U.S.C. 301, proposed amendments to

V 42168 AUG 30 77 UMI

41 CFR Parts 14–1 and 14–7 are as follows:

1. The Table of Contents of Part 14–1 is amended by adding a new § 14–1.354 as follows:

Subpart 14–1.3—General Policies

Sec.

* * * * *

14–1.354 Indian Preference in employment, training, and subcontracting opportunities.

2. Subpart 14–1.3 is amended by adding a new § 14–1.354 as follows:

Subpart 14–1.3—General Policies

§ 14–1.354 Indian preference in employment, training, and subcontracting opportunities.

(a) *Statutory requirements.* Section 7(b) of the Indian Self-Determination and Education Assistance Act (Sec. 7(b), Pub. L. 93–638, 88 Stat. 2205 (25 U.S.C. 450e(b))) requires that any contract or subcontract entered into pursuant to the Act; the Act of April 16, 1934 (48 Stat. 596, 25 U.S.C. 452), as amended, the Johnson-O'Malley Act; or any other Act authorizing contracts with Indian organizations or for the benefit of Indians shall require that, to the greatest extent feasible: (1) Preferences and opportunities for training and employment in connection with the administration of such contracts shall be given to Indians; and, (2) Preference in the award of subcontracts in connection with the administration of such contracts shall be given to Indian organizations and to Indian-owned economic enterprises as defined in Section 3 of the Indian Financing Act of 1974 (Sec. 3, Pub. L. 93–262, 88 Stat. 77, 25 U.S.C. 1452).

(b) *Applicability.* (1) The Indian Preference clause, set forth in § 14–7.5002 of this chapter, shall be included in all solicitations issued and contracts awarded by: (i) The Bureau of Indian Affairs, (ii) a procuring activity other than the Bureau of Indian Affairs when the contract is entered into pursuant to an act specifically authorizing contracts with Indian organizations and, (iii) a procuring activity other than the Bureau of Indian Affairs where the work to be performed is specifically for the benefit of Indians and is in addition to any incidental benefits which might otherwise accrue to the general public. (2) The Indian Preference Program clause, set forth in § 14–7.5003 of this chapter, should be included in all solicitations issued and contracts awarded by a procuring activity which may exceed $50,000, which contain the clause required by paragraph (b)(1) of this § 14–1.354 and where the work under the contract will be performed in whole or in part on or near an Indian reservation(s). The Indian Preference Program clause may also be included in solicitations issued and contracts awarded by a procuring activity which may not exceed $50,000, but which contain the clause required by paragraph (b)(1) of this § 14–1.354 and which, in the opinion of the procuring activity, offer substantial opportunities for Indian employment, training and subcontracting.

(c) *Definitions.* For purposes of this § 14–1.354, the following definitions shall apply:

(1) "Indian" means a person who is a member of an Indian Tribe; the contractor shall be responsible for determining whether a person is an Indian after coordination with the officials of the Indian Tribe concerned.

(2) "Indian Tribe" means an Indian Tribe, band, nation, or other organized group or community, including any Alaska Native village or regional or village corporation as defined in or established pursuant to the Alaska Native Claims Settlement Act (85 Stat. 688, 43 U.S.C. 1601) which is recognized as eligible for the special programs and services provided by the United States to Indians because of their status as Indians;

(3) "Indian organization" means the governing body of any Indian Tribe or entity established or recognized by such governing body for the purpose of the Indian Financing Act of 1974 (88 Stat. 77, 25 U.S.C. 1451); and

(4) "Indian-owned economic enterprise" means any Indian-owned commercial, industrial, or business activity established or organized for the purpose of profit provided that such Indian ownership shall constitute not less than 51 per centum of the enterprise.

(5) "Indian reservation" includes Indian reservations, public domain Indian allotments, former Indian reservations in Oklahoma, and land held by incorporated Native groups, regional corporations, and village corporations under the provisions of the Alaska Native Claims Settlement Act, (85 Stat. 688, 43 U.S.C. 1601 et seq.).

(6) "On or near an Indian reservation" means on a reservation or the distance within that area surrounding an Indian reservation(s) that a person seeking employment could reasonably be expected to commute in the course of a work day.

(d) *Compliance enforcement.* (1) The procuring activity concerned shall be responsible for conducting periodic reviews to insure contractor compliance with the requirements of the clauses prescribed by §§ 14–7.5002 and 14–7.5003 of this chapter. These reviews may be conducted with the assistance of the Indian Tribe(s) concerned. (2) Complaints of noncompliance with the requirements of the clauses prescribed by §§ 14–7.5002 and 14–7.5003 which are filed in writing with the procuring activity shall be investigated and resolved by the contracting officer.

(e) *Tribal preference requirements.* Where the work under a contract is to be performed on an Indian reservation(s), the procuring activity may supplement the clause prescribed by § 14–7.5003 of this chapter by adding specific employment preference requirements of a Tribe or Tribes developed jointly between the procuring activity and the Tribe(s) to the extent such requirements are consistent with Federal laws and regulations. Any supplemental preference requirements to be added to the clause in § 14–7.5003 of this chapter shall be included in the solicitation and clearly identified in order to ensure uniform understanding of the additional requirements by all prospective bidders or offerors.

3. The Table of Contents of Part 14–7 is amended by deleting and reserving § 14–7.650–6 and by adding new §§ 14–7.5002 and 14–7.5003 as follows:

Subpart 14–7.6—Fixed Price Construction Contracts

Sec.

* * * * *

14–7.650–6 [Reserved]

* * * * *

Subpart 14–7.50—Special Contract Clauses

* * * * *

14–7.5002 Indian preference.
14–7.5003 Indian preference programs.

4. Subpart 14–7.6 is amended by deleting and reserving § 14–7.650–6 as follows:

Subpart 14–7.6—Fixed Price Construction Contracts

§ 14–7.650 Additional Interior contract clauses.

* * * * *

§ 14–7.650–6 [Reserved]

* * * * *

5. Subpart 14–7.50 is amended by adding new §§ 14–7.5002 and 14–7.5003 as follows:

Subpart 14–7.50—Special Contract Clauses

* * * * *

§ 14–7.5002 Indian preference.

The following clause shall be used as prescribed in § 14–1.354(b)(1) of this chapter:

INDIAN PREFERENCE

(a) The contractor agrees to give preferences to Indians who can perform the work required regardless of age, sex, religion, or tribal affiliation for training and employment opportunities under this contract and, to the extent feasible consistent with the efficient performance of this contract, training and employment preferences and opportunities shall be provided to Indians regardless of age, sex, religion, or tribal affiliation who are not fully qualified to perform under this contract. The contractor also agrees to give preference to Indian organizations and Indian-owned economic enterprises in the awarding of any subcontracts consistent with the efficient operation of this contract. The contractor shall maintain such records as are necessary to indicate compliance with this paragraph (a).

(b) In connection with the Indian employment preference requirements of this clause, the contractor shall also provide opportunities for training incident to such employment. Such training shall include on-the-job, classroom, or apprenticeship training which is designed to increase the vocational effectiveness of an Indian employee.

(c) If the contractor is unable to fill its training and employment needs after giving full consideration to Indians as required by this clause, those needs may be satisfied by selection of persons other than Indians in accordance with the clause of this contract entitled "Equal Opportunity."

(d) If no Indian organization or Indian-owned economic enterprises are available for awarding of subcontracts in connection with the work performed under this contract, the contractor agrees to comply with the provisions of this contract involving utilization of small business, labor surplus area, and minority business firms.

(e) As used in this clause: (1) "Indian" means a person who is a member of an Indian Tribe; the contractor shall be responsible for determining whether a person is an Indian after coordination with officials of the Indian Tribe concerned.

(2) "Indian Tribe" means an Indian Tribe, band, nation, or other organized group or community, including any Alaska Native village or regional or village corporation as defined in or established pursuant to the Alaskan Native Claims Settlement Act (85 Stat. 688, 43 U.S.C. 1601) which is recognized as eligible for the special programs and services provided by the United States to Indians because of their status as Indians;

(3) "Indian organization" means the governing body of any Indian Tribe or entity established or recognized by such governing body for the purpose of the Indian Financing Act of 1974 (88 Stat. 77, 25 U.S.C. 1451; and

(4) "Indian-owned economic enterprise" means any Indian-owned commercial, industrial, or business activity established or organized for the purpose of profit provided that such Indian ownership shall constitute not less than 51 per centum of the enterprise.

(f) The contractor agrees to include the provisions of this clause including this paragraph (f) in each subcontract awarded under this contract.

(g) In the event of noncompliance with this clause, the contractor's right to proceed may be terminated in whole or in part by the contracting officer and the work completed in a manner determined by the contracting officer to be in the best interests of the Government.

§ 14–7.5003 Indian preference program.

The following clause shall be used as prescribed in § 14–1.354(b)(2) of this chapter:

INDIAN PREFERENCE PROGRAM

(a) In addition to the requirements of the clause of this contract entitled "Indian Preference," the Contractor agrees to establish and conduct an Indian preference program which will expand the opportunities for Indian organizations and Indian-owned economic enterprises to receive a preference in the awarding of subcontracts and which will expand opportunities for Indians to receive preferences for training and employment in connection with the work to be performed under this contract. In this connection, the Contractor shall:

(1) Designate a liaison officer who will (i) maintain liaison with the Government and the Tribe(s) on Indian preference matters, (ii) supervise compliance with the provisions of this clause, and (iii) administer the Contractor's Indian preference program.

(2) Advise its recruitment sources in writing and include a statement in all advertisements for employment that Indian applicants will be given preference in employment and training incident to such employment.

(3) Not less than twenty (20) calendar days prior to commencement of work under this contract, post a written notice, in the Tribal office of any reservations on which or near where the work under this contract is to be performed, which sets forth the contractor's employment needs and related training opportunities. The notice shall include the approximate numbers and types of employees needed; the approximate dates of employment; the experience or special skills required for employment, if any; training opportunities available; and all other pertinent information necessary to advise prospective employees of any other employment requirements. The contractor shall also request the Tribe(s) on or near whose reservation(s) the work is to be performed to provide assistance to the contractor in filling its employment needs and training opportunities. The contracting officer will advise the contractor of the name, location, and phone number of the Tribal officials to contact in regard to the posting of notices and requests for Tribal assistance.

(4) Give public notice of subcontracting opportunities and request the Tribe(s) on or near whose reservation(s) the work under this contract is to be performed to provide assistance and information on Indian organizations and Indian-owned economic enterprises which may serve as potential sources for subcontracted work. The contracting officer shall advise the contractor of the name, location, and phone number of Tribal officials to contact in regard to requests for Tribal assistance and information.

(5) Maintain written records under this contract which indicate: (a) The names and addresses of all Indians seeking employment for each employment position available under this contract; (b) the number and types of positions filled by (i) Indians and (ii) non-Indians, and the name, address and position of each Indian employed under this contract; (c) for those positions where there are both Indian and non-Indian applicants, and a non-Indian is selected for employment, the reason(s) why the Indian applicant was not selected; (d) actions taken to give preference to Indian organizations and Indian-owned economic enterprises for all subcontracting opportunities which exist under this contract; and (e) the names and addresses of all Indian organizations and Indian-owned economic enterprises (i) contacted, and (ii) receiving subcontract awards under this contract.

(6) The contractor shall submit to the contracting officer for approval a quarterly report which summarizes the contractor's Indian preference program and indicates (a) the number and types of available positions filled by (i) Indians and (ii) non-Indians and (b) the number and dollar amounts of all subcontracts awarded to (i) Indian organizations and Indian-owned economic enterprises and (ii) all other firms.

(7) The contracting officer or his authorized representative shall have access to the written records required by this clause during the period of this contract and up to one year after the completion of this contract.

(b) For purposes of this clause: the following definitions of terms shall apply:

(1) The terms "Indian," "Indian Tribe," "Indian organization," and "Indian-owned economic enterprise" are defined in the clause of this contract entitled "Indian Preference."

(2) "Indian reservation" includes Indian reservations, public domain Indian allotments, former Indian reservations in Oklahoma, and land held by incorporated Native groups, regional corporations, and village corporations under the provisions of the Alaska Native Claims Settlement Act, (85 Stat. 688, 43 U.S.C. 1601 et seq.).

(3) "On or near an Indian reservation" means on a reservation or reservations or within that area surrounding an Indian reservation(s) where a person seeking employment could reasonably be expected to commute to and from in the course of a work day.

(c) The contractor agrees to insert in any subcontracts hereunder which may exceed $50,000 provisions which conform substantially to the language of this clause and to notify the contracting officer of such subcontracts.

(d) In the event of noncompliance with this clause, the contractor's right to proceed may be terminated in whole or in part by the contracting officer and the work completed in a manner determined by the contracting officer to be in the best interest of the Government.

FEDERAL COMMUNICATIONS COMMISSION

[47 CFR Parts 2, 81, and 83]

[Docket No. 21370; FCC 77-580]

COAST GUARD DESIGNATED VESSEL TRAFFIC SERVICES RADIO PROTECTION AREAS

Making Frequency 156.250 Available for Port Operations Purposes

AGENCY: Federal Communications Commission.

ACTION: Notice of Proposed rulemaking.

SUMMARY: Proposed amendment of the rules to make the frequency 156.250 MHz available for port operations purposes in certain Coast Guard designated Vessel Traffic Services (VTS) radio protection areas. As a result of the assignment of maritime mobile frequencies for exclusive use for VTS purposes in certain designated areas, this proposed amendment is deemed necessary to help alleviate the growing congestion on the remaining frequencies available.

DATES: Comments must be received on or before October 7, 1977, and Reply Comments must be received on or before October 17, 1977. Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT:

Robert McNamara, Safety and Special Radio Services Bureau, 202–632–7197.

SUPPLEMENTARY INFORMATION:

In the Matter of amendment of Parts 2, 81, and 83 of the rules to make the frequency 156.250 MHz available for port operations purposes in certain Coast Guard designated Vessel Traffic Services radio protection areas.

Adopted: August 22, 1977.

Released: August 30, 1977.

1. Notice of Proposed Rulemaking is hereby given in the above-captioned matter.

2. As part of a program to implement the provisions of Title I of the "Ports and

V 42 168 AUG 30 77 UMI

Waterways Act of 1972" (Pub. L. 92–340, 86 Stat. 424, 46 U.S.C. 1551) the U.S. Coast Guard is establishing Vessel Traffic Services (VTS) systems for a number of the largest and busiest port areas in the United States. At the request of the Commandant, U.S. Coast Guard, the Commission amended the rules to make up to three frequencies available for exclusive use for VTS purposes within designated VTS radio protection areas (Docket No. 20444, FCC 75–1316). Due to the scarcity of suitable frequencies, it was necessary to assign frequencies previously authorized for commercial (156.–550 MHz) and port operations (156.600 and 156.700 MHz) purposes in the maritime mobile services. Although the subject frequencies were apparently extensively utilized, particularly in certain crowded navigational waters, the Commission believed it was expected by law, and in the public interest, to assist the Coast Guard in implementing the new legislation.

3. As traffic has shifted from the specified VTS frequencies to the remaining port operations and/or commercial frequencies in the designated VTS areas, usage of these remaining frequencies has been increasing. Therefore, as an initial step in providing some relief to licensees, we are proposing to make the frequency 156.250 MHz available for port operations purposes in designated VTS radio protection areas, other than New York, San Francisco, and Seattle, which are described in §§ 81.357 and 83.361 of the rules.

4. The frequency 156.250 MHz has not been previously assigned because of its band edge location and the resultant potential harmful interference with land mobile assignments on the adjacent highway maintenance service frequency 156.240 MHz. However, after carefully reviewing assignments in the various VTS areas (proposed as well as operational) it appears that the frequency 156.250 MHz can be utilized without harmful interference in some of the locations. In the port areas of New York, San Francisco, and Seattle, the use of the subject frequency is prohibited by possible intereference problems. In the remaining VTS areas (presently New Orleans and Houston) the frequency 156.–240 MHz is not assigned for highway maintenance purposes. Prior to such assignments in the future, coordination can be effected to ameliorate potential problems. Therefore, we believe it is in the public interest to provide in the rules for the use of this additional frequency where possible, to alleviate the communications burden imposed on licensees operating in VTS radio protection areas.

5. Accordingly, we propose to amend §§ 2.106, 81.356, 83.351, and 83.359 of the Commission's rules to indicate that the frequency 156.250 MHz (VHF Channel 5) is available for use for port operations purposes in the Coast Guard designated VTS radio protection areas, other than New York, San Francisco, and Seattle, which are described in §§ 81.357 and 83.–361 of the rules.

6. The proposed amendments to the Commission's rules as set forth in the attached Appendix, are issued pursuant to the authority contained in Sections 4(i) and 303 (c) and (r) of the Communications Act of 1934, as amended.

7. Pursuant to the applicable procedures set forth in § 1.415 of the Commission's rules, interested persons may file comments on or before October 7, 1977, and reply comments on or before October 17, 1977. All relevant and timely comments will be considered by the Commission before final action is taken in this proceeding. In reaching its decision in this proceeding, the Commission may also take into account other relevant information before it, in addition to the specific comments invited by this notice.

8. In accordance with the provisions of § 1.419 of the Commission's rules, an original and 5 copies of all statements, briefs, or comments shall be furnished the Commission. All comments received in response to this Notice of Proposed Rulemaking, will be available for public inspection in the Docket Reference Room in the Commission's Offices in Washington, D.C.

FEDERAL COMMUNICATIONS COMMISSION,
VINCENT J. MULLINS,
Secretary.

Parts 2, 81 and 83 of Chapter I of Title 47 of the Code of Federal Regulations are amended as follows:

PART 2—FREQUENCY ALLOCATIONS AND RADIO TREATY MATTERS; GENERAL RULES AND REGULATIONS

1. In § 2.106 the table is amended by adding in the band 156.250–157.0375 MHz, the frequency 156.250 MHz in column 10, and Maritime Mobile in Column 11, and further the NG footnotes and the table in the band 154.6375–156.250 MHz in Column 8, and the band 156.250–157.0375 MHz in column 11, are amended by adding NG ____ to read as follows:

§ 2.106 Table of frequency allocations.

* * * * *

Band (Megahertz)	Service	Frequency (Megahertz)	Nature (of services (of stations	
7	8	10	11	
*	*	*	*	*
154.6375 to 156.250	Land mobile (NG____)[1]	.....	Public safety.	
156.250 to 157.0375.	Maritime mobile.	156.250 156.275 156.300	Maritime Mobile, (NG____)[1] Do. Do.	
*	*	*	*	*

NG FOOTNOTES

* * * * *

[1] NG____ The frequency 156.250 MHz may be assigned to stations in the maritime mobile service for port operations within U.S. Coast Guard designated vessel traffic services (VTS) radio protection areas, other than the New York, San Francisco, and Seattle areas.

* * * * *

PART 81—STATIONS ON LAND IN THE MARITIME SERVICES AND ALASKA-PUBLIC FIXED STATIONS

2. In § 81.356, paragraph (a) table under "Port Operations" is amended and (b) (2) is added to read as follows:

§ 81.356 Assignable frequencies in the band 156–162 MHz.

(a) * * *

Port operations				
05....	156.250	156.250	Coast to ship.....	2
65....	156.275	156.275	.....do.	12

* * * * *

(b) * * *

(2) Available for use within U.S. Coast Guard designated Vessel Traffic Services (VTS) radio protection areas described in § 81.357 other than the New York, San Francisco, and Seattle.

* * * * *

PART 83—STATIONS ON SHIPBOARD IN THE MARITIME SERVICES

3. In § 83.351, paragraph (a) table is amended and (b) (12) is added to read as follows:

§ 83.351 Frequencies available.

(a) * * *

Carrier frequency (Kilohertz)			Conditions of use	
			Section	Limitations
*	*	*	*	*
(Megahertz)				
156.250	.....		83.359	12
*	*	*	*	*

(b) * * *

(12) Available for use within U.S. Coast Guard designated Vessel Traffic Services (VTS) radio protection areas described in § 83.361 other than the New York, San Francisco, and Seattle areas.

* * * * *

4. Section 83.359 is amended to read as follows:

§ 83.359 Frequencies in the band 156–162 MHz available for assignment.

* * * * *

Channel designator	Frequency Megahertz		Points of communication
	Ship	Coast	
*	*	*	*

notices

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

NOTICE TO FEDERAL AGENCIES

Beginning October 1, 1977, Federal agencies must reimburse the Government Printing Office (GPO) for the cost of printing documents in the FEDERAL REGISTER and Code of Federal Regulations.

The Legislative Branch Appropriation Act, 1978 (Pub. L. 95–94, August 5, 1977) amended the Federal Register Act to require Federal agencies to reimburse the Government Printing Office for the cost of printing, binding, and distributing the FEDERAL REGISTER and Code of Federal Regulations. The pertinent provisions of Pub. L. 95–94 amending 44 U.S.C. 1509 are contained in Appendix A to this document.

FEDERAL REGISTER

In order to make certain that statutory requirements for publication in the FEDERAL REGISTER can be met on and after October 1, 1977 agencies must submit a Printing and Binding Requisition (Standard Form 1) before September 15 to the following address:

Superintendent of Planning Service, Room C830, Government Printing Office, Washington, D.C. 20401.

CODE OF FEDERAL REGULATIONS

Every agency that has rules in the Code of Federal Regulations must submit a second Printing and Binding Requisition (Standard Form 1) to the Superintendent of Planning Service at the above address.

COMPUTATION OF COSTS-BILLING: FISCAL YEARS 1978, 1979

For fiscal year 1978 agencies will be charged $285 for each page of printed matter they publish in the FEDERAL REGISTER and $50 for each page in the Code of Federal Regulations. Fractions of pages published in the FEDERAL REGISTER will be counted on a column basis with a minimum charge of one column ($95). GPO will bill each agency monthly for the material the agency has printed in the previous month. Billing for the Code of Federal Regulations will be on an as printed basis.

For budget planning purposes, agencies are advised that current estimates for printing services in Fiscal Year 1979 are as follows: FEDERAL REGISTER $300 per page; Code of Federal Regulations $55 per page.

These prices cover the costs of composition, printing, binding and distribution.

INFORMATION AND ASSISTANCE

For information and assistance in filling out the Printing and Binding Requisition (Standard Form 1) and in computing your projected printing costs, call: Mr. William Rose 202–275–2867.

APPENDIX A

[Pub. L. 95–94 Approved Aug. 5, 1977]

* * * * *

"§ 1509. Costs of publication, etc.

"(a) The cost of printing, reprinting, wrapping, binding, and distributing the FEDERAL REGISTER and the Code of Federal Regulations, and, except as provided in subsection (b), other expenses incurred by the Government Printing Office in carrying out the duties placed upon it by this chapter shall be charged to the revolving fund provided in section 309. Reimbursements for such costs and expenses shall be made by the Federal agencies and credited, together with all receipts, as provided in scetion 309(b)."

* * * * *

(b) The amendments made by subsection (a) shall take effect on October 1, 1977.

* * * * *

ADMINISTRATIVE CONFERENCE OF THE UNITED STATES

COMMITTEE ON RATEMAKING AND ECONOMIC REGULATION

Meeting

Pursuant to the Federal Advisory Committee Act (Pub. L. 92–463), notice is hereby given of a meeting of the Committee on Ratemaking and Economic Regulation of the Administrative Conference of the United States, to be held at 10:30 a.m., September 15, 1977 in the library of the Administrative Conference, 2120 L Street, NW., Suite 500, Washington, D.C.

The Committee will meet to consider Professor Thomas Morgan's draft report on delay in ratemaking proceedings.

Attendance is open to the public, but limited to the space available. Persons wishing to attend should notify this office at least one day in advance. The Committee Chairman may, if he deems it appropriate, permit members of the public to present oral statements at the meeting; any member of the public may file a written statement with the Committee before, during or after the meeting.

For further information concerning this Committee meeting contact Philip J. Harter, 202–254–7065. Minutes of the meeting will be available on request.

JOSEPH SCOTT,
Executive Director.

AUGUST 24, 1977.

DEPARTMENT OF AGRICULTURE

Farmers Home Administration

[Notice of Designation Number A495]

MISSOURI

Designation of Emergency Areas

The Secretary of Agriculture has determined that farming, ranching, or aquaculture operations have been substantially affected in Nodaway County, Missouri, as a result of a severe wind and hailstorm on June 29, 1977.

Therefore, the Secretary has designated this area as eligible for emergency loans pursuant to the provisions of the Consolidated Farm and Rural Development Act, as amended by Public Law 94–68, and the provisions of 7 CFR 1832.3(b) including the recommendation of Governor Joseph P. Teasdale that such designation be made. Applications for emergency loans must be received by this Department no later than October 11, 1977, for physical losses and May 11, 1978, for production losses, except that qualified borrowers who receive initial loans pursuant to this designation may be eligible for subsequent loans. The urgency of the need for loans in the designated area makes it impracticable and contrary to the public interest to give advance notice of proposed rulemaking and invite public participation.

Done at Washington, D.C., this 24th day of August, 1977.

GORDON CAVANAUGH,
Administrator, Farmers Home Administration.

[FR Doc.77–25240 Filed 8–29–77;8:45 am]

[Notice of Designation Number A496]

TEXAS

Designation of Emergency Areas

The Secretary of Agriculture has determined that farming, ranching, or aquaculture operations have been substantially affected in Gray County, Texas, as a result of severe windstorms January 5 through March 30, 1977; drought March 1 through April 14, 1977; excessive rains April 15 through June 13, 1977; hailstorms May 16, 17, 18, 20, 21, 24, and June 13, 1977; and a tornado on May 17, 1977.

Therefore, the Secretary has designated this area as eligible for emergency loans pursuant to the provisions of the Consolidated Farm and Rural Development Act, as amended by Public Law 94–68, and the provisions of 7 CFR 1832.–3(b) including the recommendation of Governor Dolph Briscoe that such designation be made.

V 42 168 AUG 30 77 UMI

Applications for emergency loans must be received by this Department no later than October 11, 1977, for physical losses and May 11, 1978, for production losses, except that qualified borrowers who receive initial loans pursuant to this designation may be eligible for subsequent loans. The urgency of the need for loans in the designated area makes it impracticable and contrary to the public interest to give advance notice of proposed rulemaking and invite public participation.

Done at Washington, D.C., this 23rd day of August 1977.

GORDON CAVANAUGH,
Administrator, Farmers Home Administration.

[FR Doc.77-25086 Filed 8-29-77;8:45 am]

CIVIL AERONAUTICS BOARD

[Docket No. 29123; Agreement C.A.B. 26083 R-1 through R-19; Agreement C.A.B. 26232 R-4; Order 77-119]

IATA

Agreements Adopted Relating to South Pacific Passenger Fares; Order on Reconsideration

Adopted by the Civil Aeronautics Board at its office in Washington, D.C. on the 24th day of August, 1977.

By Order 77-2-32, February 4, 1977, the Board disapproved, for the most part, agreements among the carrier members of the International Air Transport Association (IATA) which proposed South Pacific passenger fares for effect January 1, 1977. The Board's disapproval was based on findings that the proposed increases were not warranted in that, with appropriate adjustments in passenger load factors, elasticity and fuel costs, Pan American World Airways, Inc. (Pan American), the only United States carrier providing service in the area, would realize earnings significantly in excess of the Board's 12-percent guideline. Pan American has filed a petition for reconsideration of that decision.

Pan American alleges that the Board's disapproval of the proposed fare increases was based on a mistaken application of a rate-of-return standard, contending that, implicit in the Board's findings, was the conclusion that the 12-percent rate-of-return standard for domestic passenger fares is equally applicable to South Pacific fares. Pan American states that this standard has no applicability to international operations because, inter alia, the risks associated with international operations are greater than those involved in domestic operations, and because the historical data upon which the cost of debt and equity capital were determined for purposes of developing that standard are now outdated. Pan American further claims that the standard was misapplied in the instant case because it was used as a maximum return rather than as a standard to be achieved on an average basis over the long run.

Pan American also contends that the Board's treatment of demand elasticity is incorrect. The carrier states that the Board permitted use of an elasticity factor in evaluating international fare agreements up to 1976 and has used, and continues to use, an elasticity factor in its consideration of domestic fare proposals. Pan American alleges that it properly applied the concept in the instant case by applying a —0.5 elasticity factor to expected earnings under the proposed fares despite the Board's conclusion that no elasticity adjustment should be recognized. It states that the Board's reasoning to the effect that elasticity estimates are not acceptable because they involve a great deal of speculation could equally be applied to other aspects of the carrier's forecasts which the Board routinely accepts.

Pan American takes issue with the Board's treatment of its forecast fuel expense and capacity, as well as the Board's treatment of its results on the domestic sectors of its mainland-South Pacific through services. The carrier claims that the Board's estimate of its fuel consumption and the downward adjustment made in its fuel prices were based on meaningless historical data. With respect to the Board's observations on its forecast capacity level, Pan American claims that the traffic-generating effect of planned additional capacity was ignored. Lastly, Pan American argues that its financial results on the domestic sectors of its through South Pacific flights should be included in evaluating the reasonableness of South Pacific fares, since the Board requires that through fares should not be higher than the sum of the local fares via Hawaii (west coast-Hawaii plus Hawaii-South Pacific). Since west coast-Hawaii fares are alleged to be unreasonably low, the fares beyond Hawaii must be relatively high to afford a reasonable overall return from its South Pacific service.

Upon consideration of the petition and all other relevant matters, the Board finds that, with one exception, the petition raises no issues not adequately dealt with in our previous decision or that warrant reconsideration, and consequently the petition will be denied. The exception concerns our adjustment of Pan American's fuel expense. Based upon information contained in the petition, we are now persuaded that Pan American's forecast fuel expense as originally set forth in its justification should be accepted. The estimate of 3,050 gallons per block-hour for fuel consumption of B-747SP aircraft used by Pan American in its original justification in support of the agreement appears reasonable in the light of Form 41 data now available, which show a 3,090 gallons per block-hour rate for Pan American's Pacific division for calendar year 1976. Acceptance of Pan American's forecast fuel expense would reduce the forecast return for its South Pacific international operations from 17.47 to 15.33 percent. This adjustment, however, does not alter the Board's decision to disapprove the proposed fare increases.

The Board employed the 12-percent rate-of-return standard developed in the Domestic Passenger-Fare Investigation (DPFI), Docket 21866, as a guideline in evaluating the South Pacific fare agreement, just as it has done in evaluating all international rate and fare agreements since 1972. Pan American apparently does not take issue with the concept of a rate-of-return guideline in evaluating international rate agreements but argues, rather, that 12 percent is not the correct level and that it should be higher, primarily to account for the greater risks allegedly involved in international operations. However, no showing has been made here which would justify an alternative, for present purposes, to the 12-percent return found reasonable in Phase 8 of the DPFI. The carriers incur debt and raise equity on a system or corporate basis and the data studied by the Board in Phase 8 therefore reflect international as well as domestic operations. Application of the 12-percent return as a benchmark in evaluating international operations therefore appears reasonable, based on information currently available. In any event, the Board has specifically requested the carrier parties to the North Atlantic Fare Investigation, Docket 27918, to address this issue in Order 77-7-4, July 1, 1977.

Pan American's conclusion that the Board applied the 12-percent rate-of-return guideline as a ceiling is both erroneous and unsubstantiated. The Board noted that Pan American's unadjusted data showed an expected 12.8-percent return, with the proposed higher fares, which supported the conclusion that a fare increase of the magnitude proposed was not warranted. The Board went on to point out that, with an adjustment to eliminate demand elasticity, the expected return would increase to 15.3 percent, and to 17.5 percent with the fuel-cost adjustment. Disapproval of a fare increase that would produce a return in the 15-17 percent range clearly does not reflect a rigid application of a 12-percent return ceiling.

Pan American's interpretation of the Board's position on price elasticity of demand appears to miss the central point.[1] In the Board's view, the case for a specific elasticity coefficient in any given international market has not been made to date. Given the complex international fare structure, with its myriad cross-elasticities, the differing mix of business and discretionary travel in the various markets, and the difficulty in forecasting economic and demographic variables for a large number of foreign countries, to cite some of the more obvious problems, it is not surprising that there is a lack of persuasive evidence on elasticity coefficients in the international arena.[2] The Board does not deny the existence of demand elasticity, but we find the entire subject of forecasting so speculative that the type of refinement involved in an elasticity adjustment, which is highly speculative in itself, is simply not acceptable.[3]

Pan American takes issue with the concern expressed by the Board over the capacity level the carrier intends to operate on its South Pacific route. Pan American claims that a portion of the traffic increase it forecasts is a result of the capacity increase it intends to introduce. The Board has never implied that there is no relationship between traffic volume and capacity offered. The Board merely pointed out that Pan American chose to maintain its existing 50-percent load factor despite a sharp increase in traffic (49-percent increase in revenue passenger-miles) through an equivalent increase in capacity. It is not apparent to us that such a capacity increase is necessary to achieve a significant increase in traffic on this route, particularly in view of the relatively low load factor currently prevailing in this market. Moreover, we see no basis for concluding that introduction of the B-747SP in this market requires a net increase in capacity, at least in the amount contemplated by Pan American.

Finally, Pan American argues that South Pacific fare agreements should be evaluated in the context of results on both the international and domestic sectors of its South Pacific through service, since the Board requires that through fares be no higher than the sum of the local sector fares.[4] Pan American claims that, since west coast-Hawaii fares are unreasonably low, fares beyond Hawaii must be relatively high in order to allow a reasonable through fare and return from the service. The carrier argues that the evening departure time of its flights from the mainland to Hawaii is determined by the requirements of its South Pacific service and is not optimum for the domestic market. Despite these scheduling difficulties, however, Pan American has not presented a persuasive case that it does not have a reasonable opportunity to earn a 12-percent return on its mainland-Hawaii services. The carrier has not satisfactorily explained why it cannot achieve load factors above 50 percent in this market through more careful management of capacity. For example, since almost one-third of its forecast international operations will be conducted with B-747SP aircraft which overfly Hawaii, it is reasonable to expect that the already high percentage of through passengers who travel via Hawaii because they wish to stop over there will increase further. This suggests that one option Pan American may have is to operate more turnaround services between the mainland and Hawaii and to institute turnaround operations between Hawaii and points in the South Pacific. An operation of this type would allow the carrier to improve the timing of its mainland-Hawaii flights thereby increasing load factors on these segments while, at the same time, reducing capacity on the thinner, Hawaii-South Pacific routes with a consequent load-factor improvement on these routes. This option is raised merely to underscore the fact that Pan American has not put forth a convincing case that it has explored all the available options in an attempt to improve the profitability of these services. We do not agree with Pan American that the Board's requirement that through fares be no higher than the sum of the local sector fares necessarily implies that through fares should be set to cover any earnings shortfall from mainland-Hawaii operations. It remains for Pan American to clearly demonstrate that its domestic sector results cannot be improved because they are inexorably entwined with through services in such a way that the carrier cannot be competitive with the other mainland-Hawaii carriers. In the absence of such a demonstration we are unable to conclude that mainland-Hawaii sector costs and revenues should be included in any evaluation of IATA agreements establishing international fares for the South Pacific.

We therefore find that the issues presented by Pan American are not sufficient to warrant reversal of our disapproval of fare increases in Order 77-2-32, and Pan American's petition will therefore be denied.

Accordingly, *it is ordered that:*

Except to the extent granted here, the petition of Pan American World Airways, Inc., for reconsideration of Order 77-2-32 be denied.

This order will be published in the FEDERAL REGISTER.

By the Civil Aeronautics Board.[5]

PHYLLIS T. KAYLOR,
Secretary.

[Docket 27813; Agreement C.A.B. 25711; Order 77-8-120]

IATA

Agreement Adopted Relating to South Pacific Passenger Fares; Order Denying Petition for Reconsideration

Adopted by the Civil Aeronautics Board at its office in Washington, D.C. on the 24th day of August, 1977.

By Order 77-5-133, May 24, 1977, the Board reaffirmed its approval of an agreement reached by the International Air Transport Association (IATA) which established first- and economy-class fares, between the U.S. mainland/Hawaii, on the one hand, and Australia/New Zealand, on the other, which exceeded the combination of the local sector U.S.-Pago Pago and Pago Pago-Australia/New Zealand fares. The Board conditioned its approval, however, to require that, where through travel involves a stopover at American Samoa, the applicable through fare will not exceed the sum of the local sector fares over Pago Pago. To this end, Pan American was directed to file appropriate tariff changes within 30 days.

Qantas Airways, Ltd. (Qantas) has petitioned for reconsideration of the Board's order, requesting reversal of that tariff filing requirement, or at least a delay in its implementation, until certain points raised in its petition can be reviewed by the Board. Mr. Donald L. Pevsner has filed in opposition to the petition.

Qantas contends that the Board's condition is contrary to its previously stated principle that an appropriate charge for stopovers should be imposed; and that if a stopover is made at Pago Pago, a charge should apply.[1] It also contends that, despite the Board's belief that little traffic and revenue diversion would occur, the fact that no stopover charge will apply, the substantial dollar savings from the higher through international fare, salubrious Samoan climate, and the opportunity to break an otherwise tedious journey make significant diversion to Pan American's Pago Pago services probable. Qantas estimates its annual loss at $10.2 million, and urges that the Board fully explore traffic and revenue drains on other carriers before implementation of its condition. Qantas states that this loss of traffic would be bearable if Qantas and Air New Zealand had traffic rights at Pago Pago, but argues that, since Pan American is the sole beneficiary, great violence is done to Qantas' ability to enjoy a "fair and equal opportunity to compete" under the terms of the United States-Australia bilateral agreement and that, while the

[1] In Order 77-2-32 the Board stated that there was no evidence that the carriers perform all the steps required for the proper application of an elasticity coefficient. In the instant petition, Pan American has provided information, in addition to that contained in its original justification, which indicates that the carrier has, in fact, followed the correct procedure in applying elasticity.

[2] The difficulties of producing reliable estimates of elasticity in international markets are stressed by most authors who attempt it. For a general discussion of these problems, see, for example, Guy Orcutt, "Measurement of Price Elasticities in International Trade," The Review of Economics and Statistics (May 1950), pp. 118-127. Furthermore, studies of the North Atlantic market indicate that the demand curve is relatively elastic within the range of observed prices. See, for example, M. Straszheim, The International Airline Industry (Washington: The Brookings Institution, 1969), M. H. Cooper and A. K. Maynard, The Price of Air Travel (London: The Institute of Economic Affairs, 1971), and W. Watkins and D. Kaylor, Forecast of Scheduled International Air Travel of U.S. Flag Carriers, 1971-1980 (Washington: Civil Aeronautics Board, 1971). The fact that the carriers use coefficients in the relatively inelastic range to adjust their traffic forecasts in this market and that they do not make corresponding adjustments to their forecast load factors, tends to support the Board's contention that the carriers' use of elasticity is somewhat self-serving.

[3] Although the Board employs an elasticity coefficient of —0.7 for domestic fares, which was developed pursuant to a full investigation in Phase 7 of the DPFI, it has virtually no effect on fares as long as the load factor adjustment is made.

[4] Pan American correctly points out that the Board erred in stating that the carrier enjoys a return well in excess of 12 percent on South Pacific sectors beyond Hawaii. The statement should have read that the carrier would earn such a return under the proposed increases.

[5] All Members concurred except Chairman Kahn and Member Bailey who did not participate.

[1] Qantas cites Orders 73-1-76 and 73-4-77.

V 42 168 AUG 30 77 UMI

Board has recognized the principle that international fares require the mutual consent of nations, the Board's tariff-filing requirement does little to maintain this principle.

Mr. Pevsner argues that grant of the petition would penalize passengers stopping over at Samoa by causing their payment of the higher through fare or a punitive stopover charge; that the number of passengers affected by the Board's condition is small since most South Pacific flights overfly Pago Pago; that any increased traffic to Pago Pago benefits both the local economy and the traveler; that if Qantas wishes to participate in this stopover traffic it may apply to serve the Australia-Pago Pago market or lower its through fare to the sum of the local sector fares. Mr. Pevsner contends that it seems hypocritical for a carrier to condone, or at least ignore for years, this long-standing undercut situation simply because the anomaly was unpublicized and then press strenuously for an arbitrary stop-over charge once the anomaly is publicized; and that both components of the double ticketing device are lawful and contained in legally filed tariffs in foreign air transportation.[2]

Upon full consideration of the petition, the answer and all other relevant matters, the Board has concluded that the petition is without merit and it will be denied.

Qantas has misconstrued the Board's position on charges for stopovers. The Board has advocated imposition of cost-related stopover charges on promotional fares.[3] However, the Board has disapproved application of stopover charges on normal first- and economy-class fares in the Pacific area, in view of the extremely high level of Pacific normal economy fares and the premium level of first-class fares which already reflect availability of unlimited free stopover privileges.[4] In any event, Qantas has not shown that one free stopover at Pago Pago at the lower fare level is uneconomic, nor has it suggested or justified what an appropriate stopover charge might be. Instead, the carrier appears to want a stopover charge solely to stem alleged diversion to the Pago Pago routing. Assuming, arguendo, that a stopover charge could be justified, we do not believe that it would meet Qantas' objective. The undercuts range up to several hundred dollars and to achieve Qantas' objective the charge would need to be extremely high—much higher than could be justified on cost alone.

Qantas also misconstrues the Board's statements in the May order on its concept of mutuality in international ratemaking. Ordinarily, a through fare which exceeds the sum of the local sector fares over an intermediate point is considered unreasonable per se. The Board could have required that the IATA through fares over a Pago Pago routing be no higher than the combination of local fares, as has been done in the case of Hawaii.[5] However, for a number of special reasons, and considering the mutuality of international ratemaking, the Board chose a more limited approach specifically directed at removing any possibility of unjust discrimination against the small number of passengers who genuinely desire a Samoan stopover. In any event, the combination of sector fares filed with the Board in the carriers' tariffs are valid for through transportation even though the IATA fare is undercut.

Accordingly, *it is ordered, that:* the petition of Qantas Airways, Ltd. for reconsideration of Order 77-5-133, May 24, 1977, in Docket 27813 be denied.

This order will be published in the FEDERAL REGISTER.

[Docket 30256; Order 77-8-127]

JUGOSLOVENSKI AEROTRANSPORT

Application for Renewal of Foreign Air Carrier Permit; Order to Show Cause

Adopted by the Civil Aeronautics Board at its office in Washington, D.C. on the 25th day of August, 1977.

Pursuant to Order 70-6-118, approved by the President on June 19, 1970, Jugoslovenski Aerotransport (JAT) was granted a permit authorizing the carrier, for a period terminating on June 19, 1973, to perform certain charter foreign air transportation between Yugoslavia and the United States and between certain European countries and the United States, the latter limited to charters originating in such countries. The permit was renewed pursuant to Order 74-9-23, approved by the President on September 5, 1974, for the period ending on December 31, 1976. JAT has timely filed for renewal of its permit.

JAT also holds a permit authorizing scheduled service between Belgrade and Zagreb, Yugoslavia, and New York, issued pursuant to Order 76-6-165 and renewed pursuant to Order 77-5-51. The JAT scheduled-service permit is based on provisional arrangements between the United States and Yugoslav governments concerning both scheduled and charter services contained in the exchange of Notes of May 14, 1976, and extended on June 30, 1977, until March 31, 1978. The provisional arrangements provided for inauguration of twice-weekly scheduled service to New York by JAT. In addition they imposed an annual limit of 80 charter movements by JAT under the Nonscheduled Air Service Agreement of September 27, 1973, which continues in effect. Accordingly, the annual limit of 80 charter movements by JAT is incorporated in the attached specimen form of permit.

The provisional arrangements were extended by the United States and Yugoslav governments until March 31, 1978, with the understanding that consultations will be held on a scheduled air transport services agreement during this period. It is expected that consultations will be held in the near future. In accordance with the request in JAT's application that the permit be renewed for one year or until a date agreed by the governments of the United States and Yugoslavia, it is proposed that the JAT permit be renewed with an expiration on March 31, 1978, the date on which JAT's scheduled permit and Pan American's operating permit from the Yugoslav government will expire. No answers have been filed to JAT's application.

On four occasions (Dockets 25581, 26078, 28732 and 30594), the Board found that JAT was substantially owned and effectively controlled by citizens of Yugoslavia, that it was financially and operationally fit, and that it was in the public interest to grant JAT's requests for renewed or new authority. We are aware of no changes in JAT's structure or operations which would require us to modify those findings. The Board finds, therefore, that it is in the public interest to direct all interested persons to show cause why JAT's charter foreign air carrier permit should not be renewed in the form indicated by the attached specimen permit.[1] Our tentative findings and conclusions in this regard are that:

(a) JAT is fit, willing, and able to properly perform the foreign air transportation proposed herein and to conform to the provisions of the Act and the rules, regulations, and requirements of the Board thereunder;

(b) JAT is substantially owned and effectively controlled by citizens of Yugoslavia;

(c) It is in the public interest to renew in the form indicated by the attached specimen permit, the foreign air carrier permit issued to JAT pursuant to Order 74-9-23 for a period terminating on March 31, 1978, or such earlier date as the governments of the United States and Yugoslavia may provide by agreement;

(d) The public interest requires that the exercise of the privileges granted by

---

[2] As a consequence of a condition placed by Order 72-10-1, October 1, 1972, on IATA Resolution 001 (Permanent Effectiveness Resolution) the combination of sector fares filed with the Board in the carriers' tariffs are valid for transportation even though the IATA through fare is undercut.

[3] See e.g., Order 73-1-76, January 26, 1973.

[4] Order 77-3-63, March 11, 1977.

[5] Order 74-4-92, April 17, 1974.

[6] All Members concurred except Chairman Kahn and Member Bailey who did not participate.

[1] Upon the last renewal of JAT's charter permit, Order 74-9-23, Dockets 25581, 26078, Pan American World Airways, Inc. filed a Petition for Reconsideration urging that Condition 2(c) of the permit precluding commingling of U.S. originating charters (paragraph 1) with foreign originating charters under paragraphs 1, 2, and 5, should also apply to foreign originating charters under paragraph 4. Pan American's point is well taken. Accordingly, we tentatively find that its Petition for Reconsideration should be granted and the attached specimen form of permit be revised accordingly.

said permit be subject to the terms, conditions and limitations contained in the attached specimen form of permit, and to such other reasonable terms, conditions and limitations required by the public interest as may from time to time be prescribed by the Board; and

(e) A hearing on the application of Jugoslovenski Aerotransport is not required in the public interest.

We further find, pursuant to the environmental evaluation attached to JAT's application, that renewal of JAT's scheduled foreign air carrier permit would not be a major Federal action significantly affecting the quality of the environment within the meaning of section 102(2)(C) of the National Environmental Policy Act of 1969, and will not be inconsistent with the policy objectives of the Energy Policy and Conservation Act of 1975.[2]

All interested persons will be given 15 days following the service of this order to show cause why the tentative findings and conclusions set forth here should not be made final. We expect such persons to direct their objections, if any, to specific issues and to support such objections with detailed analyses. If an evidentiary hearing is requested, each objector should name the specific markets or other issues about which a hearing is requested and should state, in detail, why such a hearing is necessary and what relevant and material facts he would expect to establish through such a hearing. Vague, general, or unsupported objections will not be entertained.

Accordingly, *it is ordered* That:

1. All interested persons be directed to show cause why the Board should not make final the tentative findings and conclusions set forth here and why an order should not be issued, subject to approval by the President pursuant to section 801 of the Act, renewing, in the form indicated by the attached specimen permit, the foreign air carrier permit issued to Jugoslovenski Aerotransport by Order 74-9-23 for a period terminating on March 31, 1978, or such earlier date as the governments of the United States and Yugoslovia may provide by agreement;

2. Any interested persons having objections to the issuance of an order making final these tentative findings and conclusions or to the issuance of the proposed foreign air carrier permit shall, within 15 days after service of this order, file with the Board and serve on the persons named in paragraph 5 a statement of objections specifying the part or parts of the tentative findings or conclusions objected to, together with a summary of testimony, statistical data and such evidence expected to be relied upon to support the statement of objections;

3. If timely and properly supported objections hereto are filed, full consideration will be accorded the matters or issues raised therein before further action is taken by the Board: *Provided,* That the Board may proceed to enter an order in accordance with the tentative findings and conclusions here if it determines that there are no factual issues presented that warrant the holding of an evidentiary hearing; [3]

4. In the event no objections are filed to this order, all further procedural steps will be deemed to have been waived and the Board may proceed to enter an order in accordance with the tentative findings and conclusions; and

5. This order shall be served upon Jugoslovenski Aerotransport, Pan American World Airways, Inc., the Ambassador of the Socialist Federal Republic of Yugoslavia, and the Department of State.

This order shall be published in the FEDERAL REGISTER and transmitted to the President.

By the Civil Aeronautics Board.[4]

PHYLLIS T. KAYLOR,
Secretary.

SPECIMEN

PERMIT TO FOREIGN AIR CARRIER
(AS AMENDED)

Jugoslovenski Aerotransport is hereby authorized, subject to the provisions hereinafter set forth, the provisions of the Federal Aviation Act of 1958, as amended, and the orders, rules, and regulations issued thereunder, to engage in charter foreign air transportation as follows:

1. Charter flights with respect to persons and their accompanied baggage between any point or points in Yugoslavia and any point or points in the United States.[5]

2. Charter flights with respect to persons and their accompanied baggage which originate at a point or points in any country other than the United States or Yugoslavia, and serve a point or points in the United States, provided that such flights include a stopover or stopovers in Yugoslavia.[5]

3. Planeload charter flights with respect to property between any point or points in Yugoslavia and any point or points in the United States, limited to ten one-way flights within any calendar year.

4. Charter flights (including inclusive tour charters with respect to persons and their accompanied baggage between any point or points in Austria, Belgium, Cyprus, Denmark, Finland, France, Federal Republic of Germany, Greece, Ireland, Italy, Luxembourg, Malta, Netherlands, Norway, Portugal, Spain, Sweden, and Switzerland, and any point or points in the United States, limited to charter flights which originate in a named European country.

5. Circle tour charter flights (including inclusive tour charters) with respect to persons and their accompanied baggage which originate and terminate at the same point in Austria, Belgium, Cyprus, Denmark, Finland, France, Federal Republic of Germany Greece, Ireland, Italy, Luxembourg, Malta, Netherlands, Norway, Portugal, Spain, Sweden, or Switzerland, and serve a point or points in the United States and also provide a stopover or stopovers en route at a point or points in any country other than a named European country, the United States, or Yugoslavia.

The holder may, with respect to Yugoslavia-originating charter flights authorized in paragraph 1, and flights authorized in paragraphs 2 and 5, above, grant stopover privileges en route in any country other than the United States or Yugoslavia: *Provided* That "stopover" shall mean a lapse of at least 36 hours between any deboarding and the next reboarding by the holder of the same passengers and their accompanied baggage whether the reboarding shall be pursuant to the same or separate group contracts.

This permit shall be subject to the following terms, conditions, limitations:

(1) With respect to passenger and property charter flights between the United States and Yugoslavia, authorized in paragraphs 1 and 3, above, the holder shall not engage in foreign air transportation between the United States and any point or points, other than a point or points in Yugoslavia (authorized stopovers excepted), or transport any person whose journey is under contract for a group movement by the holder to or from a point not in the United States or Yugoslavia: *Provided,* That this condition shall not [illegible] the holder under the authorization contained in paragraph 1 above, from [illegible] contracting for movement of United States originating inclusive tour charter, tour group charter, or study group charter traffic as a group or as groups on its scheduled air services between a point or points in Yugoslavia and a point or points beyond Yugoslavia, provided that at least 96 hours in total are spent by the group or groups in Yugoslavia before, or after, or before and after, such movements to and/or from the point or points beyond Yugoslavia.

(2) The holder shall not perform United States-originating passenger charter flights which at the end of any calendar quarter would result in the number of United States-originating passenger charter flights performed in the preceding 12 months exceeding by more than one-third (but in no event by more than 15) the number of passenger charter flights originating outside the United States performed in that 12-month period: *Provided,* That (a) A charter shall be considered to originate in the United States (or Yugoslavia, or elsewhere) if the passengers or property are first taken on board in that country, and shall be considered as one flight whether the charter be one-way, round-trip, circle-tour, or open-jaw, even if a separate contract is entered into for a return portion of the charter trip from Yugoslavia (or the United States, or elsewhere);

(b) In the case of a lease of aircraft with crew for the performance of a charter flight on behalf and under the authority of another carrier, the flight shall be included in the computation if the holder is the lessee and shall not be included if the holder is the lessor;

---

[2] Since no new services are to be performed, there will be no material increase in the utilization of fuel.

[3] Since provision is made for the filing of objections to this order, petitions for reconsiderations will not be entertained.

[4] All members concurred.

[5] The holder shall be authorized to performed those types of charters as are now, or may hereafter be, prescribed in Annex B of the Nonscheduled Air Service Agreement between the Government of the United States of America and the Government of the Socialist Federal Republic of Yugoslavia. Annex B currently authorizes those types of charters authorized pursuant to Parts 214 and 378 of the Board's Regulations, i.e., Single Entity Passenger, Pro Rata Affinity, Mixed (Entity/Pro Rata), Inclusive Tour, Study Group, Overseas Military Personnel, and Travel Group; and split passenger charters of the types set forth. In addition, for Yugoslavia-originating charters, and third country-originating charters with a stopover in Yugoslavia, Common Purpose, Advance Booking, and Inclusive Tour charters performed pursuant to Yugoslavia charter regulations, are also authorized.

V 42 168 AUG 30 77 UMI

(c) United States-originating charter groups on flights authorized in paragraph 1 shall not be commingled on the same aircraft at the same time with groups originating outside the United States authorized in paragraphs 1, 2, 4, and 5, above;

(d) Any inadvertent excess in United States-originating flights operated pursuant to the authorization contained in paragraph 1 above which might occur shall be corrected by contracting for sufficient flights originating outside the United States pursuant to the authorizations contained in paragraphs 1, 2, 4, and 5 above, and/or reducing contracting for United States-originating flights pursuant to the authorization contained in paragraph 1 above, in the first or first and second quarter years immediately following the period of excess so as to achieve conformity in the expanded five or six quarter year period;

(e) Condition (2) shall not apply to flights which originate exclusively at Detroit;

(f) Condition (2) shall not apply to flights which originate exclusively at Los Angeles for such time as no Yugoslav airline operates a scheduled air service to the United States and a United States airline operates a scheduled air service between the United States and Yugoslavia;

(g) Condition (2) shall not apply to flights utilizing the same aircraft which originate exclusively at both Los Angeles and Detroit for such time as no Yugoslav airline operates a scheduled air service to the United States and a United States airline operates a scheduled air service between the United States and Yugoslavia;

(h) The Board may by order, and without hearing, permit the applicability of (f) and (g) above, during periods when no United States airline operates a scheduled service between the United States and Yugoslavia.

(3) The exercise of the privileges granted by this permit, except with respect to third country-originating inclusive tour charters performed under the authorizations contained in paragraphs 4 and 5 above, shall be subject to the provisions of Parts 214 and 378 of the Board's Regulations, and all amendments and revisions thereof as the Board, by order or regulation and without hearing, may adopt: *Provided, however,* That advance booking charters, common purpose charters, and inclusive tour charters originating in Yugoslavia and performed under the authorization contained in paragraph 1 above, and such charters originating in third countries with a stopover in Yugoslavia performed under the authorization contained in paragraph 2 above, may be operated pursuant to the terms, conditions, and limitations contained in licenses issued by the Yugoslav Directorate of Civil Aviation in accordance with Yugoslavian charter regulations, in which event compliance with Parts 214 and 378 shall not be required. The authority of the holder to perform third country-originating inclusive tour charters performed under the authorizations contained in paragraphs 4 and 5 above shall be subject to the following conditions:

(a) Each tour shall provide overnight hotel accommodations at a minimum of three places other than the point of origin, such places to be no less than 50 air miles from each other.

(b) If more than one group is carried, each of the groups shall consist of 40 or more tour participants.

(c) The Board by order or regulation and without hearing, may waive conditions (a) and (b) in whole or in part.

(4) The holder shall operate no more than 80 revenue charter aircraft movements to or from the United States during the 12-month period expiring March 31, 1978, or for any 12-month period thereafter unless prior approval to operate a specific higher number of revenue charter aircraft movements is obtained from the Board.

(5) The Board, by order or regulation and without hearing, may require advance approval of any individual charter trips conducted by the holder pursuant to the authority granted by this permit, if it finds such action to be required.

(6) The holder shall not operate charters for or on behalf of air freight forwarders.

(7) The holder shall keep on deposit with the Board a signed counterpart of Agreement C.A.B. 18900, an agreement relating to liability limitations of the Warsaw Convention and the Hague Protocol approved by Board Order E-23680, May 13, 1966, and a signed counterpart of any amendment or amendments to such agreement which may be approved by the Board and to which the holder becomes a party.

(8) The holder (1) shall not provide foreign air transportation under this permit unless there is in effect third-party liability insurance in the amount of $1,000,000 or more to meet potential liability claims which may arise in connection with its operations under this permit, and unless there is on file with the Docket Section of the Board a statement showing the name and address of the insurance carrier and the amounts and liability limits of the third-party liability insurance provided, and (2) shall not provide foreign air transportation with respect to persons unless there is in effect liability insurance sufficient to cover the obligations assumed in Agreement C.A.B. 18900, and unless there is on file with the Docket Section of the Board a statement showing the name and address of the insurance carrier and the amounts and liability limits of the passenger liability insurance provided. Upon request, the Board may authorize the holder to supply the name and address of an insurance syndicate in lieu of the names and addresses of the member insurers.

(9) By accepting this permit the holder waives any right it may possess to assert any defense of sovereign immunity from suit in any action or proceeding instituted against the holder in any court or other tribunal in the United States (or its territories or possessions) based upon any claim arising out of operations by the holder under this permit.

(10) This permit shall be subject to all applicable provisions of any treaty, convention, or agreement affecting international air transportation now in effect, or that may become effective during the period this permit remains in effect, to which the United States and the Socialist Federal Republic of Yugoslavia shall be parties.

(11) The holder shall conform to the airworthiness and airman competency requirements prescribed by the Government of the Socialist Federal Republic of Yugoslavia for Yugoslav international air service.

The exercise of the privileges granted by this permit shall be subject to such other reasonable terms, conditions, and limitations required by the public interest as may from time to time be prescribed by the Board.

This permit shall become effective on ----------. Unless otherwise terminated, at an earlier date pursuant to the terms of any applicable treaty, convention or agreement, this permit shall terminate on March 31, 1978: *Provided, however,* That if prior to March 31, 1978, the operation of the charter foreign air transportation herein authorized becomes the subject of a renewed or revised Annex A to the Nonscheduled Air Service Agreement between the United States and Yugoslavia (or otherwise becomes the subject of a treaty, convention or agreement to which the United States and Yugoslavia are or shall becomes parties), then this permit shall terminate (1) upon the effective date of any treaty, convention, or agreement, or amendment thereto, which shall have the effect of eliminating the charter foreign air transportation hereby authorized from the transportation which may be operated by carriers designated by the Government of Yugoslavia (or in the event of the elimination of part of the charter foreign air transportation hereby authorized, the authority granted herein shall terminate to the extent of such elimination), (2) upon the effective date of any permit granted by the Board to any other carrier designated by the Government of Yugoslavia in lieu of the holder hereof, or (3) upon the termination or expiration of the Nonscheduled Air Service Agreement between the United States and Yugoslavia, effective September 27, 1973: *Provided, further,* That clause (3) of this paragraph shall not apply if, prior to the occurrence of the event specified in clause (3), the operation of the foreign air transportation herein authorized becomes the subject of any treaty, convention, or agreement to which the United States and Yugoslavia are or shall become parties.

IN WITNESS WHEREOF, the Civil Aeronautics Board has caused this permit to be executed by the Secretary of the Board, and the seal of the Board to be affixed hereto, on the ----------.

Secretary.

(SEAL)

Issuance of this permit to the holder approved by the President of the United States on ----------, in ----------.

CIVIL SERVICE COMMISSION

ADVISORY COMMITTEE ON ADMINISTRATIVE LAW JUDGES

Meeting

In accordance with the Federal Advisory Committee Act, Public Law 92-463, the U.S. Civil Service Commission announces the following meeting:

NAME: Advisory Committee on Administrative Law Judges.

DATE AND TIME: September 23, 1977, 9:00 a.m., 4:00 p.m.

PLACE: U.S. Civil Service Commission, 1900 E Street, NW., Washington, D.C., Room: 5323.

TYPE OF MEETING: Open.

CONTACT PERSON:

Arthur L. Burnett, Assistant General Counsel, U.S. Civil Service Commission, 1900 E Street, NW., Washington, D.C., telephone 202-632-5421.

PURPOSE OF COMMITTEE: To address the future direction that the Committee will take in connection with governmental reorganization plans as they may affect Administrative Law Judges, continue its discussion of the overjudicialization of the administrative process, and consider adopting recommendations for legislative change relating to APA coverage of certain categories of cases.

Dated: August 30, 1977.

JAMES C. SPRY,
Executive Assistant to the Commissioners.

DEPARTMENT OF COMMERCE

Foreign-Trade Zones Board

[Docket No. 7-77]

CITY OF GALVESTON, TEXAS, BY THE BOARD OF TRUSTEES OF THE GALVESTON WHARVES

Application and Public Hearing

Notice is hereby given that an application has been submitted to the Foreign-Trade Zones Board (the Board) by the City of Galveston (the City), Galveston County, Tex., a municipal corporation, through the Board of Trustees

V 42 168 AUG 30 77 UMI

of the Galveston Wharves (Galveston Wharves), requesting a grant authority for the establishment of two foreign-trade zone sites on the Galveston Ship Channel in Galveston, within the Galveston Customs port of entry. The application was submitted pursuant to the provisions of the Foreign-Trade Zones Act of 1934, as amended (19 U.S.C. 81), and the regulations of the Board (15 CFR Part 400). It was formally filed on August 19, 1977. The City of Galveston is a municipal corporation under a Charter filed with the Texas Secretary of State on July 22, 1960. It was given authority, together with the Board of Trustees of the Galveston Wharves, to apply for and to establish and operate foreign-trade zones in the City of Galveston under Senate Bill 203 of the 65th Texas Legislature, dated April 25, 1977. By resolution, the City authorized the Galveston Wharves to make the application in its behalf.

The proposal calls for a zone consisting of two sites with a total area of 884 acres. One site is owned by the applicant and situated on an 8 acre tract on Galveston Island on which are three existing warehouses presently operated as Customs bonded facilities. The other site, just across the Galveston Ship Channel on Pelican Island, covers some 876 acres, most of which is owned by the Mitchell Development Corporation of the Southwest (Mitchell). The applicant owns some 50 acres of this site and has a leasing agreement with Mitchell for the remaining area. Both sites are served by all modes of transportation. The zone is intended to serve firms engaged in international trade-related activities.

The application includes economic data and information concerning the need for zone services. Among the anticipated zone tenants are firms dealing in metal products, refined petroleum products, chemicals, oil and gas production systems, automobile imports, agricultural and construction machinery, marine conversions and refurbishing, biomedical products and pollution control systems. These firms would use the zone for storage, inspection, light manufacture, processing, or assembly.

In accordance with the Board's regulations, an Examiners Committee has been appointed to investigate the application and report thereon to the Board. The committee consists of: Hugh J. Dolan (Chairman), Office of the Secretary, U.S. Department of Commerce, 14th and E Streets, NW., Washington, D.C. 20230; Ernest J. Gonsoulin, Director (Inspection and Control), Region VI, U.S. Customs Service, 500 Dallas Street, Suite 1240, Houston, Tex. 77002; and Colonel Jon C. Vanden Bosch, Army District Engineer, U.S. Army Engineer District Galveston, P.O. Box 1229, Galveston, Tex. 77553.

In connection with its investigation of the proposal, the Examiners Committee will hold a public hearing on September 21, 1977, beginning at 9:00 a.m., in the 2nd floor Courtroom, U.S. Federal Building, 20th and Postoffice Streets, Galveston, Tex. The purpose of the hearing is to help inform interested persons about the proposal, to provide an opportunity for their expression of views and to obtain information useful to the Examiners Committee.

Interested persons or their representatives will be given the opportunity to present their views at the hearing. Such persons should, by September 14, notify the Board's Executive Secretary, in writing at the address below, of their desire to be heard. In lieu of an oral presentation, written statements may be submitted in accordance with the Board's regulations to the Examiners Committee, care of the Executive Secretary, at any time from the date of this notice through October 21, 1977. Any material submitted during the post-hearing period cannot be made part of the record unless it is new evidence. A copy of the application and accompanying exhibits will be available during this time for public inspection at each of the following locations:

Office of the District Director, U.S. Customs Service, Room 411, Post Office Building, 601 Rosenberg, Galveston, Tex. 77550.
Office of the Executive Secretary, Foreign-Trade Zones Board, U.S. Department of Commerce, Room 6886-B, 14th and E Streets NW., Washington, D.C. 20230.

Dated: August 23, 1977.

JOHN J. DA PONTE, Jr.,
Executive Secretary,
Foreign-Trade Zones Board.

National Oceanic and Atmospheric Administration

CARIBBEAN FISHERY MANAGEMENT COUNCIL AND ITS SCIENTIFIC AND STATISTICAL COMMITTEE

Public Meeting

Notice is hereby given of a meeting of the Caribbean Fishery Management Council established by Section 302 and its Scientific and Statistical Committee established by Section 302(g) of the Fishery Conservation and Management Act of 1976 (P.L. 94-265).

The Caribbean Fishery Management Council has authority over fisheries within the fishery conservation zone adjacent to Puerto Rico and the Virgin Islands. The Council will, among other things, prepare and submit to the Secretary of Commerce fishery management plans with respect to fisheries within its area of authority, prepare comments on foreign fishing applications, and conduct public hearings.

The Scientific and Statistical Committee assists the Council in the development, collection, and evaluation of such statistical, biological, economic, social, and other scientific information as is relevant to the Council's development and amendment of fishery management plans.

The meeting will be held Tuesday through Thursday, September 20-22, 1977, at the Hotel Pierre, 105 De Diego Avenue, Santurce, Puerto Rico. The meeting will convene at 9:00 a.m. on September 20, and adjourn at about noon on September 22, 1977. Daily sessions will normally start at 9:00 a.m. and adjourn at 5:00 p.m., except as otherwise noted. The meeting may be extended or shortened depending upon progress on the agenda.

PROPOSED AGENDA

1. Progress report on draft fishery management plan (FMP) preparation for Spiny Lobster and Swallow Water Reef Fishes.
2. Status of Scientific and Statistical Committee and Advisory Panel Membership Appointment of new member.
3. Report of Council Chairmen meeting in Portland, Oregon.
4. SSC Report on the initiation of work on New FMP's.
5. NOAA General Counsel Report on the legality of the Council's visit to St. Maarten to observe tuna long-line fisheries operations of the Curacao Pioneering Company.
6. Status of the Virgin Islands office of the Caribbean Fishery Management Council.
7. Reactions to the proposed plan by the Council to monitor the Entry of U.S. Commercial Fishing Boats into the Limited British Virgin Island waters.
8. Status of previous request by the Council that certain Coastal Pelagics not be considered highly migratory.
9. Administrative matters.
10. Other Council/Committee Business.

This meeting is open to the public, and there will be seating for a limited number of public members available on a first-come first-served basis.

Members of the public having an interest in specific items for discussion are also advised that agenda changes are at times made prior to the meetings. To receive information on changes, if any, made to the agenda, interested members of the public should contact, on or about September 12, 1977:

Mr. Omar Munoz-Roure, Executive Director, Caribbean Fishery Management Council, P.O. Box 1001, Hato Rey, Puerto Rico 00919 (809-753-4926).

At the discretion of the Chairman interested members of the public may be permitted to speak at times which will allow the orderly conduct of official business. Interested members of the public who wish to submit written comments should do so by addressing the Executive Director at the above address. To receive due consideration and to facilitate inclusion of these comments in the record of the meetings, typewritten statements should be received within 10 days after the close of the meetings.

Dated August 24, 1977.

WINFRED H. MEIBOHM,
Associate Director,
National Marine Fisheries Service.

[FR Doc.77-25078 Filed 8-29-77;8:45 am]

NEW ENGLAND FISHERY MANAGEMENT COUNCIL'S SCIENTIFIC AND STATISTICAL COMMITTEE

Three Public Meetings

Notice is hereby given of three meetings of the Scientific and Statistical Committee of the New England Fishery Management Council, established by Section 302(g) of the Fishery Conservation and Management Act of 1976 (P.L. 94-265).

The New England Fishery Management Council has authority, effective March 1, 1977, over fisheries within the fishery conservation zone adjacent to the states of Maine, New Hampshire, Massachusetts, Rhode Island, and Connecticut. The Council will, among other things, prepare and submit to the Secretary of Commerce fishery management plans with respect to fishery management plans with respect to fisheries within its area of authority, prepare comments on foreign fishing applications, and conduct public hearings.

The Scientific and Statistical Committee assists the Council in the development, collection and evaluation of such statistical, biological, economic, social and other scientific information as is relevant to the Council's development and amendment of fishery management plans.

The first of the three Committee meetings will be held on November 15, 1977, from 9:00 a.m. to 4:00 p.m., at the Holiday Inn, Junction of Route 1 and 128, Peabody, Mass. The meeting may be extended or shortened depending on progress on the agenda.

PROPOSED AGENDA

Development of Silver Hake, Red Hake, Ocean Perch Plans.

The second of these Committee meetings will be held on December 20, 1977, from 9:00 a.m. to 4:30 p.m., at the JFK Building, Room 1112, Government Center, Boston, Mass. This meeting may be extended or shortened depending on progress on the agenda.

PROPOSED AGENDA

Development of Ocean Perch, Red Hake, Red Crab Plans.

The third in this series of Committee meetings will be held on January 17, 1978, from 9:00 a.m. to 4:00 p.m., at the Holiday Inn, Junction of Route 1 and 128, Peabody, Mass. The meeting may be extended or shortened depending on progress on the agenda.

PROPOSED AGENDA

Development of Ocean Perch, Red Hake, Red Crab Plans.

These meeting are open to the public and there will be seating at each meeting for approximately 20 public members available on a first-come first-served basis.

Members of the public having an interest in specific items for discussion are also advised that agenda changes are at times made prior to the meeting. To receive information on changes, if any, made to the agendas, interested members of the public should contact on or about 10 days before each of these meetings:

Mr. Spencer Apollonio, Executive Director, New England Fishery Management Council, Peabody Office Building, One Newbury Street, Peabody, Mass. 01960.

At the discretion of the Committee, interested members of the public may be permitted to speak at times which will allow the orderly conduct of Committee business. Interested members of the public who wish to provide written comments should do so by submitting them to Mr. Apollonio at the above address. To receive due consideration and to facilitate inclusion of these comments in the record of the meeting, typewritten statements should be received within 10 days after the close of each Committee meeting.

Dated: August 25, 1977.

WINFRED H. MEIBOHM,
Associate Director,
National Marine Fisheries Service.

COMMITTEE FOR PURCHASE FROM THE BLIND AND OTHER SEVERELY HANDICAPPED

PROCUREMENT LIST 1977

Proposed Addition

AGENCY: Committee for Purchase from the Blind and Other Severely Handicapped.

ACTION: Proposed Addition to Procurement List.

SUMMARY: The Committee has received a proposal to add to Procurement List 1977 a commodity to be produced by workshops for the blind or other severely handicapped.

COMMENTS MUST BE RECEIVED ON OR BEFORE: September 30, 1977.

ADDRESS: Committee for Purchase from the Blind and Other Severely Handicapped, 2009 14th Street North, Suite 610, Arlington, Va. 22201.

FOR FURTHER INFORMATION CONTACT:

C. W. Fletcher, (703-557-1145).

SUPPLEMENTARY INFORMATION: This notice is published pursuant to 41 U.S.C. 47(a)(2), 85 Stat. 77.

If the Committee approves the proposed addition, all entities of the Federal Government will be required to procure the commodity listed below from workshops for the blind or other severely handicapped.

It is proposed to add the following commodity to Procurement List 1977, November 18, 1976 (41 FR 50975):

Class 6645

Clock, Wall, 6645-00-935-4244.

C. W. FLETCHER,
Executive Director.

Corrections

In FR Doc. 22627 appearing at page 40009 in the issue for Monday, August 8, 1977, the following corrections should be made.

1. On line two of the footnote appearing at the bottom of the third column of page 40013, the word, "protecting", should read, "protection".

2. Line two of the first column on page 40014 reading, "recommended label alterations in this area.", should be removed, and placed as the final line of the footnote at the bottom of the third column on page 40013.

FEDERAL COMMUNICATIONS COMMISSION

[FCC 77R-77]

[Docket Nos. 20567—20569; File Nos. BPH-8905, BPH-9011, BPH-9156]

ALEXANDER S. KLEIN JR., ET AL.

Applications for Construction Permits; Memorandum Opinion and Order

In re applications of Alexander S. Klein, Jr., Media, Pennsylvania; Greater Media Radio Co., Media, Pennsylvania; Roberts Broadcasting Corp., Media, Pennsylvania, for construction permits.

Adopted August 23, 1977.

Released August 30, 1977.

1. This proceeding involves the mutually exclusive applications of Alexander S. Klein, Jr. (Klein), Greater Media Radio Company (Greater Media), and Roberts Broadcasting Corporation (Roberts) for authorization to construct a new FM broadcast station at Media, Pennsylvania. On February 14, 1977, after the record was closed, Klein filed a "Petition to Reopen the Record" [1] and a separate "Motion to Enlarge Issues," requesting the addition of Rule 1.65,[2] misrepresentation and financial issues against Greater Media. In an Initial Decision, FCC 77D-17, released April 14, 1977, Administrative Law Judge David I. Kraushaar granted Roberts' application, denied the two competing applications, and denied Klein's petition and motion. He concluded that since Greater Media ranked a distant third under his comparative evaluation of the applicants, the delay involved in considering the petition and motion on their merits would not be warranted.

2. We have reviewed the Initial Decision, the oral argument,[3] the parties' exceptions and the record. While we understand the considerations motivating the Administrative Law Judge to proceed to a final decision without ruling on Klein's request for enlargement of the issues, it is our view that the comparative situation is much closer than it appeared to the Judge, and that a full record should be compiled both for our own review and any review by the Commission which it may deem appropriate. Since we find, for the reasons stated below, that Klein has raised a substantial question regarding Greater Media's compliance with Rule 1.65, a remand of this proceeding for further hearing is required. In addition, we believe that neither Roberts nor Greater Media has established compliance with the Primer on Ascertainment of Community Problems by Broadcast Applicants,[4] and that, for the reasons to be given, they should be afforded an opportunity to correct these deficiencies prior to the remanded hearing.

3. *The Motion to Enlarge Issues.* Klein requested the addition of Rule 1.65, misrepresentation, and financial issues against Greater Media, upon the basis of the following facts relating primarily to the Greater Media proposal, that Daniel M. Lerner, Greater Media's principal stockholder, would obtain the necessary financing by selling his 25 percent interest in other broadcast interests to his brother, Arnold Lerner. The focus of the question is Arnold Lerner's capacity to make that purchase. Greater Media had originally filed its application as a sole proprietorship of Daniel Lerner. On January 10, 1975, prior to designation for hearing, the application was amended to show inter alia, that the applicant had been incorporated in the State of Pennsylvania, and that Lerner owned 95 percent of the stock. Greater Media relied for its financing upon a $50,000 investment and a $200,000 loan from Daniel Lerner. In order to obtain these funds, Daniel Lerner was to sell his 25 percent interest in two Massachusetts radio stations to his brother Arnold for $250,000. On April 9, 1975, also prior to the designation of the Greater Media application for hearing, the Great Down East Wireless Talking Machine Company, Inc. (Down East), of which Arnold Lerner was Treasurer, Chairman of the Board and 43 percent stockholder, filed an application for a construction permit for a new FM broadcast station in Auburn, Maine.[5] The Down East application contained a letter from a bank, dated April 3, 1975, indicating the bank's willingness to establish an $80,000 line of credit for Down East conditioned upon the personal endorsements of Arnold Lerner and two other Down East shareholders. Down East subsequently amended the application to reflect Arnold Lerner's commitment, by letter dated October 15, 1975, to endorse the bank loan for Down East, and his commitment to loan Down East $25,000. Down East's construction permit was granted on October 26, 1976 (FCC 76-954), and the license for that station, WWAV, was granted on April 6, 1977.[6]

4. On August 7, 1975, Greater Media's application was designated for hearing. A financial qualifications issue was designated to determine whether Arnold Lerner has sufficient net liquid assets to meet his $250,000 commitment to Daniel Lerner (40 FR 36805, published August 22, 1975). On October 29, 1975, Greater Media filed an amendment to its application (accepted by Order, FCC 75M-1932, released November 12, 1975), which included a "Partial Statement of Assets and Liabilities" of Arnold Lerner indicating a surplus of current and liquid assets over short term liabilities of $197,536, and two bank letters indicating a willingness to lend Arnold Lerner an additional $150,000. This amendment did not, however, report Arnold Lerner's interest in, or commitments to, Down East. On June 4, 1976, Greater Media filed another amendment (accepted by Order, 76M-841, released July 1, 1976), in which the applicant stated that Arnold Lerner was replacing his two prior bank loan commitments with a $200,000 commitment from another bank. Based on these facts, the Judge issued a partial summary decision favorably resolving the financial qualifications issue. (FCC 76M-1304, released October 12, 1976.)

[1] This petition only addresses the question of whether Klein timely filed its accompanying motion to enlarge issues. Klein maintains that it first became aware of the relevant information during the testimony at hearing.

[2] Rule 1.65 requires an applicant to amend its pending application whenever the information furnished therein "is no longer substantially accurate and complete in all significant respects" or whenever there is a "substantial change as to any other matter which may be of decisional significance in a Commission proceeding involving the pending application." The rule further provides that such amendment shall be made "as promptly as possible and in any event within 30 days, unless good cause is shown." (47 CFR 1.65.)

[3] Oral argument was held before a panel of the Review Board on August 2, 1977.

[4] 27 FCC 2d 650, 21 RR 2d 1507 (1971).

[5] In response to question 21 of the application form, which requires the applicant to report the interests in any other broadcast stations or pending applications of any member of the immediate family of a party to the application, Greater Media listed in both its original and amended applications that Daniel Lerner's brother, Arnold Lerner, owned interests in three existing broadcast stations in Massacusetts and Rhode Island. Klein's motion to enlarge the issues was based in part upon the failure of Greater Media to update its application to mention Arnold Lerner's interest in Down East. We do not think this omission warrants an issue under Section 1.65, since the omitted fact would not have been of decisional significance in the absence of a showing, not made on the record before us, that Arnold Lerner's broadcast interests should be attributed to Daniel Lerner.

[6] Down East is also the licensee of Station WLAM, Lewiston, Maine.

5. Klein's motion, unresolved by the Administrative Law Judge, asserted that the failure of Greater Media to report Arnold Lerner's financial commitments to Down East warranted issues under Section 1.65 and on misrepresentation, and that a financial issue was also required in view of Arnold Lerner's new liabilities. Thus, it is urged that Arnold Lerner's guarantee of Down East's $80,000 bank note and his $25,000 loan commitment reduced his assets to $105,000, and thus raised substantial questions as to Arnold Lerner's ability to buy Daniel Lerner's broadcast interests, questions which were hidden by the failure to disclose the matter by amendment of the Greater Media application. The Broadcast Bureau stated that it would support the addition of the requested issues should Greater Media be preferred under the standard comparative issue.

6. The Board will grant Klein's petition to reopen the record and its motion to enlarge the issues [7] in part under Section 1.65 (see footnote 5, supra), and deny Klein's requests for misrepresentation and financial issues. We note first that the significance of the failure to report Arnold Lerner's financial commitments to Down East must be evaluated as of the time these events occurred, while the financial qualification question is to be determined in light of the current situation. To take the Section 1.65 and misrepresentation aspects of the matter first, we find that Arnold Lerner's financial commitments to Down East were of potential decisional significance to Greater Media's qualifications to be a licensee. At the time these commitments were made (October 15, 1975), and prior to Greater Media's June 4, 1976 amendment, Arnold Lerner was shown to have net liquid assets plus available bank loans totalling $347,536 with which to purchase Daniel Lerner's broadcast interests. If a total of $105,000 in commitments to Down East were subtracted from Arnold Lerner's then available funds, he would have been more than $7,000 short of establishing his ability to meet the $250,000 purchase price for Daniel Lerner's stock. We must reject Greater Media's contention that Arnold Lerner's guarantee of Down East's $80,000 bank note need not have been reported since it was a triply contingent [8] and long-term liability.[9] The Board has consistently held that contingent liabilities should be reported to the Commission.[10] See Folkways Broadcasting Co., Inc., FCC 71R-63, 21 RR 2d 211, and Home Industries, Inc., 28 FCC 2d 454, 21 RR 2d 851 (Rev. Bd. 1971). From the limited information before us, we are unable to determine whether upon default the entire outstanding balance on the note becomes due and payable immediately, and whether each guarantor will immediately be jointly and severally liable. The terms of repayment of the loan provide no guidance on this point. Accordingly, a Rule 1.65 issue is warranted. However, we will add this issue on a comparative basis only, since there is no indication that Greater Media intended to conceal the unreported information in this proceeding. In this regard, we find it significant that the Down East application revealed to the Commission Arnold Lerner's commitments to both Down East and Greater Media, and Daniel Lerner admitted at hearing that his brother had an interest in Down East.[11]

7. The Board will deny Klein's requested issue concerning Arnold Lerner's ability to finance his purchase of Daniel Lerner's broadcast interests. As indicated above, at the time Arnold Lerner incurred the commitments to Down East, i.e., October 15, 1975, and until the June 4, 1976 amendment, Arnold Lerner may not have had sufficient current and liquid assets over current liabilities to meet his $250,000 commitment to Greater Media. However, the June 4, 1976 amendment, wherein Arnold Lerner substituted a $200,000 bank loan commitment for the two commitments totalling $150,000, cured any possible deficiency in this regard. Thus, Greater Media established that Arnold Lerner has available funds totalling $397,536 ($197,536 in net liquid assets and $200,000 in bank loan commitments). Even if we were to deduct all of Mr. Lerner's commitments to his brother ($250,000) and to Down East ($25,000 in loans and $80,000 as guarantor for the bank note), he would still have a surplus of available funds in excess of $42,000. Klein has failed to raise a substantial question as to the accuracy of these figures. We also reject the Bureau's contention that Arnold Lerner should not be credited with his $200,000 bank loan commitment, absent a statement from the bank that it is aware of his obligations to Down East. The Bureau's assertions that the bank may not have been informed of the obligations to Down East, and that it might not have been willing to make the loan commitment had it been aware of this obligation, are based on speculation and conjecture, and not supported by affidavits of a person or persons having personal knowledge thereof.[12] We therefore perceive no adequate basis for adding a financial issue. See Section 1.229(d) [13], and J. T. Parker, Jr., 7 FCC 2d 462, 9 RR 2d 897 (Rev. Bd. 1967).

8. *Ascertainment of Roberts.* By Memorandum Opinion and Order, 58 FCC 2d 105, 36 RR 2d 481 (Rev. Bd. 1976), the Review Board added the following limited ascertainment issue against Roberts:[14]

To determine whether the general public survey conducted by Roberts Broadcasting Corporation complies with the requirements set forth in the Commission's Primer.

On April 20, 1976, Roberts filed an amendment to its application (accepted by Order, FCC 76M-841, released July 1, 1976) which included the methods, procedures, and results of a new general public survey conducted in March 1976 by one of its principals. This survey consisted of telephone interviews with 105 Media residents, whose homes were chosen from every tenth name on Media's voter registration lists (Democratic, Republican and Independent). These lists contained 3,371 names. Roberts utilized an "Interviewee Identification Form" in order to check the "randomness" of its sample. The judge granted Roberts' motion for partial summary decision by Memorandum Opinion and Order, FCC 76M-1310, released October 12, 1976, concluding that its new general public survey met the randomness requirements of the Commission's Primer, supra, Q. & A. 13(b). Klein excepts to this ruling by the Judge.[15]

9. The Board is of the opinion that the Judge erred in granting Roberts' motion for partial summary decision.

[7] Klein has met the standard for filing such motions. It supported its motions with newly discovered evidence, not otherwise known or discoverable with due diligence at the time of the hearing, which, if true, would affect the decision. See Southeast Arkansas Radio, Inc., 61 FCC 2d 72, 38 RR 2d 1338 (1976). For it appears that Klein did not learn about Arnold Lerner's interest in Down East until the hearing held on January 31, 1977. His petition was filed on February 14, 1977.

[8] Greater Media contends that this guarantee was "triple-contingent" since it would only have become a liability of Arnold Lerner upon the occurrence of the following three events: (1) the grant of Down East's construction permit, (2) the failure of Down East to meet its repayment obligations, and (3) the failure of the other two co-guarantors to make their proportionate share of payments.

[9] Greater Media apparently categorizes the guarantee as long-term because principal repayments are deferred for the first year of the loan under the terms of the loan letter.

[10] We note that good accounting principles require disclosure of contingent liabilities in financial statements or notes thereto. See Accounting Research Bulletin No. 50, and APB Accounting Principles, Current Text as of December 1, 1971, (Section 5514). We need not decide whether the type of commitment made by Arnold Lerner should be held to diminish his current assets, since the issue of financial qualification no longer can turn on that question. But the matter appears to have been of substantial enough potential impact to warrant divulgence under Section 1.65 and examination by the Commission and other interested parties.

[11] For the same reasons we believe that the requested misrepresentation issue is unwarranted.

[12] In this regard, we note that the bank letter is dated May 18, 1976, seven months after Mr. Lerner made his commitments to Down East on October 15, 1975.

[13] Section 1.229(d) states that "motions [to enlarge issues], oppositions thereto, and replies to oppositions shall contain specific allegations of fact sufficient to support the action requested" and that such allegations "except for those of which official notice may be taken, shall be supported by affidavits of a person or persons having personal knowledge thereof."

[14] Roberts erroneously contends that Klein has waived his right to appeal this ruling by failing to oppose a supplemental pleading submitted by Roberts after Klein had originally opposed its motion for partial summary decision. *Abacoa Radio Corp.* v. *FCC*, 123 U.S. App. D.C. 218, 358 F.2d 849, 6 RR 2d 2066 (1966), cited by Roberts, is inapposite. That case merely held that the Court of Appeals will not entertain issues not previously raised before the Commission.

V 42 168 AUG 30 77 UMI

The Primer at Q. & A. 13(b) requires that a random sample of the general public be conducted. Roberts' use of Media's voter registration lists as the basis for its general public survey did not comply with this requirement. There cannot be a random sample of the public in a community if the base from which the sample is taken excludes a substantial portion of the public upon an arbitrary standard, particularly where, as is the case here, the standard relates to political conduct, i.e., whether a person registers to vote. Unlike telephone or city directories,[15] voter registration lists do not necessarily include a large percentage of a community's population. In fact, Media's registration lists contained only 3,371 names as compared to its 6,444 residents (according to the 1970 census). The exclusion of non-registered voters, we believe, is especially disturbing since at least some of those individuals obviously have different political priorities than others and quite concelvably have differing views of the community's problems than those registering. It is of no consequence that Roberts was unable to use the county's telephone directory, for there were other means available from which a random sample could have been made. Nor can this deficiency in Roberts' survey be cured by its assertion that since it was the homes of registered voters that were called, rather than the voters personally, contacts were not limited to the people on its lists. The interviewing process was distorted at the outset, and we have no way of knowing the likelihood of contacting a non-registrant at the home of a registrant.[16] However, in light of the novel question involved, i.e., the adequacy of voter registration lists as a basis for general public surveys, the fact that Roberts' survey complies with the Primer in all but this one easily correctable aspect, and the fact that this proceeding must be remanded on other grounds, the Board will allow Roberts the opportunity to amend its ascertainment showing within a reasonable period of time.

10. *Ascertainment of Greater Media.* On our own motion, the Board will add a limited ascertainment issue with respect to Greater Media. As previously noted, the Primer, supra, Q. & A. 13(b), requires each applicant to conduct a random sample of the general public. It also states that "* * * an applicant's principal obligation is to ascertain the problems of his community of license." (Q. & A. 6.) Although Greater Media has apparently conducted a random survey by interviewing 50 people taken from a county telephone directory, only one of those interviewed was listed as residing in Media. Thus, on its face, Greater Media's ascertainment effort with respect to its general public survey appears to be deficient.[17] However, since we are raising this question for the first time, Greater Media will be allowed an opportunity to amend its application to correct this deficiency within a reasonable period of time.[18]

11. ACCORDINGLY, *it is ordered,* that the petition to reopen the record filed February 14, 1977 by Alexander S. Klein, Jr. IS GRANTED; the motion to enlarge issues filed February 14, 1977 by Alexander S. Klein, Jr. is granted to the extent indicated herein, and is denied in all other respects; and the Memorandum Oponion and Order, FCC 76M–1310, released October 12, 1976, is vacated; and

12. *It is further ordered,* That the record herein is reopened; and that this proceeding is remanded to the presiding Administrative Law Judge for adduction of evidence on the following added issues and the issuance of such further Initial Decision as may be appropriate:

(a) To determine whether the general public survey conducted by Greater Media Radio Company complies with the requirements set forth in the Commission's Primer;

(b) To determine whether Greater Media Radio Company has failed to comply with the provisions of § 1.65 of the Commission's rules with respect to keeping the Commission advised of Arnold S. Lerner's financial commitments and, if so, the effect of such noncompliance on the applicant's comparative qualifications.

13. *It is further ordered,* That the burdens of proceeding with the introduction of evidence and proof under Issue (a) shall be on Greater Media Radio Company.

14. *It is further ordered,* That Greater Media Radio Company and Roberts Broadcasting Corporation are afforded 30 days from the release date of this opinion to amend their respective general public surveys."

FEDERAL COMMUNICATIONS COMMISSION,
VINCENT. J. MULLINS,
Secretary.

[FR Doc.77-25115 Filed 8-29-77;8:45 am]

[15] In its Report adopting the Primer, the Commission specifically stated that a telephone directory was sufficient because of the "pervasiveness of the telephone in this country." 27 FCC 2d at 667, 21 RR 2d at 1525.

[16] Neither can we accept Roberts' assertion that its statistical breakdown of those interviewed reveals a generally random sample, in light of that sample's failure to encompass non-registered voter households. It is not enough to show that various population groups were included where one type of person was arbitrarily excluded.

[17] The Board has held that a survey of the general public outside of the principal community is not required by the Primer. See, e.g., Templar Broadcasting Co., 53 FCC 2d 643 (Rev. Bd. 1975).

[18] Should the problems elicited by either Greater Media or Roberts in their new showings dictate any changes in their proposed programming, we expect that such changes will be included in their respective amendments.

[19] Of course, the Judge may grant extensions of time upon a proper showing of good cause by either applicant.

[Report No. 872]

COMMON CARRIER SERVICES INFORMATION

Applications Accepted for Filing

AUGUST 22, 1977.

The applications listed herein have been found, upon initial review, to be acceptable for filing. The Commission reserves the right to return any of these applications, if upon further examination, it is determined they are defective and not in conformance with the Commission's Rules and Regulations or its policies.

Final action will not be taken on any of these applications earlier than 31 days following the date of this notice, except for radio applications not requiring a 30 day notice period (See § 309(c) of the Communications Act), applications filed under Part 68, applications filed under Part 63 relative to small projects, or as otherwise noted. Unless specified to the contrary, comments or petitions may be filed concerning radio and Section 214 applications within 30 days of the date of this notice and within 20 days for Part 68 applications.

In order for an application filed under Part 21 of the Commission's Rules (Domestic Public Radio Services) to be considered mutually exclusive with any other such application appearing herein, it must be substantially complete and tendered for filing by whichever date is earlier: (a) the close of business one business day preceding the day on which the Commission takes action on the previously filed application; or (b) within 60 days after the date of the public notice listing the first prior filed application (with which the subsequent application is in conflict) as having been accepted for filing. In common carrier radio services other than those listed under Part 21, the cut-off date for filing a mutually exclusive application is the close of business one business day preceding the day on which the previously filed application is designated for hearing. With limited exceptions, an application which is subsequently amended by a major change will be considered as a newly filed application for purposes of the cut-off rule. [See § 1.227(b)(3) and 21.30(b) of the Commission's Rules.]

FEDERAL COMMUNICATIONS COMMISSION,
VINCENT J. MULLINS,
Secretary.

APPLICATIONS ACCEPTED FOR FILING

DOMESTIC PUBLIC LAND MOBILE RADIO SERVICE

21932–CD–P–(4)–77 Dial-A-Page, Inc., (KWU449) Resubmitted, C.P. to change antenna system operating on 35.22 MHz; Additional Control facilities to operate on 72.02 MHz. at Loc. No. 1: 100 Broadway, Oklahoma City; 35.22 MHz at a new site described as Loc. No. 2, to be located at 9301 South Sooner Road, Moore; 35.22 MHz at a new site described as Loc. No. 3: 3555 NW 58th Street, Oklahoma City, Okla.

21933–CD–P–(3)–77 James L. Munch (KOP 307), C.P. for additional facilities to operate on 152.06 (Base) and 459.300 MHz. Repeater to be located at Loc. No. 1: South Peak in Highwood Mountain, 8 miles NNE. of Raynesford; 454.300 MHz Control at Loc. No. 2; 814 5th Street, South, Great Falls, Mont.

21934–CD–P–77 Souris River Telephone Mutual Aid (KAI930), C.P. for additional to operate on 152.66 MHz at Loc. No. 1: 13.3 Miles South of Minot, N. Dak.

21935–CD–P–77 Adams Telephone Cooperative (new), C.P. for a new 1-way station to operate on 152.84 MHz to be located at Telephone Center Office, Golden, Ill.

21936–CD–MP–77 Service Unlimited, Inc. (KUS332), C.P. to relocate facilities operating on 43.22 MHz to be located at Wachovia Building, Winston-Salem, N.C.

21937–CD–P–77 Messages by Radio, Inc. (KEA200), C.P. to change antenna system operating on 152.03 at Loc. No. 2: 34 Madison Street, Spring Valley, N.Y.

21938–CD–P–(2)–77 Telephone and Radio Answering Service, Inc. (KFJ898), C.P. for additional facilities to operate on 454.325, 454.350 MHz, to be located 0.75 mile North of Highway 90 on River Road, Berwich, La.

21939–CD–MP–(4)–77 Radio Phone Communications, Inc., (KFJ888), C.P. to replace transmitter operating on 454.050, 454.100, 454.200 MHz: Near Northwest Intersection of Virginia Rte. No. 190 and Centerville Turnpike, Virginia Beach, Va.

21940–CD–TC–(2)–77 Ram Broadcasting of Washington, Inc., Consent to Transfer of Control from Ram Broadcasting of Washington, Inc., Transferor to Paul A. Matschiner, Transferees. Stations: KTR996, Renton, Washington; KUO584, Seattle, Wash.

21941–CD–P–77 Jefferson Telephone Company, (KAA691), C.P. to change antenna system, replace transmitter and relocate facilities operating on 35.54 MHz to be located West Central Avenue and North Walnut Street, Jefferson, Iowa.

21942–CD–P–77 Radio Call Company of Long Island, Inc., (KRM955), C.P. to relocate facilities operating on 158.70 MHz to be located 300' S. of Midvale Avenue E. Side of Adirondack Drive, Selden, N.Y.

21943–CD–P–77 ATS Mobile Telephone, Inc., (new), C.P. for a new 1-way station to operate on 35.22 MHz to be located at 1716 Wayne Street, Bellevue, Neb.

21944–CD–P–77 Carolina Telephone and Telegraph Company, (KFL937), C.P. to change antenna system operating on 152.51 MHz located at 501 Broad Street, New Bern, N.C.

21945–CD–P–77 Adams Telephone Cooperative, (new), C.P. for a new 2-way station to operate on 152.78 MHz to be located N.E. Corner of State and South Streets, Mendon, Ill.

21946–CD–P–77. Adams Telephone Cooperative, (new), C.P. for a new 1-way station to operate on 152.84 MHz to be located at NE. corner of State and South Streets, Mendon, Ill.

21947–CD–P–77 Southeast Mobilphone, Inc. (KLF611), C.P. for additional facilities to operate on 152.24 MHz at a new site described as Loc. No. 2 to be located at View Park Drive, Knoxville, Tenn.

21948–CD–P–77 New York Telephone Company, (new), C.P. for a new 1-way station to operate on 152.84 MHz to be located on Hillcrest Street, Lake Placid, N.Y.

21949–CD–MP–77 Mobilphone Service, Inc. (KJU811), C.P. to change antenna system operating on 72.18 MHz Loc. No. 1 located at 1.3 miles SE. of Intersection of Hwy. No. 523 and county road 792, Oyster Creek, Tex.

21951–CD–AL–77 Vincent W. Elliott, partner, d.b.a. Salem Radio Paging with Phil B. Ford and James F. Sproule, Consent to Assignment of License from Vincent W. Elliott, Partner, d.b.a. Salem Radio Paging with Phil B. Ford and James F. Sproule, Assignor to Vincent W. Elliott, Assignee. Station: KLF656, Salem, Oreg.

21952–CD–P–77 Page Boy, Inc. (KEA860), C.P. for additional facilities to operate on 35.22 MHz at a new site described as Loc. No. 6 to be located at Existing Tower at Westchester Community College, Valhalla, N.Y.

21953–CD–P–77 Christensen Broadcasting Co., Inc. (new), C.P. for a new 1-way station to operate on 35.58 MHz to be located at Humboldt, Iowa.

21954–CD–P–77 Christensen Broadcasting Co., Inc. (new), C.P. for a new 2-way station to operate on 152.15 MHz to be located 0.2 mile E. of Humboldt City limits on Hwy. No. 3, Humboldt, Iowa.

FEDERAL ELECTION COMMISSION

[Notice 1977–46, AOR 1977–40]

ADVISORY OPINION REQUESTS

Pursuant to 2 U.S.C. § 437f(c) and the procedures reflected in Part 112 of the Commission's regulations, published on August 25, 1976 (41 FR 35954), Advisory Opinion Request 1977–40 has been made public at the Commission. Copies of AOR 1977–40 were made available on August 24, 1977. These copies of the advisory opinion request were made available for public inspection and purchase at the Federal Election Commission, Public Records Division, at 1325 K Street, NW., Washington, D.C. 20463.

Interested persons may submit written comments on any advisory opinion request within ten days after the date the request was made public at the Commission. These comments should be directed to the Office of the General Counsel, Advisory Opinion Section, at the Commission. Persons requiring additional time in which to respond to any advisory opinion requests will normally be granted such time upon written request to the Commission. All timely comments received by the Commission will be considered before the Commission issues an advisory opinion. Comments on pending requests should refer to the specific AOR number of the requests and statutory references should be to the United States Code citations rather than to the Public Law citations.

A description of the request recently made public as well as the identification of the requesting party follows hereafter:

AOR 1977–40: May Friends of Newt Steers, the principal campaign committee of Representative Newton I. Steers, Jr., accept contributions to retire a 1976 general election campaign debt from the Maryland Medical Political Action Committee and the American Medical Political Action Committee in an aggregate amount of $20,000 representing a maximum $5,000 contribution from each committee for the primary and general election? Requested by Representative Newton I. Steers, Jr., House of Representatives, Washington, D.C.

Dated: August 24, 1977.

THOMAS E. HARRIS,
Chairman for the Federal Election Commission.

FEDERAL ENERGY ADMINISTRATION

COMPLIANCE WITH THE NATIONAL ENVIRONMENTAL POLICY ACT

Intent To Prepare Environmental Impact Statements

AGENCY: Federal Energy Administration.

ACTION: Notice of Intent to prepare Environmental Impact Statements.

SUMMARY: The Federal Energy Administration (FEA) announces it has begun preparation of draft environmental impact statements (EIS's), in accordance with Section 102(2)(C) of the National Environmental Policy Act, for each of the following proposed projects:

(a) 1 site-specific EIS for the proposed Transco synthetic natural gas (SNG) plant in Chester Township, Pennsylvania;

(b) 3 "cluster" EIS's for groups of proposed crude oil storage sites in Texas and Louisiana for the Strategic Petroleum Reserve (SPR); and

(c) 4 site-specific EIS's and 1 "cluster" EIS for certain major fuel burning installations (MFBI's) issued construction orders under the Energy Supply and Environmental Coordination Act (ESECA).

Further information on these projects is provided below.

All interested agencies, organizations, or persons desiring to submit comments or suggestions for consideration in connection with the preparation of these draft EIS's are invited to do so. Upon completion of the draft EIS's their availability will be announced in the FEDERAL REGISTER, at which time public comments will again be solicited.

ADDRESS FOR COMMENTS AND CONTACT FOR FURTHER INFORMATION:

Robert J. Stern (Office of Environmental Impact), 12th and Pennsylvania Avenue NW., Room 7119, Washington, D.C. 20461 (202–566–9760).

SUPPLEMENTARY INFORMATION:

A. TRANSCO SNG PLANT

FEA is considering an allocation of naphtha to the Transco Gas Transmission Company to be used to manufacture SNG at a site in Chester Township, Pennsylvania, located immediately west of Chester City and northeast of Marcus Hook. FEA may either approve, deny, or adjust the requested allocation of approximately 56,000 barrels per day of naphtha feedstock.

The design capacity of the proposed SNG plant is 245 million cubic feet per day. The company intends to operate the plant 350 days per year. At full design operation, production will be 85.5 billion cubic feet of SNG annually.

The process facilities would occupy an area of 68 acres, and the feedstock and fuel storage facilities would occupy an area of the same size located about 400 yards west of the proposed plant. Feedstock would be delivered to the storage area by pipeline from an unloading facility on the Delaware River at Marcus Hook.

Major alternatives to be considered in the EIS include: other sources of gas; measures to reduce gas consumption; and alternative sites and facility designs.

B. SPR STORAGE SITES

FEA is preparing "cluster" EIS's for three groups of proposed storage sites for the SPR program. The proposed sites include nine undeveloped salt domes and five developed domes with expansion capacity. The arrangement of sites into clusters is based on their proposed connection to the major mid-continent crude oil distribution systems via the Texoma, Seaway, and Capline terminals. The location of the proposed sites and their maximum potential storage capacities are listed below:

1. *Texoma group*, comprised of four sites in Texas and Louisiana; West Hackberry site, Cameron Parish, Louisiana, 210 million barrels (MMB); Black Bayou site, Cameron Parish, Louisiana, 150 MMB; Vinton site, Calcasieu Parish, Louisiana, 50 MMB; and Big Hill site, Jefferson County, Texas, 100 MMB.

2. *Seaway group*, comprised of five sites in Texas: Bryan Mound site, Brazoria County, 163 MMB; Nash site, Fort Bend County, 100 MMB; Allen site, Brazoria County, 100 MMB; Damon Mound site, Brazoria County, 100 MMB, and West Columbia site, Brazoria County, 100 MMB.

3. *Capline group*, comprised of five sites in Louisiana: Chocahoula site, LaFourche Parish, 200 MMB; Bayou Choctaw site, Iberville Parish, 150 MMB; Weeks Island site, Iberia Parish, 180 MMB; Iberia site, Iberia Parish, 50 MMB; and Napoleonville site, Assumption Parish, 150 MMB.

C. CONSTRUCTION ORDERS FOR MFBI'S

Section 2 of ESECA, as amended, grants FEA authority to require MFBI's in the early planning process to be designed and constructed with coal burning capability.

FEA intends to prepare site-specific EIS's for MFBI's at the four plants listed in Section I below, and a "cluster" EIS to assess the site-specific and cumulative impacts of making effective construction orders for other MFBI's (listed in Section II below) at sites located in the same Air Quality Control Region (AQCR).

Although the proposed Federal action for each of these cases is strictly to require that each facility be constructed with coal-burning capability, FEA intends to analyze the environmental impacts of utilizing the coal capability in addition to analyzing the impacts of constructing that capability.

Alternatives to the proposed actions, which will be studied for each site, include: no Federal action (including voluntary conversion), conservation, electrification, cogeneration, fuel mix and alternate fuels.

Further information on each of the sites for which issuance of a Notice of Effectiveness of the construction order is proposed is provided below.

I. SITE-SPECIFIC EIS

1. Docket No.	1050–1–1.
Parent company	The Boeing Co.
MFBI	Boeing Vertol Co.
Number of units	1.
MFBI location	Ridley Township, Pa. (existing facility).
Industrial category.	045 (nonattainment,
AQCR	Aircraft. SO_x and TSP).
2. Docket No.	6650–5–1, 6350–5–2.
Parent company.	Shell Oil Co.
MFBI	Mobile chemical plant.
Number of plants.	2.
MFBI location	Mobile, Ala. (existing facility).
Industrial category.	Chemicals.
AQCR	005 (nonattainment, TSP).
3. Docket No.	3300–1–1.
Parent company.	Goodyear Tire and Rubber Co.
MFBI	Gadsden plant.
Number of units.	1.
MFBI location	Gadsden, Ala. (existing facility).
Industrial category.	Tires.
AQCR	003.
4. Docket Nos.	3090–2–1, 3090–2–2, 3090–2–3.
Parent company.	General Motors Corp.
MFBI	Proposed auto assembly plant.
Number of units.	3.
MFBI location.	Oklahoma City, Okla. (new facility).
Industrial category.	Motor vehicle bodies.
AQCR	184 (nonattainment, TSP).

II. "CLUSTER" EIS FOR 4 SITES IN AQCR No. 106

1. Docket No.	7230–1–1.
Parent company.	Texaco, Inc./Jefferson Chemical Co.
MFBI	Neches plant.
Number of units.	1.
MFBI location	Port Neches Tex. (existing facility).
Industrial category.	Chemicals.
2. Docket No.	8340–1–3, 8340–1–4, 8340–1–5.
Parent company.	Exxon Chemical Co.,
MFBI	Baton Rouge chemical plant.
Number of units.	3.
MFBI location	Baton Rouge, La. (existing facility).
Industrial category.	Chemicals, petroleum refining.
3. Docket No.	6650–4–1.
Parent company.	Shell Oil Co.
MFBI	Geismar chemical plant.
Number of units.	1.
MFBI location.	Geismar, La. (existing facility).
Industrial category.	Chemicals.
4. Docket No.	6650–6–1, 6650–6–2, 6650–6–3.
Parent company.	Shell Oil Co.
MFBI	Norco manufacturing complex.
Number of units.	3.
MFBI location	Norco, La.
Industrial category.	Chemicals, petroleum refining.

Issued in Washington, D.C., August 25, 1977.

ERIC J. FUGI,
Acting General Counsel, Federal Energy Administration.

NORTH ATLANTIC CONTINENTAL FREIGHT CONFERENCE

Modification of Agreement Filed

Notice is hereby given that the following agreement has been filed with the Commission for approval pursuant to Section 15 of the Shipping Act, 1916, as amended (39 Stat. 733, 75 Stat. 763, 46 U.S.C. 814).

Interested parties may inspect and obtain a copy of the agreement at the Washington office of the Federal Maritime Commission, 1100 L Street NW., Room 10126; or may inspect the agreement at the field offices located at New York, N.Y., New Orleans, La., San Francisco, Calif., and San Juan, Puerto Rico. Comments on such agreements, including requests for hearing, may be submitted to the Secretary, Federal Maritime Commission, Washington, D.C., 20573, on or before September 19, 1977. Any person desiring a hearing on the proposed agreement shall provide a clear and concise statement of the matters upon which they desire to adduce evidence. An allegation of discrimination or unfairness shall be accompanied by a statement describing the discrimination or unfairness with particularity. If a violation of the Act or detriment to the Commerce of the United States is alleged, the statement shall set forth with particularity the acts and circumstances said to constitute such violation or detriment to commerce.

A copy of any such statement should also be forwarded to the party filing the agreement (as indicated hereinafter) and the statement should indicate that this has been done.

Notice of Agreement Filed by:

Howard A. Levy, Esq., Suite 727, 17 Battery Place, New York, N.Y. 10004.

Agreement No. 9214–23, among the members of the above-named conference, adds traffic from inland U.S. points via North Atlantic ports to the current scope of the agreement. The conference at present has such inland authority only with respect to interior points in Europe served via conference ports. The modification also provides that cargo transshipped at conference ports and moving on a through bill of lading from/to a port outside the scope of the agreement is not covered by the agreement.

By Order of the Federal Maritime Commission.

Dated: August 25, 1977.

JOSEPH C. POLKING,
Acting Secretary.

FIRST GUTHRIE BANCSHARES, INC.

Order Approving Formation of Bank Holding Company and Engaging in Insurance Agency Activities

First Guthrie BancShares, Inc., Guthrie, Okla., has applied for the Board's approval under section 3(a)(1) of the Bank Holding Company Act (12 U.S.C. 1842(a)(1)) of formation of a bank holding company by acquiring 80 percent or more of the voting shares of The First National Bank of Guthrie, Guthrie, Okla. ("Bank").

Applicant has also applied for the Board's approval, pursuant to section 4(c)(8) of the Act (12 U.S.C. 1843(c)(8)) and § 225.4(b)(2) of the Board's Regulation Y (12 CFR 225.4(b)(2)), to acquire 100 percent of the beneficial interest of a proposed business trust, First Guthrie Business Trust, Guthrie, Okla., which will in turn own 100 percent of First Guthrie Insurance Agency, Guthrie, Okla. ("Insurance"), a company that will engage in the activities of offering credit life insurance and credit accident and health insurance in connection with extensions of credit by Bank. Such activities have been determined by the Board to be closely related to banking (1 CFR 225.4(a)(9)).

Notice of the applications, affording opportunity for interested persons to submit comments and views on the applications, has been given in accordance with sections 3 and 4 of the Act (42 FR 31838). The time for filing comments and views has expired, and the Board has considered the applications and all comments received in light of the factors set forth in section 3(c) of the Act and the considerations specified in section 4(c)(8) of the Act.

Applicant is a non-operating corporation organized for the purpose of becoming a bank holding company by acquiring Bank, which holds deposits of $24.7 million.[1] Upon acquisition of Bank, Applicant would control the 99th largest commercial banking organization in the State of Oklahoma and approximately 0.2 percent of total deposits in commercial banks in that State.

Bank is the largest of seven banks in the relevant banking market, which is approximated by Logan County, and holds approximately 43.5 percent of the total commercial bank deposits in that market. Since Applicant has no other banking subsidiaries and Applicant's principals do not control any other banks, consummation of the proposal would not have any adverse effects upon either existing or potential competition nor would it increase the concentration of banking resources in any relevant area. Thus, the Board concludes that the competitive effects of the proposal are consistent with approval of the application.

The financial and managerial resources and future prospects of Applicant, which are dependent upon those of Bank and Insurance, appear satisfactory and are regarded as being consistent with approval of the application to become a bank holding company. The debt to be incurred by Applicant in connection with this proposal appears to be serviceable without having adverse effects on the financial condition of either Bank or Insurance. Therefore, considerations relating to banking factors are regarded as being consistent with approval. While no major changes are contemplated in Bank's services, considerations relating to convenience and needs of the community to be served are also consistent with approval. Accordingly, it is the Board's judgment that Applicant's proposal to form a bank holding company would be consistent with the public interest and that the application should be approved.

[1] All banking data are as of December 31, 1976.

In connection with its application to become a bank holding company, Applicant has also applied for approval to acquire 100 percent of the beneficial interest in First Guthrie Business Trust, which in turn would own 100 percent of the voting shares of Insurance. Insurance would engage de novo in the sale of credit life and credit accident and health insurance in connection with the extensions of credit by Bank. Under Oklahoma State law, financial institutions may not act as agent for the sale of credit-related insurance, nor may an insurance agency pass its income on to any corporation not licensed as an agent. The Oklahoma Attorney General has ruled, however, that the prohibition of Oklahoma insurance statutes do not apply to a business trust. Approval of the application would provide a convenient source of credit-related insurance, and the Board views this as being in the public interest. It does not appear that Applicant's engagement in these activities would have any significant adverse effects on competition. Furthermore, there is no evidence in the record indicating that consummation of the proposal would result in any undue concentration of resources, unfair competition, conflicts of interests, unsound banking practices or other adverse effects on the public interest.

Based on the foregoing and other considerations reflected in the record, the Board has determined that the considerations affecting the competitive factors under Section 3(c) of the Act and the balance of the public interest factors the Board must consider under Section 4(c)(8) of the Act both favor approval of Applicant's proposals.

Accordingly, the applications are approved for the reasons summarized above. The acquisition of Bank shall not be made before the thirtieth calendar day following the effective date of this Order. The acquisition of Bank and the commencement of the above-described insurance agency activities shall be made not later than three months after the effective date of this Order, unless such period is extended for good cause by the Board or by the Federal Reserve Bank of Kansas City pursuant to delegated authority. The approval of Applicant's credit-related insurance activities is subject to the conditions set forth in § 225.4(c) of Regulation Y and to the Board's authority to require reports by, and make examinations of, holding companies and their subsidiaries and to require such modification or termination of the activities of a bank holding company or any of its subsidiaries as the Board finds necessary to assure compliance with the provisions and purposes of the Act and the Board's regulations and orders issued thereunder or to prevent evasion thereof.

By order of the Board of Governors,[2] effective August 23, 1977.

GRIFFITH L. GARWOOD,
Deputy Secretary of the Board.

[FR Doc.77-25070 Filed 8-29-77;8:45 am]

KREMMLING HOLDING CO.

Formation of Bank Holding Company

Kremmling Holding Company, Kremmling, Colo., has applied for the Board's approval under Section 3(a)(1) of the Bank Holding Company Act (12 U.S.C. 1842(a)(1)) to become a bank holding company through acquisition of 100 percent (less directors' qualifying shares) of the voting shares of Bank of Kremmling, Kremmling, Colo. The factors that are considered in acting on the application are set forth in Section 3(c) of the Act (12 U.S.C. 1842(c)).

Kremmling Holding Company, Kremmling, Colo., has also applied, pursuant to Section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.4(b)(2) of the Board's Regulation Y (12 CFR 225.4(b)(2)), for permission to engage de novo in the sale of credit life and credit accident and health insurance directly related to extensions of credit by Bank of Kremmling. Notice of the application was published on June 16, 1977, in Middle Park Times, a newspaper circulated in Grand County, Colo. Such activities have been specified by the Board in § 225.4(a) of Regulation Y as permissible for bank holding companies, subject to Board approval of individual proposals in accordance with the procedures of § 225.4(b).

Interested persons may express their views on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question should be accompanied by a statement summarizing the evidence the person requesting the hearing proposes to submit or to elicit at the hearing and a statement of the reasons why this matter should not be resolved without a hearing.

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of Kansas City.

Any views or requests for hearing should be submitted in writing and received by the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, not later than September 20, 1977.

Board of Governors of the Federal Reserve System, August 23, 1977.

GRIFFITH L. GARWOOD,
Deputy Secretary of the Board.

[2] Voting for this action: Vice Chairman Gardner and Governors Wallich, Jackson, Partee and Lilly. Absent and not voting: Chairman Burns and Governor Coldwell.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Alcohol, Drug Abuse, and Mental Health Administration

ADVISORY COMMITTEES

Meeting

In accordance with Section 10(a)(2) of the Federal Advisory Committee Act (5 U.S.C Appendix I), announcement is made of the following National Advisory body scheduled to assemble during the month of September 1977:

DRUG ABUSE DEMONSTRATION REVIEW COMMITTEE

TIME: 9:30 a.m., September 19-21.

PLACE: Southwest Conference Room, 8th Floor, One Central Plaza, 11300 Rockville Pike, Rockville, Md. 20852. Open—September 19, 9:30-10:30 a.m. Closed—Otherwise.

CONTACT:—Thomas C. Voskuhl, Room 630, Rockwall Building, 11400 Rockville Pike, Rockville, Md. 20852 (301-443-4100).

PURPOSE: The Drug Abuse Demonstration Review Committee is charged with the initial review of grant applications for Federal assistance in the program areas administered by the National Institute on Drug Abuse relating to demonstration activities and makes recommendations to the National Advisory Council on Drug Abuse for final review.

AGENDA: From 9:30 a.m. to 10:30 a.m., September 19, the meeting will be open for discussion of administrative announcements and program developments. Otherwise, the Committee will be performing initial review of grant applications for Federal assistance and will not be open to the public in accordance with the determination by the Acting Administrator, Alcohol, Drug Abuse, and Mental Health Administration, pursuant to the provisions of Section 552b (c)(6), Title 5 U.S. Code and Section 10(d) of Public Law 92-463 (5 U.S.C. Appendix I).

Substantive program information may be obtained from the contact person listed above. The NIDA Information Officer who will furnish summaries of the meeting and a roster of the Committee membership on request is Mr. Kenneth Howard, Director, Office of Communica-

V 42 168 AUG 30 77 UMI

tions and Public Affairs, 11400 Rockville Pike, Room 110, Rockville, Md. 20852 (301–443–6500).

Dated: August 23, 1977.

CAROLYN T. EVANS,
Committee Management Officer, Alcohol, Drug Abuse, and Mental Health Administration.

Food and Drug Administration

[Docket No. 77G-0199]

ICI UNITED STATES, INC.

Filing of Petition for Affirmation of GRAS Status

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: ICI United States, Inc., has filed a petition (GRASP 7G0087) proposing affirmation that the glucose isomerase enzyme derived from immobilized *Arthrobacter globiformis* used in the isomerization of dextrose-containing nutritive sweeteners and the resulting high-fructose corn syrup are generally recognized as safe (GRAS).

FOR FURTHER INFORMATION CONTACT:

Corbin I. Miles, Bureau of Foods (HFF-335), Food and Drug Administration, Department of Health, Education, and Welfare, 200 C St. SW., Washington, D.C. 20204 (202–472–4750).

SUPPLEMENTARY INFORMATION: Pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (secs. 201(s), 409, 701(a), 52 Stat. 1055, 72 Stat. 1784–1788 (21 U.S.C. 321(s), 348, 371(a))) and the regulations for affirmation of GRAS status in § 170.35 (21 CFR 170.35, formerly § 121.40, prior to recodification published in the FEDERAL REGISTER of March 15, 1977 (42 FR 14302)), notice is given that a petition (GRASP 7G0087) has been filed by ICI United States, Inc., Concord Pike and New Murphy Rd., Wilmington, DE 19897, and placed on public display at the office of the Hearing Clerk, Food and Drug Administration, proposing affirmation that the glucose isomerase enzyme derived from immobilized *Arthrobacter globiformis* used in the isomerization of dextrose-containing nutritive sweeteners and the resulting high-fructose corn syrup are generally recognized as safe (GRAS).

Any petition that meets the format requirements outlined in § 170.35 is filed by the Food and Drug Administration. There is no prefiling review of the adequacy of data to support a GRAS conclusion. Thus, the filing of a petition for GRAS affirmation should not be interpreted as a preliminary indication of suitability for affirmation.

Interested persons may, on or before October 31, 1977, review the petition and/or file comments (four copies, identified with the Hearing Clerk docket number found in brackets in the heading of this document) with the Hearing Clerk (HFC–20), Food and Drug Administration, Rm. 4–65, 5600 Fishers Lane, Rockville, MD 20857. Comments should include any available information that would be helpful in determining whether the substance is, or is not, generally recognized as safe. A copy of the petition and received comments may be seen in the office of the Hearing Clerk, between 9 a.m. and 4 p.m., Monday through Friday.

Dated: August 19, 1977.

HOWARD R. ROBERTS,
Acting Director, Bureau of Foods.

PANEL ON REVIEW OF TOPICAL ANALEGESICS INCLUDING ANTIRHEUMATIC, OTIC, BURN, SUNBURN TREATMENT AND PREVENTION DRUGS

Nominations for Nonvoting Representative of Consumer Interests

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: This document invites nominations for a nonvoting consumer representative to serve on the Panel on Review of Topical Analgesics Including Antirheumatic, Otic, Burn, Sunburn Treatment and Prevention Drugs of the Bureau of Drugs. Nominations will be accepted for the vacancy that currently exists.

DATE: Nominations by September 29, 1977.

ADDRESS: Written submissions to the Director, Office of Consumer Programs (HFG–1), Office of Professional and Consumer Programs, Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT:

Audrey Wood, Office of Professional and Consumer Programs (HFG–1), Food and Drug Administration, Department of Health, Education, and Welfare, 5600 Fishers Lane, Rockville, Md. 20857 (301–443–1547).

SUPPLEMENTARY INFORMATION: The function of this committee is to review and evaluate available data concerning the safety and effectiveness of active ingredients, and combinations thereof, of currently marketed nonprescription drug products for human use that contain topical analgesics, including antirheumatic, otic, burn, and sunburn treatment and prevention drugs; to review and evaluate the adequacy of the drugs' labeling; to advise the Commissioner of Food and Drugs on the promulgation of monographs establishing conditions under which these over-the-counter (OTC) drug products are generally recognized as safe and effective and not misbranded; and to serve as a forum for the exchange of views regarding the prescription or nonprescription status of these various active ingredients and combinations thereof.

The final regulations providing for the OTC drug review under § 330.10 (21 CFR 330.10) include, under the procedure for establishing OTC drug monographs, a provision that advisory review panels may include persons chosen from lists submitted by organizations representing professional, consumer, and industry interests.

The nominations for and selection of the nonvoting member to represent consumer interests on the review panel in this notice shall be made pursuant to § 14.84 (21 CFR 14.84).

Any person interested may nominate one or more qualified persons as a nonvoting member for this committee. Although nominations from individuals will be accepted, individuals are encouraged to submit their nominations through consumer organizations as defined in § 14.84(c)(3).

Nominations shall state that the nominee is aware of the nomination, is willing to serve as a member of the advisory committee, and appears to have no conflict of interest. A complete curriculum vitae of each nominee shall be included.

After the time for receipt of nominations has expired, the curriculum vitae for each nominee will be sent to each of the consumer organizations listed by the Director, Office of Consumer Programs, pursuant to § 14.84(c)(3), together with a ballot that must be filled out and returned to the Office of Professional and Consumer Programs, at the address given above, within 30 days.

The nominee receiving the most votes shall be selected as the nonvoting member. In the event of a tie, the Commissioner shall select the nonvoting member by lot from among those tied with the most votes.

This notice is issued under the Federal Advisory Committee Act (Pub. L. 92–463, 86 Stat. 770–776 (5 U.S.C. App. I)) and Part 14 relating to advisory committees.

Dated: August 23, 1977.

WILLIAM F. RANDOLPH,
Acting Associate Commissioner, for Compliance.

Office of Education

ADVISORY COUNCIL ON FINANCIAL AID TO STUDENTS

Public Meeting

Notice is hereby given, pursuant to Section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463), that the next meeting of the Advisory Council on Financial Aid to Students will be held on September 28 and 29, 1977, from 9 a.m. to 5 p.m. at the Sheraton-North Shore Inn, Northbrook, Ill. Notice is also given that the Subcommittee on Student Aid (Grants and Work-Study) of the Advisory Council on Financial Aid to Students will hold its next meeting on September 26, 1977, from 1 p.m. to 5:30 p.m. and on September 27, 1977, from 9 a.m. to 5 p.m. at the same location.

The Advisory Council on Financial Aid to Students is established under Section 499(a) of the Higher Education Act of 1965, as amended (20 U.S.C. 1089). The Committee shall advise the Commissioner on matters of general policy arising in the administration by the Commissioner of programs relating to financial assistance to students and on the evaluation of the effectiveness of these programs.

All meetings shall be open to the public. The agenda of the Council meeting on September 27 and 28 includes:

1. Report of Subcommittee;
2. Election of Vice Chairperson; and
3. Discussion of papers prepared by Council members on policy issues in Federal student aid programs and in management of aid programs by U.S. Office of Education.

The agenda of the Subcommittee meeting on September 26 and 27 includes:

1. Report on Bureau of Census and U.S. Department of Labor data regarding disposable family income;
2. Report on determination of student financial eligibility for Federal aid by means other than currently utilized; and
3. Different legislative approach to entitlement concepts.

Records shall be kept of all Committee Proceedings and shall be available for public inspection at the Council's Office located in Room 3661, Regional Office Building No. 3, 7th and D Streets SW., Washington, D.C. 20202.

Signed in Washington, D.C. on August 25, 1977.

WARREN T. TROUTMAN,
OE Delegate.

GUIDANCE AND COUNSELING

Closing Date for Receipt of Applications for Fiscal Year 1977

Correction

In FR Doc. 77–23549, appearing at page 41326, in the issue for Tuesday, August 16, 1977, in the first column on page 41327, the entry in the table for the State of Arizona should read:

Arizona	30,547

Office of Human Development Services

FEDERAL ALLOTMENT TO STATES FOR SOCIAL SERVICES EXPENDITURES PURSUANT TO TITLE XX OF THE SOCIAL SECURITY ACT

Promulgation for Fiscal Year 1979

Promulgation is made of the Federal allotment for Fiscal Year 1979 for purposes of grants to States under Title XX of the Social Security Act pursuant to Section 2002(a)(2) of the Act which provides that the Federal allotment shall be determined and promulgated in accordance with said section.

For Fiscal Year 1979, the allotment limits are based on the Bureau of the Census population statistics contained in its publication, "Current Population Reports" (Series P–25, No. 646, February 1977) which is the most recent satisfactory data available from the Department of Commerce at this time as to the population of each State and of all States.

It is hereby promulgated, for purposes of grants to States for social services under title XX, that the Federal allotment to each of the 50 States and the District of Columbia for the Fiscal Year ending September 30, 1979, as determined pursuant to the Act and on the basis of said population data, shall be as set forth below:

State:	*Federal allotment*
Alabama	$ 42,683,000
Alaska	4,450,000
Arizona	26,437,000
Arkansas	24,562,000
California	250,830,000
Colorado	30,083,000
Connecticut	36,302,000
Delaware	6,779,000
District of Columbia	8,176,000
Florida	98,074,000
Georgia	57,883,000
Hawaii	10,330,000
Idaho	9,679,000
Illinois	130,778,000
Indiana	61,750,000
Iowa	33,425,000
Kansas	26,903,000
Kentucky	39,9240,00
Louisiana	44,734,000
Maine	12,462,000
Maryland	48,263,000
Massachusetts	67,654,000
Michigan	106,030,000

State:	*Federal allotment*
Minnesota	46,178,000
Mississippi	27,416,000
Missouri	55,646,000
Montana	8,770,000
Nebraska	18,087,000
Nevada	7,104,000
New Hampshire	9,573,000
New Jersey	85,439,000
New Mexico	13,603,000
New York	210,613,000
North Carolina	63,694,000
North Dakota	7,490,000
Ohio	124,500,000
Oklahoma	32,214,000
Oregon	27,149,000
Pennsylvania	138,149,000
Rhode Island	10,796,000
South Carolina	33,170,000
South Dakota	7,989,000
Tennessee	49,079,000
Texas	145,428,000
Utah	14,302,000
Vermont	5,544,000
Virginia	58,805,000
Washington	42,067,000
West Virginia	21,208,000
Wisconsin	53,679,000
Wyoming	4,542,000
Total	$2,500,000,000

Dated: August 28, 1977.

MICHIO SUZUKI,
Acting Commissioner,
Administration for Public Services.

Approved: August 24, 1977.

ARABELLA MARTINEZ,
Assistant Secretary for
Human Development Services.

PLACE: WVU Conference Room, Holiday Inn, 1400 Saratoga Avenue, Morgantown, W. Va. 26505.

TIME: 9 a.m.

TYPE OF MEETING: Open: 9 a.m to 2:30 p.m. on September 30. Closed: Remainder of meeting.

CONTACT PERSON:

Marilyn K. Hutchison, M.D., Executive Secretary, Park Building, Room 3–14, NIOSH, 5600 Fishers Lane, Rockville, Md. 20857 Phone: 301–443–6377.

PURPOSE: The Committee is charged with advising the Secretary, Department of Health, Education, and Welfare, on matters involving or relating to coal mine health research, including grants and contracts for such research.

AGENDA: Agenda items for the open portion of the meeting will include announcements, consideration of minutes of previous meeting, administrative and staff reports, review of the National Institute for Occupational Safety and Health (NIOSH) studies in coal and diesel research, status of new legislation affecting coal workers, and health implications of coal as the major energy source. Beginning at 2:45, the Committee will be performing the final review of coal research grant applications for Federal assistance, and this portion of the meeting will not be open to the public in accordance with the provisions set forth in Section 552b(c)(6), Title 5, U.S. Code, and the Determination by the Director, Center for Disease Control, pursuant to Public Law 92–463.

Agenda items are subject to change as priorities dictate.

The portion of the meeting so indicated is open to the public for observation and participation. Anyone wishing to make an oral presentation should notify the contact person listed above as soon as possible before the meeting. The request should state the amount of time desired, the capacity in which the person will appear, and a brief outline of the presentation. Oral presentations will be scheduled at the discretion of the Chairperson and as time permits. Anyone wishing to have a question answered during the meeting by a scheduled speaker should submit the question in writing, along with his or her name and affiliation, through the Executive Secretary to the Chairperson. At the discretion of the Chairperson and as time permits, appropriate questions will be asked of the speakers.

A roster of members and other relevant information regarding the meeting may be obtained from the contact person listed above.

Dated: August 19, 1977.

WILLIAM H. FOEGE,
Director, Center for Disease Control.

Social Security Administration

DIVISION OF SENSITIVE INQUIRIES, ET AL.

Redelegations of Authority to Make Various Findings of Fact, Decisions and Determinations on Cases Referred

Under titles II and XVI of the Social Security Act, as amended (the Act), the Secretary of Health, Education, and Welfare (the Secretary) may make various findings of fact, decisions and determinations affecting the rights of individuals to benefits under these titles of the Act. The Secretary is vested with similar authority to make findings of fact, decisions and determinations under Part B of title IV and related provisions of the Federal Coal Mine Health and Safety Act of 1969, as amended (the "Black Lung" Act). The Secretary has delegated his authority to perform the functions specified above to the Commissioner of Social Security (the Commissioner), with authority to redelegate (33 FR 5836–37, dated April 16, 1968 and 35 FR 7033–34, dated May 2, 1970). As appropriate, the Commissioner previously redelegated this authority to various positions in the Social Security Administration.

I. Notice is hereby given that the Commissioner has additionally redelegated, to the positions of Social Insurance Claims Examiner (Disability) and Social Insurance Claims Examiner (Retirement) located in the Division of Sensitive Inquiries, Office of the Assistant Bureau Director, Disability Operations, Bureau of Disability Insurance, Office of Program Operations, Social Security Administration, and to all positions in the direct line of supervision above these positions, the following authorities for exercise with respect to cases referred to the Division of Sensitive Inquiries for necessary action:

A. Pursuant to section 205(b) of the Social Security Act, as amended (the Act), authority to make findings of fact and decisions which constitute initial determinations, as defined in § 404.905 of Social Security Regulations No. 4. This excludes the following determinations:

1. Entitlement to hospital insurance benefits and supplementary medical insurance benefits;

2. Termination of entitlement to hospital insurance benefits and supplementary medical insurance benefits;

3. Existence or absence of disability, or periods of disability; and

4. Waiver of adjustment or recovery of overpayments of: monthly benefits; a lump sum; hospital insurance benefits; or supplementary medical insurance benefits;

B. Pursuant to section 205(b) of the Act, authority to make determinations which do not constitute initial determinations, as defined in § 404.906 of Social Security Regulations No. 4. This excludes the following determinations:

1. Approval or regulation of the amount of fee that may be charged or received by a representative for services before the Social Security Administration;

2. Disqualification or suspension of an individual from acting as a representative in a proceeding before the Social Security Administration; and

3. Determination, under the Federal Claims Collection Act of 1966 (31 U.S.C. 951–953), whether or not to compromise, or to suspend or terminate collection of, a claim for overpayment under title II of the Social Security Act, as amended, including the compromise amount and the time and manner of payment;

C. Pursuant to sections 1602, 1611, 1612, 1613, 1614, 1615, 1616, 1631 and 1633 of the Act, authority to make findings of fact and decisions affecting the eligibility of individuals under the Supplemental Security Income (SSI) program and the amount of SSI benefits;

d. Pursuant to section 1631(c) of the Act, authority to review initial determinations and render reconsideration determinations under the SSI program;

V 42 168 AUG 30 77 UMI

E. Pursuant to sections 402, 312 and 413 of the "Black Lung" Act, authority to make findings of fact and decisions concerning entitlement and continuing eligibility;

F. Pursuant to section 413(b) of the "Black Lung" Act, authority to make determinations concerning a claimant's reasonable medical expenses;

G. Pursuant to section 413(b) of the "Black Lung" Act, authority to make determinations of disability;

H. Pursuant to section 413(b) of the "Black Lung" Act, authority to review State disability determinations; and

I. Authority to make findings required by other government agencies for determining the rights of individuals to benefits.

II. Notice is hereby further given that the Commissioner has also redelegated, to the position of Social Insurance Claims Examiner (Disability) located in the Division of Sensitive Inquiries, Office of the Assistant Bureau Director, Disability Operations, Bureau of Disability Insurance, Office of Program Operations, Social Security Administration, and to all positions in the direct line of supervision above this position, the following authorities for exercise with respect to cases referred to the Division of Sensitive Inquiries for necessary action:

A. Pursuant to section 221(g) of the Act, authority to make Federal determinations of disability;

B. Pursuant to section 221(c) of the Act, authority to review State disability determinations;

C. Pursuant to sections 1614(a), 1631(a)(4)(B) and 1633 of the Act, authority to make findings of fact and decisions regarding presumptive SSI disability benefits, and authority to authorize payment of such benefits for not more than 3 months;

D. Pursuant to sections 1614, 1631 and 1633 of the Act, authority to make Federal findings of fact and decisions regarding the existence, absence, duration or continuation of disability or blindness;

E. Pursuant to sections 1614, 1631 and 1633 of the Act, authority to review State agency determinations of disability and blindness under title XVI of the Act, and authority to make certain findings of fact and decisions in such cases; and

F. Pursuant to section 1611(e)(3) of the Act, authority to determine whether individuals eligible for SSI benefits, and medically determined to be drug addicts or alcoholics, are complying with the terms and conditions of appropriate available treatment.

III. Notice is hereby given in addition that the Commissioner has also redelegated, to the position of Social Insurance Claims Examiner (Retirement) located in the Division of Sensitive Inquiries, Office of the Assistant Bureau Director, Disability Operations, Bureau of Disability Insurance, Office of Program Operations, Social Security Administration, and to all positions in the direct line of supervision above this position, the following authorities for exercise with respect to cases referred to the Division of Sensitive Inquiries for necessary action:

A. Pursuant to section 1612(b)(4) of the Act, authority to approve plans of self-support for individuals or spouses eligible for SSI benefits;

B. Pursuant to section 1611(d) of the Act, authority to determine gross income from a trade or business;

C. Pursuant to section 1613 of the Act, authority to find good cause for failure to dispose of resources, and authority to grant extensions of time for disposition of resources.

D. Pursuant to section 1631(e)(2) of the Act, authority to make determinations as to the existence of good cause or fault for failure or delay in reporting information; and

E. Pursuant to section 1631(e)(2) of the Act, authority to reduce SSI benefits for failure or delay in reporting information.

IV. The redelegations described in sections I. through III. above shall be effective as of the date that this General Notice thereof is published in the FEDERAL REGISTER. Any actions taken by incumbents of the positions identified in sections I. through III. above which, in effect, involve the exercise of authority delegated by this document prior to the date that this notice is published in the FEDERAL REGISTER, are hereby affirmed and ratified. These redelegations may not be further redelegated.

Dated: August 22, 1977.

JAMES B. CARDWELL,
Commissioner of Social Security.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

CHIEF, BRANCH OF RECORDS AND DATA MANAGEMENT

Redelegation of Authority by State Director

Pursuant to the authority contained in section 1.1 of BLM Order No. 701 dated July 23, 1964, as amended, authority is hereby redelegated to the Chief, Branch of Records and Data Management to take action under section 2.6(k) as to mining claim instruments filed for record with BLM under 43 CFR 3833, as follows:

(1) Accept and record instruments meeting recording requirements;

(2) Notify owners to take curative actions to complete defective filings;

(3) Reject instruments and void claims not filed within the prescribed time periods; and

(4) Reject filings and void claims located on lands not available for mineral location on dates of location.

This delegation is effective on August 30, 1977. The redelegation published August 16, 1977, FR document 77-23561 is revoked.

PAUL L. HOWARD,
State Director.

Approved: August 22, 1977.

GEORGE L. TURCOTT,
Acting Director.

WYOMING

Application

AUGUST 19, 1977.

Notice is hereby given that pursuant to Section 28 of the Mineral Leasing Act of 1920, as amended (30 U.S.C. 185) the Northwest Pipeline Corporation of Salt Lake City, Utah filed an application for a right-of-way to construct a 4½" O.D. pipeline for the purpose of transporting natural gas across the following described public lands:

SIXTH PRINCIPAL MERIDIAN, WYOMING

T. 24 N., R. 111 W.
Sec. 4, S½SW¼ and SW¼SE¼;
Sec. 5, NW¼SE¼ and S½SE¼.

The pipeline will transport natural gas within T. 24 N., R. 111 W., in Sweetwater County, Wyo.

The purpose of this notice is to inform the public that the Bureau will be proceeding with consideration of whether the application should be approved and, if so, under what terms and conditions.

Interested persons desiring to express their views should do so promptly. Persons submitting comments should include their name and address and send them to the District Manager, Bureau of Land Management, Highway 187 North, P.O. Box 1869, Rock Springs, Wyo. 82901.

HAROLD G. STINCHCOMB,
Chief, Branch of Lands and Minerals Operations.

ENDANGERED SPECIES PERMIT

Receipt of Application

Notice is hereby given that the following application for a permit is deemed to have been received under section 10 of the Endangered Species Act of 1973 (Pub. L. 93-205).

Applicant: William A. Lowe, Route 4, Box 206, Beaver Dam, Wis. 53916.

OMB NO 42-R1670

DEPARTMENT OF THE INTERIOR
U.S. FISH AND WILDLIFE SERVICE

FEDERAL FISH AND WILDLIFE
LICENSE/PERMIT APPLICATION

1. APPLICATION FOR (Indicate one)
☐ IMPORT OR EXPORT LICENSE ☒ PERMIT

2. BRIEF DESCRIPTION OF ACTIVITY FOR WHICH REQUESTED LICENSE OR PERMIT IS NEEDED.
Propagation of cheetahs: I have negotiated a tentative purchase of a male and female cheetah from San Diego, California, and request a transportation permit for transporting to my residence.

3. APPLICANT: (Name, complete address and phone number of individual, business, agency, or institution for which permit is requested)
William A. Lowe
Route 4, Box 206
Beaver Dam, WI 53916
Telephone: 414-885-9631
414-885-9346

4. IF "APPLICANT" IS AN INDIVIDUAL, COMPLETE THE FOLLOWING:
☐ MR. ☐ MRS. ☐ MISS ☐ MS. | HEIGHT 6' | WEIGHT 185 lbs.
DATE OF BIRTH 1-8-35 | COLOR HAIR brown | COLOR EYES blue
PHONE NUMBER WHERE EMPLOYED: Office 414-885-9346; Home 414-885-9631
SOCIAL SECURITY NUMBER 396-32-4608
OCCUPATION: Self-employed* (explained at right)
ANY BUSINESS, AGENCY, OR INSTITUTIONAL AFFILIATION HAVING TO DO WITH THE WILDLIFE TO BE COVERED BY THIS LICENSE/PERMIT
None

5. IF "APPLICANT" IS A BUSINESS, CORPORATION, PUBLIC AGENCY, OR INSTITUTION, COMPLETE THE FOLLOWING:
EXPLAIN TYPE OR KIND OF BUSINESS, AGENCY, OR INSTITUTION
Not applicable
*Arabian Horse Breeder - specializing in straight Egyptian breeding. Veal calf operation - currently own and operate 1800-calf facility. Breeder of certain zoo animals, such as cheetahs, Bengal tigers, llamas, leopards, fox, ferrets
NAME(S) AND ADDRESS(ES) AND NUMBER OF PRESIDENT, PRINCIPAL OFFICERS, AND DIRECTORS
IF "APPLICANT" IS A CORPORATION, INDICATE STATE IN WHICH INCORPORATED

6. LOCATION WHERE PROPOSED ACTIVITY IS TO BE CONDUCTED
Cheetahs are kept in the NE¼ SE¼ of Section 35, T12n, R14E, Beaver Dam Township, Dodge County, Wisconsin.
William Lowe Farm
Route 4, Box 206
Beaver Dam, WI 53916

7. DO YOU HOLD ANY CURRENTLY VALID FEDERAL FISH AND WILDLIFE LICENSE OR PERMIT? ☒ YES ☐ NO
(If yes, list license or permit number)
35-A-91

8. IF REQUIRED BY ANY STATE OR FOREIGN GOVERNMENT, DO YOU HAVE THEIR APPROVAL TO CONDUCT THE ACTIVITY YOU PROPOSE? ☒ YES ☐ NO
(If yes, list jurisdictions and type of document(s))
State of Wisconsin Game Farm License and individual permits for tigers and leopards and cheetahs.

9. CERTIFIED CHECK OR MONEY ORDER (if applicable) PAYABLE TO THE U.S. FISH AND WILDLIFE SERVICE ENCLOSED IN AMOUNT OF
Not applicable as purpose is propagation of cheetahs.

10. DESIRED EFFECTIVE DATE
Sept. 1, 1977

11. DURATION NEEDED
Six months if possible

12. ATTACHMENTS. THE SPECIFIC INFORMATION REQUIRED FOR THE TYPE OF LICENSE/PERMIT REQUESTED (See 50 CFR 13.12(b)) MUST BE ATTACHED. IT CONSTITUTES AN INTEGRAL PART OF THIS APPLICATION. LIST SECTIONS OF 50 CFR UNDER WHICH ATTACHMENTS ARE PROVIDED.

CERTIFICATION

I HEREBY CERTIFY THAT I HAVE READ AND AM FAMILIAR WITH THE REGULATIONS CONTAINED IN TITLE 50, PART 13, OF THE CODE OF FEDERAL REGULATIONS AND THE OTHER APPLICABLE PARTS IN SUBCHAPTER B OF CHAPTER I OF TITLE 50, AND I FURTHER CERTIFY THAT THE INFORMATION SUBMITTED IN THIS APPLICATION FOR A LICENSE/PERMIT IS COMPLETE AND ACCURATE TO THE BEST OF MY KNOWLEDGE AND BELIEF. I UNDERSTAND THAT ANY FALSE STATEMENT HEREIN MAY SUBJECT ME TO THE CRIMINAL PENALTIES OF 18 U.S.C. 1001.

SIGNATURE (Title and)
William A. Lowe
DATE 7-7-77

3-200
10/74)
GPO 895-042

V 42 168 AUG 30 77 UMI

(11) My wife, Janet, and I have raised Arabian horses since 1959. We have won national championships and are well recognized as serious breeders. Since 1973 we have specialized in horses of "Egyptian breeding," which has included three trips to Egypt for purchasing them.

In 1976 we acquired four Bengal tigers and two leopards from the Racine Zoo.

Our main purpose in acquiring the tigers and leopards was to gain expertise and recognition so that we would be granted the necessary permits to raise cheetahs.

Besides Arabian horses, cheetahs, tigers, and leopards, we raise llamas and have a large veal calf operation, currently housing 1,800 calves. The calves give us an excellent source of meat for our tigers and leopards and cheetahs.

In addition, our six children are raising fox, ferrets, and dogs.

(iii) We would be willing to work on a cooperative breeding program and will maintain stud books. Most zoos have been unsuccessful in breeding cheetahs because of lack of a proper facility. We hope to eventually work a breeding loan with some of them.

(iv) Transportation will be by air freight to Chicago and trucked to Beaver Dam, Wisconsin. The zoo crates are approximately 30" x 60" x 48". They are open on one end with one-inch pipe, 3 inches on center. Food and water will be fed between the pipes.

(7) Copy of sale contract is attached.

(8) Reasons why permit is justified:

(i) Intention of transporting two cheetahs from San Diego, California, to Beaver Dam, Wisconsin, for the purpose of propagation.

(ii) Transportation will be by air freight and truck carrying two zoo cages used for this purpose. Breeding facilities have been constructed and are in use by four cheetahs.

(iii) The purpose is propagation.

(iv) Eventually animals will be offered for sale to zoos or others who are interested in propagation.

Attachment (12) to Form 3-2000

17122

(a) Application for enclosed

(1) Cheetah (Acinonyx jubatus)
One (1) male--age one year
One (1) female--age three years
Activity sought to be authorized--transportation permit from California to Wisconsin for purposes of propagation.

(2) Both cheetahs were born in captivity

(3) This transaction would not affect the status of cheetahs in the wild. It would make room for more cheetahs to be propagated at this San Diego facility (Wild Animal Park).

(4) Born in captivity--San Diego, California 1976 and 1974 (Wild Animal Park)

(5) The cheetahs will be kept in the NE¼ of Sec. of Section 35, T12N, R14E, Beaver Dam Township, Dodge County, Wisconsin.

William A. Lowe Farm
Route 4, Box 206
Beaver Dam, Wisconsin 53916

The farm is 34 acres. It includes a home, five barns (four barnhouse approximately 50 Arabian horses, one barn houses 3 Bengal tigers and 2 leopards.)

(6) Live cheetahs will be housed in existing facilities.

(1) We have built the facilities on recommendations of Dr. Dolan so that we have the maximum potential for breeding the cheetahs. We are duplicating the facility and care used successfully by Dr. Dolan in breeding cheetahs in San Diego's Wild Animal Park. It is necessary to keep male and female cheetahs separate except for the breeding period. For this reason we built two facilities approximately 1/4 mile apart for the males and the females. The facilities are large enough to house additional cheetahs, as it is our desire to eventually have a large cheetah breeding operation. Each facility has a 8 foot high chain link wire (11 gauge) with an electric wire at the top, approximately 1½ acres, hexagonal shape, located on a moderate hill with several rock piles, including a heated and insulated 8' x 4' x 8' building for their optional use, and a ten-foot gate opening. There is a rock house with an opening to the east in each facility. We have also planted over 100 trees and shrubs in these facilities. (A diagram of the facility is on the next page.)

Documents and other information submitted in connection with this application are available for public inspection during normal business hours at the Service's office in Room 512, 1717 H Street, NW., Washington, D.C.

Interested persons may comment on this application by submitting written data, views, or arguments, preferably in triplicate, to the Director (FWS/WPO), U.S. Fish and Wildlife Service, Washington, D.C. 20240. This application has been assigned File Number PRT 2-1212-07; please refer to this number when submitting comments. All relevant comments received on or before September 29, 1977.

Dated: August 22, 1977.

DONALD G. DONAHOO,
Chief, Permit Branch, Federal Wildlife Permit Office, U.S. Fish and Wildlife Service.

National Park Service

ADVISORY BOARD ON NATIONAL PARKS HISTORIC SITES, BUILDINGS AND MONUMENTS

Meeting

Notice is hereby given in accordance with the Federal Advisory Committee Act that meetings of the Advisory Board on National Parks, Historic Sites, Buildings and Monuments will be held September 22–29, during field inspections of areas in the Southwest Region of the National Park Service, and conclude with the regular fall business meeting, at LBJ State Park, Texas, on September 30 and October 1.

The purpose of the Advisory Board is to advise the Secretary of the Interior on matters relating to the National Park System, and the administration of the Historic Sites Act of 1935.

The Advisory Board will inspect various management and operational functions of the Southwest Region of the National Park Service as follows: September 22, Bandelier National Monument; September 23, subgroups will visit Pecos-Fort Union National Monuments; Chaco Canyon National Monument, and Canyon de Chelly National Monument; September 24–25 at Big Thicket National Preserve; September 26–28 Padre Island National Seashore. The inspection trip will be concluded on September 29 with a visit to the proposed San Antonio Missions National Historical Park.

The fall business meeting of the Advisory Board will convene at 10:30 a.m. on September 30 at the Lyndon B. Johnson State Historical Park, Texas, and will meet in general session to receive reports on the Alaska park proposals; National Heritage Trust Program, urban parks, and to discuss field trip matters. October 1, the Advisory Board will reconvene at 9 a.m. to receive reports on Redwoods National Park; Death Valley mining; land acquisition program, preservation easement program; to receive reports from the committee meetings; consideration of past and future Advisory Board activities; and to formulate its comments and recommendations.

The meetings will be open to the public. However, members of the public wishing to participate in the field inspection must provide their own transportation, food and accommodations, which are generally available on a commercial basis. Space and facilities to accommodate members of the public at the business meetings are limited and persons will be accommodated on a first-come, first-served basis. Any member of the public may file with the Advisory Board a written statement concerning the matters to be considered.

Persons wishing further information concerning the field inspection and business meeting, or who wish to submit written statements, may contact Robert M. Landau, Assistant for Advisory Boards and Commissions, National Park Service, Washington, D.C. 202-343-2012.

Summary minutes of the meeting will be available for public inspection 10 to 12 weeks after the meeting in Room 3013, Interior Building, Washington, D.C.

Dated: August 29, 1977.

ROBERT M. LANDAU,
Assistant for Advisory Boards and Commissions, National Park Service.

MIDWEST REGIONAL ADVISORY COMMISSION

Meeting

Notice is hereby given in accordance with the Federal Advisory Committee Act that a meeting of the Midwest Regional Advisory Committee will be held September 29 and 30 at Jefferson National Expansion Memorial National Historic Site in St. Louis, Mo.

The committee was established pursuant to Public Law 91-383 to provide for free exchange of ideas between the National Park Service and the public, and to facilitate the solicitation of advice or other counsel from the public on programs and problems pertinent to the Midwest Region of the National Park Service.

The members of the Advisory Committee are as follows:

Hon. Robert W. Berrey III (Chairman)
Mr. Wallace C. Dayton
Mr. John J. Franke, Jr.
Mr. Fred D. Hartley
Mr. William L. Lieber
Mr. Erwin D. Sias

The committee will meet in the Explorer Room of the Visitor's Center beneath the Gateway Arch at Jefferson National Expansion Memorial. The Thursday session will begin at 1:30 p.m. (CDT) and the Friday meeting at 8:30 a.m. (CDT). The committee will conduct a forum and hear case histories on the impacts of urban parks on neighboring communities.

The meeting is open to the public, and any member of the public may file with the committee a written statement concerning matters to be discussed.

Persons wishing further information concerning this meeting, or who wish to submit written statements, may contact Bill W. Dean, Executive Assistant to the Regional Director, Midwest Regional Office at Area Code 402, 221-3481. Minutes of the meeting will be available for public inspection four weeks after the meeting at the office of the Midwest Region, 1709 Jackson Street, Omaha, Nebraska 68102.

Dated: August 17, 1977.

MERRILL D. BEAL,
Regional Director, Midwest Region.

[Docket No. 77–240]

BAILEY MINING CO.

Petition for Modification of Application of Mandatory Safety Standard

Notice is hereby given that in accordance with the provisions of section 301 (c) of the Federal Coal Mine Health and Safety Act of 1969, 30 U.S.C. 861(c) (1970), Bailey Mining Company, Drawer A, Bypro, Kentucky 41612, has filed a petition to modify the application of 30 CFR 75.1710, cabs or canopies, to its Mine No. 8, located in Floyd County, Kentucky.

The substance of Petitioner's statement is as follows:

1. The coal seam height at this mine is 38 inches, both the floor and roof are uneven thus causing the height to vary considerably. The electric face equipment averages in height as follows:

Cutting machine	34 in
Roof bolter	28 in
Coal drill	26 in
Scoop	34 in

2. Cable boards are used, further decreasing mining heights. Headers up to 6 inches are also used. The face equipment is approximately 6 years old and was never designed for cabs or canopies. In the No. 2 Elkhorn seam of coal which Petitioner is presently mining, Petitioner believes that if it were possible to adapt cabs or canopies to this equipment it would create an even greater hazard and result in a cramped and uncomfortable position for the operators. The technology for such compliance at this time is not available.

REQUEST FOR HEARING OR COMMENTS

Persons interested in this petition may request a hearing on the petition or furnish comments on or before September 29, 1977. Such requests or comments must be filed with the Office of Hearings and Appeals, Hearings Division, U.S. Department of the Interior, 4015 Wilson Boulevard, Arlington, Va. 22203. Copies of the petition are available for inspection at that address.

DAVID TORBETT,
Acting Director,
Office of Hearings and Appeals.

[Docket No. M 77–2491]

BLUE DIAMOND MINING, INC.

Petition for Modification of Application of Mandatory Safety Standard

Notice is hereby given that in accordance with the provisions of section 301(c) of the Federal Coal Mine Health and Safety Act of 1969, 30 U.S.C. 861(c) (1970), Blue Diamond Mining, Incorporated, Leatherwood, Ky. 41756, has filed a petition to modify the application of 30 CFR 75.155(b) (1), qualified hoisting engineer; qualifications, to its Royal Diamond Mine, located in Leslie County, Ky.

The substance of Petitioner's statement is as follows:

1. Petitioner's mine is in the development stage and there is a current unavailability of experienced hoistmen in the geographical area of the mine.

2. Petitioner's employees will complete a special training program to train them in hoist operation and safety. This training program includes no less than 30 days instruction under the direct supervision of certified and qualified hoistmen.

3. Petitioner feels that those employees at the mine who will complete the training program and have been certified as hoistmen by the State of Kentucky will be capable of responsibility and safety performing the duties of hoistmen in a manner that will at all times guarantee

the same or greater safety of the miners as afforded by the standards.

4. Petitioner respectfully requests modification of the application of 30 CFR 75.155(b) (1) at the Royal Diamond Mine by waiving the requirement that a qualified hoistman have at least 1 year experience and substituting therefore the requirement that a qualified hoistman must complete a special training program and is a certified hoistman in the State of Kentucky to perform the duties of a qualified hoistman.

REQUEST FOR HEARING OR COMMENTS

Persons interested in this petition may request a hearing on the petition or furnish comments on or before September 29, 1977. Such requests or comments must be filed with the Office of Hearings and Appeals, Hearings Division, U.S. Department of the Interior, 4015 Wilson Boulevard, Arlington, Va. 22203. Copies of the petition are available for inspection at that address.

DAVID TORBETT,

[Docket No. 77–241]

CLINCHFIELD COAL CO.

Petition for Modification of Appliction of Mandatory Safety Standard

Notice is hereby given that in accordance with the provisions of section 301(c) of the Federal Coal Mine Health and Safety Act of 1969, 30 U.S.C. 861(c) (1970), Clinchfield Coal Company, Dante, Va. 24237, has filed a petition to modify the application of 30 CFR 75.-1100–2(b), quantity and location of firefighting equipment, to its Moss No. 3 Mine Portal D, located in Dickenson County, Va.

The substance of Petitioner's statement is as follows:

1. The mine is opened by multiple drift entries into the Thick Tiller coalbed. One hundred and fifty men are employed on three shifts a day to produce an average of 1,200 tons of coal from four mechanized working sections.

2. In June 1975, new openings, referred to as 10 East located about one air mile from the main portals, were made. Subsequent to the 10 East openings, the main portals were abandoned and all material mined is now conveyed by 48-inch belts through the 10 East portal. The main ventilating fan is located at the 10 East openings and the operations of the main portal fan will soon be discontinued.

3. From the 10 East opening, the mined material is conveyed overland by a series of 48-inch belts to the 425-foot tunnel, a distance of about 13,300 feet. The belt conveyor continues through the tunnel and again overland to a railroad car loading facility. From this point, the material is transported over rail to a central preparation plant at South Clinchfield, Va.

4. The tunnel was made in the coalbed across a set to entries called 1 Left off 1 East. This set of entries was developed several years ago in a narrow ridge that jutted from the main coal boundry. Installation of a belt conveyor through the narrow ridge was the only logical means of connecting the two overland belt systems which provided a continual conveyance system from the 10 East portal to the railroad facilities.

5. The height of the coalbed in the tunnel averages 12 feet with an average width of 14 feet. An independent ventilating system will be installed and concrete block brattices will isolate the tunnel from the rest of the mine. The tunnel is more than 3 miles from any active underground working section and projections indicate that such workings will never be closer (see attached mine map of Moss No. 3 Mine Portal D[1]).

6. The Petitioner seeks modification of 30 CFR 75.1100–2(b) as it applies to the installation of a water pipe system with outlets and firehose along the 48-inch belt conveyor in the 425-foot tunnel. To comply with the provision, the Petitioner would be required to install and maintain a lengthy surface water pipe system to provide water to the tunnel, and to maintain this system would be very difficult during the winter months (note—the ground froze to a depth of 15 inches during January 1977).

7. In lieu of section 75.1100-(b) provisions, the Petitioner proposes the following alternate proposal which will at all times afford the same measure of protection for the miners:

A. Ten pound all-purpose fire extinguishers will be maintained and located as follows:

(1) One fire extinguisher at each entrance to the tunnel.

(2) One fire extinguisher at 100-foot intervals in the tunnel.

B. In the event any type of maintenance work is done in the tunnel the belt conveyor will be stopped and the conveyor control line (only power circuit in the tunnel) will be deenergized.

8. The map of Moss No. 3 Mine Portal D referred heretofore in the petition is on a 1,000 feet=1-inch scale and delincates the tunnel, active working section, 10 East Portal and the abandoned main portal. The map also shows the belt conveyance route from 10 East to the tunnel.[1]

REQUEST FOR HEARING OR COMMENTS

Persons interested in this petition may request a hearing on the petition or furnish comments on or before September 29, 1977. Such requests or comments must be filed with the Office of Hearings and Appeals, Hearings Division, U.S. Department of the Interior, 4015 Wilson Boulevard, Arlington, Va. 22203. Copies of the petition are available for inspection at that address.

DAVID TORBETT,
Acting Director,
Office of Hearings and Appeals.

[Docket No. M 77–229]

CONRAD COAL CO.

Petition for Modification of Application of Mandatory Safety Standard

Notice is hereby given that in accordance with the provisions of section

V 42 168 AUG 30 77 UMI

301(c) of the Federal Coal Mine Health and Safety Act of 1969, 30 U.S.C. 861(c) (1970), Conrad Coal Company, Weeksbury, Kentucky 41667, has filed a petition to modify the application of 30 CFR 75.1710, cabs or canopies, to its Mine No. 1, located in Floyd County, Kentucky.

The substance of Petitioner's statement is as follows:

1. The coal seam height at this mine is 38 inches. Both the mine floor and roof are uneven thus causing the height to vary considerably. The electric face equipment averages in height as follows:

Cutting machine	34 in.
Roof bolter	28 in.
Coal drill	26 in.
Scoop	34 in.

2. Cable boards are used. This decreases mining heights. Headers up to 6 inches are also used. The face equipment is approximately 6 years old and was never designed for cabs or canopies. In the No. 2 Elkhorn seam of coal which Petitioner is presently mining, Petitioner believes that if it were possible to adapt cabs or canopies to this equipment Petitioner would be creating an even greater hazard. An added problem is the cramped and uncomfortable position which the operator must assume. In Petitioner's opinion, the technology for such compliance is not available at the present time.

REQUEST FOR HEARING OR COMMENTS

Persons interested in this petition may request a hearing on the petition or furnish comments on or before September 29, 1977. Such requests or comments must be filed with the Office of Hearings and Appeals, Hearings Division, U.S. Department of the Interior, 4015 Wilson Boulevard, Arlington, Virginia 22203. Copies of the petition are available for inspection at that address.

DAVID TORBETT,
Acting Director,
Office of Hearings and Appeals.

AUGUST 19, 1977.

[FR Doc.77-25133 Filed 8-29-77;8:45 am]

[Docket No. M 77-242]

COAL RESOURCES CORP.

Petition for Modification of Application of Mandatory Safety Standard

Notice is hereby given that in accordance with the provisions of section 301(c) of the Federal Coal Mine Health and Safety Act of 1969, 30 U.S.C. 861(c) (1970), Coal Resources Corporation, Coalgood, Kentucky 40818, has filed a petition to modify the application of 30 CFR 75.1710-1(5), cabs or canopies, to its Belmon Division Number Three Mine, located in Harlan County, Ky.

The substance of Petitioner's statement is as follows:

1. Petitioner's mine is located in the Wallins seam. The projected life of the mine is greater than 1 year.

2. The average thickness of the Wallings seam is 43 inches. The height on the present working section is 40 inches. The physical limitations of the coalbed are undulating bottom and varying seam height.

3. Petitioner's equipment consists of the following: 265HH Lee Norse continuous miners, TD31 and TD34 Lee Norse roof drills, 5L and 6L FMC Galis shuttle cars, AR5 and AR75 Elkhorn and S and S scoops. The equipment is less than 12 months old and equipped with the latest safety features.

4. The entries are normally driven on 70-foot centers with an entry width of 20 feet. The bolt spacings are on 4 to 5 feet centers using 5 bolts across the entry. The roof and rib conditions are good, and, since the beginning of their operation, the mine has not had an injury due to roof or rib falls.

5. A request was made by the employees of the mines to evaluate the cabs and canopies and to determine if they could be used safely. The following are the findings of the Safety Department of Coal Resources Corporation employees of the mine, and management.

(a) The present roof control used at the mines would be seriously weakened if cabs are used due to the uneven floor of the mine. The dislodgment of roof bolts by the canopies are frequent.

(b) The vision of the equipment operator is seriously impaired and could cause serious injury to fellow workmen or the operator. Some of the hazards are as follows:

(1) The section repairmen, ventilation personnel, miner helper, and general laborer are endangered with the movement of face equipment.

(2) The operator of equipment cannot effectively evaluate his roof due to the obstruction of a canopy or cab.

(3) The operator must place a portion of his body out of the deck in order to see.

(4) The impaired vision of the operator creates a hazard for other mobile face equipment.

(c) The cramped position the operator must arrange himself in makes it virtually impossible to operate the equipment safely.

(d) Undulating bottom is often encountered and makes it virtually impossible to operate the equipment on the section.

(6) The plans and devices listed below are in Petitioner's opinion adequate to maintain as high a safety factor as cabs or canopies.

(7) The mining method employed at the mines would be of a nature to insure as adequate room control as possible.

(8) The use of effective roof and rib control measures will be installed to prevent roof falls.

(9) A training program to inform the section employees of proper roof control techniques and safe operation of equipment will be initiated.

(10) Since the beginning of operation of these mines in 1976 there has been no serious or fatal injury that was related to a fall or roof or rib.

(11) In the opinion of the employees and management of the mine, the installation of cabs or canopies would seriously detract from safety and place the workman in a hazardous condition. Petitioner feels that this mine does not warrant cabs or canopies because of the past experience of the roof and rib conditions and the safety record maintained in connection with roof related injuries.

(12) Petitioner feels that the present technology used in the installation and design of cabs or canopies is inadequate to use in low seams.

(13) The first concern of Coal Resources Corporation is a safe working environment for its employees, and in this thought we urgently ask your attention to this request for modification.

(14) The personnel employed by the Belmon Division are not represented by any labor organization.

(15) This petition will be posted at the mine sites and discussed with mine personnel.

REQUEST FOR HEARING OR COMMENTS

Persons interested in this petition may request a hearing on the petition or furnish comments on or before September 29, 1977. Such requests or comments must be filed with the Office of Hearings and Appeals, Hearings Division, U.S. Department of the Interior, 4015 Wilson Boulevard, Arlington, Virginia 22203. Copies of the petition are available for inspection at that address.

Dated: August 19, 1977.

DAVID TORBETT,
Acting Director,
Office of Hearings and Appeals.

[FR Doc.77-25124 Filed 8-29-77;8:45 am]

[Docket No. 77-244]

ISLAND CREEK COAL CO.

Petition for Modification of Application of Mandatory Safety Standard

Notice is hereby given that in accordance with the provisions of section 301(c) of the Federal Coal Mine Health and Safety Act of 1969, 30 U.S.C. 861(c) (1970), Island Creek Coal Co., P.O. Box 11430, Lexington, Ky. 40511, has filed a petition to modify the application of 30 CFR 75.507, power connection points, to its Hamilton No. 1 Mine, located in Union County, Ky.

The substance of Petitioner's statement is as follows:

1. Pursuant to the plans set forth in the mine map depicting certain mining projections at Petitioner's mine, which map is annexed hereto as Exhibit A,[1] Petitioner desires to drive two, new and specially designed entries through an existing coal barrier in the subject mine. This action is necessary to maintain and upgrade the ventilation and belt haulage systems in the northern portion of the mine. The completion of this project will result in a greatly improved mine ventilation system and, consequently, will result in greater protection and safety for the miners employed in said mine.

2. Petitioner requests that the application of the Act and regulations be modified as they pertain to the project described and depicted in Exhibit A, in order that Petitioner may develop these entries in the manner set forth therein.

3. The alternative method proposed for developing these entries is contrary to the standard mining practices in the subject mine; however, Petitioner will accomplish such development with adequate safeguards to insure the continued protection of the health and safety of the miners pursuant to mining practices which will at all times guarantee the same, or a greater degree of protection as afforded by the standards set forth in the Act and regulations.

4. Petitioner states that it has discussed in detail the proposed project with the proper officials of the Kentucky Department of Mines and Minerals, and that it has obtained the Department's approval of this project with certain stipulations and requirements.

5. Petitioner states that it will take any and all other precautions which may lawfully and reasonably be prescribed by MESA to protect the health and safety of its employees in connection with this project.

REQUESTS FOR HEARING OR COMMENTS

Persons interested in this petition may request a hearing on the petition or furnish comments on or before September 29, 1977. Such requests or comments must be filed with the Office of Hearings and Appeals, Hearings Division, U.S. Department of the Interior, 4015 Wilson Boulevard, Arlington, Va. 22203. 2. Petitioner requests that the application of the Act and regulations be modified as they pertain to the project described and depicted in Exhibit A, in order that Petitioner may develop these entries in the manner set forth therein.

3. The alternative method proposed for developing these entries is contrary to the standard mining practices in the subject mine; however, Petitioner will accomplish such development with adequate safeguards to insure the continued protection of the health and safety of the miners pursuant to mining practices which will at all times guarantee the same, or a greater degree of protection as afforded by the standards set forth in the Act and regulations.

4. Petitioner states that it has discussed in detail the proposed project with the proper officials of the Kentucky Department of Mines and Minerals, and that it has obtained the Department's approval of this project with certain stipulations and requirements.

5. Petitioner states that it will take any and all other precautions which may lawfully and reasonably be prescribed by MESA to protect the health and safety of its employees in connection with this project.

REQUEST FOR HEARING OR COMMENTS

Persons interested in this petition may request a hearing on the petition or furnish comments on or before September 29, 1977. Such requests or comments must be filed with the Office of Hearings and Appeals, Hearings Division, U.S. Department of the Interior, 4015 Wilson Boulevard, Arlington, Va. 22203. Copies of the petition are available for inspection at that address.

DAVID TORBETT,
Acting Director, Office of Hearings and Appeals.

AUGUST 19, 1977.

[Docket No. M 77-227]

JOHNSON MINING CO.

Petition for Modification of Application of Mandatory Safety Standard

Notice is hereby given that in accordance with the provisions of section 301 (c) of the Federal Coal Mine Health and Safety Act of 1969, 30 U.S.C. 861(c) (1970), Johnson Mining Co., Route No. 1, Bidwell, Ohio 45614, has filed a petition to modify the application of 30 CFR 75.1710–1, cabs or canopies, to its Johnson Mine, located in Jackson County, Ohio.

The substance of Petitioner's statement is as follows:

1. Petitioner requests the modification of the application of the mandatory safety standard 30 CFR 75.1710–1(a) with respect to the subject mines for the reason that the application of such standard will result in a diminution of safety to the miners.

2. Petitioner asserts that technology does not presently exist to enable it to equip its self-propelled electric face equipment with suitable canopies to protect and provide for the safety of the operators of said equipment. Petitioner further asserts that based upon its experience with presently available canopies, the use of such canopies results in diminution of safety to the miners in said mines.

3. The average mining height for the Alice Mine is 46 inches, varying from 36 inches to 55 inches. The coal seam also undulates and rolls resulting in ascending and descending grades that further limit and prevent the effective use of cabs or canopies.

4. Operators of face equipment, including shuttle car operators, are under MESA's approved plans for permanently and/or temporarily supported roof at all times. Such roof support is deemed satisfactory for all other personnel in the mines including the helpers on self-propelled electric face equipment and these helpers and other personnel freely move about the mines under the protection of approved roof support.

5. Petitioner's experience indicates the application of the mandatory standard will result in a diminution of safety to miners for the following reasons:

a. Several instances have occurred where canopies became edged against the roof, exposing employees who are not provided a canopy. There have been several near misses as a result of poor vision.

b. Employees strongly object to operating machinery so equipped and allege a diminution of safety resulting from impaired vision and being required to operate in cramped positions cause the following hazards and unsafe practices:

(1) Miners attempt to operate the machinery while standing between it and the rib, thus incurring a risk of being crushed should the machine slue.

(2) The combination of impaired vision and cramped positions cause the operator to expose his body and appendages, such as head and feet, to the risk of being crushed between the machine and rib.

(3) Ingress and egress from the cab is limited and effectively prevents quick escape when mining conditions warrant such escape.

(4) Impaired vision is given as a major cause by machine operators for the damaging or severing of power cables by running over them.

(5) Impaired vision subjects the operator and fellow employees to increased risks of injuries because the operator cannot adequately see other employees and/or equipment.

6. At present, Petitioner is unaware of any proposed commercially manufactured canopy which could be installed which would provide the same degree of safety to miners as the complete removal of the canopy would provide.

7. Hence, the alternate method Petitioner proposes to establish, in lieu of the mandatory standard, is the elimination of canopies on its face machinery, including shuttle cars, until such time as technology establishes beyond doubt that canopies can be safely used in Petitioner's mine, and have sufficient ground clearance to penetrate the Clarion 4–A seam of coal or if the mining height shall be in excess of 56 inches, that Petitioner would voluntarily install canopies.

REQUEST FOR HEARING OR COMMENTS

Persons interested in this petition may request a hearing on the petition or furnish comments on or before September 29, 1977. Such requests or comments must be filed with the Office of Hearings and Appeals, Hearings Division, U.S. Department of the Interior, 4015 Wilson Boulevard, Arlington, Va. 22203. Copies of the petition are available for inspection at that address.

DAVID TORBETT,
Acting Director, Office of Hearings and Appeals.

[Docket No. M 77-231]

K R & K COAL CO.

Petition for Modification of Application of Mandatory Safety Standard

Notice is hereby given that in accordance with the provisions of section 301 (c) of the Federal Coal Mine Health and Safety Act of 1969, 30 U.S.C. 861(c) (1970), K R & K Coal Co., c/o John Kroh, 120 Main Street, Jollett, Pa. 17981, has filed a petition to modify the application of 30 CFR 75.301, air quality, quantity, and velocity, to its K R K Slope Mine, located in Schuylkill County, Ky.

The substance of Petitioner's statement is as follows:

1. Petitioner requests that section 75.-301 be modified for this anthracite mine to require, in part, that the minimum quantity of air reaching each working face shall be 1,500 cubic feet a minute, that the minimum quantity of air reaching the last open crosscut in any pair or set of developing entries shall be 5,000 cubic feet a minute, and that the minimum quantity of air reaching the intake end of a pillar line shall be 5,000 cubic feet a minute and/or whatever additional quantity of air that may be required in any of these areas to maintain a safe and healthful mine atmosphere.

2. This petition is submitted for the following reasons:

A. Air sample analysis history reveals that harmful quantities of methane are nonexistent in the mine.

B. Ignition, explosion, and mine fire history are nonexistent for the mine.

C. There is no history of harmful quantities of carbon dioxide and other noxious or poisonous gases.

D. Mine dust sampling programs have revealed extremely low concentrations of respirable dust.

E. Extremely high velocities in small cross sectional areas of airways and manways required in friable anthracite veins for control purposes, particularly in steeply pitching mines, present a very dangerous flying object hazard to the miners.

F. High velocities and large air quantities cause extremely uncomfortable damp and cold conditions in the already uncomfortable, wet mines.

G. Difficulty in keeping miners on the job and securing additional mine help is due primarily to the conditions cited.

3. Finally, Petitioner avers that a decision in its favor will in no way provide less than the same measure of protection afforded the miners under the existing standard.

4. A copy of this petition will be posted at the mine by the operator.

REQUEST FOR HEARING OR COMMENTS

Persons interested in this petition may request a hearing on the petition or furnish comments on or before September 29, 1977. Such requests or comments must be filed with the Office of Hearings and Appeals, Hearings Division, U.S. Department of the Interior, 4015 Wilson Boulevard, Arlington, Va. 22203. Copies of the petition are available for inspection at that address.

DAVID TORBETT,
Acting Director, Office of Hearings and Appeals.

L & K COAL CO.

Petition for Modification of Application of Mandatory Safety Standard

Notice is hereby given that in accordance with the provisions of section 301(c) of the Federal Coal Mine Health and Safety Act of 1969, 30 U.S.C. 861(c) (1970), L & K Coal Co., 14 West Main Street, Good Spring, Pa. 17981, has filed a petition to modify the application of 30 CFR 75.301, air quality, quantity, and velocity, to its Mammoth Slope Mine, located in Schuylkill County, Pa.

The substance of Petitioner's statement is as follows:

1. It is requested that section 75.301 be modified for this anthracite mine to require, in part, that the minimum quantity of air reaching each working face shall be 1,500 cubic feet a minute, that the minimum quantity of air reaching the last open crosscut in any pair or set of developing entries shall be 5,000 cubic feet a minute, and that the minimum quantity of air reaching the intake end of a pillar line shall be 5,000 cubic feet a minute and/or whatever additional quantity of air that may be required in any of these areas to maintain a safe and healthful mine atmosphere.

2. This petition requesting modification to 30 CFR 75.301 is submitted for the following reasons:

A. Air sample analysis history reveals that harmful quantities of methane are nonexistent in the mine.

B. Ignition, explosion, and mine fire history are nonexistent for the mine.

C. There is no history of harmful quantities of carbon dioxide and other noxious or poisonous gases.

D. Mine dust sampling programs have revealed extremely low concentrations of respirable dust.

E. Extremely high velocities in small cross sectional areas of airways and manways required in friable anthracite veins for control purposes, particularly in steeply pitching mines, present a very dangerous flying object hazard to the miners.

F. High velocities and large air quantities cause extremely uncomfortable damp and cold conditions in the already uncomfortable, wet mines.

G. Difficulty in keeping miners on the job and securing additional mine help is due primarily to the conditions cited.

3. Finally, the Petitioner avers that a decision in its favor will in no way provide less than the same measure of protection afforded the miners under the existing standard.

4. A copy of this petition will be posted at the mine by the operator.

REQUEST FOR HEARING OR COMMENTS

Persons interested in this petition may request a hearing on the petition or furnish comments on or before September 29, 1977. Such requests or comments must be filed with the Office of Hearings and Appeals, Hearings Division, U.S. Department of the Interior, 4015 Wilson Boulevard, Arlington, Va. 22203. LITTLE HACKNEY CREEK COAL CO.

Petition for Modification of Application of Mandatory Safety Standard

Notice is hereby given that in accordance with the provisions of section 301(c) of the Federal Coal Mine Health and Safety Act of 1969, 30 U.S.C. 861(c) (1970), Little Hackney Creek Coal Co., Mouthard, Ky. 41548, has filed a petition to modify the application of 30 CFR 75.1710–1, cabs or canopies, to its Mine No. 50, located in Pike County, Ky.

The substance of Petitioner's statement is as follows:

1. Petitioner's mine has one working section in the Split-Eagle Seam. The coal is 32 to 42 inches in height and scoops and roofs bolters are used.

2. It would be more dangerous to use a cab or canopy because of the poor vision and the cramped position of the operator in the low coal.

3. A copy of this petition will be posted at the mine.

REQUEST FOR HEARINGS OR COMMENTS

Persons interested in this petition may request a hearing on the petition or furnish comments on or before September 29, 1977. Such requests or comments must be filed with the Office of Hearings and Appeals, Hearings Division, U.S. Department of the Interior, 4015 Wilson Boulevard, Arlington, Va. 22203. Copies of the petition are available for inspection at that address.

PONTIKI COAL CORP.

Petition for Modification of Application of Mandatory Safety Standard

Notice is hereby given that in accordance with the provisions of section 301 (c) of the Federal Coal Mine Health and Safety Act of 1969, 30 U.S.C. 861(c) (1970), Pontiki Coal Corp., Box 57, Lovely, Ky. 41231, has filed additional information for its petitions to modify the application of 30 CFR 1710, cabs or canopies, electrical face equipment, to its No. 1 and No. 2 Mines located in Martin County, Ky.

The substance of Petitioner's statement is as follows:

1. The two Pontiki Mines are located in the Pond Creek Coal Seam in which the height is very irregular. According to the drilling results, it will retain this pattern throughout the lease. At the present time in the Pontiki No. 1 Mine there is an active section with a height of 34 to 38 inches. On the other section there is a height of 56 to 60 inches. In a geological survey, professional paper 507 by Huddle and Englund, it is stated that only 30 percent of the Pond Creek Seam is in the thickness category of more than 42 inches. Taking into consideration the additional roof support that it is necessary to use at this time, the height would be lessened even more.

2. Presently they have been able to maintain the canopies on the miners, on the roof bolters over the drill pot, and on the coal drills. The problem would be on the other equipment when lower coal is encountered. In order to remove the canopies the roof would have to be shot down. Variations have been encountered in the Pond Creek Seam with 40 inches on one side of a section and 60 inches within 150 feet of the 40-inch height.

3. At this time a map is being prepared of the lease in the Pond Creek Coal Seam. It will show the core drillings and the irregularity of the coal which the operator feels will have a great bearing on their situation. They request that the maps also be entered into the petition files.

REQUEST FOR HEARING OR COMMENTS

Persons interested in this petition may request a hearing on the petition or furnish comments on or before September 29, 1977. Such requests or comments must be filed with the Office of Hearings and Appeals, Hearings Division, U.S. Department of the Interior, 4015 Wilson Boulevard, Arlington, Va. 22203. Copies of the petition are available for inspection at that address.

S & N COAL CO.

Petition for Modification of Application of Mandatory Safety Standard

Notice is hereby given that section 301(c) of the Federal Coal Mine Health and Safety Act of 1969, 30 U.S.C. 861(c) (1970), S & N Coal Co., R.D. No. 2, Box 504–A, Pottsville, Pa. 17901, has filed a petition to modify the application of 30 CFR 75.301, air quality, quantity, and velocity, to its Skidmore Slope Mine, located in Schuylkill County, Pa.

The substance of Petitioner's statement is as follows:

1. It is requested that section 75.301 be modified for this anthracite mine to require, in part, that the minimum quantity of air reaching each working face shall be 1,500 cubic feet a minute, that the minimum quantity of air reaching the last open crosscut in any pair or set of developing entries shall be 5,000 cubic feet a minute, and that the minimum quantity of air reaching the intake end of a pillar line shall be 5,000 cubic feet a minute and/or whatever additional quantity of air that may be required in any of these areas to maintain a safe and healthful mine atmosphere.

2. This petition requesting modification to 30 CFR 75.301 is submitted for the following reasons:

A. Air sample analysis history reveals that harmful quantities of methane are nonexistent in the mine.

B. Ignition, explosion, and mine fire history are nonexistent for the mine.

C. There is no history of harmful quantities of carbon dioxide and other noxious or poisonous gases.

D. Mine dust sampling programs have revealed extremely low concentrations of respirable dust.

E. Extremely high velocities in small cross sectional areas of airways and manways required in friable anthracite veins for control purposes, particularly in steeply pitching mines, present a very dangerous flying object hazard to the miners.

F. High velocities and large air quantities cause extremely uncomfortable damp and cold conditions in the already uncomfortable, wet mines.

G. Difficulty in keeping miners on the job and securing additional mine help is due primarily to the conditions cited.

3. Finally, the Petitioner avers that a decision in its favor will in no way provide less than the same measure of protection afforded the miners under the existing standard.

4. A copy of this petition will be posted at the mine by the operator.

CORONADO PROJECT

Availability of the Final Environmental Statement

Pursuant to the requirements of Section 102(2)(C) of the National Environmental Policy Act of 1969 (42 U.S.C. 7332), the Department of the Interior has prepared a final environmental statement for the Coronado Project.

The environmental statement desribes the environmental impacts associated with the Salt River Project's proposed electrical generating plant at St. Johns, Ariz., and associated facilities. The purpose of the project is to provide for the future electrical energy needs of the Phoenix metropolitan area in Maricopa County and for the increased electrical demands of the "Eastern Mining Area." Major facilities consist of a 1050-MW coal-fired electric generating station, associated 500-kV and 230-kV transmission lines, a railroad spur for carrying coal, well fields and pipelines to transport cooling water, service and process to the generating station, and a limestone source to provide limestone to the Air Quality Control System. The transmission lines consist of: one 500-kV line from the plant southwest 240 miles to the Kyrene Substation south of Phoenix which will share a common corridor with the Cholla-Saguaro 500-kV line through the Sitgreaves and Tonoto National Forests; a 76-mile 500-kV backup transmission line proposed to run from the Coronado Station to the Arizona Public Service Cholla Project near Holbrook, Ariz.; and a Silver King Substation 60 miles east of Phoenix proposed to distribute power along two 230-kV lines—one going to Goldfield Substation just east of Phoenix, and the other going to the Hayden Substation in Hayden, Ariz.

Copies of the final environmental impact statement are available for inspection at the following locations:

Office of the Assistant to the Commissioner—Ecology, Bureau of Reclamation, Room 7622, Department of the Interior, Washington, D.C. 20240. Telephone 202–343–4991, FTS 343–4991.

Division of Engineering Support, Technical Services and Publications Branch, E&R Center, Denver Federal Center, Denver, Colo. 80225. Telephone 303–234–3006, FTS 234–3006.

Office of the Regional Director, Lower Colorado Region, Bureau of Reclamation, P.O. Box 427, Boulder City, Nev. 89005. Telephone 702–293–8464, FTS 598–7464.

Single copies of the final statement may be obtained upon request to the Commissioner of Reclamation or the Regional Director. In addition, copies may be purchased from the Document Service, Environmental Law Institute, 1346 Connecticut Avenue NW., Washington, D.C. 20036. Please refer to the statement number above.

Dated: August 25, 1977.

LARRY E. MEIEROTTO,
Deputy Assistant Secretary of the Interior.

[FR Doc.77-25082 Filed 8-29-77;8:45 am]

[Order No. 3008]

GEOTHERMAL RESOURCES

Research and Development Operations on Unleased Lands

SUBJECT: Geothermal resources research and development operations conducted on unleased lands under the jurisdiction of the Secretary of the Interior.

SECTION 1. *Purpose.* The purpose of this Order is to insure that geothermal resources research and development operations, carried out pursuant to research, development, and technology demonstration programs on unleased lands under the jurisdiction of the Secretary of the Interior, are conducted in accordance with the same operational requirements as are applicable to geothermal resources operations conducted on lands leased pursuant to the Geothermal Steam Act of 1970 (30 U.S.C. 1001–1025).

SEC. 2. *Compliance with Operating Regulations.* Bureaus and Offices within the Department of the Interior having jurisdiction or control over unleased lands, as a condition of permitting entry on said lands by individuals, public or private agencies, institutions or organizations for the purpose of conducting any geothermal resources research and development program, shall require that all drilling, well testing, production or related activities be conducted in accordance with the provisions of Title 30 CFR 270 and the Geothermal Resources Operational (GRO) Orders issued pursuant to said regulations. As a further condition of permitting entry on unleased land for these purposes, the authorizing Bureau or Office shall require that the project area and all wells and facilities thereon be open at all reasonable times for inspection by appropriate officials of the permitting Bureau or Office who are responsible for enforcing compliance with Title 30 CFR 270 and the GRO Orders.

Bureaus and Offices within the Department who sponsor or conduct geothermal resources research and development projects on lands under their control or jurisdiction shall likewise insure that those operations are conducted in accordance with Title 30 CFR 270 and the GRO Orders.

SEC. 3. *Cooperation.* Bureaus and Offices within this Department, as a further condition of permitting entry on unleased lands under their control or jurisdiction for the purpose of conducting geothermal resources research and development projects, shall require the permittee to furnish the Director, Geological Survey, or his designated representative, a copy of all notices, reports, well logs, maps, plats, temperature surveys, geophysical and geological data, records, and all other information collected as a result of the activities conducted. Bureaus and Offices within the Department are likewise to furnish the Director, Geological Survey, with a copy of all such notices, reports, technical data, and information which are collected as a result of geothermal resources research and development projects which are sponsored or conducted by said Bureaus and Offices.

SEC. 4. *Information and Advice.* Except as specifically prohibited by statute or regulation, authorized employees of the Geological Survey may provide technical advice, and shall make available to appropriate individuals, agencies, institutions, or organizations, who are permitted entry in conformity with this Order, such records and information as may be necessary or appropriate for the most efficient performance of those activities and operations.

SEC. 5. *Fiscal.* Any necessary fiscal arrangements and personnel adjustments may be effected to accomplish the purposes of this Order.

SEC. 6. *Effective Date.* This Order is effective immediately and shall remain in effect until it is amended, superseded, or revoked.

Dated: August 19, 1977.

JAMES A. JOSEPH,
Acting Secretary.

[FR Doc.77-25061 Filed 8-29-77;8:45 am]

DEPARTMENT OF JUSTICE

Drug Enforcement Administration

IMPORTATION OF CONTROLLED SUBSTANCES

Application

Pursuant to Section 1008 of the Controlled Substance Import and Export Act (21 U.S.C. 958(h)), the Attorney General shall, prior to issuing a registration under this section to a bulk manufacturer of a controlled substance in schedule I or II, and prior to issuing a regulation under section 1002(a) authorizing the importation of such a substance, provide manufacturers holding registrations for the bulk manufacture of the substance an opportunity for a hearing.

Therefore in accordance with Section 1311.42 of Title 21, Code of Federal Regulations (CFR), notice is hereby given that on June 15, 1977, Research Technology Branch, Division of Research, National Institute on Drug Abuse, DHEW, 11400 Rockville Pike, Rockville, Md.

V42168 AUG 30 77 UMI

20852, made application to the Drug Enforcement Administration to be registered as an importer of the basic classes of controlled substances listed below to be imported for research purposes only:

Drug:	Schedule
Tetrahydrocannabinols	I
Marihuana	I
Lysergic acid diethylamide	I
Etonitozene	I
Psilocybin	I
Psilocyn	I
5-methoxy - 3,4 - methylenedioxy amphetamine	I
3,4,5-trimethoxy amphetamine	I
3,4-methylenedioxy amphetamine	I
4-bromo-2,5 - dimethoxyamphetamine	I
Dimethyltryptamine	I
Bufotenine	I
2,5 dimethoxyamphetamine	I
4-methyl-2,5-dimethoxy amphetamine	I
4-methoxyamphetamine	I
Buprenorphine	II

As to the basic classes of controlled substances listed above for which application for registration has been made, any other applicant therefor, and any existing bulk manufacturer registered therefor, may file written comments on or objection to the issuance of such registration and may, at the same time, file a written request for a hearing on such application in accordance with 21 CFR 1301.54 in such form as prescribed by 21 CFR 1316.47. Such comments, objections and requests for a hearing may be filed no later than September 28, 1977.

Comments and objections may be addressed to the DEA Federal Register Representative, Office of Chief Counsel, Drug Enforcement Administration, Room 1203, 1405 Eye Street NW., Washington, D.C. 20537.

This procedure is to be conducted simultaneously with and independent of the procedures described in 21 CFR 1311.42 (b), (c), (d), (e), and (f). As noted in a previous notice at 40 FR 43745-46 (September 23, 1975), all applicants for registration to import a basic class of any controlled substance in schedule I or II are and will continue to be required to demonstrate to the Administrator of the Drug Enforcement Administration that the requirements for such registration pursuant to 21 U.S.C. 958(a), 21 U.S.C. 823 (a), and 21 CFR 1311.42 (a), (b), (c), (d), (e), and (f) are satisfied.

Dated: August 24, 1977.

DONALD E. MILLER,
Acting Deputy Administrator,
Drug Enforcement Administration.

MANUFACTURE OF CONTROLLED SUBSTANCES

Application

Section 303(a)(1) of the Comprehensive Drug Abuse Prevention and Control Act of 1970 (21 U.S.C. 823(a)(1) states:

The Attorney General shall register an applicant to manufacture controlled substances in schedule I or II if he determines that such registration is consistent with the public interest and with United States obligations under international treaties, conventions, or protocols in effect on the effective date of this part. In determining the public interest, the following factors shall be considered:

(1) Maintenance of effective controls against diversion of particular controlled substances and any controlled substance in schedule I or II compounded therefrom into other than legitimate medical, scientific, research, or industrial channels, by limiting the importation and bulk manufacture of such controlled substances to a number of establishments which can produce an adequate and uninterrupted supply of these substances under adequately competitive conditions for legitimate medical, scientific, research, and industrial purposes;

Pursuant to Section 1301.43 of Title 21 of the Code of Federal Regulations (CFR), notice is hereby given that on August 3, 1977, Eli Lilly & Co., Tippecanoe Lab., Box 685, Lilly Road, Lafayette, Ind. 47902, made application to the Drug Enforcement Administration to be registered as a bulk manufacturer of the basic class of controlled substances listed below:

Drug:	Schedule
Methadone	II
Methadone-intermediate	II

Pursuant to Section 301 of the Controlled Substances Act (21 U.S.C. 821), and in accordance with 21 CFR 1301.43 (a), notice is hereby given that the above firm has made application to the Drug Enforcement Administration to be registered as a bulk manufacturer of the basic class of controlled substances indicated, and any other such person, and any existing registered bulk manufacturer of the above substances may file written comments on or objections to the issuance of such registration and may, at the same time, file a written request for a hearing on the application in accordance with 21 CFR 1301.54 in such form as prescribed by 21 CFR 1316.47. Such comments, objections and requests for a hearing may be filed no later than September 28, 1977.

Comments and objections may be addressed to the DEA Federal Register Representative, Office of Chief Counsel, Drug Enforcement Administration, Room 1203, 1405 Eye Street NW., Washington, D.C. 20537.

Dated: August 24, 1977.

DONALD E. MILLER,
Acting Deputy Administrator,
Drug Enforcement Administration.

DEPARTMENT OF LABOR

Employment and Training Administration

JOB CORPS

Proposed Job Corps Center at Benton Air Force Base, Red Rock Mountain, Pa.; Determination of Negative Environmental Impact

AGENCY: Employment and Training Administration, Labor.

ACTION: Notice—Finding of Negative Environmental Impact.

SUMMARY: The purpose of this notice is to announce a determination by the Department under the Environmental Policy Act and 40 CFR Part 1500 that the establishment of a Job Corps center at Benton Air Force Base, Red Rock Mountain, Pa., does not constitute a major Federal action which will significantly affect the environment.

FOR FURTHER INFORMATION CONTACT:

John H. Stetson, Director, Job Corps, Room 6100, Patrick Henry Building, 601 D Street NW., Washington, D.C. 20213. Telephone 202-376-6995.

SUPPLEMENTARY INFORMATION: Title IV of the Comprehenesive Employment and Training Act of 1973, as amended (CETA), 29 U.S.C. 911 et seq., directs the Secretary of Labor to establish Job Corps centers to provide occupational training to disadvantaged youths ages 16 through 21. The Secretary has issued regulations published at 29 CFR Part 97a, implementing Title IV of CETA. Pursuant to his authority the Secretary is establishing a Job Corps center at the Benton Air Force Base location.

Pursuant to 40 CFR Part 1500, the Department of Labor has conducted an environmental assessment as part of a site utilization study and has determined that preparation of an environmental impact statement is not required since the establishment of this Job Corps center is not a major Federal action which will significantly affect the quality of the human environment within the meaning of 40 CFR 1500.6(c). The proposed Benton Job Corps Center will be a training center with residential, nonresidential and educational facilities for approximately 250-300 disadvantaged youth, men, and women, ages 16 through 21, who need and can benefit from intensive employment-related services. The function of the center and the staff of approximately 100 will be to provide skill training in selected vocational courses and continuing and/or remedial education in academic subjects.

The proposed use of the facility is intended for essentially the same purpose as used by the previous occupant, specifically residential living and education.

The center will be a self-contained facility located on the top slopes of Red Rock Mountain approximatey 9 miles north of Benton, and 40 miles west of Wilkes-Barre, Pa. The site is located on approximately 100 acres of mountain land, of which 70-80 acres are cleared and enclosed by fencing. The facility consists of approximately 44 buildings, of which 31 buildings are proposed for utilization.

Onsite sewage treatment facilities will be upgraded as required to meet applicable Federal, State, and local standards. This will be accomplished either by the remodeling of the existing plan or by the installation of a new prepackaged plant with tertiary treatment.

The two deep wells operating onsite will more than adequately meet the volume requirements and standards for water supply. The system includes one 85,000 gallon exterior water tank and an interior 75,000 gallon storage reservoir utilizing charcoal bed water treatment in addition to an automatic chlorination and caustic soda treatment system.

The proposed Job Corps center will be operated in compliance with the Job Corps Environmental Standards published at 29 CFR 97a.116, and with applicable Federal, State, and local regulations concerning environmental health.

The proposed Job Corps center will comply with the water quality and related standards of the State and local Government, and with the standards established pursuant to the Federal Water Pollution Control Act, 33 U.S.C. 1251 et seq., with Executive Order 11752, and with regulations and guidelines of the United States Environmental Protection Agency.

The center installation will be designed, operated, and maintained so as to conform to Federal air quality standards, including those found in Executive Order 11752 and 40 CFR Part 86.

Signed at Washington, D.C., this 19th day of August, 1977.

JOHN H. STETSON,
Director, Job Corps.

[FR Doc.77-25145 Filed 8-29-77;8:45 am]

JOB CORPS

Proposed Job Corps Center at Fremont Junior High School, San Bernardino, Calif.; Determination of Negative Environmental Impact

AGENCY: Employment and Training Administration, Labor.

ACTION: Notice—Finding of Negative Environmental Impact.

SUMMARY: The purpose of this notice is to announce a determination by the Department under the Environmental Policy Act and 40 CFR Part 1500 that the establishment of a Job Corps center at Fremont Junior High School, San Bernardino, Calif., does not constitute a major Federal action which will significantly affect the environment.

FOR FURTHER INFORMATION CONTACT:

John H. Stetson, Director, Job Corps, Room 6100, Patrick Henry Building, 601 D Street NW., Washington, D.C. 20213. Telephone: 202-376-6995.

SUPPLEMENTARY INFORMATION: Title IV of the Comprehensive Employment and Training Act of 1973, as amended (CETA), 29 U.S.C. 911 et seq., directs the Secretary of Labor to establish Job Corps centers to provide occupational training to disadvantaged youths ages 16 through 21. The Secretary has issued regulations published at 29 CFR Part 97a, implementing Title IV of CETA. Pursuant to his authority the Secretary is establishing a Job Corps center at the Fremont Junior High School location.

Pursuant to 40 CFR Part 1500, the Department of Labor has conducted an environmental assessment as part of a site utilization study and has determined that preparation of an environmental impact statement is not required since the establishment of this Job Corps center is not a major Federal action which will significantly affect the quality of the human environment within the meaning of 40 CFR Section 1500.6(c). The proposed Fremont Job Corps Center will be a training center with residential, nonresidential, and educational facilities for approximately 200 resident and 75 nonresident disadvantaged youth, men, and women, ages 16 through 21, who need and can benefit from intensive employment-related services. The function of the center and the staff of approximately 90 will be to provide skill training in selected vocational courses and continuing and/or remedial education in academic subjects.

The site utilization by the previous occupant, education, will be substantially continued but site modifications will be required to provide for residential living.

The center will be a self-contained facility located northwest of the City of San Bernardino, Calif. The facility is located on approixmately 17 acres of land consisting of 9 buildings and athletic facilities. Several new buildings will be constructed on the site to provide for residential living.

Domestic water and sewage collection systems to all existing buildings are provided from city mains. Modifications to site utility systems will be accomplished to provide utility service to new buildings. These utility systems, provided by the City of Muscoy, Calif., to the site, are adequate to meet the load capacity and standards for the proposed site utilizations.

The proposed Job Corps center will be operated in compliance with the Job Corps Environmental Standards published at 29 CFR 97a.116, and with applicable Federal, State, and local regulations concerning environmental health.

The proposed Job Corps center will comply with the water quality and related standards of the State and local Government, and with the standards established pursuant to the Federal Water Pollution Control Act, 33 U.S.C. 1251 et seq., with Executive Order 11752, and with regulations and guidelines of the United States Environmental Protection Agency.

The center installation will be designed, operated, and maintained so as to conform to Federal air quality standards, including those found in Executive Order 11752 and 40 CFR Part 86.

Signed at Washington, D.C., this 19th day of August 1977.

JOHN H. STETSON,
Director, Job Corps.

JOB CORPS

Proposed Job Corps Center at Turner Air Force Base, Albany, Ga.; Determination of Negative Environmental Impact

AGENCY: Employment and Training Administration, Labor.

ACTION: Notice—Finding of Negative Environmental Impact.

SUMMARY: The purpose of this notice is to announce a determination by the Department under the Environmnetal Policy Act and 40 CFR Part 1500 that the establishment of a Job Corps center at Turner Air Force Base, Albany, Ga., does not constitute a major Federal action which will significantly affect the environment.

FOR FURTHER INFORMATION CONTACT:

John H. Stetson, Director, Job Corps, Room 6100, Patrick Henry Building, 601 D Street NW., Washington, D.C. 20213. Telephone: 202-367-6995.

SUPPLEMENTARY INFORMATION: Title IV of the Comprehensive Employment and Training Act of 1973, as amended (CETA), 29 U.S.C. 911 et seq., directs the Secretary of Labor to establish Job Corps centers to provide occupational training to disadvantaged youths ages 16 through 21. The Secretary has issued regulations published at 29 CFR Part 97a, implementing Title IV of CETA. Pursuant to his authority the Secretary is establishing a Job Corps center at the Turner Air Force Base Complex.

Pursuant to 40 CFR Part 1500, the Department of Labor has conducted an environmental assessment as part of a site utilization study and has determined that preparation of an environmental impact statement is not required since the establishment of this Job Corps center is not a major Federal action which will significantly affect the quality of the human environment within the meaning of 40 CFR 1500.6(c). The proposed Turner Job Corps Center will be a training center with residential, nonresidential and educational facilities for approximately 700 disadvantaged youth, men, and women, ages 16 through 21, who need and can benefit from intensive employment-related services. The function of the center and the staff of approximately 230 will be to provide skill training in selected vocational courses and

V 42 168 AUG 30 77 UMI

continuing and/or remedial education in academic subjects.

It is intended that the center be used for essentially the same purposes as used by the previous occupant, specifically residential living and instruction, at a greatly reduced occupancy.

The center will be a self-contained facility located off of Turner Field Road, approximately 4½ miles northwest of downtown Albany, Ga. The portion of the facility to be utilized consists of approximately 74 acres of land consisting of 64 buildings, of which approximately 20 buildings will be occupied for the program.

Domestic water and sewage collection systems to all existing buildings are provided through the base utility systems. These utility systems, provided by the City of Albany, Ga., to the site, are adequate to meet the load capacity and standards for the proposed site utilization.

The proposed Job Corps center will be operated in compliance with the Job Corps Environmental Standards published at 29 CFR 97a.116, and with applicable Federal, State, and local regulations concerning environmental health.

The proposed Job Corps center will comply with the water quality and related standards of the State and local Government, and with the standards established pursuant to the Federal Water Pollution Control Act, 33 U.S.C. 1251 et seq., with Executive Order 11752, and with regulations and guidelines of the United States Environmental Protection Agency.

The center installation will be designed, operated, and maintained so as to conform to Federal air quality standards, including those found in Executive Order 11752 and 40 CFR Part 86.

Signed at Washington, D.C., this 19th day of August 1977.

JOHN H. STETSON,
Director, Job Corps.

Wage and Hour Division

CERTIFICATES AUTHORIZING THE EMPLOYMENT OF LEARNERS AT SPECIAL MINIMUM WAGES

Notice is hereby given that pursuant to section 14 of the Fair Labor Standards Act (52 Stat. 1062, as amended; U.S.C. 214), Reorganization Plan No. 6 of 1950 (3 CFR 1949–53 Comp., p. 1004), and Administrative Order No. 1–76 (41 FR 18949), the firms listed in this notice have been issued special certificates authorizing the employment of learners at hourly wage rates lower than the minimum wage rates otherwise applicable under section 6 of the Act. For each certificate, the effective and expiration dates, number or proportion of learners and the principal product manufactured by the establishment are as indicated. Conditions on occupations, wage rates, and learning periods which are provided in certificates issued under the supplemental industry regulations cited in the captions below are as established in those regulations; such conditions in certificates not issued under the supplemental industry regulations are as listed.

The following certificates were issued under the apparel industry learner regulations (29 CFR 522.1 to 522.9, as amended and 522.20 to 522.25, as amended). The following normal labor turnover certificates authorize 10 percent of the total number of factory production workers except as otherwise indicated.

College Casuals Company, Sheppton, Pa.; 4–23–77 to 4–22–78; 10 learners. (Ladies' slacks.)

Crane Mfg. Company, Republic, Mo.; 6–5–77 to 6–4–78; 10 learners. (Boys' and men's pants.)

Edison Textiles, Inc., Edison, Ga.; 3–29–77 to 3–28–78. (Toddler's and girls' sportswear.)

Flushing Shirt Mfg. Co., Inc., Waynesburg, Pa. 4–18–77 to 4–17–78; 10 learners. (Men's shirts.)

Freeland Sportswear Co., Inc., Freeland, Pa.; 5–27–77 to 5–26–78; 10 learners. (Men's jackets.)

Greenway Mfg. Co., Waynesburg, Pa.; 5–28–77 to 5–27–78. (Boys' and infants' shirts.)

Michael Berkowitz Co., Inc., Frostburg, Md.; 3–29–77 to 3–28–78; 10 learners. (Men's sleepwear.)

Pass Christian Industries, Inc., Pass Christian, Miss.; 5–1–77 to 4–30–78. (Ladies' shirts and jeans.)

Richfield Shirt Mfg. Co., Inc. Richfield, Pa.; 5–1–77 to 4–30–78. (Men's and boys' shirts.)

J. H. Rutter Rex Mfg. Co., Inc., Franklinton, La.; 4–24–77 to 4–23–78. (Men's and boys' pants.)

J. H. Rutter Rex Mfg. Co., Inc., Columbia, Miss.; 3–30–77 to 3–29–78. (Men's and boys' shirts and pants.)

Sancar Corporation, Harrisonburg, Va.; 4–22–77 to 4–21–78. (Ladies' underwear.)

The following certificate was issued under the knitted wear industry regulations (29 CFR 522.1 to 522.9, as amended and 522.30 to 522.35, as amended).

Louis Gallet, Inc., Uniontown, Pa.; 6–13–77 to 6–12–78; 5 learners for normal labor turnover purposes. (Boys' and men's sweaters.)

The following certificate was issued under the glove industry regulations (29 CFR 522.1 to 522.9, as amended and 522.60 to 522.65, as amended).

Galena Glove & Mitten Company, Dubuque, Iowa, 4–7–74 to 4–6–78; 10 learners for normal labor turnover purposes. (Work gloves.)

The following learner certificate was issued in Puerto Rico to the company hereinafter named. The effective and expiration dates, learner rates, occupation, learning period, and number of learners authorized to be employed are indicated.

General Cigar de Utuado, S. A., Utuado, P.R.; 6–15–77 to 6–14–78; 20 learners for normal labor turnover purposes is the occupation of cigar making machine operator for a learning period of 320 hours for the first 160 hours at the rates of $2.09 an hour and $2.19 an hour for the remaining 160 hours. (Tobacco.)

Each learner certificate has been issued upon the representations of the employer which, among other things were that employment of learners at special minimum rates is necessary in order to prevent curtailment of opportunities for employment, and that experienced workers for the learner occupations are not available. The certificate may be annulled or withdrawn as indicated therein, in the manner provided in 29 CFR, Part 528. Any person aggrieved by the issuance of any of these certificates may seek a review or reconsideration thereof on or before September 14, 1977.

Signed at Washington, D.C., this 26th day of July 1977.

DONALD T. CRUMBACK,
Authorized Representative of the Administrator.

PANAMA CANAL COMPANY

WHITE AMUR FISH; PROPOSED INTRODUCTION INTO GATUN LAKE AS BIOLOGICAL CONTROL FOR SUBMERGED AQUATIC MACROPHYTE

Availability of Draft Environmental Impact Statement and Notice of Public Hearings

Pursuant to Section 102(2)(c) of the National Environmental Policy Act, and the Panama Canal Company/Canal Zone Government procedures implementing said Act, the Environmental Quality Committee of the Panama Canal Company/Canal Zone Government has prepared a draft environmental impact statement for the proposed introduction of a biological agent (*Ctenopharyngodon idella*, white amur fish) to aid in the control of the submerged aquatic macrophyte, *Hydrilla verticillata*. The Committee has determined that this is an action which will significantly affect the quality of the human environment.

The Draft Environmental Impact Statement considers the biological, economic and social impact on the overall ecology of Gatun Lake, an artificial body of fresh water having a surface area of 431 Km^2, and the principal tributary river systems of the Republic of Panama, together with the project's effect relative to an increased reliance on chemical methods of control of aquatic weeds.

The Draft Environmental Impact Statement will be published and distributed on or about August 26, 1977, and thereafter a copy of same will be on file at the below-listed addresses and available for public inspection.

Dr. Paul Campanella, Secretary, Environmental Quality Committee, Panama Canal Company, Box M, Balboa Heights, Canal Zone; or
Secretary, Panama Canal Company, Room 312, Pennsylvania Building, 425 Thirteenth Street NW., Washington, D.C. 20004.

Copies of the Draft Environmental Impact Statement have been sent to various federal and local agencies for comment as outlined in the Council on Environmental Quality Guidelines. Comments are invited from others having knowledge of or special expertise on environmental impacts of the proposed project. In order to afford full opportunity for such comments in addition to written comments, a public hearing for the purposes of taking oral or written testimony on the matter will be held on September 30, 1977, at 2 p.m. in the Panama Canal Company Training Center, Building No. 0600, Room 4, Balboa Heights, Canal Zone.

Written comments concerning the proposed action or requests for additional information should be mailed, airmail, and addressed to:

Dr. Paul J. Campanella, Secretary, Environmental Quality Committee, Panama Canal Company, Box M, Balboa Heights, Canal Zone.

Comments must be received at the above address on or before October 17, 1977 and all comments so received will be considered prior to the preparation and distribution of a final environmental impact statement.

THOMAS M. CONSTANT,
Secretary, Panama Canal Company.

AUGUST 15, 1977.

DEPARTMENT OF THE TREASURY

Office of the Secretary

PARTICIPATION IN OR COOPERATION WITH INTERNATIONAL BOYCOTT

Revised Effective Dates of Certain New Boycott Guidelines

On August 19, 1977, the Treasury Department announced a delay in the effective dates of answers H–8 and H–29 of the new boycott guidelines that were released on August 12, 1977 and that appeared in the FEDERAL REGISTER of August 17, 1977 (42 FR 41504)). These answers relate to letters of credit. The effective dates for the remainder of the new guidelines were left unchanged.

The guidelines relate to the provisions of the Tax Reform Act of 1976 which deny certain tax benefits for participation in or cooperation with international boycotts. The new guidelines superseded earlier sets of guidelines issued by the Treasury on November 4, 1976 and December 30, 1976.

Answers H–8 and H–29 of the new guidelines will be effective only for operations, requests, and agreements after September 21, 1977. In addition, in the case of operations carried out in accordance with the terms of a binding contract entered into before September 22, 1977, answers H–8 and H–29 will not be effective until after June 30, 1978.

Dated: August 24, 1977.

LAURENCE N. WOODWORTH,
Assistant Secretary for Tax Policy.

VETERANS ADMINISTRATION

GERIATRIC RESEARCH, EDUCATION AND CLINICAL CENTERS ADVISORY COMMITTEE

Meeting

The Veterans Administration gives notice pursuant to Pub. L. 92–463 that a final meeting of the Geriatric Research, Education and Clinical Centers Advisory Committee, authorized by 38 U.S.C. 4101, will be held in Conference Room 119, Veterans Administration Central Office, 810 Vermont Avenue NW., Washington, D.C., on September 15 and 16, 1977. The final meeting will be for the purpose of reviewing and evaluating the progress of the existing Geriatric Research, Education and Clinical Centers and to aid in the start-up of new Geriatric Research, Education and Clinical Center(s). The Committee has advised the Veterans Administration through the Assistant Chief Medical Director for Extended Care.

The meeting will be open to the public up to the seating capacity of the room from 8:30 a.m. to 4:30 p.m. on September 15 and from 8:30 a.m. to 1 p.m. on September 16. To assure adequate accomodations, those who plan to attend should contact Dr. Richard Filer, Assistant Departmental Committee Manager, Veterans Administration Central Office, Washington, D.C. 202–389–3854, prior to September 12, 1977.

By direction of the Administrator.

Dated: August 23, 1977.

RUFUS H. WILSON,
Deputy Administrator.

VOLUNTARY SERVICE NATIONAL ADVISORY COMMITTEE

Meeting

The Veterans Administration gives notice that the annual meeting of the Veterans Administration Voluntary Service National Advisory Committee, composed of representatives of 46 national voluntary organizations, will be held at the Hyatt Regency Hotel, 400 New Jersey Avenue NW., Washington, D.C., October 26–28, 1977.

Registration of the conferees and preliminary meetings of the planning subcommittees will be held during the afternoon of October 26, 1977. The meeting will officially convene with a Plenary Session at 9 a.m., October 27, in the Yorktown Room of the hotel and will conclude at noon on Octobtr 28, 1977.

The purposes of the meeting are to instruct committee members and officials of their organizations in obligations they have accepted for volunteer recruitment, communications and program interpretation, and to seek the advice of the committee in further developing volunteer participation in the care and treatment of veteran patients throughout the Agency's nationwide medical program.

By direction of the Administrator.

Dated: August 23, 1977.

RUFUS H. WILSON,
Deputy Administrator.

INTERSTATE COMMERCE COMMISSION

[No. 467]

ASSIGNMENT OF HEARINGS

AUGUST 25, 1977.

Cases assigned for hearing, postponement, cancellation or oral argument appear below and will be published only once. This list contains prospeective assignments only and does not include cases previously assigned hearing dates. The hearings will be on the issues as presently reflected in the Official Docket of the Commission. An attempt will be made to publish notices of cancellation of hearings as promptly as possible, but interested parties should take appropriate steps to insure that they are notified of cancellation or postponements of hearings in which they are interested.

MC 103066 (Sub-No. 56), Stone Trucking Co., now being assigned October 12, 1977 (1 day), for hearing in Chicago, Ill., will be held in Court Room 704, Federal Building, 610 South Canal Street.

MC 113908 (Sub-No. 394), Erickson Transport Corp., now being assigned October 13, 1977 (2 days), for hearing in Chicago, Ill., will be held in Court Room 704, Federal Building, 610 South Canal Street.

MC 141511 (Sub-No. 1), Robert W. Rettig, DBA Protein Express, now being assigned October 17, 1977 (1 day), for hearing in Chicago, Ill., will be held in Court Room 704, Federal Building, 610 South Canal Street.

MC 138144 (Sub-No. 20), Fred Olson Co., Inc., now being assigned October 18, 1977 (2 days), for hearing in Chicago, Ill., will be held in Court Room 704, Federal Bldg., 610 South Canal Street.

MC 720 (Sub-No. 31), Bird Trucking Co., Inc., now being assigned October 20, 1977 (2 days), for hearing in Chicago, Ill., will be held in Court Room 704, Federal Building, 610 South Canal Street.

MC 66886 (Sub-No. 54), Belger Cartage Service, Inc., now assigned October 17, 1977, at Kansas City, Mo., will be held in Room 609, Federal Bldg., 911 Walnut St.

MC 26739 (Sub-No. 91), Crouch Freight Systems, Inc., now assigned October 19, 1977, at Kansas City, Mo., will be held in Room 609 Federal Bldg., 911 Walnut St.

MC 126118 (Sub-No. 36), Crete Carrier Corp., MC 128375 (Sub-No. 148), Crete Carrier Corp., and MC 128375 (Sub-No. 149), Crete Carrier Corp., now assigned October 12, 1977, at Kansas City, Mo., will be held in Room 609, Federal Bldg., 911 Walnut St.

MC 59957 (Sub-No. 50), Motor Freight Express, now assigned October 17, 1977, at Pittsburgh, Pa., will be held in Room 2218, Federal Bldg., 1000 Liberty Avenue.

MC 129903 (Sub-No. 7), Emporia Motor Freight, Inc., now assigned October 17, 1977, at Topeka, Kans., will be held in Room 480 Federal Bldg., U.S. Courthouse, 444 South Quincy.

FD 27421, Southern Pacific Transportation Co.—Common use of Terminal Facilities—Union Pacific Railroad Co. & Burlington Northern, Inc., now assigned October 31, 1977, at Portland Oreg., will be held in Room 103, Pioneer Courthouse, 555 SW. Yamhill Street.

MC 2202 (Sub-No. 525), Roadway Express, Inc., now being assigned November 15, 1977 (3 days), at Baton Rouge, La., in a hearing room to be later designated.

MC 140612 (Sub-No. 15), Robert F. Kazimour, now being assigned November 14, 1977 (1 day), for hearing in Chicago, Ill., in a hearing room to be later desingated.

MC 1934 (Sub-No. 39), The Arrow Line, Inc., now being assigned November 29, 1977 (4 days), for hearing in New Haven, Conn., in a hearing room to be later designated.

MC 108587 (Sub-No. 21), Schuster Express, Inc., now being assigned December 5, 1977 (1 week), for hearing in Hartford, Conn., in a hearing room to be later designated.

MC 143140, Seymour Bus Lines, Inc., now being assigned December 5, 1977 (1 week), for hearing in Knoxville, Tenn., in a hearing room to be later designated.

AB 19 (Sub-No. 32), The Baltimore & Ohio Railroad Co., abandonment near Green Spring and Petersburg in Hampshire, Hardy, and Grant Counties, W. Va., now being assigned October 17, 1977 (1 week), for hearing in Moorefield, W. Va., in a hearing room to be later designated.

MC 107515 (Sub-No. 1040), Refrigerated Transport Co., Inc., now assigned September 14, 1977, at Chicago, Ill., is postponed indefinitely.

AB 12 (Sub-No. 39), Southern Pacific Transportation Co., abandonment between Concord and Dougherty in Contra Costa and Alameda Counties, Calif., now being assigned November 1, 1977 (3 days), for hearing in Walnut Creek, Calif., in a hearing room to be later designated.

MC 113855 (Sub-No. 378), International Transport, Inc., now being assigned November 4, 1977 (1 day), for hearing in San Francisco, Calif., in a hearing room to be later designated.

MC 138018 (Sub-No. 35), Refrigerated Foods, Inc., now being assigned November 7, 1977 (2 days), for hearing in San Francisco, Calif., in a hearing room to be later designated.

No. 36626, *San Francisco Port Commission* v. *Delta Lines, Inc., et al*, now being assigned November 9, 1977 (3 days), for hearing in San Francisco, Calif., in a hearing room to be later designated.

MC 139495 (Sub-No. 218), National Carriers, Inc., now being assigned November 14, 1977 (1 week), for hearing in San Francisco, Calif., in a hearing room to be later designated.

H. G. HOMME, Jr.,
Acting Secretary.

FOURTH SECTION APPLICATIONS FOR RELIEF

AUGUST 25, 1977.

An application, as summarized below, has been filed requesting relief from the requirements of Section 4 of the Interstate Commerce Act to permit common carriers named or described in the application to maintain higher rates and charges at intermediate points than those sought to be established at more distant points.

Protests to the granting of an application must be prepared in accordance with Rule 40 of the general rules of practice (49 CFR 1100.40) and filed on or before September 14, 1977.

FSA No. 43417—*Phthalic Anhydride from Texas City, Tex.* Filed by Southwestern Freight Bureau, Agent, (No. B–707), for interested rail carriers.

Rates on phthalic anhydride, in tankcar loads, as described in the application, from Texas City, Tex., to East St. Louis, Ill.

Grounds for relief—Market competition.

Tariff—Supplement 13 to Southwestern Freight Bureau, Agent, tariff 12–K, I.C.C. No. 5272.

Rates are published to become effective on September 24, 1977.

FSA No. 43418—*Joint Water-Rail Container Rates—Evergreen Line.* Filed by Evergreen Line (No. 1), for itself and interested rail carriers.

Rates on general commodities, between ports in Japan, Korea, Hong Kong, and Taiwan, and rail carriers terminals on the U.S. Atlantic and Gulf Coasts.

Grounds for relief—Water competition.

Tariffs—Evergreen Line tariffs I.C.C. Nos. 1 and 2.

Rates are published to become effective on September 17, 1977.

By the Commission.

H. G. HOMME, Jr.,
Acting Secretary.

[FR Doc.77-25164 Filed 8-29-77;8:45 am]

[Finance Docket No. 28409]

NORFOLK & WESTERN RAILROAD CO. AND BALTIMORE & OHIO RAILROAD CO.; CONTROL OF DETROIT, TOLEDO & IRONTON RAILROAD CO.

Waiver of Requirements of Exhibits

Order. At a general session of the Interstate Commerce Commission, held at its office in Washington, D.C., on the 15th day of August 1977.

Upon consideration of the petition filed on June 30, 1977, by Norfolk and Western Railway Co. (N&W), Chessie System, Inc., the Chesapeake and Ohio Railway Co. (C&O) and the Baltimore and Ohio Railroad Co. (B&O), seeking a waiver of the strict requirements of the regulation at 49 CFR 1111.2(b)(3)(i).

N&W and B&O have agreed, to purchase, in equal parts, all of the shares of stock of the Detroit, Toledo and Ironton Railroad Co. (DT&I) owned or under control of Pennsylvania Company. Petitioners plan to file a section 5(2) joint control application in the early fall of 1977. The regulation at 49 CFR 1111.2-(b)(3)(i) would require the submission of traffic studies for the period January 1, 1976, to December 31, 1976.

Petitioners seek a waiver of the requirements of the above-cited regulation and seek permission to submit traffic studies covering the period May 1, 1976 to April 30, 1977 with their application. Petitioners claim that the traffic patterns in the area changed substantially after April 1, 1976, when the Consolidated Rail Corporation (ConRail) began operating and when DT&I began serving the Cincinnati, Ohio Gateway via trackage rights over ConRail. Thus, in order to reflect the new traffic patterns and current revenues, petitioners allege that they should be permitted to submit traffic studies covering the period May 1, 1976, to April 30, 1977.

We believe that good cause has been presented to justify granting the waiver requested. We also believe that, in order for the Commission to make valid comparisons of traffic data to be submitted, we should require that all traffic studies to be submitted in the proposed proceeding must cover the period May 1, 1976, to April 30, 1977.

Since petitioners have not yet filed an application, and we realize that traffic studies take some time to prepare, we believe that notice of our action herein should be published in the FEDERAL REGISTER. In addition, petitioners should be required to specify the required time period for traffic studies in the notice that must be published when the application is filed.

It is ordered, That the petition for waiver be, and it is hereby, granted;

It is further ordered, That if petitioners file the above-described joint control application, all parties to the proceeding shall file required traffic studies covering the period May 1, 1976, to April 30, 1977; and that petitioner shall be required to state the period for traffic studies in the notice which must be published when their application is filed;

It is further ordered, That public notice of our action herein shall be given to the general public by delivery of a copy of this order to the Director, Office of the Federal Register, for publication therein;

It is further ordered, That this order shall be effective on the date of service.

By the Commission (Commissioner Hardin was absent and did not participate).

H. GORDON HOMME, Jr.,
Acting Secretary.

[M–48]

AUGUST 24, 1977.

CIVIL AERONAUTICS BOARD.

TIME AND PLACE: 10 a.m., September 1, 1977.

PLACE: Room 1027, 1825 Connecticut Avenue, Washington, D.C. 20428.

SUBJECT: 1. Ratification of items Adopted by Notation.[1]

2. Docket 29193, Alamogordo's and Ponca City's petitions for reconsideration of Order 77–2–116 insofar as it granted Frontier's petition to overfly Ponca City and Alamogordo (Memo No. 6408–B, BOR).

3. Docket 30885, Northwest's application for Chicago-Washington "fill-up" authority (Memo No. 6980–C, BOR, OGC).

4. Dockets 27999 and 28000, United's Petition for an Order to Show Cause and Exemption Renewal for Nonstop Cleveland-New Orleans (Memo No. 7361, BOR).

5. Docket 29601, ATC agreement requiring travel agents to reimburse ATC for litigation expenses, Agreement CAB 16874–A53 (Memo No. 7366, BOR, OGC).

6. Dockets 29827 and 30034, Motion of Allegheny Airlines for Hearing on its application to extend its system to various Florida cities; and Motion of United Air Lines for Hearing on its application to add Orlando to its Route 51 between the Great Lakes and Florida (Memo No. 7156, BOR).

7. Docket 28194, *Eastern/Piedmont Route Exchange*, Notice of Target Date (Memo No. 7365, OGC).

8. Docket 24694, *Miami-Los Angeles Competitive Non-stop Case*. Order Reopening Proceeding (Memo No. 7354, OGC).

9. Docket 28196, *California-Alberta Route Proceeding*, Order on Discretionary Review (Memo No. 7332, OGC, BE).

10. Dockets 24582 and 29132, *Cincinnati-Washington Subpart M Proceeding* (Memo No. 5734–F, OGC, BE).

11. Comments on the "Redtape Reduction Act of 1977, H.R. 5880" (Memo No. 6844–A, OGC).

12. Docket 30783, Rulemaking Petition of Novo Airfreight (Novo) to permit cooperative shippers associations to use the services of air freight forwarders (Memo No. 7363, OGC).

13. Docket 30848, Motion to review the decision of the Director, BOE, dismissing third-party complaint in the matter of *James Ehrman* v. *Alitalia Airlines* (Memo No. 7369, OGC).

14. Docket 29139, Proposed Rule on overbooking and oversales (Memo No. 5963–G, No. 5963–H, OGC).

15. Docket 30182, *Iowa/Illinois-Atlanta Route Proceeding*, Order on reconsideration and consolidation (Memo No. 6950–A, BLJ, OGC).

16. Transmittal of responses to questions in conjunction with testimony before the Senate Committee on Foreign Relations on Protocols amending the Warsaw Convention and the Supplemental Compensation Plan, Order 77–7–85 (Memo No. 7178–D, BAS, OGC).

17. Docket 30240, Aviation Consumer Action Project Petition for Rulemaking to Amend Part 241 (Memo No. 7337, OGC, BE, BAS, BOE).

18. Nonacceptance of certain types of shipments proposed by Associated Air Freight, an air freight forwarder, effective September 5, 1977 (BFR).

19. Docket 31166, TWA complaint against Laker Airways Sky Train tariff (BFR).

20. Docket 29926, Notice of Proposed Rulemaking, SPDR–56—OTC Advance Purchase Period (For Information Memo No. 8/3, BIA, OGC, BOE, BE, BOR).

STATUS: Open.

PERSON TO CONTACT:

Phyllis T. Kaylor, The Secretary, 202–673–5068.

EQUAL EMPLOYMENT OPPORTUNITY COMMISSION.

"FEDERAL REGISTER" CITATION OF PREVIOUS ANNOUNCEMENT: S–1185–77.

PREVIOUSLY ANNOUNCED TIME AND DATE OF MEETING: 9:30 a.m. (Eastern Time), Tuesday, August 30, 1977.

CHANGES IN THE MEETING: Addition of the following item to the portion open to the public:

3. *New Charge Intake and Backlog Procedures*. The Commission will consider the approval of the use of these new procedures by all of its district offices, under a phasing plan to be approved at a later date.

A majority of the entire membership of the Commission determined by recorded vote that the business of the Commission requires this change and that no earlier announcement was possible.

The vote was as follows:

In favor of change: Eleanor Holmes Norton, Chair; Ethel Bent Walsh, Commissioner; Daniel E. Leach, Commissioner.

Opposed: None.

CONTACT PERSON FOR MORE INFORMATION:

Marie D. Wilson, Executive Officer, Executive Secretariat, at 202–634–6748.

This Notice Issued August 25, 1977.

Federal Insurance Administration

PROPOSED FLOOD ELEVATION DETERMINATIONS

V 42 168 AUG 30 77 UMI

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Federal Insurance Administration

[24 CFR Part 1917]

[Docket No. FI-3237]

PROPOSED FLOOD ELEVATION DETERMINATIONS

Borough of Shippensburg, Cumberland County, Pa.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base flood elevations (100-year flood) listed below for selected locations in the Borough of Shippensburg, Cumberland County, Pa.

These base flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety days following the second publication of this notice in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base flood elevations are available for review at the Shippensburg Borough Office, 60 West Burd Street, Shippensburg, Pa.

Any person having knowledge, information, or wishing to make a comment on these proposed elevations should immediately notify Mr. Walter K. Smith, Borough Manager of Shippensburg, P.O. Box 129, Shippensburg, Pa. 17257.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202–755–5581 or toll free line 800–424–8872, room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base flood elevations (100-year flood) for the Borough of Shippensburg, Cumberland County, Pa. in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93–234), 87 Stat. 980, which added Section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 Pub. L. 90–448), 42 U.S.C. 4001–4128, and 24 CFR Part 1917.

These elevations together with the flood plain management measures required by § 1910.3 of the program regulations are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and contents.

The proposed 100-year flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet above mean sea level
Burd Run	U.S. Route 11	651
	Orange St.	654
Middle Spring Creek	North corporate limit.	640
	Spring House Rd	642
	West Burd Rd.	645
	West King St.	652
	West Orange St.	652
	Garfield St.	655
	South corporate limit.	661
Middle Spring Creek tributary.	Dykeman Rd.	664
	Conrail	660

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; 42 U.S.C. 4001–4128; and Secretary's delegation of authority to Federal Insurance Administrator 34 FR 2680, February 27, 1969, as amended (39 FR 2787, January 24, 1974).)

Issued: July 28, 1977.

PATRICIA ROBERTS HARRIS,
Secretary.

[Docket No. FI-3238]

PROPOSED FLOOD ELEVATION DETERMINATIONS

City of Aberdeen, Brown County, S. Dak.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base flood elevations (100-year flood) listed below for selected locations in the City of Aberdeen, Brown County, S. Dak.

These base flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety days following the second publication of this notice in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base flood elevations are available for review at the Aberdeen Municipal Building, on the first floor, 123 South Lincoln Street, Aberdeen, S. Dak.

Any person having knowledge, information, or wishing to make a comment on these proposed elevations should immediately notify the Honorable Jeff Solem, Mayor of Aberdeen, P.O. Box 299, Aberdeen, S. Dak. 57401.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202–755–5581 or Toll Free Line, 800–424–8872, Room 5270, 451 Seventh Street, SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base flood elevations (100-year flood) for the City of Aberdeen, Brown County, S. Dak., in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93–234), 87 Stat. 980, which added Section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 Pub. L. 90–448), 42 U.S.C. 4001–4128, and 24 CFR Part 1917.

These elevations together with the flood plain management measures required by § 1910.3 of the program regulations are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and contents.

The proposed 100-year flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet above mean sea level
Moccasin Creek	Confluence with Moccasin Creek tributary.	1,297
	3d Ave.	1,297
	6th Ave.	1,296
	8th Ave.	1,296
	10th Ave.	1,296
	Melgaard Rd.	1,295
	Brown County 14.	1,294
Moccasin Creek tributary.	8th Ave.	1,299
	B.N. RR.	1,298
	C.M. S.P. & P. RR.	1,298

PROPOSED FLOOD ELEVATION DETERMINATIONS

City of Columbia, Brown County, S. Dak.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base flood elevations (100-year flood) listed below for selected locations in the City of Columbia, Brown County, S. Dak. These base flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety days following the second publication of this notice in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base flood elevations are available for review at Columbia City Hall, Main Street, Columbia, S. Dak.

Any person having knowledge, information, or wishing to make a comment on these proposed elevations should immediately notify Honorable Egon Buntrock, Mayor of Columbia, Columbia, S. Dak. 57433.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202–755–5581 or toll free line 800–424–8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base flood elevations (100-year flood) for the City of Columbia, Brown County, S.Dak. in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93–234), 87 Stat. 980, which added Section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 Pub. L. 90–448), 42 U.S.C. 4001–4128, and 24 CFR Part 1917.

These elevations together with the flood plain management measures required by § 1910.3 of the program regulations are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, state, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and contents.

The proposed 100-year flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet above mean sea level
James River	Lavin Ave. (extended).	1,293
	County Rd. No. 11	1,292
	C. & N.W. RR.	1,292.5

[Docket No. FI-3240]

PROPOSED FLOOD ELEVATION DETERMINATIONS

City of Athens, McMinn County, Tenn.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base flood elevations (100-year flood) listed below for selected locations in the City of Athens, McMinn County, Tenn. These base flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety days following the second publication of this notice in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base flood elevations are available for review on the Bulletin Board, 815 North Jackson Street, Athens, Tenn.

Any person having knowledge, information, or wishing to make a comment on these proposed elevations should immediately notify Mr. G. Isbell, P.O. Box 849, Athens, Tenn. 37303.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202–755–5581 or toll free line 800–424–8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base flood elevations (100-year flood) for the City of Athens, McMinn County, Tenn. in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93–234), 87 Stat. 980, which added Section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 Pub. L. 90–448), 42 U.S.C. 4001–4128; and 24 CFR Part 1917.

These elevations together with the flood plain management measures required by § 1910.3 of the program regulations are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, state or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and contents.

The proposed 100-year flood elevations for selected locations are:

Source of Flooding	Location	Elevation in feet, national geodetic vertical datum
Oostanaula Creek	State Highway 30	459
	Madison Ave.	876
	Upstream corporate limits.	896
Walker Branch	Downstream side of Etowah Rd.	863
	Upstream side of Old Englewood Rd.	879
Black Branch	Upstream corporate limits.	815
	Downstream corporate limits.	814
Forest Branch	Downstream side of U.S. Highway 11	882
	Downstream side of Louisville & Nashville R.R.	891
	Kent St.	936
North Mouse Creek	Downstream side of State Highway 30	802
	Upstream Corporate limits	806
Blue Springs Branch	Upstream side of Old Decatur Rd.	801
	Upstream corporate limits.	811
Tributary No. 1 to North Mouse Creek	Downstream side of Private Dr. at Stream Mile 0.30.	808
	Upstream side of Private Dr. at Stream Mile 0.60	834
	Downstream side of Leyman Rd.	879

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; 42 U.S.C. 4001–4128; and Secretary's delegation

V 42 168 AUG 30 77 UMI

of authority to Federal Insurance Administrator, 34 FR 2680, February 27, 1969, as amended (39 FR 2787, January 24, 1974).)

Issued: July 28, 1977.

PATRICIA ROBERTS HARRIS,
Secretary.

PROPOSED FLOOD ELEVATION DETERMINATIONS

City of Morristown, Hamblen County, Tenn.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base flood elevations (100-year flood) listed below for selected locations in the City of Morristown, Hamblen County, Tenn. These base flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety days following the second publication of this notice in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base flood elevations are available for review at the Municipal Building, 144 West First North Street, Morristown, Tenn. 37814.

Any person having knowledge, information, or wishing to make a comment on these proposed elevations should immediately notify Honorable John R. Johnson, Mayor of Morristown, P.O. Box 1499, Morristown, Tenn. 37814.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581 or toll free line 800-424-8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base flood elevations (100-year flood) for the City of Morristown, Hamblen County, Tenn. in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added Section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR Part 1917.

These elevations together with the flood plain management measures required by § 1910.3 of the program regulations are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, state, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and contents.

PROPOSED FLOOD ELEVATION DETERMINATIONS

City of Allen, Collin County, Tex.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base flood elevations (100-year flood) listed below for selected locations in the City of Allen, Collin County, Texas.

These base flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base flood elevations are available for review at City Hall, Allen, Texas.

Any person having knowledge, information, or wishing to make a comment on these proposed elevations should immediately notify Mayor Frank Dugger, P.O. Box 487, Allen, Texas 75002.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, (202) 755-5581 or Toll Free Line (800) 424-8872, room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base flood elevations (100-year flood) for the City of Allen, Collin County, Texas in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added Section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR Part 1917.

These elevations together with the flood plain management measures required by § 1910.3 of the program regulations are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, state or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and contents.

The proposed 100-year flood elevations for selected locations are:

Source of Flooding	Location	Elevation in feet, national geodetic vertical datum
Rowlett Creek	Upstream of Greenville Ave. (State Highway 5).	576
	Upstream of Rowlett Dr.	622
Cottonwood Creek	Downstream of Jupiter Rd.	603

PROPOSED FLOOD ELEVATION DETERMINATIONS

City of Del Rio, Val Verde County, Tex.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base flood elevations (100-year flood) listed below for selected locations in the City of Del Rio, Val Verde County, Texas.

These base flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety days following the second publication of this notice in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base flood elevations are available for review at the City Hall, 109 West Broadway, Del Rio, Texas 78840.

Any person having knowledge, information, or wishing to make a comment on these proposed elevations should immediately notify Honorable Alfredo Gutierrez, Jr., Mayor of Del Rio, City Hall, 109 West Broadway, Del Rio, Texas 78840.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, (202) 755-5581 or Toll Free Line (800) 424-8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base flood elevations (100-year flood) for the City of Del Rio, Val Verde County, Texas in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added Section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR Part 1917.

These elevations together with the flood plain management measures required by § 1910.3 of the program regulations are the minimum that are required. They should not be construed to mean the community stricter requirements on its own, or pursuant to policies established by other Federal, state or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and contents.

PROPOSED FLOOD ELEVATION DETERMINATIONS

County of Amherst, Va.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base flood elevations (100-year flood) listed below for selected locations in the County of Amherst, Va.

These base flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety days following the second publication of this notice in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base flood elevations are available for review at the County Courthouse, Amherst, Va. 24521.

Any person having knowledge, information, or wishing to make a comment on these proposed elevations should immediately notify Mr. Roy C. Mayor, County Administrator of Amherst County, P.O. Box 390, Amherst, Va. 24521.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581 or toll free line 800-424-8872, Room 5270, 451 Seventh Street, SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base flood elevations (100-year flood) for the County of Amherst, Va. in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added Section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR Part 1917.

These elevations together with the flood plain management measures required by § 1910.3 of the program regulations are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, state or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and contents.

[24 CFR Part 1917]

[Docket No. FI-3246]

PROPOSED FLOOD ELEVATION DETERMINATIONS

City of Salem, Independent City, Va.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base flood elevations (100-year flood) listed below for selected locations in the City of Salem, Independent City, Va.

These base flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety days following the second publication of this notice in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base flood elevations are available for review at the Bulletin Board, Engineering Department, Salem Municipal Building, 19 North College Avenue, Salem, Va.

Any person having knowledge, information, or wishing to make a comment on these proposed elevations should immediately notify Mr. William J. Paxton, City Manager of Salem, P.O. Box 869, Salem, Va. 24153.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581 or toll free line 800-424-8872, Room 5270, 451 Seventh Street, SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base flood elevations (100-year flood) for the City of Salem, Independent, City, Va., in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added Section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR Part 1917.

These elevations together with the flood plain management measures required by § 1910.3 of the program regulations are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain maagement requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, state or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and contents.

The proposed 100-year flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet above mean sea level
Roanoke River	Eastern corporate limits.	983
	Norfolk & Western RR.	990
	U.S. Route 11 (Apporson Dr.).	993

PROPOSED FLOOD ELEVATION DETERMINATIONS

Jefferson County, Wis.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base flood elevations (100-year flood) listed below for selected locations in Jefferson County, Wisconsin.

These base flood elevations are the basis for the flood plain management measures that the community is required to either adpot or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety days following the second publication of this notice in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base flood elevations are available for review at County Courthouse, 320 South Main Street, Jefferson, Wisconsin.

Any person having knowledge, information, or wishing to make a comment on these proposed elevations should immediately notify Mr. Robert Baier, County Administrator, Jefferson County, County Courthouse, 320 South Main Street, Jefferson, Wisconsin 53549.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, (202) 755-5581 or Toll Free Line (800) 424-8872, room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base flood elevations (100-year flood) for Jefferson County, in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added Section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR Part 1917.

These elevations together with the flood plain management measures required by § 1910.3 of the program regulations are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at ay time enact stricter requirements on its own, or pursuant to policies established by other Federal, State or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and contents.

The proposed 100-year flood elevations for selected locations are:

Source of Flooding	Location	Elevation in feet, national geodetic vertical datum
Rock River	County Trunk Highway CW bridge.	847

(Docket No. FI-3253)

PROPOSED FLOOD ELEVATION DETERMINATIONS

Sheboygan County, Wis.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base flood elevations (100-year flood) listed below for selected locations in Sheboygan County, Wisconsin.

These base flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety days following the second publication of this notice in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base flood elevations are available for review at Sheboygan County Courthouse, 615 North 6th Street, Sheboygan, Wisconsin.

Any person having knowledge, information, or wishing to make a comment on these proposed elevations should immediately notify Mr. Leo Tresp, Sheboygan County Board Chairman, 615 North 6th Street, Sheboygan, Wisconsin 53081.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, (202) 755-5581 or Toll Free Line (800) 424-8872, room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base flood elevations (100-year flood) for Seboygan County, Wisconsin, in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added Section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR Part 1917.

These elevations together with the flood plain management measures required by § 1910.3 of the program regulations are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, state or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and contents.

The proposed 100-year flood elevations for selected locations are:

PART III

ENDANGERED SPECIES SCIENTIFIC AUTHORITY

■

EXPORT OF BOBCAT, LYNX, RIVER OTTER AND AMERICAN GINSENG

Preliminary Findings and Request for Comment

V42168 AUG 30 77 UMI

ENDANGERED SPECIES SCIENTIFIC AUTHORITY

EXPORT OF BOBCAT, LYNX, RIVER OTTER, AND AMERICAN GINSENG

Preliminary Findings and Request for Comment

AGENCY: Endangered Species Scientific Authority.

ACTION: Notice.

SUMMARY: This notice summarizes current findings of the Endangered Species Scientific Authority (ESSA) on commercial international export of certain Appendix II species under the Convention on International Trade in Endangered Species of Wild Fauna and Flora. In particular, notice is given of preliminary ESSA findings on a State-by-State basis for the 1977–78 season for the international commercial export of bobcat (*Lynx rufus*, excluding the Mexican bobcat, *L. r. escuinapae*), lynx (*Lynx canadensis*), river otter (*Lutra canadensis*), and American ginseng (*Panax quinquefolius*). Because the export of Appendix II specimens may be permitted only if the ESSA is able to find that the export will not be detrimental to the survival of the species, and because the biological, commercial, and legal classification of the named species varies among the States, a State-by-State analysis was considered necessary. It is hoped that this notice will encourage comment and the submission of substantive information, which may be used to supplement or modify the conclusions drawn herein.

DATE: All interested persons are invited to comment on these preliminary findings at any time. Comments received by October 31, 1977 will be considered in a general republication of ESSA findings within the next few months. However, the ESSA will publish revised findings at any time if new information indicates that modification of particular findings are appropriate.

ADDRESS: Comments should be addressed to the Executive Secretary, Endangered Species Scientific Authority, 18th and C Streets, NW., Washington, D.C. 20240.

FOR FURTHER INFORMATION CONTACT:

Dr. William Y. Brown, Executive Secretary, Endangered Species Scientific Authority, 18th and C Streets NW., Washington, D.C. 20240. (202–343–5687).

BACKGROUND

The Convention on International Trade in Endangered Species of Wild Fauna and Flora (Convention) and its implementing regulations, 50 CFR Part 23, control international trade in animal and plant species included in each of three Appendices, listed in § 23.23. It is emphasized that the Convention Appendices are distinct from the list of species issued under the Endangered Species Act of 1973, 16 U.S.C. 1531–1543. Whereas listings under the Act include species endangered by any factor, species on the Convention Appendices must be actually or potentially endangered by international trade. Listed in Appendix II are generally those species not necessarily now threatened with extinction, but which may become so unless trade in them is subject to strict regulation.

The Convention required the establishment of a Scientific Authority whose purpose is to insure the scientific soundness of governmental decisions concerning trade in listed species of plants and animals. Therefore, the Endangered Species Scientific Authority (ESSA) was established by Executive Order 11911 on April 13, 1976. On July 11, 1977, the ESSA published an Interim Charter and other information essential to its operation (42 FR 35799). In that notice, the ESSA requested interested persons to comment on the Interim Charter as well as to provide biological and trade information on Convention species.

Before the Federal Wildlife Permit Office of the U.S. Fish and Wildlife Service, that serves as the U.S. Management Authority (MA) for the Convention, can issue permits for foreign export of Appendix II species taken from the wild, the ESSA must first find and advise the MA that the export will not be detrimental to the survival of the species (Convention, Article IV 2(a)). The ESSA has established in its Interim Charter the following general criteria for determining whether an export (or purpose of import or introduction from the sea) will not be detrimental to the survival of a species:

> 1. Whether similar export, import or introduction from the sea has occurred in the past, and has not reduced the numbers or distribution of the species, nor caused signs of ecological or behavioral stress within the species, or in other species of the affected ecosystem.
>
> 2. Whether life history parameters of the species and the structure and function of its ecosystem indicate that the present frequency of export, import, or introduction from the sea will not appreciably reduce the numbers or distribution of the species, nor cause signs of ecological or behavioral stress within the species or in other species of the affected ecosystem.
>
> 3. Whether such export, import, or introduction from the sea is expected to increase, decrease, or remain constant in frequency.
>
> (ESSA Interim Charter, Article IV. C., 42 FR 35801)

The U.S. Fish and Wildlife Service is currently reviewing the status of the bobcat, lynx, river otter, and American ginseng to determine whether they should be proposed as Endangered or Threatened under the Endangered Species Act of 1973. On July 13, 1977 the Service published a notice of review for the bobcat and the lynx (42 FR 35996); on July 28, 1977 the Service published a notice of review for the river otter (42 FR 38395); and on August 11, 1977 the Service published a notice of review for the American ginseng (42 FR 40823). In all three of these notices of review the Service requested interested parties to submit comments concerning the status of these species. As indicated in 42 FR 40979–40980 on August 12, 1977, findings of the ESSA on commercial international export of these species for the 1977–78 season will be based on a State-by-State assessment of the status of each species. The variation among the States in species status indicated that such an individualized approach would best give the ESSA the necessary basis for finding whether export would not be detrimental to the survival of the species. The ESSA usually reviews applications on a case-by-case basis, but the large volume of trade in these species calls for general findings. Interested parties were advised in the August 12 Notice that the ESSA would publish a subsequent notice indicating the States or origin from which commercial international export of subsequently obtained pelts and roots must be prohibited by the MA in the 1977–78 season, and indicating the appropriate level of exports of any species for which commercial international export was not initially prohibited. Interested persons were further advised that the ESSA would monitor any export and would notify the MA when it can no longer find that export from particular States will not be detrimental to the survival of the species, and therefore further commercial international exports must be barred by the MA.

The purpose of this notice is to present the ESSA's evaluation of the State-by-State biological status of the four named species, and to state the ESSA's preliminary findings on commercial international export. The ESSA seeks substantive comments which may serve to supplement or modify conclusions drawn from the available information. Of special interest are actual population censuses and trends, recent changes in habitat availability, Statewide trade and the legal status and impact of the international market on the named species. Comments received by October 31, 1977, will be considered in a republication of ESSA findings this Fall. However, these preliminary findings represent the best data available to the ESSA, and although little harvest of these species is expected for the next few months, these preliminary findings are effective immediately to prevent last minute stockpiling of pelts and roots. Because the ESSA cannot find in favor of international export without supporting evidence, foreign export cannot be permitted from States for which sufficient data and adequate regulatory mechanisms are lacking. The ESSA is hopeful that it will have most available information on these species by the end of the comment period, for incorporation into the republication of ESSA findings for 1977–78.

Regulation of bobcat, lynx, and river otter harvest varies considerably from State to State. Hunters, trappers, and dealers usually must be licensed by the State. Although methods of reporting vary from State to State, the most common means are dealer reports of purchases or sales, and surveys based on voluntary trapper reports of take. Such estimates may not accurately reflect the harvest or trends in the harvest (cf.

Colorado and South Dakota State analyses). Analyses of State harvests are further complicated by changes in State regulations, and trapping and hunting seasons. Currently, tagging of pelts is required in only 9 States for bobcat and 5 States for river otters, but several additional States have plans or proposals to implement such systems in the near future. Several States require tagging of fur shipments but not pelts.

The bobcat is completely protected by 12 States, the lynx by 9 States, and the river otter by 23 States. Most States allowing harvest have defined hunting or trapping seasons.

No States have established seasonal limits on total legal harvest of any of these species.

Few States regulate the harvest of American ginseng. The plant is completely protected by New York State law, except for collecting by private landowners. The plant is also protected by Michigan, although commercial harvest is allowed under State permit. Only the State of Wisconsin has established a collecting season. Certain counties in North Carolina and West Virginia require the consent of the landowner or an authorized agent before American ginseng may be collected. In addition, many States require consent of landowners or approval of authorized State agents for general plant collecting on private or public lands.

It cannot be overemphasized that the development of more adequate management and regulation of these species in many States would lead the ESSA to many more findings in favor of international commercial export than is now possible. Many of the negative ESSA findings in this notice are compelled by the lack of data and adequate regulatory mechanisms, rather than by positive evidence of declining populations. The ESSA strongly encourages the States to establish and enforce biologically justifiable limits on the harvest of these species, and to require tagging of every pelt, and issue documentation on all American ginseng taken in the State. Although in certain instances the ESSA may accept less than this for international export in 1977–78, it is unlikely that less will be accepted in 1978–79. Implementation of these requirements is a vital component of the Federal-State cooperation essential to the success of the Convention.

PRE-NOTICE SPECIMENS

Although these preliminary ESSA findings require the MA to prohibit or restrict international commercial export of pelts and roots taken in 1977–78, the ESSA expressly finds that the export of any pelts and roots of the four named species will not be detrimental to the survival of the species if the pelts and roots were obtained from the wild before the date of this notice.

The ESSA recognizes that exporters may have obtained Appendix II specimens taken during the 1976–77 season, or earlier without awareness of impending export regulations under the Convention, which became generally effective on May 23, 1977. For this reason, and because the impact on wild populations of the 1976–77 season is now past, the ESSA will allow export of this inventory without the same degree of scrutiny that will be required hereafter.

However, because of the danger of claims that pelts and roots taken after the date of this notice were taken before, general ESSA approval of these pre-notice commercial international exports will expire November 1, 1977, giving more than six months for export of the bulk of pelts and roots taken in the 1976–77 season or before, yet requiring discharge of inventory before the 1977–78 season is advanced. After November 1, applications for international export of allegedly pre-notice specimens are discouraged. Such applications will be closely scrutinized on a case-by-case basis and a positive finding will be made only if proof such as State tags or documents issued by authorized State officials leaves no reasonable doubt that the pelts or roots in question were acquired before the date of this notice.

Exporters should note that no ESSA approval is required for exports of pelts and roots under certificates of exemption issued by the MA. These certificates may be issued for various reasons stated in § 23.13 of Title 50, Code of Federal Regulations. Specifically encompassed are cases where pelts or roots were acquired by an exporter before the Convention became effective for the species in question, specifically July 1, 1975 for American ginseng and February 4, 1977 for bobcat, lynx, and river otter, or cases where roots are from cultivated plants.

FINDINGS IN GENERAL

Prior to November 1, 1977, the ESSA for its part approves commercial international export of all American ginseng roots, bobcat, lynx, and river otter pelts obtained from the wild prior to the date of this notice. In addition, the ESSA approves the commercial international export of river otters and American ginseng taken subsequent to this notice, but only if the applicant can prove that the pelts were obtained from one of the 17 States named below in the river otter section, or from Michigan in the case of American ginseng, and only to the extent authorized in that section for each State. Furthermore, all shipments of pelts and roots must carry as an attachment to the required permit copy the information requested by the joint U.S. Fish and Wildlife Service/ESSA notice of August 12, 1977 (42 FR 40979). For river otter pelts and American ginseng roots taken after the date of this notice, such attachments must state for each pelt and pound of roots the State of origin and the season taken. For American ginseng, copies of Michigan permits must be attached also, accounting for all roots. For pelts and roots taken before the date of this notice, this same information must be stated to the extent that it is known. The ESSA will monitor international exports of river otters and American ginseng taken in authorized States, and if necessary will establish dates for each State based on limits stated herein or in any revised findings, after which no further international commercial exports will be allowed of pelts and roots taken in the 1977–78 season. Findings for 1978–79 will be developed after the close of the 1977–78 season.

BOBCAT

Data base. In evaluating the bobcat, the ESSA relied in part on State fur harvest and price reports summarized in Fur Catch in the United States, 1934–70, and more recently on answers to a questionnaire circulated to State agencies by the Fur Resources Committee of the International Association of Fish and Wildlife Agencies, 1970–71 until the present. Data on the number of bobcats killed and recovered per fiscal year were provided by the Federal Animal Damage Control Division (ADC) of the U.S. Fish and Wildlife Service, 1958-present. Other data were obtained from the States and miscellaneous other sources. Little population census information is available (e.g., see 1 and 2).

As noted, fur harvest and price reporting systems vary widely among the States. Therefore, express interstate comparisons should not be made. Where known changes in State policy may have influenced harvest figures, these have been discussed.

Although ADC recovery has been used unqualifiedly by some as an indicator of bobcat population trend (see 3 and 4), the take may reflect certain other factors as well. For example, the number of ADC field people has declined from about 750 in the 1960's to about 400 people at present (see 5). Therefore, it can be inferred that the effort expended has also declined somewhat. To what extent the often tenfold decrease in ADC recovery can be directly attributed to a less than twofold decrease in personnel is unclear.

In addition, it has further been reported that within the past ten years the sheep industry has declined in the West. This occurrence might have led to decline in ADC recovery, because of fewer bobcat-rancher confrontations. Furthermore, ADC implemented a policy change in 1973 which may have influenced recovery at that time, but which would have had no effect on the take in prior years.

Although certain factors not directly related to bobcat abundance may have influenced the ADC recovery, they may not completely account for the general pattern of long-term, substantial decline. Therefore, the ADC figures have been presented as possible but uncertain indicators of bobcat population trend.

Discussion. The bobcat is a secretive animal, widely distributed across the lower forty-eight States, and occupying many habitat types (see 5). In recent years, greatly increased fur prices, far above any measure of inflation, have contributed to an increase in hunting and trapping pressure on the bobcat. In addition, it is generally acknowledged among wildlife professionals that bobcats are easily trapped. For example, Mil-

V42168 AUG 30 77 UMI

ton Caroline, of Texas ADC reported (see 6): "Bobcat psychology is such that, unlike coyote, an experienced trapper can cut into the population without much difficulty."

Population dynamics of bobcat in seven northwestern States (Washington, Oregon, Idaho, Montana, Wyoming, North Dakota, South Dakota) are apparently influenced by densities of rabbit, a primary prey, which fluctuate, although not in predictable cycles (see 1 and 3).

Superimposed on this fluctuating pattern is a possible overall decline in population size as reflected by ADC recovery data, from the early 1960's until the present, perhaps brought by decline in available habitat, reaction to control efforts against other predators (especially coyote; see 7), and especially increased hunting and trapping pressure, particularly from the late 1960's until the present (see 3, 8, 9, and 10).

The intensive trapping effort of the 1970's brought by the sudden increase in price has been imposed on populations subject to natural fluctuations in numbers and possibly involved in a general, long-term decline. Although reported harvest in the 1970's has been great in the northwestern States, recent reported harvests do not always reflect the continual rising price. The inability of State harvests to keep and maintain pace with rising price suggests that bobcat may be already overharvested in at least some States.

The status of the bobcat is more variable outside of the northwest, and discussion is deferred to analysis by State. However, the patterns of the northwestern States occur in whole or part in many other States, and several of these States have initiated protective actions. Increasing harvest in California and in the southern States suggests that peak harvest may not yet have been reached, perhaps because of lower price than in the North.

The recent history of soaring price followed by rise and then, in some States, drop or destabilization of harvest, coupled with the apparent general lack of adequate State management of harvest, leaves the ESSA without grounds for approval of any commercial bobcat export for the 1977–78 season.

Findings. For the reasons discussed above and analyzed by State below, the ESSA is unable to find that international commercial export of bobcat pelts or products of animals taken from the wild during the 1977–78 season anywhere in the United States after the date of this notice will not be detrimental to the survival of the species. All Convention export permits presently in force or subsequently issued by the MA must conform with this finding. For bobcat pelts and products of animals taken from the wild before the date of this notice, the ESSA finds that export prior to November 1, 1977 will not be detrimental to the survival of the species, but the ESSA is unable to make this general finding for such exports after that date, for reasons stated above.

Lynx

Data base. In evaluating the lynx, the ESSA has relied in part on State fur harvest and price reports summarized in Fur Catch in the United States, 1934–19, and more recently on answers to a questionnaire circulated to State agencies by the Fur Resources Committee of the International Association of Fish and Wildlife Agences, 1970–71 until the present. Other useful data were obtained from the States and miscellaneous other sources. ADC data on lynx were too scanty to be of any value. As in the case of bobcat, little population census information was available. Use of these data was constrained by the same considerations discussed for the bobcat, above.

Discussion. It has been widely documented that populations of lynx cycle in response to changes in density of snowshoe hare, a major prey (see 11, 12, and 13). Early post partum mortality of kittens (probably starvation related) and reduced conception rates among yearlings may contribute to the decline in lynx population (see 13).

Based on radio tracking data which show that lynx in Alaska range further and spend more time hunting during years of low prey density, Berrie (see 12) postulated that lynx are disproportionately vulnerable to trapping in "low" years. If trapping during those years is not prohibited, he predicted that a progressive dampening in amplitude of the lynx cycle would result, because the time lag between increases of hare and lynx would lengthen. Eventually lynx might be reduced to isolated pockets in the most remote parts of Alaska.

A similar prediction has been made by C. Brand, University of Wisconsin. Brand stated orally that for lynx in Alberta, Canada, the time lag between hare and lynx expansions, which has been about one year in the past, will lengthen due to increased trapping pressure. Unless the season is completely closed during years of lows and expansion, local and regional extinctions may occur. Brand has recommended that the Alberta government close the season now, because this year the population of hares should begin to expand.

More recently, Berrie (see 14) reported that in central Alaska, lynx should be emerging from a low in 1977–78. Although there is apparent asynchrony in cycles between different populations of Alaska lynx (see also 15), the next high is not expected until 1981 or 1982. A price per pelt of up to $350.00 led to an intensive trapping effort last season. This year, with the pipeline construction efforts decreasing, Berrie predicted an increase in the trapping force because of rising unemployment. In addition, Berrie reported that the capacity of individual trappers utilizing snowmobiles and new oil roads has apparently increased three times beyond the capacity of the most ambitious trapper utilizing dogs.

Lynx are much less widely distributed throughout the lower 48 States and have been reported extirpated in Massachusetts, New York, North Dakota, and South Dakota (see 16). Where they do occur, lynx are generally scarce on transient, but have been subject to increased trapping pressure recently due to increased pelt prices. Discussion of lynx status in the lower 48 States is deferred to the analyses by State.

Finding. For the reasons discussed above and analyzed by State below, the ESSA is unable to find that international export of lynx pelts or products of animals taken from the wild during the 1977–78 season anywhere in the United States after the date of this notice will not be detrimental to the survival of the species. All Convention export permits presently in force or subsequently issued by the MA must conform with this finding. For lynx pelts and products of animals taken from the wild before the date of this notice, the ESSA finds that export prior to November 1, 1977 will not be detrimental to the survival of the species, but the ESSA is unable to make this general finding for such exports after that date, for reasons stated above.

River Otter

Data base. In evaluating the river otter, the ESSA has relied in part on State fur harvest and price reports summarized in Fur Catch in the United States, 1934–70, and more recently on answers to a questionnaire circulated to State agencies by the Fur Resources Committee of the International Association of Fish and Wildlife Agencies, 1970–71 until the present. The use of these data was constrained by the considerations discussed under bobcat above. Other useful data were obtained from several States and miscellaneous other sources. As in the cases of bobcat and lynx, no real population censuses were available.

Discussion. River otters are carnivorous mammals occurring in fresh and brackish water. They are widely distributed across the United States, but have experienced range reductions in certain areas (e.g., see 17). Probably because of the river otter's role in the aquatic food chain, varying levels of pesticides have been found in their tissue, but the ultimate effects of these toxins are generally unknown (see 18).

River otter fur has traditionally been highly valued, and the price has been high but relatively constant, excepting a general increase in 1976–77. Besides price incentives, the annual harvest of river otter may reflect availability and price of other more easily taken furbearers (e.g., muskrat and nutria), which may deflect trapper interest. In addition, trapping of river otter is apparently much easier in periods of drought and low water level (see 19). Low water levels often concentrate fish preys of river otter in creeks and rivers where river otters are trapped, leading to increased concentration of river otters in given areas. This increased concentration facilitates greater and possibly excessive harvests.

According to available information, the river otter is fully protected in 23 of 50

States. The river otter has been reported as extirpated in Colorado, Indiana, Kansas, Kentucky, Nebraska, North Dakota, Oklahoma, and West Virginia (see 16). In the remaining States, few patterns in reported harvest have emerged, and discussion of these is deferred to the analyses by State. In numerous States, reported harvests suggest no danger to populations from continued international export: *Provided*, That export is monitored and limited.

Finding. For the reasons discussed above and analyzed by State below, the ESSA is unable to find that international export of river otter pelts or products of animals taken from the wild during the 1977–78 season from 33 of the 50 United States after the date of this notice will not be detrimental to the survival of the species. All Convention export permits presently in force or subsequently issued by the MA for commercial export of river otters originating in these 33 States must conform with this finding.

For the reasons discussed above and analyzed by State below, the ESSA is able to find that international commercial export of river otter pelts or products of animals taken in the following States during the 1977–78 season will not be detrimental to the survival of the species, if State harvests are limited to the number specified:

State:	*Allowable export*
Alaska	2,114
Delaware	37
Georgia	335
Louisiana	3,923
Maine	354
Maryland	165
Masssachusetts	68
Michigan	551
Montana	36
New Hampshire	114
New York	272
North Carolina	1,195
Oregon	249
South Carolina	430
Virginia	396
Washington	618
Wisconsin	458

No actual population estimates were available, and the export limits have been based upon reported harvest. Because the fur harvest data used in computation of the appropriate limits are subject to the vaguaries discussed above, the approach used by the ESSA has been conservative, to insure that the specified limits will not be detrimental to the survival of the species.

To compute a statistic indicating what total take for the 1977–78 season in each State would not be detrimental to the survival of the species, the following procedure was used:

1. The mean annual river otter fur harvest of all seasons reported in the State's record was computed. In certain cases, unusually high harvests were not included in computing the mean.
2. Seasons which were followed by at least a 25 percent decrease in take the following season and whose harvests exceeded the mean computed in step 1 were determined.
3. The mean annual river otter fur harvest was recomputed, eliminating the harvests of the seasons determined in step 2 from the calculation. This final mean is considered a safe take for the 1977–78 season, having eliminated the skewing influence of seasons whose takes may have been detrimentally excessive. It has been reported that 99+ percent of raw American wild furs (excluding mink) are exported for processing overseas. Therefore, the final means, as computed above for each State, should serve as adequate export limits.

All Convention export permits presently in force or subsequently issued by the MA for commercial export of river otter originating in these 17 States must conform with this finding. Exports of river otter taken from the wild during the 1977–78 season from these 17 States will be permitted until the ESSA determines that these limits have been reached. Such exports will also be conditional on adequate documentation on State of origin and season of taking.

For river otter pelts and products of animals taken from the wild before the date of this notice, the ESSA finds that export prior to November 1, 1977, will not be detrimental to the survival of the species, but the ESSA is unable to make this general finding for such exports after that date, for reasons stated previously.

American Ginseng

Data base and discussion. American ginseng is closely related to *Panax ginseng*, a plant whose roots have been used as a panacea (hence the generic name) and an aphrodisiac in the Far East for thousands of years (see 20 and 21). The American plant was discovered in Canada by a Jesuit in the early 18th century after he read of the medicinal qualities attributed to the Asian species (see 22, 23, and 24). Soon after the discovery, the Jesuits began to export the American roots to China.

Exports continued until the middle of the 18th century, when a lot collected out of season was shipped to China without proper drying. This resulted in a distrust of the American product causing the market to crash. However, the export trade was soon picked up by the American colonies as American ginseng was discovered with the expanding settlement of Eastern North America. In 1788, Daniel Boone collected more than 12 tons in what is now West Virginia and Kentucky to sell in Philadelphia.

By the late 19th century, much of the original habitat for American ginseng, hardwood forests, had been cut and more than 150 years of collecting pressure had taken its toll. Depletion of the plant prompted enactment of several Province and State statutes in Canada and the United States, to protect private resources and to establish collecting seasons (e.g., Acts and Joint Resolutions of Virginia 1875–1876, Chapter 90, and Acts of West Virginia, 11th session, 1872–73, Chapter 158). In 1898, Nash (see 25) noted: "It (American ginseng) grew abundantly over large areas in these States (he listed 28), but it has been so energetically hunted, and at the same time the forest area has been so diminished, that the supply is greatly reduced. In Canada it is pretty generally distributed throughout Ontario and Quebec, but it has now become rather scarce."

There is a large volume of botanical literature qualitatively documenting the impact of habitat modification and collecting on American ginseng. In 1848, Asa Gray (see 26), in the first edition of "A Manual of the Botany of the Northern United States", noted that the plant was "not common." Eight years later he noted in the second edition (see 27) that it was "becoming rare." In 1931, Harned (see 28) wrote: "At the present rate of foreign shipment it is only a matter of a short time when wild ginseng will be almost as rare in the United States as it is now in China." Other botanists (see 29, 30, and 31) have commented on the increasing rarity of American ginseng.

To meet the demand for the American roots a boom in commercial cultivation took place in the late 19th century. However, by 1904 overproduction, disease, and the slow growth of the plants (up to 2 years to germinate and 5–7 years to maturity), ruined many of the get-rich-quick ginseng farmers.

Despite the numerous initial difficulties encountered, American gingseng was successfully cultivated and continues to be exported along with roots obtained from the wild. The following table shows total exports in pounds of wild and cultivated plants, average prices per pound in dollars, and total exports in dollars.

V 42 168 AUG 30 77 UMI

Table of Exports of American Ginseng from the United States[1]

Year	Pounds exported	Average price	Total value
1822	153,717	$0.42	$313,943
1841	640,967	.71	437,245
1861	346,577	.84	292,899
1871	114,221	1.04	119,385
1881	338,841	1.65	561,545
1891	283,000	3.39	959,992
1901	149,069	5.38	801,672
1911	153,999	7.06	1,089,202
1921	182,000	8.28	1,507,000
1931	265,000	7.26	1,922,000
1941	129,000	8.51	1,098,000
1916	186,000	12.10	2,251,000
1951	76,999	17.58	1,353,282
1954	112,347	15.26	1,714,191
1960	179,523	18.22	3,281,989
1961	131,000	17.65	2,322,000
1962	141,000	17.60	2,481,000
1963	136,000	20.65	2,844,000
1964	138,000	19.65	2,732,000
1965	116,791	23.72	2,887,310
1966	173,405	25.13	4,358,542
1967	116,135	30.84	4,507,152
1968	133,701	32.61	4,359,524
1969	145,292	38.06	4,433,408
1970	162,689	30.81	5,016,951
1971	168,835	34.51	5,827,289
1972	227,549	39.21	8,922,426
1973	183,136	48.30	8,846,112
1974	216,832	51.37	11,116,787
1975	249,854	50.61	12,595,062
1976	239,754	53.93	17,856,435
1977 (through May)	51,672	62.29	3,218,540

[1] Export totals from 1951 and 1965–76 are from U.S. Bureau of Census Records (see 32). Average prices were calculated. Export totals and average prices from 1822–61, excluding 1954, are from Hardacre (see 24).

It is important to note that the figures from 1881 to present represent sums of both wild and cultivated roots. Thus the average prices do not indicate the increasing price differences between wild roots and cultivated roots. Prices have traditionally varied with the origin and quality of the roots. The most desirable are the wild roots that are in the shape of a man.

Unfortunately, continuous data are not available to determine the quantities of wild roots exported. In 1974, Patty (see 33 and 34) noted that the U.S. Census of Agriculture reported an 88,600 pound harvest of cultivated American ginseng in 1954 (after 1954, Agriculture did not solicit data on American ginseng production). Thus in 1954, at least 23,747 pounds of wild roots were exported. In the same references, Patty estimated that over half of the roots then being exported were cultivated. In 1976, Patty (see 35) estimated that 65,000 pounds of wild roots were exported in the 1975–76 season.

Almost all of the cultivated and wild American ginseng produced in the United States is exported (see 33 and 36) to the Far East, primarily Hong Kong (see also 32). However, there appears to be a growing domestic market (presumably as a result of the increased interest in natural foods and medicines) (see 37). Much of the domestic market is satisfied by products derived from cultivated *P. ginseng* imported from South Korea. If adequate processing facilities are developed in the United States, cultivated American ginseng could become a larger factor in the domestic market.

The domestic market may never compete with the high prices offered in the Far East for wild American ginseng as long as exports continue Geczi (see 38) noted that while cultivated roots were priced at $20–$25 a pound in 1970, wild roots were bringing $40–$45. By 1974 wild roots were up to $70 per pound while cultivated were slightly less than the 1970 prices. One dealer stated orally that prices reached $125 per pound for wild American ginseng in the 1975–76 season. Another dealer stated orally that he had not paid less than $86 per pound for roots collected in the summer of 1977. Wild *P. ginseng* has been sold by the individual root for thousands of dollars (see 21, also oral communication with a dealer).

Wild American ginseng appears to be second in desirability only to wild *P. ginseng*. Whereas the market for cultivated ginseng is limited (see 39) and subject to competition from South Korea and other countries (see 33, 34, 35, and 36) there is no reason to suspect that the demand for the wild product will cease (see 21).

Traditionally American ginseng collectors have promoted the conservation of the species by digging only mature plants in the fall, and by planting the seeds (see 40). Often stands have been maintained in the forest (woodsgrown) to ensure a steady yield of roots that would simulate the desirable wild type.

However, Patty (see 34, also 40) noted: "In interviewing representatives of the U.S. trade, it appears that there is scarcity of U.S. supply of ginseng from the wild. The major reason is that gatherers tend to dig roots too early in the season—before seeds have been produced or when the roots are too young. There are also too few plants left for reproduction purposes. The high prices prevailing probably encourage this overgathering."

The ESSA is aware of similar abuses in the summer of 1977. At present large stocks of wild American ginseng are being accumulated by dealers before the plants have had a chance to fruit. It is apparent that voluntary conservation measures are not adhered to in the face of prices approaching $100.00 per pound.

Other factors causing concern for the current status of the American ginseng are the origins of the plants and the legal conditions under which the plants are gathered. Most States have trespass statutes pertaining to the protection of private plant resources. Usually these laws require, at minimum, oral permission from the landowners before wild plants can be removed from private property and in some cases require written documentation for the removal and transport of such plants. The removal of resources from most public lands similarly require written documentation. In addition, wild American ginseng is protected in at least Michigan and New York, and Wisconsin has established a collecting season. Most State officials concede that such protective statutes are difficult to enforce and are not generally adhered to by collectors. Appropriate Federal control of wild American ginseng exports may vitalize the State regulatory mechanisms.

The ESSA has received some information indicating that the number of individuals who collect American ginseng has decreased. Dr. Arnold Krochmal, U.S.D.A. Forest Service (see 41), among others, has commented that many Appalachians who traditionally collected American ginseng have moved to urban areas. Although such migrations may lessen collecting pressure in certain areas, they may or may not alleviate overall collecting pressure. In Ohio, recent Appalacian emigrants are reported to be the primary collectors. It also has been suggested that collectors are decreasing because young people do not take up the practice.

In assessing the status of the American ginseng the ESSA has relied heavily on qualitative and quantitative information in the literature, and data and opinions from professional botanists, State officials, persons involved in the ginseng trade, and other interested persons. Detailed knowledge of the distribution and population sizes of American ginseng is not available except for a few States, such as Maine, where the plant apparently has been practically extirpated.

The ESSA is aware that opinions of the plant's status vary with field experience. For example, professional botanists may be less familiar with the plant and its habitat than collectors and may be more inclined to consider the plant rare.

State lists of endangered, threatened, rare, or otherwise specially designated species are noted herein when it was known whether they included or excluded American ginseng. Most of these lists were compiled by one or more professional botanists; however, it is obvious that the content of such lists and their meaning vary depending on the expertise, experience, and the intent of the author(s). Thus, such lists and the terms used must be examined critically. (For a more thorough discussion of the problems involved in compiling such lists and the use of the descriptive terms, see 42.) In addition, although these lists are often produced by State agencies, they have

varying legal meaning. When known, legal implications will be noted along with State statutes that require written documentation for the collection of American ginseng (excluding general laws pertaining to public lands).

As previously discussed, the MA has been issuing permits for the export of wild American ginseng under the conditions specified in 42 FR 40979.

Numerous applications for permits specified the States from which roots were to be obtained. Although these applications are referred to in the State summaries, they are only referenced to indicate that the State is a commercial source.

Finding. The ESSA is unable to find that the export of American ginseng collected in the wild, except in Michigan, during the 1977–78 season after the date of this notice will not be detrimental to the survival of the species. American ginseng may be relatively abundant in some sections of some States. However, the ESSA has no alternative to this finding, in view of the overall decline in the abundance of this plan, the sustained market demand, increasing prices, continuing habitat modification, general lack of management programs or regulatory mechanisms to promote its conservation, and, most importantly, the lack of any positive evidence that the plant will not further decline because of continued export.

The ESSA is sensitive to the fact that many of the people who collect American ginseng are indigent. However, it should be clear that sustained, uncontrolled harvests of the plant cannot continue forever. As was previously discussed, there is no reason to suspect that the market for wild American ginseng will not continue. Thus the ESA urges the States to establish conservation programs and regulatory mechanisms that will enable the ESSA to modify this or future findings. The ESSA is willing to assist the States (as appropriate and within its means) in developing suitable conservation programs and regulatory mechanisms.

For the State of Michigan, the ESSA finds that export of American ginseng collected in the wild after the date of this notice in the 1977–78 season, within the State and in compliance with State law, will not be detrimental to the survival of the species. This finding results primarily from the development of a promising regulatory program by the State, for the purposes of establishing the plant's status and monitoring its harvest, to be elaborated on in the State's analysis below. However, approval of export may be withdrawn at any time, and all shipments must be accompanied by copies of Michigan permits, accounting for all roots.

Analyses by State

Below are discussions and preliminary findings by State for the bobcat, lynx, river otter, and American ginseng. Available data on season, State harvest, price, and ADC recovery (of bobcats only) are summarized for each State in a table with asterisks and associated footnotes providing additional inofrmation. Unless otherwise specified, State harvest data and price are either from Fur Catch in the United States, 1934–70, or from responses to the questionnaire of the Fur Resources Committee, International Association of Fish and Wildlife Agencies. Tabular data by State is not available for American ginseng.

Following tabular information, a narrative section is provided on each species. First, the conclusions of available scientific literature are summarized without critique. Next, a brief but critical discussion is given of available data, including the tabulated data, summarized literature, and data from other sources. For American ginseng, these two sections are combined. Last, a finding is stated. If the ESSA is unable to find that any export will not be detrimental to the survival of the species for pelts or roots taken in the State during the 1977–78 season, then the finding will be stated as "negative." A negative finding may be compelled primarily by lack of evidence, rather than evidence of a stressed or declining population, and, in such instances, the lack of adequate data will be stated in the discussion. If the ESSA finds that some level of export will not be detrimental to the survival of the species, in this notice limited to river otter pelts taken from 17 States and American ginseng collected in Michigan during the 1977–78 season, then the finding will be stated as "positive," and the allowable international export will be stated as a condition to the positive finding. For example, a finding might read: "Positive; total international export of animals taken in State X during the 1977–78 season after the date of this notice may not exceed 400."

In some cases, available information indicates that a species does not occur or is accidental or is completely protected in a State. In such cases, this fact will be stated in the discussion and the finding will be negative. Apparently, none of these four species presently occur in the District of Columbia or has ever occurred in the territories and possessions of the United States, and only for this reason are no analyses given for these jurisdictions.

Alabama

Season	Bobcat		River Otter	
	State Harvest	Price per pelt	State Harvest	Price per pelt
1960 to 1961	6	----------	296	----------
1961 to 1962	19	----------	190	----------
1962 to 1963	50	----------	440	----------
1963 to 1964	50	----------	339	----------
1964 to 1965	30	----------	196	----------
1965 to 1966	83	----------	219	----------
1966 to 1967	90	$1.46	321	$15.65

Bobcat

Literature Review. D. Miller, Auburn University, stated orally that bobcats in Alabama are more dense on southern managed quail plantations than on river bottom, their ideal habitat. They are less dense in the northern part of the State. Miller thought that bobcats are common despite heavy trapping. In 1971, Jenkins (see 43) noted that bobcats are widely hunted at night with lights, apparently making serious inroads in the population in certain areas of Southern Alabama.

Discussion. The data available to the ESSA are insufficient to support a positive finding for international export of bobcat taken in Alabama.

In addition, Alabama has not established an annual limit on bobcat harvest based on the animal's population status, nor has the State established a tagging system to enforce such limits.

Finding. Negative.

Lynx

Discussion. The lynx apparently does not occur in Alabama (see 16).

Finding. Negative.

River Otter

Discussion. The data available to the ESSA are insufficient to support a positive finding for international export of river otter taken in Alabama.

In addition, Alabama has not established an annual limit on river otter harvest based on the animal's population status, nor has the State established a tagging system to enforce such limits.

Finding. Negative.

American Ginseng

Literature Review and Discussion. The data available to the ESSA are insufficient to support a positive finding for international export of American ginseng collected in Alabama.

Mohr (see 44, also 45) in 1890 noted that American ginseng was: "Not infrequent in rich woods through N. half of the State. Commanding a high market price, considerable quantities are exported from the mountainous region of the Tennessee basin." More recently, Delcourt and Delcourt (see 46) noted herbarium records for four counties and literature references to two additional counties.

American ginseng is included as an endangered species in "Endangered and Threatened Plants and Animals of Alabama" (see 47). Steve Guy, Alabama State Forester's Office, stated orally that American ginseng is restricted to northern Alabama and that it is rare.

The MA has forwarded to the ESSA one permit application for international export of wild American ginseng collected in Alabama.

V 42 168 A AUG 30 77 UMI

In addition, Alabama has neither management programs nor regulatory mechanisms to promote the conservation of American ginseng and to regulate harvest.

Finding. Negative.

BOBCAT

Discussion. The ESSA has no information that the bobcat occurs in Alaska.

Finding. Negative.

LYNX

Literature Review. Several studies have documented that populations of lynx cycle in response to changes in density of snowshoe hare, a major prey (see 11, 12 and 13). Early post partum mortality of kittens (probably starvation related) and reduced conception rates among yearlings may contribute to the decline in lynx populations (see 13).

Based on radio tracking data indicating that lynx in Alaska ranged further and spent more time hunting during years of low prey density, Berrie (see 12) postulated that lynx are disproportionately vulnerable to trapping in "low" years. If trapping during low years is not prohibited, he predicted that the time lag between increases of hare and lynx would lengthen causing a progressive dampening in amplitude of the lynx cycle. Thus, lynx might be reduced to isolated pockets in the remote parts of Alaska.

The last population low occurred about 1967–1970, but the fur harvest was about double that of previous lows, apparently because of increased fur prices (see 15). Most recently, Peter M. Berrie in a letter to the ESSA (see 14) reported that the lynx in central Alaska should be emerging from a low in 1977–78, complicated by apparent asynchrony of different populations in Alaska between lynx cycles (see also 15). The next general high is not expected until 1981 or 1982. A price of $350.00 per pelt prompted an intensive trapping effort last season. This year, with the pipeline construction nearing completion, Berrie predicts an increase in trapping force from rising unemployment. In addition, the capacity of individual trappers utilizing snowmobiles and new oil roads has apparently increased three times beyond the capacity of the most ambitious trapper utilizing dogs.

Discussion. State harvest records from 1934 until the present indicate a large scale variable harvest, consistently high since 1962. The trapping season was extended by two months in 1963 to meet demand for the prime pelts available in February and March, and available price information shows a high level fur price from 1965 until the present. For these reasons, current high take figures reflect increased interest in lynx fur rather than increase in population size.

In 1975, the reported State harvest dropped to 3846 following a reported harvest of 8970, the highest on record, while the price rose from $125 to $200. Although this decline may reflect a normal cyclic decline in lynx abundance, it may also reflect an overstressed population.

Alaska lynx populations appear to be at a low, probably because of normal cyclic decline, perhaps coupled with trapping pressure. Considering that lynx populations may disproportionately vulnerable to trapping in low years and that high pelt price is likely to cause intense trapping pressure in 1977–78, it is impossible to conclude that continued international export of lynx from Alaska will not be detrimental to the survival of the species.

In addition, Alaska has not established an annual limit on lynx haverst based on the animal's population status, nor has the State established a tagging system to enforce such limits.

Finding. Negative.

RIVER OTTER

Discussion. The reported State harvest over the past forty years varied from 1200–4000, although harvest since 1968 has been generally more uniform and lower than previously.

Because reported harvest has been relatively stable and because pelt price has risen only gradually over the past 15 years, the wild population apparently can support an annual harvest. However, the consistently low yield since 1968 gives some cause for concern, and may reflect low population levels or decreased trapping effort. Because the ESSA cannot distinguish between these two factors, a positive export finding will be made but will be based upon the last 9 years reported harvest alone.

Finding. Positive; total international export of river otters taken in Alaska during the 1977–78 season after the date of this notice may not exceed 2114.

AMERICAN GINSENG

Discussion. The ESSA does not have any information that American ginseng occurs in Alaska.

Finding. Negative.

Arizona

Season	Bobcat		
	State harvest	Price per pelt	ADC recovery

1974 to 1975			47
1975 to 1976			67
1976 to 1977	7,272		

Literature Review. In 1971, Small (see 49) reported no evidence of interspecific competition for food between bobcat and coyote or grey fox.

Discussion. The data available to the ESSA are insufficient to support a positive finding for international export of bobcat taken in Arizona.

The major decrease in ADC recovery since 1964 suggests actual population decline in Arizona, but the inadequacy of these data draw into question any conclusions based upon them.

Robert Jackson, Arizona Game and Fish Commission, stated orally that Arizona will establish a season for the bobcat in 1977–78 and will require a trapping license for the first time in 1978, in part to restrict trapper immigration from adjoining States. However, Arizona has not established an annual limit on bobcat harvest based on the animal's population status, nor has the State established a tagging system to enforce such limits.

Finding. Negative.

LYNX

Discussion. The ESSA has no information that the lynx occurs in Arizona.

Finding. Negative.

RIVER OTTER

Discussion. The river otter is completely protected by Arizona law (see 54).

Finding. Negative.

AMERICAN GINSENG

Discussion. The ESSA has no information that American ginseng occurs in Arizona.

Finding. Negative.

BOBCAT

Literature Review. In 1971, Jenkins (see 43) reported that: "Bobcat is common and widespread • • • It is generally considered a nuisance animal in Arkansas."

Discussion. The data available to the ESSA are insufficient to support a positive finding for international export of bobcat taken in Arkansas.

The reported State harvest for 1972 exceed all previous reports in the last two decades, and apparently correlate directly with pelt price. In addition, Arkansas has not established an annual limit on bobcat harvest based on the animal's population status, nor has the State established a tagging system to enforce such limits.

Finding. Negative.

LYNX

Discussion. The lynx apparently does not occur in Arkansas (see 16).

Finding. Negative.

RIVER OTTER

Discussion. The data available to the ESSA are insufficient to support a positive finding for international export of river otter taken in Arkansas.

The reported river otter harvest in Arkansas has been less than 100 since 1967. Furthermore, the last two years reported harvest were exceptionally low (25, 37), although pelt price was relatively high. This suggests that the population may be declining.

In addition, Arkansas has not established an annual limit on river otter harvest based on the animal's population status, nor has the State established a tagging system to enforce such limits.

Finding. Negative.

AMERICAN GINSENG

Literature Review and Discussion. The data available to the ESSA are insufficient to support a positive finding for international export of American ginseng collected in Arkansas.

Crow (see 50) noted in the "Arkansas Natural Area Plan": "Ginseng has been dug and sold to dealers in drug plant materials over a period of many years. The extremely high prices paid for the roots of ginseng in recent years have no doubt contributed to its depletion in some sections of the State. It is still locally abundant in many upland sections of the State but is difficult to find in many areas where it formerly grew."

In a letter to the U.S. Fish and Wildlife Service (see 51), Dr. Edwin B. Smith, University of Arkansas, commented: "*Panax quinquefolius L.* is rare in Arkansas, and • • • occurs in small populations. The populations are small enough (perhaps 5–20 plants) that it is certainly in danger of local extinction. On the other hand, the few times I have seen it have always been times when I was collecting in remote areas (difficult to get into); so it may be protected more or less by its remoteness from well-traveled areas." Dr. Smith provided a map indicating the occurrence of American ginseng in 12 Arkansas counties (see also 46), but advised that the plant may occur elsewhere.

In contrast, Dr. Gary E. Tucker, Arkansas Tech University, commented (see 52) that based on his field experience, American ginseng was locally common in many upland areas of the State and the plant's present distribution was not significantly different from its historic distribution. However, he added that the plant should be protected based on its status throughout its historical range and not on a State-by-State basis. He expressed concern that substantial collecting pressures may develop in Arkansas if wild American ginseng exports were banned for numerous other States while exports were allowed for roots collected in Arkansas.

Botanists that commented on the status of wild American ginseng in Arkansas vary widely in their opinions. Some sections of Arkansas may be capable of supporting a sustained harvest of American ginseng. However, Arkansas has neither management programs nor regulatory mechanisms to promote the conservation of American ginseng and to regulate a harvest.

Finding. Negative.

[1] Lynx and bobcat.

BOBCAT

Discussion. The data available to the ESSA are insufficient to suport a positive finding for international export of bobcat taken in California.

The major decrease in ADC recovery since 1964 suggests actual poulation decline in California, but the inadequacy of these data draw into question any conclusions based upon them. The reported State harvest declined from a high in 1943–1944 and remained low until the 1970's, when it began to rise at the same time that pelt price increased. Apparently high pelt price has intensified trapper effort.

In addition, California has not established an annual limit on bobcat harvest based on the animal's population status, nor has the State established a tagging system to enforce such limits.

Finding. Negative.

LYNX

Discussion. The lynx apparently does not occur in California (see 16).

Finding. Negative.

RIVER OTTER

Discussion. The river otter is completely protected by California law (see 54).

Finding. Negative.

AMERICAN GINSENG

Discussion. The ESSA has no information that American ginseng occurs in California.

Finding. Negative.

[1] Harvest and price data since 1970, personal comm., R. Tully, Colorado Division of Wildlife, Aug. 15, 1977.

Literature Review. In 1971, Sandfort and Tully described the bobcat as "very common," and noted that it appeared to "hold its own despite reductions induced by predator control programs" (see 55).

Discussion. The data available to the ESSA are insufficient to support a positive finding for international export of bobcat taken in Colorado.

The major decrease in ADC recovery since 1958 suggests actual population decline in Colorado, but the inadequacy of these data draw into question any conclusions based upon them. State reported harvest, based upon pelts sold within the State, showed a significant drop in the 1974–75 season. However, Robert J. Tully, Colorado Department of Natural Resources, has stated orally that surveys of hunters and trappers indicated a harvest of 3678 pelts in 1974. The decreased reported State harvest in 1974–75 could have resulted from declining population, decreased sales within the State, or decreased trapper effort. Decreased trapper effort is unlikely because of high pelt price, but either decreased population size or decreased sales within the State may have contributed to the drop in reported harvest, and the ESSA is unable to distinguish between these factors. The uncertain relationship between actual harvest and reported harvest, that may be considerably lower, weakens further the usefulness of the data.

In addition, Colorado has not established an annual limit on bobcat harvest based on the animal's population status, nor has the State established a tagging system to enforce such limits.

Finding. Negative.

LYNX

Discussion. The lynx is completely protected by Colorado law (see 54).

Finding. Negative.

RIVER OTTER

Discussion. The river otter is apparently extirpated and completely protected by Colorado law (see 16 and 54).

Finding. Negative.

AMERICAN GINSENG

Discussion. The ESSA has no information that American ginseng occurs in Colorado.

Finding. Negative.

Connecticut

[1] Personal comm., D. DeCarli, Connecticut Department of Environmental Protection, Aug. 8, 1977.

BOBCAT

Discussion. The bobcat is completely protected by Connecticut law (see 54).

Finding. Negative.

LYNX

Discussion. The lynx is completely protected by Connecticut law (see 54).

Finding. Negative.

RIVER OTTER

Discussion. The data available to the ESSA are insufficient to support a positive finding for international export of river otter taken in Connecticut.

Reported State harvest in Connecticut is very low, probably indicating a small river otter population, though perhaps also reflecting lack of trapper effort (see 54).

In addition, Connecticut has not established an annual limit on river otter harvest based on the animal's population status, nor has the State established a tagging system to enforce such limits.

Finding. Negative.

AMERICAN GINSENG

Literature Review and Discussion. The data available to the ESSA are insufficient to support a positive finding for international export of American ginseng collected in Connecticut.

American ginseng is included as a State Endangered species in "Rare and Endangered Species of Connecticut and Their Habitats" (see (56): "Formerly common in rich woods and on rocky hillsides, this species is now local and rare throughout most of its range. Extermination by commercial root hunters has been held principally responsible for its present rarity in the East. Recent reports show it to be very rare and local in Connecticut." Theodore Bampton, Connecticut Department of Environmental Protection, stated orally that he was not aware of any commercial collecting activities in the State.

In addition, Connecticut has neither management programs nor regulatory mechanisms to promote the conservation of American ginseng and to regulate harvest.

Finding. Negative.

Delaware

Season	River Otter

[1] Harvest and price data, personal comm., L. Alexander, Aug. 8, 1977.

V 42 168 AUG 30 77 UMI

BOBCAT

Discussion. The bobcat apparently does not occur in Delaware (see 16 and 57).

Finding. Negative.

LYNX

Discussion. The lynx apparently does not occur in Delaware (see 16 and 57).

Finding. Negative.

RIVER OTTER

Discussion. The reported Delaware harvest since 1960 has never exceeded 50 and has been fairly regular, although based on rough estimates. In addition, the reported pelt price is not exceptionally high.

In a letter to the ESSA, H. Lloyd Alexander (see 57), Delaware Department of Natural Resources and Environmental Control, noted that river otter populations in Delaware were low during the 1960's, possibly because of pesticides. He further noted that the river otter population has recovered since the late 1960's and that trapping effort is not intense in the State.

Consequently, the ESSA is able to find that international export of river otter taken in Delaware during the 1977–78 season will not be detrimental to the survival of the species in that State. However, the total international export may not exceed a quota established by the method described in the species summary for river otter.

Finding. Positive; total international export of river otters taken in Delaware during the 1977–78 season after the date of this notice may not exceed 37.

AMERICAN GINSENG

Literature Review and Discussion. The data available to the ESSA are insufficient to support a positive finding for international export of American ginseng collected in Delaware.

In 1941, Tatnall (see 58) noted that American ginseng was infrequent in the woodlands of two valleys in one county in Delaware. Dr. C. W. Dunham, University of Delaware stated orally that American ginseng has always been rare in Delaware and that he was not aware of any commercial collecting in the State.

In addition, Delaware has neither management programs nor regulatory mechanisms to promote the conservation of American ginseng and to regulate harvest.

Finding. Negative.

BOBCAT

Literature Review. In 1971, Jenkins reported that the bobcat was "common" throughout Florida, and is "in little danger," although widely hunted (see 43).

Discussion. The data available to ESSA are insufficient to support a positive finding for international export of bobcat taken in Florida.

The reported State harvest data are insufficient to assess the current status of bobcat in Florida. In addition, Florida has not established an annual limit on bobcat harvest based on the animal's population status, nor has the State established a tagging system to enforce such limits.

Finding. Negative.

LYNX

Discussion. The lynx apparently does not occur in Florida (see 16).

Finding. Negative.

RIVER OTTER

Literature Review. In 1963, McDaniel reported that low water levels increase the number of river otters harvested, by concentrating their prey, fish, and restricting their habitat in creeks and rivers. He recommended that trapping season be shortened during drought. McDaniel expressed doubt as to the value of State harvest reports in showing the actual harvest in Florida. In one case, a dealer revealed that he had purchased

4500 hides in 1961–1962, exceeding the harvest for the entire State (see 19).

Discussion. The data available to ESSA are insufficient to support a positive finding for international export of river otter taken in Florida.

Although Florida may be capable of supporting a sustained yield of river otter, the data are inadequate to assess the status of the species in the State. In addition, Florida has not established an annual limit on river otter harvest based on the animal's population status, nor has the State established a tagging system to enforce such limits.

Finding. Negative.

AMERICAN GINSENG

Discussion. The ESSA has no information that American ginseng occurs in Florida.

Finding. Negative.

[1] No open season.
[2] Prior to this season, trappers were not required to report.

BOBCAT

Literature Review. In 1971, Jenkins reported that bobcat was common across Georgia, but particularly in the coastal plain and where protected (see 43).

Discussion. The data available to the ESSA are insufficient to support a positive finding for international export of bobcat taken in Georgia. Although Georgia may be capable of supporting a sustained yield of bobcat, the data are inadequate to assess the status of the species in the State. In addition, Georgia has not established an annual limit on bobcat harvest based on the animal's population status, nor has the State established a tagging system to enforce such limits.

Finding. Negative.

LYNX

Discussion. The lynx apparently does not occur in Georgia (see 16).

Finding. Negative.

RIVER OTTER

Literature Review. In 1962, Golley reported that river otters were fairly common on the coastal plain and in the salt marshes, rare on piedmont just above the fall line, and absent in the northern piedmont region and in the mountains (see 59).

Discussion. The reported Georgia harvest has been consistently higher in the 1960's and 1970's than in previous years, but no specific patterns emerge that give cause for concern. Pelt price has risen only gradually over the last 10 years. Consequently, the ESSA is able to find that international export of river otters taken in Georgia during the 1977–78 season will not be detrimental to the survival of the species in that State. However, the total international export may not exceed a quota established by the method described in the species summary for river otter, excluding the 1965–66 harvest which was the second highest reported for the State.

Finding. Positive; total international export of river otters taken in Georgia during the 1977–78 season after the date of this notice may not exceed 335.

AMERICAN GINSENG

Literature Review and Discussion. The data available to the ESSA are insufficient to support a positive finding for international export of ginseng collected in Georgia.

Delcourt and Delcourt (see 46) noted American ginseng herbarium records for seven counties and literature references to two additional counties. However, in a letter to the U.S. Fish and Wildlife Service (see 60), Jerry McCollum, Georgia Department of Natural Resources, noted that the plant occurred in 26 counties. McCollum also noted that he did not consider the plant to be endangered currently, but that he thought commercial collection should be regulated to prevent the plant's status from deteriorating.

American ginseng has been included in several lists of rare and endangered Georgia plants: "Rare and Endangered Vascular Plants of Georgia," Wilbur H. Duncan (see 61); "Rare and Endangered Plant Species of Georgia," Georgia Botanical Society (see 62); and "Endangered Species of Georgia" (listed as Endangered), McCollum (see 63).

The MA has forwarded to the ESSA one permit application for international export of wild American ginseng collected in Georgia.

Mellinger (see 64) referred to the extirpation of American ginseng in one location in Georgia. The State was mentioned as a major commercial source of the roots in Wigginton (see 40).

The Georgia Wildflower Preservation Act of 1973 (see Ga. laws 1973, p. 373 et seq.) provides substantially for the conservation of plants listed as Endangered or Threatened by the Georgia Department of Natural Resources or the U.S. Department of the Interior. American ginseng is not listed under the Georgia Act; however, Jerry McCollum has stated orally that his Department was formally petitioned to list the species.

American ginseng has been considered a rare and endangered species by several professional and amateur botanists familiar with the Georgia flora. However, some sections of Georgia may be capable of supporting a sustained harvest of the plant. The Georgia Act generally prohibits taking, transport, or commerce in listed species except by permits issued by the Georgia Department of Natural Resources. Currently, American ginseng is not protected by the Georgia Act, and there is insufficient evidence to support a positive finding by the ESSA for export of wild American ginseng collected from the State. In the event American ginseng is listed under the Georgia Act, or protected by other mechanisms that would provide for its conservation and regulate its harvest in the State the ESSA may modify its finding for the 1977–78 season or subsequent seasons.

Finding. Negative.

HAWAII

Discussion. The ESSA has no information that the bobcat, lynx, river otter, or American ginseng occur in Hawaii.

Finding. Negative.

[1] Lynx and bobcat

BOBCAT

Literature Review. Bailey (see 1) studied the bobcat in a rugged area of southeastern Idaho, and he found that few kittens were trapped following a crash in the local rabbit population during the winter of 1971–72.

Discussion. The data available to the ESSA are insufficient to support a positive finding for international export of bobcat taken in Idaho.

The major decrease in ADC recovery since 1958 suggests actual population decline in Idaho, but the inadequacy of these data draw into question any conclusions based upon them.

The last two State harvest reports are the lowest since 1957 despite the highest prices ever offered for bobcat pelts in Idaho. Although not conclusive, this suggests an overstressed population.

In addition, Idaho has not established an annual limit on bobcat harvest based on the animal's population status, nor has the State established a tagging system to enforce such limits.

Finding. Negative.

LYNX

Literature Review. In 1971, Nellis reported that lynx were "rare to common" in Idaho: "Data are not extensive enough to show whether the lynx in the northwest is cyclic or not, but drastic fluctuations in numbers do occur." Nellis reported that the population had increased over the past thirty years, with most animals in the northern half of the State (see 65).

Discussion. The data available to the ESSA are insufficient to support a positive finding for international export of lynx taken in Idaho.

Fur harvest from 1969–1975 suggests either that the population is cyclic and was at a low phase in 1974–1975 or that trapping pressure in the early 1970's, due to high prices, has reduced the population. In either case, the lynx in Idaho may be particularly vulnerable to trapping pressure at present.

In addition, Idaho has not established an annual limit on lynx harvest based on the animal's population status, nor has the State established a tagging system to enforce such limits.

Finding. Negative.

RIVER OTTER

Discussion. The river otter is completely protected by Idaho law (see 54).

Finding. Negative.

AMERICAN GINSENG

Discussion. The ESSA has no information that American ginseng occurs in Idaho.

Finding. Negative.

ILLINOIS

BOBCAT

Discussion. The bobcat is completely protected by Illinois law (see 54).

Finding. Negative.

LYNX

Discussion. The lynx apparently does not occur in Illinois (see 16).

Finding. Negative.

RIVER OTTER

Discussion. The river otter is completely protected by Illinois law (see 54).

Finding. Negative.

AMERICAN GINSENG

Literature Review and Discussion. The data available to the ESSA are insufficient to support a positive finding for international export of wild American ginseng collected in Illinois.

American ginseng was considered "infrequent" in Illinois in 1876 by Patterson (see 66). Jones and Fuller (see 67) noted that American ginseng had been collected in 29 counties. Dr. Charles Sheviak, Endangered Plant Project/Natural Land Institutes supplied herbarium records (see 68) of the plant from 57 counties. In 1959, Mohlenbrock and Voigt (see 69) noted that in southern Illinois American ginseng "is rare in moist woods. It has become uncommon because of mass collections of its roots during past years."

The Illinois Nature Preserves Commission has included American ginseng as a threatened species in an interim list of plant species, "Endangered, Vulnerable, Rare, and Extirpated Vascular Plants in Illinois" (see 61). Dr. Charles Sheviak has stated orally that the plant is rare throughout the State and could be easily extirpated except in southern Illinois. He added, however, that plant had been considered too common for inclusion in the list of endangered plants being developed by the Endangered Plant Project.

The MA has forwarded to the ESSA three permit applications for international export of wild American ginseng collected in Illinois. The State was also mentioned as a commercial source in Wigginton (see 43).

Some sections of southern Illinois may be capable of supporting a sustained harvest of American ginseng. However, the State has neither management programs nor regulatory mechanisms to promote the conservation of American ginseng and to regulate a harvest.

Finding. Negative.

INDIANA

BOBCAT

Discussion. The bobcat is completely protected by Indiana law (see 70).

Finding. Negative.

LYNX

Discussion. The lynx apparently does not occur in Indiana (see 16).

Finding. Negative.

RIVER OTTER

Discussion. The river otter is apparently extirpated in Indiana and is completely protected by Indiana law (see 18, 54).

Finding. Negative.

AMERICAN GINSENG

Literature Review and Discussion. The data available to the ESSA are insufficient to support a positive finding for international export of American ginseng collected in Indiana.

Coulter in 1900 (see 71) noted: "Found (American ginseng) only in the southern half of the State and rapidly disappearing because of its commercial value." "It is still abundant in Brown County upon the authority of W. S. Blutchley and is reported as not rare in Fayette County by Dr. Hessler. Its quantity, however, has been so greatly reduced that the 'sang' gatherers have disappeared." Coulter mentioned seven counties where the plant had been found. Forty-six years later Deam (see 72) noted: "Formerly frequent to common in rich woods throughout the State. From the earliest times it was dug for its large roots which were shipped mostly to China for use as a medicine. The earliest pioneers received

twenty-five cents a pound for the dried roots. The fact that the price has steadily advanced, until it now sells for about $15.00 a pound, has resulted nearly in its extinction."

In correspondence to the U.S. Fish and Wildlife Service (see 73), Robert D. Feldt, Indiana Department of Natural Resources, supplied several documents and correspondence concerning the flora of Indiana. Maryanne Newsom, McCormick Creek State Park (see 74) noted: "In the three years I have been at McCormick's Creek, I have seen ginseng go from being fairly easy to find to being practically non-existent. With this rapid decline in the park itself, I can well imagine what is happening to the plant in other unprotected areas. Without some form of control over the indiscriminate * * * harvesting of this plant, ginseng will very soon join the list of Endangered plants, possibly within the next five years if something is not done."

Lois M. Gray, Spring Mill Park (see 75) regarded American ginseng as abundant; however, she expressed the same concerns as Ms. Newsom.

In addition, Mr. Feldt supplied a preliminary State list entitled "Rare and Endangered Plants in Indiana," that was compiled by William B. Barnes, Director, Division of Nature Preserves. This list was limited to those plants that were recorded to occur in six or fewer counties. American ginseng was not included.

In a letter to the U.S.D.A. Foreign Agricultural Service, Andy Irbe, Danville, Indiana, commented that American ginseng does not emerge every year and the plant was producing harvestable amounts in sections of Indiana where he collected it (see 76).

Mr. Edward Hanson, Indiana Department of Natural Resources, stated orally that American ginseng under collecting pressure in certain local areas of Indiana and that the collection appeared to occur year-round.

The MA has forwarded to the ESSA three permit applications for international export of wild American ginseng collected in Illinois.

American ginseng has declined in Illinois and this decline has been attributed to collecting pressure. Some sections of Indiana may be capable of supporting a sustained harvest of American ginseng. However the State has neither management programs nor regulatory mechanisms to promote the conservation of American ginseng and to regulate harvest.

Finding. Negative.

IOWA

BOBCAT

Discussion. The bobcat is completely protected by Iowa law.

Finding. Negative.

LYNX

Discussion. The lynx apparently does not occur in Iowa (see 16).

Finding. Negative.

RIVER OTTER

Discussion. The river otter is only occasionally trapped in Iowa and is or soon may be completely protected by State law.

Finding. Negative.

AMERICAN GINSENG

Literature Review and Discussion. The data available to the ESSA are insufficient to support a positive finding for international export of American ginseng collected in Iowa.

In 1899, Fitzpatrick (see 77) noted that American ginseng was "* * * becoming infrequent" (he listed nine counties where the plant occurred). Dean Roosa, Iowa Conservation Commission, stated orally that he considered the plant threatened. He further noted that he had observed it in central Iowa and that it was probably more prevalent in the more densely wooded northeastern Iowa.

The MA has forwarded to the ESSA two permit applications for international export of wild American ginseng collected in Iowa.

Some sections of Iowa may be capable of supporting a sustained harvest of American ginseng. However, the State has neither management programs nor regulatory mechanisms to promote the conservation of American ginseng and to regulate a harvest.

Finding. Negative.

KANSAS

BOBCAT

Discussion. The bobcat is completely protected by Kansas law (see 54).

Finding. Negative.

LYNX

Discussion. The lynx apparently does not occur in Kansas (see 16).

Finding. Negative.

RIVER OTTER

Discussion. The river otter is completely protected by Kansas law (see 54).

Finding. Negative.

AMERICAN GINSENG

Discussion. The ESSA has no information that American ginseng occurs in Kansas.

Finding. Negative.

KENTUCKY

BOBCAT

Discussion. The bobcat is completely protected by Kentucky law (see 76).

Finding. Negative.

LYNX

Discussion. The lynx apparently does not occur in Kenuteky (see 16).

Finding. Negative.

RIVER OTTER

Discussion. The river otter is virtually extirpated and is completely protected by Kentucky law. (See 54 and 78).

Finding. Negative.

AMERICAN GINSENG

Literature Review and Discussion. The data available to the ESSA are insufficient to support a positive finding for international export of American ginseng collected in Kentucky. Braun (see 79) in 1943 recorded American ginseng in eleven counties in Kentucky. Twenty-eight years later Wharton and Barbour (see 80) noted: "The dried roots, long in demand in Chinese folk medicine and bringing a high price, have been sought, dug, and sold for export. As a result, this native species, once common in most of rich forest of the state, has been exterminated in many places and is now rare throughout Kentucky, as well as in other States. The species should be protected by law from further exploitation, and any plants to be sold should be propagated and grown commercially."

In a letter to the Smithsonian Institution (see 41), Dr. Arnold Krochmal, U.S.D.A. Forest Service supplied the following comments: "I have lived in the Appalachian region over a period of 40 years now, 17 as a student and botanist. Ginseng has always been hard to find, contributing to its high cost. The collection of gingseng has been much reduced in the past twenty years by the outmigration of Appalachian population to urban areas." He also noted that he had "seen increases in ginseng populations in Kenutcky, and * * * (could not) * * * consider it in any way endangered."

American ginseng is included as a threatened species in "A List of Rare, Threatened, or Endangered Flora in Kentucky" (see 61). The plant was not included in the "Endangered Plants and Animals of Kentucky" (see 81).

The MA has forwarded to the ESSA six permit applications for international export of wild American ginseng collected in Kentucky. Wigginton (see 40) also mentioned Kentucky as a commercial source.

The ESSA has received conflicting information on the status of American ginseng in Kentucky. The more recent comments by Krochmal indicate there may be some sections of Kentucky capable of supporting a sustained harvest of the plant. However, the State has neither management programs nor regulatory mechanisms to promote the conservation of American ginseng and to regulate a harvest.

Finding. Negative.

[1] Personal comm., G. Linscombe, Louisiana Wildlife Fisheries Commission, Aug. 1, 1977.

BOBCAT

Literature Review. In 1971, Jenkins reported that bobcats in Louisiana were common and widespread (see 43). In 1976, O'Neil and Linscombe (see 82) reported that the number of bobcat pelts taken was formerly insignificant, but the increased interest in long haired furs has brought higher price and increased harvest. In 1974, Lowry reported that the bobcat was widely distributed over the State and still occurred in nearly all heavily wooded regions (see 83).

Discussion. The data available to the ESSA are insufficient to support a positive finding for international export of bobcat taken in Louisiana.

Increased pelt price in the 1970's has apparently brought a dramatic and unprecedented rise in bobcat harvest. Although Louisiana may be capable of supporting a sustained yield of bobcat, the data are inadequate to assess the status of the species in the State.

In addition, Louisiana has not established an annual limit on bobcat harvest based on the animal's populations status, although the State does tag shipments but not individual pelts.

Finding. Negative.

LYNX

Discussion. The lynx apparently does not occur in Louisiana (see 16).

Finding. Negative.

RIVER OTTER

Literature Review. In 1974, Lowry commented that river otters were probably once distributed statewide in Louisiana, but have become local in occurrence because of major alterations in habitat. Lowry suggested that trapping in southern Louisiana does not appear to adversely affect otter numbers, but that it may be detrimental in the northern part of the State (see 83).

Discussion. Reported State harvest has been high and comparatively regular since 1944, and pelt price has changed little since 1965, excluding 1976–77. Reported State harvest and pelt price both doubled for the 1976–77 season. Greg Linscomb, Louisiana Wildlife and Fisheries Commission, stated orally that the increased harvest was probably caused by an abundance of young river otters rather than increased trapper effort. Consequently, the ESSA is able to find that international export of river otters taken in Louisiana during the 1977–78 season will not be detrimental to the survival of the species in that State. However, the total international export may not exceed a quota established by the method described in the species summary for river otter, excluding the 1976–1977 harvest, which was the highest ever recorded for the State.

Finding. Positive; total international export of river otters taken in Louisiana during the 1977–78 season after the date of this notice may not exceed 3923.

AMERICAN GINSENG

Literature Review and Discussion. Data available to the ESSA are insufficient to support a positive finding for international export of American ginseng collected in Louisiana.

In a letter to the U.S. Fish and Wildlife Service, Dr. Mary G. Curry, VTN Louisiana Inc. (sec 84) commented that American ginseng is known definitely from only one parish in Louisiana, where it is

considered rare (see also 46 and 85). She further noted: "The species should be considered threatened, if not endangered in Louisiana" (see also 85).

In addition, Louisiana has neither management programs nor regulatory mechanisms to promote the conservation of American ginseng and to regulate harvest.

Finding. Negative.

[1] Lynx and bobcat.
[2] Number tagged (total harvest).

BOBCAT

Discussion. The data available to the ESSA are insufficient to support a positive finding for international export of bobcat taken in Maine.

Hunt (see 86) has estimated the total Maine bobcat population to be about 4200. In 1976–77, the State established a limited season on bobcat and began requiring tags on every pelt. Furthermore, a bobcat management plan for the State would establish an ultimate management objective of 1000 bobcats harvested per year, or about 25 percent of the population.

Bobcat pelt price has recently increased in Maine, as across the United States. The potential exists for intensified trapping effort in Maine, although reported harvest has not increased since 1975, but has dropped somewhat. It would appear that Maine may be able to support a sustained annual yield of several hundred bobcats without adversely impacting the population. However, in a March 3, 1977 memorandum to the U.S. Fish and Wildlife Service, Regional Director, the U.S. Fish and Wildlife Service State Supervisor for Maine advised that overharvest may be occurring in many areas (see 87). Widespread demand for bobcat pelts may particularly increase for bobcats in any States for which international export is allowed in 1977–78. Maine has already projected harvest level by management units, and tagging of pelts is required. If Maine would establish appropriate direct limitations on harvest that would prevent overharvest from increased demand, the ESSA would approve international export of pelts taken legally in Maine and carrying Maine tags. Pending this action, the ESSA is unable to find that such international export will not be detrimental to the survival of the species.

Finding. Negative.

LYNX

Discussion. The lynx is completely protected by Maine law (see 88).

Finding. Negative.

RIVER OTTER

Discussion. The reported State harvest of river otter from 1961 through 1970 was fairly regular. From 1971 through 1975 State harvest nearly doubled with generally higher prices per pelt, and the 1974–75 season exceeded the river otter management objective for Maine by about 25 percent (see 89). The reported river otter harvests in the last two seasons returned to more typical levels, but were based on tagging data for the first time, apparently giving lower estimates than the previous reporting methods.

Maine has developed a management plan for river otter on a unit-by-unit basis, and has established a harvest of 800 animals as a management objective. However, the management plan notes that the river otter may be overexploited in some units, suggesting a need to regulate harvest by these areas, and the management plan indicates that Maine may limit the harvest in the near future to allow river otter increase. In addition, Maine now requires a tag on every river otter pelt taken in the State.

Consequently, the ESSA is able to find that international export of river otters taken in Maine during the 1977–1978 season will not be detrimental to the survival of the species in that State. However, the total international export may not exceed a quota established by the method described in the species summary for river otter. Maine may have information justifying modification of this quota, and the ESSA encourages the State to submit comments on this point so that the quota will be tailored as closely as possible to the status of the river otter in Maine.

Finding. Positive; total international export of river otters taken in Maine during the 1977–78 season after the date of this notice may not exceed 354.

AMERICAN GINSENG

Literature Review and Discussion. The data available to the ESSA are insufficient to support a positive finding for international export of American ginseng collected in Maine.

In 1976, Eastman (see 90), in a report on American ginseng prepared for Maine's Critical Areas Program, noted that American ginseng was collected in Maine in the 1920's and that most of the plants in the State have been destroyed because of logging operations and ginseng collectors. In reviewing the status of the plant, Eastman found that: "A thorough review of the literature, consultations with professional and amateur botanists, and field checking indicated references to 14 stations in Maine" (eight counties; see also 91). Several professional botanists contacted by Eastman were not aware of any American ginseng in the areas of the State with which they were familiar. Eastman found only four stations which still had plants, none of which occupied more than 100 square meters.

Kartesz (see 61) noted that American ginseng was included as a rare species in "Types of Critical Areas in Maine Phase I Report." This report was prepared by Garret C. Clough and Paul R. Adamus in 1976.

Two of the four known stands of American ginseng have been registered as "Critical Areas" by the State and a third is also being considered for such designation. "Critical Areas," as designated by Maine's State Planning Office, are natural areas of Statewide importance because of their unusual natural, scenic, scientific or historical significance. Except for the registration process, the program is essentially nonregulatory.

Based on a review conducted under the direction of the Maine State Planning Office, only four stations of wild American ginseng are known in Maine. The State has recognized these stations as valuable State resources. Thus it is clear that exports of wild American ginseng

V 42 168 AUG 30 77 A UMI

collected in Maine, should not be approved by the ESSA for the 1977–78 collecting season.

Finding. Negative.

[1] Preliminary estimate, D. Pursley, Maryland Fish and Wildlife Administration, Aug. 17, 1977.

BOBCAT

Discussion. The bobcat apparently does not occur in Maryland (oral communication, D. Pursley, Maryland Fish and Wildlife Administration).

Finding. Negative.

LYNX

Discussion. The lynx apparently does not occur in Maryland (see 16).

Finding. Negative.

RIVER OTTER

Discussion. Reported State harvest has varied irregularly since 1949, rarely exceeding 300 river otters per year. Although the reported harvest has been relatively low since 1973, this has been attributed to a decline of trapper interest in river otter. Duane Pursley stated orally that nutria and muskrat are currently very marketable in Maryland, and provide a higher return per trapper effort than river otter.

Maryland is one of the few States requiring a tag on each river otter pelt that is exported, and the reported harvest suggests that Maryland can support a limited sustained yield of river otters.

Consequently, the ESSA is able to find that international export of river otters taken in Maryland during the 1977–1978 season will not be detrimental to the survival of the species in that State. However, the total international export may not exceed a quota established by the method described in the species summary for river otter.

Finding. Positive; total international export of river otters taken in Maryland during the 1977–78 season after the date of this notice may not exceed 165.

AMERICAN GINSENG

Literature Review and Discussion. The data available to the ESSA are insufficient to support a positive finding for international export of American ginseng collected in Maryland.

Shreve (see 92) in 1910 noted that American ginseng occurred throughout the mountain and midland zones, but was absent from the coastal zone. He further noted the plant was abundant in some areas, but was rare to infrequent in others, particularly in the midland zone. Bernard F. Halla, Maryland Wildlife Administration, stated orally that American ginseng was found in the three western counties of Maryland and that it was not abundant.

The MA has forwarded to the ESSA one permit application for international export of wild American ginseng collected in Maryland.

In addition, Maryland has neither management programs nor regulatory mechanisms to promote the conservation of American ginseng and to regulate harvest.

Finding. Negative.

[1] Personal comm., C. McCord, Massachusetts Department of Environmental Resources, Aug. 2, 1977.

BOBCAT

Discussion. The data available to the ESSA are insufficient to support a positive finding for international export of bobcat taken in Massachusetts.

Recent reported State harvests have been relatively low despite high prices. Massachusetts is now studying the bobcat and, effective 1977–78, will require tags on all pelts.

However, Massachusetts has not established an annual limit on bobcat harvest based upon the animal's population status.

Finding. Negative.

LYNX

Discussion The lynx is apparently extirpated in Massachusetts (see 16).

Finding. Negative.

RIVER OTTER

Discussion. Reported State harvest has varied irregularly since 1960, never exceeding 100 river otters until 1975–76. Price increased only gradually until last season, when it more than doubled. Apparently Massachusetts can support a limited sustained yield of river otters.

Consequently, the ESSA is able to find that international export of river otters taken in Massachusetts during the 1977–78 season will not be detrimental to the survival of the species in that State. However, the total international export may not exceed a quota established by the method described in the species summary for river otter.

Finding. Positive; total international export of river otters taken in Massachusetts during the 1977–78 season after the date of this notice may not exceed 68.

AMERICAN GINSENG

Literature Review and Discussion. The data available to the ESSA are insufficient to support a positive finding for international export of American ginseng collected in Massachusetts.

Dr. Norton Nickerson, Tufts University, stated orally that American ginseng was harvested in Massachusetts by the bushel in the early 20th century, but it is very scarce now (for references concerning the occurrence of the plant in Massachusetts before 1915, see 93, 94, 95, and 96).

American ginseng is included as a rare species in the "List of Plant Species Which are Rare, Endangered, or Have Undetermined Status in Massachusetts" prepared by Robert W. Franzen and Henry J. Ritzer, USDA, Soil Conservation Service (see 61). The authors considered a species rare if because of its small numbers, it may become threatened with extinction due to further deterioration of the environment or other factors.

In addition, Massachusetts has neither management programs nor regulatory mechanisms to promote the conservation of American ginseng and to regulate harvest.

Finding. Negative.

[1] From Burt (see 97).
[2] Data since 1975, personal comm., J. Bogt, Michigan Department of Natural Resources, Aug. 8, 1977.

BOBCAT

Literature Review. In 1946, Burt (see 97) noted that bobcats were formerly distributed over the entire State, but were confined to the Upper Peninsula and the northern half of the lower peninsula by 1946. He stated that they were "not too common."

Discussion. The data available to the ESSA are insufficient to support a positive finding for international export of bobcat taken in Michigan.

Reported State bobcat harvest has declined nearly tenfold in Michigan since a high of 2910 in 1945–1946, despite rising price since 1970. However, bounties paid from 1936 to 1965 rarely exceeded 500 (with the exception of 1247 in 1935; oral statement of Joe Bogt, Michigan Department of Natural Resources, 8 August 1977). From removal of the bounty in 1965 until establishment of a tagging requirement in 1976–1977, harvest was roughly estimated from informal surveys. Overall, reported bobcat harvest in Michigan is of questionable value in assessing actual population status. Although Michigan may be capable of supporting a sustained yield of bobcat, the data are inadequate to assess the status of the species in the State.

Michigan now requires a tag on all bobcat pelts, completely protects bobcat in the southern portion of the State, and limits the open season on bobcat to the north. However, Michigan has not established an annual limit on bobcat harvest based upon the animal's population status.

Finding. Negative.

LYNX

Discussion. The lynx is completely protected by Michigan law (see 54).

Finding. Negative.

RIVER OTTER

Literature Review. In 1946, Burt noted that the river otter was once formerly distributed over the entire State and had become restricted to less densely populated areas in the Upper Peninsula and northern part of the Lower Peninsula.

He noted that the season was closed in 1925 because of reduced numbers, but it was reopened in 1940 (see 97).

Discussion. Michigan is one of the few States requiring a tag on each river otter pelt and also establishes a bag limit (one river otter per trapper in 1976–1977). These regulations, combined with the fairly regular reported harvest, suggest that Michigan can support sustained yield of river otters.

Consequently, the ESSA is able to find that international export of river otters taken in Michigan during the 1977–1978 season will not be detrimental to the survival of the species in that State. However, the total international export may not exceed a quota established by the method described in the species summary for river otter.

Finding. Positive; total international export of river otters taken in Michigan during the 1977–78 season after the date of this notice may not exceed 551.

AMERICAN GINSENG

Literature Review and Discussion. In 1881, Wheeler and Smith (see 98) noted that American ginseng grew throughout Michigan: "Usually rare, but so common in places that it has been dug for profit, and nearly exterminated." They further noted the plant occurred in great abundance in one county, but eleven years later (see 99) the observation was modified, "formerly in great abundance." In 1961, Smith (see 100) noted that the plant was once very common in Michigan, but that by 1961 itwas quite rare due to overcollecting.

The MA has forwarded to the ESSA one permit application for international export of wild American ginseng collected from Michigan.

Wagner et al. (see 101) reported that American ginseng is an official Threatened species in the State of Michigan. The Michigan Endangered Species Act of 1974 (Act Number 203) considers a threatened species as one "which is likely to become an endangered species within the foreseeable future throughout all or a significant portion of its range." American ginseng was originally considered for endangered status; however, information acquired by the Department indicated that threatened status might be more appropriate. The Michigan Endangered Species Act of 1974 contains several provisions for the conservation of animals and plants either listed by the Department of the Interior or by the Director of the Michigan Department of Natural Resources. Section 6(1) of the Michigan Act states: "Except as otherwise provided in this Act a person shall not take, possess, transport, import, export, process, sell, or offer for sale, buy or offer to buy, nor shall a common carrier transport or receive for shipment, any species of fish, plants, or wildlife appearing in the following lists • • •"

The Michigan Department of Natural Resources is issuing collecting permits for American ginseng provided the permit holders supply the Department with data concerning the amount of plants collected, distribution and population sizes of the plants, and the name and address of the purchaser(s) and date(s) of sale(s), with the understanding that the data would not be made public. The Department intends to use the data to more accurately assess the status of the species in Michigan and to establish the appropriate collecting controls.

Because Michigan has initiated a program designed to conserve American ginseng and to regulate the harvest in order to prevent overexploitation, the ESSA is anxious to give the State's program a fair chance to become functional. However, care must be taken to ensure

V 42 168 AUG 30 77 UMI

that the approval of exports from this one State does not result in overcollection.

Thus, Michigan roots may only be exported if copies of the relevant Michigan permit(s) are attached to the copy of the U.S. Fish and Wildlife Service permit that must accompany each shipment. Also, as an attachment to the U.S. Fish and Wildlife Service permit, the exporter must state the number of pounds of roots included that were collected under each Michigan permit. As it becomes available, the U.S. Fish and Wildlife Service periodically will supply this information to the Michigan Department of Natural Resources.

The ESSA is working with the Michigan Department of Natural Resources to establish an appropriate quota for exports of roots collected in the 1977–78 season. Because roots are already being collected in the State and the status of the plant has not been adequately ascertained by State officials and the ESSA, the quota for this collecting season will be conservative.

When the ESSA determines the quota has been met, exports of roots collected in Michigan after the date of this notice will be closed. Because the demand for wild American ginseng is high, the quota may be filled before revised ESSA export findings are published in the Fall.

Export quotas for future collecting seasons will be determined based on current biological and commerical data including data generated by the Michigan permit system. In addition, the ESSA will require that future international exports be collected in an appropriate collection season to ensure mature plants have had adequate opportunity to reproduce.

Finding. Positive.

[2] Number bounties.

BOBCAT

Literature Review. In 1975, the Minnesota Department of Natural Resources (see 102) reported that bobcats were formerly more abundant in southern than northern Minnesota. However, cutting of forests in northern and increased agriculture in southern have made the bobcat more common in the north, with animals now occurring only occassionally in the south. The Department report stated that annual take had dropped drastically during the past twenty years. Population apparently fluctuated with the food supply, although the bobcat population had never been studied in the State.

Discussion. The data available to the ESSA are insufficient to support a positive finding for international export of bobcat taken in Minnesota.

Reported State bobcat harvest has declined over tenfold in Minnesota since a high of 3085 in 1945. Bounties may have generated the large harvest of the early years. However, reported State harvest has remained low since 1970, despite rising and quite high pelt price.

Minnesota will require tagging of bobcat pelts in 1977–78. However, the data are inadequate to assess the status of the species in the State and give cause for concern.

Finding. Negative.

LYNX

Literature Review. In 1975, the Minnesota Department of Natural Resources (see 102) reported that the lynx is a "species of changing or uncertain status, • • • Some (usually less than 100) are still taken each year by hunters and trappers." The report stated that lynx numbers have fluctuated considerably in recent years, possibly because of changes in abundance of rabbits and rodents on which it feeds, and that the species would benefit from protection by the State.

Discussion. The data available to the ESSA are insufficient to support a positive finding for international export of lynx taken in Minnesota.

Finding. Negative.

RIVER OTTER

Discussion. David Uesall, Minnesota Division of Game and Fish, stated orally that the river otter will be completely protected by Minnesota law in 1977–1978.

Finding. Negative.

AMERICAN GINSENG

Literature Review and Discussion. The data available to the ESSA are insufficient to support a positive finding for international export of American ginseng collected in Minnesota.

In 1884 Upham (see 103) noted that American ginseng occurred "throughout the State, exception northwestward; local, wanting in some districts, rare northward; frequent, occasionally abundant, in the region of the upper Mississippi, and in • • • (he listed five counties)." In 1892, MacMillan (see 104) found the plant "• • • not very abundant in the Minnesota Valley." By 1969, Morley (see 105) noted that American ginseng was "now exterminated or nearly so by herb hunters • • •" in Minnesota. Monserud and Ownbey (see 106) concurred, "Now extremely rare."

American ginseng was included in the "Rare and Engandered Plants of Minnesota" prepared by Dr. Thomas Morley, University of Minnesota, in 1972 (see 61).

The Minnesota Department of Natural Resources (see 102) listed the American ginseng as a "Species of Special Interest," that is not presently endangered or threatened but is apt to become so in the near future:

• • • (Ginseng) was once common in mature forests. It has long been collected, and is largely extirpated by people who dig for its • • • roots • • •. Clearing of forests has also been a factor • • •. Preservation of undisturbed areas of hardwood forest, and possibly some planting, should help retain it as a wild plant • • •. Ginseng should be placed on the protected wild flower list so that collection of the roots from public lands can be regulated.

In a letter to the U.S. Fish and Wildlife Service, Carrol L. Henderson (see 107), Minnesota Department of Natural Resources, commented that Dr. Morley and Dr. John Moyle both favored restrictions on international trade to protect American ginseng from overcollecting. Mr. Henderson further noted that based on the opinions of these botanists, and on other available data, his Department endorses prohibition of exports of wild American ginseng collected in Minnesota.

Both Upham (see 103) and Nash (see 25 referred to Minnesota as a large producer of American ginseng. Upham quoted the price at about one dollar per pound. The MA has forwarded to the ESSA two permit applications for export of wild American ginseng collected in Minnesota.

Besides the lack of data that would support a positive finding by the ESSA for international export of wild American ginseng collected in Minnesota, the State endorses a prohibition on export.

Finding. Negative.

Mississippi

Season	Bobcat		River Otter	
	State harvest	Price per pelt	State harvest	Price per pelt
1960 to 1961	126		126	
1961 to 1962	88		88	
1962 to 1963	100		100	
1971 to 1972	553			
1972 to 1973	774			
1973 to 1974	1,374			
1974 to 1975	1,783			
1975 to 1976	4,374			

BOBCAT

Literature Review. In 1971, Jenkins reported that the bobcat was found in all parts of Mississippi in good numbers and it was not in any danger at that time (see 43).

Discussion. The data available to the ESSA are insufficient to support a positive finding for international export of bobcat taken in Mississippi.

Reported State harvest in Mississippi has risen dramatically since 1972. In addition, Mississippi has not established an annual limit on bobcat harvest based on the animal's population status, nor has the State established a tagging system to enforce such limits.

Finding. Negative.

LYNX

Discussion. The lynx apparently does not occur in Mississippi (see 16).

Finding. Negative.

RIVER OTTER

Discussion. The data available to the ESSA are insufficient to support a positive finding for international export of river otter taken in Mississippi. In addition, Mississippi has not established an annual limit on river otter harvest based on the animal's population status, nor has the State established a tagging system to enforce such limits.

Finding. Negative.

AMERICAN GINSENG

Literature Review and Discussion. The data available to the ESSA are insufficient to support a positive finding for international export of American ginseng collected in Mississippi.

In 1971, Lowe (see 108) noted that American ginseng occurred in five counties in Mississippi. Delcourt and Delcourt (see 46) reported herbarium records for eight counties, and found literature references to four additional counties.

The plant is included in a preliminary checklist of "Rare and Endangered Species in Mississippi," compiled by Dr. Thomas M. Pullen, University of Mississippi (see 109).

In addition, Mississippi has neither management programs nor regulatory mechanisms to promote the conservation of American ginseng and to regulate harvest.

Finding. Negative.

MISSOURI

BOBCAT

Discussion. Effective with the 1977–78 trapping season, the bobcat has been given complete protection by Missouri law (see 110).

Finding. Negative.

LYNX

Discussion. The lynx apparently does not occur in Missouri (see 110).

Finding. Negative.

RIVER OTTER

Discussion. The river otter is completely protected by Missouri law (see 110).

Finding. Negative.

AMERICAN GINSENG

Literature Review and Discussion. In 1886, Tracy (see 111) regarded American ginseng as "common in rich woodland. • • •" 77 year later, Steyermark (see 112) noted that the plant was: "Frequent throughout the Ozark section and in extreme eastern Missouri, rare elsewhere in the State. • • •" He further added: "The demand for this plant • • • has threatened it with extinction in many parts of Missouri. • • • Usually at any given locality in Missouri, the plants are few to several in number, and occur as scattered individuals, well separated from one another."

American ginseng is not included in the *Rare and Endangered Species of Missouri* (see 113). In a letter to the U.S. Fish and Wildlife Service, John E. Wylie (see 114), Missouri Department of Natural Resources, commented that American ginseng had reportedly become "noticeably scarcer in the last year • • •" He further noted that the decline in status may be attributed to recent drought and collecting for the foreign and domestic markets. Wylie concluded by stating that his Department would recommend a ban on American ginseng exports for at least three years. In a letter to the ESSA, Allen Brohn (see

V42I168 AUG 30 77 UMI

115), Missouri Department of Natural Resources, commented that American ginseng is not considered endangered in the State, but that "* * * it is subject to substantial exploitation and numbers may be dwindling." He concurred with John E. Wylie that there should be a prohibition against the exportation of the plant.

The MA has forwarded to the ESSA four permit applications for international export of wild American ginseng collected in Missouri. Wigginton (see 40) also mentions Missouri as a commercial source.

Besides the lack of data that would support a positive finding of the ESSA for international export of wild American ginseng collected in Missouri, the State endorses a prohibition on exoprt.

Finding. Negative.

[1] Personal comm., J. Egans, Montana Fish and Game Department, Aug. 3, 1977.

BOBCAT

Literature Review. In 1977, the Montana Department of Fish and Game (see 116) commented that available data indicate that the bobcat population in Montana is "going downhill faster than Jean Claude Killy." The Department further noted that State regulation of harvest is called for.

Discussion. The data available to the ESSA are insufficient to support a positive finding for international export of bobcat taken in Montana.

The major decrease in ADC recovery since 1960 suggests actual population decline in Montana, but the inadequacy of these data draw into question any conclusions based upon them.

Reported State bobcat harvest for 1950–72 frequently exceeded 1000 but not 2000 animals. However, reported harvest exceeded 2000 for two consecutive years in 1972–74, at the same time that pelt price increased dramatically, and then dropped from 1974–76, even though pelt price continued a sharp increase. These data give concern that the population may be overharvested.

In addition, Montana has not established an annual limit on bobcat harvest based on the animal's population status, nor has the State established a tagging system to enforce such limits.

Finding. Negative.

LYNX

Literature Review. In 1969, Hoffman reported that lynx were most frequent in the northwestern and northcentral areas of the State, and less frequent to the south and east, being rarest in the southeast corner of Montana. This corresponds in general with the abundance of snowshoe hares in the State. Hoffman further reported that lynx had reached a peak in 1963–64, and since then had declined (see 117). In 1971, Nellis reported that lynx were "common" in Montana (see 65).

Discussion. The data available to the ESSA are insufficient to support a positive finding for international export of lynx taken in Montana.

It has been reported that prior to 1940, trapping pressure probably decreased the distribution and abundance of lynx in Montana, suggesting that the lynx population, probably cyclic, is vulnerable to heavy trapping (see 65). The extremely high pelt price at present is likely to stimulate intense trapper effort.

In addition, Montana has not established an annual limit on lynx based on the animal's population status, nor has the State established a tagging system to enforce such limits.

Finding. Negative.

RIVER OTTER

Discussion. Reported river otter harvest in Montana has never exceed 65 and has been fairly regular. In addition, price has not risen markedly.

Consequently, the ESSA is able to find that international export of river otters taken in Montana during the 1977–1978 season will not be detrimental to the survival of the species in that State. However, the total international export may not exceed a quota established by the method described in the species summary for river otter.

Finding. Positive; total international export of river otters taken in Montana during the 1977–1978 season after the data of this notice may not exceed 36.

AMERICAN GINSENG

Discussion. The ESSA has no information that American ginseng occurs in Montana.

Finding. Negative.

1974 to 1975	186	41.16	

BOBCAT

Discussion. The data available to the ESSA are insufficient to support a positive finding for international export of bobcat taken in Nebraska.

The major decrease in ADC recovery since 1964 suggests actual population decline in Nebraska, but the inadequacy of these data draw into question any conclusions based upon them.

From 1944 through 1975 the reported State harvest has varied irregularly from 14 to 266. The harvests from 1973–75 were the highest reported since 1950, and in light of the general rising trend in pelt price, these data suggest that the Nebraska bobcat may be under increased trapper pressure.

In addition, Nebraska has not established an annual limit on bobcat harvest based on the animal's population status, nor has the State established a tagging system to enforce such limits.

Finding. Negative.

LYNX

Discussion. The lynx apparently does not occur in Nebraska (see 16).

Finding. Negative.

RIVER OTTER

Discussion. The river otter apparently is extirpated in Nebraska and is completely protected by State law (see 16 and 54).

Finding. Negative.

AMERICAN GINSENG

Literature Review and Discussion. The data available to the ESSA are insufficient to support a positive finding for international export of American ginseng collected in Nebraska.

Pound and Clements in 1900 (see 118) and Winter in 1936 (see 119) have stated that American ginseng is rare in Nebraska. In a letter to the U.S. Fish and Wildlife Service, Mr. Curtis M. Twedt (see 120), Nebraska Parks Commission commented that American ginseng occurs in three eastern counties in Nebraska. Mr. Twedt also stated orally that he was not aware of commercial harvests of ginseng in the State and that the plant was being considered for listing under the Nebraska Nongame and Endangered Species Conservation Act.

There is no evidence that would support a finding by the ESSA approving exports of wild American ginseng collected in Nebraska.

Finding. Negative.

1976 to 1977					

BOBCAT

Discussion. The data available to the ESSA are insufficient to support a positive finding for international export of bobcat taken in Nevada.

The major decrease in ADC recovery since 1960 suggests actual population decline in Nevada, but the inadequacy of these data draw into question any conclusions based upon them.

As in many other States, reported State bobcat harvest in Nevada has been high, probably largely reflecting increase in pelt price. It cannot be determined from these data whether Nevada can sustain this level yield, or greater.

In addition, Nevada has not established an annual limit on bobcat harvest based on the animal's population status, nor has the State established a tagging system to enforce such limits.

Finding. Negative.

LYNX

Discussion. The lynx apparently does not occur in Nevada (see 16).

Finding. Negative.

RIVER OTTER

Discussion. The data available to the ESSA are insufficient to support a positive finding for international export of river otter taken in Nevada.

Glen K. Griffith, Nevada Department of Fish and Game, stated orally that his Department estimate 500 river otters are in Nevada, and that the population could support a sustained annual harvest of 40 to 60.

However, Nevada has not established an annual limit on river otter harvest based on the animal's population status, nor has the State established a tagging system to enforce such limits.

Finding. Negative.

AMERICAN GINSENG

Discussion. The ESSA has no information that American ginseng occurs in Nevada.

Finding. Negative.

BOBCAT

Discussion. Mason Butterfield, New Hampshire Fish and Game Department, stated orally that the State has established a two year moratorium on bobcat harvest for 1977–1979.

Finding. Negative.

LYNX

Discussion. Mason Butterfield stated orally that the lynx is completely protected by New Hampshire law.

Finding. Negative.

RIVER OTTER

Discussion. The reported harvest of river otter in New Hampshire gradually increased from 1935 until the early 1960's, declined somewhat in the latter 1960's, then returned to the high level of the early 1960's. The price has risen little since first reported in 1964–65.

V 42 168 AUG 30 77 A UMI

Consequently, the ESSA is able to find that international export of river otters taken in New Hampshire during the 1977–78 season will not be detrimental to the survival of the species in that State. However, the total international export may not exceed a quota established by the method described in the species summary for river otter.

Finding. Positive; total international export of river otters taken in New Hampshire during the 1977–78 season after the date of this notice may not exceed 114.

AMERICAN GINSENG

Discussion. The data available to the ESSA are insufficient to support a positive finding for international export of American ginseng collected in New Hampshire.

In 1924, Pease (see 121) noted two stations of American ginseng in Coos County, and regarded the plant as scarce and nearly exterminated in the State. Eight additional stations in New Hampshire are documented by herbarium specimens at the New England Botanical Club, Cambridge, Massachusetts and at the University of New Hampshire.

American ginseng was included as an endangered species in the list, "Endangered Plants of New Hampshire" developed by Albion Hodgon, University of New Hampshire (see 61).

Finding. Negative.

NEW JERSEY

BOBCAT

Discussion. The bobcat is completely protected by New Jersey law (see 122).

Finding. Negative.

LYNX

Discussion. The lynx apparently does not occur in New Jersey (see 16).

Finding. Negative.

RIVER OTTER

Discussion. The river otter is completely protected by New Jersey law (see 54).

Finding. Negative.

AMERICAN GINSENG

Literature Review and Discussion. The data available to the ESSA are insufficient to support a positive finding for international export of American ginseng collected in New Jersey.

In 1889, Britton (see 123) noted that American ginseng was very rare in New Jersey.

In 1973, Fairbrothers and Hough (see 124) listed American ginseng as a rare species in Rare or Endangered Vascular Plants of New Jersey. The authors noted that the plant occurred in three counties.

Santiago Porcella III, New Jersey Department of Environmental Protection, commented in a letter to the U.S. Fish and Wildlife Service (see 125) that American ginseng should be considered rare. He noted that the plant occurred in five counties.

Finding. Negative.

1976 to 1977	5,077	150.87	

Literature Review. In 1975, Findley et al, reported that bobcats are found throughout the State in almost all habitats, are probably rare on the eastern plains and at higher altitudes in the northern mountains, and are perhaps most common in rocky country from desert through the ponderosa forest (see 126).

Discussion. The data available to the ESSA are insufficient to support a positive finding for international export of bobcat taken in New Mexico.

The major decrease in ADC recovery since 1961 suggests actual population decline in New Mexico, but the inadequacy of these data draw into question any conclusions based upon them.

William S. Huey, New Mexico Department of Game and Fish, stated orally that his Department estimates approximately 50,000 bobcats are in the State and that an annual harvest of 5,000 bobcats would not be excessive. He further noted that most bobcats are taken incidental to coyote trapping, primarily conducted in habitat not optimal for the bobcat. Huey also thought that pelts should be tagged to facilitate monitoring of international exports.

New Mexico may be able to support a sustained yield of bobcat. However, the State has not established an annual limit on bobcat based on the animal's population status, nor has the State established a tagging system to enforce such limits.

Finding. Negative.

LYNX

Discussion. The lynx apparently does not occur in New Mexico (see 16).

Finding. Negative.

RIVER OTTER

Discussion. The river otter is completely protected by New Mexico law (see 54).

Finding. Negative.

AMERICAN GINSENG

Discussion. The ESSA has no information that American ginseng occurs in New Mexico.

Finding. Negative.

BOBCAT

Discussion. The data available to the ESSA are insufficient to support a positive finding for international export of bobcat taken in New York. In 1976, the bobcat was first classified as a game animal and tagging of pelts became required. However, New York has not established an annual limit on bobcat harvest based upon the animal's population status.

Finding. Negative.

LYNX

Discussion. The lynx is apparently extirpated in New York (see 16).

Finding. Negative.

RIVER OTTER

Discussion. The reported State harvest varied irregularly between 78 and and 287 since 1949. Only in the last three reported years has the take exceeded 400 per year, perhaps because of somewhat higher prices. However, the annual reported harvest has remained fairly regular for an extended period. Apparently New York can support a sustained yield of river otters. Consequently, the ESSA is able to find that international export of river otters taken in New York during the 1977-78 season will not be detrimental to the survival of the species in that State. However, total international export may not exceed a quota established by the method described in the species summary for river otter.

Finding. Positive; total international export of river otters taken in New York during the 1977-78 season after the data of this notice may not exceed 272.

AMERICAN GINSENG

Literature Review and Discussion. The data available to the ESSA are insufficient to support a positive finding for international export of American ginseng collected in New York.

In 1924, House (see 127) noted that American ginseng was "frequent as local, at least formerly so, northward in the State. Less common or rare southward to Rockland County and westward to Lake Erie." Zander (see 128) documented the distribution of American ginseng in 12 western New York counties and noted that the plants were "found at scattered locations in rich woods."

Dr. Richard S. Mitchel, New York State Museum of Science, stated orally that American ginseng has been extirpated in many areas of New York and

V 42 168 AUG 30 77 UMI

that it was currently restricted to relatively inaccessible areas. He further stated his understanding that the plants were collected only when mature, but he thought much of the collecting took place on public lands.

Effective September 1, 1974, New York law prohibited taking of American ginseng, without the landowner's consent, and since May 25, 1976, a collecting permit has been required, issued by the New York Department of Environmental Conservation. Permits are granted for purposes of scientific research or salvage, but not for commercial harvest.

The MA has forwarded to the ESSA six permit applications for international export of wild American ginseng collected in New York.

The taking of American ginseng in New York State is generally prohibited by State law.

Finding. Negative.

BOBCAT

Literature Review. In 1971, Jenkins reported that the bobcat was rare or absent in much of the Piedmont, but frequent to common in the mountains and in the eastern coastal counties (see 43).

Discussion. The data available to the ESSA are insufficient to support a positive finding for international export of bobcat taken in North Carolina.

Before 1971–72, reported bobcat harvest in North Carolina exceeded 200 only in two separate seasons. However, reported harvest has increased substantially since 1973, reaching 1100 in 1976–77, and has been associated with rising price.

In addition, North Carolina has not established an annual limit on bobcat harvest based on the animal's population status, nor has the State established a tagging system to enforce such limits.

Finding. Negative.

LYNX

Discussion. The lynx apparently does not occur in North Carolina (see 16).

Finding. Negative.

RIVER OTTER

Discussion. The reported State harvest of river otter from 1961–69 was high and regular. Reported harvest declined in the early 1970's, then rose to previous levels in 1976–77. The drop in reported harvest may have been related to low price, although the data are very inadequate on this point. Apparently North Carolina can support a sustained yield of river otters.

Consequently, the ESSA is able to find that international export of river otters taken in North Carolina during the 1977–78 season will not be detrimental to the survival of the species in that State. However, total international export may not exceed a quota established by the method described in the species summary for river otter.

Finding. Positive; total international export of river otters taken in North Carolina during the 1977–78 season after the data of this notice may not exceed 1195.

AMERICAN GINSENG

Literature Review and Discussion. Radford et al. (see 129) noted that American ginseng occurred in 14 counties in the mountains and piedmont of North Carolina; Delcourt and Delcourt (see 46) noted herbarium records for one county and literature references to 17 additional counties; and Hardin (see 130) noted the plant occurred in 9 counties (see also 131).

Radford et al. (see 129) regarded American ginseng as rare in North Carolina. This opinion was shared by Hardin (see 132) who noted that the plant's status was the result of overcollecting.

Hardin also (see 130) included American ginseng as a species threatened throughout its range and exploited in "Endangered and Threatened Plants and Animals of North Carolina". He further noted that collecting wild American ginseng "is a very old but recently growing business which could lead to the eradication of the species in native habitats * * *" In contrast, Arnold Krochmal, U.S.D.A. Forest Service commented in a letter to the Smithsonian Institution (see 41), that he has seen increases in ginseng populations in North Carolina (refer to summary for Kentucky).

The MA has forwarded to the ESSA eight permit applications for international export of wild American ginseng collected in North Carolina. Wigginton (see 40) also noted the State was a major commercial source.

Bogue (see 133) quoted one individual who said that American ginseng was stolen from Great Smokey National Park where it was plentiful. Dr. Susan Bratton, National Park Service, stated orally that poachers are a current problem in the Park and that the plant does not occur in much of the habitat that appears suitable.

North Carolina State law (Section I, 14–129) requires written permission from landowners or an authorized agent before American ginseng can be collected in certain counties.

Some sections of North Carolina may be capable of supporting a sustained harvest of American ginseng. However, the State has neither management programs nor regulatory mechanisms to promote the conservation of American ginseng and to regulate a harvest.

Finding. Negative.

[1] Lynx and bobcat.

BOBCAT

Literature Review. In 1961, Adams (see 134) reported that bobcats were common only in the counties adjoining the Little Missouri, Heart, Cannonball, and Missouri Rivers, occasionally along the Red River in eastern and northern North Dakota, and rare in the prairie pothole region. Because of their scarcity, they were of no major economic importance.

Discussion. The data available to the ESSA are insufficient to support a positive finding for international export of bobcat taken in North Dakota.

Apparently, bobcats have never been abundant in North Dakota. The reported State harvest has generally been low and irregular over the past thirty years, and the ADC recovery for the past twenty years has been miniscule or absent.

In addition, North Dakota has not established an annual limit on bobcat harvest based on the animal's population status, nor has the State established a tagging system to enforce such limits.

Finding. Negative.

LYNX

Discussion. The lynx is apparently extirpated in North Dakota (see 16).

Finding. Negative.

RIVER OTTER

Discussion. The river otter is apparently extirpated in North Dakota (see 16).

Finding. Negative.

AMERICAN GINSENG

Discussion. The ESSA has no information that American ginseng occurs in North Dakota.

Finding. Negative.

Literature Review. In 1973, Smith et al. reported that the bobcat in Ohio was "rare" (see 135).

Discussion. The data available to the ESSA are insufficient to support a positive finding for international export of bobcat taken in Ohio.

Finding. Negative.

LYNX

Discussion. The lynx apparently does not occur in Ohio (see 16).

Finding. Negative.

RIVER OTTER

Discussion. The river otter is completely protected by Ohio law (see 54).

Finding. Negative.

AMERICAN GINSENG

Literature Review and Discussion. The data available to the ESSA are insufficient to support a positive finding for international export of American ginseng collected in Ohio.

Schaffner in 1914 (see 136) considered American ginseng generally distributed in Ohio (for references concerning the occurrence of the plant in Ohio in the 19th century, see 137 and 138). Eighteen years later Schaffner (see 139) noted: "General, but now scarce."

Richard S. Moseley, Ohio Division of Natural Areas and Preserves, stated orally that American ginseng occurred in 25 counties in Ohio and that he knows of several areas in the State where the plant has been eradicated in the last eight years. He further noted that the plants were primarily collected by emigrants from West Virginia. A similar opinion was stated orally by Bob McCance and Dennis Anderson, Ohio Natural Heritage Program. Moseley added that the plant had started to flower this year in the first week of July (substantial collecting was taking place in Ohio at that time).

Dr. Thomas Cooperrider, Kent State University, stated orally that American ginseng was potentially threatened in Ohio and that commercial collecting in the State should be stopped. Dr. Charles C. King, Ohio Biological Survey, stated orally that the plant was not common and that it was being collected in parks.

In a letter to the U.S. Fish and Wildlife Service (see 140), Dennis Anderson commented that one record from the major herbaria within Ohio was dated 1892 with a note "becoming rare." He further added: "The verbal responses of a few knowledgeable field people concerning the current status and trend of the species in Ohio yielded partially conflicting reports from 'definately declining' to 'remaining about constant'. No one reported population increases and most agreed that diggers had reduced populations in at least local areas."

Wistendahl et al. (see 141) included American ginseng as an endangered species in "Rare and Endangered Plant Species of the Central Ohio Valley; A Contribution Toward a Comprehensive List for Ohio," and noted that it occurred in three counties. The plant was also included in a "Preliminary List of Rare and Endangered Species in Ohio Dicotyledoneae," compiled by Dr. Thomas S. Cooperrider (see 142).

The MA has forwarded to the ESSA seven permit applications for international export of wild American ginseng collected in Ohio.

Ohio has neither management programs nor regulatory mechanisms to promote the conservation of American ginseng and to regulate harvest.

Finding. Negative.

Oklahoma

1975 to 1976	2,302	37.28	106
1976 to 1977	3,548	55.49	

Discussion. The data available to ESSA are insufficient to support a positive finding for international export of bobcat taken in Oklahoma.

Reported bobcat harvest in Oklahoma has generally been very low, except for an enormous increase since 1972, apparently stimulated by rising price. Although Oklahoma may be capable of supporting a sustained yield of bobcat, the data are inadequate to assess the status of the species in the State.

Ken Van Hoozer, Oklahoma Department of Wildlife Conservation, stated orally that Oklahoma will restrict the open season on bobcat in 1977–78 and is considering implementation of a tagging requirement. However, Oklahoma has not yet established an annual limit on bobcat harvest based on the animal's population status, nor has the State established a tagging system to enforce such limits.

Finding. Negative.

LINX

Discussion. The lynx apparently does not occur in Oklahoma (see 16).

Finding. Negative.

RIVER OTTER

Discussion. The river otter is extirpated in Oklahoma and is completely protected by State law (see 16).

Finding. Negative.

AMERICAN GINSENG

Literature Review and Discussion. The data available to the ESSA are insufficient to support a positive finding for international export of American ginseng taken in Oklahoma.

V 42 168 AUG 30 77 UMI

In a letter to the U.S. Fish and Wildlife Service (see 143), Dr. Jerry J. Crockett, Oklahoma State University, commented: "There is only one reported herbarium specimen of American ginseng in Oklahoma." Although believing the plant still occurs in the State, he considered it rare and in need of protection.

American ginseng is designated "Rare-1" in "Rare and Endangered Vertebrates and Plants of Oklahoma" (see 144). Rare-1 is defined as a species that "although not presently threatened with extinction, is in such small numbers that it may be endangered if its environment worsens."

Finding. Negative.

BOBCAT

Literature Review. In 1971, Ebert (see 81) reported: "The statewide population of bobcats is currently estimated to be the lowest in twenty years, *particularly in eastern Oregon.*" Ebert noted that the State bounty was removed in 1961, but ten counties continued to pay bounties of $2.00 to $4.00 in 1971. Ebert further noted that increased price had stimulated trapping of bobcat.

Discussion. The data available to ESSA are insufficient to support a positive finding for international export of bobcat taken in Oregon. The major decrease in ADC recovery since 1957 suggests actual population decline in Oregon, but the inadequacy of these data draw into question any conclusions based upon them.

The reported State harvest has varied widely since 1938, but has risen to particularly high levels in the 1970's in association with dramatic price increase. Robert Stein, Oregon Fish and Wildlife Commission, stated orally that taking of bobcat may be prohibited in eastern Oregon, where pelts are most valuable, and restricted in the West, in 1977–78.

However, Oregon has not established an annual limit on bobcat harvest based on the animal's population status, nor has the State established a tagging system to enforce such limits.

Finding. Negative.

LYNX

Literature Review. In 1971, Nellis reported that lynx were "very rare" in Oregon (see 65).

Discussion. The data available to the ESSA are insufficient to support a positive finding for international export of Lynx taken in Oregon.

Finding. Negative.

RIVER OTTER

Discussion. The reported harvest of river otter in Oregon has been fairly regular, with no apparent relationship to price, except perhaps in 1976–1977, when both reported harvest and price were the highest ever reported.

Robert Stein, Oregon Fish and Wildlife Commission, stated orally that the river otter was doing well in Oregon, and was particularly common in the central part of the State. Apparently, Oregon can support a sustained yield of river otters.

Consequently, the ESSA is able to find that international export of river otters taken in Oregon during the 1977–1978 season will not be detrimental to the survival of the species in that State. However, total international export may not exceed a quota established by the method described in the species summary for river otter.

Finding. Positive; total international export of river otters taken in Oregon during the 1977–78 season after the date of this notice may not exceed 249.

AMERICAN GINSENG

Discussion. The ESSA has no information that American ginseng occurs in Oregon.

Finding. Negative.

PENNSYLVANIA

BOBCAT

Discussion. The bobcat is completely protected by Pennsylvania law (see 122).

Finding. Negative.

LYNX

Discussion. The lynx apparently does not occur in Pennsylvania (see 16).

Finding. Negative.

RIVER OTTER

Discussion. The river otter is completely protected by Pennsylvania law (see 54).

Finding. Negative.

AMERICAN GINSENG

Literature Review and Discussion. The data available to the ESSA are insufficient to support a positive finding for international export of American ginseng collected in Pennsylvania.

In 1852, Noll (see 145) noted that American ginseng was not common in Pennsylvania. Other botanists have also concurred with Noll that the plant is rare or becoming so in the State (see 146, 147, 148, and 149).

Maurice K. Goddard, Pennsylvania Department of Environmental Resources, stated orally that American ginseng is common throughout Pennsylvania on specific sites; and that he did not consider collection pressure to be a significant problem at present. He further noted that most collectors are careful to conserve the plant. The MA has forwarded to the ESSA six permit applications for international export of wild American ginseng collected in Pennsylvania.

Some sections of Pennsylvania may be capable of suporting a sustained harvest of American ginseng. However, the State has neither management programs nor regulatory mechanisms to promote the conservation of American ginseng and to regulate a harvest.

Finding. Negative.

RHODE ISLAND

BOBCAT

Discussion. The bobcat is completely protected by Rhode Island law (see 70).

Finding. Negative.

LYNX

Discussion. The lynx apparently does not occur in Rhode Island (see 18).

Finding. Negative.

RIVER OTTER

Discussion. The river otter is completely protected by Rhode Island law (see 54).

Finding. Negative.

AMERICAN GINSENG

Literature Review and Discussion. The data available to the ESSA are insufficient to support a positive finding for international export of American ginseng collected in Rhode Island.

Dr. Irene H. Stuckey, University of Rhode Island, stated orally that although there are herbarium records of American ginseng in Rhode Island, she considers the plant possibly extinct in the State (see also 61).

Finding. Negative.

South Carolina

Season	Bobcat		River Otter	
	State harvest	Price per pelt	State harvest	Price per pelt

1974 to 1975	217		526	
1975 to 1976	371	25.00	699	35
1976 to 1977	661		788	
	1,368		1,351	

BOBCAT

Literature Review. Radio tracking proved a satisfactory technique in determining bobcat movements and home ranges, but too few animals were studied over too short a span of time to contribute information useful in assessing bobcat status in South Carolina (see 150).

Discussion. The data available to the ESSA are insufficient to support a positive finding for international export of bobcat taken in South Carolina.

Reported harvest of bobcats in South Carolina has increased dramatically since 1973, apparently in response to rising pelt price.

In a letter to William C. Hickling, Area Manager, U.S. Fish and Wildlife Service, the Executive Director of the South Carolina Wildlife and Marine Resources Department, James A. Timmerman, Jr., stated that the bobcat is a game animal in South Carolina and is taken for sport hunting (see 151).

Timmerman stated that a 1972 survey indicated bobcats were common in 30 counties, occasional in 16 and nowhere rare. He added that specific population data does not exist. Kenneth B. Stansell of the same Department stated orally that bobcat as game animals cannot be sold commercially in South Carolina.

Although South Carlina may be capable of supporting a sustained yield of bobcat, the data are inadequate to assess the status of the species in the State.

In addition, South Carolina has not established an annual limit on bobcat harvest based on the animal's population status, nor has the State established a tagging system to enforce such limits.

Finding. Negative.

LYNX

Discussion. The lynx apparently does not occur in South Carolina (see 16).

Finding. Negative.

RIVER OTTER

Discussion. Reported river otter harvest in South Carolina has varied irregularly since 1960, only twice exceeding 500 before 1973. Since 1973, the reported State harvest has risen from 526 to 1351, with nearly a doubling in the last season.

South Carolina requires a tag on every river otter pelt taken, and the reported harvest suggests that South Carolina can support a sustained yield of river otters.

Consequently, the ESSA is able to find that international export of river otters taken in South Carolina during the 1977–78 season will not be detrimental to the survival of the species in that State. However, total international export may not exceed a quota established by the method described in the species summary for river otter, excluding last year's unprecedented harvest which may have been caused by high pelt price.

Finding. Positive; total international export of river otters taken in South Carolina during the 1977–78 season after the date of this notice may not exceed 430.

AMERICAN GINSENG

Literature Review and Discussion. The data available to the ESSA are insufficient to support a positive finding for international export of American ginseng collected in South Carolina.

In Wigginton (see 40), John Drayton of South Carolina is cited as saying in 1798: "It (American ginseng) is so much sought after by the Cherokees for trade it is by no means as plentiful as it used to be in this State." Radford et al. (see 129) noted that the plant was rare in the mountains and lower piedmont of two counties in South Carolina.

In a letter to the U.S. Fish and Wildlife Service (see 152), Kenneth B. Stansell, South Carolina Wildlife and Marine Resources Department, commented that the higher plant committee of a recent symposium on endangered species, which was sponsored by Mr. Stansell's Department, designated American ginseng as threatened in South Carolina. Mr. Stansell added "this represents a consensus of opinion from extremely knowledgeable individuals in the plant field."

V 42 168 A UG 30 77 UMI

Dr. J. A. Timmerman, South Carolina Wildlife and Marine Resources Department, stated orally that he did not think there was much commercial activity in American ginseng in South Carolina. The MA has forwarded to the ESSA three permit applications for international export of wild American ginseng collected in the State.

Finding. Negative.

South Dakota

[illegible] R. Dewey, South Dakota [illegible] Pierre, Aug. 23, 1977.

BOBCAT

Literature Review. In 1976, Anderson (see 9) reported that bobcats are most abundant in the Black Hills area and breaks of the Grand, Moreau, Belle Fourche, Cheyenne, Bad and White River systems, but were quite uncommon in eastern South Dakota. He further noted that conservation officers, hunters and trappers have reported that bobcat numbers have decreased dramatically.

Discussion. The data available to the ESSA are insufficient to support a positive finding for international export of bobcat taken in South Dakota.

Reported State harvest in South Dakota is based on the number of transactions conducted by licensed fur dealers. Thus, the reported harvest may not accurately reflect the actual take in the State. For example, Ronald Fowler stated orally that the actual bobcat harvest for the 1976–77 season has been calculated to be 418. Analysis of the State harvest is further complicated by a reduction over the last three years in the length of the bobcat trapping season.

Kay Cool, South Dakota Department of Game, Fish, and Parks, stated orally that the Department is "extremely concerned" with the status of the bobcat in South Dakota. The State has established a limited season from December 15 to January 15 in 1977–78. The State will also require presentation of all animals to a State conservation officer and fixing of metal tags on all pelts before sale. In addition, teeth will be collected and used to analyze age and sex structure, and to facilitate further State regulatory decisions on bobcat.

In addition, the State has not established an annual limit based on the animal's population status.

Finding. Negative.

LYNX

Discussion. The lynx is apparently extirpated in South Dakota (see 16).

Finding. Negative.

RIVER OTTER

Discussion. The river otter is completely protected by South Dakota law (see 54).

Finding. Negative.

AMERICAN GINSENG

Discussion. The ESSA has no information that American ginseng occurs in South Dakota.

Finding. Negative.

Tennessee

1970 to 1971	12	
1974 to 1975	607	8.80

[1] Report from resident buyers only.

Literature Review. In 1971, Jenkins (see 43) reported that bobcat were scarce in the Nashville area, but were present over most of the rest of the State, in small numbers in the west and in Reelfoot Lake area, and common in the Great Smokies.

Discussion. The data available to the ESSA are insufficient to support a positive finding for international export of bobcat taken in Tennessee. Reported State harvest in Tennessee has been very irregular, but was highest in 1969 and 1975, when reported price was highest.

William Yambert, Tennessee Wildlife Resources Agency, stated orally that the status of the bobcat in Tennessee is uncertain, but expressed concern and thought that prohibition of international exports might be called for.

In addition, Tennessee has not established an annual limit on bobcat harvest based on the animal's population status, nor has the State established a tagging system to enforce such limits.

Finding. Negative.

LYNX

Discussion. The lynx apparently does not occur in Tennessee (see 16).

Finding. Negative.

RIVER OTTER

Discussion. The river otter is completely protected by Tennessee law (see 54).

Finding. Negative.

AMERICAN GINSENG

Literature Review and Discussion. The data available to the ESSA are insufficient to support a positive finding for international export of American ginseng collected in Tennessee.

In 1887, Gattinger (see 153, also 154) noted that American ginseng occurred "over the State but everywhere rare." Delcourt and Delcourt (see 46) noted herbarium records for 25 counties in Tennessee. Sharp (see 155) included American ginseng in "Rare Plants of Tennessee"; U.S.D.A. Soil Conservation Service included the plant in "Rare, Threatened, or Endangered Plant Species of Tennessee" (as rare) in 1975 (see 61); and Collins et al. (see 156) included the plant as threatened in "The Rare Vascular Plants of Tennessee."

Dr. Robert Kral, Vanderbilt University, stated orally that American ginseng is no longer found in many of the areas where it has occurred or should occur in central Tennessee. He further noted that it is probably more common in eastern and western Tennessee.

The MA has forwarded to the ESSA four permit applications for international export of wild American ginseng collected in Tennessee. Wigginton (see 40) also noted that the State was a commercial source.

Bogue (see 133) quoted one individual who said that American ginseng was stolen from Great Smokey National Park where the plant was plentiful. Dr. Susan Bratton, National Park Service, stated orally that poachers are a current problem in the Park and that the plant does not occur in much of the habitat that appears suitable.

Some sections of Tennessee may be capable of supporting a sustained harvest of American ginseng. However, the State has neither management programs nor regulating mechanisms to promote the conservation of American ginseng and to regulate a harvest.

Finding. Negative.

EOBCAT

Literature Review. In 1971, Russell (see 157) reported that bobcat occurred in "relatively high stable numbers throughout the State, in spite of habitat changes and hunting pressures." He considered the species reasonably secure.

Discussion. The data available to the ESSA are insufficient to support a positive finding for international export of bobcat taken in Texas.

Over the last decade, reported State bobcat harvest in Texas has increased nearly a thousandfold, presumably reflecting increased pelt price. Although Texas may be capable of supporting a sustained yield of bobcat, the data are inadequate to assess the status of the species in the State.

In addition, Texas has not established an annual limit on bobcat harvest based on the animal's population status, nor has the State established a tagging system to enforce such limits.

Finding. Negative.

LYNX

Discussion. The lynx apparently does not occur in Texas (see 16).

Finding. Negative.

RIVER OTTER

Discussion. The data available to the ESSA are insufficient to support a positive finding for international export of river otters taken in Texas.

Finding. Negative.

AMERICAN GINSENG

Discussion. The ESSA has no information that American ginseng occurs in Texas.

Finding. Negative.

UTAH

BOBCAT

Discussion. Donald A. Smith, Utah Division of Wildlife Resources, stated orally that the bobcat will be completely protected by Utah law in 1977–78.

Finding. Negative.

LYNX

Discussion. The lynx is completely protected by Utah law (oral statement, D. A. Smith, and see 16).

Finding. Negative.

RIVER OTTER

Discussion. The river otter is completely protected by Utah law (oral statement, D. A. Smith, and see 16).

Finding. Negative.

AMERICAN GINSENG

Discussion. The ESSA has no information that American ginseng occurs in Utah.

Finding. Negative.

[2] Bounty removed.
[3] 1st yr that hunter and trapper reports required.

BOBCAT

Discussion. The data available to the ESSA are insufficient to support a positive finding for international export of bobcat taken in Vermont.

Walter Cabell, Vermont Fish and Game Department, stated orally that beginning in the 1977–78 season, tags will be required on all bobcat pelts. However, almost no data is available on State harvest, and Vermont has not established an annual limit on bobcat harvest based on the animal's population status.

Finding. Negative.

LYNX

Discussion. Walter Cabell, Vermont Fish and Game Department, stated orally that lynx are completely protected by Vermont law.

Finding. Negative.

RIVER OTTER

Discussion. The data available to the ESSA are insufficient to support a positive finding for international export of river otters taken in Vermont.

Finding. Negative.

AMERICAN GINSENG

Literature Review and Discussion. The data available to the ESSA are insufficient to support a positive finding for international export of American ginseng collected in Vermont.

In 1900, Brainerd et al. (see 158, also 25 and 159) noted that although American ginseng was "formerly common," it was then "rapidly disappearing." In 1967, Seymour (see 160) expressed a similar opinion regarding collectors as the primary reason for the decline. He further noted that the plant occurred in seven counties.

Brian Stone, Vermont Department of Forests, Parks and Recreation, after consulting with several botanists familiar with the State's flora, stated orally that American ginseng could be considered a marginally threatened species in Vermont. The plant appears to be neither rare nor common and collecting pressure is apparently light. Designation as a threatened species would primarily be justified by the potential threat of additional collecting pressure as there is substantial habitat available. One botanist told Stone the plant is probably increasing. Opinions differed as to whether the primary collectors were those that had collected the roots for years or individuals who had become recently interested in the alleged medicinal values of the plant.

Vermont requires written permission from private landowners or authorized agents for public lands before more than one individual plant or two cuttings of protected species can be removed. American ginseng is not included in the list of protected plants.

Some sections of Vermont may be capable of supporting a sustained harvest of American ginseng. However, the State has neither management programs nor regulatory mechanisms to promote the conservation of American ginseng and to regulate a harvest.

Finding. Negative.

BOBCAT

Literature Review. In 1971, Jenkins (see 43) reported that the bobcat was common in the mountains of Virginia, but uncommon over most of the rest of the State.

Discussion. The data available to the ESSA are insufficient to support a positive finding for international export of bobcat taken in Virginia.

Reported bobcat harvest in Virginia has been irregular and never exceeded 189 before 1972. Since 1972, reported harvest has steadily risen along with increasing pelt price. Although Virginia may be capable of supporting a sustained yield of bobcat, the data are inadequate to assess the status of the species in the State.

Finding. Negative.

LYNX

Discussion. The lynx apparently does not occur in Virginia (see 16).

Finding. Negative.

RIVER OTTER

Discussion. Reported Virginia harvest of river otters has varied irregularly since 1938. Mr. McInteer, Virginia Commission of Game and Inland Fisheries, stated orally that State harvest reports above 1000 are suspect and probably reflect multiple sales of individual pelts rather than actual harvest. He also stated that river otters in Virginia are in fairly good shape and locally abundant.

Apparently, Virginia can support a limited sustained yield of river otters. Consequently, the ESSA is able to find that international export of river otters taken in Virginia during the 1977–1978 season will not be detrimental to the survival of the species in that State. However, total international export may not exceed a quota established by the method described in the species summary for river otter, but omitting from the calculation all reported harvests in excess of 1000, which may be artifactual.

Finding. Positive; total international export of river otters taken in Virginia during the 1977–78 season after the date of this notice may not exceed 396.

AMERICAN GINSENG

Literature Review and Discussion. The data available to the ESSA are insufficient to support a positive finding for international export of American ginseng collected in Virginia.

Massey (see 161) noted that American ginseng occurred in 13 counties in Virginia, and Harvill (see 162) noted the plant was local in the piedmont in 4 counties.

American ginseng was included as a depleted species in the list "Endangered Status of Virginia Flowering Plants," developed by Dr. Leonard V. Uttal, Virginia Polytechnic Institute and State University in 1972 (see 61).

The MA has forwarded to the ESSA seven applications for international export of wild American ginseng collected from Virginia.

In addition, Virginia has neither management programs nor regulatory mechanisms to promote the conservation of American ginseng and to regulate harvest.

Finding. Negative.

BOBCAT

Literature Review. In 1971, Sweeney (see 10) analyzed bobcat bounty, hunter and trapper harvest records for Washington State from 1935–76, discussing several factors he considered pertinent to an assessment of the current bobcat status. From 1963–64 to 1971–72, the projected number of bobcats harvested (a statistic compiled from number of bobcats reported, number of trappers licensed, number of trappers reporting) increased statewide, while the number of trappers decreased. Therefore, the catch per trapper was found to increase throughout the period.

In 1972, the number of licensed trappers increased (781 to 1100) and continued to increase through 1974. This may have been due to an increase in bobcat fur prices ($13.10 in 1970; $106.95 in 1975–76) or a general increase in trapper income in 1971–72. While the bobcat harvest continued to rise after 1972, the number of bobcats per trapper levelled off and then decreased through 1975–76. If individual trapping effort (which the author did not measure) had increased, the decrease in trapper success is even more dramatic.

Discussion. The data available to the ESSA are insufficient to support a positive finding for international export of bobcat taken in Washington.

The major decrease in ADC recovery since 1960 suggests actual population decline in Washington, but the inadequacy of these data draw into question any conclusions based upon them.

Reported bobcat harvest in Washington reached a peak of 1650 animals in 1976–77, at the same time pelt prices rose to an unprecedented level. Furthermore, Ralph Larson, Washington Department of Game, stated orally that this figure represented trapping alone, and that another 4,400 animals were taken by hunting.

Although Washington may be capable of supporting a sustained yield of bobcat, the data are inadequate to assess the status of the species in the State.

In addition, Washington has not established an annual limit on bobcat harvest based on the animal's population status, nor has the State established a tagging system to enforce such limits.

Finding. Negative.

LYNX

Literature Review. In 1971, Nellis reported that the lynx were "rare to common" in Washington (see 65).

Discussion. The data available to the ESSA are insufficient to support a positive finding for international export of lynx taken in Washington.

Reported harvest of lynx in Washington has been generally low and irregular, but has risen over the last three years, presumably in response to high prices.

In addition, Virginia has not established an annual limit on lynx harvest based on the animal's population status, nor has the State established a tagging system to enforce such limits.

Finding. Negative.

RIVER OTTER

Discussion. Reported harvest of river otters in Washington has varied irregularly since 1960 and generally exceeded 500 but seldom a thousand individuals. Apparently Washington can support a sustained yield of river otters, although the very high reported harvest of 1976–77, in association with the highest price reported, suggests the need for close monitoring of the population in the future.

Consequently, the ESSA is able to find that international export of river otters taken in Washington during the 1977–78 season will not be detrimental to the survival of the species in that State. However, total international export may not exceed a quota established by the method described in the species summary for river otter, excluding the 1976–77 reported harvest which is the highest on record.

Finding. Positive; total international export of river otters taken in Washington during the 1977–78 season after the date of this notice may not exceed 618.

AMERICAN GINSENG

Discussion. The ESSA has no information that American ginseng occurs in Washington.

Finding. Negative.

[2] Data since 1975, personal comm., J. Ruckel, West Virginia Department of Natural Resources, Aug. 8, 1977.

Discussion. The data available to the ESSA are insufficient to support a positive finding for international export of bobcat taken in West Virginia.

Reported harvest of bobcat in West Virginia has varied irregularly and, excepting 1937, did not exceed 100 until 1973–74. Since 1973–74 the reported harvest has risen to 446, apparently in response to rising price.

Jim Ruckel, West Virginia Department of Natural Resources, stated orally that West Virginia requires tagging of bobcat pelts and plans to establish a bag limit of two animals per trapper in 1977–78. However, West Virginia has not established an annual limit on bobcat harvest based on the animal's population status.

Finding. Negative.

LYNX

Discussion. The lynx apparently does not occur in West Virginia (see 16).

Finding. Negative.

RIVER OTTER

Discussion. The river otter is apparently extirpated in West Virginia and is completely protected by State law (see 16, 54).

Finding. Negative.

AMERICAN GINSENG

Literature Review and Discussion. The data available to the ESSA are insufficient to support a positive finding for international export of American ginseng collected in West Virginia.

In 1950, Core (see 163) noted that American ginseng was found throughout West Virginia, but that it was "becoming rare." Straughsbaugh and Core (see 164) concurred and added that the decline was due to collectors.

In a letter to the U.S. Fish and Wildlife Service, Dr. Dale E. Pike (see 165), West Virginia Department of Natural Resources, supplied information that American ginseng occurred in 23 counties, based on herbarium records, the literature, and sightings. He also commented:

Undoubtedly ginseng is much more widespread in West Virginia than the records we have indicate. It is our feeling that the species could become very rare in the state, if not completely extirpated in some localities because of commercial collecting. It may be of interest that a check of our morning paper's classified section contained an advertisement offering $72 a pound for ginseng. We have no idea of how many persons in the State deal in this product—certainly there are several around the state.

Core (see 166) included American ginseng in "Rare and Endangered Plant Species in West Virginia": "rare in most sections because of digging of the roots * * * It was probably found in every county in this State at one time."

The MA has forwarded to the ESSA eight permit applications for international export of wild American ginseng collected in West Virginia. Wigginton (see 40) also noted that West Virginia is a commercial source.

West Virginia law requires written permission from landowners or appropriate agents before any plants can be damaged or collected within 100 yards of any public road, or possessed or transported on public roads in the State. (Acts of West Virginia 11th session 1872–73 Chap 158 also requires the consent of landowners in Pocahontas, Greenbrier and Webster Counties before ginseng or other medical roots can be collected on their land.)

Although West Virginia may be capable of supporting a sustained yield of American ginseng, the data are inadequate to assess the status of the species in the State.

In addition, West Virginia has neither management programs nor regulatory mechanisms to promote the conservation of American ginseng and to regulate harvest.

Finding. Negative.

[1] River otter data, before 1970, from Wisconsin Dept. Nat. Res.
[2] Bobcat and lynx.

BOBCAT

Literature Review. Jackson (see 167) reported that whereas in 1850 bobcats were distributed throughout the State, in 1961 they were found chiefly above the 45° N. latitude. Jackson claimed that bobcats cycle in abundance, and that in peak years there are "possibly some 2500–3000 bobcats in the entire State."

In 1976, the Wisconsin Department of Natural Resources published a report, written by William A. Creed and James E. Ashbrenner, on the status of the bobcat in the State (see 168). The authors noted that the status of the bobcat was considered "questionable" by the Department's Endangered Species Committee in 1973, but they concluded that the species is apparently stable, with potential for population increase because of increasing favorable habitat. Creed and Ashbrenner further noted that additional restrictions on harvest did not appear necessary at that time, although they expressed concern that female bobcats appeared to be particularly susceptible to trapping. They concluded that the bobcat is "currently secure in Wisconsin, and that current regulations (including mandatory registration) should be continued until new information indicates further restrictions are needed."

Discussion. The data available to the ESSA are insufficient to support a positive finding for international export of bobcat taken in Wisconsin.

In a letter to the ESSA (see 169), Anthony S. Earl, Wisconsin Department of Natural Resources, stated that the "harvest of bobcat is somewhat consistent, and we do not feel it is necessary to curtail out state shipments of Wisconsin bobcat pelts, * * *"

Wisconsin has established a two and a half month season on the bobcat in 1977–78, and requires a tag on every pelt.

Bobcat pelt price has recently increased in Wisconsin, as across the United States. The potential exists for intensified trapping effort in the State, although reported harvest has not increased over the last several years. It would appear that Wisconsin may be able to support a sustained annual yield of bobcats without adversely impacting the population. However, widespread demand for bobcat pelts may particularly increase for bobcats in any States for which international export is allowed in 1977–78. If Wisconsin would establish appropriate direct limitations on harvest that would prevent overharvest from increased demand, the ESSA would approve international export of pelts taken legally in Wisconsin and carrying Wisconsin tags. Pending this action, the ESSA is unable to find that such inter-

V 42 1168 AUG 30 77 UMI

national export will not be detrimental to the survival of the species.

Finding. Negative.

LYNX

Discussion. The lynx is completely protected by Wisconsin law (see 169 and 170).

Finding. Negative.

RIVER OTTER

Literature Review. Jackson (see 167) noted that river otters were formerly not uncommon throughout Wisconsin, but were almost extirpated by the early 1900's. In 1956, Knudson (see 171) noted that trappers' responses to questionnaires suggested that the otter population had increased to at least a few thousand individuals in spite of an annual trap harvest of 300–600 individuals.

The Wisconsin Department of Natural Resources has published a report on the status of river otter in the State (see 172). The report noted that the river otter population has been increasing, but that there was no practical way to estimate population sizes except based on harvest records. The report recommended that the river otter populations be "observed more scientifically than in the past and if a large decrease in the population is noted that steps be taken to giving the animal complete or partial protection for a few trapping seasons."

Discussion. Reported State harvest has varied since 1928, usually not exceeding 900 river otters per year. Since 1972, harvests have been consistently high with the general rise in pelt prices, except for a drop in the 1975–76 season. Wisconsin requires a tag on every pelt. Because the reported State harvest has been relatively stable, it appears that Wisconsin can support a limited sustained yield of river otters.

Consequently, the ESSA is able to find that international export of river otters taken in Wisconsin during the 1977–78 season will not be detrimental to the survival of the species in that State. However, total international export may not exceed a quota established by the method described in the species summary for river otter.

Finding. Positive; total international export of river otters taken in Wisconsin during the 1977–78 season after the date of this notice may not exceed 458.

AMERICAN GINSENG

Literature Review and Discussion. The data available to the ESSA are insufficient to support a positive finding for international export of American ginseng collected in Wisconsin.

In 1938, Fassett (see 173) noted that American ginseng was becoming rare in Wisconsin. (For references concerning the occurrence of the plant in Wisconsin in the 19th century, see 174 and 175.)

American ginseng is listed as a threatened species in "Endangered and Threatened Vascular Plants in Wisconsin" (see 176).

In a memorandum to Ron Nicotera, Wisconsin Department of Natural Resources (see 177), Robert H. Read, Wisconsin Department of Natural Resources, commented that although American ginseng is rare in Wisconsin, he knew of a few places, all on public land, where it was somewhat common. He expressed concern about the threat of collecting, but did not know if there were enough plants in the State to make collecting economically worthwhile.

The MA has forwarded to the ESSA three permit applications for international export of wild American ginseng collected in Wisconsin.

Destruction or removal of certain plants from private or public lands is prohibited by Wisconsin law unless written permission is obtained from the landowner or appropriate agent. American ginseng is not one of the protected plants. However, Wisconsin (94.36) has established a collecting season from August 1 to January 1.

Some sections of Wisconsin may be capable of supporting a sustained harvest of American ginseng. However, the State does not have adequate management programs nor regulatory mechanisms to promote the conservation of American ginseng and to regulate a harvest.

Finding. Negative.

[1] From Crowe, 1975.

BOBCAT

Literature Review. In 1975, Crowe (see 3) reported that in Wyoming, most bobcats mate in March and most young are born within two weeks of June 1. Analysis of 81 reproductive tracts indicated that all females including those born the previous spring ovulated during the breeding season, and that litter size averaged 2.79 kittens. Crowo suggested that annual mortality is less than three percent, among adults in unexploited populations, and concluded that in exploited populations high trapping mortality would obscure such a low death rate during early adulthood. However, Crowe reported that mortality among juveniles is highly veriable, with years of low and years of high juvenile survival directly associated with prey densities.

Crowe assumed that ADC recovery represents a constant percentage of the wild population. He concluded that increased trapping pressure requires more sophisticated management, and that as of 1974, bobcat numbers were at a low point.

Discussion. The data available to the ESSA are insufficient to support a positive finding for international export of bobcat taken in Wyoming.

Bobcat populations in Wyoming appear to vary inversely with density of prey populations and with trapping pressure. The major decrease in ADC recovery since 1961 suggests actual population decline in Wyoming, but the inadequacy of these data draw into question any conclusions based upon them. Although Wyoming may be capable of supporting a sustained yield of bobcat, the data are inadequate to assess the status of the species in the State.

In addition, Wyoming has not established an annual limit on bobcat harvest based on the animal's population status, nor has the State established a tagging system to enforce such limits.

Finding. Negative.

LYNX

Discussion. Earl Thomas, Wyoming Game and Fish Department, stated orally that the lynx is completely protected by State law.

Finding. Negative.

RIVER OTTER

Discussion. The river otter is completely protected by Wyoming law (see 54).

Finding. Negative.

AMERICAN GINSENG

Discussion. The ESSA has no information that American ginseng occurs in Wyoming.

Finding. Negative.

Publication of these preliminary findings has been approved unanimously by the members of the Endangered Species Scientific Authority.

Dated: August 24, 1977.

WILLIAM Y. BROWN,
Executive Secretary, Endangered Species Scientific Authority.

PENICILLIN

Use in Animal Feed

V42168 AUG 30 77
UMI

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Food and Drug Administration

[21 CFR Parts 505, 510, 558]

[Docket No. 77N-0231]

PENICILLIN IN ANIMAL FEEDS

Proposed Rulemaking

AGENCY: Food and Drug Administration.

ACTION: Proposed rule.

SUMMARY: This proposal would amend regulations to delete provisions that provide for use of penicillin in animal feeds.

DATE: Written comments by September 29, 1977.

ADDRESS: Written comments to the Hearing Clerk (HFC-20), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, Md. 20857.

FOR FURTHER INFORMATION CONTACT:

Gerald B. Guest, Bureau of Veterinary Medicine (HFV-130), Food and Drug Administration, Department of Health, Education, and Welfare, 5600 Fishers Lane, Rockville, Md. 20857 (301-443-3410).

SUPPLEMENTARY INFORMATION: Elsewhere in this issue of the FEDERAL REGISTER, under Docket No. 77N-0230, the Director of the Bureau of Veterinary Medicine is issuing a notice of opportunity for hearing on a proposal to withdraw approval of the new animal drug applications (NADA's) for all penicillin-containing premixes on the grounds that new evidence not available until after such applications were approved, evaluated together with the evidence available when the applications were approved, shows that such drug is not shown to be safe for subtherapeutic use, that certain applicants have failed to establish and maintain required records and reports, and that new information demonstrates there is a lack of substantial evidence of effectiveness for these products.

Consistent with this action, the Director is hereby proposing to amend the regulations to delete the provisions that provide for the use of such drugs.

The Director has carefully considered the environmental effects of this action, and because it will not significantly affect the quality of the human environment, he has concluded that an environmental impact statement is not required. A copy of the environmental impact assessment is on file with the Hearing Clerk, Food and Drug Administration. Moreover, in a proposal published in the FEDERAL REGISTER of May 27, 1977 (42 FR 27264), the Commissioner of Food and Drugs requested data concerning the potential environmental impact of a series of regulatory actions designed to restrict the subtherapeutic use of antibacterials in animal feeds. If the public discussion and information gathered warrant, a comprehensive environmental impact statement will be prepared, evaluating the impact of all the actions as a single program.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 507, 512, 59 Stat. 463 as amended, 82 Stat. 343-351 (21 U.S.C. 357, 360b)) and under authority delegated to the Commissioner (21 CFR 5.1) and redelegated to the Director (21 CFR 5.84), it is proposed that Parts 505, 510, and 558 of Chapter I of Title 21 of the Code of Federal Regulations be amended, as follows:

PART 505—INTERPRETIVE STATEMENTS RE: WARNINGS ON ANIMAL DRUGS FOR OVER-THE-COUNTER SALE

1. By amending the introductory paragraph of § 505.10 to read as follows:

§ 505.10 Animal drug warning and caution statements required by regulations.

Animal feed containing streptomycin, dihydrostreptomycin, chlortetracycline, tetracycline, or bacitracin, with other drugs. (See § 510.515 of this chapter.)

* * * * *

PART 510—NEW ANIMAL DRUGS

§ 510.5 [Amended]

2. By amending § 510.5 *Certification of new animal drugs containing any kind of penicillin, streptomycin, chlortetracycline, chloramphenicol, or bacitracin, or derivative thereof,* as follows:

a. By deleting from paragraph (b) the word "Penicillin," appearing immediately following the italicized heading, and accordingly, capitalizing the word "Streptomycin".

b. By deleting from paragraph (c) the word "penicillin" appearing in the sentence following the italicized heading.

3. By amending § 510.515: (a) By deleting from the indtroductory paragraph the phrase "penicillin, streptomycin in combination with penicillin,"; (b) by deleting from paragraph (b) (7) (i) the concluding phrase 66, or not less than 90 grams nor more than 180 grams of penicillin and streptomycin in a combination containing 16.7 percent penicillin"; (c) by revoking paragraph (b)(7)(i)(c); (d) by revising paragraph (b)(10); (e) by revoking and reserving in the table in paragraph (c) items 1, 4, 5, 6, and 7; and (f) by deleting from the table in paragraph (c) the phrase "or procaine penicillin" from items 8, 9, and 10. Section 510.515 is set forth with the revised introductory paragraph, revised paragraphs (b)(7)(i) and (b)(10) and the amendments to the table in paragraph (c) to read as follows:

§ 510.515 Animal feeds bearing or containing new animal drugs subject to the provisions of section 512(n) of the act.

Animal feeds that bear or contain chlortetracycline, feed grade zinc bacitracin, and bactracin methylene disalicylate, with or without added suitable nutritive ingredients are exempt from the certification requirements of section 512 of the act provided they are the subject of and in compliance with regulations for their use in Part 558 of this chapter, or any one of the paragraphs of this section:

* * * * *

(b) * * *

(7) (i) It is intended for use solely as a treatment for complicated, chronic respiratory disease (air-sac infection), infectious sinusitis, blue comb (non specific infectious enteritis, mud fever), and hexamitiasis in poultry, and/or bacterial swine enteritis; its labeling contains adequate directions and warnings for such use; and it contains, per ton of feed, not less than 100 grams of chlortetracycline, or oxytetracycline, or a combination of such drugs.

* * * * *

(c) [Revoked].

* * * * *

(10) It is intended for use solely in the treatment of chronic respiratory disease (air-sac infection), infectious sinusitis, and blue comb (nonspecific infectious enteritis) in poultry and/or bacterial swine enteritis; its labeling bears adequate directions and warnings for such use; and it contains, per ton of feed, the equivalent of either not less than 100 grams and not more than 500 grams of bacitracin (as zinc bacitracin), or not less than 100 grams and not more than 200 grams of bacitracin (as bacitracin methylene disalicylate); except that, if it is intended for the treatment of bacterial swin enteritis, it contains, per ton of feed, 100 grams of bacitracin (as zinc bacitracin or bacitracin methylene disalicylate). When intended for the use specified in this paragraph (b)(10), it may also contain, in the amount specified, one, but only one, of the ingredients prescribed by paragraph (a) of this section: *Provided, however,* That the level of antibiotic or antibiotic combination present is not greater than the minimum amount specified therefor in this paragraph (b)(10).

* * * * *

(c) * * *

Product	Species	Use levels	Indications for use
1 [Reserved]			
* * *	* *	* *	
4-7 [Reserved]			
8 Furazolidone and bacitracin methylene disalicylate or—Zinc bacitracin.			
9 Furazolidone and bacitracin methylene disalicylate or—Zinc bacitracin.			
10 Furazolidone and bacitracin methylene disalicylate or—Zinc bacitracin			
* * *	* *	* *	

PART 558—NEW ANIMAL DRUGS FOR USE IN ANIMAL FEEDS

§ 558.15 [Amended]

4. By amending 558.15 *Antibiotic, nitrofuran, and sulfonamide drugs in the feed of animals,* as follows: a. By deleting from the table in paragraph (g)(1):

i. The entry of Merck Sharp & Dohme Research Labs. for the drug premix procaine penicillin.

ii. The entry of E. R. Squibb & Sons, Inc., for the drug premix procaine penicillin.

iii. The entry of Pfizer, Inc., for the drug premix penicillin.

iv. The entry of Pfizer, Inc., for the drug premix of penicillin and streptomycin.

v. The entry of Merck Sharp & Dohme Research Labs. for the drug premix procaine penicillin and streptomycin sulfate.

vi. The entry of American Cyanamid Co. and Rachelle Labs, Inc., for the drug premix chlortetracycline, sulfamethazine, and penicillin.

vii. The entry of Diamond Shamrock Corp. for the drug premix chloretetracycline, sulfathiazole and penicillin.

b. By deleting from the table in paragraph (g)(2): i. The eight entries of Merck Sharp & Dohme Research Labs. and Pfizer, Inc., for procaine penicillin, streptomycin combination.

ii. The entries of Merck Sharp & Dohme Research Labs. for procaine penicillin, streptomycin, arsanilic acid combination; nicarbazin, procaine penicillin; nicarbazin, procaine penicillin, 3-nitro-4-hydroxyphenylarsonic acid; amprolium, procaine penicillin; amprolium, procaine penicillin, 3-nitro-4-hydroxyphenylarsonic acid; and amprolium, ethopabate, procaine penicillin, erythromycin.

iii. The entry of Merck Sharp & Dohme Research Labs. for amprolium, ethopabate, procaine, penicillin, 3-nitro-4-hydroxyphenylarsonic acid.

iv. The two entries of Pfizer, Inc., for penicillin, streptomycin combinations.

v. The entries of Dow Chemical Co. for zoalene, penicillin; zoalene, 3-nitro-4-hydroxyphenylarsonic acid, penicillin; and zoalene, arsanilic acid, penicillin.

vi. The phrase "or procaine penicillin" from the entry of Norwich Pharmacal Co. for furazolidone and bacitracin methylene disalicylate or-zinc bacitracin or procaine penicillin.

§ 558.55 [Amended]

5. By amending § 558.55 *Amprolium* by deleting from the table in paragraph (e)(2) the two entries in items (i), (ii) and (iv), respectively, for the combinations with penicillin, and the combination with penicillin plus streptomycin.

§ 558.58 [Amended]

6. By amending § 558.58 *Amprolium and ethopabate* by deleting from the table in paragraph (e)(1) the entries in item (iv) for the combination with penicillin, and the combination with penicillin plus streptomycin.

§ 558.76 [Amended]

7. By amending § 558.76 *Bacitracin methylene disalicylate* by deleting from the table in paragraph (e)(1) the entry in items (v) and (vi) for the combination with penicillin.

§ 558.78 [Amended]

8. By amending § 558.78 *Bacitracin, zinc* by deleting from the table in paragraph (e)(1) the entry in items (v) and (vi) for the combination with penicillin.

§ 558.105 [Amended]

9. By amending § 558.105 *Buquinolate* by deleting and reserving paragraph (f)(1)(iv) and (vi).

§ 558.145 [Revoked]

10. By revoking § 558.145 *Chlortetracycline, procaine penicillin and sulfamethazine.*

§ 558.155 [Revoked]

11. By revoking § 558.155 *Chlortetracycline, procaine penicillin, and sulfathiazole.*

§ 558.274 [Amended]

12. By amending § 558.274 *Hygromycin B* by deleting from the table in paragraph (e)(1) the three entries in item (i) for the combinations in which penicillin is an ingredient.

§ 558.460 [Revoked]

14. By revoking § 558.460 *Penicillin.*

§ 558.530 [Amended]

15. By amending §558.530 *Roxarsone* by deleting and reserving paragraph (e)(4)(xvi).

§ 558.680 [Amended]

16. By amending § 558.680 *Zoalene* by deleting from the table in paragraph (e)(1) the entries in items (i) and (ii) for the combinations containing arsanilic acid plus penicillin, penicillin, and penicillin plus roxarsone.

Interested persons may, on or before September 29, 1977, submit to the Hearing Clerk (HFC-20), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of all comments shall be submitted, except that individuals may submit single copies of comments, and shall be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between the hours of 9 a.m. and 4 p.m., Monday through Friday.

NOTE.—The Food and Drug Administration has determined that this document does not contain a major proposal requiring preparation of an inflation impact statement under Executive Order 11821 and OMB Circular A-107. A copy of the inflation impact assessment is on file with the Hearing Clerk, Food and Drug Administration.

Dated: August 24, 1977.

C. D. VAN HOUWELING,
Director, Bureau of Veterinary Medicine.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Food and Drug Administration

[Docket No. 77N–0230]

DIAMOND SHAMROCK CHEMICAL CO., ET AL.

Penicillin-Containing Premixes; Opportunity for Hearing

AGENCY: Food and Drug Administration.

ACTION: Noticc.

SUMMARY: This is a notice of opportunity for a hearing on the proposal by the Director of the Bureau of Veterinary Medicine to withdraw approval of new animal drug applications (NADA's) for all penicillin-containing premixes intended for use in animal feed on the grounds that (1) new evidence shows that the penicillin-containing products have not been shown to safe for subtherapeutic use as required by section 512(e)(1)(B) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360b(e)(1)(B)) and § 558.15 (21 CFR 558.15); (2) the applicants have failed to establish and maintain records and make reports as required by section 512(e)(2)(A) of the act (21 U.S.C. 360b(e)(2)(A)) and § 558.15; and (3) new evidence shows that there is a lack of substantial evidence that penicillin-containing premixes are effective for therapeutic uses under section 512(e)(1)(C) of the act (21 U.S.C. 360b(e)(1)(C)).

DATES: Written appearances requesting a hearing must be submitted by September 29, 1977. Data and analysis upon which a request for a hearing relies must be submitted by October 31, 1977.

ADDRESS: Written appearances and data and analysis to the Hearing Clerk (HFC–20), Food and Drug Administration, Rm. 4–65, 5600 Fishers Lane, Rockville, Md. 20857.

FOR FURTHER INFORMATION CONTACT:

Gerald B. Guest, Bureau of Veterinary Medicine (HFV–130), Food and Drug Administration, Department of Health, Education, and Welfare, 5600 Fishers Lane, Rockville, Md. 20857 (301–443–3410).

SUPPLEMENTARY INFORMATION

RELATED ACTIONS

In a notice published elsewhere in this issue of the FEDERAL REGISTER, the Director of the Bureau of Veterinary Medicine is proposing to delete the provisions that provide for the use of penicillin in animal feeds by amending § 505.10 *Animal drug warning and caution statements required by regulations* (21 CFR 505.10); § 510.5 *Certification of new animal drugs containing any kind of penicillin, streptomycin, chlortetracycline, chloramphenicol, or bacitracin, or derivative thereof* (21 CFR 510.5); § 510.515 *Animal feeds bearing or containing new animal drugs subject to the provisions of section 512(n) of the act* (21 CFR 510.515); § 558.15 *Antibiotic, nitrofuran, and sulfonamide drugs in the feed of animals* (21 CFR 558.15); § 558.55 *Amprolium* (21 CFR 558.55); § 558.58 *Amprolium and ethopabate* (21 CFR 558.58); § 558.76 *Bacitracin methylene disalicylate* (21 CFR 558.78); § 558.78 *Bacitracin, zinc* (21 CFR 558.78); § 558.105 *Buquinolate* (21 CFR 558.105); § 558.145 *Chlortetracycline, procaine penicillin and sulfamethazine* (21 CFR 558.145); § 558.155 *Chlortetracycline, procaine penicillin and sulfathiazole* (21 CFR 558.155); § 558.274 *Hygromycin B* (21 CFR 558.274); § 558.460 *Penicillin* (21 CFR 558.460) § 558.530 *Roxarsone* (21 CFR 558.530); and § 558.680 *Zoalene* (21 CFR 558.680).

DISCUSSION

Since the Director's discussion of the issues involved in this matter is necessarily detailed, he is setting forth, for the reader's convenience, an outline of the discussion as follows:

I. THE DRUG

II. INTRODUCTION

A. *Regulatory Background*

B. *Safety Concerns*

III. SUMMARY OF THE ARGUMENT

IV. STUDIES RELEVANT TO HUMAN AND ANIMAL HEALTH SAFETY CRITERIA

A. *Transfer of Drug Resistance (Criterion 1). The Pool of R-Plasmid-Bearing Organisms Is Increasing*

1. Background.
2. Criterion.
3. Studies Relevant to Transfer of Drug Resistance:
(a) R-plasmid-bearing *E. coli* develop in domestic animals that are fed subtherapeutic levels of antibiotics, including penicillin.
(b) *E. coli* contribute their R-plasmids to man through several mechanisms.
(i) Direct contact with animals.
(ii) Contact with *E. coli*-contaminated food.
(iii) Widespread presence in the environment.
(c) R-plasmid-bearing human and animal strains of bacteria overlap.
(i) Epidemiological investigations—*E. coli* serotyping.
(ii) Direct ingestion evidence.
(iii) In vivo studies show that R-plasmids transfer from *E. coli* to pathogens.
(iv) R-plasmid compatibility studies.
(v) Hazards.
4. Director's Conclusions.

B. *Shedding and Resistance Characteristics of Salmonella (Criterion 2)*

1. Background.
2. Criterion:
(a) Shedding.
(b) Resistance characteristics.
3. AHI Studies on the Effects of Subtherapeutic Levels of Penicillin in Animal Feed in Chickens:
(a) Experimental design.
(b) AHI's summary of the results:
(i) Shedding.
(ii) Resistance characteristics.
(c) The Director's analysis:
(i) Shedding.
(ii) Resistance characteristics.
4. AHI Studies on the Effects of Subtherapeutic Levels of Penicillin in Animal Feed in Swine:
(a) Experimental design:
(i) Shedding.
(ii) Resistance characteristics.
(b) AHI's summary of the results:
(i) Shedding.
(ii) Resistance characteristics.
(c) Director's analysis:
(i) Shedding.
(ii) Resistance characteristics.
5. Questions Raised by Other Studies of Salmonella: (a) CDC reports; (b) FDA survey; (c) Neu, Cherubin, Longo, Flouton, and Winter studies; (d) Smith and Tucker studies; (e) Kablan, Gustafson study; (f) Other studies.
6. Director's conclusions.

C. *Compromise of Therapy (Criterion 2(c))*

1. Background and Criterion.
2. AHI's Compromise of Therapy Study in Chickens: (a) Experimental design; (b) AHI's summary of the results; (c) Director's analysis.
3. AHI Compromise of Therapy Study in Swine: (a) Experimental design; (b) AHI's summary of the results; (c) Director's analysis.
4. Questions Raised by FDA Funded Research: (a) Experimental design; (b) Director's analysis.
5. Director's Conclusions.
6. Optimal Level of Effectiveness (Criterion 4).

D. *Pathogenicity (Criterion 3)*

1. Background and Criterion.
2. Walton study.
3. Falkow study: (a) In vitro transfer; (b) In vivo transfer.
4. Questions Raised by Other Studies.
5. Director's Conclusions.

E. *Tissue Residues (Criterion 4)*

1. Background.
2. Criterion.
3. Data Submitted.
4. Director's Analysis and Conclusions.

V. EFFECTIVENESS

VI. CONCLUSION

I. THE DRUG

Name. Procaine penicillin G (benzylpenicillin) or feed grade penicillin, alone or in combination with other drugs.

Dosage form. Feed premix.

Approvals. The following companies hold or have effective approvals that are covered by this notice:

NADA 39–077; CSP 250 (chlortetracycline, sulfathiazole, and procaine penicillin); Diamond Shamrock Corp., 1100 Superior Ave., Cleveland, OH 44114.

NADA 35–688, Aureo SP–250 Feed Premix (Chlortetracycline, sulfamethazine, and procaine penicillin); American Cyanamid Co., P.O. Box 400, Princeton, NJ 08540.

NADA 46–667; Micro-Pen and Streptomycin Sulfate Premixes, (procaine penicillin G and streptomycin sulfate). Micro-Pen 6.25 and Streptomycin Sulfate 18.75, Micro-Pen and Streptomycin Sulfate 75, Micro-Pen and Streptomycin Sulfate 45, Micro-Pen and Streptomycin Sulfate 150; Elanco Products Co., Division of Eli Lilly Co., Indianapolis, IN 46206.

DESI 0072NV; Micro-Pen and MicroPen 100 (procaine penicillin G); Elanco Products Co.

NADA 35–207; Amprolium, Ethopabate and Penicillin; Merck, Sharp & Dohme Research Laboratories, Division of Merck & Co., Inc., Rahway, NJ 07065.

NADA 46–598; Pro-Pen 50% Penicillin Mixture Medicated, Pro-Pen "20" Penicillin Mixture Medicated, Pro-Pen 90% Penicillin Mixture Medicated, and Pro-Pen "100" Penicillin Mixture Medicated; Merck, Sharp & Dohme Research Laboratories.

NADA 9–476; Nicarbazin, Penicillin with/or without Roxarsone; Merck, Sharp & Dohme Research Laboratories.

NADA 46–981 Pro-Strep (procaine penicillin, streptomycin sulfate); Merck, Sharp & Dohme Research Laboratories.

NADA 46–726; Streptomycin and Procaine Penicillin Premix 15+5, Streptomycin and Procaine Penicillin Premix 18.75+6.25, Streptomycin and Procaine Penicillin Premix 45+15, Streptomycin and Procaine Penicillin Premix 75+25; Pfizer, Inc., New York, NY 10017.

NADA 46–668; Penicillin Premix P–4, Penicillin Premix P–50, and Penicillin Premix P–100; Pfizer, Inc.

NADA 49–287; Chlorachel 250-Swine (chlortetracycline, sulfamethazine, and procaine penicillin G): Rachelle Laboratories, Inc., 700 Henry Ford Ave., P.O. Box 2029, Long Beach, CA 90801.

NADA 91–668; Super Chlorachel 250-Swine (chlortetracycline, sulfamethazine, and procaine penicillin G); Rachelle Laboratories, Inc.

NADA 46–666; Penicillin G Procaine for Animal Feeds 50 percent and Penicillin G Procaine for Animal Feeds 100 percent; E. R. Squibb & Sons, Inc., P.O. Box 4000, Princeton, NJ 08540.

Under section 108(b)(2) of the Animal Drug Amendments of 1968 (Pub. L. 90–399), any approval of a new animal drug granted prior to the effective date of the amendments whether through approval of a new drug application, master file, antibiotic regulation, or food additive regulation, continues in effect until withdrawn in accordance with the provisions of section 512 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360b). Many such approvals were issued long ago, and some may never have been used by the holder of the approval. Consequently, the current files of the Food and Drug Administration (FDA) may be incomplete and may fail to reflect the existence of some approvals. Also, many approvals have been withdrawn by other agency actions, e.g., FDA's rulemaking procedure published in the FEDERAL REGISTER of February 25, 1976 (41 FR 8282). The burden of coming forward with documentation of unrecorded approvals in such circumstances is therefore properly placed on the person claiming to hold such approvals so as to permit definitive revocation or amendment of the regulations.

The Director of Bureau of Veterinary Medicine knows of no approvals affected by this notice other than those named herein. Any person who intends to assert or rely on such an approval that is not listed in this notice shall submit proof of its existence within the period allowed by this notice for opportunity to request a hearing. The failure of any person holding such an approval to submit proof of its existence within that period shall constitute a waiver of any right to assert or rely on it. In the event that proof of the existence of such an approval is presented, this notice shall also constitute a notice of opportunity for hearing with respect to that approval, based on the same grounds set forth in this notice.

Conditions of use. All uses of penicillin in penicillin and penicillin-containing combination drug products as cited in: Sections 510.515, 558.15, 558.55, 558.58, 558.76, 558.78, 558.105, 558.145, 558.155, 558.274, 558.460, 558.530 and 558.680.

II. INTRODUCTION

A. Regulatory Background

Antibacterial drugs have been used at subtherapeutic levels (lower levels than therapeutic levels needed to cure disease) in animal feed for over 25 years. Growth benefits from this use were first observed when animals were fed the discard products from the fermentation process that was originally used in the manufacture of chlortetracycline. The precise mechanism of action, however, remains unclear.

Initially, certifiable antibiotics for use in animal feed such as penicillin were regulated under the provisions of section 507 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 357). Unlike the basic private licensing system applicable to new drugs, the provisions of section 507 created a public regulation or monograph system for regulating these products, in part because of the complexities in manufacturing the products and the lack of knowledge of their chemical structures. Antibiotic residues in food from food-producing animals were then regulated under the provisions of the act dealing with adulteration and misbranding. After enactment of the Food Additives Amendment of 1958 (Pub. L. 85–929), however, residues were principally regulated by section 409 of the act (21 U.S.C. 349), which also established a public monograph system of premarket approval. Under the antibiotic monograph procedure, the pioneer manufacturer generated and submitted the basic safety and effectiveness data in an FD Form 5 (now FD–1675). A regulation was subsequently published setting forth the standards of identity, strength, quality, and purity and the packaging and labeling requirements that the product must meet. FDA approval of the same product made by another manufacturer was then conditioned solely upon a demonstration that it met the requirements of the regulation, and this is normally accomplished by batch certification. Section 507(c) of the act (21 U.S.C. 357(c)), however, permits the agency to exempt by regulation any drug or class of drugs from the certification requirement when it concludes that certification is unnecessary for the manufacture of the drugs. Antibiotics for use in animal feeds as feed ingredients were exempted from the certification requirements in 1951 (see the FEDERAL REGISTER of April 28, 1951 (16 FR 3647)), and those for use as drugs were exempted in 1953 (see the FEDERAL REGISTER of April 22, 1953 (18 FR 2335)). These are now set out in §§ 510.510 and 510.515 (21 CFR 510.510 and 510.515).

Congress enacted the Animal Drug Amendments of 1968 (Pub. L. 90–399) and consolidated the provisions of the act dealing with the premarket approval of drugs intended for use in animals (sections 409, 505, 507) into one new section, section 512 (21 U.S.C. 360b), to regulate these articles more efficiently and effectively (Senate Committee on Labor and Public Welfare, Animal Drug Amendments of 1968, S. Rep. No. 1308, 90th Cong., 2d Sess. (1968)). This legislation also brought the manufacture of antibiotics under the private license system for new drugs (id.; Hearing on S. 1600 and H.R. 3639 Before the Subcommittee on Health of the Senate Committe on Labor and Public Welfare, 90th Cong., 2d Sess. (1968)). To efficiently accomplish this change, the amendments contained a transition clause (section 108(b)) which provided that all prior approvals continue in effect and be subject to change in accordance with the provisions of the basic act as amended. In summary, all persons legally marketing antibiotics under the provisions of sections 409, 505, and 507 of that act on August 1, 1969, the effective date of the Animal Drug Amendments of 1968, were considered as holding the equivalent of an approved new animal drug application; however, all holders of such approvals are also subject to all applicable requirements of the act and regulations.

B. Safety Concerns

In the mid-1960's, FDA became concerned about the safety to man and animals of subtherapeutic antibiotic use; it studied the effects of low-level subtherapeutic feeding of antibiotics for some years. The agency supported research, held symposia, and consulted with outside experts to review these nonmedical uses of antibiotics in animal feeds. Following a report issued by the British Government Joint Committee (the Swann Committee) "On the Use of Antibiotics in Animal Husbandry and Veterinary Medicine," the Commissioner of Food and Drugs in April 1970 established a Task Force of scientists, with consultants from government, universities, and industry, to review comprehensively the use of antibiotic drugs in animal feeds. Its conclusions were published in a notice of proposed rule making published in the FEDERAL REGISTER of February 1, 1972 (37 FR 2444), which initiated the mandatory testing procedure to resolve conclusively the issues of safety surrounding the subtherapeutic use of antibiotics in animal feeds.

The principal conclusions of the Task Force were the following: (1) The use of antibiotics and sulfonamide drugs, especially in growth promotant and subtherapeutic amounts, favors the selection and development of single and multiple antibiotic-resistant and R-plasmid-bearing bacteria;

(2) Animals that have received either subtherapeutic and/or therapeutic amounts of antibiotic and sulfonamide drugs in feeds may serve as a reservoir of antibiotic resistant pathogens and nonpathogens. These reservoirs of pathogens can produce human infections.

(3) The prevelance of multiresistant R-plasmid-bearing pathogenic and nonpathogenic bacteria in animals has increased and has been related to the use of antibiotics and sulfonamide drugs.

(4) Organisms resistant to antibacterial agents have been found on meat and meat products.

V 42168 AUG 30 77 UMI

(5) There has been an increase in the prevalence of antibiotic- and sulfonamide-resistant bacteria in man.

In its report to the Commissioner, the Task Force also identified three areas of primary concern: Human health hazards, animal health hazards, and antibiotic effectiveness; and guidelines were established to show whether use of any antibiotic or antibacterial agent in animal feed presents a hazard to human and animal health.

The February 1972 proposal also announced that all currently approved subtherapeutic uses of antibiotics, nitrofurans, and sulfonamides in animal feeds would be revoked unless data were submitted to resolve conclusively the issues concerning safety to man and animals in accordance with the Task Force guidelines. That notice also proposed to establish a time table for filing commitments, conducting studies, and submitting relevant data and information. Based on the guidelines, the agency then began developing specific criteria by which safety and effectiveness of each antibiotic product might be established. The notice further suggested that protocols be submitted to the agency for comment. The criteria and studies to address them may be summarized as follows:

HUMAN AND ANIMAL HEALTH SAFETY CRITERIA

1. Transfer of drug resistance: (a) An antibacterial drug fed at subtherapeutic levels to animals must be shown not to promote increased resistance to antibacterials used in human medicine. Specifically, increased multiple resistance capable of being transferred to other bacteria in animals or man should not occur. (b) If increased transferable multiple resistance is found in coliforms, studies may be done to show whether this resistance is transferable to man.

2. The *Salmonella* reservoir: The use of antibacterial drugs at subtherapeutic levels in animal feed must be shown not to result in (a) an increase in quantity, prevalence or duration of shedding of Salmonella in medicated animals as compared to nonmedicated controls; (b) an increase in the number of antibiotic resistant Salmonella or in the spectrum of antibiotic resistance; (c) disease (caused by Salmonella or other organisms) that is more difficult to treat with either the same medication or other drugs.

3. The use of subtherapeutic levels of an antibacterial drug should not enhance the pathogenicity of bacteria, e.g., by increasing enterotoxin production. The association of toxin production characteristics with transfer factors must be investigated in well-designed studies. (Final resolution of this question was not expected within the 2-year period. Drug sponsors were expected to show evidence of work underway which would lead toward answers to this question.)

4. An antibacterial drug used at subtherapeutic levels in the feed of animals shall not result in residues in food ingested by man which may cause either increased numbers of pathogenic bacteria or an increase in the resistance of pathogens to antibacterial agents used in human medicine. Hypersensitivity to residues was to be addressed by a literature survey.

The Commissioner promulgated a final order that was published in the FEDERAL REGISTER of April 20, 1973 (38 FR 9811), and at that time the requirements imposed by the regulation became legally binding on all firms marketing antibacterial drugs used at subtherapeutic levels in feed. In the FEDERAL REGISTER of August 6, 1974 (39 FR 2839), the Commissioner proposed withdrawal of all approvals held by persons who had not complied with the initial requirements, and all these approvals were withdrawn by his order, published in the FEDERAL REGISTER of February 25, 1976 (41 FR 8282). Therefore, only those products listed in Part 558 (21 CFR Part 558) can be legally marketed at this time.

By April 20, 1974, the Bureau of Veterinary Medicine (Bureau) had begun a review of the data required by § 558.15 which was applicable to the principal antibiotics used subtherapeutically in animal feeds (penicillin and tetracycline), and by April 20, 1975, data concerning the safety and efficacy criteria for all antibiotic and sulfonamide drugs had been received. To assist the Bureau, the Commissioner asked the agency's National Advisory Food and Drug Committee (NAFDC) to review the data and issues involved and to make recommendations to him on the future uses of subtherapeutic antibiotics in animal feeds. A subcommittee of three members, the Antibiotics in Animal Feeds Subcommittee (AAFS), was appointed to work in conjunction with four expert consultants from disciplines related to the issue. The Bureau prepared 2 days' presentations concerning penicillin during which comments were heard from the drug industry, animal scientists, and other interested parties. The Bureau also prepared a comprehensive summary report with tentative recommendations for the subcommittee. (An identical procedure was carried out for the tetracyclines.) Two additional meetings were held during which subcommittee deliberations were conducted and other statements given.

In September 1976, the AAFS presented its preliminary recommendations to the parent NAFDC, and in January 1977, the subcommittee's final report was submitted to the NAFDC. The parent committee reviewed the recommendations on penicillin and accepted them. NAFDC recommended that FDA immediately withdraw approval for the subtherapeutic uses of penicillin, i.e., growth promotion/feed efficiency, and disease control.

In view of these recommendations and since the information submitted in response to § 558.15 following the guidelines and criteria had failed to resolve conclusively the issues of safety concerning subtherapeutic uses of penicillin in animal feeds, the Director of the Bureau of Veterinary Medicine is therefore proposing to withdraw approval of all subtherapeutic uses of penicillin alone and in combination with other drugs in animal feeds. Because the National Academy of Sciences/National Research Council Drug Efficacy Study Group concluded that the therapeutic use of penicillin in animal feed lacked substantial evidence of effectiveness, he is also proposing to withdraw approval of all penicillin use in animal feed.

III. SUMMARY OF THE ARGUMENT

Soon after his advisory of penicillin, Sir Arthur Fleming noted that some bacterial organisms could become resistant to the antibiotic. As the use of antibiotics has increased, the number and types of bacterial resistance have also multiplied. There is a serious concern that, in time, this will lead to declining usefulness of antibiotics in the treatment of both human and animal diseases.

The Bureau's primary concern is with that portion of increased antibiotic resistance in the ecological system which may result from the practice of using subtherapeutic levels of penicillin and other antibiotics in animal feed for prolonged periods. This practice, which sometimes produces increases in growth promotion/feed efficiency, provides an ideal environment for selective pressure to operate. When exposed to an antibiotic, the organisms that are drug resistant survive while the growth of other (drug-sensitive) bacteria is inhibited. Eventually, the antibiotic-resistant organisms predominate in the bacterial population, and continuous antibiotic pressure perpetuates this abnormal situation.

Bacterial antibiotic resistance is primarily determined by genetic elements termed "R-plasmids" (R-factors, R+). The Bureau's specific concern, therefore, is with the health hazard that may arise through an increase in the pool of R-plasmids in the animal population and the potential transfer of these R-plasmids and R-plasmid-bearing organisms to the human population and surrounding environment.

R-plasmids are small lengths of DNA that are separate from the bacterial chromosome. These R-plasmids carry transferable genes for drug resistance as well as the capacity to reproduce themselves. Plasmids may determine resistance to more than one antibiotic, and resistance to several antibiotics is common. Moreover, plasmids can transfer from one bacteria to another and from nonpathogenic to pathogenic strains. Transfer occurs, although with varying frequency among all members of the enteric bacteria and also to members of other families of bacteria. The pool of normal Gram-negative bacterial intestinal flora (largely *Escherichia coli*) serves as a reservoir of R-plasmids; the R-plasmid-bearing bacteria interchange among animals, man, and the environment. The potential for harm increases as the R-plasmid reservoir increases because the probability of R-plasmid transfer to pathogens increases. When the Commissioner required all holders of approved NADA's for the subtherapeutic use of penicillin in animal feed to submit data to resolve the safety questions raised, he was principally concerned with the effect of the antibiotics approved for subtherapeutic use in animal feed on the emergence of transferable drug resistance in the Salmonella reservoir and the *E. coli* of animals. In the Director's opinion, the results of the studies submitted and the data available are clear; the affected parties have failed to answer the safety questions raised.

Evidence demonstrates that the use of subtherapeutic levels of penicillin and other antibiotics in animal feed contributes to the increase in antibiotic resistant *E. coli* and in the subsequent transfer of this resistance to Salmonella. Further, many strains of *E. coli* and Salmonella infect both man and animals.

The holders of approved NADA's have submitted no evidence to demonstrate that the observed strains of *E. coli* and Salmonella in man and animals are mutually exclusive; in fact, the evidence is overwhelming to the contrary. Furthermore, in some cases the R-plasmids as well as the resistance genes from humans and animal sources are indistinguishable. Thus, the potential for harm exists, as illustrated by the studies submitted and verified by evidence from studies conducted by independent scientists. No evidence has been submitted by any NADA holder to resolve conclusively the safety questions raised by this potential in accordance with the requirements of § 558.15.

The holders of approved NADA's were also required to submit studies demonstrating that the subtherapeutic use of penicillin in animal feed would not compromise subsequent antibiotic therapy in man or animals, but animal studies submitted on their behalf by the Animal Health Institute to determine whether subtherapeutic penicillin use compromised subsequent therapy with related drugs were inconclusive because the studies were improperly designed. Thus, holders also failed to show conclusively that subtherapeutic penicillin use is safe in accord with that criterion.

Additionally, the NADA holders were required to prove that the subtherapeutic use of penicillin would not increase the pathogenicity of the infecting organism. They have submitted no adequate studies on the issue, and other recent evidence now suggests that the genetic determinants for toxic production may become linked with drug resistance genes. Thus, the sponsors failed to satisfy that criterion also.

No studies have ever been submitted on the issues of the safety of penicillin residues in food or the effect of long-term use on the penicillin levels needed to maintain their subtherapeutic effectiveness.

Finally, the National Academy of Sciences/National Research Council Drug Efficacy Study Group evaluated the effectiveness claims for the penicillin premixes and concluded that there was a lack of substantial evidence that the premixes were effective for their therapeutic claims. No adequate and well-controlled investigations showing that these products are effective have been submitted.

None of the specified human and animal health safety criteria have been satisfied, and the premixes lack substantial evidence of effectiveness for their therapeutic claims. For all the foregoing reasons, the Director is proposing to withdraw approval of all NADA's for the use of penicillin and combination products, e.g., chlortetracycline-sulfamethazine-penicillin, in animal feed.

IV. STUDIES RELEVANT TO HUMAN AND ANIMAL HEALTH SAFETY CRITERIA

A. *Transfer of Drug Resistance (Criterion 1). The Pool of R-Plasmid-Bearing Organisms is Increasing*

1. *Background.* One of the most important animal and human health safety criteria (number 1., set forth in II. B. above) concerns the role of subtherapeutic antibiotic use on the selection for and increase in the pool of microbial plasmids determining multiple drug resistance, and in the transfer of these plasmids among bacteria in animals and man. Resistance to antibiotics has been known as long as the antibiotics themselves have been known. Until 1959 it was believed that antibiotic resistance was a result of chance mutation and natural selection alone. However, in 1959, Japaneses investigators (Ref. 1) discovered that resistance to several common antimicrobial agents could be transferred simultaneously from one bacterium to another by cell-to-cell contact (conjugation). This was shown to be due to the transfer of extrachromosomal resistance determinants called R-plasmids, i.e., R-factors, or R+. Resistance produced by R-plasmids generally involves the production of enzymes that inactivate the antibiotic. For example, R-plasmid mediated penicillin resistance is due to the production of an enzyme, penicillinase, that inactivates the penicillin molecule. This same enzyme is also active against many semisynthetic penicillins, including ampicillin. R-plasmids may carry as many as nine drug resistance genes. The plasmids also carry other genes that determine the R-plasmid's replication, independent of the host chromosome, as well as information for transfer of the R-plasmids from one bacterium to another by conjugation. R-plasmids are transferred by conjugation to virtually all Enterobacteriaceae as well as to such unrelated Gram-negative bacteria as *Vibrio, Pseudomonas,* and *Pasteurella.* Thus, resistance may pass from strain to strain, species to species, and most importantly, from nonpathogen to pathogen. R-plasmids are now known to be the predominant cause of antibiotic resistance in Gram-negative organisms that cause human disease, e.g., *E. coli, Salmonella, Shigella,* etc.

While the development of antibiotics revolutionized the treatment of infectious disease in both man and animals, the magnitude of this achievement has been diminished by the widespread emergence of antibiotic resistant bacteria. R-plasmid mediated resistance is particularly ominous since selection of resistance to a single antibiotic may also lead to the simultaneous selection of resistance to a wide spectrum of other antibiotics. In recent years, antibiotic resistance has emerged in important pathogens; for example, in *Haemophilus, Neisseria gonorrhoeae,* and *Salmonella typhi.* R-plasmid mediated resistance has been identified in epidemics around the world, e.g., *Salmonella typhimurium.* Some of these organisms have acquired both ampicillin and chloramphenicol resistance, producing disease that will no longer respond to therapy. Hence, drug-resistant organisms have become an important concern in both human and veterinary medicine. (Ref. 2 and 3).

Because the use of antibiotics is extensive, an effort must be made to assure the future utility of these lifesaving products. In 1960, the annual production of antibiotics in the United States was 4.16 million pounds, of which 2.96 million pounds were used for therapeutic purposes in human and veterinary medicine and 1.20 million pounds in animal feed additives. By 1970, 9.6 million pounds were being used for human and veterinary medicine pharmaceuticals; for animal feed additives, 7.3 million pounds were being used. Moreover, according to "Synthetic Organic Chemicals. United States Production and Sales (1971–1975)" (U.S. International Trade Commission Publication 804), the 5-year average production for 1971 through 1975 was 11.16 million pounds for medicinal uses and 7.68 million pounds for nonmedicinal uses, including feed additive uses. Over those 5 years, the aggregate average of the total production for those nonmedicinal uses was 40.8 percent—but 48.6 percent in 1975. Thus the use of antibiotics in animal feeds is a considerable element in the overall use of antibiotics in this country and consequently must be considered a potentially significant contributor to the resistance problem.

2. *Criterion.* The FDA Task Force concluded that a human health hazard exists if the subtherapeutic use of antibiotics in animal feeds leads to an increase in R-plasmid-bearing organisms, if these antibiotics used subtherapeutically are also used in human clinical medicine, and if R-plasmids subsequently appear in bacteria in man. It was the intent of the Task Force as well as the intent of § 558.15 to reduce the total load of resistant organisms in the environment and to ensure the effectiveness of antibiotics in the treatment of disease in man and animals. Accordingly, § 558.15 required the following:

An antibacterial drug fed to animals shall not promote an increase of coliforms that are resistant to antibacterial drugs used in human clinical medicine and capable of transferring this resistance to bacteria indigenous to the intestinal tract of man. Studies must be undertaken to assess the occurrence and significance of these events:

a. Controlled studies shall be undertaken to determine whether or not the administration of an antibacterial drug at low and/or intermediate levels to target animals results in an increase in the numbers of coliforms bearing R-

V 42168 AUG 30 77 UMI

plasmids present in the intestinal tract of the animal or a change in the resistance spectrum of these organisms compared to those found in controls receiving no antibacterial drug. The resistance spectrum must be determined to ascertain whether or not there are determinants present for resistance to antibacterial drugs used in human clinical medicine.

b. If the resistance determinants indicated in a. are found, a sponsor may elect to conduct additional studies to determine if such multiple drug resistance is transferable to the indigenous coliforms in the intestinal tract of man.

In addition to the FDA Task Force, many other scientists were concerned that the use of antibiotics at subtherapeutic levels in feed might lead to the development of R-plasmid-bearing organisms in food animals, which might then spread to man. The normal enteric organisms that can serve as this reservoir are the coliforms, in particular *E. coli*. These *E. coli* can donate the R-plasmids to other bacteria, including pathogens, e.g., pathogenic *E. coli*, *Salmonella*, etc.

3. *Studies Relevant to Transfer of Drug Resistance*—(a) *R-plasmid-bearing E. coli develop in domestic animals that are fed subtherapeutic levels of antibiotics, including penicillin.* Many investigators have reported the presence of R-plasmid-bearing *E. coli* in domestic animals such as chickens, swine and cattle. The influence of antibiotic-supplemented feed in increasing the number of resistant organisms has been extensively documented. Mercer et al. (Ref. 1) showed that 394 of 491 isolates (80 percent) from animals exposed to antibiotics in feed, including penicillin, were resistant strains, and in contrast, only 14 of 64 isolates (21.9 percent) obtained from animals not exposed to antibiotics in feed were resistant strains. Mercer also reported that plasmid-mediated ampicillin resistance occurred more frequently in animals that were exposed to subtherapeutic levels of penicillin in their feed than in nonmedicated animals. Seigel et al. (Ref. 2) Smith and Tucker (Ref. 3), Katz et al. (Ref. 4), and others have also shown that the addition of penicillins to feed at subtherapeutic levels causes a significant increase in the R-plasmid-bearing coliform population of the intestinal flora of animals. Even the data submitted by the drug industry on the effect of subtherapeutic use of penicillin on the *E. coli* flora of poultry, which will be discussed in depth in part IV. B. 3. below, also show an increase in drug-resistant *E. coli*.

Accordingly, the Director has concluded that subtherapeutic use of penicillin in animal feed produces a high level of antibiotic resistant *E. coli* and that the subtherapeutic use of penicillin selects for R-plasmid-containing bacteria in animals (human health criteria 1.(a) set forth in II. B. above), i.e., the antibiotic pressure of subtherapautic penicillin use allows microbial R-plasmid-containing populations to predominate. These populations appear to be stable and persistent, even in the absence of penicillin pressure. Once the reservoir of R-plasmids develops, the initial cause of the R-plasmid buildup, whether the subtherapeutic use of penicillin or another drug (or drug combinations), is irrelevant to the R-plasmids' transferability or movement from animals to humans. Therefore, all studies on the movement of R-plasmids and resistant bacteria are germane to this issue even though penicillin was not always used as the specific antibiotic.

(b) *E. coli contribute their R-plasmids to man through several mechanisms.* There has been much debate over the extent to which *E. coli* in the animal community act as a source of R-plasmid-bearing strains for man. This is perhaps the most controversial and most difficult aspect of R-plasmid ecology to assess. Drug-resistant bacteria originating in animals may reach man (1) by direct contact with animals, (2) through the food chain, and (3) because of their widespread occurrence in the environment.

(i) Direct contact with animals: A number of studies have shown that humans in contact with animals receiving medicated feed, including subtherapeutic levels of penicillin, have a higher incidence of drug-resistant organisms in their flora than do control populations without this direct contact. Linton et al. (Ref. 1) found a higher incidence of drug-resistant *E. coli* in adults employed with livestock husbandry than other rural or urban adults. Wells and James (Ref. 2) found a higher incidence of drug-resistant *E. coli* in humans in contact with pigs given certain antibiotics than in humans in contact with pigs that had not been given antibiotics.

Seigel et al. (Ref. 3) compared the proportion of resistant organisms in fecal samples from: (*a*) people working on farms who were continuously in contact with the predominantly resistant flora of animals receiving subtherapeutic levels of penicillin; (*b*) people residing on the same farms with no direct exposure to the farm animals; (*c*) people treated with antibacterial drugs; (*d*) untreated people residing with treated individuals; (*e*) untreated people with no exposure to farm animals or treated individuals.

The data (Ref. 3) indicate that the enteric flora of individuals not directly exposed to the selective effects of antibiotics can be affected by contact with animals; furthermore, these individuals may be affected by contact with other people who have a predominantly resistant flora as a result of their exposure to subtherapeutic levels of antibacterials in feeds.

A study sponsored by the Animal Health Institute, Levy et al. (Ref. 4), examined the change in intestinal microflora of chickens, farm dwellers, and their neighbors before and after a tetracycline-supplemented feed was introduced on the farm. Within 1 week after introduction of this antibiotic in their diet, the *E. coli* of the chickens were almost entirely tetracycline resistant. Subsequently, at a slower rate, increased numbers of antibiotic-resistant bacteria appeared in the flora of the farm dwellers. No such increase was observed in the farm neighbors, who were not exposed to the animals fed subtherapeutic antibiotics. Within 5 to 6 months, 31.3 percent of weekly fecal samples from farm dwellers contained greater than 80 percent tetracycline-resistant bacteria compared to 6.8 percent of the samples from the neighbors. This is statistically significant ($P<0.001$). Using a specially marked resistance gene to identify a particular plasmid, Levy was also able to demonstrate the direct spread of resistant organisms from chickens to chickens and from chickens to man (Ref. 5).

Although penicillin was not used in this study, resistance to both penicillin and tetracycline is plasmid mediated; therefore, the study is germane to the question of the transfer of resistant organisms from animals to man. These studies demonstrate that the subtherapeutic use of certain antibiotics increases the pool of R-plasmid-bearing *E. coli*, and they define one route by which antibiotic-resistant strains can enter the human population. While this route is of great importance to farm dwellers, the majority of the population has no contact with live animals. For this segment of individuals, a more important route of exposure by which resistant bacteria can pass to man is by the handling and ingestion of meat and poultry products contaminated with R-plasmid-bearing *E. coli* of animal origin.

(ii) Contact with *E. coli*-contaminated food: To assess adequately the significance of the problem of human food contaminated with *E. coli*, Howe and Linton (Ref. 1) described four factors that must be measured: (*a*) The incidence of R-plasmid-bearing *E. coli* in food-producing animals; (*b*) the load and frequency of excretion of *E. coli* from these animals; (*c*) the degree and source of contamination of carcasses at slaughter; and (*d*) the overlap of *E. coli* serotypes in various host animals with those commonly found in humans. A number of surveys have clearly documented that pigs, calves, and poultry carry a large reservoir of antibiotic-resistant *E. coli*. These include investigations by Anderson; Loken; Mercer; Smith; Howe, Linton and Osborne; Smith and Crabb (Refs. 2 through 8, and 15). In these surveys, animals excrete large numbers of *E. coli* organisms resistant to a wide range of clinically useful antibiotics, and these animals clearly constitute a reservoir "rich" in R-plasmids. Moreover, they excrete a large variety of distinct serotypes of *E. coli*.

During the slaughtering process, contamination of carcasses with intestinal microorganisms cannot be prevented. Meat and meat products are often contaminated with antibiotic-resistant *E. coli*, and these often reach the human consumer. Walton (Ref. 9) demonstrated that 52 percent of the bovine (beef) and 83 percent of porcine (pork) carcasses slaughtered at commercial abattoirs were contaminated with *E. coli*. Walton and Lewis (Ref. 10) isolated resistant *E. coli* from 21 of 50 specimens of fresh meat and from 4 of 50 specimens of cooked meat. Babcock et al. (Ref. 11) isolated multiresistant *E. coli* from 80 percent of 98 samples of dressed beef. Resistance in most cases was found to be transmissible.

Similar incidents of *E. coli* contamination occur with the slaughter of chickens. Kim and Stephens (Ref. 12) found a high incidence of R-plasmid-bearing *E. coli* in "ready to cook" broiler chickens. The greatest number of *E. coli* isolated were obtained from the fluid and abdominal cavity, suggesting that the principal source of these microorganisms is the intestines. Furthermore, poultry meat has been incriminated as a source of *E. coli* for patients in hospitals (Cooke et al., and Shooter et al. (Refs. 14 and 18)).

The presence of antibiotic-resistant (R-plasmid-bearing) *E. coli* in the animal intestinal tract and on the carcass does not conclusively prove that the *E. coli* are identical organisms. However, recent studies using serotyping methods have characterized resistant and sensitive *E. coli* isolated from the animal intestinal tract and carcass (Refs. 13, 15, 16, and 17) and have found that the resistant O-serotypes on the carcasses of pigs, calves, and poultry frequently are identical to those isolated from the fecal contents of the same animal. Moreover, Linton, Howe, et al. (Ref. 17) showed that a large number of *E. coli* found on table-ready thawed chickens were resistant to therapeutically important antibiotics. The organisms reaching the kitchen included a wide diversity of O-serotypes of antibiotic-resistant *E. coli*. Similarly, Shooter et al. (Ref. 13) described the distribution and serotype of strains of *E. coli* from a poultry packing station and an abattoir. Shooter concluded that "results in both the abattoir and the poultry packing station indiacte that there is transfer of strains from the faeces of the animals to the environment and that the strains of *E. coli* found on the carcasses of poultry, cattle and beef will originate from the feces of the animal and from the environment and will reffect the history of the carcass."

Foodborne *Salmonella* infections in man are a well-recognized and continuing problem. Animal meat products that serve as a primary source of *Salmonella* infections in humans also serve as a source of other bacteria for man including R-plasmid-bearing enteric bacteria (Ref. 19). Based on this evidence, the Director must conclude that man is exposed to R-plasmid-bearing intestinal bacteria through contact with contaminated food. Because the drug resistance of these bacteria is increased by feeding the animals subtherapeutic levels of antibiotics, such feeding enhances the likelihood of transmitting R-factor-bearing bacteria to man through contact with contaminated food.

(iii) Widespread presence in the environment: Many studies (Ref. 1 through 6) have shown that intestinal bacteria (e.g., *E. coli* and *Salmonella*) carrying R-plasmids are widespread in the environment. Resistant strains reach the environment from raw and treated municipal, hospital, and animal wastes. The number of R-plasmid-bearing bacteria reported in sewage and the effects of sewage treatment vary. Most surveys indicate that hospital sewage contains more drug-resistant coliforms, more R-plasmids, and a greater proportion of R-plasmids carrying multiple resistance than sewage from domestic and other sources. However, hospitals do not constitute a large proportion of total sewage. Therefore, Linton et al. (Ref. 4) compared the contributions of hospital and domestic sources to the total pooled sewage output of the city of Bristol, and they concluded that industrial and domestic sources, rather than the hospital population, appear to be by far the greatest contributors to the reservoir of R-plasmids in the community (Ref. 7).

V 4216 8 A AUG 30 77 UMI

R-plasmid-containing bacteria also occur in rivers and sea water, and some authors have urged stricter control of discharges to surface waters. Feary et al. (Ref. 2) examined the incidence of antibiotic-resistant *E. coli* present at sites along a fresh water river system and within the salt water bay into which it empties. Antibiotic-resistant coliforms were detected in nearly all the fresh water sites sampled and in about 50 percent of the salt water sites. Feary found that 20 percent of the 194 strains tested contained R-plasmids carrying multiple antibiotic resistance which could be transferred to sensitive *Salmonella typhimurium, Shigella dysenteriae,* and *E. coli.* They also isolated coliforms containing R-plasmid carrying resistance to chloramphenicol. Transferable chloramphenicol resistance is a significant health concern since chloramphenicol is often the antibiotic of choice for the treatment of typhoid fever. In Feary's study, the incidence of coliform organisms appeared higher around heavily populated areas, but coliforms were also recovered with ease from rural areas. In one case where particularly high counts were obtained, the sample was taken below a large cattle feedlot.

The high levels of resistant coliforms may be of more consequences in the salt water since certain sections are utilized heavily by fishermen in harvesting fish, shrimp, clams, and oysters. Oysters and clams are of primary concern because they continuously filter water and concentrate bacteria in their gut and they are often eaten uncooked.

Recent reports by Cooke (Ref. 1) have also described a high incidence of resistant coliforms in marine shellfish and freshwater mussels.

Therefore, the Director must conclude that the environment is heavily contaminated with bacteria containing transferable R-plasmids. Man is exposed to the danger of acquiring R-plasmid-bearing coliforms from the environment, and the relative number of R-plasmid-bearing bacteria is increased both by the subtherapeutic use of antibiotics in animal husbandry and the use of antibiotics in human medicine. Antibiotic-resistant bacteria are now so widely distributed in the general environment that it is difficult to relate their appearance to a particular use, but any unnecessary practice that results in the ineffectiveness of antibiotics for the treatment of disease should be eliminated.

(c) *R-plasmid-bearing human and animal strains of bacteria overlap.* Typing of surface bacterial antigens is used as a means of identifying bacterial strains. Three types of specific surface antigens are associated with the *E. coli* cell: An "O" cell wall lipopolysaccharide antigen, a "K" capsular or envelope antigen, and an "H" flagellar protein antigen which occurs among mobile organisms. The antigens are characteristic of a specific organism, and they serve to identify distinct bacterial types (serotypes) within species. Their presence is detected by the ability of *E. coli* organisms to interact with specific antiserums.

(i) Epidemiological investigations—*E. coli* serotyping: (a) Despite the widespread occurrence of R-plasmids in the environment, some workers (Bettelheim et al., Ref. 1) suggested that human *E. coli* and animal *E. coli* were distinct. These workers argued that there were marked differences in serotype distribution in strains isolated from man and animals; they also suggested than animal strains of *E. coli* were not reaching the human population or were failing to implant in the bowel. More recently, however, this same group, Bettelheim et al. (Ref. 2), compared the serotypes of 13,139 strains of *E. coli* isolated from humans with the serotypes of 1,076 animal strains of *E. coli;* 708 different O/H serotype combinations were found. Of these, 520 were found in human strains only, 130 from animal strains only, and 58 O/H serotypes from humans and animals. The authors concluded:

> At first glance the results described in this paper would indeed support the view that human and animal strains of *E. coli* are largely distinct. Second thoughts, however, suggest a little caution in accepting the opinion too firmly.
>
> However thoroughly human or animal stools are examined, only a minute fraction of the total bacterial content is examined, and inevitably strains recorded as being isolated tend to be those that predominate. It is always probable that if examination is continued, further strains may be isolated but after an amount of work that is impracticable in any ordinary investigation. If this is so, it is possible that many of the strains recorded as coming from humans only or from animals only might, with more diligent examination, be recorded as present in both man and animals.

2. Bettelheim, K. A., N. Ismail, R. Shinebaum, R. A. Shooter, E. Moorehouse, and Wendy Farrell, "The Distribution of Serotypes of *Escherichia coli* in Cow-Pats and Other Animal Material Compared with Serotypes of *E. coli* Isolated from Human Sources," Journal of Hygiene, 76:403–406, 1976.

(b) Linton, Howe, Richmond, and their collaborators (Refs. 1 through 4) also conducted extensive epidemiological investigations. They found a wide range of resistant and sensitive O-serotypes of *E. coli* in calves, pigs, and poultry, and they compared these serotypes with those found in the human intestine. The authors found that many O-serotypes common to man were also common to one or more of the three animal species examined. Thus, they concluded that it is impossible to make a clear distinction between "animal" and "human" intestinal strains of antibiotic-resistant *E. coli* based on O-serotyping alone. More importantly, the studies suggest a considerable overlap in the distribution of R-plasmid-bearing O-serotypes in man and in animals. Moreover, the same resistant serotypes, which predominate in the *E. coli* populations from healthy human and animal fecal sources, were also prevalent among R-plasmid-bearing strains from clinical material (Ref. 5).

Because the use of O-serotyping alone as an epidemiological tool has been criticized on the grounds that it is incomplete and inadequate, Howe and Linton (Ref. 2) examined *E. coli* for the K and H antigens as well as the O antigen. They studied 90 strains, 17 chosen at random from human urinary tract infections, 17 from human feces, and 56 from calf feces, all belonging to O-types 8, 9, and 101. The authors found the same K and H antigens in certain strains of the same O-types from each of the three *E. coli* sources. Additionally, K and H antigens associated with these O-serotypes were not specific to antigens associated with these O-serotypes were not specific to *E. coli* isolated from humans or from calves. Although further subdivision of the three O-scrotypes was possible by this means, the authors concluded that O-serotyping alone provided a very useful means of distinguishing strains of *E. coli* in a general survey.

These studies show that a similar range of drug-resistant R-plasmid-bearing O-serotypes of *E. coli* have been found in man and the various animal species examined. Furthermore, the studies show that the ratio of drug-resistant to drug-sensitive isolates was much higher in animals than in man (Ref. 2 and 6). Thus the abundance and diversity of drug-resistant R-plasmid-bearing O-serotypes in animals are much greater than that currently found in man, and the serotypes overlap.

(ii) Direct ingestion evidence: Direct ingestion experiments have also been conducted to show that R-plasmid-bearing *E. coli* of farm origin can colonize the human intestinal tract. In 1969, Smith (Ref. 1) concluded that animal *E. coli* strains were poorer at colonizing the intestine of man than were human *E. coli* strains. However, his observations were based on a single volunteer (himself) and a small number of *E. Coli* strains. Cooke in 1972 (Ref. 2), on the other hand, reported that it was relatively easy to produce temporary colonization of the intestine by *E. coli* strains from both human and animal sources. She reported the persistence of an *E. coli* infection of animal origin in a human volunteer for 120 days following the ingestion of a very large dose.

Other experimental studies (Refs. 3 and 4) confirm that temporary colonization occurs provided a large dose of the organisms is taken, but there is a great deal of biological variation between colonization for different strains and for different human individuals. In normal individuals the carriage of intestinal *E. coli* seems to follow a characteristic pattern. Each person carries one or two resident strains that establish themselves and multiply for months or years. In addition, four or more transient strains are present for a few days or weeks. Strains disappear and are replaced by others. Sometimes, under antibiotic pressure, a new strain suddenly takes over, later disappearing. Strains of *E. coli* thus differ in their abiilty to colonize man. Although some strains are not well adapted to colonize man, others are able to live in human as well as in animal intestines. The greater the diversity of R-plasmid-bearing O-serotypes that reach the consumer, the greater the probability that one more of these antibiotic-resistant strains will be capable of colonizing man.

Recently, Linton, Howe, Bennet, et al. (Ref. 5) demonstrated that antibiotic-resistant *E. coli* found on a commercially prepared chicken carcass colonized the intestinal tract of a human volunteer. Two strains present on the chicken carcass handled and eaten by the human volunteer were subsequently excreted by her. Both strains were undetectable in the human before contact with the chicken carcass. The strains were shown to be identical in chicken and man by comparing their serotypes (O, K, and H antigens) and R-plasmids. The plasmid complements were determined to be identical by electron microscopy and restriction endonuclease patterns. Restriction endonucleases are enzymes that cleave DNA at specific sites. Physiochemical techniques then visualize these plasmid fragments. The identity of these plasmids can be determined by a comparison of the DNA fragments generated using restriction enzymes with different recognition sequences. The Linton study also suggested that the handling of the uncooked carcass provided a greater opportunity for transmission than does eating cooked meat. The strains persisted for 10 days and the process occurred without feeding any antibiotics to the volunteer during the study. This is consistent with reports of Salmonella infections from animal sources.

(iii) In vivo studies show that R-plasmids transfer from *E. coli* to pathogens: The ingestion of R-plasmid-containing bacteria can result in in vivo R-plasmid transfer to the normal intestinal flora. When this occurs, the *E. coli* constitute a reservoir of organisms capable of transferring R-plasmids to intestinal pathogens, e.g., Salmonella. The in vivo transfer of R-plasmids has been demonstrated in sheep, mice, calves, pigs, chickens, turkeys, and in the human alimentary tract (Refs. 1 through 8). Generally, in vivo transfer is not as readily detectable as in vitro transfer. In the absence of drug selection, the rate of in vivo R-factor transfer is generally low, and large numbers of resistant donors may be required for transfer (Refs. 1 and 6). Demonstrations of in vivo transfer have usually been achieved by first modifying the normal flora of the alimentary tract by feeding antibiotics, by starvation, or by using germ-free mice or newly hatched chicks, and these procedures probably counteract the inhibitory effects of bile salts, fatty acids, acid pH, and anaerobic conditions of the normal intestinal tract.

These experimental results may not be a true indication of the extent of R-plasmid transfer in natural populations since they often involve individuals who are exposed to restricted numbers and types of donor and recipient organisms. In some instances the methods were not suitable for the detection of low level transfer. However, Smith and Tucker (Ref. 9) studied the effect of antibiotic therapy on the fecal excretion of Salmonella by experimentally infected chickens. The authors found that R-plasmid resistance developed in the indigenous *E. coli* and that very similar resistance patterns then developed in the Salmonella. These results were duplicated in some of the studies submitted by the Animal Health Institute, which are also discussed in depth under Part IV. B. below.

Regardless of the frequency with which R-plasmid transfer occurs in the absence of modifying influences, it has occurred and given rise to antibiotic resistance in bacteria, including pathogens. The conditions of the Smith and Tucker studies mimic those brought about by the practice of feeding subtherapeutic levels of penicillin and other antibiotics to animals. That practice leads to an increase in and selection for R-plasmid-bearing organisms, and it therefore increases the probability of in vivo R-plasmid transfer to pathogens.

(iv) R-plasmid compatibility studies: Another FDA study (Ref. 1) examined the compatibility properties of more than 100 R-plasmids from *E. coli* and *Salmonella* isolated from animals in or-

V 42168 AUG 30 77 UMI

der to determine whether the plasmids are related to those isolated from man. The usual method of genetically classifying plasmids is based on their ability to exist with each other in the same bacterium. Genetically unrelated plasmids can exist in the same host, and they are called compatible. On the other hand, related plasmids cannot coexist, and they are called incompatible. Plasmids belonging to the same incompatability group are presumed to be related.

The FDA study showed that the R-plasmid incompatibility groups seen in animal isolates show the same distribution as those found in human isolates. This suggests that human and animal bacterial populations contain the same plasmids.

A more direct apporach for examining the relationships between plasmids is to measure the proportion of DNA sequences (that is, the number of similar or identical genes) that are common to any two plasmids (DNA–DNA hybridization). R-plasmids belonging to the same incompatibility groups of human and animal origin are identical when examined by DNA–DNA hybridization techniques (Refs. 2 and 3). Restriction endonuclease activity has also confirmed the similarity of R-plasmids isolated from enteric organisms of human and animal sources (Ref 4). Therefore, the Director must conclude that R-plasmids of human origin are indistinguishable from those of animal origin.

(v) Hazards: Although antibiotic-resistant *E. coli* in the intestinal tract of humans may generally cause no immediate problems to an individual, under proper circumstances their presence may lead to dangerous situations. For example, *E. coli* is the most common cause of urinary tract infections in man and commonly arises from a person's own intestinal flora. While sulfonamides are generally the drug of choice, a significant number of infections with sulfonamide-resistant strains are now reported, necessitating treatment with penicillin.

Resistant *E. coli* in the intestine of man also constitute a reservoir of organisms capable of transferring R-plasmids to intestinal pathogens. Perhaps the greatest hazard to human health arising from the use and misuse of antibiotics is the large reservoir of plasmid-mediated resistance genes in the normal flora of animals and man and present in the environment—resistance that can be transferred from nonpathogenic to pathogenic organisms.

In recent years the emergence of R-plasmid-mediated resistance in dangerous pathogens has been identified in epidemics around the world. A strain of *Salmonella typhi* carrying an R-plasmid-mediating resistance to chloramphenicol caused an epidemic of typhoid fever in Mexico. Transferable chloramphenicol resistance has also become common in *S. typhi* isolated in India, Vietnam, and Thailand (Ref. 1). The recent epidemic of drug-resistant *Shigella dysenteria* infection in Central America (Ref. 2) is another example of an epidemic disease that was no longer susceptible to treatment by the antibiotics that had previously been used for its treatment. Plasmid-mediated resistance has been reported in strains of *Bordetella bronchiseptica* (Ref. 3), and FDA scientists have demonstrated plasmid-mediated resistance to penicillin, tetracycline, streptomycin, and sulfonamide in strains of *Pasteurella multocida* and *P. haemolytica*, both of which cause serious diseases in animals (Refs. 3 and 4).

Recent studies (Refs. 5 through 12) have also shown that the genes specifying resistance to ampicillin, tetracycline, kanamycin, chloramphenicol, trimethoprim, and streptomycin reside on DNA sequences that are able to translate or move from plasmid to plasmid as a discrete unit, or from a plasmid to the bacterial chromosome. Therefore, in addition to movement of resistant bacteria from animals to man and the transfer of R-plasmids between bacteria, the genes that reside on the plasmids can themselves migrate from plasmid to plasmid by translocation. Furthermore, an R-plasmid does not have to be maintained stably within a cell to donate its resistant genes to a recipient chromosome or an indigenous plasmid.

Most bacterial species possess indigenous plasmid gene pools. In fact, plasmids have been found in all species of bacteria examined. The function of these plasmids is often unknown, but they could serve as effective recipients for the insertion of translocatable genes. The recent emergence of ampicillin-resistant strains of *Haemophilus influenzae* and penicillin-resistant strains of *Neisseria gonorrheae* represent alarming examples of the extension of the R-plasmid gene pool (Refs. 13 and 14). The resistance genes found in both species are identical to those previously found only in *E. coli* and other enteric organisms.

The World Health Organization prophetically warned (Ref. 15):

> The point will ultimately be reached at which the transfer of resistance to pathogens becomes inevitable and the larger the pool, the greater is this possibility. Moreover, the wide the distribution of R+ (R-factor) enterobacteria the greater the possibility that R-plasmids may emerge that can cross biological barriers so that they can perhaps enter bacterial species and genera apparently widely different from their original enterobacterial hosts.

4. *Dirrctor's conclusions.* The holders of the approved NADA's for subtherapeutic penicillin-containing products were required to show that the subtherapeutic use of penicillin does not increase drug resistance (increase the pool of R-plasmid-bearing) organisms in animals. If they were unable to show that subtherapeutic penicillin use does not increase the pool of R-plasmid-bearing organisms in animals, the holders were then required to show that the R-plasmids are not transferable from animals to man. They failed to do any of this.

The evidence shows that the pool of R-plasmid-bearing organisms, particularly in *E. coli*, is increasing, and that the increase is due at least in part to the subtherapeutic use of penicillin in animal feed. Further evidence shows that *E. coli* contribute their R-plasmids to man through his direct contact with animals, through his direct contact with *E. coli*-contaminated food, and by widespread presence of the R-plasmids in bacteria in the environment. Studies also show that there is no strict distinction between the *E. coli* that colonize animals and those that infect man. On the contrary, there is considerable overlap in these strains, and there is also an overlap in the enteric bacterial R-plasmid population in humans and animals. This evidence is derived from epidemiology studies, bacterial ingestion studies, and compatibility studies of the normal intestinal flora of man and animals. These bacteria may donate their R-plasmid to pathogens in man and animals even when transient, and the NADA holders have submitted no evidence on the degree of colonization, if any, that is necessary for this transfer to occur. Accordingly, the Director concludes that the holders of the approvals for the subtherapeutic penicillin-containing products for use in animal feeds have failed to satisfy the requirements of § 558.15 and criterion 1 of this notice.

B. Shedding and Resistance Characteristics of Salmonella (Criterion 2)

1. *Background.* A second area of concern, related to the increase in the pool of R-plasmid-bearing bacteria, is the possibility that the subtherapeutic use of antibiotics in animal feeds may lead to an increase in the duration or quantity of live *Salmonella* excreted by the animal receiving the drug(s), which will increase contamination of the environment with pathogens. This concern was generated in part by reports that antibiotic therapy in human salmonellosis patients had resulted in prolonged *Salmonella* shedding and favored the acquisition of resistence in *Salmonella*.

Aserkoff and Bennett (Ref. below), for example, presented data on the effect of antibiotic therapy on the excretion of *Salmonella* in the feces of human infected with acute salmonellosis. Following a large *S. typhimurium* epidemic caused by eating contaminated chicken, feces of untreated patients and patients treated with tetracycline, ampicillin, and chloramphenicol were examined for *Salmonella*, and the antibiotic susceptibility of the *S. typhimurium* strains was determined. Patients generally received the recommended regimen of antibiotic therapy (1 gram per day). Fecal samples from 87 patients not receiving medication and 185 patients treated with antibiotics were examined. Of the patients treated with antibiotics, 65 percent were shedding *Salmonella* 12 days after infection, and 27 percent were positive 31 days after infection. In the untreated patients, however, *Salmonella* shedding was observed in 42.5 percent at day 12 and 11.5 percent at day 31.

Antibiotic therapy also favored the acquisition of drug resistance by the infecting strain of *Salmonella*, which was initially susceptible to antibiotics. Of the patients receiving antibotics, 18 excreted resistant *Salmonella*, while none of the 87 untreated patients excreted resistant *Salmonella* ($P<.05$). The antibiotic resistance acquired in the *Salmonella* strain was shown to be transferable. Because antibiotic treatment increased shedding in human salmonellosis, FDA became concerned that subtherapeutic antibiotic, penecillin) administration in animal feeds would prolong *Salmonella* shedding in animals, and for this reason the agency established criterion 2.

REFERENCE

2. *Criterion*—(a) *Shedding.* Controlled studies were to be designed to determine whether the administration of an antibacterial drug at subtherapeutic levels would result in an increase in the relative quantity, prevalence, or duration of shedding of *Salmonella* that are pathogens in animals. *Salmonella* are often found in the intestinal tract of man and animals, and the small intestine and colon are the primary sites of multiplication. After penetrating the epithelial lining, they multiply and elicit an inflammatory response. Most *Salmonella* infections are limited to the gastrointestinal tract, producing the clinical symptom termed "gastroenteritis." One of the more common strains, *Salmonella typhimurium*, causes diseases in both man and animals.

When an animal is infected with these bacteria, the live organisms are excreted in the feces ("shedding"). The quantity of *Salmonella* in the feces can be determined by a bacteriological procedure termed a "standard plate count." A specific amount of fecal material is diluted and spread on a semisolid bacterial growth medium which is selective for the growth of *Salmonella*. After a sufficient time for growth, individual colonies are counted and recorded as the number of *Salmonella* per gram of wet feces. The proportion of antibiotic resistant *Salmonella* in fecal specimens is independent of the quantity of Salmonella shed.

(b) *Resistance characteristics.* Controlled studies were to bedesigned to determine whether the administration of penicillin at subtherapeutic levels would result in an increase in the proportion of antibiotic resistant *Salmonella*. *Salmonella* isolated from feces can be tested for their susceptibility to various antibiotic drugs. *Escherichia coli*, a normal component of the intestinal flora, were also to be examined to determine their resistance spectrum sinffice oral administration of certain antibiotics, whether at therapeutic or subtherapeutic levels, has been shown to result in an increased proportion of indigenous *E. coli* that contains R-plasmids. These *E. coli* can serve as a reservoir of R-plasmids that can be transferable to other *E. coli* or to *Salmonella*.

3. *AHI Studies on the Effects of Subtherapeutic Levels of Penicillin in Animal Feed in Chickens.* On behalf of the NADA holders, the Animal Health Institute submitted the following study to address the criterion.

(a) *Experimental design.* The Animal Health Institute submitted an experiment in which the effects of subtherapeutic levels of procaine penicillin (with or without streptomycin) in feed were investigated. The duration, quantity and antibiotic susceptibility of a *Salmonella* strain inoculated into chickens were compared in medicated and nonmedicated chickens.

Also, FDA specified that prestudy (baseline) *E. coli* antibiotic resistance levels should be under 20 percent. This value was thought to provide a reasonable level for detecting any change in the amount of antibiotic resistance resulting from administration of subtherapeutic antibiotic levels since, if the initial R-plasmid level is too high, a small change in resistance is difficult to detect.

While others served as environmental controls, 1-day-old chicks were divided into six groups, artificially infected with *Salmonella*. Each group received medicated or nonmedicated diet, according to the following plan:

Room	Group	Inoculation of salmonella 1.6×10^{9}	Antibiotics and levels used in feed	Number of chickens in experimental group
1	A	Yes	None	
2	B[1]	Yes	Procaine penicillin 50 g/ton	10
	B[1]	Yes	Procaine penicillin 12.5 g/ton, streptomycin 37.5 g/ton	10
3	C	No[1]	None	10
	D[1]	No[1]	Procaine penicillin 50 g/ton	5
	D[1]	No[1]	Procaine penicillin 12.5 g/ton, streptomycin 37.5 g/ton	5
				5

[1] Environmental controls.

Groups A and B were used to determine the influence of penicillin or penicillin-streptomycin on shedding after experimental infection and the development of drug resistance by *Salmonella* and *E. coli*, with group A serving as a nonmedicated control group. Groups C and D were controls used to monitor the environment, and the effects of the drugs in the absence of experimental infection. To assure the absence of naturally occurring Salmonella prior to the study, the sponsors examined prestudy fecal samples. The samples were grown in a selective media, brilliant green agar, and serotyping was also done. By

V 42 168 AUG 30 77 UMI

this procedure, the birds were determined to be negative for Salmonella before the experiment began, and any bacteria suspected were further tested biochemically and serologically.

The infecting *Salmonella* (*S. typhimurium* 289–1, a poultry strain, chromosomally resistant to nalidixic acid and sulfonamides) was given by oral gavage. Fecal specimens from each chicken were diluted in phosphate buffered saline and appropriate dilutions were spread on growth medium selective for the nalidixic acid-resistant *S. typhimurium* used to infect the birds. The number of Salmonella growing on the medium was recorded as the number of *S. typhimurium* per gram of wet feces.

Presumptive *E. coli* isolates were obtained from EMB plates inoculated with diluted fecal material. The antibiotic resistance spectrum for *E. coli* isolates was also measured in accordance with the Standardized Disc Susceptibility Test set forth in § 460.1(c)(2) (21 CFR 460.1(c)(2)) for ampicillin, tetracycline, chloramphenicol, kanamycin, nitrofurantoin, streptomycin, sulfathiazole, and triple sulfa. The *E. coli* isolates were tested only twice prior to infections and once at the termination of the study (28 days), while the Salmonella isolates were tested nine times during the study.

Salmonella isolates were selected from the selective medium, brilliant green agar plates containing nalidixic acid, and were serotyped. Antibacterial susceptibility tests for ampicillin, tetracycline, chloramphenicol, kanamycin, nitrofurantoin, streptomycin, sulfathiazole, and triple sulfa were carried out in accordance with the Standardized Disc Susceptibility Test in § 460.1(c)(2). The isolates were tested on days 2, 4, 6, 8, 10, 13, 14, 21, and 28 of the experiment.

Clinical records were maintained on body weights, disease symptoms, mortality, and gross and microscopic pathology.

(b) *AHI's summary of the results.* (i) Shedding: Initially, on day 2, group B, (penicillin 50 grams/ton) shed a geometric mean number of 10^6 Salmonella per gram of feces; and during the remainder of the study, the geometric mean shed by the group decreased steadily. At the end of the study, the number shed was below the reliable limit of quantitation, less than 10^5 organisms per gram of feces. Group A, the nonmedicated control group, on the other hand, shed 10^7 organisms on day 2, and continued to shed a greater number of organisms than the treatment group ($P<.05$) throughout the remainder of the study. None of the environmental control groups, groups C and $D_{1,2}$ shed detectable amounts of Salmonella.

The prevalence of *S. typhimurium* was estimated by comparing the fraction of Salmonella positive fecal samples in the penicillin treatment group (group B_1) to that for the nonmedicated control group (group A) from all samplings. Thus, 69 out of 90 specimens (77 percent) examined from nonmedicated (control) animals were positive for *S. typhimurium*, while only 36 of 81 specimens (41 percent) in the penicillin treatment group were positive for *S. typhimurium*. The results represent statistically significant differences ($P<.01$) between the incidence of Salmonella positive samples in the treatment group and in the nonmedicated control group.

Duration of shedding was measured by determining the length of time that fecal samples were positive for Salmonella, or analyzing the time required for quantities of Salmonella shed to reach a common value. At least three nonmedicated birds shed Salmonella in their feces throughout the experiment, and four were positive 28 days after infection. In contrast, by day 12, only one bird receiving penicillin was positive, and none were positive on day 28. The length of time positive counts persisted was significantly longer ($P=.05$) in nonmedicated controls than for the penicillin-treated group.

Liver, spleen, and cecal tissues from all animals were necropsied, and samples tested for Salmonella. All tissues were negative.

The AHI concluded that feeding a diet containing a subtherapeutic level (50 grams/ton) of penicillin to chickens that were experimentally infected with *S. typhimurim* did not increase the quantity, shedding, or prevalence of Salmonella in fecal specimens, nor did it increase the quantity of Salmonella isolated from liver, spleen, or cecal tissue. In the opinion of the AHI, the evidence from this study suggests that subtherapeutic use of penicillin in chickens reduced the quantity, shedding, and prevalence of Salmonella.

(ii) Resistance characteristics: (*a*) *E. coli.* According to the two pretreatment samples, the proportion of *E. coli* isolates that were drug resistant was low (below 6 percent), except for resistance to sulfonamides which was greater than 85 percent. But at the experiment's end, AHI found that the resistance to ampicillin, chloramphenicol, kanamycin, and nitrofurantoin was significantly higher ($P<.01$) in the penicillin environmental control groups (D_1) than the control birds (C). Ampicillin resistance also significantly increased in the infected birds that received penicillin. Resistance to sulfonamides remained at the pretreatment level of greater than 85 percent, although the figure in the environmental control groups decreased.

(*b*) *Salmonella.* Prior to inoculating the birds, the infecting strain of *S. typhimurium* was resistant only to sulfonamides and nalidixic acid, the nontransferable marker. *S. typhimurium* strains showed a significant increase in ampicillin resistance on days 12 ($P < .01$) and 14 ($P < .05$). No other significant increases were observed for the other antimicrobials in the test.

The AHI then concluded that the penicillin supplemented diets significantly increased the percentage of *E. coli* that were resistant to ampicillin. In the Salmonella, the AHI found no significant difference in drug-resistant isolates when all the chickens in the trial were considered. But among the animals shedding Salmonella, i.e., the medicated groups, the nonmedicated control, the birds exposed to subtherapeutic antibiotic pressure (both penicillin and penicillin-streptomycin), a significantly greater proportion shed Salmonella that were resistant to ampicillin than in the nonmedicated groups.

(c) *The Director's analysis.* (i) Shedding: (*a*) The Director does not disagree with some conclusions drawn by AHI about this study. Feeding a subtherapeutic level of penicillin did not apparently increase the quantity of Salmonella shed in fecal material; it did not appear to increase the number of Salmonella in liver, spleen, and cecal tissue; and it did not increase the number of positive chicken tissues.

The Director, however, disagrees with the conclusion of AHI that feeding penicillin at 50 grams/ton did not increase the duration or prevalence of Salmonella shedding because the procedures that were used to determine these parameters were inadequate. The information necessary to determine Salmonella duration and prevalence is whether Salmonella are present in the feces, not the quantity of Salmonella in the feces. After the animals were infected with Salmonella in this experiment, fecal specimens were processed by diluting them and then plating on the surface of agar plates. Clones growing on the plates were subsequently counted to provide information on number of Salmonella per gram of feces. As the study progressed, however, the number of Salmonella shed decreased in both groups, and this procedure is inadequately sensitive to detect small numbers of Salmonella. Good microbiological practice requires the use of an enrichment procedure for culturing. An enrichment procedure involves the incubation of a fecal sample in a selective broth to increase the number of Salmonella before plating on the agar. This increases the likelihood that Salmonella will be detected because other genera are being simultaneously inhibited. The enrichment procedure is recommended for examination of fecal specimens where small numbers of Salmonella may be present, as in the case of subjects in the carrier state. In its section about processing of specimens from the bacterial family, Enterobacteriaceae (Salmonella is a member of this family), the "Manual of Clinical Microbiology," 2d edition, American Society for Microbiology, Washington, D.C., p. 194 (1974) is clear:

> It always is advisable to employ enrichment media in the examination of various kinds of specimens, and their use is practically essential when dealing with fecal specimens from carriers of suspected carriers.

In an FDA experiment, the agency studiesd Salmonella shedding by swine (Ref. below). Through careful study, 28 percent more samples (136 rather than 94 from the 151 examined) were determined to be Salmonella positive when an enrichment procedure was used. In another similar study by FDA, 95 percent rather than 60 percent of 242 samples were found Salmonella positive by media enrichment. Enrichment procedures had been requested by FDA

during the protocol development stage; thus, the AHI determination of prevalence and duration for this study was considered inadequate.

Rollins, L. D., FDA Project 108.

(*b*) The shedding study was conducted in three rooms. The chickens that were experimentally infected with *S. typhimurium* were maintained in two separate rooms, and the third room housed the noninfected environmental control animals. In one of the rooms containing infected birds, the chickens received only nonmedicated feed. However, all birds that were infected with Salmonella and receiving medication were placed in the same room. These birds received one of three different medicated diets, either penicillin, penicillin plus streptomycin, or sulfaquinoxaline. Although the chickens were maintained in separate cages within the same room, no birds were placed in this room to determine if bacteria from one study group were flowing to another study group within the room (environmental control). The rise in levels of resistance to antibiotics in noninfected, nonmedicated group A, as well as in the antibiotic-treated groups B_1 and B_2, suggests that some cross-contamination might have occurred or that contamination from the environment might have occurred. Such contamination of control groups makes it more difficult to detect differences in the increase of drug resistance between the experimental and control animals.

An FDA-sponsored contract (71–269) showed the relative ease by which cross-contamination occurs between various study groups. These groups were under similar or more adequate isolation conditions than the chickens in the AHI study.

Nevertheless, analysis of drug resistance data obtained from bacteria isolated from the various groups maintained in Room 2 of the AHI study indicates there are differences in drug resistance between groups. This suggests that when R-plasmids are present, regardless of their source, they may be transferred even in the absence of antibiotic pressure.

(c) When the shedding studies were initially requested, the optimum duration of such studies was unknown, although the 28-day duration appeared adequate. Data later generated under FDA sponsorship (contract 71–269) show that shedding patterns change after 30 to 50 days, longer than the length of the 28-day AHI experiment. Some studies have shown Salmonella shedding to be decreasing in both medicated and nonmedicated groups early in the experiment, with the shedding initially decreasing faster in the medicated group. In several of these experiments, approximately 55 days after initiating the experiment, the Salmonella shedding patterns reversed and shedding in the medicated birds increased, while shedding in the nonmedicated birds remained constant or continued to decrease. In the Director's opinion, the phenomenon is easily explained. Initially, the antibiotic attacks sensitive organisms and as these predominate, little shedding is observed. But, as the antibiotic-resistant organisms remain and become dominant in the population, shedding increases.

(*d*) The 28-day duration of the chicken studies should also be considered in relation to the life of a commercial broiler chicken, usually about 7 to 8 weeks. Although some changes in shedding pattern occurred beyond 6 weeks, in normal commercial production, groups of broilers are raised continuously with one group immediately following another. The production facilities may be cleaned between groups; however, the facilities are not sterilized. Bacteria left from a preceding group of birds are available to infect the birds that follow, and some of the microbiological changes that occur may be perpetuated in subsequent birds. Thus, if an antibiotic is used in the feed of each group of birds, it would have an opportunity to act over a long period of time. For these reasons, the Director now believes it is necessary to use an experimental design that allows sufficient evaluation of the effect of time of antibiotic usage on shedding.

(ii) Resistance characteristics: (*a*) *E. coli.* A major concern about occurrence of drug resistance in *E. coli* that are indigenous to the digestive tract is their potential for donating drug resistance to pathogens such as Salmonella. The Director agrees with the AHI analysis that feeding chickens the penicillin supplemented diet significantly increased ($P<.05$) the number of *E. coli* isolates that were resistant to ampicillin. But other aspects of the drug resistance characteristics of *E. coli* are also critical to an appropriate analysis of the data. Although the proportion of *E. coli* resistant to sulfonamides was high in all the groups before treatment and before inoculating the chickens with Salmonella, the bacteria were relatively susceptible to the other antibiotics tested. Results from one sample collected from each bird after penicillin treatment and inoculation with *S. typhimurium*, however, indicate that the proportion of *E. coli* resistant to streptomycin and tetracycline increased in all groups—environmental controls, nonmedicated controls, and treatment groups. This suggests bacteria that were resistant to tetracycline, streptomycin, and perhaps sulfonamides colonized the animals in the experimental facility.

(*b*) *Salmonella.* Although the total quantity of Salmonella shed decreased, the percentage of drug-resistant Salmonella shed increased, which is crucial. For birds that were shedding Salmonella, feeding penicillin[5] resulted in a significantly greater proportion of Salmonella resistant to ampicillin ($P<.05$), which is consistent with the AHI analysis. The Director agrees with AHI that feeding subtherapeutic penicillin resulted in a significant increase in both the proportion of ampicillin-resistant *E. coli* and Salmonella.

For all of the foregoing reasons, the Director concludes that the study has failed to prove that the subtherapeutic use of penicillin in chickens satisfies the criterion and has failed to show that such use is safe.

4. *AHI Studies on the Effects of Subtherapeutic Penicillin in Animal Feed in Swine*—(a) *Experimental design.* To measure Salmonella shedding in swine and the transfer of drug resistance to Salmonella, AHI submitted a study that was similar in design to the previously described chicken study. This study was also subject to the same experimental conditions that FDA imposed on the chicken study, i.e., the base line incidence of resistance to drugs used in human clinical medicine in the indigenous flora of the test animals was not to exceed 20 percent.

Swine were divided into six groups, three of which were infected with Strain No. 58 DO 13C *Salmonella typhimurium* (swine) characterized as sulfonamide resistant. One noninfected and one infected group received diets containing either no medication, procaine penicillin, or procaine penicillin plus streptomycin according to the following design:

Room number	Group	Antibiotic and level used in feed	Inoculation of salmonella (1.3×10^{11} dose)	Number of pigs in experimental group
1	A	None	Yes	10
2	B_1	Procaine penicillin (50 g/ton)	Yes	10
	B_2	Procaine penicillin (12.5 g/ton), streptomycin (37.5 g/ton)	Yes	10
3	C	None	No	5
	D_1	Procaine penicillin (50 g/ton)	No	5
	D_2	Procaine penicillin (12.5 g/ton), streptomycin (37.5 g/ton)	No	5

(i) Shedding: Groups B_1 and B_2 were used to test the influence of penicillin on shedding and resistance of Salmonella in the test animals, with group A serving as a nonmedicated control group. Groups C, D_1 and D_2 were used as environmental controls to monitor whether swine administered the drug but not inoculated remained Salmonella free.

Orally via the diet, 6-week-old pigs were experimentally infected with an inoculation of 1.3×10^{11} Salmonella, 5 days after beginning their test diet. Preinfection fecal specimens were free of naturally occurring Salmonella for all test animals. For all pigs in each group, fecal samples were taken on days 2, 4, 6, 8, 10, 12, 14, 21, and 28 postinfection to quantitate the Salmonella. One-gram samples of fecal specimens from each test animal were diluted in phosphate-saline solution and plated in duplicate on brilliant green agar containing 0 and 20 micrograms/milliliter of streptomycin. After incubation, characteristic clones of Salmonella were recorded as total counts/

V 42 168 AUG 30 77 UMI

gram of wet feces. All pigs were killed and necropsied 28 days after the infection.

One-gram samples of aseptically collected liver, spleen, ileocecal lymph node, and cecum were minced and incubated in tetrathionate brillant green broth, and subsequently plated on brilliant green agar to determine the presence of Salmonella. Clinical records were maintained on body weights, mortality, and gross and microscopic pathology.

(ii) Resistance characteristics: (*a*) *E. coli*. Coliform counts were obtained from EMB plates inoculated with homogenized fecal samples. One gram of each sample was plated in duplicate on EMB agar containing 0 and 20 milligrams/milliliter of streptomycin. Antibiotic susceptibility tests were conducted on clones obtained from two prestudy samples and one poststudy sample from each animal in accordance with the Standardized Disc Susceptibility Tests in § 460.1(c)(2). Five cones from each specimen were selected from the streptomycin plates and were tested for susceptibility to ampicillin, tetracycline, chloramphenicol, streptomycin, kanamycin sulfate, nitrofurantoin, and sulfathiazole.

(*b*) *Salmonella*. Five clones of *Salmonella* selected from the brilliant green fecal count plates were tested for antibacterial susceptibility to ampicillin, tetracycline, chloramphenicol, streptomycin, kanamycin sulfate, and nitrofurantoin, sulfathiazole, and triple sulfa, in accordance with the Standardized Disc Susceptibility Test in § 460.1(c)(2). When there were less than five clones of *Salmonella*, the number of clones picked corresponded to the actual number present on the plates.

(b) *AHI's summary of the results.* (i) *Shedding:* AHI reported that the number of *Salmonella* receovered per gram of wet feces diminished with time in all groups, and the number of organisms recovered from the medicated groups after day 2 was consistently less than the numbers recovered from the nonmedicated control group. These numbers represent average counts of clones growing on agar that did not contain streptomycin since no *Salmonella* grew on plates containing . streptomycin. No *Salmonella* were isolated throughout the experiment from any of the environmental control animal (Groups C, D_1, and D_2). From this the AHI concluded that the presence of antibacterials in animal feeds reduces the quality and persistence of *S. typhimurium* in experimentally infected pigs.

(ii) Resistance characteristics: (*a*) *E. coli*. AHI concluded that penicillin supplemented diets significantly increased ($P<.01$) the number of *E. coli*. resistant to chloramphenicol. Similarly, penicillin/streptomycin supplemented diets significantly increased ($P<.05$) the number of *E. coli*. resistant to streptomycin.

(*b*) *Salmonella*. When the experimentally infected pigs in the medicated groups were compared to the nonmedicated control group, AHI concluded that feeding penicillin or penicillin/streptomycin at subtherapeutic levels did not increase the percent of pigs carrying resistant *Salmonella*. It also concluded that there were no significant differences in the percentage of resistant clones isolated from pigs in the penicillin group and the control group when all the pigs were considered (nonmedicated controls, environmental controls, and treatment groups).

(c) *Director's analysis.* (i) Shedding: The Director again does not totally disagree with AHI's conclusions concerning *Salmonella* shedding in swine. He agrees that, in this case, feeding a subtherapeutic level of penicillin apparently neither increased the quantity of *Salmonella* being shed in the pig's fecal material, nor increased the number of *Salmonella* in liver, spleen, ileocecal lymph node and cecum. Feeding penicillin also did not increase the number of swine tissues (liver, spleen, ileocecal lymph node and cecum) that were positive for *Salmonella*. However, the Director disagrees with the AHI conclusion that feeding swine penicillin at 50 grams/ton did not increase the duration or prevalence of *Salmonella* sheeding, because the procedures that were used to determine these parameters were inadequate. The information necessary to determine duration and prevalence of *Salmonella* shedding is whether feces contain any *Salmonella*, even in very low numbers, rather than the quantity of *Salmonella* present in the feces, which AHI measured. After the animals were infected with Salmonella, fecal specimens were processed by diluting and then plating the dilutions on the surface of agar plates. Enrichment procedures were not used.

(ii) Resistance characteristics: (*a*) *E. coli*. As in the chicken study, the data available on the occurrence of various drug resistances in *E. coli* are limited; nevertheless, they are sufficient to draw general conclusions. Susceptibility tests from streptomycin-containing plates show a high proportion of multiple-resistant *E. coli* in all groups prior to treatment, i.e., treatment groups, nonmedicated controls, and environmental controls. This is contrary to the recommendations of the FDA guidelines established for these studies. Data from post-treatment plate counts (one for each pig) indicate that the proportion of *E. coli* resistant to streptomycin remained high throughout the experiment and was similar for both the penicillin treatment group (group B_1) and the nonmedicated group (group A). The results are not unexpected because the high initial proportion of drug-resistant organisms makes it difficult to detect differences in the proportion of drug-resistant organisms caused by antibiotic administration.

A more acceptable procedure for determining the proportion of isolates resistant to a particular drug is to select clones from drug-free agar plates for susceptibility testing. A higher proportion of drug-resistant bacteria will be isolated on antibiotic-containing agar than with the random choice of a standard drug susceptibility test using normal agar.

Further, AHI has injected an element of bias in reporting the *E. coli* information. Only the clones that were growing on the streptomycin-containing agar plates were tested for susceptibility to multiple antibiotics. This procedure will reveal the drugs in addition to streptomycin to which the isolate was resistant, but a high proportion of the streptomycin-resistant isolates were also resistant to tetracycline and the sulfonamides.

Selecting clones from streptomycin-containing agar for further susceptibility testing is acceptable for determining what resistances, in addition to streptomycin, may be present. Only those cells resistant to streptomycin, alone or in a pattern with other antibiotics, will grow on agar containing streptomycin. However, cells may be present in the population that are susceptible to streptomycin but are resistant to one or more other drugs. For example, ampicillin-resistant bacteria might be missed. These cells would not grow on the agar containing streptomycin, and the procedures used by the AHI would not report them.

(*b*) *Salmonella*. *Salmonella* were isolated from both the nonmedicated control group (group A) and the penicillin treatment group (group B_1). Isolates that were singly and multiply drug resistant were observed, as well as isolates with resistance to ampicillin, tetracycline, chloramphenicol, nitrofurantoin, kanamycin, and stretomycin. The strain of *Salmonella* used to infect the animals was initially resistant only to sulfonamides when the animals were inoculated. In both the nonmedicated control group and the penicillin treatment group, the proportion of *Salmonella* isolates that were resistant to each drug tested was similar, and a significant proportion of *Salmonella* isolates were resistant to at least one of the following: ampicillin, tetracycline, and streptomycin.

The principal purpose of this experiment was to determine whether feeding of penicillin at subtherapeutic levels results in an increase of drug-resistant *Salmonella*. One way by which *Salmonella* become resistant is by transfer of drug resistance from the indigenous flora, e.g., *E. coli*, of the gut; therefore, the proportion of indigenous organisms in the gut carrying drug resistance directly affects the ability to detect differences due to antibiotic treatment. For this reason the effect that subtherapeutic penicillin has on increasing the proportion of drug-resistant *E. coli* was initially analyzed.

A high porportion of indigenous *E. coli* were drug resistant before treatment, which minimized or negated the observable effect that antibiotic treatment would have on the indigenous gut flora. Since the effect of antibiotic pressure on the indigenous flora was the initial step in the process under study, the study is invalid for demonstrating in a precise manner the effect of feeding subtherapeutic levels of penicillin on occurrence of resistance in *Salmonella*.

An unexplained inconsistency also invalidating the study is the fact that during the study no streptomycin-resistant *Salmonella* grew on the brilliant green agar (BGA) containing streptomycin. However, in subsequent sensitivity testing in the experiment it was determined that many of the *Salmonella* clones isolated at different times on plain BGA were indeed resistant to streptomycin as determined by the standard Kirby-Bauer disc susceptibility test.

A third deficiency undermines the validity of the study. The Director found that 70 to 100 percent of the indigenous *E. coli* in the test swine were resistant to tetracycline, streptomycin, and sulfonamide, and 20 to 50 percent were resistant to ampicillin and kanamycin. He also found that resistance to chloramphenicol and nitrofurantoin had occurred, but to a lesser extent. Nevertheless, in both the medicated animals and nonmedicated animals, the Director found that the resistance paterns corresponded.

Before the study began, the *Salmonella* were resistant only to the sulfonamides. On the basis of the disc susceptibility test, the Director found the following resistance pattern had evolved during the course of the study:

Percent resistant salmonella isolates

Drug	Non-medicated group A	Penicillin treatment group B_1
Streptomycin	53.0	48.0
Tetracycline	43.0	41.0
Ampicillin	60.8	58.0
Kanamycin	12.0	18.0
Chloramphenicol	3.6	5.6
Nitrofurantoin	8.0	3.6
Number of isolates	217.0	195.0

Resistance was transferred to *Salmonella* in the nonmedicated group at a rate at least equal to that of the medicated group. It is thus apparent that *Salmonella* readily became resistant to ampicillin, tetracycline, and streptomycin when exposed to the R-plasmids of *E. coli* present in the gut. This reaffirms the results observed in the chicken study, as well as the studies by Pocurull et al., Neu et al., and Smith and Tucker (Refs. 2, 3, and 6). Once a sufficient number of R-plasmid-bearing bacteria, principally *E. coli*, are present, the *E. coli* donate their R-plasmids in the absence of antibiotic pressure. Accordingly, the Director concludes that the presence and proportion of R-plasmid-bearing donors were responsible for the resistance in *Salmonella*.

Another safety question may be raised by the high *E. coli* resistance found in the swine used in this study; 70 to 100 percent of the *E. coli* were resistant to tetracycline, streptomycin, and sulfonamides, and 20 to 50 percent resistant to kanamycin and ampicillin. Yet, in the Gustafson study cited below (Ref. 7), in typical swine going to slaughter, there were no *E. coli* resistant to ampicillin, although 17 of 31 isolates were multiply resistant to other antibiotics.

For all of the foregoing reasons, the Director concludes that this study has failed to prove conclusively that subtherapeutic penicillin use in swin satisfies the criterion and has thus failed to show that such use is safe.

5. *Questions Raised by Other Studies of Salmonella*—(a) *CDC reports.* The Center for Disease Control (CDC) has maintained a national *Salmonella* surveillance program since 1963. The reported incidence of salmonellosis increased until approximately 1973, when it reached 27,000. The level of reported cases averaged 10.77 per 100,000 population from 1970 through 1974, and true incidence may be far higher because of underreporting. But the reported cases from antibiotic resistant *Salmonella* have continued to increase. *Salmonella typhimurium*, which is the most common *Salmonella* strain in animals, is the resistant strain most often reported in man and animals. More importantly, the number of antibiotic resistant strains of *S. typhimurium* isolated and reported almost doubled between 1967 and 1975, and the increase in antibiotic resistance in other *Salmonella* serotypes almost tripled during that period. Further, in addition to the fact that the number of *Salmonella* strains resistant to 6 or more antibiotics increased almost 10 times, the percentage of multiply resistant strains that are "super resistant" (containing resistance to 6 or more antibiotics) increased almost 7 times (Refs. 1 and 1a).

(b) *FDA survey.* Pocurull, Gaines, and Mercer (Ref. 2), in a 1971 survey, report that *Salmonella* strains isolated from outbreaks of salmonellosis in animals were bearing R-plasmid-mediated resistance to antibiotics. *Salmonella* isolates gathered in diagnostic laboratories of most States from outbreaks of salmonellosis in pigs, cows, chickens, and turkeys were tested for their susceptibility to ampicillin, tetracycline, dihydrostreptomycin, cephalothin, sulfamethoxypyridazine, colistin, chloramphenicol, furazolidone, neomycin, polymyxin, and nalidixic acid. Of the 1,251 strains studied, 75 percent were resistant to one or more antibacterial drugs, 40 percent were resistant to two or more antibacterials, and 21 percent were resistant to three or more antibacterials. But an even higher incidence of multiply resistant cultures was observed in *S. typhimurium*, which was again the most commonly isolated pathogen.

(c) *Neu, Cherubin, Longo, Flouton, and Winter studies.* Recently, Neu et al. (Ref. 3) examined the antimicrobial susceptibility of 718 *Salmonella* isolates from humans and 681 from animals. They compared the current prevalence of antibiotic resistance in *Salmonella* isolates from humans with their previous studies in 1968–1969 and with the resistance patterns of *Salmonella* isolates from animals.

Thirty percent of all human isolates were resistant to one or more antibiotic(s). Again, *S. typhimurium* was the most common pathogen and 58 percent were resistant to at least one antibiotic. More than 50 percent of the *S. typhimurium* were resistant to four to five antibacterials. The fraction of all *Salmonella* strains resistant to kanamycin rose from 3 percent to 12.5 percent. When these results were compared with a 1965 national survey conducted by Gill and Hook (Ref. 4), the authors found that the percentage of isolates of all serotypes resistant to ampicillin had increased fourfold by 1973, and the incidence of resistance to tetracycline and streptomycin had approximately doubled. Resistance in *S. typhimurium* had increased from 19 percent to 58 percent of isolates, and resistance to ampicillin has increased from 23 percent to 37 percent. Moreover, the resistance to ampicillin, tetracycline, chloramphenicol, streptomycin, sulfisoxazole, and kanamycin was transferable among the various *Salmonella* strains.

In animals, *S. typhimurium* accounted for 70 percent of the isolates, and 80 percent were resistant to one or more antimicrobial agents. R-plasmids were found in 86 percent of the *S. typhimurium*, and resistance to ampicillin, tetracycline, chloramphenicol, streptomycin, sulfisoxazole, and kanamycin was transferable. Generally, the resistance patterns were similar to those encountered in the *Salmonella* isolated from humans.

The authors conclude that the high incidence of transferable resistance in man and animals suggests that most resistant strains seen today contain complete R-plasmids, and that strains unable to mobilize resistance determinants are less common than was formerly thought. They further conclude that comparison of the resistance of *Salmonella* isolates from humans with that of *Salmonella* from animals shows that tetracycline resistance is greater among the strains from animals, as in the case with sulfonamide and streptomycin resistance. While the resistance to ampicillin is higher in *S. typhimurium* strains isolated from humans than those isolated from animals, the reverse is true for other serotypes. This difference may reflect the greater current use of tetracyclines, sulfonamides, and streptomycin in animals.

Finally, the authors conclude that the survey clearly demonstrates that resistance to antibiotics is increasing in *Salmonellae* isolated from both humans and animals, and since there are great similarities in the resistance patterns of human and animal isolates, it would be useful to know whether the R-plasmids are of a similar nature since this would suggest that animal strains have contributed to the human pool of resistant organisms.

(d) *Smith, H., and J. F. Tucker studies.* Smith and Tucker (Ref. 5) studied the effect of antibiotic therapy on the fecal excretion of *S. typhimurium* by experimentally infecting 3-day-old chicks. There were 3 different treatment regimens studied; 9 different antibiotics were used with experimental groups of 40 during each study. One or two groups in each experiment were fed nonmedicated feed throughout. The following antibacterials were tested: Ampicillin, oxytetracycline, chloramphenicol, furazolidone, neomycin, polymixin, spectinomy-

V42168 AUG 30 77 UMI

cin, streptomycin, and a mixture of trimethoprim and sulfadiazine. The regimens were: (1) continuous antibiotic administration in the diet for 61 days at 100 milligrams/kilogram of animal feed (subtherapeutic); (2) continuous antibiotic administration in the diet at 500 milligrams/kilogram of animal feed for 44 days (therapeutic); (3) continuous antibiotic administration in the diet for 9 or 18 days at 500 milligrams/kilogram of animal feed while observing for 65 days.

In each preceding experimental group, except the furazolidone group, when chickens were fed subtherapeutic drugs, the *E. coli* became multiply resistant with R-plasmids having the same pattern of resistance that developed shortly thereafter in the *Salmonella* of the same groups. No antibiotic resistant *Salmonella* were ever isolated from the fecal specimens taken from the chicks fed antibiotic-free diets, although high concentrations of antibiotic-resistant populations always developed in the *S. typhimurium* and *E. coli* from groups fed antibiotics.

Smith and Tucker found that although many of the antibiotics brought about a profound reduction in the concentration of fecal *E. coli*, it was usually short-lived because of the emergence of antibiotic-resistant populations of *E. coli*, even in the group receiving subtherapeutic levels of the antibacterials. Most of the resistance to ampicillin, oxytetracycline, chloramphenicol, streptomycin and spectinomycin are due to R-plasmids found initially in the entire chicken population, with the same patterns of antibiotic resistance (ampicillin, streptomycin, tetracycline, chloramphenicol) which were selected, transferred and subsequently appeared in the *S. typhimurium* populations of each different dietary regimen selected for any one drug.

Although penicillin was not used in the study, the principles that apply to the emergence of transferable drug resistance in this study apply to R-plasmids that emerge from use of penicillin. Further, ampicillin is a penicillin, which in sufficient quantity will produce the effects of penicillin G on drug resistance in Gram-negative bacteria.

Antibiotics have been used to such an extent in certain animal species that organisms that are well adapted to their digestive tract are now drug resistant. The selective pressure of antibiotics is one of the primary factors that results in an increase in the number of organisms carrying transferable drug resistance, and the selective pressure may be from either therapeutic or subtherapeutic antibiotic use. Although the procedures used to gather the information from the AHI chicken study were inadequate according to the current state of the art, nevertheless, the AHI chicken study exemplifies the interaction between the pool of R-plasmid donors and drug-susceptible pathogens in chickens; it also demonstrates the effect of subtherapeutic penicillin pressure on the development of resistance to ampicillin. Other recent literature such as the Smith and Tucker studies and contract studies confirm these findings. The Director concludes that there is no evidence to show that safety hazards do not exist as a consequence of the subtherapeutic use of penicillin in animal feed.

(e) *Kobland, Gustafson study.* Kobland, Gustafson et al. (Ref. 7) of American Cyanamid performed a survey of three major swine producing areas for the Animal Health Institute to determine the extent of the naturally occurring antibiotic-resistant Salmonella reservoir in hogs; subtherapeutic levels of antimicrobials were routinely used in animal feeds in the area. Fecal contents were sampled from market-age hogs obtained from slaughter houses in Pennsylvania, Iowa, and Georgia, and these samples returned to the laboratory for Salmonella isolation procedures. *E. coli* were also isolated to obtain information regarding antibiotic resistance status of indigenous coliforms.

The first survey was made in Lancaster County, Pennsylvania. Out of 151 animals sampled, 54 (35 percent) were positive for Salmonella, and all isolates tested (653) were sensitive to the 10 antimicrobial agents that were tested. Of 31 *E. coli* isolates, 17 were multiply resistant.

In the second study, in Iowa, 26 hogs (10 percent) were positive for Salmonella out of 251 sampled. Examination of 219 isolates yielded 10 (5 percent) resistant isolates, but all from 1 hog. Again, most of the coliforms (*E. coli*) were multiply resistant.

Finally, in the Georgia survey, Salmonella was isolated from 215 (84 percent) out of 256 animals sampled, i.e., 78 hogs (36 percent) carried drug-resistant Salmonella; and of 622 isolates, 145 (23 percent) carried tetracycline resistance singly or with streptomycin.

Four Salmonella serotypes were identified in Pennsylvania, eight in Iowa, and seven in Georgia. The Salmonella strains that were resistant to more than one antimicrobial were able to transfer resistance to an *E. coli* recipient. When the sponsors tested representative drug-sensitive Salmonella isolates for their ability to receive R-plasmids, four *S. worthington* and two *S. newington* isolates acquired resistance after a 24-hour mating. None of 28 other isolates as tested accepted an R-plasmid. Only two samples represented *S. typhimurium*, the most frequently isolated serotype from animal and human sources and a good donor of R-plasimds.

In summary, (i) 40 percent of ceca from animals in Pennsylvania, Iowa, and Georgia contained Salmonella; (ii) None were antibiotic-resistant in Pennsylvania, 4 percent in Iowa, and 23 percent in Georgia; and (iii) none of the Salmonellae from any of the three States were ampicillin-resistant. For *E. coli*, (i) 7 percent of the swine sampled from Pennsylvania were ampicillin-resistant, (ii) 31 percent from Iowa, and (iii) 39 percent from Georgia. Only certain Salmonella serotypes were shown to be good recipients for the *E. coli* R-plasmids in transfer studies done in conjunction with the surveys, and none acquired ampicillin resistance. On this basis, AHI concluded that naturally occurring Salmonella are neither R-plasmid-bearing nor willing R-plasmid recipients.

The survey alone, however, is inadequate to support a conclusion that the background level of drug-resistant Salmonella is not increasing because there is no documentation that the sites selected for sampling provide a random representative sample of the total swine population. The authors explained neither how they determined that the sampled swine had been exposed to antibiotic pressure nor which antibiotics were involved. Of 22 Georgia isolates that were resistant only to tetracycline, not one transferred its resistance, and for this reason, the authors assert that the gene coding for tetracycline resistance was probably located on the bacterial chromosome rather than on a plasmid. This assertion is contrary to current information which indicates that naturally occurring tetracycline resistance is invariably plasmid mediated (Ref. 8). Tetracycline resistance in a bacterial strain can be taken to indicate the presence of an R-plasmid because no evidence has ever shown tetracycline resistance to be chromosomally mediated in naturally occurring strains of enteric bacteria (Ref. 9). The plasmid may, however, be small and not self-transmissible, as was apparently the case in the Gustafson study.

American Cyanamid's in vitro tests for Salmonella R-plasmid recipient activity are also inadequate. Cyanamid tested only "representative" sensitive Salmonella isolates, and four *S. worthington* and two *S. newington* isolates acquired resistance. Although none of the other 28 isolates tested accepted an R-plasmid in these tests, only a single R-plasmid-bearing *E. coli* donor was used, and the compatability properties of the donor R-plasmid were never presented. It is well recognized that certain species of Salmonella are generally neither good donors nor recipients of R-plasmid in the laboratory. The ability of a particular Salmonella to act as a recipient is dependent on the compatability properties of the donor R-plasmid. For example, in recent years most R-plasmids isolated from naturally occurring Salmonella have been of incompatibility groups H and I, and many Salmonella are not good recipients for F II R-plasmids, a common type encountered in *E. coli*. Therefore, without data on incompatability groupings, the Director believes that this aspect of Gustafson's study is of little value.

(f) *Other studies.* Wilcock et al. (Ref. 10), found far greater levels of antibiotic resistance in clinical isolates of *Salmonella typhimurium* (95 percent were tetracycline-resistant) than in isolates of *S. choleraesuis* (18 percent). These strains accounted for 90 percent of the 63 isolates definitely associated with swine salmonellosis. The greater accessibility of *S. typhimurium* to intestinal *E. coli* in contrast to the systemic *S. choleraesuis* infection may explain this difference.

In a survey of 5 Canadian abattoirs by Groves and Barnum et al. (1970, Ref. 11), 20 percent of 462 hogs were Salmonella positive. Tetracycline-resistant Salmonella were found in isolates from 11 of the 94 (11.7 percent) mesenteric lymph node samples of marketed swine, in 2 of 15 (13.3 percent) isolates from the abattoir environment, and in only 1 of 25 (4.5 percent) isolates from a farm supplying the abattoir. Thus, 14 of 134 isolates (10.5 percent) were at least tetracycline resistant. Of the 14 resistant Salmonella, 5 were *S. typhimurium* and 8 were *S. schwarzengrud*. Single or multiple tetracycline resistance was present in all 14 resistant Salmonella. Out of 110 strains studied, 22 were *S. typhimurium*. Other prevalent serotypes included *S. heidelberg, S. muenster* and *S. anatum*. Voogd (1973, Ref. 12) charted various Salmonella serotypes, and a large percentage of resistance was seen in *S. typhimurium* (25 percent in 1971), *S. anatum* (29 percent) and *S. panama* (25 percent), although resistance in other serotypes such as *S. derby, S. infantis, S. dublin*, or *S. chloraecuis* was lower. As mentioned earlier, most surveys have clearly shown an increase in drug-resistant Salmonella in recent years, and the strains surveyed in those studies have obviously encountered R-plasmids which bacteria can accept and stably maintain. This is clearly demonstrated by the results of the AHI studies and the other evidence discussed earlier.

6. *Director's Conclusions.* Questions raised by the CDC reports, and the studies conducted by Ryder, Pocurull et al., Neu et al., and Smith and Tucker (Refs. 1 through 3, and 5) show precisely the same pattern of resistance and in the same sequence that was observed in the *E. coli* and Salmonella isolates from the AHI chicken and swine studies. Resistance occurred in the *E. coli*, and a corresponding pattern of resistance subsequently occurred in the Salmonella after exposure to the R-plasmid-bearing *E. coli*. Despite the absence of antibiotic pressure (in the nonmedicated animals), initially high numbers of resistant *E. coli* in all of the test animals did transfer R-plasmids to the antibiotic-sensitive Salmonella.

Furthermore, because most of the animals in the AHI studies were harboring drug-resistant R-plasmid-bearing *E. coli*, which was contrary to FDA criteria, the studies may be considered invalid for determining the effect of feeding subtherapeutic penicillin on the emergence of drug-resistant Salmonella. Moreover, the procedures used to gather the data on Salmonella prevalence and duration were inadequate. The studies nevertheless demonstrate that the reservoir of R-plasmid-bearing Salmonella increased in direct correlation with the resistance patterns observed in the drug-resistant *E. coli*. These results confirm the results observed in the literature. R-plasmid-bearing bacteria are widespread in the environment, and they can transfer their R-plasmids to pathogens, even in the absence of antibiotic pressure. Under § 558.15, the holders of approved NADA's were required to submit data to prove conclusively that the subtherapeutic use of penicillin in animal feed does not increase the duration and prevalence of Salmonella, and that such use does not contribute to the development of R-plasmid-bearing organisms. Because subtherapeutic use of penicillin contributes both to R-plasmid buildup and transfer, the data lead to the conclusion that the subtherapeutic use of penicillin has not been shown to be safe.

C. *Compromise of Therapy (Criterion 2 (c))*

1. *Background and criterion.* The 1972 FDA Task Force was concerned that the continuous feeding of antibiotics to animals might compromise the treatment of certain animal diseases. It concluded that additional information was needed, and FDA accordingly determined that epidemiological and controlled challenge studies were to be carried out to determine the relationship of the use of antibiotics in animal feed to the effectiveness of subsequent treatment of animal disease, which is criterion 2(c) of this notice. To answer this criterion with regard to subtherapeutic use of penicillin, the Animal Health Institute submitted two studies. The first, carried out in chickens, involved treatment of a systemic *E. coli* infection by oxytetracycline after subtherapeutic use of penicillin in feed. The second study, in swine, dealt with treatment of a *Salmonella choleracsuis* infection by nitrofurazone, after subtherapeutic use of penicillin in feed.

2. *AHI Compromise of Therapy Study in Chickens.*—(a) *Experimental design.* Day-old-chicks were placed on subtherapeutic levels of penicillin (50 grams/ton) for 21 days. On day 21 the birds were infected by the intramuscular (I.M.) route with *E. coli* at 4.5×10^7 CFU (colony forming units). Subsequent treatment was with oxytetracycline (12.5 milligrams given I.M. for 3 days).

(b) *AHI's summary of the results.* The highest mortality (60 percent) occurred in the group of chickens receiving neither penicillin nor oxytetracycline treatment, as compared with no mortality in the group receiving penicillin in feed and subsequent oxytetracycline treatment. Penicillin-supplmented diets reduced mortality in chickens with systemic *E. coli* infections by 38 percent. The use of oxytetracycline treatment alone was enough to reduce mortality from 60 percent to 13 percent. The penicillin-fed groups showed better weight gain than the control groups.

Based upon the data presented, when mortality, feed consumption, weight gain, and feed efficiency are considered, AHI concluded that the subtherapeutic use of procaine penicillin at 50 grams/ton did not compromise subsequent therapy of artifically induced systemic *E. coli* in chickens, when oxytetracycline 12.5 milligrams I.M. was the therapeutic agent.

(c) *Director's analysis.* The experimental design used was inappropriate to address whether the subtherapeutic use of penicillin in animal feed will compromise therapy in diseased chickens. The establishment of a clinical infection by giving *E. coli* orally in chickens presents some practical problems, whereas challenge via intramuscular injection resulted in a more uniform clinical effect. However, infection by the intramuscular route prevented the interaction, on the intestines, of the infecting organism (*E. coli*) and resident *E. coli*, a combination that is known to be necessary for selection of drug resistance. Therefore, the Director must conclude that this work in chickens presented by AHI fails to address appropriately and to satisfy animal health criterion 2(c). The work provides no evidence that sheds any light on the compromise of therapy issue.

V 42 168 AUG 30 77 UMI

3. *AHI Compromise of Therapy Study in Swine.*—(a) *Experimental design.* Weanling swine were placed on a trial diet (penicillin 30 grams/ton) for 21 days. On day 21 the swine were orally infected with *Salmonella cholcraesuis* (2.1×10^9 CFU) via stomach tube, following a 24-hour fast. Treatment was with nitrofurazone (110 parts per million in drinking water) when the first clinical signs of salmonellosis appeared.

(b) *AHI's summary of the results.* The highest mortality (30 percent) occurred in the group of swine receiving no penicillin feed and no subsequent treatment as compared with 10 percent in the group receiving penicillin in feed but no subsequent treatment. No mortality occurred in the groups receiving nitrofurazone treatment, regardless of whether penicillin was absent or present in the diet. The scouring index was higher in the negative control group receiving neither penicillin in the diet nor nitrofurazone treatment, while it was significantly lower in the remaining groups. Weight gain and feed efficiency were higher in the medicated groups than in the control groups.

Although differences in mortality between groups was not significant when other parameters, such as weight gain, feed efficiency, and scour index are observed, AHI concluded that the subtherapeutic feeding of procaine penicillin at 30 grams/ton will not compromise subsequent nitrofurazone therapy of artificially included *Salmonella choleraesuis* in swine.

(c) *Director's analysis.* Any study of compromise of therapy requires a determination of whether the subtherapeutic use of a drug results in an increase in the number of bacteria bearing R-plasmids that are capable of donating these R-plasmids to pathogens. The object of the AHI swine study was ostensibly to determine whether the subtherapeutic use of penicillin would compromise nitrofuran therapy. However, the resistances most commonly found to result from penicillin use in *E. coli* are resistance to ampicillin, tetracycline, sulfonamides, and streptomycin in various combinations. Rarely will the subtherapeutic use of penicillin result in an increased incidence of transferable resistance to nitrofurazone (Ref. 1). For this reason a study that attempts to measure compromise of therapy against nitrofurazone alone will be biased by design against showing a compromise. The nitrofurazone group is useful to show that the disease is treatable by an antibacterial. However, the study requires a group treated with a drug whose resistance is frequently mediated by R-plasmids to measure any compromise of therapy, particularly because penicillin would not be used to treat an *S. choleraesuis* infection. Even though nitrofurazone may be one drug of choice for treatment of *S. chloraesuis* infection in swine, it use alone in the study of compromise of therapy is inappropriate because nitrofurazone resistance is not one that would ordinarily become a problem from penicillin use; moreover, because of questions about carcinogenicity, the Director, in a notice published in the FEDERAL REGISTER of August 17, 1976 (41 FR 34899), proposed to withdraw approval of NADA's for the use of nitrofurazone on the grounds that it has not been shown to be safe.

The study should have been designed with treatment of the disease by a drug to which subtherapeutic use of penicillin may cause increased resistance, e.g., ampicillin or tetracycline, to provide a more accurate reflection of what may occur in the field. This study is of no value in showing that subtherapeutic penicillin feed does not compromise therapy by related drugs such as ampicillin or by drugs to which resistance would commonly occur along with that of resistance on an R-plasmid. For example, ampicillin, tetracycline, sulfonamide, and streptomycin resistance are commonly linked on R-plasmids.

4. *Questions Raised by FDA Funded Research.* Due to the complexity and importance of the compromise of therapy issue, FDA sponsored a study to develop a disease model with antibiotic susceptible organisms in a manner that would provide suspectible pathogenic *E. coli* with the opportunity to interact in the intestinal tract with R-plasmid-bearing organisms and develop drug resistance (Ref. 2). A University of Missouri survey for a tetracycline-susceptible pathogenic *E. coli*, however, failed to locate a susceptible strain in swine, and a compromise of therapy experiment using tetracycline-resistant pathogenic *E. coli* was performed according to the following design.

(a) *Experimental design.* Swine were fed an unmedicated diet and two diets containing subtherapeutic levels of the combination chlortetracycline, sulfamethazine, and penicillin; the investigators then measured the effectiveness of therapeutic levels of chloramphenicol and chlortetracycline.

Group	Number of animals	Infection with *E. coli*	Oral therapeutic agent (per kilogram of animal)
DIET 1—Unmedicated			
1	18	No	None.
2	20	Yes	Do.
3	28	Yes	Chloramphenicol 50 mg.
4	30	Yes	Chlortetracycline 50 mg.
DIET 2—Chlortetracycline (20 g/ton of feed), sulfamethazine (20 g/ton of feed), and penicillin (10 g/ton of feed)			
1	17	Yes	None.
2	21	Yes	Chloramphenicol—50 mg.
3	23	Yes	Chlortetracycline—50 mg.
DIET 3—Chlortetracycline (100 g/ton of feed), sulfamethazine (100 g/ton of feed), and penicillin (50 g/ton of feed)			
1	14	Yes	None.
2	10	Yes	Chloramphenicol—50 mg.
3	12	Yes	Chlortetracycline—50 mg.

(b) *Director's analysis.* In each diet, chloramphenicol treatment was significantly more effective for the treatment of the disease than was treatment with chlortetracycline. In fact, the results show that chlortetracycline treatment was no more effective than either the untreated control group or the groups fed the combination of subtherapeutic antibiotics in the ration, i.e., the latter were ineffective.

The Missouri study indicates that animal therapy may be compromised where the pathogen is resistant to the antibiotic used for treatment.

5. *Director's Conclusion.* The potential for harm resulting from compromise of therapy is clear, and no evidence has been submitted that adequately addresses the basic issue, the potential for subtherapeutic penicillin use to compromise therapy, since the studies submitted contained design deficiencies. For these reasons, the Director concludes that the sponsors have failed to resolve the issue and thereby show that the subtherapeutic use of penicillin is safe in animal feed.

6. Optimal Level of Effectiveness (Animal Health Criterion 4). This was originally stated as a separate criterion as follows:

> The optimum usage level for each indication of use of the antibacterial drug at subtherapeutic levels shall not increase significantly with continued use.
>
> Once the optimum level is established, a study shall continue over succeeding generations or populations of animals to determine if this same level continues to yield the same measurable effect.

No data were submitted on this issue for penicillin or penicillin-containing products. The failure to submit these data was in part due to the inability to design such studies that would be meaningful in the 2-year period designated for study. A study begun in 1972 was submitted by AHI which compares the effectiveness of four antibiotics (chlortetracycline, tylosin, bacitracin, and virginiamycin) to a nonmedicated group in swine (Ref. below). The study was conducted at only one location; tests at several locations are necessary to provide any evidence they may have general application to the swine industry. Moreover, the antibiotics were not fed to the swine at graded dosage levels (dosage titration), which is necessary to determine the optimal level of the drug's effectiveness. That is the first step in attempting to address the concerns. Without that evidence, the Director cannot make any determination about the role of R-plasmid-bearing organisms in the continuing effectiveness and safety of subtherapeutic use of any tested antibiotic in animals, including penicillin.

D. *Pathogenicity (Criterion 3)*

1. *Background and Criterion.* It is clear that bacterial plasmids contribute significantly to an organism's capacity to produce disease and to survive within the host organism (Ref. 1). The production of enterotoxin, for example, is an essential factor in the pathogenicity of *E. coli* strains of porcine origin, and Smith and Halls (Ref. 2) demonstrated that this property was governed by a plasmid, termed ENT. Similarly, the genetic determinants for enterotoxin production in *E. coli* isolated from calves and lambs have also been shown to be controlled by transmissible plasmid (Ref. 3). Recent studies support the premise that enterotoxin-producing strains of *E. coli* are also responsible for a significant proportion of previously undiagnosed human diarrheal disease (Refs. 4 through 6). Corresponding to these studies in domestic animals, researchers have now shown that the ability of *E. coli* strains of human origin to elaborate enterotoxin is mediated by a transmissible plasmid (Refs. 7 and 8).

In addition to toxins, other plasmid-mediated virulence factors have been described. One of the characteristics of the diarrheal disease caused by enterotoxigenic *E. coli* in man or animals is the ability of large numbers of the bacteria to colonize the small bowel. There is evidence that a surface associated antigen K88, on *E. coli* toxigenic for pigs facilitates colonization since the antigen functions to overcome intestinal motility and other clearing mechanisms (Refs. 9 through 13). Further, Orskov et al. (Ref. 14) showed that K88 production is governed by a transmissible plasmid. A similar antigen, K99, has been described for calves (Refs. 15 through 17). Moreover, these K-antigens play a role in the host specificity of these pathogens. The K88 antigen from porcine isolates is unable to produce adhesion to the calf intestine, and the K99 calf antigen is unable to adhere to the pig intestine (Ref. 15). A similar plasmid-controlled surface antigen has recently been described in a strain of *E. coli*, causing severe human diarrheal disease (Ref. 18).

Another way plasmids can contribute to virulence is exemplified by the colicin V plasmid (Ref. 19). Colicin V is the most common colicin produced by *E. coli*, and pathogenic *E. coli* containing the colicin V plasmid have a greater ability to resist the host species' defense mechanism (Ref. 19). Such *E. coli* also tend to be more refractory to the bactericidal effects of undefined components in serum. In addition, Smith's experiments in chickens and in humans reveal that the colicin V R-plasmid confers on organisms an increased ability to survive in the alimentary tract as well as in the tissue (Ref. 20). On the basis of this evidence, the Director believes that other plasmid-mediated factors that enhance pathogenicity may well be found in the future.

Although pathogenicity is generally determined by more than one factor, the addition of a single specific character to a nonvirulent organism can endow that organism with virulence, and the potential dangers of this character being mediated by a transmissible element are apparent. Because R-plasmids and virulence plasmids can reside in the same bacterial cell, the possibility is increasing that plasmids that contribute to pathogenicity may become more widely disseminated among bacterial species due to the selection of the large reservoir of R-plasmids within enteric organisms.

For these reasons, FDA established Human and Animal Health Safety Criterion 3: "The use of low and/or intermediate levels of an antibacterial drug shall not enhance the pathogenicity of bacteria."

FDA's guidelines required a series of well designed studies to determine if the use of antibacterial drugs in animal feeds enhances pathogenicity of Gram-negative bacilli. First, the sponsors were to determine if plasmids coding for toxin production could become linked to an R-plasmid and be transferred in vitro. If this was demonstrated in germ-free animals, experiments were to be conducted in conventional animals.

Due to the progressional nature of the studies, the Director did not require the sponsors to complete the studies during the time alloted by § 558.15. The sponsors were committed to conduct such studies and to submit reports on the studies at regular intervals. The AHI did submit a study conducted by Dr. John Walton to examine the association of plasmid-mediated toxin production with R-plasmids, and data were also obtained from FDA contracts with Dr. Stanley Falkow and Dr. Carlton Gyles.

2. *Walton Study.* The Walton study (Ref. 21) reported in vitro transfer experiments using a donor organism bearing both the enterotoxin plasmid and R+ factors antibiotic resistance plasmids and a recipient organism that lacks an R-plasmid. Walton concluded that subsequent selection of R+ transconjugants does not select for enterotoxin production.

The Director finds that the study contained major shortcomings in the procedures used, and he rejects Walton's conclusions as inadequately supported. The enterotoxin-producing strains (containing plasmids termed ENT) used in the experiment were inadequately examined for the frequency of transfer of their ENT plasmids and the number of R+ transconjugants tested for ENT transfer (20) was insufficient since only a frequency of 5 percent or greater could be detected. From each mating, 20 transconjugant colonies were pooled and subcultured into 100 milliliters of nutrient broth; then they were grown overnight to obtain cells and supernatant fluid to test for toxin production. However, no positive control was included in the experiment to show that, in screening, 1 known ENT + colony, out of 20 colonies, would produce a positive reaction for toxin production. For these reasons, the Director concludes that the study neither conclusively resolves the issue nor even provides adequate evidence to support the conclusion that selection for R+ transconjugants does not select for enterotoxin production.

3. *Falkow Study*—(a) *In vitro transfer.* On the other hand, Falkow (FDA Contract 73–7210) unequivocally demonstrated that ENT and R-plasmids do cotransfer and that drug selection for the R-plasmid and subsequent clonal screening for ENT was an adequate laboratory tool for detection of cotransfer.

In an in vitro mating, *E. coli* K12 (containing a bovine ENT plasmid, a K-antigen-determining plasmid (K99), and an R-plasmid coding for tetracycline and streptomycin) was crossed to three drug-sensitive *E. coli* K12 recipient strains. The recipient strains were rifampicin resistant, and the donor was rifampicin sensitive. The rifampicin-resistant recipient that received the tetracycline-streptomycin plasmid were recovered on rifampicin-tetracycline drug plates; these recombinant clones were then scored for coinheritance of ENT and K99. Of 225 clones tested (75 from each of the 3 crosses), 2 clones (0.88 percent) received both ENT and K99+. Thus, cotransfer of K99 and ENT plasmid for pathogenicity with the tetracycline-streptomycin drug resistance plasmid was of a low but detectable incidence.

In another in vitro mating study, a bovine enterotoxigenic nonlactose-fermenting *E. coli* isolate (B44) (containing the following plasmids: ENT, K99, and an R-plasmid (R_1) containing genes coding for ampicillin, chloramphenicol, kanamycin, and streptomycin resistance) was crossed with a lactose fermenting strain of *E. coli*, K92 strain 1485. Lactose-fermenting and chloramphenicol-resistant transconjugants were scored for K99 and ENT.

The incidence of K99 plasmid transfer was 3/37 (8 percent) and the incidence of the ENT plasmid transfer was 9/37 (24.3 percent). Furthermore, the incidence of K99, ENT, and R_1 cotransfer was 3/37 (8 percent).

(b) *In vivo transfer.* Falkow fed B44 *E. coli* bearing resistance (R_1), ENT, and K99 plasmids to baby calves, and in vivo transfer of the (R_1) plasmid to indigenous microflora was monitored. In one experiment, ENT plasmid was cotransferred at an incidence of 3/39 (7.7 percent); however, K99 was not transferred. In another in vivo transfer experiment, the ENT was cotransferred at an incidence of 1/88 (1.1 percent) and cotransfer of K99 did not occur. But detection of K99 cotransfer was hampered by the autoagglutination of 50 percent of the transconjugants when slide agglutinations with K99 antisera were performed.

From these experiments, Falkow concluded that possession of an R-plasmid by an enteropathogenic strain does not guarantee cotransfer of ENT or K99; nevertheless, the implications of cotransfer at even a low incidence in the intesti-

V 42168 AUG 30 77 UMI

nal tract of an animal, should the animal be exposed to the same antibiotics to which the enteropathogen is resistant, has potent public health consequences.

4. *Questions raised by other studies.* (a) Naturally occurring toxigenic strains of *E. coli* are often multiply resistant, and during a recent hospital outbreak of infantile diarrhea in Texas, Wachsmuth et al. (Ref. 23) reported that plasmid-mediated toxin production and multiple antibiotic resistance was demonstrated. Transfer of a 67 × 10^6 and 30 × 10^6 dalton plasmid was associated with the transfer of resistances and enterotoxin production, respectively. Moreover, when antibiotics were used to select *E. coli* K12 recipients from a one-step bacterial cross, all the resistances were concurrently transferred, and 36 percent of these drug-resistant recipient organisms also transferred their ENT plasmids and produced enterotoxin. Clearly, the Director must conclude that R-plasmid transfer can enhance the possibility of ENT transfer and the production of enterotoxin.

(b) Translocation is believed to be the primary mechanism for the dissemination of resistance genes in vivo. Under FDA Contract 223–73–7210, Falkow has been able to show the translocation of antibiotic resistance genes to ENT plasmids in vitro. He also demonstrated that ENT plasmids can acquire resistance genes from R-plasmids if they inhabit the same cell. Ampicillin, sulfonamide, and streptomycin plasmids constructed in vitro by translocation are indistinguishable from such ampicillin plasmids obtained from clinical isolates of *E. coli* and *Salmonella* (Ref. 24).

More recently, Gyles (FDA Contract 223–73–7219) demonstrated the in vivo transfer of ENT plasmids in the intestinal tract of pigs, using the selection of tetracycline-resistant recipient organisms as a basis for screening ENT+ recipient colonies. All of the 35 tetracycline-resistant recipient colonies obtained were shown to bear the ENT plasmid. Gyles also showed that tetracycline resistance and enterotoxin biosynthesis reside on the same plasmid.

5. *Director's Conclusions.* The evidence from both in vitro and in vivo experiments demonstrates that ENT plasmids and R-plasmids can become linked. Only Dr. Walton's study describes data to the contrary; however, his study is inadequate for the reasons discussed. Accordingly, the Director concludes that the existing evidence demonstrates that R-plasmids can increase the pathogenicity of organims, and inadequate evidence has been submitted to prove the contrary.

E. *Tissue Residues (Criterion 4)*

1. *Background.* FDA has established zero tolerances in tissues of chickens, swine, pheasants, and quail, in milk and eggs for penicillin, its salts and residues. Negligible tolerances of 0.05 part per million exist for the uncooked edible tissues of cattle and turkeys. In all cases the tolerances are a function of the lowest limit that the penicillin assay methods can reliably measure; therefore, the agency in effect permits no residue of penicillin in human food. FDA established these "zero" tolerances because there is no scientific evidence to support a no-effect level for penicillin or its metabolites on the human or animal intestinal flora or on the induction of hypersensitivity. Violative, over tolerance, penicillin residues are regularly reported by the U.S. Department of Agriculture, Animal and Plant Health Inspection Service residue monitoring programs. The FDA followup investigations on the reported violations demonstrate that two routes of administration are primarily responsible for the violations, injection and feed use; and most of the violations are caused by the product misuse, including failure to follow the labeled withdrawal period.

2. *Criterion.* FDA's guidelines requested the following for antibiotics:

Controlled studies • • • to determine whether or not an antibacterial drug used as subtherapeutic levels in the feed of animals results in residues of the parent compound, metabolites, or degradation products in the food ingested by man which are capable of causing (1) an increase in the prevalence of pathogenic bacteria; (2) an increase in the resistance of pathogenic bacteria to antibacterial drugs used in human clinical medicine.

Controlled studies in appropriate test animals shall be conducted to determine whether the consumption of food produced by animals receiving antibacterial drugs will result in:

(a) An increase in the intestinal flora of the prevalence of pathogenic bacteria;

(b) An increase in the degree and spectrum of resistance of the intestinal flora to drugs used in human clinical medicine.

Experimental procedures shall include appropriate consideration of maximum use level, minimum withdrawal time and established tolerances.

In addition, a literature survey shall be conducted to determine the incidence of reports of hypersensitivity resulting from antibacterial drugs in food. The literature survey shall include information regarding hypersensitivity reactions occurring as a result of parenteral or topical exposure to antibacterial drugs as well as those ingested in food. When hypersensitivity has been shown, experiments in appropriate laboratory animals must be conducted to develop estimates of what level of antibacterial drugs in food will cause the production of hypersensitivity.

3. *Data submitted.* Because there is a "zero" tolerance for penicillin and no residues are expected when penicillin-containing products are used in accordance with their labeled withdrawal periods, the sponsors of penicillin were exempted by the Director from submitting the test data. Thus, no data have been provided by the sponsors to show whether the consumption of food produced by animals receiving subtherapeutic levels of penicillin will result in an increase of pathogenic bacteria in the intestinal flora of animals or an increase in the degree and spectrum of resistance of the intestinal flora to drugs used in human clinical medicine.

The firms were required and did, in fact, provide literature data on hypersensitivity reactions to penicillin. These documented the well known alergic and anaphylactic reactions occurring from the penicillins and their degradation products. Human reactions to milk residues after treatment of infections of mammary glands with penicillin was a frequent cause of allergic response; consequently, withdrawal periods from drug usage have been developed before edible products are marketed. One instance (Ref. 1) was cited of a severe hypersensitivity reaction to ingested pork containing penicillin residues.

4. *Director's Analysis and Conclusions.* A study carried out by Katz et al. (Ref. 2) examined the effect of feeding penicillin on the development of residues in edible tissues and the nature of the residues. Although no tissues contained detectable penicillin or its degradation products, penicillin and its degradation products were detected in the crop, proventriculus, gizzard, and duodenum, but not in the small intestine from where it might be absorbed into other body tissues. At the same time chicken feces contained high levels of antibiotic resistant Gram-negative lactose-fermenting organisms (presumably *E. coli*), although no penicillin was present in the feces.

The study, however, raises a question about the safety of penicillin. Although no tissue residues were detected, the feces of broilers fed growth promotant levels of penicillin in their diet exhibited a fairly high percentage of antibiotic-resistant, lactose-fermenting organisms. The resistance was found in spite of the fact that no antibiotic activity could be found in the duodenum of the birds. Accordingly, Katz undertook to investigate the ability of penicilloic acid, one of the major degradation products, to stimulate the development of resistant organisms in the intestinal tract. Groups of birds on three rations were studied, a basal ration, a ration of 50 grams penicillin per ton of feed, and a ration of 50 grams of penicilloic acid of feed. Two resistance markers, tetracycline and streptomycin, were separately incorporated in the agar to act as indicators of resistance.

The percentage of lactose-fermenting organisms in the feces of birds on the basal ration remained relatively low for the period of the experiment, but the birds on the penicillin and penicilloic acid diets showed a markedly higher level of such organisms in their feces. Although the results exhibit some variation due to several experimental factors, the resistance pattern of the lactose-fermenting organisms isolated showed a continuous rise in the percent resistance as reflected in the streptomycin marker. The resistance pattern reflected by the tetracycline marker was more variable, but definitely present. However, the levels of drug resistant lactose-fermenting organisms found in the feces of birds from both the penicillin and penicilloic acid supplemented feeds are at least four times greater than the levels found from birds fed the basal ration. Although not statistically proven, the marked increase in resistance reflected by the marker strongly supports the premise that penicilloic acid can stimulate the development of resistance.

Accordingly, the Director must conclude that feeding subtherapeutic levels of penicillin to chickens may cause an increase in resistant lactose-fermenting organisms. Since the principal lactose-fermenting organisms are *E. coli*, and antibiotic resistant *E. coli* have been demonstrated to transfer R-factors to pathogens, the Director must conclude that the subtherapeutic use of penicillin may contribute to an increase in the prevalence of pathogenic bacteria in the intestinal flora of chickens which is contrary to the criterion established. No data have been submitted to rebut this, and for this reason also the Director must conclude that penicillin has not been shown to be safe.

V. EFFECTIVENESS

In the FEDERAL REGISTER of July 17 and 21, 1970 (35 FR 11533, 11647, 11650) FDA announced the conclusions of the National Academy of Sciences/National Research Council Drug Efficacy Study Group concerning the penicillin-containing premixes intended for subtherapeutic and therapeutic use in animal feeds. The NAS/NRC evaluated these preparations as probably effective for growth promotion and feed efficiency and concluded that for the remaining claims the products lack substantial evidence of effectiveness that each ingredient designated as active makes a contribution to the total effectiveness claimed for the drug.

The agency concurred with these evaluations, and it provided the manufacturers of these products 6 months to submit adequate documentation of the effectiveness.

Section 512 of the act (21 U.S.C. 360b) requires that a new animal drug have the effect it purports or is represented to have under the conditions of use prescribed, recommended, or suggested in its labeling. For fixed combination drugs, § 514.1(b)(8)(v) (21 CFR 514.1(b)(8)(v)) requires that each ingredient designated as active in any new animal drug combination must make a contribution to the effect in the manner claimed or suggested in the labeling. Furthermore, if in the absence of express labeling claims of advantages for the combination such a product purports to be better than either component alone, the sponsor must establish that the new animal drug has that purported effectiveness. The requirement of effectiveness includes the requirement that the most effective level for each compound be used. In the case of drug combinations for concurrent therapy, the requirement of effectiveness includes the requirement that the dosage of each component is such that the combination is safe and effective for a population of significant size specifically described in the labeling as requiring such concurrent therapy. Therefore, to demonstrate that the penicillin-containing premixes are effective for therapeutic use, the sponsors must submit, in accordance with section 512(d)(3) of the act, substantial evidence consisting of adequate and well controlled investigations, as defined by § 514.111(a)(5) 21 CFR 514.111(a)(5)), including field investigations, satisfying these requirements.

No interested person has ever submitted substantial evidence that the penicillin-containing premixes are effective for the claimed therapeutic uses. For this reason the Director concludes that there is a lack of substantial evidence that the products are effective for therapeutic use in animal feed. Moreover, this action will assure that these levels are not used illegally to replace the subtherapeutic uses that are also being withdrawn.

VI. CONCLUSION

Pursuant to § 558.15, the holders of approved NADA's for penicillin-containing drug products intended for subtherapeutic use in animal feeds have the burden of establishing that this use is safe in accordance with the criteria and guidelines established by that regulation in addition to the basic requirements imposed by the general safety provisions of the Federal Food, Drug, and Cosmetic Act. The Director in this notice has set forth in detail the basis for the criteria and guidelines implementing the regu-

V 4 2 1 6 8 AUG 30 77 UMI

lation and this action. The holders of the approved NADA's have failed to satisfy the legal requirements imposed by the regulations, and they have failed to resolve the basic safety questions that underlie the subtherapeutic use of penicillin in animal feed.

(a) The pool of R-plasmid-bearing organisms is widespread in the environment of man and animals, and antibiotic resistance is increasing in pathogenic and nonpathogenic *E. coli* and Salmonella. The resistance patterns observed in these *E. coli* and Salmonella isolated from animals are similar, and these patterns are similar to the resistance patterns observed in the strains isolated from man. The R-plasmids found in organisms isolated in man and animal are indistinguishable, and common serotypes of these organisms infect both man and animals.

The studies submitted by the holders of approved NADA's through the Animal Health Institute confirm the prevalence of R-plasmid-bearing organisms and the ability of these organisms to transfer R-plasmids to other strains, even in the absence of antibiotic pressure. The AHI studies were also inadequate to measure the duration and prevalance of the Salmonella infections because demonstrably inadequate measuring techniques were used to gather the information.

(b) The potential for harm arising from a compromise of therapy is well documented. None of the studies submitted on compromise of therapy address the fundamental issue—the ability of R-plasmid-bearing organisms to interact and donate these plasmids to other organisms in the intestinal tracts of animals and to acquire resistance to a drug related to the subtherapeutic drug given. Furthermore, no evidence was submitted to show that the effectiveness of subtherapeutic penicillin use over time is not being altered by the development of R-plasmid-bearing organisms.

(c) The evidence demonstrates that R-plasmids controlling pathogenicity, drug resistance, and intestinal motility can and do cotransfer in vitro and in vivo.

(d) Subtherapeutic doses of penicillin and penicillanic acid in chickens causes an increase in drug-resistant lactose-fermenting organisms, e.g., *E. coli*, in their feces. This phenomenon demonstrates a potential for harm, and adequate refuting evidence has not be submitted. In addition, inadequate evidence has been submitted to negate questions on the potential for harm associated with penicillin hypersensitivity and subtherapeutic penicillin use.

(e) Under § 558.15, the holders of approved NADA's were required both to file commitments to conduct studies that would conclusively resolve the safety of the subtherapeutic use of antibiotics in animal feeds and actually to conduct those studies. To ensure compliance with the letter requirement, the regulation required holders of the approved NADA to file periodic progress reports on the studies. The Director is proposing to withdraw approval of all NADA's for which evidence was submitted in accord with § 558.15 purporting to resolve the safety issues, and he is unaware of any sponsor that filed a commitment to conduct the requisite studies but that submitted no evidence. Nevertheless, the Director concludes that the approval of any NADA for which a commitment to conduct appropriate studies was filed but whose holder filed no evidence should be withdrawn on the grounds that the holder of the NADA has failed to establish and maintain records and make reports as required by appropriate regulation.

Additionally, under section 512 of the act, the holders of the approved NADA's have the burden of demonstrating that the products are effective for their indications of use. Based on the evidence now before him, the Director is unaware of any adequate and well controlled investigations demonstrating that the penicillin-containing premixes are effective for the therapeutic uses.

On the basis of the foregoing analysis, the Director is unaware of evidence that satisfies the requirements for the safety of penicillin-containing premixes as required by section 512 of the Federal Food, Drug, and Cosmetic Act and § 558.15 of the agency's regulations. Accordingly, he concludes, on the basis of new information before him with respect to these drug products, evaluated together with the evidence available to him when they were originally approved, that the drug products are not shown to be safe under the conditions of use prescribed, recommended, or suggested in their labeling. The evidence, in fact, indicates that such penicillin use may be unsafe, particularly if the higher or therapeutic levels of penicillin should be used as substitutes for the levels currently used subtherapeutically.

Therefore, the Director announces he is proposing to withdraw all approvals for penicillin-containing premix products intended for use in animal feed whether granted under section 512 of the act or section 108(b) of the Animal Drug Amendments of 1968 (Pub. L. 90-399) on the grounds that they have not been shown to be safe, and lack substantial evidence of effectiveness for therapeutic use. Notice is hereby given to holders of the approvals listed above and to all other interested parties. If a holder of an approval or any other interested person elects to avail himself of an opportunity for hearing pursuant to sections 512(e)(1)(B), 512(e)(1)(C), and 512(e)(2)(A) and § 514.200 (21 CFR 514.200), the party must file with the Hearing Clerk (HFC-20), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, a written appearance requesting such a hearing by September 29, 1977, giving reasons why approval of the application should not be withdrawn and providing a well-organized and full-factual analysis of the scientific and other investigational data that such person is prepared to prove in support of its opposition to the Director's proposal within 60 days. Such analysis shall include all protocols and underlying raw data and should be submitted in accordance with the requirements of § 314.200 (c)(2) and (d) (21 CFR 314.200 (c)(2) and (d)).

The Director will soon issue a separate notice in the FEDERAL REGISTER proposing to withdraw approval of all tetracycline-containing new animal drug products intended for certain subtherapeutic uses in animal feeds on the grounds that they have not been shown to be safe under section 512(c)(1)(B) of the act and § 558.15. Data addressing the safety and effectiveness issues for the tetracycline component of those products should be submitted at that time.

The failure of a holder of an approval to file timely written appearance and request for hearing as required by § 514.200 constitutes an election not to avail himself of the opportunity for a hearing, and the Director of the Bureau of Veterinary Medicine will summarily enter a final order withdrawing the approvals.

A request for a hearing may not rest upon mere allegations of denials, but it must set forth specific facts showing that there is a genuine and substantial issue of fact that requires a hearing. If it conclusively appears from the face of the data, information, and factual analyses in the request for hearing that there is no genuine and substantial issue of fact that precludes the withdrawal of approval of the application, or when a request for hearing is not made in the required format or with the required analyses, the Commissioner will enter summary judgment against the person who requests a hearing, making findings and conclusions, denying a hearing.

Four copies of all submissions pursuant to this notice must be filed with the Hearing Clerk. Except for data and information prohibited from public disclosure pursuant to 21 U.S.C. 331(j) or 18 U.S.C. 1905, responses to this notice and copies of published literature cited in this notice not appearing in journals designated by 21 CFR 310.9 and 510.95 may be seen in the office of the Hearing Clerk, Food and Drug Administration, between 9 a.m. and 4 p.m., Monday through Friday.

If a hearing is requested and is justified by the applicant's response to this notice of opportunity for hearing, the issues will be defined, an administrative law judge will be assigned, and a written notice of the time and place at which the hearing will commence will be issued as soon as practicable.

The Director has carefully considered the environmental effects of this action, and because it will not significantly affect the quality of the human environment, he has concluded that an environmental impact statement is not required for this notice. A copy of the environmental impact assessment is on file with the Hearing Clerk. Moreover, in a notice published in the FEDERAL REGISTER of May 27, 1977 (42 FR 2739) the Commissioner of Food and Drugs requested data concerning the potential environmental impact of a series of regulatory actions, including this one, designed to restrict

the subtherapeutic use of antibacterials in animal feeds. If the public discussion and information gathered warrant, a comprehensive environmental impact statement will be prepared, evaluating the impact of all the actions as a single program.

NOTE.—The Director has also carefully considered the inflation impact of the notice, and no major inflation impact, as defined in Executive Order 11821, OMB Circular A-107, and Guidelines issued by the Department of Health, Education, and Welfare, has been found. A copy of the FDA inflation impact assessment is on file with the Hearing Clerk, Food and Drug Administration.

(Federal Food, Drug, and Cosmetic Act (sec. 512, 82 Stat. 343-361 (21 U.S.C. 360b)) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.1) and redelegated to the Director of the Bureau of Veterinary Medicine (21 CFR 5.84).)

Dated: August 24, 1977.

C. D. VAN HOUWELING,
Director, Bureau of Veterinary Medicine.

AGENCY PUBLICATION ON ASSIGNED DAYS OF THE WEEK

The six-month trial period ended August 6. The program is being continued on a voluntary basis (see OFR notice, 41 FR 32914, August 6, 1976). The following agencies have agreed to remain in the program:

Monday	Tuesday	Wednesday	Thursday	Friday
NRC	USDA/ASCS		NRC	USDA/ASCS
DOT/COAST GUARD	USDA/APHIS		DOT/COAST GUARD	USDA/APHIS
DOT/NHTSA	USDA/FNS		DOT/NHTSA	USDA/FNS
DOT/FAA	USDA/REA		DOT/FAA	USDA/REA
DOT/OHMO	CSC		DOT/OHMO	CSC
DOT/OPSO	LABOR		DOT/OPSO	LABOR
	HEW/ADAMHA			HEW/ADAMHA
	HEW/CDC			HEW/CDC
	HEW/FDA			HEW/FDA
	HEW/HRA			HEW/HRA
	HEW/HSA			HEW/HSA
	HEW/NIH			HEW/NIH
	HEW/PHS			HEW/PHS

Documents normally scheduled on a day that will be a Federal holiday will be published the next work day following the holiday.

Comments on this program are still invited. Comments should be submitted to the Day-of-the-Week Program Coordinator, Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408.

ATTENTION: For questions, corrections, or requests for information please see the list of telephone numbers appearing on opposite page.

federal register

Area Code 202 Phone 523-5240

Published daily, Monday through Friday (no publication on Saturdays, Sundays, or on official Federal holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C., Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The FEDERAL REGISTER provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The FEDERAL REGISTER will be furnished by mail to subscribers, free of postage, for $5.00 per month or $50 per year, payable in advance. The charge for individual copies is 75 cents for each issue, or 75 cents for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the FEDERAL REGISTER.

presidential documents

Title 3—The President

PROCLAMATION 4516

National Hispanic Heritage Week, 1977

By the President of the United States of America

A Proclamation

The Hispanic heritage of over sixteen million Americans, representing a broad diversity of cultures, has enriched our Nation by contributing to the advancement of art and science and by affirming the importance of family bonds and community spirit.

Today, Americans have come to recognize the important role of the Hispanic community both in the life and work of the United States and in our efforts to achieve understanding, mutual respect and common purpose with the Spanish-speaking nations of this hemisphere.

In recognition of our Hispanic heritage, the Congress, by joint resolution approved September 17, 1968 (36 U.S.C. 169f), has requested the President to issue annually a proclamation designating the week including September 15 and 16 as National Hispanic Heritage Week.

NOW, THEREFORE, I, JIMMY CARTER, President of the United States of America, do hereby proclaim the week beginning September 11, 1977, as National Hispanic Heritage Week and call upon the people of the United States, especially the educational community, to observe it with appropriate ceremonies and activities; to reflect on the influence of Hispanic culture in our land; and to encourage the full participation of Hispanic Americans in every phase of American life.

IN WITNESS WHEREOF, I have hereunto set my hand this twenty-ninth day of August, in the year of our Lord Nineteen hundred seventy-seven, and of the independence of the United States of America the two hundred and second.

Jimmy Carter

V 42 169 AUG 31 77 UMI

PROCLAMATION 4517

Citizenship Day and Constitution Week, 1977

By the President of the United States of America

A Proclamation

On July 4, 1976, we joyfully celebrated the 200th anniversary of our Nation's independence. Now, on September 17, 1977, we commemorate the 190th anniversary of a quieter but equally momentous event: the signing of the Constitution of the United States, at Independence Hall, Philadelphia.

The Constitution audaciously proposed a new plan of government—a government through which the new Nation's people could, in the words of the Preamble, "form a more perfect Union, establish Justice, insure domestic Tranquility, provide for the common defence, promote the general Welfare, and secure the Blessings of Liberty to ourselves and our Posterity . . ."

With amendments, notably the Bill of Rights, that Constitution has endured these 190 years as the supreme law of our land. We are its inheritors—the "posterity" whose liberty the Founding Fathers wished to secure—and it is fitting for us to mark the anniversary of what they did.

By a joint resolution of February 29, 1952 (36 U.S.C. 153), Congress designated September 17 as Citizenship Day, in commemoration of the formation and signing of the Constitution and in recognition of all who, by coming of age or by naturalization have attained the full status of citizenship, and authorized the President to issue annually a proclamation calling upon officials of the Government to display the flag on all Government buildings on that day. By a joint resolution of August 2, 1956 (36 U.S.C. 159), the Congress authorized the President to designate the period beginning September 17 and ending September 23 of each year as Constitution Week and to issue a proclamation calling for the observance of that week.

NOW, THEREFORE, I, JIMMY CARTER, President of the United States of America, call upon appropriate Government officials to display the flag of the United States on all Government buildings on Citizenship Day, September 17, 1977, the 190th anniversary of the signing of the Constitution. I urge Federal, State and local officials, as well as leaders of civic, educational and religious organizations to conduct related ceremonies and programs on that day.

I also designate as Constitution Week the period beginning September 17 and ending September 23, 1977, and urge all Americans to observe that week with ceremonies and activities in their schools, churches and in other suitable places in order to foster a better understanding of the Constitution, and of the rights and duties of United States citizens.

IN WITNESS WHEREOF, I have hereunto set my hand this twenty-ninth day of August, in the year of our Lord nineteen hundred and seventy-seven, and of the Independence of the United States of America the two hundred and second.

Jimmy Carter

rules and regulations

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

Title 32—National Defense

CHAPTER V—DEPARTMENT OF THE ARMY

SUBCHAPTER H—SUPPPLIES AND EQUIPMENT

[AR 725–1]

PART 621—LOAN AND SALE OF PROPERTY

Procedures and Responsibilities

AGENCY: Department of the Army, DOD.

ACTION: Final rule.

SUMMARY: This amendment revises procedures concerning the loan of Army-owned property to recognized National Veterans' Organizations for use at National and State conventions, and adds new rules assigning responsibilities and prescribing procedures on the sale of Ordnance property to individuals, non-Federal Government agencies, institutions and organizations; and provides information relative to issue, loan or donation of Government property to the Boy and Girl Scouts of America. This revision and addition was necessary due to the recent reorganization and the deletion of material no longer pertinent to the subject matter.

EFFECTIVE DATE: August 1, 1977.

ADDRESSES: Commander, US Army Materiel Development and Readiness Command, ATTN: DRCMM–SP, 5001 Eisenhower Avenue, Alexandria, VA 22333.

FOR FURTHER INFORMATION CONTACT:

Mrs. Caryl L. Veth, 274–9617/9674.

SUPPLEMENTARY INFORMATION: The rule is being adopted without a commenting period because it implements pertinent statutes, regulations in support of Federal and civilian agencies. Therefore, it is not considered necessary to invite public comment.

By authority of the Secretary of the Army,

ROME D. SMYTH,
Colonel, United States Army, Director, Administrative Management, The Adjutant General Center.

Accordingly, 32 CFR 621 is amended by revising § 621.1 and adding § 621.2 through § 621.4 as follows:

Sec.

621.1 Loan of Army/Defense Logistics Agency (DLA) owned property for use at national and State conventions.
621.2 Sales of ordnance property to individuals, non-Federal government agencies, institutions, and organizations.
621.3 Accounting for arms and accouterments loaned to other government agencies.
621.4 Issues, loans, and donations for scouting.

1. Present § 621.1 is revised as follows:

§ 621.1 Loan of Army/Defense Logistics Agency (DLA) owned property for use at national and State conventions.

(a) *General.* This section—

(1) Prescribes procedures for loan of Army-owned property to recognize National Veterans' Organizations for National or State conventions as authorized by Pub. L. 193, 81st Congress.

(2) Request for loans for National Youth Athletic or recreation tournaments sponsored by veterans' organizations listed in the "Veterans Administration Bulletin 23 (ALPHA)," will be processed by parent veterans' organizations.

(3) Loans are not authorized for other types of conventions or tournaments.

(b) *Items authorized for loan.* If available, the following items may be loaned for authorized veterans' organizations requirements.

(1) Unoccupied barracks.
(2) Cots.
(3) Mattresses.
(4) Mattress covers.
(5) Blankets.
(6) Pillows.
(7) Chairs, folding.
(8) Tentage, only when unoccupied barracks are not available.

(c) *Requests for loan.* (1) Requests by authorized veterans' organizations for loan of authorized Government property will be submitted to the appropriate CONUS Army Commander of the area in which the convention will be held or the Commander, Military District of Washington (MDW) if within his area.

(2) The tenure of loan is limited to 15 days from the date of delivery, except unusual circumstances. A narrative explanation will be provided to support loan requests for more than 15 days duration.

(3) Loan requests should be submitted by letter at least 45 days prior to required date, if practicable.

(4) Requests for loans will contain the following information:

(i) Name of veterans' organization requesting the loan.
(ii) Location where the convention will be held.
(ii) Dates of duration of loan.
(iv) Number of individuals to be accommodated.
(v) Type and quantity of equipment required.
(vi) Type of convention (State or National).
(vii) Complete instructions for delivery of equipment and address of requesting organizations.
(viii) Other pertinent information necssary to insure prompt delivery.

(d) *Responsibilities.* The Army or MDW Commander will:

(1) When the availability of personal and real property is determined, notify the requesting veterans' organization of the following:

(i) The items and quantities available for loan and the source of supply.
(ii) No compensation will be required by the Government for the use of real property.
(iii) No expense will be incurred by the United States Government in providing equipment and facilities on loan.
(iv) Costs of packaging, packing, transportation and handling from source of supply to destination and return will be borne by the requesting organization.
(v) All charges for utilities (gas, water, heat, and electricity) based on meter readings or such other methods determined will be paid by the veterans' organization.
(vi) Charges which may accrue from loan of DLA/GSA material in accordance with paragraph III, AR 700–49/DSAR 4140.27, and GSA Order 4848.7 and Federal Property Management Regulations, subparagraph 101–27.5.
(vii) The Army will be reimbursed for any material not returned.
(viii) Costs of renovation and repair of items loaned will be borne by the requesting organization. Renovation and repair will be accomplished in accordance with agreement between the Army Commander and the loanee to assure expeditious return of items.
(ix) Transportation costs in connection with the repair and renovation of property will also be at the expense of the using organization.
(x) Assure that sufficient guards and such other personnel necessary to protect, maintain, and operate the equipment will be provided by the loanee.
(xi) The period of loan is limited to 15 days from date of delivery, except as provided for in paragraph (c) of this section.
(xii) Any building or barracks loaned will be utilized in place and will not be moved.
(xiii) Upon termination of use, the veterans' organization will vacate the premises, remove its own property therefrom, and turn over all Government property.

(2) Specify a bond in an amount to insure safe return of real and personal property in the same condition as when borrowed. (In the case of personal property, this amount will be equal to the

V 42 I 169 A UG 31 77 UMI

total value of the items based on current acquisition costs.)

(i) An agreement will be executed between the Army Commander and the Veterans' Organization if the terms of the loan are acceptable. A sample loan agreement is shown at Figure 7–5 of this subchapter.

(ii) When the agreement has been executed and the bond furnished, requisitions will be submitted to the appropriate source of supply. Requisitions will indicate shipping destination furnished by the veterans' organization. Transportation will be by commercial bills of lading on a collect basis.

(iii) Appoint a Property Book Officer to maintain accountability for the Government property furnished under this regulation.

(3) Property Book Officer will:

(i) Assume accountability from the document used in transferring property to the custody of the veterans' organization.

(ii) Perform a joint inventory with the veterans' organization representative. Survey any shortage or damages disclosde by the joint inventory in accordance with AR 735–11.

(iii) Maintain liaison with the veterans' organization representative, an inventory of property being returned. Certify all copies of the receipt document with the veterans' organization representative.

(v) Insure the return of all property at the expense of loanee to the supply source or to repair facilities.

(vi) Obtain a copy of receipted shipping document from the installation receiving the property.

(vii) Determine cost and make demand on the loanee for:

(A) Items lost, destroyed, or damaged.

(B) Costs of repair or renovation. Estimated costs will be obtained from the accountable activity.

(C) Comply with instructions contained in AR 700–49/DSAR 4140.27 in the application of condition A and/or B, C, and T items utilized.

(D) Ascertain that items lost in transit are reconciled prior to assessing charges. Where the loss is attributable to other than the loanee, charges should not be borne by the borrower.

(viii) Request payment from the loanee. Checks are to be made payable to the Treasurer of the United States. Upon receipt of payment(appropriate fiscal accounts will be credited. The Property Transaction Record will be closed and the Stock Record Accounts audited.

(ix) Deposit collections in accordance with instructions contained in AR 37–103. In the event payment is not received within a reasonable period, Report of Survey Action will be initiated in accordance with AR 735–11.

(x) Reimburse DLA/GSA for the cost of any repair, reconditioning and/or materiel not returned.

§ 621.2 Sales of ordnance property to individuals, non-Federal government agencies, institutions, and organizations.

(a) *General.* This Section—

(1) Cites the statutory authority for, and prescribes the methods and conditions of sale of certain weapons, ammunition, and related items as specified herein.

(2) Applies to all sales of weapons and related material to individuals, organizations, and institutions, when authorized by the US Army Armament Materiel Readiness Command (ARR COM), and overseas commanders.

(3) Provides that sales under this section will be limited to quantities of an item which authorized purchasers can put to their own use. It is not intended that property be sold under the provisions of this section for the purpose of resale or other disposition.

(4) Does not apply to sales of property determined to be surplus. See AR 755–series.

(b) *Price.* Except as noted below, when sales of the Army property are made and the title thereto passes from the US Government, the prices charged will be the standard list price contained in the SC 1305/30 Management Data List series, plus cost of packing, crating, and handling and administrative charges.

(c) *Condition of sale.* Provisions apply to sales under this section, as follows:

(1) Sales will be made without expense to the Government.

(i) All costs incident to sales (including packing, crating, handling, etc.) will be paid in advance by the purchaser.

(ii) All costs incident to shipment (transportation, parcel post charges, etc.) will also be paid by the customer.

(iii) Payment for items and charges incident to sale will be made only by cashier's check, certified check, bank money order, or postal money order made payable to the Treasurer of the United States.

(iv) For other than items of ammunition and ammunition components, cash will be acceptable when consignee pickup is authorized or purchase is made in person.

(2) All financial transactions will be accomplished in accordance with applicable Department of the Army directives and regulations. Moneys collected for cost of items, as well as packing, crating, and handling will be deposited as an appropriate reimbursement as prescribed in applicable regulations.

(3) Generally, all sales are final and, normally, the US Government assumes no obligation or responsibility for repair, replacement or exchange, except as provided in AR 920–20. Purchasers will be so advised prior to making the sale. All weapons sold, however, will be safe for firing.

(4) Weapons sold at standard price will be supplied with equipment. Weapons sold at less than standard price will be supplied less equipment.

(5) Sales of specific items may be suspended at any time by the direction of CDR, ARRCOM.

(d) *Purchasing procedure.* (1) Except as provided in paragraph (e) of this section, all requests originating within CONUS for the purchase of small arms weapons, repair parts, cleaning, preserving, and target material will be submitted to the Commander, ARRCOM, Rock Island, IL 61201.

(i) Upon approval, these items will be shipped from Army depots stocking such material, based upon availability of material. Customers will be furnished instructions for submission of remittance.

(ii) Upon receipt of proper remittance from eligible customers ARRCOM will issue the necessary documents directing shipment from an Army depot where the items are available.

(2) In implementing the subchapter, oversea commands should designate installations within the oversea command to which requests for purchase of ammunition and related material will be directed.

(3) Depots shipping weapons to individuals, Director of Civilian Markmanship (DCM) affiliated rifle and pistol clerk, museums, veterans' organizations, and other US Government agencies will annotate shipping documents with the serial number of all the weapons they ship. Firearms shipped will be reported to Commander, ARRCOM, ATTN: DR SAR–MMD–D, Rock Island, IL 61202, using DA Form 3535 (Weapons Sales Record). DA Form 3535 may be obtained from Commander Letterkenny Army Depot, ATTN: DRXLE–ATD, Chambersburg, PA 17201.

(i) The transportation officer will ascertain estimated transportation security measures (costs) for shipment to destination. Such information will be transmitted by letter to consignee with request for acknowledgement that shipment will be accepted based on costs submitted.

(ii) Shipment will not be made unless consignee agrees to accept shipments. Refusal to accept shipment shall be reported to ARRCOM.

(4) CDR, ARRCOM is responsible for maintaining a record by serial number of all weapons reported by depot in accordance with paragraph (d)(3) of this section. He will establish procedures to screen purchase requests to insure compliance with any limitations established by this section.

(e) *Sales to individuals, organizations, and institutions.* (1) Sales of small arms weapons and ammunition are limited by statute (10 U.S.C. 4308) to members of the National Rifle Association (NRA). Such sales will be made in accordance with the provisions of this section and with other rules and regulations approved by the Secretary of the Army.

(2) Sales will be limited to M1 service rifles, either national match grade or

service grade. Only one such rifle and spare parts for it will be sold to an individual. No ammunition will be sold to individuals.

(3) Junior marksmanship clubs and junior marksmanship division affiliated within the Director of Civilian Marksmanship (DCM) pursuant to AR 920–20 may purchase limited quantities of .22 caliber ammunition.

(4) The DCM will determine the maximum quantity of such ammunition that clubs will be permitted to purchase in each fiscal year.

(5) Approved, non-profit summer camp organizations which are of a civic nature and are chartered or recognized by the NRA are allowed to purchase from the DCM at cost plus shipping and handling charges, 300 rounds of .22 caliber ammunition for each junior who is participating in a summer camp marksmanship program.

(6) Requests for purchase of ammunition by marksmanship clubs and summer camp organizations will be submitted to the DCM for approval. If he approves, the application will be forwarded to ARRCOM for processing. If it is disapproved, it is returned to applicant with reason(s) stated for disapproval.

(f) *Eligibility of purchasers.* In order to purchase a rifle under this program, an individual must:

(1) Be a member of the NRA as required by statute.

(2) Be a member of a marksmanship club affiliated with the DCM (AR 920–20).

(3) Based upon regular competitive shooting, have an established status as a marksman as determined by the DCM.

(g) *Purchase procedure.* (1) Individual members of the NRA desiring to purchase National Match grade M1 service rifles will submit requests to the Director of Civilian Marksmanship, Department of the Army, Washington, DC, 20315.

(i) The request should contain the name and address of the shooting club with which the purchaser is affiliated and appropriate evidence of status as a competitive marksman.

(ii) The individual's current NRA membership card (or exact facsimile thereto) will be forwarded with the request, accompanied by a self-addressed stamped envelope for return of the membership card.

(2) Upon receipt of a request, the Director of Civilian Marksmanship will forward to the individual a Certificate for Purchase of Firearms in the suggested format at figure 5–1 be completed, notarized and returned. When returned with check or arrangements for payment, the Certificate will be referred for appropriate verification in the records of US Government agencies and for other investigation as required. This is done to insure that the sale of a weapon to the applicant is not likely to result in a violation of law. The Privacy Act Statement for Certificate of Purchase of Firearms (figure 5–2) will be made available to the individual supplying data on the Certificate for Purchase of Firearms (suggested format, figure 5–1). Prior to requesting the individual to supply data on the Certificate for Purchase of Firearms (suggested format, figure 5–1) the Privacy Act Statement for Certificate will be made available to the individual concerned. The Privacy Act Statement will be reproduced locally on 8 x 10½ inch paper.

(i) A purchase application will be denied if the applicant fails to meet all the conditions required in the Certificate.

(ii) If an application is denied, the applicant will be informed of the action and will be given an opportunity to submit additional information justifying approval of the application.

(iii) If the results of the investigation are favorable, the application will be forwarded to ARRCOM for processing.

(h) *Targets and spare parts.* Marksmanship clubs affiliated with the DCM and individuals who are members of National Rifle Association are authorized to purchase from the Army targets of types not otherwise available from commercial sources. Request for such purchases will be submitted to the Director of Civilian Marksmanship for approval and processing. Individuals who are members of the National Rifle Association and who have in the past purchased rifles from the Army under the authority of 10 U.S.C. 4308(a)(5), may purchase spare parts for those rifles if the parts are available. Requests for purchase of spare parts will be submitted to the Director of Civilian Marksmanship for approval. If he approves the application, he will forward it to ARRCOM for processing. If he disapproves the application, he will return it to the applicant stating the reasons for disapproval. Current DA transportation security measures for weapons will be applied under procedures contained in paragraph (d)(1)(i) and (ii) of this section.

(i) *Cadets, US Military Academy.* (1) When approved by the CDR DARCOM, the Superintendent, US Military Academy may sell to cadets upon graduation from the Academy those sabers which no longer meet prescribed standards of appearance and/or serviceability.

(2) Application to purchase sabers under these provisions will be made in accordance with procedures established by the Superintendent.

(j) *Reserve Officer's Training Corps (ROTC) and National Defense Cadet Corps (NDCC).* Supplies required by educational institution for the training of units and individuals of the Reserve Officer's Training Corps and National Defense Cadet Corps, in addition to authorized items normally furnished to ROTC and NDCC schools, may be sold when available (10 U.S.C. 4627). Such purchasers will be in accordance with AR 145–2.

(k) *Manufacturers and designers.* (1) Under the provisions of title 10 U.S.C. Section 4506, the Secretary of the Army is authorized to sell to contractors or potential contractors such samples, drawings, and manufacturing and other information as he considers best for national defense. Procedures for such sale are contained in APP 13–1502.

(2) Under the provisions of title 10, U.S.C. Section 4507, the Secretary of the Army may sell to designers who are nationals of the United States, serviceable ordnance and ordnance stores necessary in the devolpment of designs for the Armed Forces. Designers will submit application to purchase to the appropriate Commodity Command.

(3) If any item normally requiring demilitarization pursuant to the Defense Disposal Manual (DoD 4160.21–M) and the AR 755-series is sold, a special condition of sale will prohibit further disposition by the purchaser without prior approval of the Deputy Chief of Staff for Logistics, Department of the Army.

(l) *Sales of individual pieces of US armament for sentimental reasons.* Under the provisions of title 10, U.S.C., Section 2574, individual pieces of US armament, which are not needed for their historical value and can be advantageously replaced, may be sold at a price not less than cost when there exists for such sale sentimental reasons adequate in the judgement of the Secretary of the Army.

(m) *Method of sale.* (1) Applications to purchase under the provisions of this act will be submitted to Deputy Chief of Staff for Logistics, ATTN: DALO–SMS, Department of the Army, with a complete identification including serial number, and location of desired items, if known.

(2) Approved applications for major items will be forwarded through Commander, US Army Materiel Development and Readiness Command, ATTN: DRCMM–SP, to the Commander, US Army Armament Materiel Readiness Command.

§ 621.3 Accounting for arms and accouterments loaned to other government agencies.

(a) *General.* This section —

(1) Prescribes procedures governing the accounting for arms and accouterments loaned to another agency of the Government by DARCOM for the protection of public money and property under the provisions of Title 10 U.S.C. 4655.

(2) Applies to DARCOM and those activities and installations thereof responsible for shipment of materiel and processing of supply documents for loans of arms and accouterments to other Government agencies.

(3) Issue of arms and accouterments to other Government agencies should be pursuant to section 601, Economy Act of 1932, (47 Stat. 417; 31 U.S.C. 686) as amended by the act of 26 June 1943 (57 Stat. 219).

(4) The Secretary or Under Secretary of the Army is the approving authority for loans covered by this section. Loans will be approved or disapproved after consideration of the purpose and proposed duration of the loan, and such factors as stock position, programmed Army requirements, and type classification with pending changes thereto.

(5) Unless otherwise approved by the Secretary or Under Secretary of the

V 42 169 A UG 31 77 UMI

Army, loan agreements will be for a maximum of one year.

(b) *Requests.* (1) Requests for an initial loan of material or for the extension of an existing loan will be forwarded by the head of the agency involved to the Secretary Under Secretary of the Army. Only those items which are available in on-hand stocks will be considered for approval. Procurement of materiel required to satisfy a loan requirement is not authorized.

(2) Normally, request for loan of weapons items which are type classified standard (Logistics Control Code A or B), will not be approved when a similar item or lower type classification is available.

(c) *Issue, cost and care.* (1) Loaned materiel will be returned to the Army in the same condition in which it was received.

(2) Cost of packing, handling, and transportation will be borne by the borrowing agency.

(3) Borrowing agencies are fully responsible for the care, custody, and paper use of material loaned, and for payment for material lost, damaged or destroyed.

(d) *Responsibilities.* (1) Under the provisions of statute cited in paragraph (a)(1) of this section, CDR DARCOM will require the maintenance of a stock record account, as specified in AR 735-5, for the purpose of reflecting accountability for property loaned pursuant to this regulation.

(2) Commander, ARRCOM, ATTN: DRSAR-MMD, has been designed by Commander, DARCOM as the activity to maintain accountable property records for these loans.

(e) *Processing loan requests.* (1) Requests for loan of arms and accouterments received in DARCOM or other Army activity supply channels will be returned to the originating agency for referral in accordance with paragraph (b)(1) of this section. Those approved by the Secretary or Under Secretary will be sent to ARRCOM for execution of a formal loan agreement.

(2) Requests for loans will specify the responsible official, consignee, specific need for material, proposed duration of the loan, a citation of funds to cover the cost of packing, handling, and transportation, and that facilities are available to keep firearms in locked security when not in use.

(f) *Shipment procedure.* (1) Inventory control points will initiate material release orders in accordance with AR 725-50. Concurrently with initiation of the material release order, the consignee will be furnished notice that shipment has been directed, a list of the DOD Single Line Item Release/Receipt Documents (DD Form 1348-1), and instructions as follows:

(i) *Special note to consignee.* Upon receipt of the articles listed herein, the following certificate will be signed on three copies and forwarded with receiving document (DD Form 1348-1) to (insert name and address of responsible official).

"I certify that the articles listed on (insert number) copies of attached DD Form 1348-1, numbered as follows: (list number of each Release/Receipt Document) were received in apparent good condition, except as noted. Serial numbers have been verified. (Omit second sentence if not applicable).

(Signed) _____
(Typed) _____".
(Date) _____"

(ii) Special note to responsible official.

(A) Upon receipt of signed copies from the consignee, another certificate as given in (B) below will be prepared and signed, with one copy to (insert name and address of accountable property officer) and one copy retained for file.

(B) When the requirement for these articles no longer exists, disposition instructions will be requested from (insert inventory control point). (The next sentence will be varied to fit cases where items are furnished on a nonreimbursable basis and can be disposed of in accordance with regulations of the borrowing agency; and cases where weapons, through furnished on a nonreimbursable basis, must be returned to Army control for demilitarization prior to disposal.)

"I certify that desponsibility for articles listed on (insert number) copies of attached DD Form 1348-1, numbered as follows: (list number of each Release Receipt Document) is acknowledged, except as noted.

(Signed) _____
(Typed) _____
(Date) _____"

(2) All shipments will be documented on DoD Single Line Item Release/Receipt Document (DD Form 1348-1). Transportation, packing, and handling costs will be shown on all copies as will serial numbers in the case of weapons shipments.

(3) In addition to the normal distribution of DD Form 1348-1 to the consignee, one copy will be mailed to the designated responsible official of the agency concerned, and one to the pertinent inventory control point.

(g) *Accounting.* (1) Copies of the DD Form 1348-1 transmitted by the supplying installations as prescribed in paragraph (f)(1) of this section will be used as a basis for establishing accountability for the items on loan.

(2) *Hand receipt accounts.* The signature of the responsible official of the agency on DD Form 1348-1 will constitute a valid hand receipt in the accounts of the Army accountable property officer.

(3) *Annual settlements.* If a loan has been approved for a period longer than one year, property officers will reconcile loan accounts with responsible officials each 12 months. An Inventory Adjustment Report, DA Form 444, will be prepared in quadruplicate by the accountable property officer, listing items and quantities on loan to each agency. Three copies will be forwarded to the responsible official concerned requesting verification of the listing and return of two signed copies.

(h) *Returns.* (1) The responsible property officer normally will request disposition instructions from the accountable property officers when materiel is no longer needed or upon expiration of the established loan period. However, property may be drawn from the borrowing agency at any time to satisfy military requirements.

(2) The accountable property officer will issue shipping instructions for the return of property to a designated installation. The letter of instruction will contain a MILSTRIP document number (AR 725-50) for each line item to be returned, to be used for the shipment. The shipper will be directed to cite this document number on the shipping document.

(3) The accountable property officer will prepare and submit to the receiving installation a prepositioned materiel receipt card (DoD Materiel Receipt Document (DD Form 1486)) (document identifier DWC) as advance notice of the shipment.

(i) Exception data will be annotated as follows: "Return of Loan from other Government Agency-Report Receipt of Arms and Accouterments Accountable Property Officer, ATTN: DRSAR-MMD".

(ii) A copy of the letter of shipping instructions (paragraph (h)(2) of this section) will be inclosed with the prepositioned materiel receipt card for information.

(4) Upon receipt at the receiving installation, property will be inspected immediately. Cost of repairing unserviceable items and cost of replacement, if irreparable, will be determined at time of inspection. The MILSTRIP receipt card will be mailed to the accountable property officer with estimated damage cost and detail materiel conditions as exception data.

(5) Upon notification of material receipt, the accountable property officer will clear the loan record with a credit entry and process the receipt to the inventory records as an increase on-hand to asset balance.

(6) The accountable property officer will furnish receipted copies of the receiving document to the consignor and the responsible property officer closing the transaction. Billing action, when required, will be initiated as prescribed below by paragraph (i) of this section.

(i) *Fiscal procedure.* Inventory control points will be responsible for initiating billing and collection upon receipt of documents specified in paragraphs (g) and (h) of this section.

(1) Collection of amounts due the Department of the Army under this section will be in accordance with the procedures set forth in paragraph 5, AR 37-27. The same procedure will be followed whether collections are to cover the cost of packing handling, and transportation; the value of property lost or irreparably damaged; or the cost of repair.

(2) Collections will be credited to the appropriation out of which similar materiel will be procured, or similar services rendered.

(3) Standard Form 1080 (Voucher for Transfer between Appropriations and/or Funds) will be annotated to indicate that collections are to reimburse Department of the Army appropriations in accordance with 10 U.S.C. 4655.

§ 621.4 Issues, loans, and donations for scouting.

(a) *General.* This section provides information relative to issue, loan or donation of Government property to the Boy Scouts of America and the Girl Scouts of America.

(b) *Guidance.* (1) Issues are made under the provisions of the loan agreement and reimbursement is made for adjusted shortages and damages.

(2) Provisions for donations of surplus property to Scout organizations, including, hadnling, and transportation; the ing lists of classes of donable property, are contained in Chapter III, Part 3, Defense Disposal Manual (DOD 4160.21M).

(3) The loan of certain Army, Navy, Air Force and DLA equipment and the provision of transportation and other services for Jamborees is initially provided for by Pub. L. 92-249. Implementation on a current basis is made in DoD Directive 7420.1. Army implementation is provided as follows:

(i) Army stock fund in paragraph 2-6b (4), AR 37-111, Working Capital Fund-Army Stock Fund Uniform Policies, Principles and Procedures Governing Army Stock Fund Operations.

(ii) Non-stock fund in paragraph 2-17a, AR 310-34, Equipment Authorization Policies and Criteria, and Common Table of Allowances.

(c) *Procedure.* Loan agreements are mutually developed preceding the actual lending of the equipment. Paragraph 1-16, AR 735-5, General Principles, Policies and Basic Procedures, is used as the guide for preparation of loan agreements. Authority for commanders to participate in World and National Jamborees is included in paragraph (d) of this section; Procedure for Loan of Equipment and Providing of Transportation and Other Services to the Boy Scouts of America for World and National Jamborees is included in paragraph (j); and sample loan agreement to be executed by area commanders is included as figure 7-5.

(d) *World and National Boy Scout Jamborees.* The Act of 10 March 1972 (Public Law 92-249; 86 Stat 62.) and (86 Stat 63.) authorized the Secretary of Defense to lend equipment and provide transportation and other services to the Boy Scouts of America in support of World and National Jamborees. The Secretary of Defense has delegated his authority and responsibility for the support of Jamborees to the Secretary of the Army. The Commander DARCOM, ATTN: DRCMM-SP, has been assigned to monitor the program for the Secretary of the Army.

(e) *Group travel and visits.* Many Scouts and Leaders will travel in groups and their itinerary will provide for visits to places of interest in CONUS enroute to and from Jamborees. Such group travel may begin in June and extend into September and October of the Jamboree year. In keeping with Department of the Army policies, commanders of Army Installations may extend an invitation to and honor requests from Scout groups enroute to and from the Jamboree to visit and encamp at their installations.

(f) *Commissary and post privileges.* Installation commanders are authorized to provide commissary and post exchange privileges to Scout groups enroute to and from the Jamboree for food items such as bread, meat, and dairy products. These privileges will be extended only to Scout groups which are enroute to or from the Jamboree, and who are encamped or quartered at the installation or the Jamboree site. Commissary and post exchange privileges extended to Scout groups while encamped at the Jamboree site for supply and food items will only be honored upon-application by officials of the Boy Scouts of America to supplement supplies and rations not considered adequate for American Scouts or Scouters.

(g) *Arrangements.* Regional Scout Executives have been informed by the National Headquarters of the contents of this subchapter and that arrangements pursuant to this subchapter must be made in advance directly with the installation commanders. However, commanders will consider factors of extenuation or emergency which may preclude advance arrangements.

(h) *Hospitalization.* Boy Scouts and Scout Leaders attending Jamborees are considered designees of the Secretary of the Army for the purpose of receiving medical care at US Army Medical facilities. The reciprocal rate will not be charged. Subsistence charges will be at the rate of $1.80 per day for hospitalized patients, but will not be collected locally. Each Boy Scout and Leader participating in Jamborees and hospitalized in Army medical treatment facilities will be reported to The Surgeon General, ATTN: DASG-SGRE-SSC, Department of the Army, Washington, DC 20314, on DD Form 7 (Report of Treatment Furnished Pay Patients; Hospitalization Furnished (Part A)). No local collections are authorized.

(i) *Service coordination.* (1) The Departments of the Navy and the Air Force and the Defense Logistics Agency will assist the Department of the Army in providing necessary equipment, transportation, and services in support of the Boy Scouts of America attending Jamborees. The Secretary of the Army or his designee will maintain liaison, as appropriate, with such agencies to avoid duplication of effort.

(2) Other departments (agencies) of the Federal Government are authorized under such regulations as may be prescribed by the Secretary (Administrator) thereof, to provide to the Boy Scouts of America (BSA), equipment and other services, under the same conditions and restrictions prescribed for the Secretary of Defense.

(j) *Procedure for loan of equipment and providing of transportation and other services to the Boy Scouts of America for world and national jamborees.* (1) In accordance with the provisions of Pub. L. 92-249, 92d Congress, H.R. 11738, 10 March 1972, and Secretary of Defense Memo of 17 May 1972, subject: Loan of Equipment and Providing of Transportation and Other Services to the Boy Scouts of America for Boy Scout Jamborees; Memo of 23 January 1973, subject: Military Transportation Support for Boy Scout Jamborees; and Memo of 19 August 1974, subject: Military Transportation Support for Boy Scout Jamborees, the DOD is authorized to lend certain items and provide transportation and certain other services to such Jamborees. Prior to the loan of property and providing transportation and other services, an appropriate agreement will be executed between the United States of America and the activity to be supported. A bond (fig. 7-6), in an amount specified by the Commander, DARCOM, based on statute will be taken by the Commander-in-Chief/Commander, Major Army Command (MACOM), and held until termination of the encampment and final settlement is made for each Jamboree.

(2) The Commander-in-Chief/Commander, MACOM designated, on behalf of the Commander, DARCOM, representing the Secretary of Defense will enter into legal arrangements with the Boy Scouts of America for the loan of equipment and the providing of transportation and certain other services for Boy Scouts World and National Jamborees. National Jamborees include Jamborees conducted by and within the United States and also those conducted by and within foreign nations.

(3) The Commander-in-Chief/Commander, MACOM, will appoint a Property Book Officer who will maintain separate stock records in order to provide for a single final billing to the supported activity (Boy Scouts of America) for items consumed, lost, damaged or destroyed. The Department of the Army will not be billed for items obtained from other than Army sources, except medical supply losses. Bills for medical supply losses will be submitted to the US Army Area Surgeon for payment. He will establish liaison with the activity to be supported. The property book account will be established in accordance with section 2, chapter 2, AR 710-2.

(4) The Commander-in-Chief, MACOM, will task the Army Areas Surgeon for Medical Supply Support to the Jamborees. Each Surgeon designated should appoint an accountable officer and furnish the name, location, and routing identifier of a project office wherein medical supply problems can be resolved.

(5) The Property Book Officer is authorized direct communication with the source of supply, other military department liaison personnel and DARCOM ICP's to resolve routine supply problems.

(k) *Preparing bills of material.* (1) The activity (BSA) will submit a list of equipment and supplies desired to the Commander-in-Chief/Commander, MACOM. This list will be edited during and subsequent to preliminary conferences with representatives of the activity and furnished to Commander, DARCOM, ATTN: DRCMMSP.

(2) HQ, DARCOM, will convert the informal list to a tentative Bill of Material

V 42169 AUG 31 77 UMI

and will furnish the respective Commodity Command that part of the Bill of Material for their items of logistical responsibility. A suggested format for the Bill of Material is included as figure 7–1. Local reproduction is authorized. Copies of the entire tentative Bill of Material will also be furnished to each of the military departments authorized to participate in the support of the encampments. The Bill of Material forwarded to the Commander-in-Chief/Commander, MACOM will be screened to determine in-house availability prior to placing requisitions on CONUS supply points.

(3) At such time as item availability information is on hand and the sources to be used are determined (paragraph (m) of this section, a Bill of Material (figure 7–1) will be prepared by HQ, DARCOM, and forwarded to the Commander-in-Chief/Commander, MACOM.

(4) The Bill of Material will list, by commodity command (military department); all items desired, identified by National Stock Number (NSN) description, quantity desired and required delivery date. The NSN will provide identification of the items required. Items will be identified by the Property Book Officer to the responsible commodity command or military department as indicated below:

(i) ECOM	1	US Army Electronics Command.
(ii) TSARCOM	2	US Army Troop and Aviation Materiel Readiness Command.
(iii) ARRCOM	3	US Army Armament Materiel Readiness Command.
(iv) TARCOM	4	U.S. Army Tank-Automotive Materiel Readiness Command.
(v) DLA	5	Defense Logistics Agency.
(vi) Navy	N	Department of the Navy.
(vii) Air Force	F	Department of the Air Force.
(viii) Other Installations	A	

The Bill of Material will be screened to insure that radioactive items restricted for military use are not included.

(l) *Establish property transaction records.* (1) A Property Transaction Record reflecting complete information about each item loaned to the activity will be established and maintained by the Property Book Officer (figure 7–2) and the respective commodity command military department (figure 7–3). Suggested formats for the Property Transaction Records are found in figures 7–2, 7–3, and 7–4, Local reproduction is authorized.

(2) The Property Book Officer will also establish and maintain separate Property Transaction Records for items obtained from supply sources other than Army commodity commands, i.e., other Army installations, Department of the Navy, Department of the Air Force (figure 7–4).

(3) Each entry on the Property Transaction Record will be supported by appropriate documentation (commodity command: copies of shipping documents, copies of return documents and copies of surveillance inspection report—Property Book Officer: Requisition voucher files and hand receipt cards. This is particularly important for reconciliation purposes in order that all property received from each source will be returned to that source upon termination of each encampment.

(m) *Locating and obtaining equipment and supplies.* (1) The respective commodity commands (military departments) will screen the tentative Bill of Material (paragraph (k)(2)) and determine availability and source of supply identified by Routing Identifier Code. They will advise HQ, DARCOM, ATTN: DRCMM–SP, of availability, appropriate substitute items when the requested items are not available in sufficient quantity, and the source of supply for requisitioning purposes.

(2) Concurrently, the Bill of Material will be screened within the MACOM to determine those items that can be obtained from assets available in the command.

(3) The Property Book Officer will requisition equipment and supplies from the source of supply as indicated by Commander, DARCOM in accordance with AR 725–50 or other separately furnished instructions. The requisition number, quantity requisitioned, stock number and source of supply will be entered in the Property Transaction Record. Requisitions will cite the appropriate project code assigned and appropriate activity address code on all requisitions submitted. Project codes will be assigned by Commander, Logistic Systems Support Activity, ATTN: DRXLS–LCC, Chambersburg, PA, 17201 and distributed by message to all interested addressees.

(4) Loan of General Services Administration (GSA) General Supply Fund Material—The Federal Property and Administrative Service Act of 1949, as amended, authorizes the Administrator GSA to loan GSA General Supply Fund Material to the Department of Defense and other federal agencies. Loan shall be made to the extent that items are readily available and that such loans will not jeopardize the GSA stock inventory. The loan of GSA General Supply Fund Material shall normally be limited to 90 calendar days. Requisitions for GSA material should be submitted to the nearest GSA Regional Office by the CINC/CDR MACOM.

(5) Formal accountability for all items shipped to the site of the activity will be retained by the appropriate accountable activity. Property and financial accounting will be in accordance with respective military department regulations governing loans.

(6) The shipping depot or other source will furnish a copy of the shipping document to the respective commodity command (military department) where the quantity charged, date shipped, condition of the property and total value will be posted to the Property Transaction Record.

(7) Upon receipt of the advance copy of the shipping document, the commodity command (military department) will post information to his Transaction Record, by source as in paragraph (l)(1) of this section.

(8) When the shipment is received, the Property Book Officer will inspect the property. A narrative statement of condition will be prepared if condition of the property is other than that indicated on the shipping document and referenced to the condition entry on the Property Transaction Record. The source of supply, as appropriate, will be immediately notified of overages or shortages and verified in condition, as provided in Chapter 8, AR 735–11. The Property Book Officer will enter on the shipping document the quantity actually received when it differs from quantity shown as shipped and will post the quantities received to the property book record.

(9) Discrepancies between the quantity shipped by the depot and that received by the Property Book Officer and variance in condition will be reconciled as rapidly as possible and appropriate records will be brought into agreement. When shortage or damage is not attributable to the carrier, the Property Book Officer will immediately contact the responsible source of supply, furnishing the stock number and document number involved, together with an explanation of the discrepancy. Reconciliation is particularly important in order to ensure a common point of departure in determining charges to be assessed upon termination of the activity. Replacement shipments, when required, will be covered by appropriate shipping documents.

(10) Special Instructions for Defense Logistics Agency, Clothing and Textile Items. (See DSAR 4140.27/AR 700–49).

(n) *Transportation.* (1) Transportation of equipment and supplies—The responsibility of coordinating movement of equipment and supplies placed on loan to the Boy Scouts of America during National and World Jamborees is delegated to the Commander, US Army Materiel Development and Readiness Command, ATTN: DRCMM–ST.

(2) All requisitions for items in question, will cite the appropriate project code and will be shipped by commercial bill of lading on a collect basis to all National Jamborees and World Jamborees held in the United States.

(3) Shipments to Boy Scout contingents at World Jamborees in foreign countries will be by Government bills of lading, unless otherwise specified by the Boy Scouts of America.

(4) All shipments directed to Boy Scout Jamborees will be routed by the most feasible means as determined by the shipper. Shipments will be consolidated to the maximum extent possible to assure the lowest charges available to the Boy Scouts of America.

(5) Separate shipping instructions will be provided for each Jamboree to assure that correct consignee and railhead addresses are furnished.

(6) Movement of Boy Scouts, Scouters, and officials living in the United States of America to a Jamboree within the United States of America or to a Jamboree in an oversea area shall be the responsibility of the Boy Scouts of America or the individuals concerned.

(7) No authority exists under Public Law 92–249 for the movement of Boy Scouts, Scouters, and officials via military capabilities other than those of the Military Airlift Command or the Military Sealift Command.

(o) *Transportation by vessels of the Military Sealift Command (MSC).* (1) The MSC does not operate any ships suitable for carriage of passengers on transoceanic routes. Although pertinent directives and Public Law 92–249 authorize the movement of Boy Scouts on Military Vessels, the MSC has no capability to provide such transportation.

(2) The MSC is an industrial-funded organization and charges the military service for sealift services provided in accordance with established rates. The host command will be responsible to compensate the MSC for any equipment or material moved on MSC ships. The limitations inherent in Public Law 92–249 stipulate that transportation support provided will be at no cost to the Government. Under these directions, Boy Scout equipment or materiel is not authorized movement on a space available basis without prior approval of the Secretary of Defense. Such approval is not anticipated.

(3) All billings for transportation provided by MSC will be forwarded to the appropriate Commander-in-Chief/Commander of the support major Army command (MACOM). Reimbursement will be requested by the MACOM Commander from the Boy Scouts of America.

(p) *Transportation of oversea based scouts, scouters, and other authorized personnel by military airlift to national or international jamborees.* (1) Space required reimbursable transportation by Military Airlift Command (MAC) airlift over established MAC channels is authorized from points outside the Continental United States (OCONUS) to aerial ports within CONUS, or to other oversea locations and return. Such transportation will be provided only to the extent that it does not interfere with the requirements of military operations, and only to those Boy Scouts of America (BSA) as representing the BSA at the Jamboree. Certification by the BSA will be in the form of a letter identifying each such individual as their authorized representative at the Jamboree. This letter of authorization must be presented to the sponsoring overseas command.

(2) Boy Scouts, Scouters, officials and their equipment will be moved after all space required traffic, but before any space available traffic.

(3) Each passenger is authorized the normal accompanying free baggage allowance of 66 pounds while traveling on MAC aircraft. It is not contemplated that any excess baggage allowance will be authorized.

(4) Transportation of Boy Scouts, Scouters, officials, and their equipment provided by MAC controlled aircraft will be reimbursed at the common user tariff rates assessed US Government Traffic, as contained.

(5) On the basis of letters of authorization issued by the BSA, the BSA will monitor services provided by the Department of Defense. One copy of each BSA letter of authorization will be forwarded to the Commander, US Army Materiel Development and Readiness Command, ATTN: DRCMM–SP, 5001 Eisenhower Avenue, Alexandria, VA 22333, for planning purposes. This letter of authorization should specify whether one way or round trip transportation is requested.

(6) DACROM responsibilities include the following:

(i) Compiling a passenger forecast to be submitted to MAC in accordance with AR 59–8/OPNAVINST 4630.18C/AFR 76–38/MCO 4630.6B.

(ii) Providing Military Traffic Management Command (MTMC) an information copy of the passenger forecast.

(iii) Submitting all passenger requirements for one way and round trip transportation originating overseas to the appropriate overseas command.

(7) The responsibilities of the sponsoring overseas command include:

(i) Verifying that Scout passengers are officially authorized representatives of BSA in accordance with paragraph (p)(1) of this section.

(ii) Making all necessary passenger reservations with MAC, for transportation originating overseas, in accordance with AR 55–6, AFR 76–5, OPNAVINST 4630.23, and MCO P4630.11. The oversea command will submit CONUS outbound return passenger requirements to command, Military Traffic Management Commander, ATTN: MTMC–PTO–P, Washington, DC 20315.

(iii) Issuing each passenger a MAC Transportation Authorization (DD Form 1482) for transportation from the overseas location and return, when round trip transportation has been requested. The customer identification code, item (7) of the DD Form 1482, should be designated—JBWJ—which was approved by MAC as the permanent CIC for direct

V 42 169 AUG 31 77 UMI

billing purposes to HQ, Boy Scouts of America, North Brunswick, New Jersey, 08902.

(iv) Insuring that each Scout passenger has a completed DD Form 1381, signed by a parent, guardian or other legally responsible individual.

(v) Evaluating the use and necessity of military airlift within or between overseas locations. This evaluation will include such factors as reasonable travel time, number of connections required, and assurance of Scout group integrity. Surface transportation will normally be used for travel within an overseas area.

(8) The responsibilities of the MTMC include:

(i) Evaluating the return outbound passenger requirements and making the necessary transportation arrangements so as to maintain Scout group integrity at all times.

(ii) Assisting the BSA in completing required documentation and insuring that passengers are ready prior to the return flight.

(iii) Pub. L. 92-249 does not provide authorization for the use of the Department of Defense transportation by Scouts, Scouters, and Officials of foreign nations. All requests to transport such persons should be forwarded through the unified command channels to the Office of the Assistant Secretary of Defense (Public Affairs). However, DOD does not contemplate authorization for the use of MAC aircraft for other than US Scouts, Scouters, and Officials.

(iv) Use of military helicopters in support of medical evacuation, VIP, press and photo-services—The Director of Army Aviation, the Department of the Army Staff Judge Advocate, and the Comptroller of the Army have furnished the general opinion that Public Law 92-249 authorizes the use of Military helicopters in support of the above described services to the extent they are reasonably available and permits the use of appropriated funds.

(q) *Determination of charges and settlement.* (1) All property on which repair cost is claimed will be held at the depot or post, camp or station until final charges are determined and a release is given by CDR, DARCOM, Department of the Army.

(2) The commodity command (military department) will prepare the following information and statement and forward them to CDR, DARCOM, Department of the Army, for final review:

(i) Complete Property Transaction Record and supporting documents.

(ii) Proper accounts for which reimbursement received for shortages and repairs are to be deposited.

(iii) The following statement: "The losses and/or damages indicated on the Property Transaction Report in the amount of $------ represent the total claim by (appropriate commodity command or military department) relative to commodity command or military department property loaned to (Boy Scouts of America). Upon settlement and deposit to the proper account, the CDR of the commodity command or military department releases the (Boy Scouts of America) from further obligations."

(iv) Statements as to the general type of repair, e.g., tentage, repair tears, insert new panels, replace grommets will be reported on separate addendum to the Property Transaction Record for items requiring repair.

(3) The CINC/CDR, MACOM, will prepare the following information and statement for property furnished for assets in the command and will forward this to CDR, DARCOM:

(i) Same as (q)(2)(i) of this section.

(ii) Same as (q)(2)(ii) of this section.

(iii) The following statement: The losses and/or damages indicated on the Property Transaction Record in the amount of $------ represent the total claim by (appropriate Army) relative to (appropriate Army) property loaned to (Boy Scouts of America). Upon settlement and deposit to the proper account, the CINC/CDR, MACOM releases the (Boy Scouts of America) from further obligations.

(iv) Same as (q)(2)(iv) of this section.

(4) CDR, DARCOM, will review the charges, inspect property to be repaired, if necessary, reconcile any discrepancies and determine final charges to be levied against the supported activity. Approved list of charges will be forwarded to the CINC/CDR, MACOM, for collection, and property being held for repair will be released.

(5) The CINC/CDR, MACOM, will prepare and dispatch a letter to the supporting activity and request payment made payable to the Treasurer of the United States. Upon receipt of payment, collection documents will be prepared and appropriate fiscal accounts, as furnished by the commodity command (military departments) (q) (2) and (3) of this section) credited. The MACOM Surgeon will take action to reimburse the DLA stock fund for expendable medical supply losses reported. The CINC/CDR, MACOM, will close the Property Transaction Record Account.

(6) The CINC/CDR, MACOM, will advise the CDR, commodity command (military departments and CDR, DARCOM, DA) that settlement has been accomplished. Commodity (military department) Property Transaction Records will be closed upon receipt of the foregoing advice.

(7) The CDR, DARCOM will advise the CINC/CDR, MACOM, to return the bond to Boy Scouts of America.

(8) In the event of unsatisfactory settlement, the proceeds of the bond will be used to satisfy the claim. The Power of Attorney executed in connection with the agreement will be envoked and proceeds collected from the bond (fig. 7-7).

CERTIFICATE FOR PURCHASE OF FIREARMS

I hereby certify that I am a citizen of the United States of America; that I was born on _____ (date) at _____ (place); that my Social Security Account number is _____; that I am not a member of any organization which has as any part of its program the attempt to overthrow the Government of the United States by force or violence; that I am not under indictment or information for nor have I been convicted of a crime for which the maximum penalty imposable by law (whether or not actually imposed) is imprisonment for a term exceeding one year, or a crime involving use of a firearm or assault against the person, or a violation of Federal ,State, or local firearms regulations; that I am not a fugitive from justice; that I am not now or ever have been under medical care for psychiatric reasons (statement from psychiatrist may be attached for consideration); that my previous purchases of weapons from the US Government are as listed below; that I am a member of the National Rifle Association, Membership Card No. _____ Expiration Date _____; that I am an active member of _____ club, affiliated with the Director of Civilian Marksmanship; that I have been active for _____ years in competitive marksmanship activity (evidence attached); that I desire to purchase _____ (exact description of item(s) to be purchased) for my personal use and not for resale or other disposition; that I will use this weapon in competitive marksmanship programs which promote practice in the use of rifled arms; that I have complied with all State and local requirements relative to the acquisition of firearms (evidence of compliance must be attached); and that I will comply with the Federal and National Firearms Acts and all State and local laws concerning the possession and use of firearms.

DATA REQUIRED BY THE PRIVACY ACT OF 1974
(5 U.S.C. 552a)

TITLE OF FORM	PRESCRIBING DIRECTIVE
Certificate of Purchase of Firearms	AR 725-1

1. AUTHORITY

Title 10 U.S. Code, Section 4308 - Sale of Firearms

2. PRINCIPAL PURPOSE(S)

Information is required to establish eligibility for sale of firearms to competitive NRA Shooters who are U.S. citizens.

3. ROUTINE USES

This form is sent to the Department of Treasury: Bureau of Alcohol, Tobacco, and Firearms; to the Federal Bureau of Investigation; and to local police offices for security checks of eligible individuals applying for purchase of firearms.

4. MANDATORY OR VOLUNTARY DISCLOSURE AND EFFECT ON INDIVIDUAL NOT PROVIDING INFORMATION

The Department of Army is only authorized to sell firearms to competitive NRA Shooters who are U.S. Citizens; consequently the information required on the form is necessary to comply with this statute in ascertaining individual eligibility. Disclosure of Social Security Numbers is voluntary. The social security number is necessary solely for identification purposes. The routine uses made of the social security number are the same as those named under #3 above. However Failure to provide social security number will result in disapproval of the application.

SAMPLE

AGREEMENT BETWEEN THE UNITED STATES OF AMERICA AND THE BOY SCOUTS OF AMERICA IN CONNECTION WITH EQUIPMENT LOANED AND TRANSPORTATION AND OTHER SERVICES PROVIDED FOR WORLD AND NATIONAL JAMBOREES

Agreement made this __ day of ____, 197__, in duplicate by and between the United States of America, hereinafter referred to as the Party of the First Part, and the Boy Scouts of America, North Bunswick, New Jersey 08902, a corporation organized and existing under and by virtue of the laws of the District of Columbna, hereinafter referred to as the Party of the Second Part.

This agreement shall bind the successors and assigns of the Party of the Second Part.

Pursuant to Section 133(d), Title 10, United States Code, The Secretary of the Army has been delegated authority with power of successive delegation to act as the representative of the Secretary of Defense. The authority to enter into this agreement has been further delegated to the commanders of the appropriate MACOM.

1. The Party of the First Part agrees to lend such equipment as may be necessary for the accommodation of the Boy Scouts and Officials at World and National Jamborees to be held during specified periods at appropriate site.

2. This agreement by the Party of the First Part is predicated upon the performance by the Party of the Second Part of the following conditions precedent:

a. Before delivery of any property or the provision of any transportation and other services by the Party of the First Part, the Party of the Second Part shall post a bond acceptable to the Party of the First Part in the amount of _____ in the form attached hereto, for the same return of such property in good order and condition and for reimbursement of transportation provided and the whole without expense to the United States.

b. The Party of the Second Part shall make a formal request for such equipment and transportation as may be useful or necessary in connection with the World and National Jamborees. The Party of the First Part will make formal determination of the availability of requested equipment and propriety of providing any transportation and incidental services in accordance with existing Federal Statutes and Department of the Army Regulations and Directives.

3. The Party of the Second Part agrees:

a. To appoint a representative for the purpose of making joint inventories of all equipment at the time of the receipt and return thereof, respectively. Said representative shall be authorized to, and shall, execute

Figure 7-5

V 42 169 AUG 31 77 UMI

receipted shipping documents for the equipment, upon delivery, and shall certify as to the correctness of the inventory of all equipment returned.

b. To provide such personnel as may be necessary to maintain and operate the equipment loaned, such necessity to be determined by the Party of the First Part.

c. To permit and facilitate inspection by representatives of the Party of the First Part at any and all times both of the equipment loaned and of the provisions made by the Party of the Second Part for compliance with the paragraphs numbered 3*a* and 3*b* hereof.

d. To turn back to the Department of the Army within 60 days, but not later than the termination of the Jamboree, except in case of emergency, after demand therefor by the Party of the First Part, all equipment loaned in accordance with this Agreement in good order and condition, reasonable wear and tear excepted, and the whole without expense to the Party of the First Part.

e. To pay transportation costs of all equipment loaned from source of supply to destination and return and passenger transportation provided from oversea areas to CONUS or to other areas and return.

f. To pay upon demand of the Party of the First Part reasonable and necessary expense of rehabilitation of equipment after use at world and National Jamborees, such rehabilitation to be accomplished in a manner satisfactory to the Party of the First Part. Rehabilitation shall not be deemed required when equipment has suffered only reasonable wear and tear. Transportation charges incurred by the Party of the First Part in connection with said rehabilitation shall be paid as part of said expense.

g. To pay upon demand by the Party of the First Part for all items lost, destroyed or damaged beyond prospect of economical repair as reasonably determined by the Party of the First Party.

h. To save the Party of the First Part from all expense in the loan of equipment and the provision of transportation and other services and from any incidental loss, expense, damage, claims, or liability whatsoever not specifically mentioned herein arising in connection with said loan of equipment and provision of transportation and other services.

i. To take specific measures to protect the interests of the Party of the First Part by procuring comprehensive insurance for all property loaned, including motorized equipment covered for liability, property damage, fire, theft, and deductible collision, and to file duplicate copies of such insurance policy or policies with the Party of the First Part.

4. The Party of the Second Part further agrees that no member of or delegate to Congress shall be admitted to any share or part of such contract or agreement or to any benefit to arise therefrom.

In Witness Whereof the Party of the First Part has executed these presents as of the day and year above written.

SAMPLE

BOND FOR SAFEKEEPING OF PUBLIC SUPPLIES, EQUIPMENT AND MEANS OF TRANSPORTATION ISSUED TO THE BOY SCOUTS OF AMERICA UNDER PUBLIC LAW 92-249, 92D CONGRESS APPROVED 10 MARCH 1972

Know all men by these presents, that the Boy Scouts of America in the City of North Brunswick and the State of New Jersey, as obligor is held and firmly bound unto the United States of America in the penal sum of _____, lawful securities of the United States, for the payment of which sum, well and truly to be made to the United States, without relief from evaluation or appraisement laws said organization binds itself, its successors and assigns firmly by these presents.

The condition of the above obligation is such, that whereas the Boy Scouts of America is a corporation to which by Public Law 92-249, 92d Congress, approved 10 March 1972, the Secretary of Defense is authorized to lend, under such regulations as he may prescribe, such equipment and provide such transportation as may be necessary and useful for the accommodation of the Boy Scouts and officials at World and National Jamborees of the Boy Scouts of America to be held at (appropriate site), subject to the provision that before delivering such property he shall take from the Boy Scouts of America a good and sufficient bond for the safe return of such property in good order and condition and the whole without expense to the United States.

Now, therefore, if as to all the property of the United States to be issued to the Boy Scouts of America shall take good care of, safely keep and account, and shall, when required by the Secretary of Defense or his authorized representative, safely return to Department of the Army all said property issued and covered by this bond within 60 days from the conclusion of said Jamboree, the whole without expense to the United States, in as good order and in the same condition as that in which the equipment and property existed at the date of delivery, reasonable wear excepted, or upon formal demand make adequate monetary compensation for items lost or damaged beyond prospect of economic repair as well as for costs or renovation or repair of items accomplished at Government repair facilities and for transportation provided from oversea areas to CONUS and return or to other oversea areas and return or as more fully set forth and defined in the agreement dated _____ between the United States of America and the Boy Scouts of America, then this obligation shall become inoperative and void, otherwise to remain in full force and virtue.

The above-bounded obligor, in order to more fully secure the United States in the payment of the aforementioned sum, hereby pledges as security therefor, in accordance with the provisions of Section 1126 of the Revenue Act of 1926, as amended, Government securities in the principal amount of _____ which are numbered serially, are in the denominations and amounts, are otherwise more particularly described as follows:

Figure 7-6

United States of America Treasury Bonds 2½% due _____ _____.

Interest on said securites shall accrue and be paid to the Boy Scouts of America except and unless there occurs a default as defined herein and said securities are sold and applied to the satisfaction of such default as provided herein. Said securities have this day been deposited with the Finance and Accounting Officer, (appropriate US Army) and his receipt taken therefor.

Contemporaneously herewith the undersigned have also executed an irrevocable power of attorney and agreement in favor of the Finance and Accounting Officer, (appropriate US Army), acting for and in behalf of (appropriate US Army) authorizing and empowering said officer as such attorney to disburse said funds so deposited, or any part thereof, in case of any default in the performance of any of the above-named conditions or stipulations.

In Witness Whereof, this bond has been signed, sealed, and delivered by the above-named obligor, this _____ day of _____ 197__.

POWER OF ATTORNEY

Know all men by these presents, that the Boy Scouts of America is a corporation, having its principal office in the City of North Brunswick, State of New Jersey. does hereby constitute and appoint the Finance and Accounting Officer, (appropriate US Army), acting for and in behalf of the (Commander, appropriate US Army), and his successors in office as attorney for said corporation, or its authorized representatives, for and in the name of said corporation to collect or to sell, assign and transfer certain securities described as follows:

United States of America Treasury Bonds 2½% due _____ such securities having been deposited by it, pursuant to authority conferred by Section 1126 of the Revenue Act of 1926, as amended, and subject to the provisions thereof and of Treasury Department Circular No. 154, dated February 6, 1935, as security for the faithful performance of any and all of the conditions or stipulations of a certain obligation entered into by it with the United States, under date of _____ which is hereby made a part hereof, and the undersigned agrees that, in case of any default in the performance of any of the conditions and stipulations of such or any part thereof, or to sell, assign, and transfer said securities or any part thereof without notice, at public or private sale, free from equity of redemption and without appraisement or evaluation, notice of right to redeem being waived, and to apply the proceeds of such sale or collection, in whole or in part, the satisfaction of such default and the undersigned further agree that the authority herein granted is irrevocable.

And such corporation hereby for itself, its successors and assigns, ratifies and confirms such action as is proper, taken within the scope of this Power.

In Witness Whereof, the Boy Scouts of America, the corporation herein-above named by its Chief Scout Executive and Comptroller duly authorized to act in the premises, has executed this instrument and caused the seal of the corporation to be affixed this _____ day of _____, 197__.

Title 10—Energy

CHAPTER I—U.S. NUCLEAR REGULATORY COMMISSION

PART 70—SPECIAL NUCLEAR MATERIAL

Issuance of Licenses; Amendment

AGENCY: U.S. Nuclear Regulatory Commission (NRC).

ACTION: Interim rule.

SUMMARY: NRC is amending its regulations on an interim basis to exempt exports of special nuclear material which is diluted in such a way that it is no longer usable for any nuclear activity relevant from the point of view of safeguards, or is practicably irrecoverable, from the requirement that the export be subject to an agreement for cooperation. This amendment would conform NRC export regulations to internationally recognized standards and eliminate an unnecessary administrative burden.

EFFECTIVE DATE: August 31, 1977.

COMMENT PERIOD EXPIRES: October 17, 1977.

ADDRESSES: Send comments to: Secretary, Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Docketing and Service Section.

FOR FURTHER INFORMATION CONTACT:

Mr. R. Neal Moore, Office of International Programs, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Telephone: 301-492-7984.

SUPPLEMENTARY INFORMATION: Section 57 d. of the Atomic Energy Act of 1954, as amended (Act), authorizes the Commission to "exempt certain classes or quantities of special nuclear material or kinds of uses or users from the requirements for a license * * * when it makes a finding that the exemption * * * would not be inimical to the common defense and security and would not constitute an unreasonable risk to the health and safety of the public."

In November 1976, the Commission received a request from the Kerr-McGee Nuclear Corporation to export to Mexico less than 5 grams of low enriched uranium (special nuclear material) as an entrapped contaminant in 15 pieces of used standard laboratory testing equipment and fuel fabrication machinery which had been sold to the Instituto Nactional de Energia Nuclear (INEN) in Mexico, D.F. Recently, the NRC staff was further informed by NUSAC, Inc., the agent for Kerr-McGee Nuclear Corporation, that its client holds a letter of credit issued by INEN which expires August 31, 1977.

Under present regulations, the Commission is precluded from issuing an export license for this material because there is no agreement for cooperation with Mexico pursuant to Section 123 of the Atomic Energy Act.

Under other circumstances, small quantities of special nuclear material could be exported to countries which do not have an agreement for cooperation with the United States by exporting the material under the auspices of the United States/International Atomic Energy Agency (IAEA) Agreement for Cooperation. However, the IAEA system for the application of safeguards provides that "safeguards shall terminate on nuclear material * * * upon determination by the Agency that it has been consumed, or has been diluted in such a way that it is no longer usable for any nuclear activity relevant from the point of view of safeguards, or has become practically irrecoverable." (INFCIRC/153 and INFCIRC/66/Rev. 2) In such cases, therefore, no useful purpose would be served and an unnecessary administrative burden would be entailed in bringing such exports under the U.S./IAEA Agreement for Cooperation.

A letter dated August 17, 1977, from the Department of State has forwarded the Executive Branch view favoring issuance of the proposed license to Kerr-McGee Nuclear Corporation and an appropriate exemption under Section 57d. of the Act for this case.

While this is the first such case which has arisen, the Commission recognizes that there could be future proposed exports of special nuclear material which is diluted in such a way as to have no relevance from the point of view of safeguards, or is practicably irrecoverable. As with the present case, it is expected that future cases would also involve small quantities of material. At any rate, no such export license would be issued unless the Commission had determined that the proposed export would not be inimical to the common defense and security. Therefore, the Commission has decided to exercise the authority granted under Sections 53, 54, and 57d. of the Act to facilitate such material exports.

The Commission has determined that such action would not be inimical to the common defense and security and would not constitute an unreasonable risk to the health and safety of the public.

In view of the longstanding pendency of this minor case, the Executive Branch's view on the merits of the export license application, the need for timely action expressed by the applicant, the insignificant amounts of the material involved, the fact that the material is practicably irrecoverable and not relevant from the safeguards standpoint, and the fact that the amendment will relieve a restriction, the Commission has also found that the customary 30-day notice of proposed rulemaking and public procedure thereon are unnecessary and contrary to the public interest and that good cause exists why this regulation should be made effective on an interim basis upon publication in the FEDERAL REGISTER without the customary 30-day notice.

This interim rule will expire on March 1, 1978, unless extended by the Commission. The Commission expects to make a decision by March 1, 1978, on whether the interim rule should be made permanent.

All interested persons who desire to submit written comments or suggestions for consideration in connection with making the interim rule permanent should send them to the Secretary of the Commission, Washington, D.C. 20555, Attention: Docketing and Service Section by October 17, 1977. Copies of comments on the interim amendment may be examined at the Commission's Public Document Room at 1717 H Street NW., Washington, D.C.

Accordingly, pursuant to the Atomic Energy Act of 1954, as amended, and the Energy Reorganization Act of 1974, as amended, and Sections 552 and 553 of Title 5 of the United States Code, the following amendment to Title 10, Chapter 1, Code of Federal Regulations, Part 70 is adopted on an interim basis and published as a document subject to codification and effective August 31, 1977.

Section 70.31(e) of 10 CFR Part 70 is amended to read as follows:

§ 70.31 Issuance of licenses.

* * * * *

(e) "When a license is sought to authorize the export of special nuclear material, the Commission will determine whether the export is under the terms of an agreement for cooperation, except for proposed exports on or before March 1, 1978, of special nuclear material which is diluted in such a way that it is no longer usable for any nuclear activity relevant from the point of view of safeguards, or is practicably irrecoverable. No license authorizing export of special nuclear material will be issued if the Commission finds that the issuance of such license would be inimical to the interests of the United States."

(Secs. 53, 161, Pub. L. 83-703, 68 Stat. 930, as amended, 948, as amended, (42 U.S.C. 2073, 2201); Sec. 57d., Pub. L. 93-377, 88 Stat. 475 (42 U.S.C. 2077); Sec. 201, Pub. L. 93-438, 88 Stat. 1243 (42 U.S.C. 5841.)

Dated at Washington, D.C., this 26th day of August, 1977.

SAMUEL J. CHILK,
Secretary for the Commission.

CHAPTER II—FEDERAL ENERGY ADMINISTRATION

PART 211—MANDATORY PETROLEUM ALLOCATION REGULATIONS

Revision of Crude Oil Buy/Sell Program

Correction

In FR Doc. 24503 appearing as Special Part V at page 42769 in the issue for Wednesday, August 24, 1977, the following correction should be made.

On page 42775, in the first column, line 20 of § 211.65, the date, "August, 1977", should read, "August 24, 1977".

PART 211—MANDATORY PETROLEUM ALLOCATION REGULATIONS

Extension of Crude Oil Buy/Sell Program Current Allocation Quarter Through September 1977

AGENCY: Federal Energy Administration.

V 42169 AUG 31 77 UMI

ACTION: Final Rule.

SUMMARY: This rule amends, effective September 1, 1977, the Mandatory Crude Oil Allocation Program (the "buy/sell program") by the addition of a special rule which extends the program's June through August 1977 allocation quarter through the month of September 1977 as a transition between the current program and the revised program which will be implemented on October 1, 1977. Under the special rule, refiner-buyers that purchased their allocations in the current quarter will be permitted to purchase a pro-rata amount thereof in the month of September from the same refiner-sellers from which they purchased crude oil in the current quarter.

EFFECTIVE DATE: September 1, 1977.

FOR FURTHER INFORMATION CONTACT:

Ed Vilade (Media Relations), 12th & Pennsylvania Avenue NW., Room 3104, Washington, D.C. 20461 (202–566–9833); Robert G. Bidwell, Jr. or H. William Gottfried (Program Office), 2000 M. Street NW., Room 6128P, Washington, D.C. 20461 (202–254–9707); Samuel M. Bradley or Jeffrey C. Conrad (Office of General Counsel); 12th and Pennsylvania Avenue NW., Room 5134, Washington, D.C. 20461 (202–566–9565—Bradley); (202–566–2087—Conrad).

SUPPLEMENTARY INFORMATION:

A. BACKGROUND

On August 8, 1977 (42 FR 40448, August 10, 1977) FEA issued a notice of proposed rulemaking and public hearing concerning the addition of a Special Rule No. 9 in the Appendix of Subpart C of Part 211 that would extend the crude oil buy/sell program's June through August 1977 allocation quarter for the month of September 1977 as a transition between the current program and the then-proposed revised program. On August 19, 1977 FEA issued a final rule amending the crude oil buy/sell program effective October 1, 1977 (42 FR 42770, August 24, 1977). FEA determined that it would be necessary to extend the current allocation quarter through September because there was not adequate time to implement a new program between the date of the hearing on the proposed revised program, August 9, 1977, and September 1, 1977, the start of a new allocation quarter under the present regulations. At the same time, FEA did not consider it desirable to initiate a new allocation quarter under the present regulations, since it anticipated that a revised program could be ready for implementation on October 1, 1977.

Under the proposed special rule, refiner-buyers that purchased part or all of their allocations in the current allocation quarter would be permitted to purchase a pro-rata amount of their purchased allocations in the month of September 1977 from the same refiner-sellers from which they purchased crude oil in the current quarter. In addition to requesting comments on the substance of the proposed special rule, FEA also requested comments on whether it would be desirable to extend the current allocation period on a pro-rata basis for the month of October, as well as the month of September, to permit the thirty-day period between the publication of the first buy/sell notice and the beginning of the first allocation period under the new program, October 1, 1977.

The public hearing scheduled with respect to this proposal was cancelled for lack of interest. Comments on the proposal were invited through August 23, 1977, and written comments were received by FEA from nine large integrated refiners and one small refiner. The large refiners commenting generally supported the proposed special rule. One large refiner recommended that refiner-sellers be required to sell crude oil only on a best-efforts basis since pipeline and marine schedules for September are, in most cases, already finalized, and therefore refiner-sellers might experience difficulty in securing crude oil to replace any crude oil that FEA directs to be sold to refiner-buyers in September. FEA is not persuaded to modify the proposal in this regard since refiner-sellers were given notice of FEA's intention to extend the current allocation quarter through September in the July 21 proposal to modify the buy/sell program and therefore have had sufficient time to make appropriate arrangements for sales of allocated crude oil in September.

Two firms, including the small refiner, recommended that the current allocation quarter be extended through both September and October to provide FEA more time to evaluate the applications for allocations under the revised buy/sell program and to provide adequate time for small refiners ineligible under the revised program to establish other sources of crude oil supply. FEA believes that a two-month extension of the current allocation quarter is not necessary since it anticipates that the revised buy/sell program will be ready for implementation effective October 1. In addition, FEA believes that small refiners that are excluded or ineligible for an allocation under the revised program have had sufficient time since the issuance on July 21 of the proposed revision of the buy/sell program to make arrangements for alternative crude oil supplies. In the event that FEA determines that it is necessary and desirable to postpone the effective date of the revised program until November 1, it will issue an amendment on or before September 19, 1977 to the Special Rule No. 9 adopted today extending the current allocation quarter through October 1977. In that event, the allocations for the first allocation period under the revised buy/sell program would be pro-rated over a five-month allocation period.

The small refiner commenting also recommended that refiner-buyers should be permitted to purchase a pro-rata amount of their allocation in the current allocation quarter rather than their actual purchases in the current quarter, as proposed. This comment has not convinced FEA to modify its proposal. Small refiners that were able to secure adequate supplies of crude oil outside the buy/sell program in the current quarter should be able to continue to acquire such supplies in the month of September.

3. SPECIAL RULE NO. 9

Based on its analysis of the material submitted in the written comments, and upon all other information available to it, FEA has determined to adopt Special Rule No. 9 essentially as proposed.

Special Rule No. 9 generally provides that refiner-sellers and refiner-buyers during the June through August allocation quarter will continue in such capacities for September 1977. Refiner-buyers that entered into contracts prior to August 1, 1977 pursuant to the May 25, 1977 buy/sell notice (42 FR 26694) will have the option of continuing those seller/buyer relationships on a pro-rata basis during September 1977. A refiner-seller will be required to offer for sale in September to such a refiner-buyer a volume of crude oil equal to 30/92 of the total volume of crude oil purchased by that refiner-buyer from that refiner-seller. Special Rule No. 9 provides dates by which contracts for the sale of crude oil pursuant to Special Rule No. 9 will have to be executed.

FEA has determined that extending the seller/buyer relationships established during the current allocation quarter is a rational basis upon which to allocate crude oil for the month of September 1977. The relative positions of most refiners, vis-a-vis the national supply to capacity average, should not change dramatically when measured on a June–September basis as compared with June–August. FEA recognizes, however, that unusual circumstances may affect individual companies such that they may have experienced a dramatic change in their crude oil supply situation since the May 25, 1977 buy/sell notice was published. FEA will entertain requests for exceptions where the effect of extending the current quarter buyer/seller relationships would work a severe hardship due to any such dramatic shifts in levels of crude availability among individual refiners.

Because the purpose of Special Rule No. 9 is to provide immediate guidance and information with respect to the allocation of crude oil for September 1977 (prior to the implementation of a revised crude oil allocation program), FEA finds that good cause exists for making these amendments effective in less than 30 days.

(Emergency Petroleum Allocation Act of 1973, Pub. L. 93–159, as amended, Pub. L. 93–511, Pub. L. 94–99, Pub. L. 94–133, and Pub. L. 94–163, and Pub. L. 94–385; Federal Energy Administration Act of 1974, Pub. L. 93–275, as amended, Pub. L. 94–385; Energy Policy and Conservation Act, Pub. L. 94–163, as amended, Pub. L. 94–385; E.O. 11790, 39 FR 23185.)

In consideration of the foregoing, Part 211 of Chapter II, Title 10, Code of Federal Regulations, is amended as set forth below, effective September 1, 1977.

Issued in Washington, D.C., August 26, 1977.

ERIC J. FYGI,
Acting General Counsel.

Subpart C of 10 CFR Part 211 is amended by adding a Special Rule No. 9 in the Appendix thereof to read as follows:

SPECIAL RULE NO. 9

1. *Scope.* This special rule applies to all refiners which were refiner-buyers and refiner-sellers during the crude oil allocation quarter under the buy/sell program commencing June 1, 1977.

2. *Purpose.* Nothwithstanding the provisions of § 211.65, this special rule suspends the crude oil allocation quarter which would otherwise commence September 1, 1977, and establishes a new rule for the allocation of crude oil during the month of September 1977.

3. *Special allocation rule for September 1977.* For the month of September 1977 the allocation of crude oil among refiners shall be made as follows:

(a) Each refiner-seller and refiner-buyer as determined for the allocation quarter commencing June 1, 1977, shall continue in such capacity in September 1977.

(b) Each refiner-seller shall sell in the month of September 1977 to each refiner-buyer to which sales of crude oil were made by the refiner-seller pursuant to the allocation quarter commencing June 1, 1977, including sales directed by the FEA pursuant to 10 CFR 211.65(h), a volume of crude oil equal to 30/92 of the total volume of crude oil sold to that refiner-buyer by that refiner-seller. Refiner-buyers shall have the option of exercising their respective purchase opportunities authorized under this paragraph.

(c) Prior to September 5, 1977, each refiner-seller shall notify each refiner-buyer of the volume of crude oil to be sold to such refiner-buyer by the refiner-seller pursuant to paragraph (b) of this rule.

(d) Prior to September 9, 1977, refiner-sellers and refiner-buyers shall enter into sales contracts for the delivery and purchase of crude oil pursuant to paragraph (b) of this rule.

(e) For purposes of adjusting refiner-sellers' sales obligations for allocation periods subsequent to September 30, 1977, FEA will calculate a total primary sales obligation for the month of September 1977 based on 30/92 of the total primary sales obligation in the allocation quarter commencing June 1, 1977. Each refiner-seller's imputed sales obligations for the month of September 1977 will be calculated according to the procedures provided in § 211.65(d), and refiner-sellers' unsold primary obligations from the allocation quarter commencing June 1, 1977 and the September 1977 allocation period will be carried forward to the allocation period commencing October 1, 1977; *Provided*, That, the volume of unsold sales obligations of each refiner-seller so carried over shall be reduced as provided in § 211.65 (f)(3) adopted on August 19, 1977.

(f) The provisions of § 211.65 (f) and (g) and § 212.94 are applicable to all sales made pursuant to this rule.

(g) The provisions of Subpart C of Part 211 (including but not limited to the procedures and reporting requirements of § 211.66) shall remain in full force and effect except as expressly modified by the provisions of this rule.

(h) FEA will not entertain applications for allocations of crude oil for future refining capacity submitted pursuant to § 211.65 (b) for the month of September 1977.

[FR Doc.77-25378 Filed 8-30-77;8:45 am]

Title 12—Banks and Banking

CHAPTER VI—FARM CREDIT ADMINISTRATION

ORGANIZATION; LOAN POLICIES, AND OPERATIONS; FUNDING AND FISCAL AFFAIRS

AGENCY: Farm Credit Administration.

ACTION: Final rule.

SUMMARY: The Farm Credit Administration, by its Federal Farm Credit Board, took final action to amend its regulations pertaining to amendments to charters of the associations of the Farm Credit System, loan policies of the banks for cooperatives, and certain funding aspects of the banks of the Farm Credit System. The changes in the regulations covering amendments to association charters are being made to clarify certain existing rules. In view of a study by the Capital and Credit Committee of the Banks for Cooperatives, the regulations covering loan policies are being made more responsive to the changing financial posture of the banks. The regulations on funding are redefined to more accurately reflect the ratio requirements of the banks of the Farm Credit System. In addition, the funding regulations are being amended to provide for the issuance of a Farm Credit Systemwide consolidated bond in book-entry form only and to parallel regulations issued by the Treasury Department.

EFFECTIVE DATE: August 15, 1977.

FOR FURTHER INFORMATION CONTACT:

John F. Greeneisen, Deputy Governor, Office of Administration, Farm Credit Administration, 490 L'Enfant Plaza, SW., Washington, D.C. 20578 (202–755–2181).

SUPPLEMENTARY INFORMATION: The Farm Credit Administration, by its Federal Farm Credit Board, took final action on amendments to its regulations which (1) in a transfer of territory from one association to another, require prompt notification to all stockholders and borrowers whose operations are located in the adjusted territories; (2) provide for adjusting the lending limits of the banks for cooperatives semiannually instead of annually; (3) redefine the debt to capital ratio requirements of the banks of the Farm Credit System; (4) prescribe the form and denomination of consolidated bonds, consolidated Systemwide notes, and consolidated Systemwide bonds issued by Farm Credit banks; (5) reflect the liability of each bank of the Farm Credit System in connection with the issuance of consolidated or Systemwide obligations made on its behalf; (6) redefine the terms used in the subpart on issuance of book-entry and definitive Farm Credit securities; (7) clarify the authority of Reserve Banks to issue and otherwise handle book-entry Farm Credit securities; (8) redescribe the scope and effect of the book-entry procedure; (9) redescribe the transfer or pledge of book-entry Farm Credit securities; (10) redescribe the procedure for withdrawal of Farm Credit securities from a Reserve Bank; (11) clarify the liability of the Federal Reserve Banks in connection with book entries of Farm Credit securities; (12 specify the authority of the Federal Reserve Banks to maintain book-entry Farm Credit securities for member banks; (13) set forth the requirements for identification of book-entry accounts; (14) clarify the procedures for servicing book-entry Farm Credit securities; (15) make the regulations of the Treasury Department and the U.S. statutes governing lost, stolen, destroyed, mutilated or defaced U.S. Securities applicable to Farm Credit Systemwide obligations; (16) provide for restrictive endorsement of Farm Credit Systemwide obligations; (17) provide for loss from payment of spurious consolidated obligations to be shared by the 12 Federal intermediate credit banks; and (18) clarify the requirements under which Farm Credit securities may be illustrated in informational and educational materials.

By notice published in the FEDERAL REGISTER on June 20, 1977, interested persons were afforded the opportunity to file written comments or suggestions on these proposed regulations. Ten responses were received commenting on §§ 611.1120(b)(1), 614.4354, and 615.5220. Nine of these were either in favor of or had no objection to the proposed regulations. The other response recommended a change in § 611.1120(b)(1) to make provision for a situation where, in a territorial adjustment among Farm Credit associations, the transferee association does not have like kinds of equities as the transferor association. The proposed regulation was revised to provide, in such instances, for an offering of similar equities which will not adversely affect the interests of the owner and was adopted by the Federal Farm Credit Board as changed.

Of the twenty-six responses received on §§ 615.5450 to 615.5498, twenty-two were in favor of or had no objection to the proposed regulations. The other four comments were directed primarily to language clarification, and several minor technical changes were made in the proposed regulations. All responses received were considered in arriving at the final regulations. As changed, the proposed regulations were adopted by the Federal Farm Credit Board.

Chapter VI of Title 12 of the Code of Federal Regulations is amended by revising §§ 611.1120(b)(1) and 614.4354; renumbering §§ 615.5106, 615.5107, 615.5108, and 615.5109 to be §§ 615.5495, 615.5496, 615.5497, 615.5498 respectively; revising § 615.5220; deleting § 615.5230; renumbering §§ 615.5450, 615.5455, 615.5460, 615.5465, 615.5470, 615.5475, 615.5480 to be §§ 615.5460, 615.5465, 615.5470, 615.5475, 615.5480, 615.485, 615.5494 respectively; adding new §§ 615.5450, 615.5451, 615.5452, 615.5453; revising §§ 615.5460, 615.5465, 615.5470, 615.5475, 615.-

V 42169 AUG 31 77 UMI

5480, 615.5485; adding new §§ 615.5490, 615.5492, and revising §§ 615.5494, 615.5495, 615.5496, 615.5497, 615.5498 as follows:

PART 611—ORGANIZATION

§ 611.1120 Amendments of association charters.

* * * * *

(b) *Other charter amendments.* (1) Territorial adjustments may be made among like associations subject to the approval of the bank board and the Farm Credit Administration, provided, however, that the Governor shall have the power to direct at any time such changes in a charter as he finds necessary for the accomplishment of the purposes of the Farm Credit Act of 1971. All stockholders and all borrowers whose operations are located in the adjusted territories shall be informed in writing of the change and notified that their loans are being transferred to and related equities exchanged for equities of like kinds and amounts in the transferee association. If a like kind of equity is not available in the transferee association, similar equities shall be offered which will not adversely affect the interests of the owner. At that time, each stockholder shall also be informed that the latest association financial and related information will be made available for review upon the stockholder's written request. The Agreement of Transfer of Territory and the notice to stockholders shall provide for a 60-day period from date of stockholder notification during which they may, by written notice to either association, decline to accept the equities of the transferee association and elect to remain with the transferor association for normal servicing until the current loan is paid. Any application by the borrower for renewal or additional credit shall be made to the transferee association, except for those applications permitted under § 614.4070 of this chapter.

* * * * *

PART 614—LOAN POLICIES AND OPERATIONS

§ 614.4354 Banks for cooperatives.

(a) *District banks.* Loans outstanding at any one time to any one borrower, exclusive of participations sold to others shall be limited to the following percentages of the net worth of a district bank as of the preceding June 30 or December 31, whichever is more recent or at an interim date determined by the Farm Credit Administration as a result of material changes in a bank's net worth.

* * * * *

(3) Net worth for the calculation of lending limits at December 31 shall exclude 20 percent of the bank's undistributed earnings and shall not include any portion of Central Bank for Cooperative's undistributed earnings.

(4) Loans made within the established lending limits that become excessive because of a subsequent decrease in the bank's net worth shall be reduced to the lending limits in an orderly manner over a reasonable period.

* * * * *

(d) * * *

(1) Determine its balance sheet net worth total as of the preceding June 30 or December 31, whichever is more recent, or at any interim date determined by the Farm Credit Administration as a result of material changes in the bank's net worth.

* * * * *

PART 615—FUNDING AND FISCAL AFFAIRS

§ 615.5220 Ratio requirements.

(a) A bank shall not incur aggregate liabilities exceeding 20 times its capital and surplus, except with the specific written approval of the Farm Credit Administration. Such approval shall not be granted if the consolidated ratio for all like banks will exceed 20 to 1. When such an exception occurs, all other like banks shall be notified by the Farm Credit Administration. A bank shall notify the Farm Credit Administration whenever its aggregate liabilities exceed 18 times its capital and surplus.

(b) An issue of notes, bonds, debentures, or other similar obligations by a bank or banks shall not be approved by the Farm Credit Administration if such issue together with the aggregate of all other liabilities exceeds 20 times the capital and surplus of the bank or banks which will be primarily liable on the proposed issue. If more than one bank will be primarily liable on the proposed issue, the capital and surplus of the banks involved shall be calculated on a consolidated basis.

(c) The term "capital and surplus," as used in this section, represents total net worth including undistributed earnings or losses but excluding valuation reserves and liability reserves. The term "aggregate liabilities," as used in this section, represents all amounts owed to others.

AUTHORITY: Secs. 5.9, 5.12, 5.18, 85 Stat. 619, 620, 621.

Subpart O—Issuance of Book-Entry and Definitive Farm Credit Securities

§ 615.5450 Consolidated bonds.

(a) The 12 Federal land banks issue consolidated bonds in definitive form in denominations of $1,000, $5,000, $10,000, $50,000, $100,000, and $500,000, or in book-entry form in denominations of $1,000 or multiples thereof.

(b) The 12 Federal intermediate credit banks issue consolidated bonds in definitive form in denominations of $5,000, $10,000, $50,000, $100,000, and $500,000, or in book-entry form in denominations of $5,000 or multiples thereof.

(c) The 13 banks for cooperatives issue consolidated bonds in definitive form in denominations of $5,000, $10,000, $50,000, $100,000, and $500,000, or in book-entry form in denominations of $5,000 or multiples thereof.

§ 615.5451 Consolidated Systemwide notes.

The 12 Federal land banks, the 12 Federal intermediate credit banks, and the 13 banks for cooperatives issue consolidated Systemwide notes only in bearer definitive form in denominations of $50,000, $100,000, and $1,000,000.

§ 615.5452 Consolidated Systemwide bonds.

The 12 Federal land banks, the 12 Federal intermediate credit banks, and the 13 banks for cooperatives issue consolidated Systemwide bonds only in book-entry form in denominations of $1,000 or multiples thereof for issues with an original maturity over 1 year and 1 month and $5,000 or multiples thereof for issues with an original maturity of under 1 year and 1 month.

§ 615.5453 Liability.

Each bank of the Farm Credit System is primarily liable for the portion of any issue of consolidated or Systemwide obligations made on its behalf and is jointly and severally liable for the payment of any additional sums as called upon by the Farm Credit Administration in order to make payments of interest or principal which any bank primarily liable therefor shall be unable to make. Such calls shall be made first upon the other banks operating under the same title of the Farm Credit Act of 1971 as the defaulting bank, and second upon banks operating under other titles of the Act, taking into consideration the capital, surplus, bonds, debentures, or other obligations which each may have outstanding at the time of such assessment.

§ 615.5460 Definition of terms for book-entry issuance of Farm Credit securities.

In this subpart, unless the context otherwise requires or indicates:

(a) "Reserve Bank" means a Federal Reserve Bank and its branches acting as agent for the banks of the Farm Credit System and, where indicated, acting in its individual capacity.

(b) "Banks of the Farm Credit System" means the 12 Federal land banks, the 12 Federal intermediate credit banks, the 13 banks for cooperatives, or all of them.

(c) "Farm Credit securities" means consolidated note, bonds, debentures, or other similar obligations of the 12 Federal land banks, the 12 Federal intermediate credit banks, or the 13 banks for cooperatives, and Systemwide notes, bonds, debentures, or similar obligations of the 37 banks of the Farm Credit System, issued under the Farm Credit Act of 1971, or laws repealed thereby, the completion and delivery of which is or has been undertaken by a Reserve Bank as agent of the banks of the Farm Credit System.

(d) "Definitive Farm Credit security" means a Farm Credit security issued in engraved or printed form by the Federal Reserve Bank of New York as agent of the banks of the Farm Credit System.

(e) "Book-entry Farm Credit security" means a Farm Credit security issued in the form of an entry made as prescribed in this subpart on the records of a Reserve Bank.

(f) "Convertible" means a definitive Farm Credit security convertible into a book-entry Farm Credit security or vice versa.

(g) "Pledge" includes a pledge of, or any other security interest in, Farm Credit securities as collateral for loans or advances or to secure deposits of public monies or the performance of an obligation.

(h) "Member bank" means any national bank, or State bank, or other bank or trust company which is a member of a Reserve Bank.

(i) "CUSIP number" is a unique identification for each security issue established by the Committee on Uniform Security Identification Procedures.

§ 615.5465 Authority of Reserve Banks.

Each Reserve Bank is hereby authorized in accordance with the provisions of this subpart to:

(a) Issue book-entry Farm Credit securities by means of entries on its records, which shall include the name of the bank's depositor, the latter's employer identification number, where appropriate, and the amount, maturity date and CUSIP number of each loan.

(b) Effect conversions between book-entry Farm Credit securities and definitive Farm Credit securities, if convertible.

(c) Otherwise service and maintain book-entry Farm Credit securities.

(d) Issue a confirmation of transaction in the form of an advice (serially numbered or otherwise), which specifies the amount, maturity date, and CUSIP number of the loan as well as the date of the transaction.

§ 615.5470 Scope and effect of book-entry procedure.

(a) A Reserve Bank as agent for the banks of the Farm Credit System may apply the book-entry procedure provided for in this subpart to any Farm Credit securities which may be issued either in book-entry or definitive form, which have been or are hereafter deposited for any purpose, or maintain Farm Credit securities which may only be issued in book-entry form, in accounts with it in its individual capacity under terms and conditions which indicate that the Reserve Bank will continue to maintain such deposit accounts in its individual capacity notwithstanding application of the book-entry procedure to such securities. This paragraph shall be applicable but not limited to Farm Credit securities deposited or maintained:

(1) As collateral pledged to a Reserve Bank (in its individual capacity) for advances by it.

(2) For a member for its sole account.

(3) For a member bank held for the account of its customers.

(4) In connection with deposits in a member bank of funds of States, municipalities, or other political subdivisions.

(5) In connection with the performance of an obligation or duty under Federal, State, municipal, or local law, or judgments or decrees of courts.

The application of the book-entry procedure or the maintenance of book-entry Farm Credit securities under this paragraph shall not derogate from or adversely affect the relationships that would otherwise exist between a Reserve Bank in its individual capacity and the entities for which accounts are maintained. Whenever the book-entry procedure is applied to such Farm Credit securities, the Reserve Bank is authorized to take all action necessary in respect of the book-entry procedure to enable such Reserve Bank in its individual capacity to perform its obligations as depository with respect to such Farm Credit securities.

(b) A Reserve Bank as agent of the banks of the Farm Credit System shall apply the book-entry procedure to Farm Credit securities deposited as collateral pledged to the United States under Treasury Department Circulars Nos. 92 and 176; both as revised and amended, and may apply the book-entry procedure, with the approval of the Secretary of the Treasury, to any other Farm Credit securities deposited with a Reserve Bank as Fiscal Agent of the United States.

(c) Any person having an interest in Farm Credit securities which are deposited with a Reserve Bank (in either its individual capacity or as agent of the banks of the Farm Credit System) for any purpose shall be deemed to have consented to their conversion to book-entry Farm Credit securities pursuant to the provisions of this subpart and in the manner and under procedures prescribed by the Reserve Bank.

(d) No deposit shall be accepted under this section on or after the date of maturity or call of the Farm Credit securities.

§ 615.5475 Transfer or pledge.

(a) *Reserve Bank records.* A transfer or a pledge of book-entry Farm Credit securities to a Reserve Bank, or to any transferee or pledgee eligible to maintain an appropriate book-entry account in its name with a Reserve Bank under this subpart, is effected and perfected, notwithstanding any provision of law to the contrary, by a Reserve Bank making an appropriate entry in its records of the Farm Credit securities transferred or pledged. The making of such an entry in the records of a Reserve Bank shall:

(1) Have the same effect as the delivery of Farm Credit securities in bearer definitive form;

(2) Have the effect of a taking of delivery by the transferee or pledgee;

(3) Constitute the transferee or pledgee a holder;

(4) If a pledge, effect a perfected security interest therein in favor of the pledgee. A transfer or pledge of book-entry Farm Credit securities effected under this paragraph shall have priority over any transfer, pledge, or other interest, theretofore or thereafter effected or perfected under paragraph (b) of this section or in any other manner.

(b) *Member banks and others.* A transfer or a pledge of book-entry Farm Credit securities, or any interest therein, maintained by a Reserve Bank (in its individual capacity or as agent of the Farm Credit banks) in a book-entry account under this subpart, including Farm Credit securities in book-entry form under § 615.5470(a)(3), is effected, and a pledge is perfected, by any means that would be effective under applicable law to effect a transfer or to effect and perfect a pledge of Farm Credit securities, or any interest therein, if the securities were maintained by the Reserve Bank in bearer definitive form. For purposes of transfer or pledge hereunder, book-entry Farm Credit securities maintained by a Reserve Bank shall, notwithstanding any provision of law to the contrary, be deemed to be maintained in bearer definitive form. A Reserve Bank maintaining book-entry Farm Credit securities, either in its individual capacity or as agent of the Farm Credit banks, is not a bailee for purposes of notification of pledges of those securities under this paragraph, or a third person in possession for purposes of acknowledgment of transfers thereof under this paragraph. Where Farm Credit securities are recorded on the books of an entity for account of the pledgor or transferor thereof and such securities are on deposit or are maintained with a Reserve Bank in a book-entry account hereunder, such entity shall, for purposes of perfecting a pledge of such securities or effecting their delivery to a purchaser under applicable provisions of law, be the bailee to which notification of the pledge of the securities may be given or the third person in possession from which acknowledgment of the holding of the securities for the purchaser may be obtained. A Reserve Bank will not accept notice or advice of a transfer or pledge effected or perfected under this paragraph, and

V 42 169 AUG 31 77 UMI

any such notice or advice shall have no effect. A Reserve Bank may continue to deal with its depositors in accordance with the provisions of this subpart, notwithstanding any transfer or pledge effected or perfected under this paragraph.

(c) *Filing and recording unnecessary.* No filing or recording with a public recording office or officer shall be necessary or effective with respect to any transfer or pledge of book-entry Farm Credit securities or any interest therein.

(d) *Conversion.* A Reserve Bank shall, upon receipt of appropriate instructions, convert book-entry Farm Credit securities into definitive Farm Credit securities, if convertible, and deliver them in accordance with such instructions. No such conversion shall affect existing interests in such Farm Credit securities.

(e) *Transfer by Reserve Banks.* A transfer of book-entry Farm Credit securities within a Reserve Bank shall be made in accordance with the procedure established by the Bank not inconsistent with this subpart. The transfer of book-entry Farm Credit securities by a Federal Reserve Bank may be made through a telegraphic transfer procedure.

(f) *Timeliness of requests.* All requests for transfer, withdrawal or any authorized transaction, must be received prior to the maturity or date of call of the security.

§ 615.5480 Withdrawal of Farm Credit securities.

(a) A depositor of book-entry Farm Credit securities may withdraw them, if convertible, from a Reserve Bank by requesting delivery of like definitive Farm Credit securities to itself or on its order to a transferee.

(b) Farm Credit securities which can be delivered upon withdrawal will be issued in bearer form only.

§ 615.5485 Delivery of Farm Credit securities.

A Reserve Bank which has received Farm Credit securities and effected pledges, made entries regarding them, or transferred or delivered them according to the instructions of its depositor is not liable for conversion or for participation in breach of fiduciary duty even though the depositor had no right to dispose of or take over action in respect of the securities. A Reserve Bank shall be fully discharged of its obligations under this subpart by the transfer or delivery of Farm Credit securities in book-entry or definitive form to its depositor or upon the order of such depositor. Customers of a member bank or other entity (other than a Reserve Bank) may obtain Farm Credit securities in definitive form if convertible only by causing the depositor of the Reserve Bank to order the withdrawal thereof from the Reserve Bank.

§ 615.5490 Classes of accounts.

Reserve Banks are authorized to maintain book-entry Farm Credit securities for member banks for securities the member banks hold for their own account, or hold for the account of their customers, and as otherwise specified in § 615.5470. Purchasers of book-entry Farm Credit securities, on original issue or otherwise, may have such securities maintained at member banks, or in accounts maintained at entities providing securities safekeeping services for customers (e.g., nonmember banks or thrift institutions, or securities dealers) which have related accounts at member banks.

§ 615.5492 Identification of accounts.

Book-entry accounts may be established in such form or forms as customarily permitted by the entity (e.g., member bank, or other banking or thrift institution, or a securities dealer) maintaining them, except that each account should include data to permit both customer identification by name, address and taxpayer identifying number, as well as a determination of the Farm Credit securities being held in such account by amount, maturity date and CUSIP number, and of transactions relating thereto.

§ 615.5494 Servicing book-entry Farm Credit securities: Payment of interest, payment at maturity or upon call.

(a) Interest becoming due on book-entry Farm Credit securities shall be charged to the appropriate Farm Credit bank account at the Federal Reserve Bank of New York on the interest-due date and remitted or credited in accordance with the instructions from the member bank or other Reserve Bank depositor for whose account the securities shall have been maintained.

(b) Book-entry Farm Credit securities shall be redeemed and charged to the appropriate Farm Credit bank account at the Federal Reserve Bank of New York and the redemption proceeds, principal, and interest shall be disposed of in accordance with the instructions from the member bank or other Reserve Bank depositor for whose account the securities shall have been maintained.

§ 615.5495 Lost, stolen, destroyed, mutilated or defaced Farm Credit securities, including coupons.

(a) *Basis of relief.* The statutes of the United States, now or hereafter in force, and the regulations of the Treasury Department, now or hereafter in force, governing relief on account of the loss, theft, destruction, mutilation or defacement of U.S. securities, and the regulation of the Treasury Department, now or hereafter in force, governing the payment of mutilated or defaced coupons of U.S. securities, insofar as such statutes and regulations may be applicable, and as modified to relate to the consolidated or Systemwide obligations of the Farm Credit banks and coupons of such obligations shall govern the granting of relief on account of lost, stolen, destroyed, mutilated or defaced consolidated or Systemwide obligations of the Farm Credit banks and mutilated or defaced coupons of such obligations.

(b) *Claims and proof of loss.* Claims shall be presented to the Claims Branch of the Division of Securities Operations, Bureau of the Public Debt, Washington, D.C. 20226, and proof shall be made to the Bureau of Public Debt, by applicants for relief on account of the loss, theft, destruction, mutilation or defacement of consolidated or Systemwide obligations of the Farm Credit banks and the mutilation or defacement of coupons of such obligations, in accordance with the statutes of the United States, now or hereafter in force, and the regulations of the Treasury Department, now or hereafter in force, with respect to securities of the United States, and coupons of such securities.

§ 615.5496 Restrictive endorsement of bearer securities.

When consolidated and Systemwide obligations of the Farm Credit banks are being presented to Reserve Banks, for redemption, exchange, or conversion to book entry, such obligations may be restrictively endorsed. The restrictive endorsement shall be placed thereon in substantially the same manner and with the same effects as prescribed in United States Treasury Department regulations, now or hereafter in force, governing like transactions in United States bonds; and consolidated or Systemwide obligations of the Farm Credit banks so endorsed shall be prepared for shipment and shippe din the manner prescribed in such regulations for United States bonds. (See 31 CFR 328.1–328.6)

§ 615.5497 Loss from payment of spurious consolidated bonds.

Each of the 12 Federal intermediate credit banks agreed, by resolution adopted by its board of directors, to share in any loss resulting from the payment of counterfeit, forged, or unauthorized consolidated obligations. The agreement provides that such loss shall be shared by the 12 Federal intermediate credit banks in the same ratio as their respective participations in such obligations issued during the 12 months preceding the date of payment of such counterfeit, forged, or unauthorized obligations.

§ 615.5498 Farm Credit securities as illustrations.

Illustrations of Farm Credit securities may appear in information and educational materials if printed in black and white, but not in color, and must be less than ¾ actual size or more than 1½ times the actual size of the original security. Motion picture and microfilms and slides of such securities are permitted in black and white or color for projection on a screen or for use in telecasting.

(Secs. 5.9, 5.12, 5.18, 85 Stat. 619, 620, 621.)

DONALD E. WILKINSON,
Governor,
Farm Credit Administration.

Title 14—Aeronautics and Space

CHAPTER II—CIVIL AERONAUTICS BOARD

SUBCHAPTER A—ECONOMIC REGULATIONS

[Reg. ER–1015, Amdt. 11]

[Docket No. 29806; Reg. ER–1015, Amdt. 11]

PART 207—CHARTER TRIPS AND SPECIAL SERVICES

Minimum Seat Size for Split Charters

AGENCY: Civil Aeronautics Board.

ACTION: Final Rule.

SUMMARY: This final rule reduces to 20 seats the minimum size for split charters transported on aircraft with 80 or fewer seats, when there are no more than two charter contracts for the entire capacity of the aircraft. The amendment changes all split charter rules to conform with that adopted for the Advance Booking Charter (ABC), and is at the initiative of the Board.

DATES: Effective: September 30, 1977. Adopted: August 25, 1977.

FOR FURTHER INFORMATION CONTACT:

Simon J. Eilenberg, Office of the General Counsel, Civil Aeronautics Board, 1825 Connecticut Avenue, NW., Washington, D.C. 20428 (202–673–5442).

SUPPLEMENTARY INFORMATION: With the exception of the ABC rules contained in Part 371 of the Special Regulations, the Board's charter rules, as set forth in Parts 207, 208, 212, and 214 of the Economic Regulations, and in Part 372a, 373, 378, and 378a of the Special Regulations, require that on a split charter flight, each charter group be of a minimum size of 40 seats, regardless of the capacity of the aircraft. On September 1, 1976, the Board adopted SPR–110 which established the ABC rules, and provided that in small aircraft having fewer than 80 seats, where the aircraft is utilized by no more than two ABC groups, one of those groups may have as few as 20 seats. This exception for small aircraft was at the suggestion of the local service carriers.

The Board then issued Notice of Proposed Rulemaking, EDR–304/SPDR–49, dated September 21, 1976, stating its tentative conclusion that a similar exception should be provided for all types of split charters which utilize small aircraft. Comments in general support of the proposed rule were received from the Civil Aeronautics Board's Office of the Consumer Advocate (OCA), and Texas International Airlines (TXI). Comments in general opposition were filed by Trans World Airlines (TWA), on the grounds that the proposed rule goes too far, and by Trans International Airlines (TIA) and World Airways (World), on the ground that the proposed rule does not go far enough.

Upon consideration, the Board has decided to adopt the rule as proposed, with several modifications discussed below. The tentative findings and conclusions set forth in EDR–304/SPDR–49 are incorporated and made final, except as modified. All requests contained in the comments are denied unless specifically granted.

Since the origin of the Board's charter rules, domestic charter travel has been limited primarily to the long-haul, large vacation markets. It has simply been uneconomic for the charter operators to arrange charters from small cities or to lesser-known vacation areas. Small tour operators have also found it difficult to arrange tours of smaller groups, with accommodations at the smaller hotels. One of the reasons for these problems is the 40 seat minimum for split charters imposed by the charter regulations. This minimum has also given the domestic trunk and supplemental air carriers somewhat of a marketing advantage over the local service carriers, which use smaller aircraft, in competing for charter transportation.

By reducing the minimum group size for split charters, the rule would encourage the local service carriers to participate more actively in charter flights and would allow the small tour operators, in combination with these carriers, to develop new markets and tours and offer them to a wider range of travelers. This expansion of charter service availability to the traveling public is consistent with the Board's continuing efforts to encourage low-cost air transportation.

In its comments, TWA opposes the amendment, stating that the smaller a charter group becomes, the easier it is to satisfy the individual travel requirements of each of its members, and thus, in turn, to increase the attractiveness and diversion potential of charter service. However, considering the small size of the aircraft involved, and that all other restrictions on the charters remain in effect, the Board agrees with OCA that this amendment is unlikely to cause undue diversion from scheduled service, or to impair the distinction between charter and individually-ticketed service.

Two supplemental carriers, TIA and World, filed a joint comment that opposes changing the minimum size of the charter groups unless the amendment is extended to include all aircraft, and not just the small aircraft operated by the local service carriers. They argue that this change would give the local service carriers a competitive advantage over carriers such as TIA and World, which operate only the larger aircraft. Alternatively, these supplemental carriers contend that the proposed rule should be modified so as to permit at least one group of 20 passengers on any "split" charter flight, regardless of aircraft size. Such a change, they argue, would give all carriers needed additional flexibility in the charter market, and would permit maximum use of all aircraft. We have determined to reject these supplemental carriers' arguments, since they raise issues far beyond the narrow scope of this proceeding, in which we are considering only the issue of conforming all split charter rules to the special exception that the ABC rule already provides for small aircraft.[1]

TXI has proposed a modification which would specifically designate the DC 9–10 as a small aircraft for the purpose of this rule, regardless of its seating capacity. With 80 seats as the cut-off point, TXI contends that the rule, as worded, precludes the operation of the reduced "split" charter group on some aircraft which the exception is intended to cover. TXI states that the rule is intended to apply to small jet aircraft operated by the local service carriers, such as the BAC–111 and the DC 9–10, which are generally configured for 75 seats, but that since TXI also provides scheduled service and has modified its small aircraft by adding an extra row of seats, its small aircraft achieve a capacity of 80 seats and would thus be unable to benefit from the new rule that literally applies only to aircraft having "less than" 80 seats. The Board has accepted the suggestion of TXI, and has modified the rule to state specifically that its benefits will apply to aircraft having "80 seats or fewer."

For consistency, the Board is amending the ABC rule concerning "split" charters on small aircraft to read "80 or fewer" seats; and it is also making clarifying changes to the text of Parts 372a, 373, 378, and 378a, so as to follow the exact text of the Part 371 provision, unambiguously stating that only one group of 20 seats is allowed under the exception for small aircraft.

Finally, we have determined that this special split charter rule for small aircraft should not be restricted by a novel prohibition against combining different types of charters on the same aircraft. Since there was no opposition in the comments to deleting this restriction from the proposed rules, we are deleting it also from Part 371.

Accordingly, 14 CFR Part 207 is amended as follows:

Revise the proviso at the end of paragraph (c) of § 207.11 to read as follows:

§ 207.11 Charter flight limitations.

* * * * * *

(c) * * *

Provided, That with respect to paragraph (c) of this section each person engaging less than the entire capacity of an aircraft shall contract and pay for 40 or more seats, except that, if the entire capacity of an aircraft having 80 or fewer seats is engaged by no more than two persons described in paragraph (c), then either one of such persons may contract and pay for a minimum of 20 seats: *And provided further,* That paragraph (c) shall not be construed to apply to movements of property.

[1] By EDR–329/SPDR–59, dated July 21, 1977, the Board issued an Advance Notice of Proposed Rulemaking in Docket 30766 to reexamine its requirements for the minimum group size for all types of charter flights, and that proceeding will encompass such issues as those raised by the TIA/World proposals.

V 42 169 AUG 31 77 UMI

(Secs. 101, 204, 401, 416, Federal Aviation Act of 1958, as amended, 72 Stat. 737, 743, 754, 771; (49 U.S.C. 1301, 1324, 1371, 13860)).

By the Civil Aeronautics Board.

PHYLLIS T. KAYLOR,
Secretary.

[Docket No. 29806; Reg. ER-1016, Amdt. 11]

PART 208—TERMS, CONDITIONS AND LIMITATIONS OF CERTIFICATES TO ENGAGE IN SUPPLEMENTAL AIR TRANSPORTATION

Minimum Seat Size for Solit Charters

AGENCY: Civil Aeronautics Board.

ACTION: Final Rule.

SUMMARY: This final rule reduces to 20 seats the minimum size for split charters transported on aircraft with 80 or fewer seats unless there are no more than two charter contracts for the entire capacity of the aircraft. The amendment changes all split charter rules to conform with that adopted for the Advance Booking Charter (ABC), and is at the initiative of the Board. Supplementary information concerning this amendment is given in the preamble to ER-1015, which is being issued simultaneously.

DATES: Effective: September 30, 1977. Adopted: August 25, 1977.

FOR FURTHER INFORMATION CONTACT:

Simon J. Eilenberg, Office of the General Counsel, Civil Aeronautics Board, 1825 Connecticut Avenue NW., Washington, D.C. 20428 (202-673-5442).

Accordingly, 14 CFR Part 208 is amended as follows:

Revise the proviso at the end of paragraph (c) of § 208.6 to read as follows:

§ 208.6 Charter flight limitations.

* * * * * * *

(c) * * *

Provided, That with respect to paragraph (c) of this section each person engaging less than the entire capacity of an aircraft shall contract and pay for 40 or more seats, except that, if the entire capacity of an aircraft having 80 or fewer seats is engaged by no more than two persons described in paragraph (c), then either one of such persons may contract and pay for a minimum of 20 seats: *And provided further*, That paragraph (c) shall not be construed to apply to movements of property.

(Secs. 101, 204, 401, 416, Federal Aviation Act of 1958, as amended, 72 Stat. 737, 743, 754, 771; (49 U.S.C. 1301, 1324, 1371, 1386).)

By the Civil Aeronautics Board.

PHYLLIS T. KAYLOR,
Secretary.

[Docket No. 29806; Reg. ER-1017, Amdt. 21]

PART 212—CHARTER TRIPS BY FOREIGN AIR CARRIERS

Minimum Seat Size for Split Charters

AGENCY: Civil Aeronautics Board.

ACTION: Final rule.

SUMMARY: This final rule reduces to 20 seats the minimum size for split charters transported on aircraft with 80 or fewer seats when there are no more than two charter contracts for the entire capacity of the aircraft. The amendment changes all split charter rules to conform with that adopted for the Advance Booknig Charter (ABC), and is at the initiative of the Board. Supplementary information concerning this amendment is given in the preamble to ER-1015, which is being issued simultaneously.

DATES: Effective: September 30, 1977. Adopted: August 25. 1977.

FOR FURTHER INFORMATION CONTACT:

Simon J. Eilenberg, Office of the General Counsel, Civil Aeronautics Board, 1825 Connecticut Avenue NW., Washington, D.C. 20428 (202-673-5442).

Accordingly, 14 CFR Part 212 is amended as follows:

Revise the proviso at the end of paragraph (b) of § 212 8 to read as follows:

§ 212.8 Charter flight limitations.

* * * * * * *

(b) * * *

Provided, That with respect to paragraph (b) of this section each person engaging less than the entire capacity of an aircraft shall contract and pay for 40 or more seats, except that, if the entire capacity of an aircraft having 80 or fewer seats is engaged by no more than two persons described in paragraph (b), then either one of such persons may contract and pay for a minimum of 20 seats: *And provided further*, That paragraph (b) shall not be construed to apply to movements of property.

(Secs. 101, 204, 402, 416, Federal Aviation Act of 1958, as amended, 72 Stat. 737, 743, 757, 771; (49 U.S.C. 1301, 1324, 1372, 1386).)

PART 214—TERMS, CONDITIONS AND LIMITATIONS OF FOREIGN AIR CARRIER PERMITS AUTHORIZING CHARTER TRANSPORTATION ONLY

Amendment of Minimum Seat Size for Split Charters

AGENCY: Civil Aeronautics Board.

ACTION: Final Rule.

SUMMARY: This final rule reduces to 20 seats the minimum size for split charters transported on aircraft with 80 or fewer seats when there are no more than two charter contracts for the entire capacity of the aircraft. The amendment changes all split charter rules to conform with that adopted for the Advance Booking Charter (ABC), and is at the initiative of the Board. Supplementary information concerning this amendment is given in the preamble to ER-1015, which is being issued simultaneously.

DATES: Effective: September 30, 1977. Adopted: August 25, 1977.

FOR FURTHER INFORMATION CONTACT:

Simon J. Eilenberg, Office of the General Counsel, Civil Aeronautics Board, 1825 Connecticut Avenue NW., Washington, D.C. 20428 (202-673-5442).

Accordingly, 14 CFR Part 214 is amended as follows:

Revise the proviso at the end of paragraph (b) of § 214.7 to read as follows:

§ 214.7 Charter flight limitations.

* * * * * * *

(b) * * *

Provided, That paragraph (b) of this section shall not apply with respect to any foreign air carrier to the extent that its permit authorizes it to engage in "planeload" charter foreign air transportation of persons: *Provided, however*, That with respect to paragraph (b) of this section each person engaging less than the entire capacity of an aircraft shall contract and pay for 40 or more seats, except that, if the entire capacity of an aircraft having 80 or fewer seats is engaged by no more than two persons described in paragraph (b), then either one of such persons may contract and pay for a minimum of 20 seats.

(Secs. 101, 204, 402, 416, Federal Aviation Act of 1958, as amended, 72 Stat. 737, 743, 757, 771; (49 U.S.C. 1301, 1324, 1372, 1386).)

PART 221—CONSTRUCTION, PUBLICATION FILING AND POSTING OF TARIFFS OF AIR CARRIERS AND FOREIGN AIR CARRIERS

Emergency Conditions; Transportation of Disabled Persons Needing Assistance

AGENCY: Civil Aeronautics Board.

ACTION: Final rule.

SUMMARY: This rule requires all U.S. certificated air carriers to include in their tariffs all rules and regulations relating to the transportation of disabled persons who may need assistance in evacuating an aircraft under emergency conditions. These carrier rules and regulations are to conform to those recently adopted by the Federal Aviation Administration.

DATES: Effective: September 30, 1977. Adopted: August 25, 1977.

FOR FURTHER INFORMATION CONTACT:

Daniel D. Campbell, Rates and Agreements Division, Civil Aeronautics Board, 1825 Connecticut Avenue NW., Washington, D.C. 20428 (202-673-5437).

SUPPLEMENTARY INFORMATION: Section 1111 of the Federal Aviation Act of 1958 (14 U.S.C. 1511) provides as follows:

> Subject to reasonable rules and regulations prescribed by the Administrator, any such carrier may also refuse transportation of a passenger or property when, in the opinion of the carrier, such transportation would or might be inimical to safety of flight.

In the absence of Federal Aviation Regulations providing safety standards relating to the transportation of physically handicapped persons, certificated air carriers have had in effect for a number of years a tariff rule under which they may refuse to accept for transportation any person whose physical condition is such as to render him incapable of caring for himself without assistance, unless the person is accompanied by an attendant for the duration of the flight.[1] In addition, the Board has approved, pursuant to section 412 of the Act, an intercarrier agreement which provides certain criteria for the interline transportation of physically handicapped persons.[2]

Due to concern about the availability of adequate air carriage for handicapped persons in the United States, the Civil Aeronautics Board on October 14, 1971, issued an Advance Notice of Proposed Rulemaking (EDR-215/PSDR-33) to notify the public of the Board's consideration of rulemaking action to amend its Economic Regulations (14 CFR Part 221) and Policy Statements (14 CFR Part 399) to provide for terms and conditions governing the carriage by air of physically handicapped persons. Subsequent to the issuance of our advance notice, the CAB referred the matter to the Department of Transportation and the Federal Aviation Administration (FAA) for a determination by the Secretary and the Federal Aviation Administrator as to the need for safety rules (under section 1111) concerning the carriage of disabled persons. The Federal Aviation Administration undertook, by its own rulemaking, to answer the questions thus posed. (See Notice 73-16, 38 FR 14747, June 5, 1973; Notice 74-25, 39 FR 24667, July 2, 1974.) Thereafter, on August 9, 1974, the Board issued a Notice of Proposed Rulemaking (EDR-215A) which proposed the adoption of a regulation that would require that all tariffs applicable to the transportation of physically handicapped persons be in conformance with the forthcoming regulations of the Secretary of Transportation, and which further proposed to prohibit the filing of tariff rules that would permit a carrier to refuse transportation to a handicapped person other than under circumstances governed by the FAA regulations.

Comments directed to the Board's August 9, 1974, notice have been received from a number of individuals and from the groups, organizations and agencies listed below.[3] Many of these comments were directed to safety issues, were reflective of the then outstanding FAA proposal (Notice 74-25, supra), and reiterated complaints or points of view made to that agency. The rules now adopted by the FAA (see below) are substantially different from those of the original proposal and many of the comments thus appear to have had an indirect impact on the outcome of that proceeding. The substance of the remaining comments which were not addressed to safety issues (generally dealing with free and reduced rate transportation for attendants and the Board's responsibility under section 1002 of the Act) are addressed below.[4]

On March 25, 1977, the Federal Aviation Administration issued its final rules (effective May 16, 1977) regarding the carriage of handicapped persons. (42 FR 18392, April 7, 1977.) The regulations adopted by the FAA provide that a passenger may not be refused transportation on the basis that his transportation would or might be inimical to safety of flight unless the air carrier has established procedures (including reasonable notice requirements) for the carriage of passengers who may need the assistance of another person to move expeditiously to an exit in the event of an emergency. Moreover, if the air carrier has these procedures, it may not refuse to carry the passenger unless: (1) The passenger fails to comply with the notice requirements in the air carrier's procedures; or (2) the passenger cannot be carried in accordance with the established procedures. A copy of the procedures must be provided to the FAA district office charged with overall inspection of the certificate holder's operation. The regulation further provides that whenever the Administrator finds that revisions in any air carrier's procedures are necessary in the interest of safety or in the public interest, the air carrier can be required, after notification by the Administrator, to make any changes that are found necessary.

With the adoption of the FAA rules outlined above, it is now appropriate to take action on the Board's August, 1974, Notice of Proposed Rulemaking.[5] After consideration of the comments filed in response to that proposal, and in view of the comprehensive nature of the FAA rules, we believe the appropriate action is to finalize our rule essentially as proposed. Thus, 15 days after the effective date of this rule, all certificated air carriers shall be required to file in their tariffs those rules and regulations required by the Federal Aviation Administration relating to carriage of persons who may need assistance to evacuate an aircraft during an emergency.[6]

There are several matters regarding the finalization of this proposal that require some comment. The most important of these matters is to set out our understanding of the manner in which the resulting arrangement between the Federal Aviation Administration and this agency will operate. Under the FAA rules, the carriers have a duty to provide the FAA with proposed rules and practices, and these rules will be reviewed by that agency to determine their consistency with "the interest of safety * * * (and) * * * the public interest * * *" Thus, the rules and practices which will ultimately become tariff rules under the primary jurisdiction of this agency, will have been first reviewed for safety and fairness by the Federal Aviation Administration. This is an obvious but impor-

---

[1] Airline Tariff Publishers, Inc., Agent, Rules Tariff, PR-6, C.A.B. 142, Rule 15(a)(2).

[2] Agreement C.A.B. 16614, approved by Order E-19154, December 31, 1962.

[3] Air Medic; Members of the Air Transport Association; the Council of State Administrators of Vocational Rehabilitation; the Departments of Transportation of the States of California and New Jersey; Flying Wheel Tours; Handi-Action, Minnesota; the National Center for Law and the Handicapped, Inc.; the National Federation of the Blind of California; the National Paraplegia Foundation; and the President's Committee on Employment of the Handicapped.

[4] It is appropriate, however, to respond to one individual comment at this point. The rule proposed in EDR-215A contains a negative statement prohibiting rules that would permit refusal to transport handicapped persons on any grounds related to their handicap other than those contained in the rules adopted by the FAA. One comment requested that this phrasing be remolded so as to become an affirmative statement of a carrier's obligation to provide carriage and make necessary arrangements. While we believe that the rule as stated is the appropriate method of directing the content of tariff rules and their application, we agree with the substance of the comment. As we have said before, the basic obligation of an air carrier under section 404 is to provide transportation upon reasonable request, and the fact that a passenger is handicapped or disabled in some fashion does not make his or her request unreasonable.

[5] We note that the Secretary of Health, Education, and Welfare has recently adopted final rules (42 FR 22676 *et seq.*, May 4, 1977) implementing section 504 of the Rehabilitation Act of 1973, 29 U.S.C. 794, and will soon be promulgating model rules for the guidance of other Federal agencies, as provided by Executive Order 11914, 41 FR 17871 (1976). While the Board has determined not to postpone action in this proceeding until the HEW model rules have been received and evaluated, those carriers receiving Federal financial assistance from the Board should be aware that additional regulations implementing section 504 may be proposed in the near future.

[6] The 45 day period for filing that is granted will pose no burden on carriers and, as these rules are presumptively in effect now, the travelling public will not be harmed. We also request that all initial tariffs containing these rules be marked for effectiveness 45 days after filing in order to provide sufficient time for a complete analysis of industry practices.

V 42 169 AUG 31 77 UMI

tant point. The Civil Aeronautics Board does not have the staff nor the experience to judge the requirements of aircraft safety. Consequently, we are concerned that any such rules which are permitted to become tariff material (and thus to define the contract of carriage between passenger and airline) are reviewed by the appropriate authority. However, since the procedure adopted by the Federal Aviation Administration provides for such a review (see 14 CFR 121.586(c)) we are confident that an adequate review mechanism has been established. Nonetheless, the duty of air carriers to provide air transportation on a nondiscriminatory basis is so fundamental that it should be made clear that we are not in any way relinquishing our responsibility to suspend and/or investigate any such rule where it can be demonstrated that the review by the FAA has not been taken or that the tariffs are otherwise in violation of the public interests standards of the Federal Aviation Act of 1958.

CAB Agreement 16614 also requires some comment. The agreement concerns certain rules and practices governing online and interline (two or more different carriers) travel by handicapped or disabled persons. The agreement has been adopted by nearly all U.S. air carriers and provides certain guidelines for the acceptance for air travel of physically handicapped persons. Under the present arrangement there are several criteria through which an originating air carrier makes a determination of whether a physically handicapped passenger should be permitted to fly. The agreement also provides that once a passenger is accepted by the originating carrier, all other carriers will accept the passenger at least to the point of first stopover.

While this agreement has apparently been of value to the carriers and the travelling public, it contains a number of provisions which must now be reconsidered in the light of the new FAA rules. Particularly, the criteria for acceptance or nonacceptance of passengers will need reconsideration and reformation so as to be made consistent with the rules that are accepted by the FAA and thereafter filed as tariffs with this Board. As we read Section 1111 of the Federal Aviation Act of 1958 and the FAA's rulemaking thereunder, no disabled or handicapped person can be denied transportation on the grounds of disability other than when done in accordance with rules that have been filed with and accepted by the FAA. At a minimum, Agreement 16614 will have to be amended to reflect this fact. However, it is not our intention to disapprove this agreement at this time. Certain of its features—especially the fact that it requires continued acceptance of an interline passenger who has commenced his or her journey—are obviously in the public interest and should be preserved. Thus, for the present we will simply recommend that the carrier parties to Agreement 16614 take whatever steps are necessary to conform that agreement to operations under the new FAA rules.[7]

A final matter that requires some comment is the issue of free or reduced-rate transportation for attendants accompanying handicapped or disabled persons. The Board stated its conviction at the outset of this proceeding that free or reduced-rate transportation for attendants could not be required since the Federal Aviation Act has been construed to prohibit rate discrimination aimed at broad social policies not included in the particularized objectives of the Act itself.[8] Most of the comments that have been addressed to this issue recognize that this construction of the Act has been firmly established by the judiciary and is not subject to serious challenge. Instead, several parties have attempted to demonstrate that reduced rates for the attendants of disabled passengers do, in fact, advance some specific public interest standard found in the Act.[9] We have recently had occasion to consider similar arguments in connection with proposals for Senior Citizen Standby Fares for travel in the State of Hawaii. As was the case in that proceeding, the arguments presented in this rulemaking reduce to the proposition that a particular need for less expensive transportation entitles some class to a discriminatory fare. The "Senior Citizens Standby Fares" case concluded that:

> It may well be socially desirable that seniors in Hawaii have an opportunity to travel to visit relatives, to obtain medical care, to celebrate religious customs, and for recreation. Clearly, however, Congress has given the Board no authority to consider such factors. In "Transcontinental", the Board argued that youth fares could be justified because youths are financially dependent, still in schools frequently great distances from home, and correspondingly in need of rapid transportation during long holiday periods. In response, the court stated, "The essential difficulty with this position is that it is predicated solely on the status of the traffic, and is unrelated to transportation." [10]

The same conclusion—that the status of traffic as especially deserving of a reduced rate will not justify the rate—is equally applicable to the carriage of handicapped or disabled persons and their attendants. Considerations of this type involve questions of social policy which need legislative rather than administrative solutions.

[7] Nothing herein should be interpreted to permit operations under the agreement where the provisions of the agreement conflict with a carrier's rules under FAR 121.

[8] Transcontinental Bus System, Inc. v. C.A.B. 383 F.2d 466 (5th Cir. 1967).

[9] See, especially, the comments of the National Center for Law and the Handicapped, Inc. The statutory standards governing airline rate regulation are contained in sections 102 and 1002 of the Federal Aviation Act, 49 U.S.C. 1302, 1482.

[10] Hawaiian Airlines, Inc., Senior Citizens Standby Fares, Order 76-9-147, September 28, 1976, at 7 (footnote omitted).

Accordingly, the Board hereby amends Part 221 of its Economic Regulations (14 CFR Part 221), effective September 30, 1977, as follows:

Amend paragraph (a) of § 221.38 by adding thereto a new subparagraph (8) to read as follows:

§ 221.38 Rules and Regulations.

(a) *Contents.* Except as otherwise provided in this part, the rules and regulations of each tariff shall contain:

* * * * *

(8) For certificated air carriers, the rules and regulations relating to the transportation of persons who may need assistance to evacuate the aircraft during an emergency. All such provisions shall be in conformity with Part 121 of the Federal Aviation Regulations (14 CFR Part 121), as amended or revised from time to time: *Provided*, That no provision of the Board's regulations issued under this part or elsewhere shall be construed to permit the filing of any tariff rules limiting or conditioning a carrier's obligation to proivde transportation and services in connection therewith upon reasonable request therefor to a person who may require assistance of another person in expeditiously moving to an emergency exit of the aircraft in the event of an evacuation, except as provided for in said Part 121.

(Secs. 204(a), 403, 404, 412, 1111, Federal Aviation Act of 1958, as amended, 72 Stat. 743, 758 (as amended) 760, 770, 75 Stat. 467 (49 U.S.C. 1324, 1373, 1374, 1382, 1511).)

By the Civil Aeronautics Board.

PHYLLIS T. KAYLOR,
Secretary.

SUBCHAPTER D—SPECIAL REGULATIONS

[Docket No. 29806; Reg. SPR-131, Amdt. 6]

PART 371—ADVANCE BOOKING CHARTERS

Minimum Seat Size for Split Charters

AGENCY: Civil Aeronautics Board.

ACTION: Final rule.

SUMMARY: This final rule is a technical amendment concerning split charters transported on small aircraft when there are no more than two charter contracts for the entire capacity of the aircraft. The amendment changes the definition of such small aircraft from an aircraft having "fewer than 80" seats to an aircraft with "80 or fewer" seats, and removes the prohibition against combining an ABC with another type of charter on the same aircraft. This change is initiated by the Board so that the ABC rule conforms with the other charter rules which are also being amended. Supplementary information concerning this amendment is given in the preamble to ER-1015, which is being issued simultaneously.

DATES: Effective: September 30, 1977. Adopted: August 25, 1977.

FOR FURTHER INFORMATION CONTACT:

Simon J. Ellenberg, Office of the General Counsel, Civil Aeronautics Board, 1825 Connecticut Avenue, NW., Washington, D.C. 20428 (202-673-5442).

Accordingly, 14 CFR Part 371 is amended as follows:

Amend § 371.10 by revising the proviso at the end of paragraph (b), so that the paragraph reads as follows.

§ 371.10 Advance booking charter general requirements.

* * * * *

(b) The charter contract must be for 40 or more seats: *Provided*, That where an aircraft having 80 or fewer seats is utilized for not more than two charter groups, the ABC charter contract may be for not less than 20 seats.

* * * * *

(Secs. 101, 204, 401, 402, 416, Federal Aviation Act of 1958, as amended, 72 Stat. 737, 743, 754, 757, 771 (49 U.S.C. 1301, 1324, 1371, 1372, 1386).)

By the Civil Aeronautics Board.

PHYLLIS T. KAYLOR,
Secretary.

[Docket No. 29806; Reg. SPR-132, Amdt. 17]

PART 372a—TRAVEL GROUP CHARTERS

Minimum Seat Size for Split Charters

AGENCY: Civil Aeronautics Board.

ACTION: Final rule.

SUMMARY: This final rule reduces to 20 seats the minimum size for split charters transported on aircraft with 80 or fewer seats when there are no more than two charter contracts for the entire capacity of the aircraft. The amendment changes all split charter rules to conform with that adopted for the Advance Booking Charter (ABC), and is at the initiative of the Board. Supplementary information concerning this amendment is given in the preamble to ER-1015, which is being issued simultaneously.

DATES: Effective: September 30, 1977. Adopted: August 25, 1977.

FOR FURTHER INFORMATION CONTACT:

Simon J. Ellenberg, Office of the General Counsel, Civil Aeronautics Board, 1825 Connecticut Avenue NW., Washington, D.C. 20428 (202-673-5442).

Accordingly, 14 CFR Part 372a is amended as follows:

Amend § 372a.10 by adding a proviso at the end of paragraph (b), so that the paragraph reads as follows:

§ 372a.10 Travel group charter general requirements.

* * * * *

(b) The charter contract must be for 40 or more seats: *Provided*, That where an aircraft having 80 or fewer seats is utilized for not more than two charter groups, the travel group charter contract may be for not less than 20 seats.

* * * * *

(Secs. 101, 204, 401, 402, 416, Federal Aviation Act of 1958, as amended, 72 Stat. 737, 743, 754, 757, 771; (49 U.S.C. 1301, 1324, 1371, 1372, 1386))

Minimum Seat Size for Split Charters

AGENCY: Civil Aeronautics Board.

ACTION: Final Rule.

SUMMARY: This final rule reduces to 20 seats the minimum size for split charters transported on aircraft with 80 or fewer seats when there are no more than two charter contracts for the entire capacity

V 42 169 AUG 31 77 A UMI

of the aircraft. The amendment changes all split charter rules to conform with that adopted for the Advance Booking Charter (ABC), and is at the initiative of the Board. Supplementary information concerning this amendment is given in the preamble to ER-1015, which is being issued simultaneously.

DATES: Effective: September 30, 1977. Adopted: August 25, 1977.

FOR FURTHER INFORMATION CONTACT:

Simon J. Ellenberg, Office of the General Counsel, Civil Aeronautics Board, 1825 Connecticut Avenue, NW., Washington, D.C.20428 (202-673-5442).

Accordingly, 14 CFR Part 378a is amended as follows:

Amend §378a.10 by adding a proviso to paragraph (b), so that the paragraph reads as follows:

§ 378a.10 One-stop-inclusive tour charter general requirements.

* * * * *

(b) The charter contract must be for 40 or more seats: *Provided*, That where an aircraft having 80 or fewer seats is utilized for not more than two charter groups, the charter contract may be for not less than 20 seats.

* * * * *

(Secs. 101, 204, 401, 402, 416, Federal Aviation Act of 1958, as amended, 72 Stat. 737, 743, 754, 757, 771; (49 U.S.C. 1301, 1324, 1371, 1372, 1386.)

By the Civil Aeronautics Board.

PHYLLIS T. KAYLOR,
Secretary.

Title 16—Commercial Practices

CHAPTER I—FEDERAL TRADE COMMISSION

[Docket No. C-2897]

PART 13—PROHIBITED TRADE PRACTICES, AND AFFIRMATIVE CORRECTIVE ACTIONS

Walgreen Co.

AGENCY: Federal Trade Commission.

ACTION: Order to cease and desist.

SUMMARY: In settlement of alleged violations of federal law prohibiting unfair acts and practices and unfair methods of competition, this consent order, among other things, requires a Deerfield, Ill., retail drug store chain, to cease disseminating advertisements that offer any item for sale, unless such item is available for sale at or below advertised price, in reasonably sufficient quantities to meet anticipated demands. Further, respondent is required to conspicuously post advertisements and disclosure statements at designated locations; maintain specified business records; and institute a surveillance program designed to ensure that its stores comply with the terms of the order.

DATES: Complaint and order issued August 3, 1977.[1]

FOR FURTHER INFORMATION CONTACT:

Stephanie W. Kanwit, Regional Director, Federal Trade Commission, Chicago Regional Office, 55 East Monroe St., Suite 1437, Chicago, Ill. 60603 (312-353-4423).

SUPPLEMENTARY INFORMATION: On Wednesday, May 25, 1977, there was published in the FEDERAL REGISTER 42 FR 26661 a proposed consent agreement with analysis In the Matter of Walgreen Co., a corporation, for the purpose of soliciting public comment. Interested parties were given sixty (60) days in which to submit comments, suggestions, or objections regarding the proposed form of order.

No comments having been received, the Commission has ordered the issuance of the complaint in the form contemplated by the agreement, made its jurisdictional findings and entered its order to cease and desist, as set forth in the proposed consent agreement, in disposition of this proceeding.

The prohibited trade practices and/or corrective actions, as codified under 16 C.F.R., are as follows:

Subpart—Advertising Falsely or Misleadingly: *§ 13.10 Advertising falsely or misleadingly; § 13.10-1 Availability of merchandise and/or facilities.*

(Sec. 6, 38 Stat. 721 (15 U.S.C. 46). Interprets or applies sec. 5, 38 Stat. 719, as amended (15 U.S.C. 45).)

JAMES A. TOBIN,
Acting Secretary.

[FR Doc.77-25318 Filed 8-30-77;8:45 am]

Title 24—Housing and Urban Development

CHAPTER X—FEDERAL INSURANCE ADMINISTRATION, DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

SUBCHAPTER B—NATIONAL FLOOD INSURANCE PROGRAM

[Docket No. FI 3321]

PART 1914—AREAS ELIGIBLE FOR THE SALE OF INSURANCE

Suspension of Community Eligibility

AGENCY: Federal Insurance Administration, HUD.

ACTION: Final rule.

SUMMARY: The purpose of this rule is to list communities wherein the sale of flood insurance as authorized under the National Flood Insurance Program (42 U.S.C. 4001-4128) will be suspended because of noncompliance with the program regulations (24 CFR Part 1909 et seq.).

DATES: The Federal Insurance Administrator finds that delayed effective dates would be contrary to the public interest. The Administrator also finds that notice and public procedure under 5 U.S.C. 553(b) are impracticable and unnecessary.

Section 1914.6 of Part 1914 of Subchapter B of Chapter X of Title 24 of the Code of Federal Regulations is amended by adding in alphabetical sequence new entries to the table. In each entry, a complete chronology of effective dates appears for each listed community. The last date that appears in the fourth column of the table is provided in order to designate the effective date of the suspension of the sale of flood insurance in the area under the emergency or the regular phase of the National Flood Insurance Program.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581 or Toll Free Line 800-424-8872, Room 5270, 451 Seventh Street, Southwest, Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Flood Disaster Protection Act of 1973 (Pub. L. 93-234) requires the purchase of flood insurance as a condition of receiving any form of Federal or Federally related financial assistance for acquisition or construction purposes in a flood plain area having special hazards within any community identified by the Secretary of Housing and Urban Development.

The requirement applies to all identified special flood hazard areas within the United States, and no such financial assistance can legally be provided for acquisition or construction in these areas unless the community has entered the program and insurance is purchased. Accordingly, for communities listed under this Part such restriction exists as of the effective date of suspension because insurance, which is required, cannot be purchased.

Section 1315 of the National Flood Insurance Act of 1968, as amended (42 U.S.C. 4022) prohibits flood insurance coverage unless an appropriate public body shall have adopted adequate flood plain management measures with effective enforcement measures. The communities suspended in this notice no longer meet that statutory requirement. Accordingly, the communities are suspended on the effective date in the list below:

The entry reads as follows:

§ 1914.6 List of eligible communities.

State	County	Location	Effective date of authorization of sale of flood insurance for area	Hazard area identified	Community No.
*	*	*	*	*	*
MN	Hennipin	St. Louis Park, city of	Dec. 22, 1972, emergency; June 15, 1977, regular; Sept. 1, 1977, suspended.	May 25, 1973	270184A
PA	Cameron	Grove, township of	March 4, 1974, emergency; July 18, 1977, regular; Sept. 1, 1977, suspended.	Nov. 8, 1974 July 9, 1976	421128B
Do.	Schuylkill	Pottsville, city of	June 28, 1973, emergency; July 5, 1977, regular; Sept. 1, 1977, suspended.	Aug. 2, 1974	420785B
Do.	Delaware	Radnor, township of	Feb. 25, 1972, emergency; Aug. 1, 1977, regular; Sept. 1, 1977, suspended.	Feb. 1, 1974 June 11, 1976	420428B

Title 27—Alcohol, Tobacco Products and Firearms

CHAPTER I—BUREAU OF ALCOHOL, TOBACCO AND FIREARMS, DEPARTMENT OF THE TREASURY

[T.D. ATF-45]

PART 178—COMMERCE IN FIREARMS AND AMMUNITION

Ammunition Recordkeeping Requirements; Correction

AGENCY: Bureau of Alcohol, Tobacco and Firearms.

ACTION: Correction notice to Treasury Decision ATF-45.

SUMMARY: This document corrects a final rule that appeared at page 41116, in the FEDERAL REGISTER of Monday, August 15, 1977 (FR Doc. 77-23507). That document revised ammunition recordkeeping requirements by exempting all Federal licensees from recording retail sales of certain types of ammunition.

EFFECTIVE DATE: August 15, 1977.

FOR FURTHER INFORMATION:

A. N. Stickney, Research and Regulations Branch, Regulations and Procedures Division (Regulatory Enforcement), Bureau of Alcohol, Tobacco and Firearms, Washington, D.C. 20226 (202-566-7626)

The following correction is made:

The title to the bound record format in paragraph (c) of § 178.125 on page 41117 which reads "DISPOSITION RECORD FOR PISTOLS, REVOLVERS, AND INTERCHANGEABLE AMMUNITION" is corrected to read "DISPOSITION RECORD OF INTERCHANGEABLE AMMUNITION AND HANDGUN AMMUNITION". The format, moreover, is set in type as set forth below.

Title 38—Pensions, Bonuses, and Veterans' Relief

CHAPTER I—VETERANS ADMINISTRATION

PART 3—ADJUDICATION

Subpart A—Pensions, Compensation, and Dependency and Indemnity Compensation

CHARACTER OF INCOME; EXCLUSIONS AND ESTATES

AGENCY: Veterans Administration.

ACTION: Final regulation.

SUMMARY: The Veterans Administration has determined to exclude proceeds of Veterans' Group Life Insurance from consideration as income in determinations of entitlement to Veterans Administration gratuitous benefits. The need for this change was brought to our attention by a VA regional office inquiry.

EFFECTIVE DATE: August 1, 1974, the date the Veterans' Group Life Insurance program became law (Pub. L. 93-289).

FOR FURTHER INFORMATION CONTACT:

Mr. T. H. Spindle, Jr., Chief, Regulations Staff, Compensation and Pension Service, Department of Veterans Benefits 202-389-3005.

SUPPLEMENTARY INFORMATION: On page 34528 of the FEDERAL REGISTER of July 6, 1977, there was published a notice of proposed regulatory development to amend § 3.261 to exclude proceeds of Veterans' Group Life Insurance from consideration as income in determinations of entitlement to Veterans Administration gratuitous benefits.

Interested persons were given 30 days in which to submit comments, suggestions, or objections regarding the proposed regulation. No written comments have been received and the proposed regulation is hereby adopted without change and is set forth below.

NOTE.—The Veterans Administration has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821 as amended by Executive Order 11949 and OMB Circular A-107.

Approved: August 23, 1977.

By direction of the Administrator:

RUFUS H. WILSON,
Deputy Administrator.

In § 3.261, paragraph (a) (20) is revised to read as follows:

§ 3.261 **Character of income; exclusions and estates.**

The following factors will be considered in determining whether a claimant meets the requirements of §§ 3.250, 3.251 and 3.252 with reference to dependency, income limitations and corpus of estate.

(a) Income:	Dependent only (parents)	Dependency and indemnity compensation (parents)	Pension; protected (veterans, widows, and children)	Pension; Public Law 86-211 (veterans, widows, and children)

PART 8a—VETERANS MORTGAGE LIFE INSURANCE

Lifetime Maximum Amount of Coverage

AGENCY: Veterans Administration.

ACTION: Final regulation.

SUMMARY: The Veterans Administration is amending its Veterans Mortgage Life Insurance regulations relating to the lifetime maximum amount of insurance coverage. The Veterans Administration also makes minor editorial changes in these regulations. The amendments are intended to make the regulations conform to the amendment to the law authorizing Veterans Mortgage Life Insurance. The editorial changes are intended to reflect the agency's policy of using precise terms for gender in its regulations.

EFFECTIVE DATE: August 24, 1977.

FOR FURTHER INFORMATION CONTACT:

Mr. Murray J. Zuckerman, Veterans Administration Center (290B), P. O. Box 8079, Philadelphia, Pa. 19101, 215-951-5733.

SUPPLEMENTARY INFORMATION: On page 30392 of the FEDERAL REGISTER of June 14, 1977, there was published a notice of proposed regulatory development to amend §§ 8a.1, 8a.2, 8a.3 and 8a.4 relating to Veterans Mortgage Life Insurance. Pub. L. 94-433 (90 Stat 1374) increased the lifetime maximum amount of coverage authorized for each eligible veteran from $30,000 to $40,000.

Interested persons were given 30 days in which to submit comments, suggestions or objections regarding the proposed regulations. One written comment has been received which was favorable. A suggestion was also made to allow service-disabled veterans to apply on a one-time only basis for $10,000 of additional life insurance. This suggestion would require enabling legislation by Congress. The proposed regulations are hereby adopted without change and are set forth below.

NOTE.—The Veterans Administration has determined that this document does not contain a major proposal required preparation of an Economic Impact Statement under Executive Order 11821 as amended by Executive Order 11949 and OMB Circular A-107.

Approved: August 24, 1977.

By the direction of the Administration.

RUFUS H. WILSON,
Deputy Administrator.

1. In § 8a.1, paragraphs (a), (c) and (e) are revised and paragraph (h) is revoked. The revised materials reads as follows:

§ 8a.1 **Definitions.**

(a) The term "eligible veteran" means any veteran who is or has been granted assistance in securing a suitable housing unit under chapter 21 of title 38, United States Code, and who has not attained his or her 70th birthday.

• • • • •

(c) The term "housing unit" means a family dwelling or unit, together with the necessary land therefor, that has been or will be purchased, constructed, or remodeled with a grant to meet the needs of an eligible veteran and of his or her family, and is or will be owned and occupied by the eligible veteran as his or here home, or a family dwelling or unit, including the necessary land therefor, acquired by an eligible veteran to be used as his or her residence after selling or otherwise disposing of title to the housing unit for which his or her grant was made.

• • • • •

(e) The term "initial amount of insurance" means the amount of insurance corresponding in amount to the unpaid principal of a mortgage loan outstanding on a housing unit owned or to be acquired by an eligible veteran on August 11, 1971, or on the date of approval of his or her grant made under chapter 21 of title 38, United States Code, whichever is the later date.

• • • • •

h [Revoked]

2. In § 8.2, paragraphs (a), (b) (1), (4), (5), (6) and (8) are revised and paragraphs (b) (9) and (c) are added so that the revised and added material reads as follows:

§ 8a.2 **Maximum amount of insurance.**

(a) Effective October 1, 1976, each eligible veteran is authorized a lifetime maximum amount of insurance under section 806 of title 38, United States Code, not to exceed $40,000, to be used as needed for insurance on his or her life during periods he or she is obligated under a mortgage loan. Whenever insurance on the life of an eligible veteran is reduced because of a reduction of the principal of his or her mortgage loan, or in accordance with the amortization schedule of his or her mortgage loan, his or her lifetime maximum of $40,000 is permanently reduced by such an amount, except in the case of a reduction of the principal of the mortgage loan resulting from a sale of the property or a refinancing of the loan.

(b) The maximum amount of insurance in force on any one life at one time shall not exceed the lesser of the following amounts:

(1) $40,000.

• • • • • •

(4) Where the grant was approved prior to August 11, 1971, but had not been fully disbursed on that date, the amount of the unpaid principal of the mortgage loan outstanding on that date on a housing unit then owned and occupied by the eligible veteran, or on a housing unit then in the process of construction or remodeling for the eligible veteran, and such initial amount of insurance may be adjusted upward, subject to the maximum insurance available to the eligible veteran, or downward, depending upon the amount of the mortgage loans outstanding on the date of full disbursement of the grant, or on the date of the final settlement of the purchase, construction, or remodeling agreement, which ever date is the later date.

(5) Where the grant is approved on or after August 11, 1971, the amount of the unpaid principal of the mortgage loan outstanding on the date of approval of the grant on a housing unit then owned and occupied by the eligible veteran, or on a housing unit being or to be constructed or remodeled for the eligible veteran, and such initial amount of insurance may be adjusted upward, subject to the maximum insurance available to the eligible veteran, or downward, depending upon the amount of the mortgage loans outstanding on the date of full disbursement of the grant, or on the date of final settlement of the purchase, construction, or remodeling agreement, whichever date is the later date.

(6) Where an eligible veteran ceases to own the housing unit purchased in part with a grant, or a subsequently acquired housing unit which was subject to a mortgage loan that resulted in his or her life being insured under Veterans Mortgage Life Insurance, and becomes obligated under a mortgage loan on another housing unit occupied or to be occupied by the eligible veteran, the amount of the unpaid principal outstanding on the mortgage loan on the newly acquired housing unit on the date insurance hereunder is placed in effect.

• • • • • •

(8) Where the title to a housing unit is or will be vested in an eligible veteran and his or her spouse, the amount of insurance shall not exceed the principal amount of the outstanding mortgage loans. If title to an undivided interest in a housing unit is or will be vested in a person other than the spouse of an eligible veteran, the amount of Veterans Mortgage Life Insurance on his or her life shall be computed to be such part of the total of the unpaid principal of the loan outstanding on the housing unit as is proportionate to the undivided interest of the veteran in the entire property.

(9) All claims, arising out of the deaths of insured veterans occurring prior to October 1, 1976, shall be subject to the $30,000 lifetime maximum amount of insurance then in effect.

(c) Any eligible veteran who prior to October 1, 1976, was covered by $30,000 Veterans Mortgage Life Insurance and who on that date became eligible to have his or her coverage increased may elect to retain the lesser amount of coverage he or she had in effect prior to that date.

3. Section 8a.3 is revised to read as follows:

§ 8a.3 **Effective date.**

(a) Where the grant was approved prior to August 11, 1971, Veterans Mortgage Life Insurance shall be effective August 11, 1971, if on that date, the eligible veteran was obligated under a mortgage loan, and any such eligible veteran is automatically insured, unless he or she elects in writing not to be insured, or fails to respond within 60 days after the date a final request is made or mailed to the eligible veteran for information on which his or her premium can be based.

(b) Where the grant is approved on or after August 11, 1971, Veterans Mortgage Life Insurance shall be effective on the date of approval of the grant, if on that date the eligible veteran is obligated under a mortgage loan, and any such eligible veteran is automatically insured, unless he or she elects in writing not to be insured, or fails to respond within 60 days after the date a final request is made or mailed to the eligible veteran for information on which his or her premium can be based.

(c) In any case in which a veteran would have been eligible for Veterans Mortgage Life Insurance on August 11, 1971, or on the date of approval of his or her grant, whichever date is the later date, but such insurance did not become effective because he or she was not obligated under a mortgage loan on that date, or because he or she elected in writing not to be insured, or failed to timely respond to a request for information on which his or her premium could be based, the insurance will be effective on a date agreed upon by the veteran and the Administrator, but only if the veteran files an application in writing with the Veterans Administration for such insurance, submits evidence that he or she meets the health requirements of the Administrator, together with information on which his or her premium can be based, and is or becomes obligated under a mortgage loan upon the date agreed upon as the effective date of his or her insurance.

(d) In any case in which an eligible veteran disposes of the housing unit purchased, constructed or remodeled in part with a grant, or a subsequently acquired housing unit, and becomes obligated under a mortgage loan on another housing unit occupied or to be occupied by the eligible veteran, the insurance will be effective upon a date requested by the veteran and agreed to by the Administrator, but only if the eligible veteran

V42169 AUG 31 77 UMI

files an application for such insurance, submits evidence that he or she meets the health requirements of the Administrator, furnishes information on which his or her premium can be based, and is or becomes obligated under a mortgage loan on the date the insurance is to become effective.

(e) In any case where an eligible veteran insured under Veterans Mortgage Life Insurance, refinances the mortgage loan which is the basis for such insurance on his or her life, any increase in the amount of insurance or any delay in the rate of reduction of insurance will be effective only if the eligible veteran files an application for insurance, submits evidence that he or she meets the health requirements of the Administrator, and furnishes information on which his or her premium can be based.

4. In § 8a.4, paragraphs (b), (c) and (d) are revised to read as follows:

§ 8a.4 • Coverage.

* * * * *

(b) The $40,000 lifetime maximum amount of Veterans Mortgage Life Insurance available to an eligible veteran shall be permanently reduced, and the amount of such insurance in force on his or her life at any one time shall be reduced simultaneously (1) with the reduction in the principal of the mortgage loan, whether or not the mortgage loan is amortized, and (2) in addition, if the mortgage loan is amortized, according to the schedule for the reduction of the principal of the mortgage loan whether or not the scheduled payments are timely made.

(c) If the amount of the mortgage loan exceeds $40,000, or the reduced maximum amount of insurance available to an eligible veteran, whichever amount is the lesser, the amount of insurance in force on the life of the veteran shall remain at a constant level until the principal amount of the mortgage loan which is basis for establishing the amount of insurance is reduced to $40,000, or to the amount of the reduced maximum amount of insurance available to the veteran, at which time the amount of insurance in force on his or her life shall be reduced in accordance with the schedule for the reduction of the principal of the mortgage loan, and whether or not the scheduled payments are timely made.

(d) Subject to the $40,000 lifetime maximum amount of insurance, and to the reduced maximum amount of insurance available to the eligible veteran, he or she is entitled to be insured under Veterans Mortgage Life Insurance or to apply for such insurance as often as he or she becomes obligated under a mortgage loan or a refinanced mortgage loan on a housing unit or a successor housing unit owned and occupied by the eligible veteran. Where a veteran who is not automatically insured under Veterans Mortgage Life Insurance applies for such insurance, he or she shall be required to meet the health standards and other conditions established by the Administrator for such insureds.

Title 39—Postal Service

CHAPTER I—UNITED STATES POSTAL SERVICE

PART 233—INSPECTION SERVICE AUTHORITY

Rewards

AGENCY: Postal Service.

ACTION: Final rule.

SUMMARY: The primary purpose of this rulemaking is to amend Postal Service regulations to increase the maximum amount of rewards for information and services leading to the arrest and conviction of any person for the following postal offenses: Robbery; mailing of bombs or explosives; mailing of poison or controlled substances; burglary of post office; obstruction of mail; or offenses involving mail orders. A number of minor, technical and conforming amendments are also made to the regulations.

EFFECTIVE DATE: August 31, 1977.

FOR FURTHER INFORMATION CONTACT:

Donald L. Diseroad, 202-245-5465.

SUPPLEMENTARY INFORMATION:

Accordingly, 39 CFR is amended as follows:

§ 233.1 [Amended]

1. In paragraph (b)(1) of § 233.1 by deleting the words "Sign 32" and inserting "Notice 96" in lieu thereof.

2. In note following paragraph (b)(2) of § 233.1 by deleting the words "Sign 32" and inserting "Notice 96" in lieu thereof.

3. By revising the text of Notice 96 in the note following paragraph (b)(2) of § 233.1 to read as follows:

The United States Postal Service will pay a reward for information and services leading to the arrest and conviction of any person for the following offenses:

ROBBERY

1. Not to exceed $5,000 for robbery or attempted robbery of any custodian of any mail, or money or other property of the United States under the control and jurisdiction of the United States Postal Service, if such custodian is wounded or killed, or the custodian's life jeopardized; but not to exceed $2,000 if the custodian is not wounded or killed, or his life jeopardized.

BOMBS OR EXPLOSIVES

2. Not to exceed $5,000 for mailing or causing to be mailed any bombs or explosives which may kill or harm another, or injure the mails or other property, or the placing of any bomb or explosive in a postal facility, vehicle, depository or receptacle established, approved, or designated by the Postmaster General for receipt of mail.

POISONS AND CONTROLLED SUBSTANCES

3. Not to exceed $1000 for mailing or causing to be mailed any poison or other controlled substance.

BURGLARY OF POST OFFICE

4. Not to exceed $500 for breaking into or attempting to break into a post office, station, branch, or a building used wholly or partially as a post office with intent to commit a larceny or other depredation in that part used as a post office.

THEFT OF MAIL

5. Not to exceed $500 for the theft or attempted theft of any mail, or the contents thereof, or the theft of money or any other property of the United States under the custody and control of the United States Postal Service, from any custodian, postal vehicle, railroad depot, airport, or other transfer point, post office or station or receptacle or depository established, approved, or designated by the Postmaster General for the receipt of mail.

OBSTRUCTION OF MAIL

6. Not to exceed $500 for obstructing or retarding the passage of mail, or any carrier or conveyance carrying the mail.

OFFENSES INVOLVING MONEY ORDERS

7. Not to exceed $500 for the altering, counterfeiting, forging, and unlawful uttering or passing of postal money orders.

GENERAL PROVISIONS

8. The United States Postal Service will also pay rewards as stated above for information and services leading to the arrest and conviction of any person:

(a) As an accessory to any of the above crimes;

(b) For receiving or having unlawful possession of any mail, money, or property secured through the above crimes;

(c) For conspiracy to commit any of the above crimes.

9. When a person has been adjudged a juvenile delinquent or processed through a formal pre-trial diversion program for having committed any of the above crimes, the same reward may be paid as though such person had been convicted of such crime.

10. The term "custodian" as used herein includes any person having lawful charge, control, or custody of any mail matter, or any money or other property of the United States under the control and jurisdiction of the United States Postal Service.

11. A reward may be paid for the conviction of a person for an offense listed above, even though arrested for committing another offense.

12. When an offender is killed while committing a crime listed above or in resisting lawful arrest, the same reward may be paid to a person rendering information and services as though the offender had been arrested and brought to conviction.

13. The amount of the reward to be paid will be based on the importance of services rendered, character of the offender, risks and hazards involved, time spent, and expenses incurred. Maximum rewards will be paid only when services were of the maximum value.

14. The Postal Service will reject a claim where there has been collusion, or improper methods have been used to effect an arrest or to secure a conviction. It has the right to allow only one reward where several persons were convicted of the same offense, or one person was convicted of several offenses.

15. A written claim must be submitted to the Postal Inspector in charge of the Division in which the crime was committed within six months from the date of conviction of an offender, or the date of formally deferred prosecution or the date of his death, if killed in committing a crime or resisting arrest. Applications for the filing of claims may be obtained from the Inspector in Charge.

(39 U.S.C. 401(2), 404(8), 410(b)(2))

ROGER P. CRAIG,
Deputy General Counsel.

Title 40—Protection of the Environment

CHAPTER I—ENVIRONMENTAL PROTECTION AGENCY

SUBCHAPTER D—WATER PROGRAMS

[FRL 765-2]

PART 140—MARINE SANITATION DEVICES

Regulation To Prohibit the Discharge of Vessel Wastes State of Minnesota

AGENCY: Environmental Protection Agency.

ACTION: Final rule.

SUMMARY: Section 312(f)(4) of the Federal Water Pollution Control Act (Pub. L. 92-500) states that, "If the Administrator determines upon application by a State that the protection and enhancement of the quality of specified waters within such State requires such a prohibition, he shall by regulation completely prohibit the discharge from a vessel of any sewage (whether treated or not) into such waters." The following regulation prohibits the discharge from a vessel of any sewage, whether treated or not, into the Boundary Waters Canoe Area (BWCA), a wilderness area within the Superior National Forest, at the northern border of the State of Minnesota.

EFFECTIVE DATE: August 30, 1977.

FOR FURTHER INFORMATION CONTACT:

Kenneth M. Mackenthun, Director, Criteria and Standards Division (WH-585), U.S. Environmental Protection Agency, 401 M Street SW., Washington, D.C. 20460 (202-755-0100).

SUPPLEMENTARY INFORMATION: On March 18, 1977, a notice of proposed rulemaking was published by the Administrator, Environmental Protection Agency, to amend the present regulations in 40 CFR 140.4 (42 FR 15079). The proposed rulemaking was issued as a result of application to the Administrator by the State of Minnesota, pursuant to Section 312(f)(4) of the Federal Water Pollution Control Act Amendments of 1972, that he prohibit, by regulation, the discharge from a vessel of any sewage, whether treated or not, into the Boundary Waters Canoe Area (BWCA) of the State of Minnesota.

The BWCA is used entirely for recreation; the majority of travel on the waters of the BWCA is by canoe. Motorized vessels are allowed only on certain specified lakes, and on such lakes motors must be less than ten horsepower. The State reports that canoeists routinely take drinking water from all lakes within the BWCA and use it with no treatment. One comment was received by the Agency in response to the notice of proposed rulemaking; the commenter was in favor of the prohibition of the discharge of sewage from vessels into the BWCA.

In consideration of the foregoing, 40 CFR, Chapter I, Subchapter D, § 140.4 is hereby amended by the addition of a new paragraph (b)(1) that lists those waters, the quality of which the Administrator has determined require the complete prohibition of the discharge from a vessel of any sewage (whether treated or not) for their protection and enhancement.

Dated: August 22, 1977.

DOUGLAS M. COSTLE,
Administrator.

§ 140.4 Complete prohibition.

* * * * * *

(b) * * *

(1) For the following waters the discharge from a vessel of any sewage (whether treated or not) is completely prohibited:

Boundary Waters Canoe Area, formerly designated as the Superior, Little Indian Sioux, and Caribou Roadless Areas, in the Superior National Forest, Minnesota, as described in 16 U.S.C. 577-577d1.

[FR Doc.77-25257 Filed 8-30-77; 8:45 am]

SUBCHAPTER N—EFFLUENT GUIDELINES AND STANDARDS

[FRL 782-8]

PART 419—PETROLEUM REFINING POINT SOURCE CATEGORY

Pretreatment Standards for Existing Sources; Extension of Comment Period

AGENCY: Environmental Protection Agency.

ACTION: Extension of comment period.

SUMMARY: This action further extends the deadline for the receipt of comments on the interim final rulemaking establishing pretreatment standards for existing sources for the petroleum refining point source category (42 FR 15684). Comments submitted not later than October 21, 1977 will be considered.

EFFECTIVE DATE: August 30, 1977.

FOR FURTHER INFORMATION CONTACT:

Harold B. Coughlin, Effluent Guidelines Division (WH-552), Environmental Protection Agency, 401 M Street SW., Washington, D.C. 20460 (202-426-2560).

SUPPLEMENTARY INFORMATION: On March 23, 1977, the Agency published a notice of interim final rulemaking establishing pretreatment standards for the petroleum refining point source category (42 FR 15684). This notice stated that the Development Document and Economic Impact Analysis were available to the public and provided for a 60 days public comment period. On July 8, 1977, a notice appeared in the FEDERAL REGISTER (42 FR 35159) that extended the comment period until August 15, 1977, due to lack of availability of the two documents. There has been a further delay in the printing of the Development Document which necessitates a further extension of the comment period. Therefore the comment period is being extended to October 21, 1977.

Dated: August 22, 1977.

JOHN T. RHETT,
Acting Assistant Administrator for Water and Hazardous Materials.

[FR Doc.77-25260 Filed 8-30-77; 8:45 am]

Title 41—Public Contracts and Property Management

CHAPTER 5A—FEDERAL SUPPLY SERVICE, GENERAL SERVICES ADMINISTRATION

[FSS P 2800.8B CHGES 8-14]

PROCUREMENT REGULATIONS

Miscellaneous Amendments

AGENCY: Federal Supply Service, General Services Administration.

ACTION: Final rule.

SUMMARY: This amendment of the General Services Administration Procurement Regulations (GSPR 5A) revises or deletes contract clauses to comply with Federal acts and requirements, and revises or adds instructions to contracting officers to standardize contract operations. The intent of this regulation is to clarify and update contracting practices of GSA.

EFFECTIVE DATE: August 31, 1977.

FOR FURTHER INFORMATION CONTACT:

Einar Windingland, Director, Policy and Procedures Division, Office of Procurement, Federal Supply Service, General Services Administration, Washington, D.C. 20406 (703-557-8344).

SUPPLEMENTARY INFORMATION:

1. The Cargo Preference Act of 1954 requires that at least 50 percent of the gross tonnage of Government supplies transported by ocean carrier be shipped on privately owned U.S. flag commercial vessels. Regulations issued by the Maritime Administration require the submission to that agency of reports regarding the weight of cargoes transported by privately owned U.S. flag commercial vessels and foreign flag commercial vessels. A recent amendment to the Federal Procurement Regulations prescribed a contract clause which requires contractors to provide data necessary for agency reports through the submission of copies of bills of lading. This GSPR 5A amendment implements the Federal Procurement Regulations and deletes the GSPR 5A clause on this subject.

2. A clause applicable to the procurement of hazardous substances is revised to reflect the current requirements of the Federal Hazardous Substances Act and the Hazardous Materials Transportation Act.

3. A clause which acknowledged the imposition of a California Sales and Use Tax on tangible personal property leased to the Federal Government was deleted

V42169A AUG 31 77 UMI

as a result of a court ruling that the tax was unconstitutional.

4. To emphasize the importance of coordination with legal counsel in appropriate cases, a new section is added which lists specific contracting circumstances requiring legal review before final action.

5. Instructions regarding the approval of contract awards are revised to authorize GSA regional counsels to approve mistake-in-bid cases and permit withdrawal of bids when the evidence is clear and convincing as to the existence of a mistake disclosed before award. This change is based on a recent amendment to the Federal Procurement Regulations authorizing a decentralization of controls in cases of this type.

6. Instructions regarding notifications of contract awards are revised to emphasize the importance of notifying the Federal Supply Schedule Management Division of awards under the Federal Supply Schedule Program to enable that activity to provide up-to-date information to schedule users upon request.

PART 5A–1—GENERAL

The table of contents for Part 5A–1 is amended to add new §§ 5A–1.450, 5A–1.7301–2, and 5A–1.7301–3, and to revise the title of § 5A–1.7301–1 as follows:

Subpart 5A–1.4—Procurement Responsibility and Authority

Sec.

5A–1.450 Participation of legal counsel in the procurement process.

Subpart 5A–1.73—Preparation and Distribution of Contract Documents

5A–1.7301–1 General.
5A–1.7301–2 Related orders.
5A–1.7301–3 Purchasee order numbering.

Subpart 5A–1.4—Procurement Responsibility and Authority

Section 5A–1.450 is added as follows:

§ 5A–1.450 Participation of legal counsel in the procurement process.

(a) In addition to other required reviews or approvals, contracting officers shall request legal advice from assigned counsel when one or more of the following procurement situations are present. Such requests shall be made after an examination of all the pertinent facts has been made and recorded by the contracting officer.

(1) Mistakes in bids §§ 1–2.406 and 5A–2.406).

(2) Protests against award §§ 1–2.407–8 and 5A–2.407–8).

(3) Disputes (§§ 1–1.318 and 5A–1.318–1); terminations, including cure letters (§§ 1–8.6, 5A–8.6, and 5A–53.472); and contract claims.

(4) Novation and change of name agreements (§ 1–26.4).

(5) Assignment of claims (§§ 1–30.700 and 5A–30.706).

(6) Substantive modifications of contracts (§ 1–1.219).

(7) Requests for information under the Freedom of Information Act and Privacy Act.

(8) Proposed awards to other than the low evaluated bidder (§§ 1–2.404–2 and 5A–2.404–2).

(9) Proposed no-awards for reasons other than excessive prices (§§ 1–2.404 and 5A–2.404).

(10) Proposed consideration of late bids (§ 1–2.201), late offers (§ 1–3.802–1), and late modifications of bids (§ 1–2.305), when it is anticipated that the circumstances involved may result in protest.

(11) Findings and determinations to support negotiations (§§ 1–3.3 and 5A–3.301).

(12) Determinations of nonresponsibility (§§ 1–1.1204 and 5A–1.1205) and nonresponsiveness (§§ 1–2.301 and 5A–2.301).

(13) Memoranda of position and appeal files in Board of Contract Appeals cases (§ 5A–60.205–1) and other matters pertaining to litigation.

(b) When legal assistance is requested, the contracting officer shall brief counsel regarding the facts and points at issue to facilitate prompt resolution.

(c) Attorneys shall be requested to participate in conferences where it is expected that legal problems or contract provisions will be considered, and in meetings attended by legal representatives of private parties or other Government agencies. Assigned procurement counsel should be requested to participate in the drafting of correspondence involving controversial or sensitive contractual matters.

Subpart 5A–1.11—Qualified Products

Section 5A–1.1101–70 is amended by deleting paragraph (c).

Subpart 5A–1.73—Preparation and Distribution of Contract Documents

1. Sections 5A–1.7301 and 5A–1.7301–1 are revised and §§ 5A–1.7301–2 and 5A–1.7301–3 are added as follows:

§ 5A–1.7301 Purchase order forms.

(a) GSA Form 300, Purchase Order, illustrated in § 5A–16.950–300, is a 15-part form which incorporates the 2nd, 3rd, and 4th copies as the direct delivery invoice. GSA Form 300 may be used as a purchase order, a delivery order, or as an award document. Special instructions for preparation of GSA Form 300 are set forth in § 5A–16.950–300–1.

(b) GSA Form 2875, GSA Stock Item Direct Delivery Order, illustrated in § 5A–16.950–2875, is for ordering stock items that are to be delivered by the vendor direct to the consignee. See the HB, Supply Operations, FSS P 2900.3, ch. 9.

(c) GSA Form 3014, Order for Supplies or Services, illustrated in § 5A–16.950–3014, is a 10-part form designed for computer and manual preparation. It is used primarily for stock replenishment and nonstock direct delivery purchase orders against established sources.

§ 5A–1.7301–1 General.

The purchase order numbering system prescribed below shall apply to all orders issued by FSS except for those issued by the Special Programs Division (FPZ) of the Office of Procurement and the Contract Operations Division (FJM) of the Office of Property Management. FPZ may use the incoming agency requisition number in lieu of the numbering system prescribed below.

§ 5A–1.7301–2 Related orders.

Orders should combine related national stock numbers (NSN's) going to the same location at the same time from the same contract source where feasible. Each separate delivery requires a separate order number. Different suffixes may be used for this purpose; e.g., 6PN–D–54391–1, 6PN–E–54391–2, and 6PN–E–54391–3 denotes three separate deliveries under number 54391.

§ 5A–1.7301–3 Purchase order numbering.

The purchase order number is a four-group, hyphenated number (see below) for orders issued by procuring or inventory management activities. The heart of the numbering system is the five-digit case number and the suffix denoting the number of orders/deliveries issued against the case.

Example	Prefix			Type of order	Basic case number					Suffix	
Box number.....	1	2	3	4	5	6	7	8	9	10	11
Procurement.....	6	P	N	E	A	5	4	3	9	2	B
Inventory management.		K		W	K	Ø	Ø	Ø	1	1	A

(a) *Prefix (Boxes 1, 2, 3).* The prefix will contain a three-position code for procuring activities and inventory management stock direct deliveries from the codes listed in § 5A–76.320, and a one-position code for inventory management stock replenishment from the codes listed in the HB, FSS P 2900.3.

(b) *Type of order (Box 4).* The type of order shall be shown by an alpha code from the codes listed in § 5A–76.320.

(c) *Basic case number (Boxes 5, 6, 7, 8, 9).* The basic case number shall be a five-position series of alpha numeric designations within the range of A0001 through Z9999 excluding I, O, and Q. Numbers shall be assigned and controlled by each procuring activity. A different basic case number shall be assigned for each destination where feasible. Case numbers assigned to 8(a) contracts, by inventory management, shall be within the range of 0001A through Z999Z.

(d) *Suffix (Boxes 10, 11).* The suffix consists of two positions. The first position is the number of orders written against the case file. The first purchase order shall be number "1" regardless of the total number of orders/deliveries issued with subsequent purchase orders numbered sequentially through 9. If the number of purchase orders exceeds 9, additional orders shall be identified by alphabetical designations. The letters I, O, and Q may not be used as alphabetical designations. The second position is the number of amendments issued to the order number.

2. Section 5A–1.7304 is revised as follows:

§ 5A–1.7304 Bills of lading.

(a) When Government bills of lading are prepared by procuring activities,

preparation and distribution shall be in accordance with applicable freight traffic management provisions (see FPMR 101–41.3). Additionally, procuring activities shall forward a memorandum copy of the Government bill of lading to the appropriate regional Transportation Services Division (FZT). This memorandum copy shall be annotated on the bottom, as follows:

FOR ENTRY INTO TRIPS

(b) When contracts require a USDA Certificate of Quality and Condition with delivery of canned fruits and vegetables and products thereof, including juices, with delivery of dried fruits, and where procurement of at least 10,000 pounds of roasted whole bean coffee is involved, the statement contained in § 5A–72.304 and § 5A–72.305 shall be placed on Government bills of lading covering such shipments.

PART 5A–2—PROCUREMENT BY FORMAL ADVERTISING

Subpart 5A–2.4—Opening of Bids and Award of Contract

1. Section 5A–2.403(c) is revised as follows:

§ 5A–2.403 Recording of bids.

* * * * *

(c) Abstracts shall be annotated with (1) the size of the bidder ("S" for small business, "O" for large), and (2) the status of the bidder (manufacturer or dealer).

* * * * *

2. Section 5A–2.406–3(a)(2) is revised as follows:

§ 5A–2.406–3 Other mistakes disclosed before award.

(a) * * *

(2) Cases arising in regional offices (or in Central Office operations which are serviced by Regional Counsel) shall be processed by the contracting officer through channels to the Regional Counsel, who will review the case for technical accuracy of the findings and determination, and general adequacy of the supporting evidence. A determination may be made permitting the bidder to withdraw his bid where the bidder requests permission to do so and where clear and convincing evidence establishes the existence of a mistake. The Regional Counsel will be the approving authority on these mistakes in bid cases, but will transmit all other cases with applicable recommendations to the appropriate office of General Counsel (e.g., the Assistant General Counsel for Procurement).

* * * * *

PART 5A–3—PROCUREMENT BY NEGOTIATION

The table of contents for Part 5A–3 is amended to add § 5A–3.7004, *Recording of bids.*

Subpart 5A–3.70—Solicitation of Offers

Section 5A–3.7004 is added as follows:

§ 5A–3.7004 Recording of bids.

Bids will be abstracted in accordance with § 5A–2.403.

PART 5A–7—CONTRACT CLAUSES

The table of contents for Part 5A–7 is amended to add § 5A–7.103–97, Special direct delivery requirement.

Subpart 5A–7.1—Fixed-Price Supply Contracts

1. Section 5A–7.103–84 is revised as follows:

§ 5A–7.103–84 Hazardous substances.

The following clause shall be included in all contracts that provide for packaged items subject to the Federal Hazardous Substances Act and the Hazardous Materials Transportation Act.

HAZARDOUS SUBSTANCES

(a) Federal Hazardous Substances Act—If the packaged items to be delivered under this contract are of a hazardous substance and ordinarily are intended or considered to be for use as a household item, the contract shall be subject to the Federal Hazardous Substances Act, as amended (15 U.S.C. 1261–1274), implementing regulations thereof (16 CFR Chapter II(c)), and Federal Standard No. 123, Marking for Shipment (Civil Agencies), issue in effect on the date of Invitation for Bids or Solicitation for Offers.

(b) Hazardous Materials Transportation Act—The packaged items to be delivered under this contract shall be subject to the preparation of shipping documents, the preparation of items for transportation, shipping container construction, package marking, package labeling, when required, shipper's certification of compliance, and transport vehicle placarding in accordance with Parts 170 through 189 of 49 CFR.

(c) Without exception, the minimum packaging acceptable for packaging Department of Transportation regulated hazardous materials shall be those prescribed in Part 173, Title 49, Transportation, CFR. However, packages which exceed the packaging requirements of the CFR are acceptable.

(d) Data Submission Requirement—Contractors are required to complete "Material Safety Data Sheet" (DD Form 1813) as required by Federal Standard 313 (Material Safety Data Sheets, Preparation and Submission of), issue in effect on the date of Invitation for Bids or Solicitation of Offers, and as required by Section 1916.57, Title 29, Labor, CFR. The "Material Safety Data Sheet" shall be submitted to the quality assurance specialist on or before the date the first shipment is made on each contract.

2. Section 5A–7.103–97 is added as follows:

§ 5A–7.103–97 Special direct delivery requirement.

The following clause shall be included in all direct delivery solicitations.

SPECIAL DIRECT DELIVERY REQUIREMENT

Contractors are required to enclose a duplicate (facsimile) of the resultant purchase/delivery order with each shipment.

PART 5A–11—FEDERAL, STATE, AND LOCAL TAXES

Subpart 5A–11.4—Contract Clauses

Section 5A–11.401–71 is revised as follows:

§ 5A–11.401–71 Federal, State, and local taxes—Federal Supply Schedules.

The following clause shall be included in all multiple award Federal Supply Schedule (including New Item Introductory Schedules) solicitations and resultant schedules:

STATE AND LOCAL TAXES

Notwithstanding the provisions of Clause 27 of GSA Form 1424, GSA Supplemental Provisions, the contract price excludes all State and local taxes levied on or measured by the contract or sales price of the services or completed supplies furnished under this contract. Taxes excluded from the contract price pursuant to the preceding sentence shall be separately stated on the Contractor's invoices and the Government agrees either to pay to the Contractor amounts covering such taxes or to provide evidence necessary to sustain an exemption therefrom.

PART 5A–16—PROCUREMENT FORMS

The table of contents for Part 5A–16 is amended to add the following new entries:

Sec.

5A–16.950–1678 GSA Form 1678, Contract Delivery Status Record.
5A–16.950–2875 GSA Form 2875, GSA Stock Item Direct Delivery Order.
5A–16.950–3024 GSA Form 3024, Contract Information Multiple Award Federal Supply Schedule.

Subpart 5A–16.9—Illustrations of Forms

1. Sections 5A–16.950–300, 5A–16.950–300A, and 5A–16.950–1602 are revised to illustrate new editions of forms.

2. Sections 5A–16.950–1678, 5A–16.950–2875, and 5A–16.950–3024 are added to illustrate GSA Forms 1678, 2875, and 3024, respectively.

PART 5A–19—TRANSPORTATION

The table of contents for Part 5A–19 is amended to add § 5A–19.108–2, Contract clause.

Subpart 5A–19.1—General

1. Section 5A–19.108–1 is revised as follows:

§ 5A–19.108–1 Use of privately owned U.S.-flag commercial vessels.

See § 1–19.108–1.

2. Section 5A–19.108–2 is added as follows:

§ 5A–19.108–2 Contract clause.

Insert the clause prescribed by § 1–19.108–2 under the conditions set forth therein.

3. Section 5A–19.108–50(a)(2) is revised as follows:

V 42 169 AUG 31 77 UMI

§ 5A-19.108-50 Shipments by foreign-flag vessels in Cuban or North Vietnam trade.

(a) • • •

(2) The regional Transportation Services Division, FSS, shall (i) ensure that they are on the FEDERAL REGISTER mailing list and (ii) if necessary, supply ocean freight forwarders under contract with GSA the published listing of ineligible vessels.

• • • • •

PART 5A-72—PROCUREMENT OF STOCK ITEMS

Subpart 5A-72.2—Requirements Contracts for Stock Replenishment

1. Section 5A-72.206 is amended by adding paragraph (c), as follows:

§ 5A-72.206 Inspection.

• • • • • •

(c) Where origin inspection is specified, it is essential that copies of documents furnished to quality control activities show the location from which the material will be shipped. When a modification is issued which provides for an inspection point(s) other than that of the original contract, the contracting officer shall identify the new inspection point(s) to assist the appropriate regional Quality Control Division. The following example illustrates how the Standard Form 30, Amendment of Solicitation/Modification of Contract, should be annotated:

Inspection point is changed from: Alotour, Inc., 7918 Hart Road, Oxon Hill, MN., Region 5.

Inspection point is changed to: Andrew & James, Inc., 223 Tennessee Ave., Alexandria, Ga., Region 4.

2. Section 5A-72.218 is amended by adding paragraph (h), as follows:

§ 5A-72.218 Quantity pack requirements.

• • • • • •

(h) Solicitations covering stock items which specify palletization for which quantity pack per pallet has not been established shall include a request (but not a requirement) for bidders to state the quantity pack they are offering per pallet. The quantity pack information received in response to a solicitation containing such a request may not be considered a factor in determining award.

Subpart 5A-72.4—Direct Delivery of Stock Items

Section 5A-72.401 is amended by adding paragraph (c), as follows:

§ 5A-72.401 General.

• • • • • •

(c) In many instances agency incoming requisitions are combined on a single purchase order. Direct deliveries require contractual provisions to ensure that contractors send a duplicate (facsimile) copy of the purchase delivery order with each shipment to facilitate identification for the consignee. (See § 5A-7.103-97.)

PART 5A-73—FEDERAL SUPPLY SCHEDULE PROGRAM

The table of contents for Part 5A-73 is amended to revise the titles of the following sections:

Sec.
5A-73.302 Notification of contractor of contract awards.
5A-73.303 Other notifications of contract awards.

Subpart 5A-73.3—Evaluation of Offers and Award of Contracts

1. The title of section 5A-73.302 is revised as follows:

§ 5A-73.302 Notification of contractor of contract awards.

• • • • • •

2. Section 5A-73.303 is revised as follows:

§ 5A-73.303 Other notifications of contract awards.

(a) Commerce Business Daily (see §§ 1-1.1004 and 5A-1.1004).

(b) Substantial awards. If the award is estimated to exceed $250,000, compliance with the provisions of § 5A-2.407-84 is required.

(c) Notifications by the activity responsible for preparing the Federal Supply Schedule. To enable the Federal Supply Service to provide schedule status information to schedule users upon request, the Federal Supply Schedule Management Division (FPS) is the focal point for assembling this information. The following forms and formats shall be completed by the contracting officers as indicated and furnished to FPS immediately upon award of a national-scope Federal Supply Schedule contract.

(i) GSA Form 1535, Recommendation for Award(s), regardless of whether the schedule is prepared by FPS or by a regional or Central Office procuring activity.

(ii) Additional information on the format set forth in § 5A-76.332. The use of this format for submitting schedule information for schedule preparation is mandatory when FPS prepares the schedule and optional when the schedule is prepared by an activity other than FPS. However, in the latter instance and if the format is not used, the information to be furnished FPS must be as complete as possible to serve the intended purpose, especially with regard to the details on awards pending, no bids received, and no awards.

(iii) GSA Form 3024, Contract Information Multiple Award Federal Supply Schedule. This form is mandatory in all multiple award cases when FPS prepares the schedule and optional when the schedule is prepared by an activity other than FPS. If an activity chooses not to use this form, it is still necessary that the information required by the form be furnished to enable FPS to provide complete answers on all national-scope Federal Supply Schedule contracts, upon request.

PART 5A-76—EXHIBITS

The table of contents for Part 5A-76 is amended to add the following new entries:

Subpart 5A-76.3—Miscellaneous Exhibits

Sec.
5A-76.332 Format for submitting schedule information for schedule preparation.

Subpart 5A-76.4—Procurement Assignments

Sec.
5A-76.405 U.S. Department of State special support items.

Subpart 5A-76.3—Miscellaneous Exhibits

1. Section 5A-76.306 is amended to require that the handlist of bidders be annotated to indicate the firm's size and status.

2. Section 5A-76.307 is amended to reflect current paying offices to be shown on purchase orders for stock and nonstock direct deliveries.

3. Section 5A-76.320 is amended to reflect the applicable codes and format for numbering purchase orders.

4. Section 5A-76.332 is added to illustrate a format for furnishing information for use in schedule preparation.

Subpart 5A-76.4—Procurement Assignments

Subpart 5A-76.4 is revised to reflect current procurement assignments.

NOTE.—Copies of the forms illustrated in Part 5A-16 and copies of the exhibits shown in Part 5A-76 are filed with the original document.

(Sec. 205(c), 63 Stat. 390 (40 U.S.C. 486(c)).)

Dated: July 25, 1977

ROBERT P. GRAHAM,
Commissioner, Federal Supply Service.

Title 43—Public Lands: Interior

CHAPTER II—BUREAU OF LAND MANAGEMENT, DEPARTMENT OF THE INTERIOR

[Public Land Order 5624]

[NM 22873]

NEW MEXICO

Transfer of Jurisdiction

AGENCY: Bureau of Land Management (Interior).

ACTION: Final rule.

SUMMARY: This document establishes a trust under which the United States will hold 120,681 acres of federally owned land in New Mexico for the Navajo Tribe of Indians for irrigation project.

EFFECTIVE DATE: Upon publication.

FOR FURTHER INFORMATION CONTACT:

Stella Gonzales, New Mexico State Office, Santa Fe, NM, 505-988-6211.

Pursuant to Pub. L. 87-483 (78 Stat. 96) of June 13, 1962, as amended by Pub. L. 91-416 (84 Stat. 867) of September 25, 1970, it is ordered as follows:

Subject to valid existing rights, and in consideration of payment of the full appraised value of the lands in this order, excluding the value of minerals subject to leasing under the Act of February 25, 1920, 30 U.S.C. 181, et seq., the following described lands are hereby held in trust for the Navajo Tribe of Indians for the Navajo Indian Irrigation Project:

NEW MEXICO PRINCIPAL MERIDIAN

T. 26 N., R. 11 W.,
Sec. 3, lots 1 thru 4, S½N½, SE¼;
Sec. 4, SE¼;
Sec. 5, lots 1 thru 4, S½N½, S½;

[Public Land Order 5625]

[NM-25103]

NEW MEXICO

Partial Revocation of Air Navigation Site Withdrawal No. 51; Revocation of Public Land Order No. 2508

AGENCY: Bureau of Land Management, Interior.

ACTION: Final rule.

SUMMARY: This order will restore 130 acres of public lands to the operation of the public land laws.

EFFECTIVE DATE: Publication date.

FOR FURTHER INFORMATION CONTACT:

Michael T. Solan, Chief, Division of Technical Services, Bureau of Land Management, Santa Fe, N. Mex. 87501 (505-988-6204).

By virtue of the authority contained in section 204 of the Act of October 21, 1976, 90 Stat. 2743, 43 U.S.C. 1701, et seq., it is ordered as follows:

1. The Secretary's Order of February 3, 1931, and Public Land Order No. 2608 of February 12, 1962, withdrawing lands for Air Navigation Site No. 51, and for maintenance of air navigation facilities, respectively, are hereby revoked so far as they relate to the following described lands:

NEW MEXICO PRINCIPAL MERIDIAN

T. 27 S., R. 18 W.,
Sec. 34, E½NW¼.
T. 27 S., R. 18 W.,
Sec. 30, SW¼NE¼SE¼, S½NW¼SE¼, W½SE¼SE¼.

The areas described aggregate 130 acres in Grant and Hidalgo Counties.

The lands lie in the extreme southwestern part of the State near the village of Hachita, N. Mex. The lands are moderately to steeply sloping with rough, broken land and rock-land soil associations. Vegetation of this desert mountain area is a sparse cover of grama grasses, snakeweed, various annuals, mesquite, and various species of cacti.

2. At 10 a.m. on September 28, 1977, the lands shall be open to the operation of the public land laws generally, subject to valid existing rights, the provisions of existing withdrawals and the requirements of applicable law. All valid

V 42169 A AUG 31 77 UMI

applications received at or prior to 10 a.m. on September 28, 1977, shall be considered as simultaneously filed at that time. Those received thereafter shall be considered in the order of filing.

3. The lands will be open to location under the United States mining laws at 10 a.m. on September 28, 1977. They have been open to applications and offers under the mineral leasing laws.

GUY R. MARTIN,
Assistant Secretary of the Interior.

AUGUST 23, 1977.

APPENDIX—PUBLIC LAND ORDERS

[Public Land Order 5623]

[Montana 37274]

SOUTH DAKOTA

Modification of Public Land Order No. 1168

AGENCY: Bureau of Land Management (Interior).

ACTION: Final rule.

SUMMARY: Modification of PLO No. 1168 to withdraw certain forest lands from operation of the mining laws only.

EFFECTIVE DATE: When published.

FOR FURTHER INFORMATION CONTACT:

Eldon G. Hayes, 202-343-8731.

By virtue of the authority contained in section 204 of the Act of October 21, 1976, 90 Stat. 2743, 43 U.S.C. 1701, et seq., it is ordered as follows:

Public Land Order No. 1186 of June 15, 1955, which withdrew certain public lands within the Black Hills National Forest from all forms of appropriation under the public land laws, including the mining laws, but not the mineral leasing laws, is hereby modified to delete the following words: "all forms of appropriation under the public land laws, including" so far as it relates to the following described lands:

BLACK HILLS NATIONAL FOREST

BLACK HILLS MERIDIAN

T. 2 S., R. 5 E.,
Sec. 1, NW¼SE¼, W½NE¼SE¼.
Containing 60 acres.

The above described lands remain withdrawn from the operation of the general mining laws.

GUY R. MARTIN,
Assistant Secretary of the Interior.

AUGUST 23, 1977.

Title 45—Public Welfare

CHAPTER X—COMMUNITY SERVICES ADMINISTRATION

[CSA Instruction 6800-9]

PART 1050—UNIFORM FEDERAL STANDARDS

Monitoring and Reporting Program Performance

AGENCY: Community Services Administration.

ACTION: Final rule.

SUMMARY: The Community Services Administration is filing its final rule on grantee program progress reporting. This rule is required in order to implement the provisions of the Uniform Federal Standards. It will assure conformity with program reporting requirements of other Federal grant-in-aid projects also operated by CSA grantees.

DATE: This rule becomes effective August 31, 1977.

FOR FURTHER INFORMATION CONTACT:

Ms. Jacqueline G. Lemire, Community Services Administration, Office of Operations, Policy Development and Review Division, 1200 19th Street NW., Washington, D.C. 20506, tel. (202) 254-5670.

SUPPLEMENTARY INFORMATION: On April 28, 1977 the Community Services Administration published a proposed rule (42 FR 21623) revising its policy on program progress reporting with a 30 day comment period. Twenty-four grantees, including two State Economic Opportunity Offices, responded to the proposed rule. In addition, staff from three CSA Regional Offices and one Headquarters Program Office also commented.

The majority of the comments dealt with grantee concerns in two areas; (1) the 15 (working) day deadline for submitting progress reports, and (2) the requirement for reporting "unit cost" on the revised CSA Form 440. Most commentors noted that, in the words of one grantee, "(It is) impossible to get meaningful input from a large number of people, obtain governing board approval, and finally to submit the report within 15 working days." Or, as another grantee succinctly put it, "(It is) patently absurd." Of the eleven who made specific suggestions for changing the deadline, seven recommended 30 working days and two recommended 45 working days. Two others recommended 60 working days for the annual report. In reviewing these specific suggestions CSA concluded that the deadline could be extended to 30 working days and still impact both the development, and subsequent review by CSA Administering Offices, of the grantee's work program for the next Program Year. § 1050.80-3(c) has been revised to reflect this change.

There was agreement among most respondents that in general the Form 440 is an improvement over the form in current use. However, there was one major exception, i.e. twelve respondents expressed concern regarding item 6. (Unit Cost) on the Form 440. Although several grantees noted that they felt that it is important that CSA begin to be able to generate service unit cost data they and the other respondents generally forcused on the need for clarification of what CSA means by unit cost to assure that we are not counting "apples and oranges;" one grantee questioned whether current methods for determining unit costs are sophisticated enough to reflect actual costs versus actual service delivered; and one SEOO noted that "Most CAAs do not have program and cost information sufficiently quantified to provide unit cost data that is comparable to data from other programs and other agencies. This is a particular concern where there are no uniform service definitions • • •."

As a result of these comments CSA has concluded that too much ambiguity exists to implement this requirement and is accepting the suggestion made by one grantee that "• • • a separate process should be initiated, after careful study, incorporating specific instructions on how to arrive at unit costs and how to operationally define service units." CSA Form 440 has been revised to eliminate the unit cost item.

Other substantive changes:

Section 1050.80-3(c)(1)(i) has been amended to provide flexibility in adjusting reporting dates when both the Administering Office and grantee officials so agree. However, only in cases where it is clearly to accommodate the grantee may the period covered by the PPR not coincide with the period(s) covered by financial reports.

Section 1050.80-3(c)—a new section covering the reporting format has been added which includes an optional reporting format for research and demonstration grants in order to deal with the innate uniqueness of many of the Section 232 grants.

The following recommendations were received but not implemented for the reason(s) stated:

Three grantees (two urban) noted that reporting on goals rather than programs/projects would be an enormous undertaking since their work programs contain hundreds of individual goals. Conversely, one grantee recommended that the goal statement should be more general and that accomplishments should reflect the indicated activities on the work program. The latter recommendation was rejected since we fund projects and goals not activities. Although we also are not revising the regulations to implement the first concern noted above, a section has been added which gives Administering Offices and grantees flexibility to adjust reporting dates or reduce frequency of reporting. Under this section an Administering Office which monitors a grantee with an extensive work program could accept, for example, an annual full scale evaluation undertaken by the grantee as a fulfillment of its reporting requirement and in this way reduce drain on staff, board, etc. (However, the Administering Office must keep in mind that it is responsible for determining the extent to which the standards of effectiveness have been met prior to renewing or supplementing funding and, therefore, must have some mechanism in place in this situation to provide the data necessary for such a determination.)

Several recommendations for change were made which are already CSA policy. However, we feel that they are important enough to highlight in case there are other grantees who have similar misconceptions.

One grantee requested that a provision be included prohibiting CSA from imposing other reporting requirements. This prohibition already exists and is specifically stated in CSA Instruction 6800-1. We recommend that grantees familiarize themselves with the provisions of that Instruction including the section under question and the schema of the Instructions which implement the Uniform Federal Standards.

There also appears to be some misunderstanding of the reporting areas on the new Form 440. We would like to reiterate that the form was revised to eliminate duplicative and unnecessary information and that the information/data to be reported on the form is that previously required by OEO Instruction 7031-1 in narrative form. Also the self-evaluation process has not changed. There is, all in all, very little new under the sun.

We would like to advise the grantee who believes that Instruction 6710-1, Change 11, requires submission of the work program 180 days prior to the end of the Program Year, that this is not accurate. Eligible documents are to be in order and available at 180 days, but the required time for work program submission remains 90 days prior to PYE.

Grantees should also note that only in exceptional circumstances are reports required quarterly. Routine situations require the submission of two reports—one to cover 6 months and the other to cover 12 months.

As noted in the proposed rule, Section 231 grants will now be covered by the project progress reporting requirements. However, this subpart will not apply to grantees funded under Title VII since a separate subpart will be issued at a future date which will apply to them. In the meantime, existing project progress reporting procedures will remain in effect for grantees operating with Title VII funds.

GRACIELA (GRACE) OLIVAREZ,
Director.

AUTHORITY: Sec. 602, 78 Stat. 530 (42 U.S.C. 2942).

45 CFR Part 1050 is amended by adding a new subpart as follows:

Sec.

1050.80-1 Applicability.
1050.80.2 Standard.
1050.80-2 Standard.
1050.80-3 CSA Implementing policies and procedures.

§ 1050.80-1 Applicability.

This subpart applies to all grants made to public and private organizations/agencies under Titles II and III-B of the Economic Opportunity Act of 1964, as amended when such assistance is administered by the Community Services Administration.

§ 1050.80-2 Standard.

(a) *Monitoring responsibilities (grantee).* (1) Grantees shall monitor their performance under grants and other agreements and, where appropriate, ensure that time schedules are being met, projected work units by time periods are being accomplished, and other performance goals are being achieved. This review shall be made for each project, function, or activity of each agreement as set forth in the approved application or awarded document.

(2) Grantees shall submit a performance report for each agreement that briefly presents the following information for each project, function, or activity involved as prescribed by CSA.

(i) A comparison of actual accomplishments with the goals established for the period, the findings of the investigator or both. If the output of programs or projects can be readily quantified, such quantitative data should be related to cost data for computation of unit costs.

(ii) Reasons why established goals were not met.

(iii) Other pertinent information including, where appropriate, analysis and explanation of cost overruns of high unit costs.

(3) (NOTE.—See CSA's implementing regulations (§ 1050.80-3) for further details.)

(b) *Submission of Performance Reports.* (1) The Uniform Federal Standards require, except as provided in paragraph (b)(1)(i), (ii), and (iii), of this section, that grantees shall submit performance reports to CSA covering the same reporting period as the Financial Status Report. CSA will require that performance reports be submitted to cover the same period as the financial reports but with less frequency. (See § 1050.80-3 for frequency of reports and reporting dates.) CSA will also require a final performance report for grants with a fixed termination date. However, neither CSA nor any other Federal sponsoring agency may require reports more frequently than quarterly or less frequently than annually.

(2) CSA may waive the requirement that performance reports be submitted with the financial reports under the following circumstances:

(i) When the grantee is required to submit a performance report with a continuation or renewal application.

(ii) When CSA determines that on-site technical assistance and certified completion data will be sufficient to evaluate construction projects.

(iii) When CSA finds it necessary to get an annual progress report on a calendar basis although its usual submission requirements are based on the grantee's program year or other funding period.

(c) *Special reporting requirements (Grantee).* (1) Between the required performance reporting dates, events may occur that have significant impact upon the project or program. In such instances, the grantee shall inform the appropriate CSA administering office by letter as soon as the following types of conditions become known;

(i) Problems, delays or adverse conditions that will materially affect the ability to attain program objectives, prevent the meeting of time schedules and goals, or preclude the attainment of project work units by established time periods. This disclosure shall be accompanied by a statement of the action taken, or contemplated, and any Federal assistance needed to resolve the situation.

(ii) Favorable development or events that enable time schedules to be met sooner than anticipated or more work units to be produced than originally projected.

(2) If any performance review conducted by the grantee discloses the need for change in the budget estimates in accordance with the criteria established in 1050.100 (CSA Inst. 6800-11) the grantee shall submit a request for budget revision.

(d) *On-Site Review (CSA).* CSA will make site visits as frequently as practicable to:

(1) Review program accomplishments and management control systems; and

(2) Provide such technical assistance as may be needed.

§ 1050.80-3 CSA implementing policies and procedures.

(a) *Policy.* (1) CSA would like to see its grantees established as independent, self-reliant and viable institutions within their communities. At the same time it recognizes a need for strengthening the accountability of grantees both to their communities and to CSA as the funding agency.

(2) CSA believes that regular internal self-assessments of project progress conducted by or under the direction of the grantee board or governing officials are essential to the effective operation of community-based anti-poverty programming and requires that grantees report the results of such self-assessments to the appropriate CSA Administering Office. (See paragraph (c) of this section.)

(b) *What is a Project Progress Review?* (1) A Project Progress Review (PPR) is the last link in closing the circle which includes planning, grant application, and implementation. A Project Progress Review requires that a grantee look both to the past and to the future—to the past to the conditions which existed before applying for CSA funds, what the board said it was going to do in the application for funds in order to deal with those conditions, and what has been done; and to the future to determine how the information gathered in the Review and the conclusions reached can be used to revise the goals for the remainder of the Program Year if necessary and/or affect the work program for the coming Program Year(s).

(2) *Definition.* A Project Progress Review (PPR) is a process carried out by a grantee in order to determine:

(i) What has been accomplished in meeting the locally set goals as shown in the grantee's work program;

V42169 AUG 31 77 UMI

(ii) The extent to which the grantee is achieving the broad purposes of community action as set forth in the Economic Opportunity Act and, for CAAs, the "Mission of the Community Action Agency";

(iii) The extent to which the grantee is meeting the general and specific standards of effectiveness described in CSA Instruction 7850-1a; and

(iv) How efficiently grantee planning, project management and overall administration is carried out in addressing the problems of poverty.

(3) What a PPR System Should Contain. (i) The grantee Board of Directors or Governing Officials should assure that the grantee has developed a project review system that contains, at a minimum, the following:

(A) A clear statement of the roles of all participants in the Review process, i.e. the Board itself (or governing officials, where appropriate), the executive director, other grantee staff, policy advisory committee(s), target area residents, and the community-at-large;

(B) The assignment of responsibilities and allocation of resources for designing the Review, gathering the information and analyzing it, developing the final report(s), and deciding how the findings will be used in making decisions;

(C) An adequate system for routinely collecting data which can be useful in the Reviews;

(D) A description of how the findings and recommendations from the reviews will be used in making or planning changes to on-going or future projects and to improve the management of these projects and the agency as a whole; and

(E) A schedule for holding regular Project Progress Reviews and special reviews of issues and projects that are or have become a priority in the Community.

(ii) Board members should activeiy participate in each Project Progress Review. In addition, the poor must also be involved in all phases including the preparation and review of the PPR reports. (See OEO Instruction 6005-1.)

(c) *How and when to submit reports*—(1) *Reporting Format.* (i) Grantees will prepare reports using CSA Form 440. (See Attachment A.) Each PPR report will provide an analysis of accomplishments in relation to each goal on the grantee's currently approved work program and will detail problems, planned changes and training and technical assistance needs. In addition, effectiveness of each goal will be assessed by relating the progress made toward achieving the goal to the appropriate Standard(s) of Effectiveness.

(ii) Grantees funded under Section 232 may be requested by the Administering Office to prepare a report in narrative form instead of using CSA Form 440. In such cases the requirement will be stated in the Special Conditions attached to the grant. These Conditions will also detail the information required which will include, at a minimum, a comparison of actual accomplishments with goals of the work program and an assessment of effectiveness.

(2) *Frequency*—(i) *Submission dates.* (A) Except as indicated in paragraph (c) (2) (ii) and (iii) of this section each grantee is responsible for submitting to the appropriate CSA Administering Office a semi-annual and an annual Project Progress Report. Reports will be submitted 30 working days following the end of the second and fourth quarters of the grantee's Program Year of Program Account 01. (If not funded for PA 01, grantee should use its highest funded Program Account as a reference point for submission of PPR reports.)

(B) Administering Offices and grantee officials may jointly agree in writing, to adjustments in the above reporting dates where this will make local progress reviews more meaningful and supportive of the mutual program direction and review objectives of the grantee and administering office. Also the administering office may reduce the frequency of reporting. However, except at the request of the grantee, the period covered by the PPR must always conform to that covered by the financial reports.

(ii) *Grants with termination dates.* If a grant has a termination date, the grantee also is responsible for filing a final Project Progress Report, within 90 calendar days following the termination date.

(iii) *Special requirements.* There may be instances where more frequent reporting will be required, e.g. in the cases of developmental grants; when the grantee has a history of poor performance; etc. In these instances the funding office may require, as a condition of the grant, that Project Progress Reports be filed on a quarterly basis. However, in keeping with the Standards, reporting can not be required more frequently than quarterly unless an exception is obtained by CSA (Headquarters) from OMB. It should be noted that more frequent reporting is not intended to be imposed routinely but rather on an exception basis such as when the aforementioned circumstances exist.

(3) *Number of Copies.* One copy of the report is to be sent to the appropriate CSA Administering Office. (Grantees receiving grants which are administered by both a Regional Office and a Headquarters Program Office will send a copy of the PPR to each.) Additionally, grantees receiving funds under Sections 221 and 222(a) of the Act shall send one copy to the appropriate SEOO for information.

(4) *Availability of CSA Form 440.* Supplies of CSA Form 440 may be ordered from:

CSA Distribution Center, 49 "L" Street SE., Washington, D.C. 20003.

Reserved for OMB Approval

DATE SUBMITTED

NAME OF GRANTEE

GRANTEE NO.

PROGRAM ACCOUNT | PROJECT TITLE: Information, Referral and Follow-up

PROJECT GOAL --To provide outreach, referral and follow-up services to 650 low-income target area residents using neighborhood center staff, Policy Advisory Committees and minimum of 25 volunteers.

STANDARD(S) OF EFFECTIVENESS (No.) A-II, III, IV, V

1. ACCOMPLISHMENTS

A. MEASURABLE --During this period, 30 volunteers assisted CAA in performing outreach and home visitations. Overall, information on community programs was given directly to 500 residents; 350 were referred to other organizations for assistance; follow-up was conducted on 200 of these.

B. NON-QUANTIFIABLE --The County Department of Human Services has formally requested the CAA to perform outreach for Title XX, Community Development and Food Stamp programs. CAA is doing preliminary eligibility screening for these programs to speed up processing. County-wide computerized I&R system is being considered by County Commission.

2. PROBLEMS

Low attendance at Policy Advisory Committee meetings. No quorum for three of last four meetings. Three PAC positions are vacant. Follow-ups hampered by (a) inadequate record-keeping in two centers and (b) lack of travel funds.

3. PLANNED CHANGES *

Elections will be held early next month to fill vacant PAC positions. After this SEOO will conduct training for PAC members on their roles and responsibilities. Recordkeeping system is being computerized to facilitate client "tracking." Budget is being revised to allocate more funds to travel.

4. TRAINING & TECHNICAL ASSISTANCE NEEDS *.

Outreach supervisors need training in planning center activities. PAC members need motivation; contact with Federal officials would help.

5. ASSESSMENT OF EFFECTIVENESS

Service delivery remains generally efficient (Standard A- II,) but lack of participation by low-income (Std A-III) causes concern. Greater involvement of volunteers (Stds A-IV and A-V) has improved CAA's "image" in community.

* Do not complete when filing final report or in annual reports for individual projects which will not be refunded.

CERTIFICATION

The undersigned certifies that this report has been completed in accordance with applicable instructions; that it is true to the best of his/her knowledge, information and belief; and that it has been approved, or reviewed and approved, as indicated in Item 6, below.

INSTRUCTIONS FOR COMPLETING CSA FORM 440

There should be a brief report for each project goal listed on the approved CSA Form(s) 419. Therefore, there should be a separate CSA Form 440 for each goal. (Note: The annual report also should give a separate summary for the entire program year for the project as a whole in addition to progress toward each goal. In this case, mark SUMMARY in the Project Goal box.)

In addressing topics 1 through 5 on the Form 440, the following information should be included for each goal:

ITEM

1. *Accomplishments:*

a. Measurable.—Describe achievements in relation to approved goals in measurable terms; include unanticipated benefits to community or target groups,

b. Nonquantifiable.—Give brief description on nonquantifiable accomplishments.

2. *Problems.*—Reasons for failure to reach project goals.

3. *Planned Changes.*[1]—Indication of planning or project management changes scheduled as a result of PPR analysis.

4. *Training and Technical Assistance Needs.*[1]—Description of assistance needed from CSA or other sources.

5. *Assessment of Effectiveness.*—Assessment of grantee status with respect to general and or specific standards of effectiveness applicable to this goal. Appraise effectiveness in light of costs and other uses of resources.

6-10. (Certification section).—Complete this section on page 1 only of your report.

Title 47—Telecommunication

CHAPTER I—FEDERAL COMMUNICATIONS COMMISSION

[FCC 77-578]

PART 0—COMMISSION ORGANIZATION

Reorganization of the Office of General Counsel

AGENCY: Federal Communications Commission.

ACTION: Order.

SUMMARY: Part O of the Commission's Rules and Regulations pertaining to the Office of the General Counsel amended to transfer from the Litigation and Enforcement Division to the Legal Research and Treaty Division the responsibility for representation of the Commission before the District Courts of the United States. At the same time the Legal Research and Treaty Division is renamed the Research and Trial Division, and the Litigation and Enforcement Division is renamed Litigation Division.

EFFECTIVE DATE: September 9, 1977.

ADDRESSES: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT:

Mr. Bernard I. Kahn, Management Systems Division, 632-7513.

SUPPLEMENTARY INFORMATION:

Adopted: August 22, 1977.

Released: August 30, 1977.

Order. In the matter of amendment of Part O rules and regulations.

1. The Commission has before it for consideration proposed amendments and an addition to § 0.42, involving the units of the Office of General Counsel, and §§ 0.43, 0.44, 0.46 and 0.47 respecting the functions and responsibilities of the Immediate Office of the General Counsel, the Litigation and Enforcement Division, the Legal Research and Treaty Division, the Administrative Rules and Procedure Division, and the addition of Section 0.48, establishing the Public Access Divislon.

2. In order to promote efficiency and a more cohesive alignment of the functions within the Office of General Counsel, the Commission is hereby transferring certain duties among three of the divisions of said Office involving principally the enforcement and defense of Commission actions, responsibility for the representation of the Commission before the district courts of the United States and matters arising under the Freedom of Information Act, the Privacy Act and the Government in the Sunshine Act all as more particularly described in the Appendix attached hereto. The internal handling of these matters will in part be handled by the Public Access Division.

3. *Accordingly, it is ordered,* That §§ 0.43, 0.44, 0.46 and 0.47 of the rules and regulations involving the functions of the Litigation and Enforcement Division, the Legal Research and Treaty Division and the Administrative Rules and Procedure Division are hereby amended as set forth in the Appendix attached hereto and made a part hereof. As a consequence of our action herein, the Litigation and Enforcement Division is hereby renamed the Litigation Division and the Legal Research and Treaty Division is likewise renamed the Research and Trial Division. Section 0.42 is also revised to reflect the amendments adopted herein.

4. *It is further ordered,* That § 0.48 be added to the rules and regulations to state the functions assigned to the new Public Access Division, as listed below and made a part hereof.

5. *It is further ordered,* That the amendments herein adopted are issued pursuant to sections (4)(i), 5(b), and 303(r) of the Communications Act of 1934, as amended, effective September 9, 1977.

6. Since the amendments adopted herein concern Commission organization, they are not subject to the notice and effective date requirements of 5 U.S.C. 553.

(Secs. 4, 5, 303, 48 Stat., as amended, 1066, 1068, 1082 (47 U.S.C. 154, 155, 303).)

FEDERAL COMMUNICATIONS COMMISSION,
VINCENT J. MULLINS,
Secretary.

Part O of Chapter I of Title 47 of the Code of Federal Regulations is hereby amended to read as follows:

1. Section 0.42 is revised as follows:

§ 0.42 Units in the Office.

The Office of General Counsel is structured into the following units:

(a) Immediate Office of the General Counsel.
(b) Litigation Division.
(c) Legislation Division.
(d) Research and Trial Division.
(e) Administrative Rules and Procedure Division.
(f) Public Access Division.
(g) Equal Employment Opportunity Unit.

2. Section 0.43 is revised as follows:

§ 0.13 Immediate Office of the General Counsel.

The Immediate Office of the General Counsel directs and coordinates the functions of said Office including the assignment and ultimate supervision of all appellate and trial litigation in which the Commission is a party or otherwise possesses a public interest in the question involved.

3. Section 0.44, headnote and text are revised to read as follows:

§ 0.44 Litigation Division.

The Litigation Division has the following duties and responsibilities:

(a) To advise and represent the Commission in all appellate proceedings, including actions before the Supreme Court of the United States, in which the Commission is a party or otherwise possesses a public interest in the question involved, including such other trial litigation as the General Counsel may, from time to time, assign.

(b) To advise the Commission as to any legal questions involved in proposed actions and policies in the light of past and pending appellate or trial litigation, and to coordinate research in legal matters as may be directed by the General Counsel.

4. Section 0.46, headnote and text are revised to read as follows:

§ 0.46 Research and Trial Division.

The Research and Trial Division has the following duties and responsibilities:

(a) To conduct research in legal matters and prepare legal memoranda as may be directed by the General Counsel.

(b) To advise and represent the Commission in all actions and proceedings commenced in the district courts of the United States in which the Commission is a party or otherwise possesses an interest in the question involved, except as the General Counsel may, from time to time, otherwise direct.

(c) To participate in international conferences and in the implementation of international agreements, and to interpret international agreements and international regulations affecting the Commission.

(d) To cooperate and consult with the Common Carrier Bureau and the Office of Chief Engineer on matters regarding satellite and international communications.

(e) To perform any additional functions assigned to it by the General Counsel.

5. In § 0.47, paragraphs (a), (c) and (g) are amended and (f) is added to read as follows:

§ 0.47 Administrative Rules and Procedure Division.

The Administrative Rules and Procedure Division has the following duties and responsibilities:

(a) To prepare and coordinate recommendations concerning rules of general procedural applicability, and to maintain liaison with Government agencies and private organizations concerned with improving the Commission's procedures.

(b) To interpret statutes and executive orders affecting the Commission's national defense responsibilities, and to perform the functions of the Office of General Counsel involving implementation of such statutes and executive orders.

(c) To perform all legal functions involved in administering and enforcing the rules and regulations of the Commission pertaining to the Experimental Radio Service (Part 5 of this chapter), Radio Frequency Devices (Part 15 of this chapter), the Industrial, Scientific, and Medical Service (Part 18 of this chapter), and type approval and type acceptance of radio equipment, including educational functions directed toward obtaining voluntary compliance with the provisions of Parts 15 and 18 of this chapter.

(d) To perform all legal functions with respect to leases, contracts, tort claims and such other internal legal problems as may arise.

(e) To prepare the bound volumes of the FCC Reports.

(f) To coordinate all rule making matters and proceedings which affect more than one Bureau.

(g) In cooperating with the Office of Chief Engineer, to participate in general frequency allocation proceedings affecting more than one Bureau.

(h) To perform any additional functions assigned to it by the General Counsel.

6. Section 0.48 is added as follows:

§ 0.43 Public Access Division.

The Public Access Division has the following duties and responsibilities for all matters arising under the administration of the Freedom of Information, Privacy and Sunshine Acts:

(a) To serve as principal adviser to the General Counsel and the Commission in the implementation and administration of the Freedom of Information, Privacy and Sunshine Acts.

(b) To provide legal guidance and assistance to the Executive Director, in formulating agency policy on the administration of the Freedom of Information and Privacy Acts. Prepare interpretations of the Acts, Commission rules implementing the Acts and decisions affecting them by other Government agencies and the Federal Courts.

(c) To advise Bureaus/Offices in their preparation of responses to initial requests under the Freedom of Information and Privacy Acts. Provide legal advice to the General Counsel concerning the approval of all initial OIA denials and assure that actions are consistent with the statute and Commission's rules.

(d) To provide legal advice to Bureaus/Offices relative to whether a Commission meeting should be open or closed. Advise the General Counsel on the legal basis of all requests for closing meetings.

(e) To provide legal advice to the Consumer Assistance Office concerning various aspects of Commission's programs.

PART 73—RADIO BROADCAST SERVICES

FM Broadcast Station in Yakutat, Alaska; Changes made in Table of Assignments

AGENCY: Federal Communications Commission.

ACTION: Memorandum Opinion and Order.

SUMMARY: Action herein grants petition for reconsideration, in which Lakeside Broadcasting Inc., requests consideration of the Commission's Report and Order denying the assignment of a first Class A FM assignment to Yakutat, Alaska. Commission states that since Lakeside Broadcasting, Inc., has now furnished the documents regarding establishment of the corporation to operate an educational station there is no reason for refusing to grant the assignment to Yakutat.

EFFECTIVE DATE: October 11, 1977.

ADDRESSES: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT:

Mildred B. Nesterak, Broadcast Bureau, 202-632-7792.

SUPPLEMENTARY INFORMATION:

MEMORANDUM OPINION AND ORDER—PROCEEDING TERMINATED

Adopted: August 24, 1977.

Released: August 26, 1977.

In the matter of amendment of § 73.202(b), Table of Assignments, FM Broadcast Stations. (McConnelsville, Ohio: St. Marys, West Virginia; Boulder City, Nevada; Canadian, Texas; *Yakutat, Alaska,* Docket No. 21118, RM-2794, RM-2795, RM-2804, RM-2805, *RM-2807.*

1. The Commission here considers a Petition for Reconsideration submitted by Lakeside Broadcasting, Inc., ("petitioner") requesting reconsideration of the Report and Order[1] in Docket No. 21118 which denied the requested assignment of FM Channel 280A to Yakutat, Alaska.

2. The Yakutat portion of this proceeding was initiated on a petition for rule making filed by Lakeside Broadcasting, Inc., in which it sought the assignment of Channel 280A to Yakutat, Alaska, as a first FM assignment. Petitioner stated it intended to apply for an FM 10-watt educational[2] station. In the Notice,[3] the petitioner was requested to provide information regarding its eligibility as an educational entity or to state its willingness to operate with minimum power for a Class A commercial FM station. However, the petitioner failed to furnish the requested information, and it was on this basis that the petition was denied. Although the petition for reconsideration provides no basis indicating that the Commission was in error in denying the proposed assignment, the needed information has now been submitted, and we see no reason to refuse making the assignment. Petitioner has now furnished the Commission with copies of its Articles of Incorporation and by-laws which indicated that the corporation was established to operate an educational station. However, any judgment about whether Lakeside is in fact eligible for an educational authorization can only be made after review of its application for such a station.

3. We believe that the public interest would be served by the assignment of Channel 280A to Yakutat, Alaska, since it would provide for a first local aural broadcast service to the community, and there is a demand for its use. In view of the petitioner's continued interest in an FM station, we will, therefore, assign Channel 280A to Yakutat, Alaska.

4. The Canadian Government has given its concurrence to the proposed assignment to Yakutat, Alaska.

5. *Accordingly, it is ordered,* That effective October 11, 1977, the FM Table of Assignments (§ 73.202(b)) of the Commission's rules is amended as to the named community to read as follows:

City:	*Channel No.*
Yakutat, Alaska	280A

6. *It is further ordered,* That the Petition for Reconsideration filed by Lakeside Broadcasting, Inc., is granted.

7. Authority for the action taken herein is found in sections 4(i), 5(d)(1), 303 (g) and (r), and 307(b) of the Communications Act of 1934 as amended, and § 0.281 of the Commission's rules.

8. *It is further ordered,* That this proceeding is terminated.

---

[1] Do not complete when filing final or annual reports for individual projects which will not be continued or renewed in the next Program Year.

[1] FM Channel Assignments, *Yakutat, Alaska,* 42 FR 29011.

[2] In Alaska there are no reserved educational FM channels.

[Docket No. 20550; FCC 77-582]

PART 73—RADIO BROADCAST SERVICES

Nondiscrimination in Employment Policies and Practices of Broadcast Licensees

AGENCY: Federal Communications Commission.

ACTION: Final Order.

SUMMARY: The exemption of broadcast stations with ten or less employees from the Commission's equal employment opportunity reporting requirements is rescinded, and the Commission's rules are amended to require the filing of that information by all stations with five or more employees. In adopting EEO rules in 1970, the Commission exempted stations with less than five employees from the reporting requirements imposed. In 1976 the Commission adopted more detailed reporting requirements, but determined that all stations with ten or less employees would be exempt. On appeal, the Court decided that the ten or less exemption was unreasonable. The Commission is therefore returning to the less than five exemption. All broadcasters with five or more full-time employees will therefore be required to file EEO reports.

EFFECTIVE DATE: August 31, 1977.

ADDRESSES: Federal Communications Commission, 1919 M Street NW., Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT:

Martin Blumenthal, Broadcast Bureau (202-632-7542).

SUPPLEMENTARY INFORMATION:

SECOND REPORT AND ORDER

Adopted: August 19, 1977.

Released: August 31, 1977.

In the matter of: nondiscrimination in the employment policies and practices of broadcast licensees, Docket No. 20550.

1. The Commission has before it for consideration its "Report and Order" in Docket No. 20550, "Nondiscrimination in the Employment Policies and Practices of Broadcast Licensees," 60 FCC 2d 618 (1976), together with a decision of the United States Court of Appeals for the Second Circuit in "Office of Communications of the United Church of Christ, et al v. FCC," Case Number 76-4187, decided August 5, 1977.

2. The "Report and Order" established new guidelines for the preparation of written equal employment opportunity programs to be filed by broadcast renewal and other applicants. In adopting the "Model Equal Employment Opportunity Program," the Commission also revisited the exemption, based upon the number of full-time employees, from filing written equal employment opportunity programs. In 1970, we exempted those licensees employing fewer than five full-time employees from filing a written program. "Nondiscrimination in Employment Practices of Broadcast Licensees," 23 FCC 2d 430 (1970). In Docket No. 20550 we determined that the exemption to the new, more detailed renewal reporting requirements should be extended to all stations with ten or less employees because: (1) Commission resources had proven inadequate to administer the previous standards, and, with the submission of more detailed information, the new exemption would make enforcement efforts more efficient; (2) stations with ten or less employees generally did not have formal personnel procedures calling into question the utility of formal EEO reporting and statistics for such stations are not reliable because of the small numbers involved; (3) where EEO programs would serve such a little purpose, they are not justified by the burden on the licensee; and (4) the great majority of employees in the broadcast industry remain covered by the Commission's new reporting requirement.

3. The Court, in "Office of Communications of the United Church of Christ, et al, v. FCC," supra, found that the enlarged exemption was not adequately justified by the Commission, and set aside the "Report and Order," only insofar as the exemption is concerned. In so doing, with particular regard to the burden on smaller licensees and the effectiveness of programs at stations with between five and ten employees, the Court noted that the Commission's policies permit variations in the comprehensiveness of EEO programs according to the size and location of the station, but the submission of written programs by such stations would enable them to focus upon the best method of assuring effective EEO procedures in terms of their individual situations. The decision concluded that: "* * * No matter how informal a station's procedures, the requirement that it periodically think about its EEO efforts seems wholly reasonable * * *" Therefore, the Court set aside our Order in Docket No. 20550 only "* * * insofar as it alters the threshold for stations large enough to be required to submit EEO programs."[1]

4. In accord with the decision of the Court in "Office of Communications of the United Church of Christ, et al. v. FCC," supra, the ten (10) or fewer full-time employee exemption set forth in our "Report and Order" in Docket No. 20550[2] To this end, §§ 73.125, 73.301, 73.599, 73.680 and 73.793 of the Commission's rules will be amended to reflect this change, effective the release date of this Order.[3] In addition, the EEO sections of our various broadcast application forms—FCC Forms 301, 303, 303-R, 309, 311, 314, 315, 340 and 342—will subsequently be modified in accordance with the revised threshold for submission of written EEO programs.

5. *Accordingly, it is ordered*, That §§ 73.125, 73.301, 73.599, 73.680, and 73.793 of the rules of the Federal Communications Commission are amended as set forth below, in accordance with the Order of the Court in "Office of Communications of the United Church of Christ, et al v. FCC," Case Number 76-4187, decided August 5, 1977, by the United States Court of Appeals for the Second Circuit, effective August 31, 1977.

(Secs. 4, 303, 307, 403, 48 Stat., as amended, 1066, 1082, 1083, 1094 (47 U.S.C. 154, 303, 307, 403).)

FEDERAL COMMUNICATIONS COMMISSION,
VINCENT J. MULLINS,
Secretary.

§§ 73.125, 73.301, 73.595, 73.680 and 73.793 [Amended]

In §§ 73.125, 73.301, 73.599, 73.680 and 73.793, paragraph (c) is revised to read as follows:

§ ------ Equal employment opportunities.

* * * * *

(c) Applicants for a construction permit for a new facility, for assignment of license or construction permit or for transfer of control (other than pro forma or involuntary assignments and transfers), and applicants for renewal of license who have not previously done so, shall file with the Commission programs designed to provide equal employment opportunities for Negroes, Orientals, American Indians, Spanish-surnamed Americans, and women, or amendments to such programs. Guidelines for the preparation of such programs are set forth in the Commission's "Report and Order, Nondiscrimination in the Employment Policies and Practices of Broadcast Licensees," 60 FCC 2d 618 (1976). A program need not be filed by any station having less than five full-time employees or with respect to any minority group which is represented in

[1] In this regard, the Court noted that the Commission's decision concerning the information requirements of the new model program was reasonable.

[2] The next group of licensees to file for renewal after the date of the Court's Order are those located in Washington, Oregon, Alaska, Hawaii, and Guam. Those renewal applications are due October 1, 1977.

[3] The rule change thus reflected does not require a formal notice and rulemaking procedure pursuant to Section 553 of the Administrative Procedure Act (5 U.S.C. 553). The Court vacated the "ten or less" exemption adopted in 1976, thereby returning to the "under five" exemption adopted in 1970. The action taken herein is therefore purely ministerial, conforming the written rules to the mandate of the Court. See 47 U.S.C. 402 (h). Accordingly, a formal rulemaking is unnecessary.

such insignificant numbers in the area that a program would not be meaningful. In the latter situation, a statement of explanation should be filed.

[FR Doc.77-25384 Filed 8-30-77;8:45 am]

[Docket No. 21260; RM-2860]

PART 73—RADIO BROADCAST SERVICES

FM Broadcast Station in Hoisington, Kans.; Changes Made in Table of Assignments

AGENCY: Federal Communications Commission.

ACTION: Report and order.

SUMMARY: Action herein assigns first Class A FM channel to Hoisington, Kansas. Petitioners, Paul F. Kelly, David C. Hollis, and Elmer H. Davis, state that the assignment will provide Hoisington with its first local broadcast service.

EFFECTIVE DATE: October 11, 1977.

ADDRESSES: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT:

Mildred B. Nesterak, Broadcast Bureau, 202-632-7792.

SUPPLEMENTARY INFORMATION:

REPORT AND ORDER—PROCEEDING TERMINATED

Adopted: August 24, 1977.

Released: August 26, 1977.

In the matter of amendment of § 73.202(b), Table of Assignments, FM Broadcast Stations. (Hoisington, Kansas), Docket No. 21260, RM-2860.

1. The Commission has under consideration the Notice of Proposed Rulemaking, adopted May 25, 1977, 42 FR 29027, proposing the assignment of Channel 265A to Hoisington, Kansas, as a first FM assignment to that community. The Notice was issued in response to a petition filed by Paul F. Kelly, David C. Hollis and Elmer H. Davis ("petitioners"). Petitioners reiterated their intention to apply for a station if the channel is assigned and to promptly construct a station if authority is granted. No oppositions to the petition were filed.

2. Hoisington (pop. 3,710), situated in Barton County (pop. 30,663),[1] is located approximately 161 kilometers (100 miles) northwest of Wichita, Kansas. There is no local broadcast service in Hoisington.

3. In support of their proposal, petitioners submitted information with respect to Hoisington which is persuasive as to its need for a first FM channel assignment.

4. Upon careful consideration of the proposal herein, the Commission believes it would be in the public interest to assign Channel 265A to Hoisington, Kansas. A demand has been shown for its use and it would provide the community with a first local aural broadcast service. It can be made without affecting any existing assignment and would be consistent with the applicable minimum spacing requirements.

5. Authority for the adoption of the amendment contained herein appears in sections 4(i), 5(d)(1), 303 (g) and (r), and 307(b) of the Communications Act of 1934, as amended, and § 0.281 of the Commission's rules.

6. In view of the foregoing: *It is ordered*, That effective October 11, 1977, § 73.202(b) of the Commission's rules, the FM Table of Assignments, as regards Hoisington, Kansas, is amended to read as follows:

City:	Channel No.
Hoisington, Kans.	265A

7. *It is further ordered*, That this proceeding is terminated.

(Secs. 4, 5, 303, 48 Stat., as amended, 1066, 1068, 1082; (47 U.S.C. 154, 155, 303)).

FEDERAL COMMUNICATIONS COMMISSION,
WALLACE E. JOHNSON,
Chief, Broadcast Bureau.

Title 50—Wildlife and Fisheries

CHAPTER I—UNITED STATES FISH AND WILDLIFE SERVICE, DEPARTMENT OF THE INTERIOR

PART 26—PUBLIC ENTRY AND USE

Closing the Charles M. Russell National Wildlife Range and the UL Bend National Wildlife Refuge, Montana, to the Unauthorized Operation of Aircraft at Low Altitudes

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Special regulation.

SUMMARY: The Director has determined that the unauthorized operation of aircraft at low altitudes over the Charles M. Russell National Wildlife Range and the UL Bend National Wildlife Refuge is incompatible with the objectives for which the area was established.

DATES: Year around (September 1, 1977 through August 31, 1978).

FOR FURTHER INFORMATION CONTACT:

Refuge Manager, Charles M. Russell, National Wildlife Range, P.O. Box 110, Lewistown, Montana 59457; telephone: 406-538-8707.

SUPPLEMENTARY INFORMATION:

§ 26.32 Operations of aircraft; over individual wildlife refuge areas.

The unauthorized operation of all aircraft below 1,000 feet above the ground or the landing of aircraft on the Charles M. Russell National Wildlife Range and the UL Bend National Wildlife Refuge is prohibited. The boundaries of these areas are delineated on maps available at the refuge headquarters, Lewistown, Montana, and from the office of the Area Manager, U.S. Fish and Wildlife Service, Federal Building, 316 North 26th Street, Billings, Mont. 59101.

The provisions of this special regulation supplement the regulations which govern restricted or prohibited acts on wildlife refuge areas generally which are set forth in Title 50, Code of Federal Regulations, Part 26. The public is invited to offer suggestions and comments at any time.

NOTE: The U.S. Fish and Wildlife Service has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11949 and OMB Circular A-107.

LARRY L. CALVERT,
Refuge Manager, Charles M. Russell, National Wildlife Range, Lewistown, Montana.

PART 32—HUNTING

Opening of Sand Lake National Wildlife Refuge, South Dakota, to Upland Game Hunting

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Special regulation.

SUMMARY: The Director has determined that the opening to upland game hunting of Sand Lake National Wildlife Refuge is compatible with the objectives for which the area was established, will utilize a renewable natural resource, and will provide additional recreational opportunity to the public.

DATES: December 12, 1977 through December 31, 1977.

FOR FURTHER INFORMATION CONTACT:

Refuge Manager, Sand Lake NWR, Columbia, S. Dak. 57433 (605-885-6320).

SUPPLEMENTARY INFORMATION:

§ 32.22 Special regulations; Upland Game Hunting; for individual wildlife refuge areas.

Upland game hunting is permitted on the Sand Lake National Wildlife Refuge, South Dakota, only on the areas designated by signs as being open to hunting. These areas comprising 20,000 acres are delineated on maps available at the refuge headquarters and from the office of the Regional Director, U.S. Fish and Wildlife Service, PO Box 25486, Denver Federal Center, Denver, Colo. 80225. Upland Game Hunting shall be in accordance with all applicable State regulations subject to the following conditions:

1. The open season for hunting pheasants on the refuge is from December 12, 1977 through December 31, 1977.

2. Hunters will not be allowed to drive on the refuge, but may park their vehicles outside the refuge and hunt on foot.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally which are set forth in Title 50 Code of Federal Regulations, Part 32. The public is invited to offer suggestions and comments at any time.

[1] Population figures are taken from the 1970 U.S. Census.

V42169 AUG 31 77 UMI

NOTE: The U.S. Fish and Wildlife Service has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11949 and OMB Circular A-107.

SAM WALDSTEIN,
Refuge Manager,
Sand Lake National Wildlife Refuge.

PART 32—HUNTING

Opening of Charles M. Russell National Wildlife Range and the UL Bend National Wildlife Refuge, Montana, to Hunting

AGENCY: Fish and Wildlife Service, Interior.

ACTION Special regulation.

SUMMARY: The Director has determined that the opening to hunting of the Charles M. Russell National Wildlife Range and the UL Bend National Wildlife Refuge is compatible with the objectives for which the area was established, will utilize a renewable natural resource, and will provide additional recreational opportunities to the public.

DATES: September 10 through December 31, 1977.

FOR FURTHER INFORMATION CONTACT:

Refuge Manager, Charles M. Russell National Wildlife Range, P.O. Box 110, Lewistown, Mont. 59457; telephone (406-538-8707).

SUPPLEMENTARY INFORMATION:

§ 32.12 Special regulations; migratory game birds; for individual wildlife refuge areas.

The hunting of migratory game birds is permitted on the Charles M. Russell National Wildlife Range and the UL Bend National Wildlife Refuge, Montana, only on the areas designated by signs as open to hunting. These areas comprising approximately 700,000 acres are delineated on maps available at the refuge headquarters in Lewistown, Montana, and from the office of the Area Manager, U.S. Fish and Wildlife Service, Federal Building, 316 North 26th Street, Billings, Montana 59101. All hunting shall be in accordance with all applicable state regulations and the following condition:

1. Vehicle travel is permitted only on designated roads and trails.

The provisions of these special regulations supplement the regulations which govern hunting on wildlife refuge areas generally which are set forth in Title 50, Code of Federal Regulations, Part 32. The public is invited to offer suggestions and comments at any time.

§ 32.22 Special regulations; upland game birds; for individual wildlife refuge areas.

Sage grouse, sharp-tailed grouse, gray partridge, and ring-necked pheasant may be hunted on the Charles M. Russell National Wildlife Range and the UL Bend National Wildlife Refuge in Montana only in those areas designated by signs as open to hunting. These areas comprise approximately 700,000 acres and are delineated on maps available at the refuge headquarters in Lewistown, Montana, and from the office of the Area Manager, U.S. Fish and Wildlife Service, Federal Building, 316 North 26th Street, Billings, MT 59101. Hunting shall be in accordance with all applicable state regulations and subject to the following condition:

1. Vehicle travel is permitted only on designated roads and trails.

The provisions of these special regulations supplement the regulations which govern hunting on wildlife refuge areas generally which are set forth in Title 50, Code of Federal Regulations, Part 32. The public is invited to offer suggestions and comments at any time.

§ 32.32 Special regulations; big game; for individual wildlife refuge areas.

Antlered elk and antlered mule deer may be hunted with firearms on the Charles M. Russell National Wildlife Range and the UL Bend National Wildlife Refuge in accordance with all applicable state regulations. Either sex whitetailed deer may also be hunted in Phillips, Valley, and Garfield Counties. In addition, either sex elk, mule deer, and white-tailed deer archery hunting is permitted from September 10, 1977 to October 16, 1977. These areas comprise approximately 750,000 acres and are delineated on maps available at refuge headquarters in Lewistown, Montana, and from the office of the Area Manager, U.S. Fish and Wildlife Service, Federal Building, 316 North 26th Street, Billings, MT 59101. All hunting shall be in accordance with applicable state regulations and will be subject to the following condition:

1. Vehicle travel is permitted only on designated roads and trails and all off-road vehicle traffic is prohibited; including the retrieval of downed game.

The provisions of these special regulations supplement the regulations which govern hunting on wildlife refuge areas generally which are set forth in Title 50, Code of Federal Regulations, Part 32. The public is invited to offer suggestions and comments at any time.

NOTE: The U.S. Fish and Wildlife Service has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11949 and OMB Circular A-107.

LARRY L. CALVERT,
Refuge Manager, Charles M. Russell National Wildlife Range, Lewistown, Montana.

PART 32—HUNTING

Opening of Sand Lake National Wildlife Refuge, South Dakota, to Migratory Game Bird Hunting

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Special regulation.

SUMMARY: The director has determined that the opening to migratory game bird hunting of Sand Lake National Wildlife Refuge is compatible with the objectives for which the area was established, will utilize a renewable natural resource, and will provide additional recreational opportunity to the public.

DATES: October 1, 1977 through December 11, 1977.

FOR FURTHER INFORMATION CONTACT:

Refuge Manager, Sand Lake NWR, Columbia, SD, 605-885-6320.

SUPPLEMENTARY INFORMATION:

§ 32.12 Special regulations; migratory birds; for individual wildlife refuge areas.

Migratory game bird hunting is permitted on the Sand Lake National Wildlife Refuge, South Dakota, only on the areas designated by signs as being open to hunting. These areas comprising 275 acres are delineated on maps available at the refuge headquarters and from the office of the Regional Director, U.S. Fish and Wildlife Service, P.O. Box 25486, Denver Federal Center, Denver, Colo. 80225. Migratory game bird hunting shall be in accordance with all applicable State regulations subject to the following conditions:

1. The open season for hunting geese on the refuge is from October 1, 1977 through December 11, 1977.

2. The open season for hunting ducks and coots on the refuge is from October 8, 1977 through November 13, 1977 and from November 19, 1977 through December 6, 1977.

3. Hunting will be from established blinds only, without cost, with each site restricted to no more than two hunters, on a first come, first served basis. Blind sites and their use are more specifically described on a map and a list of regulations available at Refuge Headquarters and at each of the hunting sites.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally which are set forth in Title 50 Code of Federal Regulations, Part 32. The public is invited to offer suggestions and comments at any time.

NOTE.—The U.S. Fish and Wildlife Service has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11949 and OMB Circular A-107.

PART 32—HUNTING

Opening of Sand Lake National Wildlife Refuge, S. Dak., to Big Game Hunting

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Special Regulation.

SUMMARY: The Director has determined that the opening to big game hunting of Sand Lake National Wildlife Refuge is compatible with the objectives for which the area was established, will utilize a renewable natural resource, and will provide additional recreational opportunity to the public.

DATES: November 1, 1977 through December 31, 1977.

FOR FURTHER INFORMATION CONTACT:

Refuge Manager, Sand Lake NWR, Columbia, SD 57433 (605-885-6320).

SUPPLEMENTARY INFORMATION:

§ 32.32 Special regulations; big game hunting; for individual wildlife refuge areas.

Big game hunting is permitted on the Sand Lake National Wildlife Refuge, S. Dak., only on the areas designated by signs as being open to hunting. These areas comprising 20,000 acres are delineated on maps available at the refuge headquarters and from the office of the Regional Director, U.S. Fish and Wildlife Service, PO Box 25486, Denver Federal Center, Denver, Colo. 80225. Big game hunting shall be in accordance with all applicable State regulations subject to the following conditions:

1. The open seasons for hunting deer on the refuge are:

a. Archery season—November 1, 1977 through November 18, 1977 and December 12, 1977 through December 31, 1977.

b. Firearms season:

(1) Muzzle loading rifles—November 19, 1977 through November 25, 1977.

(2) Rifle and other legal firearms—November 26, 1977 through November 29, 1977, November 30, 1977 through December 4, 1977 and December 5, 1977 through December 11, 1977.

2. All hunters must exhibit their hunting license, deer tag and vehicle contents to Federal and State Officers upon request.

3. Hunters are allowed to drive in the refuge only at times designated by the refuge manager. A list of the regulations is available at Refuge Headquarters.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally which are set forth in Title 50 Code of Federal Regulations, Part 32. The public is invited to offer suggestions and comments at any time.

NOTE.—The U.S. Fish and Wildlife Service has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11949 and OMB Circular A-107.

PART 32—HUNTING

Opening of Tamarac National Wildlife Refuge, Minn., to Resident Game Hunting

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Special Regulation.

SUMMARY: The Director has determined that the opening of Tamarac National Wildlife Refuge to resident game hunting is compatible with the objectives for which the area was established, will utilize a renewable natural resource, and will provide recreational opportunity to the public.

DATES: Ruffed grouse—September 17 through December 31, 1977. Rabbits and hares—September 17, 1977, through February 28, 1978. Gray and fox squirrels—September 17 through December 31, 1977. White-tailed deer—November 5 through November 20, 1977.

FOR FURTHER INFORMATION CONTACT:

Omer N. Swenson, Refuge Manager, Tamarac National Wildlife Refuge, Rochert, Minn. 56578; telephone No. 218–847–4355.

SUPPLEMENTARY INFORMATION:

§ 32.22 Special regulations; upland game; for individual wildlife refuge areas.

Public hunting of ruffed grouse, gray and fox squirrels, cottontail, jack rabbit and snowshoe hare on the Tamarac National Wildlife Refuge, Rochert, Minn., is permitted in the area designated by signs as public hunting area. This area comprising 12,500 acres is delineated on maps available at the Refuge Headquarters and from the office of the Regional Director, U.S. Fish and Wildlife Service, Federal Building, Fort Snelling, Twin Cities, Minn. 55111.

An additional area of 18,000 acres will be open for public hunting of ruffed grouse only. This ruffed greuse only area is delineated on a map available at the Refuge Headquarters and from the office of the Regional Director, U.S. Fish and Wildlife Service, Federal Building, Fort Snelling, Twin Cities, Minn. 55111.

Hunting shall be in accordance with all applicable State regulations during the seasons specified above. The hunting of other upland species as may be authorized by Minnesota State regulations is prohibited.

The following special conditions apply:

1. No person shall trap on Tamarac National Wildlife Refuge without first obtaining such permits as may be required and issued by the Refuge Manager.

2. No person shall, for the purpose of hunting or trapping, enter or leave the refuge except by designated access roads.

3. All hunters and trappers shall comply with further regulations which the Refuge Manager may prescribe.

§ 32.32 Special regulations; big game; for individual wildlife refuge areas.

Public hunting of white-tailed deer with legal firearms on the Tamarac National Wildlife Refuge is permitted over the entire Refuge with exception of those areas posted as "Area Beyond This Sign Closed." The open area includes 40,200 acres. Areas open for deer hunting are delineated on maps available at the Refuge Headquarters and from the office of the Regional Director, U.S. Fish and Wildlife Service, Federal Building, Fort Snelling, Twin Cities, Minn. 55111.

Hunting shall be in accordance with all applicable State regulations subject to the following conditions:

1. No taking of black bear or bow hunting is permitted on any portion of the Refuge.

2. No person shall, for the purpose of hunting, enter or leave the refuge except by designated access roads.

3. All hunters shall comply with further regulations which the Refuge Manager may prescribe.

The provisions of these special regulations supplement the regulations which govern hunting on wildlife areas generally which are set forth in Title 50 Code of Federal Regulations, Part 32. The public is invited to offer suggestions and comments at any time.

NOTE.—The U.S. Fish and Wildlife Service has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11949 and OMB Circular A–107.

Dated: August 23, 1977.

PART 33—SPORT FISHING

Opening of the Charles M. Russell National Wildlife Range and the UL Bend National Wildlife Refuge, Montana, to Sport Fishing

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Special regulation.

SUMMARY: The Director has determined that the opening to sport fishing of the Charles M. Russell National Wildlife Range and the UL Bend National Wildlife Refuge is compatible with the objectives for which the area was established, will utilize a renewable natural resource, and will provide additional recreational opportunity to the public.

DATES: September 1, 1977 through August 31, 1978.

FOR FURTHER INFORMATION CONTACT:

Refuge Manager, Charles M. Russell National Wildlife Range, P.O. Box 110, Lewistown, Montana 59457; telephone 406–538–8707.

SUPPLEMENTARY INFORMATION:

§ 33.5 Special regulations; sport fishing; for individual wildlife refuge areas.

Sport fishing is permitted year-round on all waters of the Missouri River, Musselshell River, and Fort Peck Reservoir within the Charles M. Russell National Wildlife Range and the UL Bend National Wildlife Refuge, Montana. These fishing areas comprise approximately 250,000 acres and are delineated on maps available at the refuge headquarters in Lewistown, Montana, and from the Area Manager, U.S. Fish and Wildlife Service, Federal Building, 316 North 26th Street, Billings, Montana 59101. All sport fishing shall be in accordance with all applicable state regulations and subject to the following regulations:

1. Portable icehouses and other structures expressly used for ice fishing are permitted within the Charles M. Russell National Wildlife Range only from December 1 through March 31 of the following year. These structures must be removed from the Wildlife Range entirely by March 31 each year. In addition, each structure must be labeled with the owner's name and permanent address in a prominent location on an outside sidewall.

Violations of this regulation will be treated under the provisions of Parts 26.18 and 26.22 of Title 50 of the Code of Federal Regulations dealing with unauthorized private structures and abandoned property. Penalties described in Part 27 will be applicable.

The provisions of these special regulations supplement the regulations which govern sport fishing on wildlife refuge areas generally which are set forth in Title 50, Code of Federal Regulations, Part 32. The public is invited to offer suggestions and comments at any time.

NOTE.—The U.S. Fish and Wildlife Service has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11949 and OMB Circular A–107.

Title 49—Transportation

CHAPTER I—FEDERAL RAILROAD ADMINISTRATION, DEPARTMENT OF TRANSPORTATION

[Docket No. RSOR–3, Notice 11]

PART 218—RAILROAD OPERATING RULES

Blue Signal Protection of Workmen

AGENCY: Federal Railroad Administration, DOT.

ACTION: Grant of Petition for Reconsideration: Amendment of rule.

SUMMARY: On January 11, 1977, the Federal Railroad Administration (FRA) issued a final rule amending existing regulations concerning blue signal protection of railroad workmen (42 FR 2318). These amendments were chiefly in response to the Federal Railroad Safety Authorization Act of 1976 (Pub. L. 94–348) which required the Secretary of Transportation to issue regulations within 180 days of the Act's effective date to assure that manually operated switches providing access to tracks on which workmen are working are lined against movement to that track and locked with an effective locking device. The rule provided that a locked derail positioned at least 150 feet from the equipment to be protected could be used as an alternative to the lining and locking of the manually operated switch. Three railroads, the Southern Railway System, the Norfolk and Western Railroad, and the Missouri Pacific Railroad, petitioned requesting that the 150 foot distance at which the derail was to be placed be reduced to 50 feet in locomotive servicing facilities. The FRA has decided to grant this petition, provided that speeds within such facilities are restricted to not more than 5 miles per hour. Additionally, the FRA has decided to make a clarifying amendment to assure that uniform notification procedures are utilized when workmen are performing tasks on both hump-yard tracks and other than hump-yard tracks.

EFFECTIVE DATE: This amendment becomes effective on September 30, 1977.

Principal Program Person: John A. McNally, Office of Safety, Federal Railroad Administration, Washington, D.C. 20590, (202–426–9178).

Principal Attorney: Lawrence I. Wagner, Office of the Chief Counsel, Federal Railroad Administration, Washington, D.C. 20590, (202–426–8836).

SUPPLEMENTARY INFORMATION: The final rule issued by FRA incorporated a provision allowing the use of a locked derail placed at least 150 feet from the equipment on which the workmen are working (42 FR 2321). The 150 foot distance was not included in the notice of proposed rulemaking, but was added to the final rule in response to comments submitted by one of the parties to the

V42169 AUG 31 77 UMI

rule making. The FRA agreed with that party that such a "buffer zone" was necessary in order to assure that the derail accomplished its intended purpose of preventing moving equipment from coming into contact with other equipment being inspected, tested or serviced by railroad workmen.

The petitioners noted that the 150 foot requirement was added in the final rule making subsequent to the close of the comment period so that other parties did not have the opportunity to comment upon that distance or to submit evidence in support of an alternative distance. They further pointed out that the prescribed distance would create a problem in locomotive servicing facilities. These servicing areas are generally located in congested terminals and, therefore, have been designed to minimize the amount of space required. The locking of the entrance switch would result in the loss of the use of a substantial amount of the available capacity of the servicing area thus significantly reducing the efficiency and productivity of locomotive servicing operations. The alternative use of a locked derail does not eliminate this problem if it must be located at least 150 feet from the equipment. The petitioners alleged that in many instances the derail would have to be placed on the other side of the entrance switch in order to comply with the 150 foot requirement because of the shortness of the servicing tracks. The redesign and reconstruction of these tracks, where possible, would be extremely expensive, and in many instances would be impossible because of the lack of available land in these already congested yard and terminal areas. For these reasons, the petitioners requested that the 150 foot distance for location of the derail be reduced to 50 feet within locomotive servicing facilities. They contend that such a distance, given a maximum speed of 5 miles per hour for operations within the facility, will not diminish the safety of such operations.

The FRA has reviewed the petitions and has concluded that the operations within a locomotive servicing area can be addressed separately, provided there is a strict restriction of operating speeds within the area. Where speed is restricted to a maximum of 5 miles per hour, the FRA believes that a "buffer zone" of 50 feet will provide the intended protection for workmen and thus allow for both safe and efficient use of locomotive servicing area tracks.

The FRA has also reviewed several issues that have been raised concerning specific provisions of the existing regulation. These issues prompted the FRA to grant a postponement of the effective date of the amendments to this regulation. This postponement was provided for on June 29, 1977, when the FRA issued a public notice in the FEDERAL REGISTER (42 FR 33037) granting the initial petition for reconsideration filed by the Association of American Railroads.

In reviewing the requests for clarification concerning several provisions, in order to assure a uniform understanding throughout the industry, FRA has determined that a technical amendment is appropriate.

The existing regulation provides for a notification procedure that must be utilized before workmen may perform tasks on, under or between rolling equipment on a track where the switches providing access to that track are remotely controlled. That provision is contained in § 218.27(a)(4). Section 218.27 by its terms is limited to hump-yard tracks. FRA inadvertently failed to include this same notification procedure in the provisions that relate to tracks located in places other than a hump-yard. The provisions relating to other than hump-yard tracks are contained in § 218.25.

Consequently, the FRA has concluded that a clarifying amendment in § 218.25, to provide an identical notification procedure, is the appropriate way to resolve the potential for ambiguity created by the failure to clearly specify notification procedures for both hump-yard and other than hump-yard tracks. A conforming amendment to § 218.29 is, in turn, necessitated by this change to the provisions of § 218.25. This conforming amendment merely reflects the insertion of the notification procedure in the provisions of § 218.25.

One aspect of this amendment relieves railroads from the requirement to provide a 150 foot "buffer zone" because this distance will not be needed since the speed restriction of 5 miles per hour and a "buffer zone" of 50 feet will provide the intended degree of protection. Consequently, the railroads will not experience a significant reduction in the efficiency and productivity in the operation of their locomotive servicing facilities. The other aspect of this amendment serves to clarify the existing regulation by removing a potential ambiguity arising from the structure of the regulatory language. The amendment, therefore, reduces the economic impact of the regulation and is not a major proposal requiring economic impact analysis as prescribed in Executive Orders 11821 and 11949. In addition, the impact of the amendment is considered to be so minimal that this rule making action does not warrant a cost-benefit analysis under the Secretary's Policies to Improve Analysis and Review of Regulations (41 FR 16200) and is not considered to be a major Federal action significantly affecting the quality of the human environment.

In light of the foregoing, Part 218 of Title 49 of the Code of Federal Regulations is amended as follows:

1. By revising paragraph (a) of § 218.25 to read as follows; and by adding a new paragraph (e)(4) to read as follows:

§ 218.25 Workmen on track other than a hump-yard track.

(a) When workmen are on, under, or between rolling equipment on a track other than a hump yard track:

(1) A blue signal must be displayed at each entrance to the track, and each manually operated switch, including any crossover switch, providing access to the track on which equipment is located must be lined against movement to that track and secured by an effective locking device which may not be removed except by the class or craft of workmen performing the work; or

(2) The person in charge of the workmen must have notified the operator of the remotely-controlled switches, of the work to be performed, and have been informed by the operator that each remotely-controlled switch providing access to the track on which equipment is located has been lined against movement to that track and locked as prescribed by § 218.29(a).

* * * * *

(e) * * *

(4) If speed is restricted to not more than 5 miles per hour within the designated locomotive servicing area, a derail capable of restricting access to that portion of a track within the servicing area on which the locomotive is located will fulfill the requirements of a manually operated switch in compliance with paragraphs (1) and (2) of this subsection when positioned at least 50 feet from the end of the locomotive to be protected by the blue signal, when locked in a derailing position with an effective locking device, and when a blue signal is displayed at the derail.

2. By revising paragraph (a) of § 218.29 to read as follows:

§ 218.29 Remotely-controlled switches.

(a) After the operator of the remotely-controlled switches has received the notification required by § 218.25(a)(2) or § 218.27(a)(4), he must line each remotely-controlled switch against movement to that track and apply an effective locking device to the lever, button or other device controlling the switch before he may inform the employee in charge of the work to be performed that protection has been provided.

* * * * *

(Sec. 202, 84 Stat. 971, 45 U.S.C. 431 and § 1.49 (n) of the regulations of the Office of the Secretary of Transportation, 49 CFR 1.49 (n).)

This amendment is effective September 30, 1977. Earlier compliance with these regulations is authorized.

Issued in Washington, D.C. on August 29, 1977.

JOHN M. SULLIVAN,
Administrator.

[Docket Nos. AO-356-A16, AO-347-A19, and AO-286-A27]

MILK IN UPPER FLORIDA, TAMPA BAY, AND SOUTHEASTERN FLORIDA MARKETING AREAS

Decision on Proposed Amendments to Marketing Agreements and to Orders

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Proposed rule.

SUMMARY: This final decision proposes certain changes in the three Florida Federal milk orders, based on a handler proposal considered at a public hearing in June 1977. The proposed amendments would provide for the use of a single butterfat differential for adjusting the value of producer milk in all uses according to the butterfat content of the milk. This change would improve competitive relationships between milk processors regulated under the Florida orders and those regulated under other nearby orders.

Dairy farmer cooperatives will be polled to determine whether producers favor issuance of the proposed amended orders.

SUPPLEMENTARY INFORMATION: Prior documents in this proceeding:

Notice of Hearing—issued June 13, 1977; published June 16, 1977 (42 CFR 30627).

Recommended Decision—Issued July 26, 1977; published August 1, 1977 (42 FR 38913).

PRELIMINARY STATEMENT

A public hearing was held upon proposed amendments to the marketing agreements and to the orders regulating the handling of milk in the Upper Florida, Tampa Bay, and Southeastern Florida marketing areas. The hearing was held, pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et seq.), and the applicable rules of practice (7 CFR Part 900), at Orlando, Fla., on June 29, 1977, pursuant to notice thereof.

Upon the basis of the evidence introduced at the hearing and the record thereof, the Acting Administrator, on July 26, 1977, filed with the Hearing Clerk, United States Department of Agriculture, his recommended decision containing notice of the opportunity to file written exceptions thereto.

The material issues, findings and conclusions, rulings, and general findings of the recommended decision are hereby approved and adopted and are set forth in full herein.

The material issue on the record of the hearing relates to whether the orders should provide a single butterfat differential.

FINDINGS AND CONCLUSIONS

The following findings and conclusions on the material issue are based on evidence presented at the hearing and the record thereof:

Adoption of a single butterfat differential. A single butterfat differential, 11.5 percent of the Chicago Grade A butter price for the month, should be used to adjust the class prices and the uniform prices of the Upper Florida, Tampa Bay, and Southeastern Florida milk orders.

Presently, the Upper Florida and Tampa Bay orders provide for three different butterfat differentials. That for Class I is fixed at 7.5 cents (for each one-tenth percent of butterfat above or below 3.5 percent); for Class II it is 11.5 percent of the Chicago Grade A butter price for the month. The butterfat differential used in adjusting the uniform price is the average of the butterfat differentials for the two classes, weighted by the proportion of butterfat in producer milk assigned to each class. The provisions are the same in the Southeastern Florida order, except that a Class III butterfat differential, identical to that for Class II, is provided.

A handler proposed that the Class I butterfat differential be 11.5 percent of the Chicago Grade A butter price for the month, thereby resulting in a single butterfat differential for adjusting the class prices and the uniform prices of the three Florida orders. This is the same butterfat differential that is applicable to fluid milk products priced under all other Federal orders throughout the eastern part of the United States. No testimony in opposition to the proposal was presented at the hearing.

The proponent operates a plant under each of the Florida orders and distributes a full line of fluid milk products from each. This includes homogenized (whole) milk, at least two kinds of lowfat fluid milk products, skim milk, buttermilk, chocolate milk and chocolate flavored milk drink. The handler operates no retail routes, but disposes of fluid milk products through wholesale customers and institutions, such as chain stores, hospitals, and schools.

The proposal to make the Class I butterfat differential for the Florida orders the same as for most other orders stems from competition experienced with handlers located outside the three Florida markets. Proponent contended that if the three Florida markets operated in a vacuum there would be no particular adverse competitive effect in maintaining the present Class I butterfat differeintial. As it is, however, proponent supplies its own stores northward along the Georgia coast to Savannah, and inland to Wycross, Ga., from its plant at Jacksonville, Fla., regulated by the Upper Florida order. In doing this, proponent is not competitive with handlers regulated by the Gorgia order whose cost for the skim milk component of Class I fluid milk products under such order is significantly less than it is for proponent under the Upper Florida order. In May 1977, for example, the Georgia butterfat differential was 11.6 cents as compared with the 7.5 cent Class I butterfat differential under the Florida orders.

The record establishes, also, that other handlers regulated by the Upper Florida order and located in Tallahassee complete with Georgia handlers both in Georgia and in Florida. In this connection, in April 1977, about 2.3 million pounds of packaged Class I fluid milk products were disposed of by handlers regulated by the Upper Florida order to locations inside the Georgia marketing area. This was about 4 percent of the total Class I sales for the Upper Florida market. Moreover, fluid milk products are distributed in the Upper Florida marketing area from Georgia regulated plants at Columbus, Ga., and Spartanburg, S.C.

In the disposition of Class I fluid milk products in competition with Georgia handlers, Florida handlers do not enjoy any particular offsetting advantage from the fact that the Florida Class I butterfat differential is lower than the Georgia Class I butterfat differential. This stems from the fact that there are no relatively high-fat Class I products any more.

Indicative of the declining proportion of butterfat in Class I sales is the continuous decline in the average test of fluid milk products sold in Federal order marketing areas. In 1967, for example, the average butterfat test in 67 Federal order markets for such sales was 3.46

V 42 169 AUG 31 77 UMI

percent.[1] This percentage declined yearly, and in 1975, the latest full year for which data are available, the comparable average butterfat test for 55 markets was 3.01 percent. On a percentage basis, the average butterfat content of these fluid milk products declined 13 percent from 1967 to 1975.

The declining average butterfat content of packaged fluid milk product sales in the three Florida markets has been similar to the national trend. In 1967, the average butterfat content of fluid milk products in the three markets was 3.58 percent.[2] The comparable average test for 1975 was 3.07 percent, a decline of 14 percent. The increasing demand for fluid milk products with lower butterfat content can be expected to result in a continuing decline in the average butterfat content of such products under the three Florida orders. Adopting the butterfat differential proposed, as provided in this decision, gives recognition to actual or potential competition in the sale of lowfat fluid milk products between Florida handlers and those regulated by other Federal orders, particularly the Georgia order.

The price difference per gallon of milk between Georgia and Upper Florida handlers increases substantially as the butterfat test of the milk decreases. At a test of 3.5 percent butterfat, the difference is 4.73 cents per gallon, which reflects the difference in the Class I price differentials for the two orders, with Upper Florida having the higher price. For a gallon of skim milk, this difference increases to 17.13 cents, reflecting the differing values for skim milk stemming from the fixed butterfat differential of 7.5 cents provided in the Upper Florida order and the 11.6-cent differential provided in the Georgia order for May 1977.

On the basis of data for April 1977, the butterfat test of packaged Class I disposition for the Upper Florida market averaged 2.76 percent. On this basis, Order 6 handlers were disadvantaged by about 2.6 cents per gallon in competing with Georgia regulated handlers. Proponent emphasized that milk sales are won or lost on the basis of a fraction of one cent. With a disadvantage of the size indicated, the long-term result could be a loss of fluid milk outlets, not for Upper Florida handlers but for producers in the market as well.

The fixed 7.5-cent butterfat differential was adopted in the Florida orders at a time when the price of butter was substantially lower. The fixed differential was provided in the Upper Florida order about a decade ago. For the other Florida orders, it was provided earlier than that. At the time, the fixed Class I differential was higher than the Class II butterfat differential, and approximated the Class I butterfat differentials then provided in other Federal milk orders. This is no longer the case. For May 1977, for example, the Class I butterfat differential for the Georgia order as well as the Class II differential for the Florida orders, was 11.6 cents compared with 7.5 cents for the Florida orders. The Georgia differential was based on a Chicago Grade A butter price of $1.01 per pound, an increase of 49 percent from even 5 years ago when such price was 67.7 cents per pound.

The Class I butterfat differential adopted herein would provide the same value for Class I butterfat in the Florida orders as is provided in the Georgia order. This will result in placing both Georgia and Florida regulated handlers on a comparable basis in the disposition of fluid milk products.

The record establishes that adverse competitive conditions exist only between handlers regulated by the Upper Florida order and those regulated by the Georgia order. Nevertheless, the single butterfat differential should be adopted for all three Florida orders. If the Tampa Bay and Southeastern Florida orders were not included, the same competitive conditions would be created between handlers regulated by the Upper Florida order and handlers under the other two Florida orders that now exist between handlers regulated by the Upper Florida order and those regulated by the Georgia order.

Since the Class I butterfat differential for each of the Florida orders is fixed at 7.5 cents, it is of course known at the time of the advance announcement of Class I prices. This no longer would be the case. The differential adopted in this decision would be based on the butter price for the current month and thus would not be known until the 5th day of the following month, which is the case now for the Class II butterfat differentials for the three orders and the Class III butterfat differential for the Southeastern Florida order.

Since the same butterfat differential would apply to all classes of milk, it is necessary that each order provide only for a producer butterfat differential. No handler butterfat differentials for adjusting class prices need be set forth as such in the orders, nor is there any need for pooling the value of butterfat in each class. All producer "differential" butterfat received by handlers will be priced the same to all handlers regardless of the class in which the butterfat is used. Accordingly, the orders should be modified to provide only for the announcement and use of a producer butterfat differential.

Rulings on Proposed Findings and Conclusions

A brief and proposed findings and conclusions were filed on behalf of an interested party. The brief, proposed findings and conclusions and the evidence in the record were considered in making the findings and conclusions set forth above. To the extent that the suggested findings and conclusions filed by the interested party are inconsistent with the findings and conclusions set forth herein, the request to make such findings or reach such conclusions are denied for the reasons previously stated in this decision.

General Findings

The findings and determinations hereinafter set forth are supplementary and in addition to the findings and determinations previously made in connection with the issuance of each of the aforesaid orders and of the previously issued amendments thereto; and all of said previous findings and determinations are hereby ratified and affirmed, except insofar as such findings and determinations may be in conflict with the findings and determinations set forth herein.

The following findings are hereby made with respect to each of the aforesaid tentative marketing agreements and orders:

(a) The tentative marketing agreement and the order, as hereby proposed to be amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the Act;

(b) The parity prices of milk as determined pursuant to section 2 of the Act are not reasonable in view of the price of feeds, available supplies of feeds, and other economic conditions which affect market supply and demand for milk in the marketing area, and the minimum prices specified in the tentative marketing agreement and the order, as hereby proposed to be amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk, and be in the public interest; and

(c) The tentative marketing agreement and the order, as hereby proposed to be amended, will regulate the handling of milk in the same manner as, and will be applicable only to persons in the respective classes of industrial and commercial activity specified in, a marketing agreement upon which a hearing has been held.

Rulings on Exceptions

No exceptions were received.

Marketing Agreement and Order

Annexed hereto and made a part hereof are two documents, a MARKETING AGREEMENT regulating the handling of milk, and an ORDER amending the orders regulating the handling of milk in the aforesaid specified marketing areas, which have been decided upon as the detailed and appropriate means of effectuating the foregoing conclusions.

It is hereby ordered, That this entire decision, except the attached marketing agreement, be published in the FEDERAL REGISTER. The regulatory provisions of the marketing agreement are identical with those contained in the orders as hereby proposed to be amended by the attached order, which is published with this decision.

[1] Official notice is taken of the January 1973 and January 1977 Summary of Federal Milk Order Statistics issued by the Dairy Division, AMS, USDA.

[2] Official notice is taken of the Annual Summary for 1968 and 1976, Federal Milk Order Market Statistics, Statistical Bulletins No. 437, 5575 issued by the Dairy Division, C&MS and AMS, USDA.

Determination of Producer Approval and Representative Period

June 1977 is hereby determined to be the representative period for the purpose of ascertaining whether the issuance of the orders, as amended and as hereby proposed to be amended, regulating the handling of milk in the aforesaid specified marketing areas, is approved or favored by producers, as defined under the terms of each of the orders (as amended and as hereby proposed to be amended), who during such representative period were engaged in the production of milk for sale within the respective marketing areas.

Signed at Washington, D.C., on August 25, 1977.

JERRY C. HILL,
Deputy Assistant Secretary.

Order[3] amending the orders, regulating the handling of milk in certain specified marketing areas

Findings And Determinations

The findings and determinations hereinafter set forth are supplementary and in addition to the findings and determinations previously made in connection with the issuance of each of the aforesaid orders and of the previously issued amendments thereto; and all of said previous findings and determinations are hereby ratified and affirmed, except insofar as such findings and determinations may be in conflict with the findings and determinations set forth herein.

The following findings are hereby made with respect to each of the aforesaid orders:

(a) *Findings.* A public hearing was held upon certain proposed amendments to the tentative marketing agreements and to the orders regulating the handling of milk in the aforesaid specified marketing areas. The hearing was held pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937 as amended (7 U.S.C. 601 et seq.), and the applicable rules of practice and procedure (7 CFR Part 900).

Upon the basis of the evidence introduced at such hearing and the record thereof, it is found that:

(1) The said order as hereby amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the Act;

(2) The parity prices of milk, as determined pursuant to section 2 of the Act, are not reasonable in view of the price of feeds, available supplies of feeds, and other economic conditions which affect market supply and demand for milk in the said marketing area, and the minimum prices specified in the order as hereby amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk, and be in the public interest; and

(3) The said order as hereby amended regulates the handling of milk in the same manner as, and is applicable only to persons in the respective classes of industrial or commercial activity specified in, a marketing agreement upon which a hearing has been held.

Order relative to handling. It is therefore ordered that on and after the effective date hereof the handling of milk in each of the specified marketing areas shall be in conformity to and in compliance with the terms and conditions of each of the orders, as amended, and as hereby amended, as follows:

The provisions of the proposed marketing agreement and order amending each of the specified orders contained in the recommended decision issued by the Acting Administrator on July 26, 1977, and published in the FEDERAL REGISTER on August 1, 1977 (42 FR 38913), shall be and are the terms and provisions of this order, amending the orders, and are set forth in full herein:

PART 1006—MILK IN THE UPPER FLORIDA MARKETING AREA

1. In § 1006.50, the preamble and paragraph (a) are revised to read as follows:

§ 1006.50 Class prices.

Subject to the provisions of § 1006.52, the class prices for the month per hundredweight of milk shall be as follows:

(a) *Class I price.* The Class I price shall be the basic formula price for the second preceding month plus $2.85.

* * * * *

2. Section 1006.53 is revised to read as follows:

§ 1006.53 Announcement of class prices.

The market administrator shall announce publicly on or before the fifth day of each month the Class I price for the following month and the Class II price for the preceding month.

3. Section 1006.55 is revoked.

§ 1006.55 [Revoked]

4. In § 1006.60, paragraph (b) is revised to read as follows:

§ 1006.60 Handler's value of milk for computing uniform price.

* * * * *

(b) Add the amount obtained from multiplying the overage deducted from each Class pursuant to § 1006.44(a)(11) and the corresponding step of § 1006.44 (b) by the applicable class prices, as adjusted by the butterfat differential specified in § 1006.74;

* * * * *

5. In § 1006.61, paragraph (b) is revoked and the preamble is revised to read as follows:

§ 1006.61 Computation of uniform price.

For each month, the market administrator shall compute a uniform price for milk of 3.5 percent butterfat content as follows:

* * * * *

6. Section 1006.62 is revised to read as follows:

§ 1006.62 Announcement of uniform price and butterfat differential.

The market administrator shall announce publicly on or before:

(a) The fifth day after the end of each month the butterfat differential for such month; and

(b) The 11th day after the end of each month the uniform price for such month.

7. In § 1006.71, paragraph (a)(2)(i) is revised to read as follows:

§ 1006.71 Payments to the producer-settlement fund.

(a) * * *

(2) * * *

(i) The value of such handler's producer milk at the uniform price, as adjusted pursuant to § 1006.75; and

* * * * *

8. Section 1006.74 is revised to read as follows:

§ 1006.74 Butterfat differential.

For milk containing more or less than 3.5 percent butterfat, the uniform price shall be increased or decreased, respectively, for each one-tenth percent butterfat variation from 3.5 percent by a butterfat differential rounded to the nearest one-tenth cent, which shall be 0.115 times the simple average of the wholesale selling prices (using the midpoint of any price range as one price) of Grade A bulk butter per pound at Chicago, as reported by the Department for the month.

9. In § 1006.76, paragraphs (a)(2)(i) and (b)(4) are revised to read as follows:

§ 1006.76 Payments by handler operating a partially regulated distributing plant.

* * * * *

(a) * * *

(2) * * *

(i) The gross payments made by such handler, adjusted to a 3.5 percent butterfat basis by the butterfat differential specified in § 1006.74, for Grade A milk received during the month from dairy farmers at such plant and like payments made by the operator of a supply plant(s) included in the computations pursuant to subparagraph (1) of this paragraph; and

* * * * *

(b) * * *

(4) Combine the amounts of skim milk and butterfat remaining into one total; and

* * * * *

PART 1012—MILK IN THE TAMPA BAY MARKETING AREA

1. § 1012.50, the preamble and paragraph (a) are revised to read as follows:

[3] This order shall not become effective unless and until the requirements of § 900.14 of the rules of practice and procedure governing proceedings to formulate marketing agreements and marketing orders have been met.

V 42 169 AUG 31 77 UMI

§ 1012.50 Class prices.

Subject to the provisions of § 1012.52, the class prices for the month per hundredweight of milk shall be as follows:

(a) *Class I price.* The Class I price shall be the basic formula price for the second preceding month plus $2.95.

* * * * *

2. Section 1012.53 is revised to read as follows:

§ 1012.53 Announcement of class prices.

The market administrator shall announce publicly on or before the fifth day of each month the Class I price for the following month and the Class II price for the preceding month.

3. Section 1012.55 is revoked.

§ 1012.55 [Revoked]

4. In § 1012.60, paragraph (b) is revised to read as follows:

§ 1012.60 Handler's value of milk for computing uniform price.

* * * * *

(b) Add the amount obtained from multiplying the overage deducted from each class pursuant to § 1012.44(a) (11) and the corresponding step of § 1012.44 (b) by the applicable class prices, as adjusted by the butterfat differential specified in § 1012.74;

* * * * *

5. In § 1012.61, paragraph (b) is revoked and the preamble is revised to read as follows:

§ 1012.61 Computation of uniform price.

For each month the market administrator shall compute a uniform price for milk of 3.5 percent butterfat content as follows:

* * * * *

6. Section 1012.62 is revised to read as follows:

§ 1012.62 Announcement of uniform price and butterfat differential.

The market administrator shall announce publicly on or before:

(a) The fifth day after the end of each month the butterfat differential for such month; and

(b) The 11th day after the end of each month the uniform price for such month.

7. In § 1012.71, paragraph (a) (2) (i) is revised to read as follows:

§ 1012.71 Payments to the producer-settlement fund.

(a) * * *

(2) * * *

(i) The value of such handler's producer milk at the uniform price, as adjusted pursuant to § 1012.75; and

* * * * *

8. Section 1012.74 is revised to read as follows:

§ 1012.74 Butterfat differential.

For milk containing more or less than 3.5 percent butterfat, the uniform price shall be increased or decreased, respectively, for each one-tenth percent butterfat variation from 3.5 percent by a butterfat differential, rounded to the nearest one-tenth cent, which shall be 0.115 times the simple average of the wholesale selling prices (using the midpoint of any price range as one price) of Grade A bulk butter per pound at Chicago, as reported by the Department for the month.

9. In § 1012.76, paragraphs (a) (2) (i) and (b) (4) are revised to read as follows:

§ 1012.76 Payments by handler operating a partially regulated distributing plant.

* * * * *

(a) * * *

(2) * * *

(i) The gross payments made by such handler, adjusted to a 3.5 percent butterfat basis by the butterfat differential specified in § 1012.74, for Grade A milk received during the month from dairy farmers at such plant and like payments made by the operator of a supply plant(s) included in the computations pursuant to subparagraph (1) of this paragraph; and

* * * * *

(b) * * *

(4) Combine the amounts of skim milk and butterfat remaining into one total;

* * * * *

PART 1013—MILK IN THE SOUTHEASTERN FLORIDA MARKETING AREA

1. In § 1013.50, the preamble and paragraph (a) are revised to read as follows:

§ 1013.50 Class prices.

Subject to the provisions of § 1013.52, the class prices for the month per hundredweight of milk shall be as follows:

(a) *Class I price.* The Class I price shall be the basic formula price for the second preceding month plus $3.15.

* * * * *

2. Section 1013.53 is revised to read as follows.

§ 1013.53 Announcement of class prices.

The market administrator shall announce publicly on or before the fifth day of each month the Class I price for the following month and the Class II and Class III prices for the preceding month.

3. Section 1013.55 is revoked.

§ 1013.55 [Revoked]

4. In § 1013.60, paragraph (b) is revised to read as follows:

§ 1013.60 Handler's value of milk for computing uniform price.

* * * * *

(b) Add the amount obtained from multiplying the overage deducted from each class pursuant to § 1013.44(a) (12) and the corresponding step of § 1013.44 (b) by the applicable class prices, as adjusted by the butterfat differential specified in § 1013.74;

* * * * *

5. In § 1013.61, paragraph (b) is revoked and the preamble is revised to read as follows:

§ 1013.61 Computation of uniform price.

For each month the market administrator shall compute a uniform price for milk of 3.5 percent butterfat as follows:

* * * * *

6. Section 1013.62 is revised to read as follows:

§ 1013.62 Announcement of uniform price and butterfat differential.

The market administrator shall announce publicly on or before:

(a) The fifth day after the end of each month the butterfat differential for such month; and

(b) The 11th day after the end of each month the uniform price for such month.

7. In § 1013.71, paragraph (a) (2) (i) is revised to read as follows:

§ 1013.71 Payments to the producer-settlement fund.

(a) * * *

(2) * * *

(i) The value of each handler's producer milk at the uniform price, as adjusted pursuant to § 1013.75; and

* * * * *

8. In § 1013.73, paragraph (a) (3) is revised to read as follows:

§ 1013.73 Payments to producers and to cooperative associations.

(a) * * *

(3) On or before the 15th day of the following month, to each producer an amount equal to not less than the uniform price computed pursuant to § 1013.-61 adjusted pursuant to §§ 1013.74 and 1013.75, multiplied by the total pounds of milk received from such producer, subject to the following adjustments:

* * * * *

9. Section 1013.74 is revised to read as follows:

§ 1013.74 Butterfat differential.

For milk containing more or less than 3.5 percent butterfat, the uniform price shall be increased or decreased, respectively, for each one-tenth percent butterfat variation from 3.5 percent by a butterfat differential, rounded to the nearest one-tenth cent, which shall be 0.115 times the simple average of the wholesale selling prices (using the midpoint of any price range as one price) of Grade A bulk butter per pound at Chicago, as reported by the Department for the month.

10. In § 1013.76, paragraph (a) (2) and (b) (4) are revised to read as follows:

§ 1013.76 Payments by handler operating a partially regulated distributing plant.

* * * * *

(a) * * *

(2) From this obligation there will be deducted the sum of:

(i) The gross payments made by such handler, adjusted to a 3.5 percent butterfat basis by the butterfat differential specified in § 1013.74, for Grade A milk received during the month from dairy farmers at such plant and like payments made by the operator of a supply plant(s) included in the computations pursuant to subparagraph (1) of this paragraph; and

(ii) Payments to the producer-settlement fund of another order under which such plant is also a partially regulated distributing plant.

(b) * * *

(4) Combine the amounts of skim milk and butterfat remaining into one total; and

* * * * *

MILK IN CENTRAL ARKANSAS, FORT SMITH, ARKANSAS AND MEMPHIS, TENNESSEE MARKETING AREAS

Extension of Time for Filing Exceptions to Recommended Decision on Proposed Amendments to Tentative Marketing Agreements and to Orders

AGENCY: Agricultural Marketing Service.

ACTION: Extension of time for filing exceptions.

SUMMARY: This notice extends the time for filing exceptions to the July 21, 1977, decision recommending a merger of the Central Arkansas, Fort Smith, and Memphis orders (7 CFR Parts 1108, 1102, and 1097) and expansion of the marketing area to include additional areas in Arkansas, Tennessee, and Mississippi.

DATE: Comments now are due on or before September 15, 1977.

ADDRESS: Exceptions (four copies) should be filed with the Hearing Clerk, Room 1077, South Building, United States Department of Agriculture, Washington, D.C. 20250.

FOR FURTHER INFORMATION CONTACT:

Robert F. Groene, Marketing Specialist, Dairy Division, Agricultural Marketing Service, U.S. Department of Agriculture, Washington, D.C. 20250 (220–447–4824).

SUPPLEMENTARY INFORMATION: Prior documents in this proceeding:

Notices of Hearing: Issued November 19, 1976, published November 24, 1976 (41 FR 51819); issued February 11, 1977, published February 17, 1977 (42 FR 9674); issued March 3, 1977, published March 8, 1977 (42 FR 13024); and issued March 25, 1977, published March 31, 1977 (42 FR 17130).

Extension of time for filing briefs: Issued May 18, 1977, published May 23, 1977 (42 FR 26[illegible]).

Recommended Decision: Issued July 21, 1977, published July 26, 1977 (42 FR 38070).

Extension of time for filing exceptions: Issued August 12, 1977, published August 19, 1977 (42 FR 41873).

Notice is hereby given that the time for filing exceptions to the recommended decision with respect to the proposed amendments to the tentative marketing agreements and to the orders regulating the handling of milk in the Central Arkansas, Fort Smith, Ark., and Memphis, Tenn., marketing areas which was issued July 21, 1977 (42 FR 38070) is hereby extended to September 15, 1977.

This notice is issued pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et seq.), and the applicable rules of practice and procedure governing in the formulation of marketing agreements and marketing orders (7 CFR Part 900).

Signed at Washington, D.C., on August 25, 1977.

WILLIAM T. MANLEY,
Deputy Administrator
Program Operations.

FEDERAL ENERGY ADMINISTRATION

[10 CFR Parts 303, 305, 307, 309]

COAL UTILIZATION PROGRAM REGULATIONS

Proposed Amendments and Public Hearing

AGENCY: Federal Energy Administration.

ACTION: Notice of Proposed Rulemaking and Public Hearing.

SUMMARY: The Federal Energy Administration hereby gives notice of proposed amendments to the regulations implementing the coal utilization program as authorized by the Energy Supply and Environmental Coordination Act of 1974, 15 U.S.C. 791 et seq. (Supp. V, 1975), as amended by Pub. L. 95–70 (July 21, 1977).

The proposed amendments are discussed under six headings: the scope of prohibition and construction orders and a revised definition of "primary energy source"; the criteria used to determine whether the cost of burning coal in lieu of petroleum products or natural gas is reasonable; the criteria used to determine whether a powerplant or major fuel burning installation (MFBI) has the capability and necesary plant equipment to burn coal; the criteria used in selecting candidates for prohibition orders; the amendment to the design firing rate requirements for potential construction order recipients; and miscellaneous changse, including the amendment to FEA's procedures involving MFBI's in the early planning process and amendments to reflect the extension of FEA's order issuing authority.

DATES: Comments by September 29, 1977, 4:30 p.m.; public hearing on September 21, 1977, 9:30 a.m.; requests to speak by September 13, 1977, 4:30 p.m.

ADDRESSES: Comments and requests to speak should be sent to: Executive Communications, Room 3317, Box PC, Federal Energy Administration, 12th and Pennsylvania Avenue, Washington, D.C. 20461; Hearing location: Room 2105, 2000 "M" Street NW., Washington, D.C. 20461.

FOR FURTHER INFORMATION CONTACT:

Joseph Vanzant, Office of General Counsel, Federal Energy Administration, Room 6144, 12th & Pennsylvania Avenue NW., Washington, D.C. 20461 (202–566–9296).

SUPPLEMENTARY INFORMATION:

I. BACKGROUND

The Energy Supply and Environmental Coordination Act (ESECA), 15 U.S.C. 791 et seq. (Supp. V, 1975), as amended by Pub. L. 95–70 (July 21, 1977), authorizes the Federal Energy Administration (FEA) to prohibit certain existing powerplants and major fuel burning installations (MFBI's) from burning natural gas or petroleum products as their primary energy source. ESECA also authorizes FEA to require that certain powerplants and major fuel burning installations in the early planning process be designed and constructed so as to be capable of using coal as their primary energy source. FEA published in the FEDERAL REGISTER regulations implementing its authority under ESECA on May 9, 1975 (40 FR 20462), and amended these regulations on May 6, 1977 (42 FR 23132), to reflect the amendments to ESECA effectuated by the Energy Policy and Conservation Act, Pub. L. 94–163. FEA now proposes further amendments to its regulations. The proposed amendments can best be explained in the groupings discussed below.

II. DISCUSSION

SCOPE OF PROHIBITION AND CONSTRUCTION ORDERS AND THE DEFINITION OF PRIMARY ENERGY SOURCE

The most significant change to the regulations would be the addition of a new § 305.6. Under proposed § 305.6 FEA will be able to issue prohibition orders permitting the burning of limited amounts of oil and gas as primary energy sources when FEA finds it is not feasible for a combustor to replace 100 percent of the oil and gas it uses with coal. This proposed change is based on FEA's determination that issuing prohibition orders only to combustors which can convert totally to coal has resulted in limiting the amount of oil and gas which can be conserved under ESECA. Combustors which have the capability of burning coal but which, for one reason or another, cannot feasibly burn 100 percent coal should not be permitted to continue using that amount of oil and gas which can feasibly be replaced by coal. FEA believes that a significant number of combustors fall into this latter category and proposes to issue such combustors prohibition orders under the proposed § 305.6.

V 42169 AUG 31 77 UMI

Under proposed §305.6, if 100 percent of the gas and oil used by a combustor as primary energy sources can be replaced with coal and the replacement coal can be burned in compliance with all applicable air pollution requirements and FEA can make the findings contained in § 305.3(b) or § 305.4(b), then a prohibition order will be issued to prohibit the use of all petroleum products or natural gas as primary energy sources, except for those minimum amounts specified in § 305.6(d).

If, however, FEA cannot make the findings in § 305.3(b) or § 305.4(b) for a 100 percent prohibition, FEA will determine the maximum prohibition of natural gas and petroleum products for which such findings can be made. Therefore, REA may prohibit the use of only certain amounts of natural gas and petroleum products as primary energy sources: *Provided*, That the coal replacing those amounts of petroleum products and natural gas can be burned in compliance with all applicable air pollution requirements.

The Environmental Protection Agency of course will continue to have the duty under section 2(b) of ESECA to determine when an order recipient can burn coal in compliance with all applicable air pollution requirements. FEA recognizes as part of this statutory authority EPA's continued responsibility for approving the control strategy which will be utilized by a combustor to comply with applicable air pollution requirements. FEA does not interpret the proposed addition of § 305.6 as requiring EPA to sanction any particular control strategy, such as intermittent control systems.

This proposed new section clearly states that FEA does not consider that fuel used for startup, flame stabilization and control, and testing, and for process fuel use is fuel utilized as a primary energy source within the meaning of ESECA. Therefore, fuel used for such limited purposes is not affected by FEA's orders.

FEA proposes to revise paragraph (a) of § 307.3 to explain further the scope of construction orders in the body of the regulations. As explained in the preamble to the regulations issued May 9, 1975, combustors issued construction orders are required to have in place at the completion of construction and before entering into service all equipment and facilities, including air pollution control systems, necessary to use exclusively coal except for purposes of start-up, flame stabilization and control, and testing, and for process fuel use. The process fuel use exemption eliminates from the scope of construction orders those fuel uses for which it is not technically feasible to burn coal. The requirement that a combustor be designed and constructed so as to be capable of using coal as its primary energy source will still be satisfied if the combustor can use coal as its only primary energy source or as one of several alternative primary energy sources.

Since the proposed §§ 305.6 and 307.3 will control the scope of any future prohibition and construction orders, respectively, it is no longer necessary to maintain the current, complicated definition of "primary energy source." By eliminating from the definition the exceptions which FEA proposes to place in § 305.6 and § 307.3, FEA expects the proposed revised definition to make clear that FEA's actions will affect only that fuel which is utilized as a heat source in a combustor.

REASONABLENESS

The proposed addition of §§ 305.3(b)(2)(iii) and 305.4(b)(2)(iii) is for the purpose of incorporating in the regulations criteria FEA employs in determining the reasonableness of burning coal in lieu of natural gas or petroleum products in a powerplant or major fuel burning installation.

The proposed paragraphs describe an analytical calculation that is employed by FEA and applied to candidate powerplants and MFBI's. FEA performs this calculation by adding the annual costs which would be incurred in converting to coal, such as annualized additional capital costs (including the annual cost of capital) and increased annual operating and maintenance costs. In the case of powerplants, FEA includes in its calculation a consideration of an allowed rate of return on capital investment. In order to annualize these additional costs, FEA determines the remaining useful service life of the combustor based on a presumed useful service life of 35 years for powerplants and 40 years for MFBI's, or on such other useful service life that FEA determines is reasonable.

FEA then subtracts from or adds to the annual conversion costs the decrease or increase in annual fuel costs. In order to calculate estimated fuel usage, FEA will project a capacity factor based on the combustor's average annual capacity factor based on the combustor's average annual capacity factor for the most recent three year period for which data are available, or on such other evidence as FEA considers probative.

If the resulting net figure shows a decrease in annual costs, then FEA finds that the costs of burning coal in lieu of natural gas and petroleum products are reasonable. If the resulting figure shows a net increase in annual costs then FEA further analyzes the costs to be incurred by the owner of the powerplant or MFBI. It does so by dividing the net increase in annual costs by the amount of petroleum products or natural gas which FEA has determined it is feasible to replace annually with coal. The resulting figure represents the "cost per barrel of petroleum product or MCF of natural gas saved."

The reasonableness of the cost per barrel of petroleum product or MCF of natural gas is determined on a case by case basis. With respect to a powerplant, FEA analyzes the potential cost impact upon the powerplant's customers. With respect to powerplants and MFBI's, FEA analyzes the financial capability of the owner of the powerplant or MFBI to effectuate coal conversion, as determined in accordance with §§ 305.3(b)(2)(i) and 305.4(b)(2)(i), and considers the amounts of oil and gas that would be saved if an order were issued. FEA also considers any other factors which it determines are appropriate in a particular case.

COAL CAPABILITY AND NECESSARY PLANT EQUIPMENT

ESECA requires that before FEA issues a prohibition order to a powerplant or major fuel burning installation, FEA must find that the combustor on June 22, 1974, had in place, or thereafter acquires or is designed with, the "capability and necessary plant equipment" to burn coal or that the combustor has been issued a construction order. For those candidates which have not received construction orders, FEA evaluates several factors before making the "capability and necessary plant equipment" finding.

FEA proposes to amend §§ 305.3 and 305.4 to incorporate the standards FEA employs to determine whether a combustor has the capability and necessary plant equipment to burn coal. If on or after June 22, 1974, a combustor has, as a minimum, the requisite furnace configuration for using coal, including the necessary configuration for ash removal from the furnace, and, in the case of a boiler, the proper tube spacing to permit coal burning, then for the purposes of ESECA the combustor has the requisite coal firing capability and necessary plant equipment.

FEA also evaluates coal and ash handling facilities and other equipment, as well as the availability of land for coal storage. The absence of any one or combination of these facilities or equipment, however, does not prevent the FEA from making a finding as to coal firing capability and necessary plant equipment. Rather, the cost of any such facilities or equipment which must be refurbished or acquired is included when FEA considers the practicability of the combustor's burning coal in lieu of natural gas or petroleum products.

PROHIBITION ORDER CANDIDATE SELECTION CRITERIA

The proposed revision of § 305.4(c) will replace the factors listed in the current § 305.4(c) as those which FEA will consider in selecting an MFBI for a prohibition order with the broad consideration of unique and extraordinary environmental and physical constraints to coal burning. The installation's location will still be considered as a possible environmental constraint. The installation's output and the purpose for which coal will be used already are adequately considered under the definitions of "primary energy source" and "process fuel use" since FEA's actions will affect only fuels used as heat sources in a combustor and exclude those process uses for which coal is not a technically feasible fuel alternative. As discussed above, FEA will include the quantity of gas or oil saved when the reasonableness of costs of conversion is determined. Finally, in its first

round of prohibition orders issued to MFBI's on June 30, 1977, FEA was not presented with any evidence as to the effects of short-term variation of demand for an installation's output on the practicability of burning coal. Therefore, FEA proposes to eliminate this factor as a separately stated consideration. The proposed new paragraph 305.3(c) sets out the criteria which FEA would consider in selecting potential powerplant candidates for prohibition orders.

The combined effect of these new paragraphs and the existing provisions of Part 305 would be as follows: (1) FEA may commence, on its own initiative, a proceeding to prohibit a powerplant or MFBI from burning oil or gas as its primary energy source only if the combustor, individually or in aggregation with other combustors at the same location, has a design firing rate of at least 100 million Btu's per hour; and, (2) before selecting the recipient of a prohibition order FEA will consider any unique or extraordinary environmental or physical constraints to burning coal which have been brought to FEA's attention and any other factors which may disqualify the combustor from receiving a prohibition order.

FEA notes that the selection methodology which appeared in the MFBI prohibition order Notices of Intention issued in May 1977, stated that FEA would eliminate or defer an MFBI from consideration if the MFBI's remaining useful life as of January 1, 1978, would be less than one year, if the MFBI's utilization factor was less than 20 percent, or if the MFBI (referring to all combustor's at the MFBI location) used significantly less than 2×10^{12} Btu's of petroleum products or natural gas in the latest year for which data are available. Those thresholds were employed exclusively for purposes of administrative convenience in choosing the first group of MFBI's to receive prohibition orders and do not constitute criteria used in selecting prohibition order candidates.

DESIGN FIRING RATE REQUIREMENTS FOR CONSTRUCTION ORDERS

In the amendments to its regulations published on May 6, 1977, FEA included in § 307.6(b) a minimum design firing rate requirement of 100 million Btu's per hour which must be met before FEA will issue a construction order to an MFBI. FEA also included in its May 6, 1977, amendments an aggregation provision under which the 100 million Btu per hour threshold can be met by aggregating the design firing rates of all those combustors at the same location which were in the early planning process on or after December 27, 1976, and which individually have design firing rates of at least 50 million Btu's per hour.

FEA now believes that a 50 million Btu per hour minimum for purposes of aggregation should not be employed. Such an artificial minimum may encourage unreasonable, energy inefficient changes in construction plans motivated primarily by a desire to evade FEA's construction order jurisdiction.

Therefore, FEA proposes to eliminate any reference to a minimum design firing rate which will be considered in the aggregation of such rates under § 307.6(b).

MISCELLANEOUS CHANGES

FEA also proposes to amend several provisions in Part 303 to reflect the extension of FEA's order issuing authority to December 31, 1978, effected by Pub. L. 95–70. The proposed amendments all relate to the deadline by which powerplants and MFBI's must filed their applications for prohibition and construction orders. These applications must be received by FEA at least 30 days before the expiration of FEA's order issuing authority in order to assure processing of the applications prior to the statutory deadline.

The final proposed change concerns the time limitations imposed by FEA on its processing of data received from major fuel burning installations in the early planning process. FEA proposes to make clear that FEA requests only such information as is needed to make the findings and adequately consider the factors contained in § 307.3. Under the proposed amendment to § 307.6, if FEA requires a combustor to file a Schedule A–3, FEA will so notify the combustor within 60 days after receipt of properly completed Schedules A–1 and A–2. FEA will determine whether a form has been properly completed.

If no Schedule A–3 is requested from a combustor by FEA, a Notice of Intention (NOI) to issue a construction order must be issued to that combustor within 90 days of receipt of properly completed Schedules A–1 and A–2. If FEA requests the filing of a Schedule A–3, FEA has 90 days after its receipt of the properly completed form to issue an NOI. Should no NOI be issued within the relevant 90 day period, the combustor may consider itself beyond FEA's construction order jurisdiction.

FEA also proposes to add a paragraph of § 307.6 noting that delay in filing information requested by FEA will not prevent FEA from proceeding with its order issuance process using the information that is available. FEA of course will still be able to utilize its enforcement authority against the uncooperative MFBI as FEA deems appropriate.

III. COMMENT PROCEDURES

WRITTEN COMMENTS

Interested persons are invited to participate in this proceeding by submitting written data, views, or arguments with respect to the proposed amendments to the coal utilization regulations set forth in this notice to Executive Communications, Federal Energy Administration, Room 3317, Box PC, Washington, D.C. 20461. These comments may be hand-delivered to Room 3317, Federal Building, 12th and Pennsylvania Avenue NW., Washington, D.C., between the hours of 8 a.m. and 4:30 p.m., Monday through Friday.

Comments should be identified in the outside envelope and on the face of the documents submitted to FEA, Executive Communications, with the designation "Amendments to ESECA Regulations"; 15 copies should be submitted. All comments should be received by September 29, 1977, before 4:30 p.m., to assure full consideration by FEA before final action is taken on the proposed amendments.

PUBLIC HEARING

A public hearing on this proposed rulemaking will be held beginning at 9:30 a.m. on September 21, 1977, in Room 2105, 2000 "M" Street NW., Washington, D.C., to receive oral presentations of data, views, and arguments from interested persons. Any person who has an interest in the subject of the hearing, or who is a representative of a group or class of persons which has an interest in the subject of the hearing, may make a written request for an opportunity to make oral presentation.

That request should be directed to Executive Communications, FEA, Room 3317, Box PC, Washington, D.C. 20461 and must be received before 4:30 p.m., September 13, 1977. The request may be hand-delivered to Room 3317, Federal Building, 12th and Pennsylvania Avenue NW., Washington, D.C., between the hours of 8 a.m. and 4:30 p.m., Monday through Friday.

The person making the request for oral presentation should describe the interest concerned; if appropriate, state why he or she is a proper representative of a group or class of persons which has such an interest; and give a concise summary of the proposed oral presentation and a phone number where he or she may be contacted through September 20, 1977. Speakers will be contacted by an FEA representative before 4:30 p.m., September 15, 1977, to confirm receipt of the written request. Fifty copies of their proposed presentation should be sent by the speakers to Executive Communications, FEA, Room 3317, Box PC, Washington, D.C. 20461, before 4:30 p.m., September 20, 1977.

The FEA reserves the right to limit the number of representatives of a particular group or class of persons to be heard at the hearing, to schedule their respective presentations and to establish the procedures governing the conduct of the meeting. The length of time allocated to each presentation may be limited, based on the number of persons requesting to be heard.

An FEA official will be designated to preside at the hearing. It will not be a judicial or evidentiary type hearing.

Questions may be asked only by those conducting the hearing, and there will be no cross-examination of persons presenting statements. Any further procedural rules needed for the proper conduct of the hearing will be announced by the presiding officer.

V 42169 AUG 31 77 UMI

A transcript of the hearing will be made. The entire record of the hearing, including the transcript, will be retained by the FEA and made available for inspection at the Freedom of Information Reading Room, Room 2107, Federal Building, 12th and Pennsylvania Avenue NW., Washington, D.C., between the hours of 8 a.m. and 4:30 p.m., Monday through Friday. Anyone may purchase a copy of the transcript from the reporter.

Any information or data considered by the person furnishing it to be confidential must be so identified and submitted in writing, one copy only. The FEA reserves the right to determine the confidential status of the information or data and to treat it according to its determination.

NOTE.—The Federal Energy Administration has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Orders 11821 and 11949 and OMB Circular A-107.

Pursuant to section 7(c) of the Federal Energy Administration Act of 1974, as amended, 15 U.S.C. 761 et seq., FEA has sent a set of these proposed amendments to the Environmental Protection Agency (EPA) for comment. EPA's comments are as follows:

EPA believes that the change in the definition of "primary energy source" to allow prohibition of less than 100 percent of oil and gas use may necessitate revision of a few State implementation plans that do not presently have applicable regulations for burning of fuel mixtures, as contemplated by the proposed amendments. In addition, the proposed amendments will increase the number of sources eligible for prohibition orders. This will result in increased coal burning causing additional air pollution. This situation may result in existing State implementation plans being inadequate to attain and maintain the national ambient air quality standards, thereby necessitating revisions to the applicable State implementation plan.

In addition, EPA believes that the definition of "primary energy source" should exclude such minimum amounts of fuel required to enable such sources to comply with applicable primary standard conditions prescribed by EPA in accordance with 40 CFR 55.04.

Although FEA has clarified its selection criteria, FEA should make extraordinary environmental constraints minimum criteria for exclusion as a candidate for an order rather than merely "considering" such factors.

(Energy Supply and Environmental Coordination Act of 1974 (Pub. L. 93-319) (15 U.S.C. 791 et seq.), as amended by Pub. L. 94-163 and Pub. L. 95-70; Federal Energy Administration Act of 1974 (Pub. L. 93-275) (15 U.S.C 761 et seq.), as amended by Pub. L. 94-385 and Pub. L. 95-70; E.O. 11790 (39 FR 23185).)

In consideration of the foregoing, it is proposed to amend Parts 303, 305, 307, and 309 of Chapter II, Subchapter B of Title 10 of the Code of Federal Regulations as set forth below.

Issued in Washington, D.C., August 25, 1977.

ERIC J. FYGI,
Acting General Counsel,
Federal Energy Administration.

PART 303—ADMINISTRATIVE PROCEDURES AND SANCTIONS

10 CFR Part 303 is amended as follows:

1. The citation of authority following the Table of Contents to Part 303 is amended by inserting the words "and Pub. L. 95-70" between "as amended by Pub. L. 94-163" and ";" and between "as amended by Pub. L. 94-385" and ";".

2. Section 303.2 is amended by deleting the definition of "primary energy source" and inserting the following in lieu thereof:

§ 303.2 Definitions.

* * * * * * *

"Primary energy source" means any energy source which is utilized as a heat source in a combustor.

* * * * * * *

§ 303.33 [Amended]

3. Section 303.33 is amended by deleting "June 1, 1977" and inserting "December 1, 1978" in lieu thereof.

§ 303.36 [Amended]

4. In § 303.36 paragraph (a)(3) is amended by deleting "June 1, 1977" and inserting "December 1, 1978" in lieu thereof.

§ 303.38 [Amended]

5. In § 303.38 paragraph (d) is amended by deleting "June 1, 1977" and inserting "December 1, 1978" in lieu thereof.

§ 303.13 [Amended]

6. Section 303.43 is amended by deleting "June 1, 1977" and inserting "December 1, 1978" in lieu thereof.

§ 303.46 [Amended]

7. In § 303.46 paragraph (a)(3) is amended by deleting "June 1, 1977" and inserting "December 1, 1978" in lieu thereof.

§ 303.47 [Amended]

8. In § 303.47 paragraph (c) is amended by deleting "June 1, 1977" and inserting "December 1, 1978" in lieu thereof.

§ 303.18 [Amended]

9. In § 303.48 paragraph (c) is amended by deleting "June 1, 1977" and inserting "December 1, 1978" in lieu thereof.

PART 305—COAL UTILIZATION

10 CFR Part 305 is amended as follows:

10. The citation of authority following the Table of Contents to Part 305 is amended by inserting the words "and Pub. L. 95-70" between "as amended by Pub. Law 94-163" and ";" and between "as amended by Pub. L. 94-385" and ";".

11. Section 305.2 is amended by deleting the definition of "primary energy source" and inserting in lieu thereof the following:

§ 305.2 Definitions.

* * * * * * *

"Primary energy source" means any energy source which is utilized as a heat source in a combustor.

* * * * * * *

12. In § 305.3, paragraph (b)(1) is revised; paragraph (b)(2) has a new subdivision (iii) added; paragraph (c) is redesignated (d); and a new paragraph (c) inserted so that this section reads as follows:

§ 305.3 Powerplants.

* * * * * * *

(b) * * *

(1) The powerplant: (i) on June 22, 1974, had, or thereafter acquires or is designed with, the "capability and necessary plant equipment" to burn coal, or (ii) has been issued a construction order pursuant to Parts 303 and 307 of this chapter. FEA will conclude that a powerplant has the capability and necessary plant equipment to burn coal if the powerplant had in place as of June 22, 1974, or thereafter acquires or is designed with, a boiler which has, as a minimum, the requisite furnace configuration to burn coal, including the necessary configuration for ash removal from the furnace, and the requisite tube spacing to burn coal.

(2) * * *

(iii) In order to determine whether the costs of converting to coal will be reasonable, FEA will analyze the total increase or decrease in costs due to burning coal in lieu of natural gas or petroleum products. To determine such costs FEA will calculate the annualized increased capital costs, an allowed rate of return on the additonal investment, and the increased annual operating and maintenance costs. In order to annualize these additional costs, FEA will determine the remaining useful service life of the combustor based on a presumed useful service life of 35 years, or on such other useful service life that FEA determines is reasonable. The decrease or increase in annual fuel costs will be either subtracted from or added to such annualized costs. In order to calculate estimated fuel usage, FEA will project a capacity factor based on the combustor's average annual capacity factor for the most recent three year period for which data are available, or on such other evidence as FEA considers probative. In cases where there will be a resultant net decrease in annual costs, the reasonableness of issuing the prohibition order will be presumed. In cases where there will be a resultant net increase in annual costs, such costs will be divided by the amounts of petroleum products and natural gas which FEA has determined it is feasible to replace annually with coal, thereby providing a "cost per barrel of petroleum product or Mcf of natural gas saved." In determining whether this increased cost is reasonable FEA will consider the following factors:

Net impact upon the customers of the utility; the financial capability of the powerplant owner as analyzed in accordance with § 305.3(b)(2)(i); amounts of petroleum product and natural gas saved; and other factors that FEA deems appropriate to consider under the circumstances of the case.

* * * * * * *

(c) FEA may commence, on its own initiative, a proceeding to issue an order prohibiting a powerplant from burning natural gas or petroleum products as its primary energy source only if the powerplant has a design firing rate of at least 100 million Btu's per hour. In selecting a powerplant for an order prohibiting that plant from burning natural gas or petroleum products as its primary energy source, the FEA shall consider any unique or extraordinary environmental or physical constraints to coal burning by the powerplant and any other factors which might disqualify the powerplant from receiving a prohibition order.

* * * * * * *

13. In § 305.4, paragraph (b)(1) is revised; a new subdivision (iii) is added to paragraph (b)(2); and paragraph (c) is revised so that this section reads as follows:

§ 305.4 Major fuel burning installations.

* * * * * * *

(b) * * *

(1) The major fuel burning installation has a design firing rate of 100 million Btu's per hour or greater and (i) on June 22, 1974, had, or thereafter acquires or is designed with, the "capability and necessary plant equipment" to burn coal, or (ii) has been issued a construction order pursuant to Parts 303 and 307 of this chapter. FEA will conclude that a major fuel burning installation has the capability and necessary plant equipment to burn coal if the major fuel burning installation had in place as of June 22, 1974, or thereafter acquires or is designed with, a boiler or combustor which has, as a minimum, the requisite furnace configuration to burn coal, including the necessary configuration for ash removal from the furnace, and, in the case of a boiler, the requisite tube spacing to burn coal.

(2) * * *

(iii) In order to determine whether the costs of converting to coal will be reasonable, FEA will compute a net operating cost differential (NOCD). The NOCD will be calculated by first adding the annualized increased capital costs and increased annual operating and maintenance costs. In order to annualize these additional costs, FEA will determine the remaining useful service life of the combustor based on a presumed useful service life of 40 years, or on such other useful service life that FEA determines is reasonable. The decrease or increase in annual fuel costs then will be either subtracted from or added to such annualized costs. In order to calculate estimated fuel usage, FEA will project a capacity factor based on the combustor's average annual capacity factor for the most recent three year period for which data are available, or on such other evidence as FEA considers probative. In cases where there will be a resultant net decrease in annual costs, the reasonableness of issuing the prohibition order will be presumed. In cases where there will be a resultant net increase in annual costs, the NOCD will be divided by the amounts of petroleum products and natural gas which FEA determined it is feasible to replace annually with coal, thereby providing a "cost per barrel of petroleum product or Mcf of natural gas saved." In determining whether this increased cost is reasonable FEA will consider the following factors:

The financial capability of the owner of the major fuel burning installation as analyzed in accordance with § 305.4(b)(2)(i); amount of petroleum product or natural gas saved; and other factors that FEA deems appropriate to consider under the circumstances of the case.

* * * * * * *

(c) In selecting a major fuel burning installation for an order prohibiting that installation from burning natural gas or petroleum products as its primary energy source, the FEA shall consider any unique or extraordinary environmental or physical constraints to coal burning by the major fuel burning installation and any other factors which might disqualify the major fuel burning installation from receiving a prohibition order.

* * * * * * *

14. Section 305.6 is deleted and the following is inserted in lieu thereof:

§ 305.6 Scope of prohibition orders.

(a) FEA shall prohibit the use by a powerplant or major fuel burning installation of the maximum amount of natural gas or petroleum products burned as a primary energy source which it is feasible under the requirements of paragraph (b) of this section to replace with coal.

(b) It shall be considered feasible to replace natural gas and petroleum products being used as primary energy sources with coal if the replacement coal can be burned by the powerplant or major fuel burning installation in compliance with all applicable air pollution requirements and if FEA can make the findings contained in § 305.3(b) or § 305.4(b), as applicable.

(c) If FEA cannot make the findings contained in § 305.3(b) or § 305.4(b) for the replacement with coal of 100 percent of the natural gas and petroleum products used by a powerplant or major fuel burning installation as primary energy sources (except as provided in paragraph (d) of this section), then FEA shall prohibit use of the maximum amount of natural gas and petroleum products which it is feasible under the requirements of paragraph (b) of this section for the powerplant or major fuel burning installation to replace with coal.

(d) For the purposes of ESECA, natural gas and petroleum products will not be considered to be used as primary energy sources when employed in the minimum amounts required for startup, flame stabilization and control, and testing, and when employed for process fuel use.

PART 307—NEW POWERPLANTS AND NEW MAJOR FUEL BURNING INSTALLATIONS

10 CFR Part 307 is amended as follows:

15. The citation of authority following the Table of Contents to Part 307 is amended by inserting the words "and Pub. L. 95-70" between "as amended by Pub. L. 94-163" and ";" and between "as amended by Pub. L. 94-385" and ";".

16. Section 307.2 is amended by deleting the definition of "primary energy source" and inserting in lieu thereof the following:

§ 307.2 Definitions.

* * * * * * *

"Primary energy source" means any energy source which is utilized as a heat source in a combustor.

* * * * * * *

17. Section 307.3(a) is amended so that the following sentence is inserted between the current second and third sentences:

§ 307.3 Use of coal as the primary energy source.

(a) * * * Combustors issued construction orders will be required to have in place at the completion of construction and before entering into service all equipment and facilities, including air pollution control systems, necessary to use exclusively coal except for purposes of start-up, flame stabilization and control, and testing, and for process fuel use. * * *

* * * * * * *

18. In § 307.6, paragraph (b)(1)(ii) is revised; new paragraphs (b)(1)(iii) and (iv) are added; paragraph (b)(3) is deleted and new paragraph (b)(3) is inserted in lieu thereof; and paragraph (b)(6) is deleted so that the section reads as follows.

§ 307.6 Reporting requirement for powerplants and major fuel burning installations.

* * * * * * *

(b) (1) (i) * * *

(ii) FEA Form C-607-S-0 is divided into Schedules A-1, A-2 and A-3. One Schedule A-1 must accompany each submission of one or more Schedule A-2's. One Schedule A-2 must be filed at the address provided in § 303.12 of this chapter for each major fuel burning installation which meets the requirements in paragraph (b)(1)(i) of this section. If necessary, FEA shall request in writing that a major fuel burning installation file a Schedule A-3. If FEA requests that a Schedule A-3 be filed, such request shall be sent to the major fuel burning installation within 60 days after receipt by FEA of properly completed (as determined by FEA) Schedules A-1 and A-2.

(iii) If FEA does not request that a Schedule A-3 be filed, FEA shall issue a notice of intention to issue that major fuel burning installation a construction order no later than 90 days after receipt of properly completed Schedules A-1 and A-2. If a Schedule A-3 has been requested, FEA shall issue a notice of intention to issue that installation a construction order no later than 90 days after receipt by FEA of the properly

V42169 AUG 31 77 UMI

completed Schedule A–3. Failure by FEA to issue a notice of intention within the specified 90 day period shall be deemed to be notice that the major fuel burning installation is no longer a candidate for a costruction order.

(iv) In the event that a major fuel burning installation fails to comply with requests for additional information, FEA may decide, notwithstanding the other provisions of this section, to issue a notice of intention to issue a construction order based on available information, in addition to or in place of taking action under Subpart Q of Part 303 of this chapter.

* * * * *

(3) The "design firing rate requirements" referred to in § 307.3(b) and in this paragraph are met for each major fuel burning installation that: (i) has a design firing rate of 100 million Btu's per hour or greater, or (ii) has a design firing rate of 100 million Btu's per hour or greater when taken in the aggregate with other major fuel burning installation at the same location which were in the reporting interval as of December 27, 1976, or thereafter entered the reporting interval.

* * * * *

PART 309—ALLOCATION OF COAL

10 CFR Part 309 is amended as follows:

19. The citation of authority following the Table of Contents to Part 309 is amended by inserting the words "and Pub. L. 95–70" between "as amended by Pub. L. 94–163" and ";" and between "as amended by Pub. L. 94–385" and ";".

20. Section 309.2 is amended by deleting the definition of "primary energy source" and inserting in lieu thereof the following:

§ 309.2 Definitions.

* * * * *

"Primary energy source" means any energy source which is utilized as a heat source in a combustor.

* * * * *

FEDERAL TRADE COMMISSION

[16 CFR Part 13]

[File No. 762 3087]

PROVIDERS BENEFIT CO., ET AL.

Consent Agreement With Analysis to Aid Public Comment

AGENCY: Federal Trade Commission.

ACTION: Provisional consent agreement.

SUMMARY: In settlement of alleged violations of federal law prohibiting unfair acts and practices, and unfair methods of competition, this provisionally accepted consent order, among other things, would require a Philadelphia, Pa. consumer credit corporation and its subsidiaries to cease failing to provide consumers, in connection with the extension of credit, such materials and disclosures as are required by Federal Reserve System regulations; and to cease misrepresenting or failing to inform customers of the optional nature of credit insurance. Further, the order requires the firms to offer customers the opportunity to cancel such insurance and to make appropriate refunds as specified.

DATE: Comment must be received on or before October 28, 1977.

ADDRESS: Comments should be directed to: Office of the Secretary, Federal Trade Commission, 6th and Pennsylvania Ave. NW., Washington, D.C. 20580.

FOR FURTHER INFORMATION CONTACT:

Richard A. Givens, Director, New York Regional Office, Federal Trade Commission, 2243–EB Federal Building, 26 Federal Plaza, New York, N.Y. 10007, (212–264–1207).

SUPPLEMENTARY INFORMATION: Pursuant to Section 6(f) of the FTC Act, 38 Stat. 721, 15 U.S.C. 46 and § 2.34 of the Commission's Rules of Practice (16 CFR 2.34), notice is hereby given that the following consent agreement containing a consent order to cease and desist and an explanation thereof, having been filed with and provisionally accepted by the Commission, has been placed on the public record for a period of sixty (60) days. Public comment is invited. Such comments or views will be considered by the Commission and will be available for inspection and copying at its principal office in accordance with § 4.9(b)(14) of the Commission's Rules of Practice (16 CFR 4.9(b)(14)).

[File No. 762 3087]

In the matter of Providers Benefit Co., Provident Consumer Discount Co., Inc., and Provident Credit Corp., corporations, and Frederick I. Robinson, George Billings, individually and as an officer of Provident Consumer Discount Co., Inc. and Provident Credit Corp.

The Federal Trade Commission having initiated an investigation of certain acts and practices of Providers Benefit Company, Provident Consumer Discount Company, Inc., and Provident Credit Corp., corporations, and Frederick I. Robinson, individually and as an officer of the latter two corporations, hereinafter sometimes referred to as proposed respondents, and it now appearing that proposed respondents are willing to enter into an agreement containing an order to cease and desist from the use of the acts and practices being investigated.

It is hereby agreed by and between Providers Benefit Co., Provident Consumer Discount Co., Inc., and Provident Credit Corp., corporations, and Frederick I. Robinson, and George Billings individually and as officers of Provident Consumer Discount Co., Inc. and Provident Credit Corp., corporations, and Frederick counsel for the Federal Trade Commission, that:

1. Proposed respondent Providers Benefit Co. is the parent corporation of Provident Credit Corp., a wholly-owned subsidiary. Provident Consumer Discount Co., Inc. is a wholly-owned subsidiary of Provident Credit Corp. All three corporations are organized, existing and doing business under and by virtue of the laws of the State of Pennsylvania. The office and principal place of business of Providers Benefit Co. is located at 8045 West Chester Pike, Upper Darby, Pa. 19082. The office and principal place of business of Provident Consumer Discount Co., Inc., and Provident Credit Corp., is located at 42 South 15th Street. Philadelphia, Pa. 19102.

2. Proposed respondents Frederick I. Robinson and George Billings are officers of corporate respondents Provident Consumer Discount Co., Inc. and Provident Credit Corp. They formulate, direct and control the policies, acts and practices of said corporations.

3. Proposed respondents admit all the jurisdictional facts set forth in the draft of complaint here attached.

4. Proposed respondents waive:

(a) Any further procedural steps;

(b) The requirement that the Commission's decision contain a statement of findings of fact and conclusions of law; and

(c) All rights to seek judicial review or otherwise to challenge or contest the validity of the order entered pursuant to this agreement.

5. This agreement shall not become a part of the official record of the proceeding unless and until it is accepted by the Commission. If this agreement is accepted by the Commission, it, together with the draft of complaint contemplated thereby, will be placed on the public record for a period of sixty (60) days and information in respect thereto publicly released; and such acceptance may be withdrawn by the Commission if comments or views submitted to the Commission disclose facts or considerations which indicate that the order contained in the agreement is inappropriate, improper, or inadequate.

6. This agreement is for settlement purposes only and does not constitute and admission by proposed respondents that the law has been violated as alleged in the draft of complaint here attached.

7. This agreement contemplates that, if it is accepted by the Commission, and if such acceptance is not subsequently withdrawn by the Commission pursuant to the provisions of § 2.34 of the Commission's Rules, the Commission may, without further notice to proposed respondents, (1) issue its complaint corresponding in form and substance with the draft of complaint here attached and its decision containing the following order to cease and desist in disposition of the proceeding and (2) make information public in respect thereto. When so entered, the order to cease and desist shall have the same force and effect and may be altered, modified or set aside in the same manner and within the same time provided by statute for other orders. The order shall become final upon service. Mailing the complaint and decision containing the agreed-to order to respondent's address as stated in Paragraph 1 of this agreement shall constitute service, and respondent hereby waives any right it may have to any other manner of service. The complaint may be used in construing the terms of the order, and no agreement, understanding, representation, or interpretation not contained in the order or the agreement may be used to vary or contradict the terms of the order.

8. Proposed respondents have read the proposed complaint and order contemplated hereby, and they understand that once the order has been issued, they will be required to file one or more compliance reports showing that they have fully complied with the order, and that they may be liable for a civil penalty in the amount provided by law for each violation of the order after it becomes final.

ORDER

For purposes of this order, the following definitions of terms shall apply:

(a) "Consumer credit transactions in open status" refers to those consumer credit transactions in which payments at least totaling the amount of one regular monthly payment have been made by the obligor in the last six months.

(b) "Delinquent account" refers to those accounts which are more than 30 days past due for an amount which equals the amount of one regular monthly payment.

(c) "Penetration rate" refers to the percentage of all loans eligible for credit insurance on which charges for such insurance are made.

(d) "Refund method" refers to an accounting method to compute refunds of insurance premiums in connection with cancellation of insurance coverage which method makes use of both the Rule of 78 and a pro rata computation. As an example, the Rule of 78 would operate on a 12-month loan as follows: The numbers 1 through 12 added together provide the figure 78. This is the denominator. The sum of the months expired at the date of cancellation supplies the numerator. The first month of a 12-month loan is considered as 12 because the outstanding balance is 12 times as large during the first month as it is for the last month. The second month is 11, and so on, to 1. The portion of insurance premiums which must be refunded, is for cancellation during the first month, 78/78–12/78 or second month 66/78–11/78 or 55/78; and so on down to the 12th month. The numerator for a 24-month contract is obtained by beginning with 24, instead of 12, as for a 12-month contract, or 36 in the case of a 36-month contract or any other number denoting the total number of months or periods in a particular contract. To the amount of any refund due in connection with any credit transaction as determined by use of the Rule of 78 will be added an amount which is equal to 40% of the difference between said Rule of 78 amount and that amount which would be due if said refund were to be computed on a pro rata basis. Said pro rata amount refers to an amount which shall be at least as great a proportion of the total insurance premiums collected by respondents in connection with any credit transaction as the number of remaining monthly payments, scheduled to follow the installment date nearest the date of cancellation as explained below, bears to the total number of monthly payments scheduled by the obligor's contract. Any cancellation made on or before the fifteenth day following an installment date shall be deemed to have been made on the installment date immediately preceding the date of cancellation. Any cancellation made after the fifteenth day following an installment date shall be deemed to have been made on the installment date immediately following the date of cancellation. Any obligor making cancellation on or before the fifteenth day following consummation of the transaction shall receive a refund or credit for the full amount of insurance premiums in connection with said transaction. Cancellation for purposes of computing the amount of any refund or credit due shall be as of the date of receipt by respondents of the notice set forth in Attachment C of this order or as of the date of receipt by respondents of any other communication from the borrower under the terms of this order indicating his desire to cancel his insurance coverage.

(e) "Time of closing" refers to that period of time during which loan documents are presented to the borrower for consummation of a loan transaction whereby the borrower becomes obligated to make payments to respondents to satisfy said loan.

I. It is ordered that respondents Providers Benefit Co., Provident Consumer Discount Co., Inc. and Provident Credit Corp., corporations, their successors and assigns, and their officers, and Frederick I. Roinson, and George Billings, individually and as officers of Provident Consumer Discount Co., Inc., and Provident Credit Corp., and respondents' agents, representatives and employees, directly or through any corporation, subsidiary, division or other device, in connection with any extension of consumer credit subject to the provisions of Regulation Z (12 CFR 226) of the Truth In Lending Act (Pub. L. 90–321, 15 U.S.C. §§ 1601–65 (1970), as amended 15 U.S.C. §§ 1601–65a. (Supp. IV, 1974)), do forthwith cease and desist from:

1. In connection with a credit sale, as applicable:

(a) Failing to make required disclosures in a clear and conspicuous manner using the terminology as required by Section 226.6(a) of Regulation Z.

(b) Failing to print the term "finance charge" more conspicuously than other terminology as required by Section 226.6(a) of Regulation Z.

(c) Failing to make all of the disclosures together on either the contract or other instrument evidencing the obligation on the same side of the page, or on one side of a separate statement which identifies the transaction, as required by Section 226.8 (a) (1) or Section 226.8(a) (2) of Regulation Z.

(d) Failing to accurately disclose the finance charge expressed as an annual percentage rate, using the term "annual percentage rate" as required by Section 226.8 (b) (2) of Regulation Z.

(e) Failing to disclose the sum of the payments scheduled to repay the indebtedness using the term "total of payments" as required by Section 226.8(b)(3) of Regulation Z.

(f) Failing to use the term "cash price" to describe the price at which the creditor offers, in the ordinary course of business, to sell for cash the property or services which are the subject of the consumer credit transaction as required by Section 226.8(c)(1) of Regulation Z.

(g) Failing to use the term "cash downpayment" to describe the amount of the downpayment of money, using the term "cash downpayment", as required by Section 226.8(c)(2) of Regulation Z.

(h) Failing to use the term "total downpayment" to describe the sum of cash downpayment in money and the downpayment in property, usingthe term "total downpayment" as required by Section 226.8(c)(2) of Regulation Z.

(i) Failing to use the term "unpaid balance of cash price" to describe the difference between the cash price and total downpayment, as required by Section 226.8(c)(3) of Regulation Z.

(j) Failing to use the term "unpaid balance" to describe the sum of the unpaid balance of cash price and all other charges which are included in the amount financed but which are not part of the finance charge, as required by Section 226.8(8)(5) of Regulation Z.

(k) Failing to use the term "amount financed" to describe the amount of credit of which the customer will have actual use determined in accordance with Section 226.8 (c)(7) of Regulation Z.

(l) Failing to disclose the method of computing any unearned portion of the finance charge in the event of prepayment in full of an obligation which includes precomputed finance charges, a statement of the amount or method of computation of any charge that may be deducted from the amount of any rebate of such unearned finance charge that will be credited to an obligated or refunded to the customer, and if no rebate of unearned finance charges upon prepayment in full is made, the disclosure of such fact.

2. Failing, when the charges for credit life insurance, credit disability insurance, automobile medical insurance and/or automobile club plan are not included in the finance charge for a consumer credit transaction:

(a) To present to the obligor as the first document at the time of closing, which document shall be the first document to be completed by respondents and the first document to be signed by the obligor(s) at the time of said closing in respondents' offices, or to mail to the obligor, who is consummating his credit transaction through the mail, at the same time as consummation papers are to be mailed, a separate, written, personal insurance authorization form which sets forth clearly and conspicuously:

(i) the obligor has received credit approval up to a specified amount;

(ii) the obligor's decision with regard to the various forms of insurance coverage available through respondents is not considered in granting the credit;

(iii) the purchase of any form of credit insurance is optional and is not required by the creditor, in connection with the credit transaction;

(iv) the amount of the total premium for credit life insurance, the amount of the total premium for credit disability insurance, the amount for automobile medical insurance and the amount for the automobile club plan (which if elected will be added to the "amount financed");

(v) the amount financed options applicable to the transaction which would result from the obligor's election to consummate the credit transaction, set forth in the following order from left to right across the document: (1) without either credit life insurance or credit disability insurance, (2) with credit life insurance only, (3) with credit disability insurance only, (4) with both credit life insurance and credit disability insurance, (5) with other available forms of credit insurance offered by respondent, except that, in addition to providing the required information for the above stated four options, respondent need only provide the required information for one other option if the obligor has indicated an interest in such an option;

(vi) a signature and date line for each option set forth in (v) above for the obligor(s) to indicate his election;

V42169 AUG 31 77 UMI

(viii) The obligor authorizes respondents on behalf of the obligor to pay the insurance premiums to the insurance company for such insurance coverage which has been chosen.

(b) To send to mail order obligors, at the same time and along with the papers to consummate said credit transaction, a separate written statement containing the notice, in no less than 12 point bold type and easily legible, which this order requires to be displayed at respondents' office.

(c) To make the disclosures required by subparagraph (a) above on a separate document which contains no other printed or written material.

(d) To make disclosures required by subparagraphs (i), (ii) and (iii) above in not less than 12 point type. A form substantially in conformance with Attachment A herein will be considered as in compliance with the provisions of subparagraphs (a), (b) and (c) above. Respondents shall maintain the original statement for two years following its execution and provide the customer with an executed copy thereof.

3 Making any marks or otherwise instructing obligor where to sign or date the separate insurance authorization form required by subsection 2(a) above in advance of the obligor's free and independent choice for such insurance.

4 Misrepresenting, orally or otherwise, directly or by implication, that credit life insurance, credit disability insurance, automobile medical insurance and or automobile club plan membership are required as a condition of obtaining credit from respondents.

5 Discouraging, by misrepresentation, oral or otherwise, directly or by implication, the declination of credit life insurance, credit disability and or automobile club plan membership.

6 Representing, orally or otherwise, directly or indirectly, that the obligor's failure to elect credit insurance coverage will result in a delay in processing his credit transaction or in his receiving the proceeds thereof.

7 Failing, in any consumer credit transaction or advertisement, to make all disclosures in accordance with Section 226.4 and 226.5 of Regulation Z, in the manner, form and amount required by Section 226.6, 226.8, 226.9 and 226.10 of Regulation Z.

II. It is further ordered that respondents display at their place of business, at each booth, or at or near each desk or other location where transactions are consummated, in such a manner and in such dimensions so as to be easily viewed and read by the obligor from his seated or other normal position in such booth or at such desk or other location and which shall not be in close proximity to any other written or display material, the following notice:

"NOTICE TO CREDIT CUSTOMERS. THE PURCHASE OF CREDIT INSURANCE IS OPTIONAL. IT IS NOT REQUIRED BY THIS COMPANY. YOUR DECISION IS NOT CONSIDERED IN THE GRANTING OR DENYING OF CREDIT TO YOU."

III. It is further ordered that respondents maintain records on a state by state basis (covering each state in which they do business) of the penetration rate of (a) credit life insurance for transactions; and (b) credit disability insurance for transactions. Such records shall be maintained on a yearly basis and submitted to the Commission each year for a period of five years, and thereafter from time to time as the Commission may request.

IV. It is further ordered that within forty-five (45) days after the date this order becomes final respondents mail to all existing obligors to whom credit life insurance, credit disability insurance, auto club membership and or auto medical payment insurance, were sold prior to the date this order becomes final and the premium(s) or fee(s) for same were not included in the finance charge, and who did not receive death benefits or health benefits under said insurance policies, in connection with respondents' consumer credit transactions in open status on the date this order becomes final, notwithstanding the sale or assignment of any or all of said transactions to a third party, the two notices set forth in Attachments B and C of this order, together with a self-addressed, postpaid, return envelope.

Provided however, that: (1) respondents shall not be required to forward the two notices set forth in Attachments B and C of this order to any obligor who has already received the above mentioned notices prior to the date this order becomes final, and where any and all follow-up provisions required by this order with respect to said notices, including the making of refunds or the crediting of accounts, where applicable, have been or will be accomplished by respondents within the time periods specified in this order; and (2) respondents shall not be required to forward the two notices set forth in Attachments B and C of this order to any obligor who, for any transaction consummated prior to the date this order becomes final, received from respondents during the time of closing of said transaction, the personal insurance authorization form required by Section 2(a) of this order and where any and all requirements connected with said form as required by this order have been accomplished by respondents.

V. It is further ordered that a record of mailing by respondents of the notices set forth in Attachment B and C of this order be kept by respondents and that said record be available for examination by Commission personnel in connection with any compliance obligations arising out of this order. Respondents' obligations under Paragraph IV of this order shall not be fulfilled until each obligor affected by said Paragraph has received the notices, or been contacted, as specified therein; provided however, that respondents shall be deemed to have complied with said Paragraph IV if respondents can demonstrate that they expended reasonable efforts, in writing or orally, to deliver such notices or make such contact according to the terms of this order.

VI. It is further ordered that all requests for refunds of credit life insurance and or credit disability insurance premiums under the terms of this order be calculated by respondents based on the "Refund Method" as defined in subpart (d) of the definitions in this order; and all requests for refunds of premiums for auto club and auto medical insurance coverage be calculated by respondents on a pro rata basis; and that said refunds be accomplished by respondents within thirty (30) days of receipt by respondents, within the time period specified in this order, of the notice set forth in Attachment C of this order or receipt by respondents of any other form of communication from obligors indicating their desire to cancel their coverage.

VII. It is further ordered that respondents shall make refunds in cash to all obligors requesting refunds, except those obligors whose accounts are "delinquent accounts". Respondents shall have the option to either make refunds to delinquent accounts in accordance with the terms of this order or to credit said accounts for the full amount of any refund due.

VIII. It is further ordered that respondents, when making cash refunds or when crediting any account with the full amount of any refund due following receipt of the notice set forth in Attachment C of this order, mail or deliver the refund or credit said account within thirty (30) days of the receipt by respondents of said notice. The above mentioned credit shall be reflected on the next account status statement to be sent to the obligor following the above mentioned crediting of his account.

Provided however, that respondents shall not be required to make refunds or to credit accounts with respect to any cancellation notice, as so set forth in Attachment C of this order, or any cancellation request, received by respondents later than sixty (60) days following the date of said notice's receipt by the obligor or later than sixty (60) days from the date that respondents otherwise notified the obligor of his cancellation prerogatives.

IX. It is further ordered that respondents deliver a copy of this order to cease and desist to all present and future personnel of respondents involved in consummating consumer credit obligations, and that respondents secure a signed statement acknowledging receipt of said copy of this order from each such person.

X. It is further ordered that no provision of this order shall apply to an entity which is neither related to nor has any continuity of interest with any respondent named herein other than being assignee or holder of respondent's consumer credit transactions.

Provided however, that the provisions of this paragraph shall not be interpreted to excuse any assignee of any liability imposed by Section 115 of the Truth-in-Lending Act, or to excuse any respondent from complying with any obligation imposed by this order with regard to the consumer credit transactions so assigned.

XI. It is further ordered that respondents notify the Commission at least 30 days prior to any proposed change in the corporate respondent such as dissolution, assignment or sale resulting in the emergence of a successor corporation, the creation or dissolution of subsidiaries or any other change in the corporation which may affect compliance obligations arising out of the order.

XII. It is further ordered that each individual respondent named herein promptly notify the Commission of each change in the respondent's business or employment status, which includes discontinuance of the respondent's present business or employment, and each affiliation with a new business or employment, for five (5) years following the effective date of this order. Such notice shall include the address of and a description of the business or employment with which each respondent is newly affiliated as well as a description of each respondent's duties and responsibilities in connection with that business or employment. The expiration of the notice provision of this paragraph shall not affect any other obligation arising under this order.

XIII. It is further ordered that the respondents herein shall within sixty (60) days after service upon them of this order, file with the Commission a report in writing, setting forth in detail the manner and form in which they have complied with this order.

PERSONAL CREDIT INSURANCE AUTHORIZATION

Your application for credit has been approved in the amount of _____.

Credit life or credit accident and health (disability) insurance is not required in connection with this extension of credit to you and your decision with regard to the personal insurance will not affect the total amount of credit which has already been approved for you.

If you elect credit insurance these premiums will be added to the amount of credit approved for you.

Credit Life $_____ (for term of transaction).

Credit A & H (disability) $_____ (for term of transaction).

I have received a fully completed and executed copy of this form. I have reviewed the amount financed options set forth below and understand that if I choose an amount financed option that includes any of the insurance coverages I am authorizing the creditor to pay the insurance premiums on my behalf. I have voluntarily chosen the following amount financed option:

OPTION 1

Amount Financed Without Personal Credit Insurance $_____
No. of Months_____

_____ (Borrower)

_____ (Borrower)

_____ (Date)

OPTION 2

Amount Financed With Credit Life Only $_____
No. of Months_____

_____ (Borrower)

_____ (Borrower)

_____ (Date)

OPTION 3

Amount Financed With Credit A & H (Disability) Only $_____
No. of Months_____

_____ (Borrower)

_____ (Borrower)

_____ (Date)

OPTION 4

Amount Financed With Credit Life and A & H (Disability) $_____
No. of Months_____

ATTACHMENT B

_____ Name of Creditor

_____ Address of Creditor

DEAR CUSTOMER: As part of your current credit transaction with us charges were made for credit life insurance, credit disability insurance, auto medical payment insurance and auto club membership [mention as applicable], in the following amounts:

Type of coverages	*Amount charged*
Credit Life Insurance	$_____
Credit Disability Insurance	_____
Auto Medical Payments Insurance	_____
Auto Club Membership	_____

Because many of our customers may not have been fully aware of the voluntary nature of this insurance coverage (and membership) at the time they purchased it, we are offering you the opportunity to cancel your insurance coverage (and membership). If you decide to cancel your insurance (and/or membership), the company will credit your account with the balance of the premiums or fees due if your account is delinquent. If your account is current we will make a cash refund of the balance due. This amount will be based on a schedule which takes into account the remaining time period on your transaction and the protection which you have already received. If you cancel this insurance, your protection will end as of the date we receive your written notice of cancellation.

If you desire to cancel your insurance coverage (and/or membership), please complete the enclosed form and return it within two weeks in the enclosed envelope which requires no stamp. If you want your insurance (and membership) to remain in force, you need not return the enclosed form or take any other action in connection with this matter.

Sincerely,

ATTACHMENT C

From (Name of Borrower):
To (Name of Creditor):

At the time I entered into my transaction, I did not understand that credit insurance (and other benefits listed below) were voluntary. Please cancel the benefits checked below and refund to me the applicable portion of the premium(s) and/or fee(s) shown on this form. I understand that the company reserves the right to credit my account with such refund if my account is in delinquent status.

CHECK COVERAGE TO BE CANCELLED

( ) Cancel my credit life insurance (list applicable coverages).
( ) Cancel my credit disability insurance.
( ) Cancel my auto medical payments insurance.
( ) Cancel my auto club membership.

(NOTE.—Do not sign or return this form if you want your benefits to remain in force.)

Date_____

PROVIDERS BENEFIT COMPANY, ET AL.

[File No. 762 3087]

Analysis of proposed consent order to aid public comment

The Federal Trade Commission has accepted an agreement containing a consent order from Provident Credit Corp., 45 South 15th St., Philadelphia, Pa., its wholly-owned subsidiary, Provident Consumer Discount Co., Inc., located at the same address, and the parent corporation, Providers Benefit Co., 8045 West Chester Pike, Upper Darby, Pa.

The respondents maintain operating offices in the States of Pennsylvania and New Jersey.

The proposed consent order has been placed on the public record for sixty (60) days for reception of comments by interested parties and the public. Comments received during this period will become part of the public record. After sixty (60) days, the Commission will again review the agreement and the comments received and will decide whether it should withdraw from the agreement or make final the agreement's proposed order.

The complaint alleges that respondents violated the Truth in Lending Act by failing to make certain required credit cost disclosures and failing to use required terminology on their credit contracts.

The complaint also alleges that respondents induce its obligors to incur charges for credit life insurance, credit disability insurance, automobile medical insurance and for automobile club plan membership without adequately advising them that the insurance is optional.

The consent order protects consumers by requiring respondents to provide customers with all of the required credit cost information in the proper manner and form prior to consummation of an agreement.

The consent order also requires that respondents advise customers of the optional nature of the credit insurance through the use of notice and a separate credit insurance election form to be signed by the obligor. Respondents are required to contact all customers with obligations outstanding and to offer them the opportunity to cancel their insurance coverage and receive a partial refund of the insurance premium paid.

The purpose of this analysis is to facilitate public comment on the proposed order and it is not intended to constitute an official interpretation of the agreement and proposed order or to modify in any of their terms.

JAMES A. TOBIN,
Acting Secretary.

HEARING AID INDUSTRY

Publication of Presiding Officers Report Regarding Proposed Trade Regulation Rule

AGENCY: Federal Trade Commission.

ACTION: Publication of Presiding Officer's Report.

SUMMARY: On December 30, 1975 the Presiding Officer published in the FEDERAL REGISTER (40 FR 59746) final notice of the proposed trade regulation rulemaking proceeding. The Presiding Officer's Report, required by the Commission's rules of practice for rulemaking (16 CFR 1.13(f)) consisting of his summary, findings and conclusions with regard to the proposed rule and to those issues designated by the Presiding Officer and such other findings and conclusions as he saw fit to make, has been made public and placed on Public Record No. 215-44. When completed, the staff's report on the rulemaking record and its recommendations to the Commission also will be made public and notice thereof published in the FEDERAL REGISTER. The Presiding Officer's Report has not been reviewed or adopted by either the Bureau of Consumer Protection or the Commission itself and its publication should not be interpreted as reflecting the present views of the Commission or any individual Commissioner.

DATE: The sixty-day period which the rules of practice for rulemaking (16 CFR 1.13(g)) provide for public comment on both the Presiding Officer's and the staff's report will not commence until the staff's report has been made public and placed on the public record. Therefore, comment on the Presiding Officer's report alone would be considered premature at this time.

HEALTH SPAS

Change in Hearing Date Concerning Proposed Trade Regulation Rule

AGENCY: Federal Trade Commission.

ACTION: Change in hearing date.

SUMMARY: The hearings concerning the proposed Health Spas Trade Regulation Rule scheduled to commence in Atlanta, Ga., on September 12, 1977, have been rescheduled to commence on September 15, 1977.

DATES: Hearings commence: Atlanta, Ga., September 15, 1977; San Francisco, Calif., October 17, 1977; New York, N.Y., November 28, 1977. Statements of testimony or comprehensive written outlines and exhibits due for hearings at Atlanta, by August 22, 1977; San Francisco, by September 26, 1977, New York by November 7, 1977.

FOR FURTHER INFORMATION CONTACT:

Jack Cothran, 404–881–4836, Federal Trade Commission, Atlanta Regional Office, 1718 Peachtree Street NW., Room 1000, Atlanta, Ga., 30309.

SUPPLEMENTARY INFORMATION: The Presiding Officer's final notice published in the FEDERAL REGISTER (42 FR 26432) on May 24, 1977 established, among other things, the commencement date for hearings in Atlanta, Ga. That Final Notice is revised as follows: Section B—Public Hearings, Dates and Places, paragraph 1, is changed to read September 15, 1977 vice September 12, 1977. All other information contained in the Final Notice remains the same.

Issued: August 29, 1977.

ROGER J. FITZPATRICK,
Presiding Officer.

POSTAL SERVICE

[39 CFR Part 111]

NONMAILABLE MATTER—WRITTEN, PRINTED AND GRAPHIC MATTER

Solicitations in the Guise of Bills, Invoices, or Statements of Account

AGENCY: United States Postal Service.

ACTION: Proposed rule.

SUMMARY: This proposed rule would provide additional protection for members of the public who receive mail which is in the form of a bill or invoice, but which constitutes, in fact, a commercial solicitation. The proposed rule would prescribe how a statutory notice should be placed on such mail to identify it as a solicitation and to warn that the recipient is under no obligation to make any payment unless the offer is accepted.

DATES: Comments must be received on or before September 30, 1977.

ADDRESSES: Assistant General Counsel, Consumer Protection Division, Law Department, United States Postal Service, Washington, D.C. 20260.

FOR FURTHER INFORMATION CONTACT:

George C. Davis, 202–245–4385.

SUPPLEMENTARY INFORMATION: Under 39 U.S.C. 3001(d), mail which is in the form of, and reasonably could be interpreted to be a bill, invoice, or statement of account due, but which constitutes, in fact, a solicitation for the order by the addressee of goods or services, is mailable only if it bears on its face a notice which identifies it as a solicitation and warns that the recipient is under no obligation to make any payment unless the offer is accepted. The required notice may take one of two forms. Under 39 U.S.C. 3001(d)(2)(A), the mail may bear on its face, in a manner prescribed by the Postal Service, the following notice:

> This is a solicitation for the order of goods or services, or both, and not a bill, invoice, or statement of account due. You are under no obligation to make any payments on account of this offer unless you accept this offer.

Because of administrative oversight, the Postal Service has never issued any regulations prescribing the typography, layout, color, or other requirements applicable to this statutory notice.

As an alternative, under 39 U.S.C. 3001(d)(2)(B), the mailer may place on the solicitation a notice to the same effect prescribed by the Postal Service. Acting under paragraph (2)(B), the Postal Service has issued regulations contained in Postal Service Manual 123.41 which permit any solicitation in the guise of a bill, invoice, or statement of account to bear on its face the disclaimers, "This Is Not A Bill", and "This Is A Solicitation. You Are Under No Obligation To Pay Unless You Accept This Offer." the regulations also set forth in detail the location, size of print, color, and other requirements pertaining to the disclaimers.

There has been little or no use of the disclaimers prscribed in Postal Service Manual 123.41. Instead, mailers sending solicitations in the form of bills or statements of account have tended merely to place the statutory notice of 39 U.S.C. 3001(d)(2)(A) on their mailings, in a manner little calculated to bring the notice to the attention of the recipients of the solicitations. The Postal Service has received numerous complaints regarding this practice from postal customers, trade groups, and Members of Congress.

In order to insure that the public receives the full protection afforded by 39 U.S.C. 3001(d), the Postal Service proposes to establish specific regulatory requirements concerning the color and size of type used to present the statutory notice of 39 U.S.C. 3001(d)(2)(A).

Although exempted from the requirements of the Administrative Procedure Act, 5 U.S.C. 553(b), (c), regarding proposed rulemaking by 39 U.S.C. 410(a), the Postal Service invites public comment on the following proposed revision of the Postal Service Manual:

PART 123—NONMAILABLE MATTER—WRITTEN, PRINTED AND GRAPHIC MATTER

1. In 123.41, delete the subsection designation "c.", thereby incorporating former subsection c. into subsection b.

2. In 123.41, add new subsection c. as follows:

* * * * *

c. In lieu of the requirements in a. and b., the solicitation may bear on its face the disclaimer prescribed by 39 U.S.C. 3001(d)(2)(A) in boldface capital letters of a color prominently contrasting with the background against which it appears, including all other print on the face of the solicitation, and at least as large and as bold as any other print on the face of the solicitation, but not smaller than 30-point type.

An appropriate amendment to 39 CFR 111.3 to reflect these changes will be published if the proposal is adopted.

(39 U.S.C. 401(2), 3001(d)(2).)

ROGER P. CRAIG,
Deputy General Counsel.

ENVIRONMENTAL PROTECTION AGENCY

[40 CFR Part 52]

[FRL 782-7]

APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

South Carolina: Proposed Plan Revisions

AGENCY: Environmental Protection Agency.

ACTION: Proposed rule.

SUMMARY: It is proposed to revise the South Carolina implementation plan by eliminating stack height provisions from its emission limiting regulations and by adding provisions for mandatory continuous monitoring by certain existing sources. The first change is made to respond to judicial decisions on the issue of tall stacks; the second change is in response to new implementation plan requirements promulgated by EPA in October, 1975.

DATE: Comments must be received on or before September 29, 1977.

ADDRESSES: Written comments on the proposed revisions should be addressed to Mr. Tom Helms of EPA's Region IV Air Programs Branch in Atlanta (see address below). Copies of materials submitted by South Carolina may be examined during normal business hours at the following locations:

Public Information Reference Unit, Library Systems Branch, EPA (PM–213), 401 M Street SW., Washington, D.C. 20460.

EPA—Region IV, 345 Courtland Street NE., Atlanta, Ga. 30308.

South Carolina Bureau of Air Quality Control, 2600 Bull Street, Columbia, S.C. 29201.

FOR FURTHER INFORMATION CONTACT:

Mr. Tom Helms, Chief, Air Programs Branch, EPA—Region IV, 345 Courtland Street NE., Atlanta, Ga. 30308.

SUPPLEMENTARY INFORMATION: On May 31, 1972 (37 FR 10842), the Administrator approved the South Carolina plan to attain and maintain the national ambient air quality standards in that State. The original South Carolina plan, in common with a number of other State implementation plans, contained emission limiting regulations which were based in part on stack height. Specifically, existing fuel burning sources of particulates with a rated heat input of 350 million btu per hour or more were allowed to emit at a higher rate if equipped with taller stacks than would otherwise be the case. For example, a source with a heat input capacity of 5,000 million btu per hour was limited to 0.2 lb/MMbtu if equipped with a stack 225 feet tall, whereas a facility of the same size was allowed to emit 0.6/lb-MMbtu if fitted with a stack of 600 feet.

On February 8, 1974, in the case of *National Resources Defense Council* v. *EPA* (6 ERC 1248), the U.S. Court of Appeals for the Fifth Circuit found that the use of dispersion enhancement techniques such as tall stacks was not a valid control strategy in cases where constant emission controls were available. This finding was subsequently confirmed by other court decisions; the legal issues are discussed in EPA's Stack Height Increase Guideline of February 18, 1976 (41 FR 7450). In keeping with the implications of these judicial decisions, the State of South Carolina, after notice and public hearing, revised its particulate emission limits for fuel combustion in such a way as to eliminate stack height as a basis for determining allowable emissions. The revised regulations (Regulations 62.6, Standard No. 2, Section 2A) provide a limit of 0.6 pounds of particulate per million btu heat input for sources with a rated capacity of 10 to 1300 million btu per hour. For larger sources, a sliding and descending scale applies, expressed by the Formula $E=57.84p^{-0.67}$, where "E" is the allowable emission rate in pounds per million btu input and "P" is the heat input expressed in millions of btu per hour. For example, a source with a heat input of 5000 million btu per hour would be allowed to emit only 0.2547 lb/MMbtu.

The revised emission limiting regulations were submitted to EPA as a proposed plan revision on January 13, 1977. On March 30, 1977, the South Carolina Department of Health and Environmental Control submitted an amendment to the plan's particulate control strategy in support of the new limits. For seven facilities, this amendment indicates, application of the revised limits would result in allowable emissions greater than those allowed under existing regulations. Because of the problems anticipated in maintaining standards in two areas, two of these facilities have been issued operating permits specifying they must meet the limits established by the old regulations—International Paper Company in Georgetown and the South Carolina Electric and Gas Company's Hagood Plant in Charleston. Mathematical modeling of four of the remaining facilities at the new emission limits showed that resulting air quality would remain below secondary standards; the seventh was not modeled since the increase allowed (1.5%) was not felt to be significant in view of the source's location, an isolated area where standards are being met.

The South Carolina regulations dealing with particulate emissions from fuel burning were also amended to provide for the continuous monitoring of the opacity of emissions from existing large sources (250 million btu or more), pursuant to the continuous monitoring requirements promulgated by the Agency on October 6, 1975 (40 FR 46240) as Appendix P to 40 CFR Part 51. Under the guidelines set in Appendix P, continuous monitoring of other pollutants is not indicated. Moreover, there are no facilities of the other categories (size) covered—nitric and sulfuric acid plants, petroleum cracking plants—in the State of South Carolina.

The public is invited to participate in this rulemaking by submitting written comments (see under DATE and ADDRESSES above) on these revisions in the South Carolina plan. Final action on these revisions will take into account any pertinent comments received within the time allotted.

(Sec. 110(a), Clean Air Act, (40 U.S.C. 1857c-5(a)).)

Dated: July 15, 1977.

JOHN A. LITTLE,
Acting Regional Administrator.

[FR Doc.77-25261 Filed 8-30-77;8:45 am]

[40 CFR Part 180]

[FRL 783-2; OPP-260027]

TOLERANCES AND EXEMPTIONS FROM TOLERANCES FOR PESTICIDE CHEMICALS IN OR ON AGRICULTURAL COMMODITIES

Proposed Revocation of Tolerances for Decachlorooctahydro - 1,3,4 - metheno-2H-cyclobuta[cd]pentalen-2-one

AGENCY: Office of Pesticide Programs, Environmental Protection Agency (EPA).

ACTION: Proposed revocation of tolerance for the insecticide decachlorooctahydro - 1,3,4-metheno-2*H*-cyclobuta[*cd*] pentalen-2-one (acceptable common chemical name chlordecone; trade name Kepone) contained in 40 CFR 180.287.

SUMMARY: The evidence before the Agency has prompted the EPA to propose that 40 CFR 180.287, which contains a tolerance for chlordecone residues in or on bananas, be revoked. The Agency has recently taken action to cancel the registrations of peticide products containing chlordecone. There is, however, the risk of use of existing stocks of this pesticide by foreign countries. It is also possible that future availability of chlordecone from another source may result in use on raw agricultural commodities in foreign countries and the subsequent importation of these treated commodities into the United States. The revocation of the chlordecone tolerance for bananas would, in effect, prevent introduction of any foreign grown bananas containing chlordecone residues into the United States. Thus, the possibility of future exposure to the public from this source will be prevented.

DATES: An advisory committee may be requested on or before September 29, 1977. Comments on the proposal may be submitted on or before September 29, 1977.

ADDRESSES: Requests for an advisory committee should be addressed to: Hearing Clerk, Environmental Protection Agency, 401 M Street SW., East Tower, Room 1019, Washington, D.C. 20460. Comments on the proposal should be addressed to the Federal Register Section, Technical Services Division (WH–569), Office of Pesticide Programs, EPA, Room 401, East Tower, at the same street address.

FOR FURTHER INFORMATION CONTACT:

Mr. Frederick Hageman, Office of Special Pesticide Reviews (WH–566), Office of Pesticide Programs, EPA, at the above address or by telephone at 202–755–5755.

SUPPLEMENTARY INFORMATION: On March 25, 1976, the Environmental Protection Agency (EPA) published notices and rebuttable presumption against registration and continued registration of pesticide products containing chlordecone (Kepone) (41 FR 12333). The basis for the presumption was the observed chronic oncogenic effect of chlordecone in laboratory animals.

The Agency evaluated the rebuttal information and other comments received in response to the notices, performed a benefit/risk evaluation of the use of registered chlordecone products, and drafted a proposed action which was reviewed by the United States Department of Agriculture and the Scientific Advisory Panel, EPA (created under Section 24(d) of the Federal Insecticide, Fungicide and Rodenticide Act). After considering USDA and SAP comments, EPA issued a notice of intent to cancel the registrations of pesticide products containing

V 42 169 AUG 31 77 A UMI

chlordecone (42 FR 18885). Material before the Agency indicated that continued registration of these pesticide products appeared to pose substantial questions of safety amounting to an unreasonable risk to man and the environment. The terms of the cancellation, effective May 11, 1977: *Provided*, That the distribution, sale, and use of existing stocks of inaccessible chlordecone products could continue. Inaccessible chlordecone products are defined as all-enclosed Kepone traps made from metal or plastic as well as metal stakes containing enclosed Kepone bait which are hammered into the ground. However, the continued distribution, sale, and use of existing stocks of accessible chlordecone products is not permitted since use of existing stocks of these products is judged to pose an unreasonable adverse effect to man. Accessible products are defined as those which in normal use would be removed from their containers, as well as foil or cardboard covered traps.

The notices of presumption against registration and continued registration of pesticide products containing chlordecone and subsequent cancellation actions were conducted in accordance with the provisions of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended (86 Stat. 973, 89 Stat. 751, 7 U.S.C. 136 et seq.).

For the reasons stated in the notices of rebuttable presumption against registration (41 FR 12333) and the notices of intent to cancel the registrations (42 FR 18385), the Agency is proposing to revoke the tolerance for chlordecone. 40 CFR 180.287 contains a tolerance, or maximum permissible residue level, of 0.01 part per million (ppm) of chlordecone in or on bananas. Chlordecone use on bananas has been primarily a foreign use. The petitioner for the tolerance for chlordecone in or on bananas was United Fruit Co., Miami, Fla. 33145, which filed petition PPOE0919. The tolerance was proposed (35 FR 16980) and established (36 FR 6496) in accordance with the provisions of the Federal Food, Drug and Cosmetic Act (21 U.S.C. 346a(e)).

The recent chlordecone contamination of the James River and Chesapeake Bay has resulted in the establishment of action levels for residues of the pesticide which may occur in seafood. Action levels are established by the Food and Drug Administration (FDA). Both tolerances and action levels are enforced by the FDA. Action levels are applied when inadvertent residues are discovered in or on raw agricultural commodities or processed food or feed. Such residues may occure unexpectedly due to accidents or misuse and when factors required to be considered before promulgation of a tolerance are rapidly changing. A tolerance implies a zero health risk; action levels, while not established at levels known to be hazardous to health, do accept some risk.

The risks and benefits associated with consumption of Chesapeake Bay seafood were assessed and action levels were established after considering safety and unavoidability of contamination. Action levels are in effect for the edible portion of crabs at 0.4 ppm, and other shellfish (oysters and clams) and finfish at 0.3 ppm.

Cancellation of the sole chlordecone product registered for use on bananas (at the voluntary request of the registrant; 41 FR 24624) ensures the absence of risk from residues in or on bananas grown in this country and its possesisons, primarily Puerto Rico. (Diazinon is currently registered by EPA as an alternative to chlordecone for control of the banana root borer on bananas.)

There remains, however, in spite of the cancellation, the risk of use of existing stocks of chlordecone products by foreign countries and the possible future availability of chlordecone from another source for use on raw agricultural commodities in foreign countries which could result in the subsequent importation of treated commodities into the United States. The revocation of the only chlordecone tolerance, i.e. for bananas, would, in effect, prevent introduction into the United States of any foreign grown commodities with chlorodecone residues. Thus, the possibility of future exposure to the public in this manner will be prevented.

Any person who has registered or submitted an application for the registration of a pesticide under the Federal Insecticide, Fungicide, and Rodenticide Act which contains any of the ingredients listed hercin may submit a request to the Hearing Clerk for this proposal to be referred to an advisory committee in accordance with section 408(e) of the Federal Food, Drug, and Cosmetic Act.

Interested persons are invited to submit written comments on this proposal to revoke 40 CFR 180.287 to the office of the Federal Register Section at the above address. Three copies of the comments should be submitted to facilitate the work of the Agency and of others interested in reviewing them. All written comments filed pursuant to this notice will be available for public inspection in the office of the Federal Register Section.

Dated: August 17, 1977.

EDWIN L. JOHNSON,
Deputy Assistant Administrator for Pesticide Programs.

(Sec. 408 (e), (m), Federal Food, Drug, and Cosmetic Act (21 U.S.C. 346a (e) and (m)).)

It is proposed that 40 CFR Part 180 be amended by revoking § 180.287.

§ 180.287 [Removed]

FINANCIAL ASSISTANCE FOR CONSTRUCTION, RECONSTRUCTION, AND RENOVATION OF HIGHER EDUCATION FACILITIES

Correction

In FR Doc. 23370 appearing at page 40926 in the issue for Friday, August 12, 1977, the following corrections should be made.

1. In the first column on page 40927, line 7 of the first paragraph under the heading, "SUMMARY OF COMMENTS AND RESPONSES", reading, "was published in the FEDERAL REGISTER", should be deleted.

2. Line 14 of the first full paragraph in the first column on page 40932, now reading, "of a public institution of higher educa-", should also be deleted.

3. Line 5 of the first paragraph under § 170.11 in the second column on page 40932, now reading, "novation meet the requirements specified", should read, "novation must meet the requirements specified".

4. In the first column on page 40933, paragraph (d) (1) should appear before the authority citation and there should also be a paragraph (d) (2) which reads as follows;

(d) * * *

(2) The application is recommended by the State Commission in accordance with the priority system established in the State plan.

5. In the middle column of page 40935, the following line should be inserted between lines 12 and 13 of § 170.42: "appropriate, each application will be".

FM BROADCAST STATIONS IN FAYETTEVILLE AND SPRINGDALE, ARKANSAS

Request for Supplemental Information

AGENCY: Federal Communications Commission.

ACTION: Request for Supplemental Information; proposed rule.

SUMMARY: This request seeks more information from parties proposing Class C assignments at Springdale and Fayetteville, Arkansas, so that the Commission can resolve the conflicts and determine if such assignments would be in the public interest. Although the assignments would be contrary to certain Commission FM assignment policies, exceptions have been permitted on showing of special circumstances such as a large amount of first aural service.

DATES: Comments must be filed on or before October 3, 1977, and reply comments on or before October 25, 1977.

ADDRESSES: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT:

Mark N. Lipp or James J. Gross, Broadcast Bureau (202-632-7792).

SUPPLEMENTARY INFORMATION: This proceeding also involves 14 other Arkansas communities. Actions on the proposals affecting those communities were taken in a separate Report and Order, adopted August 16, 1977; 42 FR 42858 (1977).

Adopted: August 19, 1977.

Released: August 24, 1977.

In the matter of Amendment of § 73.202(b), Table of Assignments, FM Broadcast Stations. (Little Rock, Benton, Batesville and Mountain View, Ark. Also Cherokee Village, Dardanelle, Dumas, Fayetteville, Lonoke, Malvern, Morrilton, Ozark,[1] Pine Bluff, Russellville, Sheridan, Springdale,[1] and Van Buren, Arkansas and Neosho, Mo., Docket No. 19879; RM-2020, RM-2064, RM-2113, RM-2226, RM-2177, RM-2264, RM-2288, RM-2299, RM-2305, RM-2313, RM-2381, RM-2404, RM-2387, RM-2527.

1. The Commission here requests further information in conjunction with the Further Notice and Order to Show Cause, released April 24, 1975 (40 FR 18452), as well as the recent Report and Order, adopted August 16, 1977, in this proceeding. Except for the communities of Fayetteville and Springdale, Arkansas, the Report and Order resolves the various proposals and counterproposals for FM assignments at each of the communities, including those previously in conflict with these two proposals. However, additional data is needed in order to resolve the remaining questions regarding the Fayetteville and Springdale, Arkansas, proposed assignments.

2. Vernon B. Fitzhugh proposed the assignment of Class C Channel 300 to Fayetteville as a third FM assignment to that community. Kessler Mountain Broadcasting Co., Inc., licensee of FM Station KNWA (Channel 280A), Fayetteville, requested the substitution of Class C Channel 281 for its Class A channel and modification of its license to specify the Class C channel. Johnson Communications, Inc., licensee of Station KCIE-FM, Springdale, Arkansas, proposed to substitute Channel 300 for Channel 285A at Springdale,[2] and to modify its license accordingly.

[1] This community has been added to the caption.

[2] Channel 300 cannot be assigned to both Fayetteville and Springdale consistent with our mileage separation rule which requires a distance of 290 kilometers (180 miles for co-channel Class C stations. See § 73.207(a) of the Commission's Rules.

3. Fayetteville (pop. 30,729), seat of Washington County (pop. 77,370), is located in northwest Arkansas. It presently has two daytime-only AM stations (KFAY and KHOG) and two commercial FM stations (KKEG, Channel 221A, and KNWA, Channel 280A). Springdale (pop. 16,783) also in Washington County, is located approximately 13 kilometers (8 miles) north of Fayetteville. It has a full-time AM station (KBRS), petitioner's daytime-only AM station (KSPR), and petitioner's Class A FM station (KCIE, Channel 285A). Recent estimates place the present population at approximately 20,000.

4. Regarding the preclusive impact of the proposed assignment, a Fayetteville Channel 300 assignment would not foreclose future assignments to any communities without Class C assignments which would normally warrant such an assignment. A Channel 300 assignment at Springdale would not deny any city with a population over 10,000 a first Class C allocation, nor would it preclude any Class A assignments. Channel 281 substituted for Channel 280A at Fayetteville would foreclose future channel assignments at Heavener (pop. 2,566), Wilberton (pop. 2,280), Stigler (pop. 2,347), and Quinton (pop. 1,262), Oklahoma, and Marshall, Arkansas (pop. 1,397).

5. As it now stands, the record is inadequate to support the proposed Class C assignments at Fayetteville or Springdale. Before a Class C channel could be assigned to Springdale we would need assurance that it would be designed to serve that community rather than the nearby and larger community of Fayetteville. See Berwick Broadcasting Co., 20 F.C.C. 2d 393 (1973). Additionally, we would need to consider whether it would be appropriate to modify the licenses of the existing Class A stations to specify operation on a Class C channel as has been proposed. Since the Commission issued its decision in the lead case in this area (Cheyenne, Wyoming, 62 F.C.C. 2d 63 (1976)) after the deadline for comments in this proceeding, the parties have not had an opportunity to offer their views on the implications of that case in the present context.

6. We also need additional comments on another aspect of the proceeding, and that is the allegation of first and second aural service. Such information is important because without it we would not be able to justify any of the requested Class C assignments. The Commission's assignment criteria provide that communities with populations of less than 50,000, such as Fayetteville should normally be assigned not more than two FM channels. The Commission also has a policy of avoiding the assignment of a Class C channel which would result in the inter-mixture of that assignment with one or more existing Class A channels in a community as would be the case in Fayetteville. Typically, communities the size of Springdale would not be assigned a wide coverage Class C channel without a compelling showing of need that could not be met by an available Class A channel.

7. Exceptions, however, have been made to each of these policy considerations when a strong showing of public benefit has been made. For instance, provision of a first aural service has been recognized as a very high priority in FM assignment cases, and could weigh in favor of the assignment of a Class C channel, if a sufficient showing were made. See Anamosa-Iowa City, Iowa, 46 F.C.C. 2d 520 (1974); Oak Ridge, Tenn., 32 F.C.C. 2d 937, 940-947 (1972); Parkersburg, W. Va., 37 F.C.C. 2d 54 (1972). Since we do not have adequate information regarding the extent of first aural service which could be provided by each of the proposals, we are offering this additional opportunity for the parties to provide sufficient information. Comments should address the issues mentioned above, so that the Commission can decide if it is possible to justify any of the requested Class C channels.

8. The information now before us includes an Anamosa[3] showing of aural service for one of the three proposals.[4] However, the data submitted concerning the Fayetteville Channel 281 and Springdale Channel 300 proposals, is confined to the extent of first and second FM service, rather than a showing of first aural service which could be provided by those proposals.[5] We therefore seek an Anamosa analysis of any first aural service which these proposals could provide taking into account existing AM broadcast stations. This showing should indicate the extent of any first aural service which would be provided by Class A channels available for assignment at these communities.

9. It should be noted by all interested parties that this Request for Supplemental Information relates only to the issues specifically referred to in paragraphs 5, 6 and 7, supra. Any counterproposals or comments on other issues are untimely and will not be considered.

10. Interested parties may file comments on or before October 3, 1977, and reply comments on or before October 25, 1977 All submissions by parties to this proceeding or persons acting on behalf of such parties shall be made in written comments, reply comments, or other appropriate pleading.

11. An original and 4 copies of all comments, reply comments, pleadings, briefs and other documents shall be furnished the Commission. All filings made in this

[3] Anamosa-Iowa City, Iowa, supra.

[4] Fitzhugh asserts that a Fayetteville station operating on Channel 300 with 100 kW and 162 meters (530 feet) HAAT antenna could provide a first aural service to 9,412 persons, and a second aural service to 35,200 persons.

[5] Kessler asserts that Channel 281 at Fayetteville, operating at 100 kW and 156 meters (510 feet) HAAT, could provide a first FM service to 4,211 persons and a second FM service to 21,679 persons. Johnson Communications at Springdale claims that a Channel 300 station operating at 75 kW and 153 meters (500 feet) HAAT, could provide a first FM service to 5,224 persons and a second FM service to 27,913 persons.

V42169 AUG 31 77 UMI

proceeding will be available for examination by interested parties during regular business hours in the Commission's Public Reference Room at its headquarters, 1919 M Street, Washington, D.C.

INTERSTATE COMMERCE COMMISSION

[49 CFR Chapter X]

FREIGHT FORWARDERS—TARIFF FILING REQUIREMENTS FOR MOVEMENTS IN FOREIGN COMMERCE

Advance Notice of Proposed Rulemaking

AGENCY: Interstate Commerce Commission.

ACTION: Advance notice of proposed rulemaking.

SUMMARY: The Interstate Commerce Commission is considering proposing a rule which would provide that freight forwarders authorized by the Interstate Commerce Commission to provide transportation in foreign commerce from or to points within the United States must file tariffs with the Commission setting forth all charges for the total transportation services which they hold themselves out to provide, with that portion of the charges attributable to transportation services performed within the United States separately stated. The purpose of such a rule would be to resolve possible ambiguities concerning the tariff filing obligations of freight forwarders providing international transportation services.

DATES: Comments by interested persons are invited, and must be filed with the Secretary of the Commission on or before October 10, 1977.

FOR FURTHER INFORMATION CONTACT:

Martin E. Foley, Director, Bureau of Traffic, Interstate Commerce Commission, 12th and Constitution Ave. NW., Washington, D.C. 20423 (202-275-7348).

SUPPLEMENTARY INFORMATION:

BACKGROUND

Section 402(6) of the Interstate Commerce Act, 49 U.S.C. 1002(6), provides in relevant part that "interstate commerce" means transportation "from or to any point in the United States to or from any point outside thereof, but only insofar as such transportation takes place within the United States."

The requirements for the publishing and filing of freight forwarder tariffs are set out in Section 405 of the Act, 49 U.S.C. 1005, which provides in relevant part:

(a) Every freight forwarder shall file with the Commission and print, and keep open to public inspection, tariffs showing its rates and charges for service subject to this part, and all classifications, rules, regulations, and practices with respect thereto. Such tariffs shall become effective only after thirty days' notice, and shall plainly state the points between which property will be transported, the classification of property, and, separately, all terminal charges, or other charges which the Commission shall require to be so stated, all privileges or facilities granted or allowed, and any rules or regulations which in any wise change, affect, or determine any part or the aggregate of such rates or charges, or the value of the service rendered to the shipper or consignee.

(b) All rates and charges of freight forwarders for service subject to this part shall be stated in lawful money of the United States. The Commission shall by regulations prescribe the form and manner in which the tariffs to which this section applies shall be published, filed, and posted; and the Commission is authorized to reject any tariff filed with it which is not in accordance with this section and with such regulations. Any tariff so rejected by the Commission shall be void and its use shall be unlawful.

The Commission has noted that there may be some question concerning the tariff filing obligations of freight forwarders engaged in international movements. The Commission is considering proposing a comprehensive rule which would require such freight forwarders to file tariffs with the Commission showing (1) total charges for all transportation provided, and (2) a separate statement of the domestic portion of those total charges.

COMMENTS

By this Advance Notice we are soliciting the views of all interested parties in the hope that relevant issues can be raised prior to the Commission's determination whether to propose such a rule. We invite interested parties thoroughly to address the practical ramifications of such a rule, including the nature of the services which freight forwarders involved in international movements usually hold themselves out to perform, and issues relating to the Commission's jurisdiction to require filing of such tariffs and to regulate such transportation services. Attention should also be given to the circumstance of movements within a commercial zone, ordinarily exempt from regulation, where that movement is part of an international movement. Interested parties are also invited to comment on any other matter that may bear upon the subject of this Notice. No oral hearing is contemplated at this time.

Interested parties should file an original and 15 copies of their comments with the Secretary of the Commission at the following address:

Secretary, Interstate Commerce Commission, Washington, D.C. 20423.

By the Commission.

H. G. HOMME, JR.,
Acting Secretary.

Forest Service

FRANCIS MARION NATIONAL FOREST LAND MANAGEMENT PLAN

Notice of Availability of Final Environmental Statement

Pursuant to Section 102(2)(C) of the National Environmental Policy Act of 1969, the Forest Service, Department of Agriculture, has prepared a final environmental statement for the Francis Marion National Forest Land Management Plan, South Carolina, USDA-FS-R8-FES (Adm.) 77-10.

This unit contains 249,412 acres of National Forest land located in Berkeley and Charleston Counties, S.C. Major actions are harvesting timber products, development and maintenance of wildlife improvements, development of recreation facilities for dispersed recreation and construction and reconstruction of roads.

This final environmental statement was transmitted to CEQ August 22, 1977. Copies are available for inspection during regular working hours at the following locations:

USDA, Forest Service; South Agriculture Bldg., Rm. 3210, 12th St. and Independence Ave. SW., Washington, D.C. 20250.
USDA, Forest Service, 1720 Peachtree Road NW., Room 804, Atlanta, Ga. 30309.
USDA, Forest Service, Francis Marion and Sumter National Forests, 1801 Assembly Street, Columbia, S.C. 29201.

A limited number of single copies are available upon request to Forest Supervisor, Francis Marion and Sumter National Forests, 1801 Assembly Street, Columbia, S.C. 29201.

Copies of the environmental statement have been sent to various Federal, State, and Local agencies as outlined in the CEQ guidelines.

Dated: August 22, 1977.

ROBERT F. WILLIAMS,
Regional Environmental Coordinator.

KLAMATH BASIN WORKING CIRCLE TIMBER RESOURCE PLAN

Notice of Availabiilty of Draft Environmental Statement

Pursuant to Section 102(2)(C) of the National Environmental Policy Act of 1969, the Forest Service, Department of Agriculture, has prepared a draft environmental statement for Klamath Basin Working Circle Timber Resource Plan, USDA-FS-R6-DES(Adm) -77-13.

The environmental statement concerns a proposed revision of the 10-year Timber Resource Plan for 1,617.511 acres of National Forest land within the Klamath Basin Working Circle of the Winema and Fremont National Forests.

The draft environmental statement was transmitted to CEQ on August 23, 1977.

Copies are available for inspection during regular working hours at the following locations:

USDA, Forest Service, South Agriculture Bldg., Room 3210, 12th and Independence Ave. SW., Washington, D.C. 20250.
USDA, Forest Service, Pacific Northwest Region, 319 SW. Pine Street, Portland, Oreg. 97204.
USDA, Forest Service, Winema National Forest, Post Office Building, Klamath Falls, Oreg. 97601.
USDA, Forest Service, Fremont National Forest, 34 North D St., Lakeview, Oreg. 97630.

A limited number of single copies are avaliabel upon request to Forest Supervisor, Robert J. Chadwick, P.O. Box 1390, Klamath Falls, Oreg. 97601.

Copies of the environmental statement have been sent to various Federal, state, and local agencies as outlined in the CEQ guidelines.

Comments are invited from the public, and from State and local agencies which are authorized to develop and enforce environmental standards, and from Federal agencies having jurisdiction by law or special expertise with respect to any environmental impact involved for which comments have not been requested specifically.

Comments concerning the proposed action and requests for additional information should be addressed to Forest Supervisor, Robert J. Chadwick, P.O. Box 1390, Klamath Falls, Oreg. 97601. Comments must be received by October 22, 1977 in order to be considered in the preparation of the final environmental statement.

Dated: August 23, 1977.

CURTIS L. SWANSON,
Regional Environmental Coordinator, Planning, Programing and Budgeting.

[Docket No. 30402]

BRITISH AIRTOURS LTD.

Prehearing Conference

Notice is hereby given that a prehearing conference in this proceeding is assigned to be held on September 27, 1977, at 9:30 a.m. (local time) in Room 1003, Hearing Room B, Universal North Building, 1875 Connecticut, NW., Washington, D.C., before Administrative Law Judge Richard V. Backley.

Dated at Washington, D.C., August 24, 1977.

HENRY M. SWITKAY,
Acting Chief Administrative Law Judge.

[FR Doc.77-25374 Filed 8-30-77;8:45 am]

[Order 77-8-123; Docket Nos. 22859, 26838]

CONTINENTAL AIR LINES, INC.

Order of Suspension of Investigations

In the matter of general increase in air freight rates proposed by Continental Air Lines, Inc. Domestic Air Freight Rate Investigation: Docket 22859; Priority Reserved Air Freight Rates Investigation: Docket 26838.

Adopted by the Civil Aeronautics Board at its office in Washington, D.C. on the 25th day of August, 1977.

By tariff revisions[1] bearing a posting date of July 29 and marked to become effective September 12, 1977, Continental Air Lines, Inc. (Continental) proposes a systemwide increase in bulk and container general and specific commodity rates as follows:

Between Mainland points by 8 percent; From Mainland points to Hawaii by 10 percent; From Hawaii to Mainland points by 15 percent.

The proposal would increase Continental's domestic freight revenues by 8.8 percent.

In support of the proposal, the carrier asserts that it has experienced cost increases of 8.9 percent in the past year; that during the first five months of 1977, the carrier's Hawaiian operations suffered operating losses on freight of $230,000; that even if the proposed rates had been in effect during that period, it would have earned operating profits of $236,000 for an after-tax return on investment of only 5.86 percent; that current rates in Hawaiian markets are significantly below rates in Mainland markets of similar distances, particularly eastbound; and that the greater increases in Hawaiian markets are, therefore, justified.

All of the proposed rates either come within the scope of the *Priority Reserved Air Freight Rates Investigation (PRAFRI)*, Docket 26838 or are subject to the Board's decision in the *Domestic Air Freight Rate Investigation (DAFRI)*.[2]

[1] Revisions to Airline Tariff Publishing Company, Agent, Tariffs C.A.B. Nos. 169 and 227.

[2] The Board issued its decision in *DAFRI* in Order 77-8-62, served August 18, 1977.

V42169 AUG 31 77 UMI

The Board finds that many of the proposed priority-service minimum charges exceed 130 percent of the regular-service minimum charge, which the Board has found to be the maximum premium for priority service that should be permitted pending final decision in *PRAFRI*.[1] We will, therefore, suspend these rates. We will also supend a number of bulk specific commodity rates that exceed the corresponding general commodity rates, which are the basic rates for transportation.[2] Specific commodity rates, except for commodities that are more costly to transport, should not exceed the rates for the general run of commodities. None of the specific commodities to be suspended are alleged by the carrier to involve extra costs.

Certain of the remaining rates proposed by Continental, while conforming to the standards the Board has used before its decision in *DAFRI*, may exceed the ceiling imposed by our opinion in that case. If that proves to be the case,[3] those rates will have to be cancelled on February 14, 1978 pursuant to Order 77–8–62.

Accordingly, pursuant to the Federal Aviation Act of 1958, and particularly sections 2–4(a), 403, 404, and 1002 thereof.

It is ordered, that: 1. Pending hearing and decision by the Board, the increased rates, charges, and provisions described in Appendix A[4] be suspended and their use deferred to and including December 10, 1977, unless otherwise ordered by the Board, and that no change be made during the period of suspension, except by order or special permission of the Board; and

2. Copies of this order shall be filed with the tariffs and served upon Continental Air Lines, Inc.

This order shall be published in the FEDERAL REGISTER.

By the Civil Aeronautics Board.

PHYLLIS T. KAYLOR,
Secretary.

DEPARTMENT OF COMMERCE

Domestic and International Business Administration

MAYO FOUNDATION

Decision on Application for Duty-Free Entry of Scientific Article

The following is a decision on an application for duty-free entry of a scientific article pursuant to Section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89–651, 80 Stat. 897) and the regulations issued thereunder as amended (15 CFR 301).

A copy of the record pertaining to this decision is available for public review during ordinary business hours of the Department of Commerce, at the Office of Import Programs, Department of Commerce, Washington, D.C. 20230.

Docket Number: 77–00202. Applicant: Mayo Foundation, 200 First Street SW., Rochester, Minn. 55901. Article: Electron Microscope, Model EM 400HTG with High Tilt Goniometer and accessories. Manufacturer: Philips Electronics Instruments NVD, The Netherlands. Intended use of article: The article will be used for studies of biological materials that will include human and animal tissues and cells from normal as well as a variety of spontaneous and experimentally induced pathological states. Materials will also encompass non-cellular biologicals ranging from urine sediment to tissue fluid extracts, plasma proteins and coagulation factors. Many of the studies will include solid tissues such as kidney and skin biopsies, and others will include macromolecular biological specimens ranging from cell free DNA to purified enzymes. Non-cellular biological materials would include crystals of inorganic compounds and virus particles.

The experiments to be conducted will include: consideration of the normal function, biochemistry and ultrastructure of cells in culture and surgically obtained tissues; a consideration of subcellular enzyme activity and localization in a variety of disease states including cancer, atherosclerosis and hematologic disorders; the analysis for clinical diagnosis of kidney, cardiac and soft tissue tumor biopsies; the description and characterization through high resolution electron microscopy of enzyme, DNA, and virus structure; the intracellular localization of specific antigens or substances stored within cells (such as catecholamines, or inorganic ions); a description of plasma membrance changes associated with cell transformation or experimental manipulation; and the localization of specific subcellular sites of action of transforming chemicals.

Comments: No comments have been received with respect to this application. Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, was being manufactured in the United States at the time the article was ordered (December 7, 1976). Reasons: The description of the applicant's research and/or educational purposes establishes the fact that a conventional transmission electron microscope comparable to the foreign article is pertinent to the purposes for which the article is intended to be used. We know of no conventional transmission electron microscope which was being manufactured in the United States at the time the foreign article was ordered. ("Conventional transmission electron microscopes" are not to be confused with "scanning electron microscopes" which were manufactured domestically at the time the article was ordered and are still being manufactured in the United States.)

The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, which was being manufactured in the United States at the time the article was ordered.

(Catalog of Federal Domestic Assistance Program No. 11.105, Importation of Duty-Free Educational and Scientific Materials.)

UNIVERSITY OF CHICAGO

Decision on Application for Duty-Free Entry of Scientific Article

The following is a decision on an application for duty-free entry of a scientific article pursuant to Section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89–651, 80 Stat. 897) and the regulations issued thereunder as amended (15 CFR 301).

A copy of the record pertaining to this decision is available for public review during ordinary business hours of the Department of Commerce, at the Office of Import Programs, Department of Commerce, Washington, D.C. 20230.

Docket Number: 77–00207. Applicant: University of Chicago, Billings Hosp., Department of Pathology, 950 East 59th Street, Chicago, Ill. 60637. Article: Electron Microscope, Model EM 201 and accessories. Manufacturer: Philips Electronics Instruments NVD. The Netherlands. Intended use of article: The article is intended to be used in the investigation of atherosclerosis and atherosclerotic heart disease. Research is performed mainly on experimental animals and also utilizes some human tissues obtained at autopsy. The article will also be used for the training of future scientists and physicians.

Comments: No comments have been received with respect to this application. Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, was being manufactured in the United States at the time the article was ordered (December 7, 1976). Reasons: The description of the applicant's research and/or educational purposes establishes the fact that a conventional transmission electron microscope comparable to the foreign article is pertinent to the purposes for which the article is intended to be used. We know of no conventional transmission electron microscope which was being manufactured in the United States at the time the foreign article was ordered. (Conventional transmission electron microscopes" are not to be confused with "scanning electron microscopes" which were manufactured domestically at the time the article was ordered and are still being manufactured in the United States.)

The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, which was being manufactured in the United States at the time the article was ordered.

A copy of the record pertaining to this decision is available for public review during ordinary business hours of the Department of Commerce, at the Office of Import Programs, Department of Commerce, Washington, D.C. 20230.

Docket Number: 77–00196. Applicant: Yale University School of Medicine—Section of Cell Biology, 333 Cedar Street, New Haven, Conn. 06510. Article: Electron Microscope, Model JEM–100CX/SEG and accessories. Manufacturer: JEOL Ltd., Japan. Intended use of Article: the article is intended to be used to carry on research on tissues, cells, subcellular components from a variety of sources. The structure, surface morphology, and interaction of cells and subcellular components with physiological and experimental ligands will be investigated. Experiments to be conducted will cover analysis of structural aspects of basic functions, e.g., vessel (capillary) permeability; secretory process in cells producing digestive enzymes and hormones; membrane biogenesis in hepatic cells, and membrane biogenesis as altered by neoplastic transformation in mouse leukemia cells. The article will also be used for advanced training and research of graduate students, postdoctoral fellows, and research associates.

Comments: No comments have been received with respect to this application. Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, was being manufactured in the United States at the time the U.S. Customs Service received this application (April 21, 1977). Reasons: The article provides a guaranteed resolution of 3 Angstroms and is equipped with a scanning transmission electron microscope attachment which provides a guaranteed resolving power of 15 Angstroms.

The Department of Health, Education, and Welfare (HEW) advises in its memorandum dated June 24, 1977, that the characteristics of the article described above are pertinent to the applicant's intended purposes. HEW further advises that it knows of no domestic instrument which provides the pertinent features at the time the U.S. Customs Service received this application.

The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, which was being manufactured in the United States at the time the U.S. Customs Service received this application.

TITLE V—CONSTRUCTION-DIFFERENTIAL SUBSIDY SHIP CONSTRUCTION PROGRAM

Proposed Predetermined Limitation Policy

Correction

In FR Doc. 77–16769, appearing at page 30231 in the issue of Monday, June 13, 1977, the seventh entry in the last column of the table on page 30232 should read, "8.0".

National Oceanic and Atmospheric Administration

EXHIBITS, INC.

Withdrawal of Permit Application for Marine Mammals

On May 10, 1977, notice was published in the FEDERAL REGISTER (41 FR 23674), that an application had been filed with the National Marine Fisheries Service by Exhibits, Inc., Dorney Park Road, Allentown, Pa. 18104, for a public display permit to take three (3) California sea lions (*Zalophus californianus*).

Notice is hereby given that Exhibits, Inc., has requested to withdraw the application, and that the request to withdraw was acknowledged and accepted by the National Marine Fisheries Service on August 8, 1977.

Dated: August 25, 1977.

WINFRED H. MEIBOHM,
Acting Deputy Director, National Marine Fisheries Service.

PRELIMINARY FISHERY MANAGEMENT PLAN FOR PACIFIC BILLFISHES AND SHARKS

Public Hearing Change; Draft Environmental Impact Statement

Notice is hereby given of a change in the time of a hearing as published in the FEDERAL REGISTER on August 11, 1977 (42 FR 40755) for a public hearing concerning a draft environmental impact statement for the proposed implementation of a preliminary fishery management plan for Pacific billfishes and sharks.

The hearing scheduled for September 10, 1977, in the Kamakahonu Ballroom, King Kamehameha Hotel, Kailua-Kona, Hawaii will commence at 7 p.m., rather than 8:30 p.m. as originally scheduled.

Dated: August 26, 1977.

WINFRED H. MEIBOHM,
Associate Director. National Marine Fisheries Service.

ST. PAUL COMO PARK ZOO

Issuance of Permit for Marine Mammals

On April 11, 1977, notice was published in the FEDERAL REGISTER (42 FR 18882), that an application had been filed with the National Marine Fisheries Service by St. Paul Como Park Zoo, St. Paul, Minn. 55103, for a Permit to take eight (8) California sea lions (*Zalophus californianus*) for the purpose of public display.

Notice is hereby given that on August 24, 1977, and as authorized by the provisions of the Marine Mammal Protection Act of 1972 (16 U.S.C. 1361–1407), the National Marine Fisheries Service issued a Permit to St. Paul Como Park Zoo subject to cerain conditions set forth therein. The Permit is available for review in the following offices:

Director, National Marine Fisheries Service, 3300 Whitehaven Street NW., Washington, D.C.

Regional Director, National Marine Fisheries Service, Southwest Region, 300 South Ferry Street, Terminal Island, Calif. 90731.

Regional Director, National Marine Fisheries Service, Northeast Region, Federal Building, 14 Elm Street, Gloucester, Mass. 01930.

Dated: August 24, 1977.

WINIFRED H. MEIBOHM,
Associate Director. National Marine Fisheries Service.

ENVIRONMENTAL PROTECTION AGENCY

[FRL 783–1; OPP–180135]

CALIFORNIA DEPARTMENT OF FOOD AND AGRICULTURE

Issuance of a Specific Exemption to Use Methidathion To Control the Artichoke Plume Moth

The Environmental Protection Agency (EPA) has granted a specific exemption to the California Department of Food and Agriculture (hereafter referred to as the "Applicant") to use Supracide 2E (methidathion) in ground application to control the artichoke plume moth on 10,470 acres of artichokes in the counties of Santa Barbara, Monterey, and Santa Cruz in California. This exemption was granted in accordance with, and is sub-

[1] See, e.g., Orders 76–10–14, 75–12–98, and 75–12–28.

[2] See Orders 76–10–90, 75–6–70, and 74–12–128.

[3] The rates shown in our *DAFRI* decision to illustrate the costing methodology we adopted reflected cost data for the year ended September 30, 1976. It will be necessary to update those costs to make a definitive evaluation of Continental's rates.

[4] Appendix A filed as part of the original document.

V 42 169 AUG 31 77 UMI

ject to, the provisions of 40 CFR part 166, which prescribes requirements for exemption of Federal and State agencies for use of pesticides under emergency conditions.

This notice contains a summary of certain information required by regulation to be included in the notice. For more detailed information, interested parties are referred to the application on file with the Registration Division (WH–567), Office of Pesticide Programs, EPA, 401 M St. S.W., Room E–315, Washington, D.C. 20460.

Accordingly to the Applicant, approximately 10,470 acres of artichokes are grown in Santa Barbara, Monterey, and Santa Cruz counties; the artichoke plume moth (*Platyptilia carduidactyla*) is the most serious pest in all of these counties. EPA has been informed that the University of California at Davis has been working on the plume moth problem for several years. Resistance to ethyl parathion has been extreme; methyl parathion has given up to 30% control; ethylmethyl parathion combinations have given better control but 45–65% damage has been common. The Applicant stated that an additional problem with ethylmethyl parathion sprays has been that leafminers have increased in large numbers because of the ineffectiveness of these pesticides on leafminers; therefore, the leafminers became a public health hazard. Supracide 2E has demonstrated effectiveness on leafminers, and the artichoke plume moth, according to the Applicant. Up to 100% damage occurs if no pesticides are used.

Parathion, methyl parathion, and phosalone are currently registered for use to control the artichoke plume moth. However, as discussed above, the pest has developed resistance to parathion and methyl parathion. Currently application of these products is made at two week intervals; losses still approach the 50–75% level in secondary pest resurgence of the chrysanthemum leafminer. Phosalone is not significantly more effective than these products and is much more expensive. In addition, up until April 15, 1977, the county commissioner had suspended the use of any pesticide on artichoke fields because of severe bee losses that appear to be an indirect result of the frequent application of parathion and methyl parathion. The Applicant stated that field trials performed highly effective against the artichoke plume moth. Methidathion is also toxic to bees, but has demonstrated greater than 90% effectiveness for control of the plume moth after 4 or 5 applications.

The Applicant proposed to use the product Supracide 2E (methidathion), manufactured by Ciba-Geigy, EPA Reg. No. 100–501. The application rate will be one pound active ingredient/50–70 gallons of water/acre per application by ground spray. A maximun of 6 applications of Supracide 2E will be made prior to bud formation. A maximum of 62,820 pounds of active ingredient will be applied.

During the coming year, approximately 10,470 acres of artichoke crop will be grown in Santa Cruz, Santa Barbara, and Monterey counties. The Applicant estimated that growers will incur an economic loss of about $5,800,000 from crop damage caused by the artichoke plume moth unless methidathion is made available to control the pest.

Supracide 2E is registered for use in California on alfalfa grown for seed, oranges, and grapefruits; in the western United States on peaches; in the southeastern United States on pecans; and throughout the United States on sunflowers, tobacco, and walnuts. These uses are for ground or aerial application.

No tolerance has been set for methidathion for use on artichokes. However, after reviewing available data, the proposed use and dosage rate, EPA has determined that a methidathion residue level of 0.1 parts per million (ppm) would be adequate to protect the public health. Since application will be prior to bud formation, and no methidathion will be applied to the edible portion of the plant, little translocation of residue within the plant to the maturing bud is expected.

After reviewing the application and other available information, EPA has determined that: (a) A serious economic loss has been experienced by growers because of damage caused by the artichoke plume moth on artichokes in Santa Cruz, Santa Barbara, and Monterey counties; (b) there is no pesticide presently registered and available for use to control the artichoke plumme moth in California; (c) there are no alternative means of control, taking into account the efficacy and hazard; (d) significant economic problems may result if the artichoke plume moth is not controlled; and (e) the time available for action to mitigate the problems posed is insufficient for pesticide to be registered for this use. Accordingly, the Applicant has been granted a specific exemption to use the pesticide noted above until May 15, 1978, to the extent and in the manner set forth in the application. The specific exemption is also subject to the following conditions:

1. Supracide 2E (methidathion), EPA Reg. No. 100–501, manufactured by Ciba-Geigy, is authorized;

2. Application rate shall be one pound active ingredient/50–70 gallons of water/acre per application by ground spray;

3. Up to a maximum of six applications of Supracide 2E prior to bud formation shall be made;

4. A maximum of 10,470 acres of artichoke crop located in the two counties previously mentioned may be treated;

5. A maximum of 62,820 pounds active ingredient may be applied;

6. The duration of the application period shall be from the beginning of May 1977 until May 15, 1978;

7. Applications may be made by growers;

8. The Applicant shall be responsible for making initial determinations of Supracide 2E application; they shall advise the county agricultural commissioners, county agricultural agents, and growers about dosages, application techniques, and other program criteria. A special permit from the county agricultural commissioners shall be required prior to the use of this product under this exemption;

9. The following precautionary labeling shall be in the possession of the user at the time of pesticide application: "Do not allow spray drift to artichoke fields with buds present;"

10. A residue level of methidathion in or on artichokes not exceeding 0.1 ppm has been deemed adequate to protect the public health. The Food and Drug Administration, U.S. Department of Health, Education, and Welfare, has been advised of this action;

11. All lable precautions must be followed;

12. A final report shall be submitted to EPA by the end of 1978, summarizing the results of this program; and

13. The Applicant shall inform EPA immediately of any adverse effects resulting from this program and shall be responsible for the performance of all provisions of this exemption.

STATUTORY AUTHORITY: Section 18 of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended (86 Stat. 973; 89 Stat. 751; 7 U.S.C. 136(a) et seq.).

Dated: August 19, 1977.

LOWELL E. MILLER,
Acting Deputy Assistant Administrator for Pesticide Programs.

CITIES SERVICE CO.

Receipt of Applications for Pesticide Registration, Data To Be Considered in Support of Applications

On November 19, 1973, the Environmental Protection Agency (EPA) published in the FEDERAL REGISTER (39 FR 31862) its interim policy with respect to the administration of Section 3(c)(1)(D) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended ("Interim Policy Statement"). On January 22, 1976, EPA published in the FEDERAL REGISTER a document entitled "Registration of a Pesticide Product—Consideration of Data by the Administrator in Support of an Application" [41 FR 3339]. This document described the changes in the Agency's procedures for implementing Section 3(c)(1)(D) of FIFRA, as set out in the Interim Policy Statement which were effected by the enactment of the recent amendments to FIFRA on November 28, 1975 [Pub. L. 94–140], and the new regulations governing the registration and re-registration of pesticides which became effective on August 4, 1975 [40 CFR Part 162].

Pursuant to the procedures set forth in these FEDERAL REGISTER documents, EPA hereby gives notice of the applications for pesticide registration listed below. In some cases these applications have recently been received; in other cases, applications have been amended by the submission of additional supporting data, the election of a new method of support, or the submission of new "offer to pay" statements.

In the case of all applications, the labeling furnished by the applicant for the product will be available for inspection at the Environmental Protection Agency, Room 209, East Tower, 401 M Street SW., Washington, D.C. 20460. In the case of applications subject to the new Section 3 regulations, and applications not subject to the new Section 3 regulations which utilize either the 2(a) or 2(b) method of support specified in the Interim Policy Statement, all data citations submitted or referenced by the applicant in support of the application will be made available for inspection at the above address. This information (proposed labeling and, where applicable, data citations) will also be supplied by mail, upon request. However, such a request should be made only when circumstances make it inconvenient for the inspection to be made at the Agency offices.

Any person who (a) is or has been an applicant, (b) believes that data he developed and submitted to EPA on or after January 1, 1970, is being used to support an application described in this notice, (c) desires to assert a claim under Section 3(c)(1)(D) for such use of his data, and (d) wishes to preserve his right to have the Administrator determine the amount of reasonable compensation to which he is entitled for such use of the data or the status of such data under Section 10 must notify the Administrator and the applicant named in the notice in the FEDERAL REGISTER of his claim by certified mail. Notification to the Administrator should be addressed to the Product Control Branch, Registration Division (WH–567), Office of Pesticide Programs, Environmental Protection Agency, 401 M St. SW., Washington, D.C. 20460. Every such claimant must include, at a minimum, the information listed in the Interim Policy Statement of November 19, 1973.

Specific questions concerning applications made to the Agency should be addressed to the designated Product Manager (PM), Registration Division (WH–567), Office of Pesticide Programs, at the above address, or by telephone as follows:

PM 11, 12, 13—202/755-9315
PM 21 and 22—202/426-2454
PM 24—202/755-2196
PM 31—202/426-2635
PM 33—202/755-9041
PM 15, 16, and 17—202/426-9425
PM 23—202/755-1397
PM 25—202/755-2632
PM 32—202/426-9486
PM 34—202/426-9490

The Interim Policy Statement requires that claims for compensation be filed on or before October 31, 1977. With the exception of 2(c) applications not subject to the new Section 3 regulations, and for which a sixty-day hold period for claims is provided, EPA will not delay any registration pending the assertion of claims for compensation or the determination of reasonable compensation. Inquiries and assertions that data relied upon are subject to protection under Section 10 of FIFRA, as amended, should be made on or before September 30, 1977.

Dated: August 25, 1977.

DOUGLAS D. CAMPT,
Acting Director,
Registration Division.

EPA Reg. No. 352-370. E. I. duPont de Nemours and Co. Du Pont Lannate L Methonyl Insecticide. Active Ingredients: S-methyl-N-[(methylcarbamoyl)oxy]thioacetimidate 24%. Method of Support: Application proceeds under 2(b) of interim policy. Republished: Added Use. PM12

EPA Reg. No. 352-372. E. I. du Pont de Nemours and Co., Biochemical Dept. Vydate L Oxamyl Insecticide/Nematicide for use on apples. Active Ingredients: Methyl *N N* dimethyl *N* [(methylcarbamoyl)oxy]) 1-thiooxamimidate 24%. Method of Support: Application proceeds under 2(b) of interim policy. Republished: Added uses. PM12

EPA Reg. No. 400-90. Uniroyal Chemical, Div. of Uniroyal, Inc., 14 Amity Rd., Bethany, CT 06525. Plantvax-5L. Active Ingredients: (5,6-dihydro-2-methyl-1,4-oxathiin-3-carboxanilide-4,4-dioxide) 5.0. Method of Support: Application proceeds under 2(a) of interim policy. PM21

EPA Reg. No. 464-131. The Dow Chemical Co., PO Box 1706, Midland, MI 48640. Dowicide B Antimicrobial. Active Ingredients: Sodium 2,4,5-trichlorophenate 85%. Method of Support: Application proceeds under 2(b) of interim policy. PM32

EPA Reg. No. 524-308. Monsanto Co., Agricultural Products, 800 N. Lindbergh Blvd., St. Louis, MO 63166. CP70139 Herbicide by Monsanto. Active Ingredients: Isopropylamine salt of Glyphosate 41.5%. Method of Support: Application proceeds under 2(b) of interim policy. Republished: Added use. PM25

EPA File Symbol 538-RGG. O. M. Scott & Sons Co., Marysville, OH 43040. Proturf Fertilizer Plus Systemic Fungicide. Active Ingredients: Thiophanate-ethyl Dimethyl 4,4' o-phenylenebis 3-thioallophanate 2.22%. Method of Support: Application proceeds under 2(b) of interim policy. PM21

EPA File Symbol 538-RGG. O. M. Scott & Sons Co., Marysville, OH 43040. Proturf Fertilizer Plus Systemic Fungicide. Active Ingredients: Thiophanate-methy Dimethyl 4,4' o-phenylenebis 3-thioallophanate 1.75%. Method of Support: Application proceeds under 2(b) of interim policy. Republished: Added use. PM21

EPA File Symbol 623-UN. United Chemical Co., Inc., Kansas City, MO 64130. Hospitals. Active Ingredients: n-Alkyl (60% C14, 30% C16, 5% C12, 5% C18) dimethyl benzyl ammonium chlorides 6.25%; n-Alkyl (68% C12, 32% C14) dimethyl ethylbenzyl ammonium chlorides 6.25%; Tetrasodium ethyenediamine tetraacetate 3.60%; Sodium Carbonate 3.00%. Method of Support: Application proceeds under 2(b) of interim policy. Republished: Revised offer to pay statement. PM31

EPA Reg. No. 655-532. Prentiss Drug & Chemical Co., 363 7th Ave., New York, NY 10001. Prentox Pyronyl Poultry House & Barn Fly Spray. Active Ingredients: Pyrethrins 2.00%; Piperonyl Butoxide, Technical 4.00%; N-octyl bicycloheptene dicarboximide 6.66%; Petroleum Distillates 87.34%. Method of Support: Application proceeds under 2(b) of interim policy. Republished: Revised offer to pay statement. PM17

EPA File Symbol 769-ULI. Woolfolk Chemical Works, Inc., PO Box 938, Fort Valley, GA 31030. Security Weed and Brush Killer X-L 1. Active Ingredients: (5-bromo-3-sec-butyl-6-methyluracil) 11.50%. Method of Support: Application proceeds under 2(b) of interim policy. Republished: Revised offer to pay statement. PM25

EPA File Symbol 23948-E. Johnson Wholesale, PO Box 781, Punta Gorda FL 33950. Jonco Bleach. Active Ingredients: Sodium Hypochlorite 5.25%. Method of Support: Application proceeds under 2(b) of interim policy. PM34

EPA File Symbol 33968-T. Johnson Wholesale, PO Box 781, Punta Gorda FL 33950. Johnco Bleach. Active Ingredients: Sodium Hypochlorite 5.25%. Method of Support: Application proceeds under 2(b) of interim policy. PM34

EPA File Symbol 33968-T. Colorado Dept. of Agriculture, 1525 Sherman St., Denver CO 80203. WC90. Active Ingredients: Sodium Monofluoroacetate 90.00%. Method of Support: Application proceeds under 2(b) of interim policy. PM11

EPA File Symbol 39697-R. Mountain High Diatomaceous Earth, 477 Chester St., Ogden UT 84404. Mountain High Diatomaceous Earth. Active Ingredients: Diatomaceous Earth 100%. Method of Support: Application proceeds under 2(b) of interim policy. PM17

EPA File Symbol 40329-R. Mother Lode Mines, PO Box 9671, Ogden UT 84403. Desikil Diatomaceous Earth. Active Ingredients: Diatomaceous Earth 80%. Method of Support: Application proceeds under 2(b) of interim policy. PM17

EPA File Symbol 40513-R. Aqua-Phenn Inc., PO Box 13499, Arlington TX 76013. Sanitizer 256. Active Ingredients: Isopropanol 14.9%. Sodium o-benzyl-p-chlorophenate 8.5% Tetrasodium ethylene-diamine tetraacetate 5.0%; Sodium-O-phenylphenate 4.3%; Sodium p-Tert-amylphenate 2.8%. Method of Support: Application proceeds under 2(b) of interim policy. PM32

EPA File Symbol 40526-R. Ava Water Treatment & Analysis, Inc., PO Box 557704, Miami FL 33155. MC-5. Active Ingredients: Poly(oxyethylene (dimethyliminio) ethylene-dimethyliminio) ethylene dichloride) 5.0%. Method of Support: Application proceeds under 2(b) of interim policy. PM34

EPA File Symbol 40783-R. Eagle Chemical Corp., PO Box 172, Edison NJ 08817. Formula 1200. Active Ingredients: Poly [oxyethylene (dimethyliminio) ethylene (dimetahyliminio) ethylene dichloride] 10.0%. Method of Support: Application proceeds under 2(b) of interim policy. PM34

[FRL 754-6]

GRANTS FOR CONSTRUCTION OF TREATMENT WORKS

Class Deviations

Notice is hereby given that under the authority of 40 CFR 30.1000, EPA has issued class deviations from the provisions of 40 CFR 35.935-12(c) and 35.935-13(a) for segmented and multiple facility construction grant projects awarded under section 201 of the Federal Water Pollution Control Act Amendments of 1972.

On May 6, 1976, a class deviation was issued from 40 CFR 35.935-13(a) concerning the compliance schedules of the industrial cost recovery (ICR) system requirements for segmented projects and multiple facility projects. User charges (UC) are often contained in the same local municipal ordinance; and consequently, it was considered to be advantageous to preserve the close ties of the compliance schedules of these two systems. Therefore, a class deviation was issued on September 30, 1976, from the user charge requirements of 40 CFR 35.-935-13(a). These deviations stated, in effect, that if several Step 3 grants are all part of a phased project and if none of the new facilities constructed are operable until all phases have been completed, then payments do not have to be held at 80 percent of the individual grants, but they must be held at 80 percent of the aggregate of these Step 3 grants pending UC/ICR approvals. If any element of the treatment works has been placed in operation prior to reaching 80 percent of the aggregate, no further payments can be made (whatever percentage payment) until the UC/ICR systems are approved.

A class deviation was approved on August 24, 1977 to apply a similar policy to the 80 percent payment-holding requirements for the sewer use ordinance in 40 CFR 35.935-16 and the 50 and 90 percent payment-holding requirements for submission and final approval of the operation and maintenance manual in 40 CFR 35.935-12(c).

In accordance with EPA's newly established policy to publish all class deviations in the FEDERAL REGISTER at the time of approval, the deviations are published as part of this Notice. The May 6, 1976, and September 30, 1976, deviations are published at this time because of the similarity of the three deviations.

The deviations as granted do not contain limits on the duration of the deviation. However, a review will be made within six to nine months to determine the ned for either continuing the deviations or promulgation of regulatory amendments.

FOR FURTHER INFORMATION CONTACT:

Alexander J. Greene, Director, Grants Administration Division (PM-216), Environmental Protection Agency, 401 M Street SW., Washington, D.C. 20460, telephone number: 202-755-0850.

WILLIAM DRAYTON, JR.,
Assistant Administrator for Planning and Management (PM-208).

JULY 26, 1977.

THOMAS C. JORLING,
Assistant Administrator for Water and Hazardous Materials (WH-556).

ENVIRONMENTAL PROTECTION AGENCY

Subject: Class Deviation from 40 CFR 35.935-13(a).

From: Harvey G. Pippen, Acting Director, Grants Administration Division (PM-216).

To: Regional Administrators.

MAY 6, 1976.

40 CFR 35.935-13(a) provides that no more than 80% of the Federal share of any Step 3 project shall be paid unless an industrial cost recovery system has been approved by the Regional Administrator. This requirement is readily implementable when the treatment works to be constructed is under a single grant and consists of a single treatment facility which is operable upon completing construction. However, at times, grants are awarded for projects which are not operable or, only partially operable, upon completion. Such projects generally fall into two categories—segmented projects and multiple facility projects. For those projects, this 80% requirement requires clarification.

Appropriate clarification of this requirement has been included in the recently issued Industrial Cost Recovery Guidelines. An amendment to the regulations is being prepared, to be promulgated with the technical amendments, to incorporate the clarification in the Title II regulations. In the interim, the following class deviation is approved:

1. In projects where segmenting of an operable treatment works has occurred, payment of more than 80% of the total of all Step 3 segments is not permitted unless the ICR system proposed by the grantee is approved by the Regional Administrator.

2. In projects where an element or elements of the treatment works have been completely constructed and placed in operation by the grantee, additional payment on a Step 3 grant is not permitted unless the ICR system (or that portion of the ICR system associated with the operating elements of the treatment works) proposed by the grantee is approved by the Regional Administrator.

ENVIRONMENTAL PROTECTION AGENCY

Subject: Class Deviation from 40 CFR 35.935-13(a), User Charges System Requirements.

From: Alexander J. Greene, Director, Grants Administration Division (PM-216).

To: Regional Administrators.

SEPTEMBER 30, 1976.

40 CFR 35.935-13(a) provides that no more than 80% of the Federal share of any Step 3 project shall be paid unless an industrial cost recovery and user charge systems have been approved by the Regional Administrator. This requirement is readily implementable when the treatment works to be constructed is under a single grant and consists of a single treatment facility which is operable upon completing construction. However, at times, grants are awarded for projects which are not operable or, only partially operable, upon completion. Such projects generally fall into two categories—segmented projects and multiple facility projects. For those projects, this 80% requirement requires clarification.

On May 6, 1976, a class deviation was issued from 40 CFR 35.935-13(a) concerning the compliance schedules of the industrial cost recovery system requirement for segmented projects and multiple facility projects. User charges are often contained in the same local municipal ordinance as the industrial cost recovery and considerations for monitoring, billing, and updating are often very closely linked between the two systems. Consequently, it is advantageous to preserve the close ties of the compliance schedules of these two systems. Therefore, a class deviation is approved as follows:

1. In projects where segmenting of an operable treatment works has occurred, payment of more than 80% of the total of all Step 3 segments is not permitted unless the user charges system proposed by the grantee is approved by the Regional Administrator.

2. In projects where an element or elements of the treatment works have been completely constructed and placed in operation by the grantee, additional payment on a Step 3 grant is not permitted unless the user charge system (or that portion of the user charge system associated with the operating elements of the treatment works) proposed by the grantee is approved by the Regional Administrator.

ENVIRONMENTAL PROTECTION AGENCY

Subject: Class Deviations from 40 CFR 35.935-12(c) and 35.935-16.

From: Alexander J. Greene, Director, Grants Administration Division (PM-216).

To: Regional Administrators.

AUGUST 24, 1977.

40 CFR 35.935-12(e) provides that not more than 50 percent of the Federal share of any Step 3 project shall be paid unless the grantee has furnished a draft of the operation and maintenance manual for review, or adequate evidence of timely development of such a draft or not more than 90 percent of the Federal share unless the grantee has furnished a satisfactory final operation and maintenance manual. 40 CFR 35.935-16 provides that not more than 80 percent of the Federal share of any Step 3 project shall be paid unless the Regional Administrator has approved the grantee's sewer use ordinance, and the grantee is complying with the sewer system evaluation and rehabilitation schedule incorporated in the grant agreement.

The above requirements are readily implementable when the treatment works to be constructed is under a single grant and consists of a single treatment facility which is operable upon completing construction. However, at times, grants are awarded for projects which are not operable or, only partially operable, upon completion. Such projects generally fall into two categories, segmnted eprojects and multiple facility projects.

Class deviations have been granted from the 80 percent payment holding requirements for the industrial cost recovery and user charge (UC/ICR) requirements. These deviations stated, in effect, that if several Step 3 grants are all part of a phased project and if none of the new facilities constructed are operable until all phases have been completed, then payments do not have to be held at 80 percent of the individual grants, but they must be held at 80 percent of the aggregate of these Step 3 grants pending UC/ICR approvals. If any piece of the construction becomes operable prior to reaching 80 percent of the aggregate, no further payments can be made (what ver percentage payment) until the UC/ICR systems are approved.

A class deviation is hereby approved to apply the same policy to the 80 percent payment-holding requirements for the sewer use ordinance in section 35.935-16 and the 50 and 90 percent payment-holding requirements for submission and final approval of the operation and maintenance manual in section 35.935-12(c):

1. In projects where segmenting of an operable treatment works has occurred:

(a) Payments of more than 80 percent of the total of all Step 3 segments is not permitted unless the sewer use ordinance has been approved by the Regional Administrator.

(b) Payments of more than 50 percent of the total of all Step 3 segments is not permitted unless the grantee has furnished a draft of the operation and maintenance manual for review, or adequate evidence of timely development of such a draft, and

(c) Payments of not more than 90 percent of the total of all Step 3 segments is not permitted unless the grantee has furnished a satisfactory final operation and maintenance manual.

2. In projects where an element or elements of the treatment works have been completely constructed and placed in operation by the grantee, additional payment on a Step 3 grant is not permitted unless the sewer use ordinance and the operation and maintenance manual (or those portions associated with the operating elements of the treatment works) submitted by the grantee are approved by the Regional Administrator.

[OPP-180143, FRL 785-4]

IDAHO STATE DEPARTMENT OF AGRICULTURE

Issuance of a Specific Exemption To Use Ethyl Parathion To Control Pea Aphid, Bean Aphid, and Vetch Aphid on Lentils

The Environmental Protection Agency (EPA) has granted a specific exemption to the Idaho State Department of Agriculture (hereafter referred to as the "Applicant") to use ethyl parathion to suppress populations of the pea aphid, the bean aphid, and the vetch aphid which are threatening the commercial lentil crop on 26,000 acres in ten (10) northern Idaho counties. This exemption was granted in accordance with, and is subject to, the provisions of 40 CFR Part 166, which prescribes requirements for exemption of Federal and State agencies for use of pesticides under emergency conditions.

This notice contains a summary of information required by regulation to be

V42169 AUG 31 77 UMI

included in the notice. For more detailed information, interested parties are referred to the application on file with the Registration Division (WH-567), Office of Pesticide Programs, EPA, 401 M St., SW., Room E-315, Washington, D.C. 20460.

According to the Applicant, approximately 26,000 acres of lentils in the counties of Benewah, Bonner, Boundary, Clearwater, Idaho, Kootenai, Latah, Lewis, Nez Perce, and Shoshone in northern Idaho could suffer thirty (30) percent potential yield loss due to infestations of pea aphid, bean aphid, and vetch aphid.

Malathion is the only insecticide registered for use on lentils. According to the Applicant, malathion provided only marginal or ineffective control of aphid pests last year; whereas, parathion, which was applied to lentils under a specific exemption in 1976, proved satisfactory.

The Applicant proposes to use parathion at an application rate of one-half (0.5) pound active ingredient per acre by air and ground. If the exemption is approved, two (2) applications will be made to lentil fields beginning immediately and terminating by August 15, 1977. Application of parathion will be restricted to State-licensed commercial applicators and a few growers who may elect to apply parathion on their own property.

The currently available data for parathion, emulsifiable concentrate formulations, show no detectable residues (less than 0.2 ppm, depending on the crop substrate) in any crop which has the edible portion of the plant protected from direct application of the pesticide (such as peas, corn, and soybeans). Based on these data, the EPA concludes that residue levels resulting from the proposed use are not likely to exceed 0.2 ppm, if emulsifiable concentrate formulations are used and a fourteen (14) day pre-harvest interval is observed. The EPA has determined that lentils bearing residues of parathion which do not exceed 0.2 ppm will not pose a hazard to the public health.

The Fish and Wildlife Service, U.S. Department of the Interior (USDI), has advised EPA that three endangered species, American Peregrine Falcon, Grizzly Bear, and Northern Rocky Mountain Wolf, and one proposed endangered species, the Northern Bald Eagle, are resident to one or more of the Idaho counties where parathion will be applied.

After reviewing the application and other available information, EPA has determined that (a) a pest outbreak of pea aphid, bean aphid, and vetch aphid has occurred; (b) there is no pesticide presently registered and available for use to control these aphids in Idaho; (c) there are no alternative means of control, taking into account the efficacy and hazard; (d) significant economic problems may result if these aphids are not controlled; and (e) the time available for action to mitigate the problems posed is insufficient for a pesticide to be registered for this use. Accordingly, the Applicant as been granted a specific exemption to use the pesticide noted above until August 15, 1977, to the extent and in the manner set forth in the application. The specific exemption is also subject to the following conditions:

1. A parathion EC formulation containing four (4) pounds of active ethyl parathion per gallon and appropriately labeled for method of application (ground or air) will be used;
2. Rate of application will be one-half (0.5) pound of active ethyl parathion per acre per application for a maximum of two (2) applications;
3. Lentil acreages to be treated are limited to those counties previously mentioned in this notice;
4. Lentil crop residues which have been treated with parathion may not be used for food, feed or fodder. Livestock may not graze in treated lentil fields;
5. Lentils with parathion residues not exceeding 0.2 ppm will not pose a hazard to the public health and may be offered in interstate commerce. The Food and Drug Administration, U.S. Department of Heath, Education, and Welfare, has been advised of this action;
6. A fourteen (14) day preharvest interval will be observed;
7. A one-hundred (100) foot buffer zone will be maintained around bodies of water which are inhabited by fish and/or waterfowl;
8. EPA has been advised that three (3) endangered species (American Peregrine Falcon, Grizzly Bear, and Northern Rocky Mountain Wolf) and one (1) proposed endangered species (Northern Bald Eagle) may be found in one or more of the Idaho counties where parathion will be applied and may be at risk. Therefore, according to Section 7 of the Endangered Species Act, the Applicant must consult with the Endangered Species Program, Fish and Wildlife Service, USDI, Region I, Portland, Oregon, prior to applying parathion to lentil fields;
9. Every precaution shall be taken to avoid or minimize spray drift to non-target areas;
10. Liaison shall be established among the Idaho State Departments of Agriculture, Fisheries, and Game to minimize any adverse effects on fish and wildlife resources;
11. The Idaho Department of Agriculture is responsible for supervising applications of parathion;
12. All applicable directions, restrictions, and precautions on the EPA-registered label will be followed;
13. The EPA shall be immediately informed of any adverse effects resulting from the use of this pesticide in connection with this exemption; and
14. A final report shall be submitted within one (1) year of the granting of the exemption.

Dated: August 25, 1977.

EDWIN L. JOHNSON,
Deputy Assistant Administrator for Pesticide Programs.

MAINE

Approval of State Plan for Certification of Commercial and Private Applicators of Restricted Use Pesticides

Section 4(a)(2) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended (86 Stat. 973; 7 U.S.C. 136 et seq.), and the implementing regulations of 40 CFR Part 171, require each state desiring to certify applicators to submit a plan for its certification program. Any State certification program under this section shall be maintained in accordance with the State Plan approved under this section.

On September 28, 1976, notice was published in the FEDERAL REGISTER (41 FR 42698) of the intent of the Regional Administrator, Environmental Protection Agency (EPA) Region I, to approve on a contingency basis, the Maine State Plan for Certification of Commercial and Private Applicators of Restricted Use Pesticide (Maine State Plan). Contingent approval was requested by the State of Maine pending promulgation of additional implementing regulations necessary to permit Maine to carry out FIFRA responsibilities.

Complete copies of the Maine State Plan (except for sample examinations) were made available for public inspection at the following locations: Maine Department of Agriculture, Augusta, Maine; U.S. Environmental Protection Agency, Region I, Boston, Massachusetts; and the U.S. Environmental Protection Agency, Federal Register Section, Technical Services Division, Office of Pesticide Programs, Washington, D.C.

The National Canners Association provided the only comments received on the State Plan during the 30-day comment period. Four objections were raised that pertain to (1) a consideration of Extension Service Funding for training purposes as a part of the State Plan budget, (2) inadequate consideration of all pesticide use situations in selection of subcategories, (3) use of fees charged for certification to support plan activities, (4) inclusion of a requirement for proof of financial responsibility by commercial applicators.

Maine officials have reviewed each of the specific comments and prepared a response which together with EPA remarks are summarized below.

1. Maine believes that a training program for applicators, especially for those in the private class, is essential to the implementation of the State Plan and the FIFRA. EPA notes, in further explanation, funds provided for support of the Maine Extension Service were not specifically identified as included in the State Plan budget and hence were not considered by the Agency in its review of the budget for adequacy.

2. Maine believes the subcategories indicated in the State Plan are adequate to accommodate applicator needs and therefore sees to immediate need to amend the subcategory designations and their descriptions. EPA believes the Maine officials are in the best position to make this decision. Maine can also later amend the plan if experience in certifying applicators indicates a need for redefinition of subcategories.

3. Maine officials have noted that funds expended to complete the States' certification program are largely derived from State appropriations and those provided by funding allocated by EPA. Private applicators are not assessed a fee for certification; only commercial applicators are assessed a fee, which is determined on a company basis, with fees waived for State, Federal and Municipal employees. It is EPA's view that this option of whether to charge a fee is strictly a matter for the State to decide.

4. Maine officials advise that proof of financial responsibility has been a requirement of commercial applicators operating on a custom basis for 10 years. The State Statutes were further revised very recently to further clarify the exempted status of commercial applicators operating on a noncustom basis.

Since the Notice of Intent to Approve the Maine State Plan was published on September 28, 1976, the Legislature has made certain beneficial statutory changes in Title 22 MSRA Chapter 258-A. Further, the Maine Department of Agriculture, through actions of the Board of Pesticide Control, has promulgated amendments to its regulations correcting previously determined deficiencies. In view of this recent action EPA believes it would not serve any useful purpose to proceed with approval of the Maine State Plan on a contingency basis, but rather believes it should proceed directly with action toward final approval and hereby provides public notice of such action.

It has been determined that the Maine State Plan satisfies the requirements of section 4(a)(2) of the amended FIFRA and 40 CFR 171. Accordingly, the Maine State Plan is approved.

The Maine State Plan will remain available for public inspection in the Department of Agriculture, Division of Inspections, Room 601, State Office Building, Augusta, Maine 04330.

Effective date: Pursuant to section 4(d) of the Administrative Procedure Act, 5 U.S.C. 553(d), the Agency finds that there is good cause for providing that the approval granted herein to the Maine State Plan shall be effective upon signature of this notice. Neither the Maine State Plan itself nor this Agency's approval of the Plan creates any direct or immediate obligation on pesticide applicators or other persons in the State of Maine. Delays in starting the work necessary to implement the Plan, such as may be occasioned by providing some later effective date for this approval, are inconsistent with the public interest. Accordingly, this approval shall become effective immediately.

Dated: August 12, 1977.

WILLIAM R. ADAMS, JR.,
Regional Administrator, Region I.

MOBAY CHEMICAL CORP. ET AL.

Issuance of Experimental Use Permits

The Environmental Protection Agency (EPA) has issued experimental use permits to the following applicants. Such permits are in accordance with, and subject to, the provisions of 40 CFR Part 172, which defines EPA procedures with respect to the use of pesticides for experimental purposes.

No. 3125-EUP-141. Mobay Chemical Corporation, Kansas City, Missouri 64120. This experimental use permit allows the use of 3,800 pounds of the insecticide S-[2-(Ethyl-sulfinyl)ethyl] 0,0-dimethyl phosphorothioate on sorghum to evaluate control of aphids and mites. A total of 2,500 acres is involved; the program is authorized only in the States of Kansas, Nebraska, New Mexico, Oklahoma, and Texas. The experimental use permit is effective from July 18, 1977, to July 18, 1978. A permanent tolerance for residues of the active ingredient in or on sorghum has been established (40 CFR 180.330). A food additive tolerance for residues of the active ingredient in milled fractions of sorghum (except flour) has been established (21 CFR 561.234).

No. 352-EUP-89. E. I. du Pont de Nemours and Company, Wilmington, Delaware 19898. This experimental use permit allows the use of 2,080 pounds of the insecticide oxamyl on apples, citrus, peanuts, and potatoes to evaluate control of aphids, mites, nematodes, and thrips. A total of 1,340 acres is involved; the program is authorized only in the States of Alabama, Arizona, California, Colorado, Florida, Georgia, Idaho, Maine, Michigan, Minnesota, New Hampshire, New Jersey, New York, North Carolina, North Dakota, Oregon, Oklahoma, Pennsylvania, South Carolina, Texas, Virginia, Washington, and Wisconsin. The experimental use permit is effective from July 6, 1977, to July 6, 1978. Temporary tolerances for residues of the active ingredient in or on apples, citrus, peanuts, and potatoes have been established.

No. 7479-EUP-1. Lancaster Laboratories, Inc., Lancaster, Pennsylvania 17601. This experimental use permit allows the use of 719 pounds of the algacide copper sulfate monohydrate in 14 small lakes and ponds to evaluate control of algae. The program is authorized only in the State of Pennsylvania. The experimental use permit is effective from July 14, 1977, to December 31, 1978. An exemption from the requirement of a tolerance in eggs, fish, meat, milk, irrigated crops, and shellfish has been established (40 CFR 180.1021).

No. 39508-EUP-2. New Mexico State University, Las Cruces, New Mexico 88003. This experimental use permit allows the use of 70 pounds of the insecticide N-[[(4-chlorophenyl) amino]carbonyl]-2,6-difluorobenzamide on rangeland to control range caterpillars. A total of 5,000 acres is involved; the program is authorized only in the State of New Mexico. The experimental use permit is effective from July 8 1977, to July 8, 1978. This permit is being issued under the condition that livestock not be allowed to graze on treated rangeland for the residual life of the pesticide on rangegrass and then only breeder livestock may be grazed. Rangegrass must be tested for residues and found below the method of sensitivity prior to allowing the grazing of breeder livestock.

Interested parties wishing to review the experimental use permits are referred to Room E-315, Registration Division (WH-567), Office of Pesticide Programs, EPA, 401 M St. SW. Washington, D.C. 20460. It is suggested that such interested persons call 202/755-4851 before visiting the EPA Headquarters Office, so that the appropriate permits may be made conveniently available for review purposes. These files will be available for inspection from 8:30 a.m. to 4:00 p.m. Monday through Friday.

STATUTORY AUTHORITY: Section 5 of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended (86 Stat. 973; 89 Stat. 751; 7 U.S.C. 136(a) et seq.).

Dated: August 25, 1977.

DOUGLAS D. CAMPT.
Acting Director, Registration Division.

V 42 169 AUG 31 77 UMI

[FRL 783-5; OPP-50318]

THOMPSON-HAYWARD CHEMICAL CO.

Issuance of Experimental Use Permit and Solicitation of Public Views

The Environmental Protection Agency (EPA) has issued an experimental use permit to Thompson-Hayward Chemical Company, Kansas City, Kansas 66110. Such permit is in accordance with, and subject to, the provisions of 40 CFR Part 172, which defines EPA procedures with respect to the use of pesticides for experimental purposes.

This experimental use permit (No. 148-EUP-22) allows the use of 3,821.5 pounds of insecticide N-[[(4-chlorophenyl) amino]carbonyl]-2,6-difluorobenzamide (Dimilin) on cotton to evaluate control of the boll weevil. A maximum of 7,333 acres is involved; due to limitations of the permit, only that acreage will be treated that is economically feasible to be destroyed if tolerances are not set. The program is authorized only in the States of Alabama, Arizona, Arkansas, California, Florida, Georgia, Louisiana, Mississippi, Oklahoma, North Carolina, South Carolina, Tennessee, and Texas. The experimental use permit is effective from June 8, 1977, to June 8, 1978.

A toxicology review of the data submitted indicates there may be evidence of possible carcinogenicity in an 80 week mouse study; in addition, one of the break-down products of Dimilin (p-chlorophenylurea) has a chemical structure similar to Monuron for which residue tolerances were revoked in 1973 due to evidence of carcinogenicity in rats and mice (38 FR 16780). Therefore, this permit was issued on a crop destruct basis in order to allow Thompson-Hayward to gather the efficacy, environmental chemistry, and residue data necessary to support registration. The crop destruction restriction will allow for the protection of the public health pending review of additional studies submitted in connection with the question of carcinogenicity. This permit has been issued under the condition that cottonseed from treated cotton will not be used for food, feed, or oil purposes. Treated cottonseed will be 1) destroyed, 2) used for seed purposes only, or 3) segregated and held until such time as a temporary tolerance may be established. The Agency is currently in the process of reviewing additional new toxicology data submitted by Thompson-Hayward Company and is awaiting the results of a carcinogenesis bioassay study, being conducted on one of the metabolites of Dimilin, by the National Cancer Institute. This study is expected to be completed by January of 1978. In the event that additional information shows that tolerances should not be established for residues of Dimilin and its metabolites in or on cottonseed then the seed must be 1) destroyed, 2) used for research purposes, or 3) used for seed purposes.

In light of the above, perhaps controversial items, the Agency is soliciting public comment. We are soliciting comments now rather than prior to issuance since timing of application was critical to the gathering of data this season. That data may also have an impact on the U.S. Deprtment of Agriculture's plans for eradication programs in the future.

All interested parties are invited to submit written comments pertinent to this experimental use permit. Comments should be forwarded to the Federal Register Section, Room E-401, Technical Services Division (WH-569), Office of Pesticide Programs, EPA, 401 M Street, SW., Washington, D.C. 20460. Three copies of the comments should be submitted to facilitate the work of the Agency and others interested in inspecting the submissions. The comments must be received within 30 days after date of publication of this notice in the FEDERAL REGISTER, and should bear the identifying notation OPP-50318. All written comments filed pursuant to this notice will be available for public inspection in the office of the Federal Register Section from 8:30 a.m. to 4 p.m. during normal work days.

Interested parties wishing to review the experimental use permit are referred to Room E-315, Registration Division (WH-567), Office of Pesticide Programs, EPA, at the same address mentioned above. It is suggested that such interested persons call 202/755-4851 before visiting the EPA Headquarters Office, so that the appropriate permit may be made conveniently available for review purposes. This file will be available for inspection from 8:30 a.m. to 4 p.m. Monday through Friday.

STATUTORY AUTHORITY: Section 5 of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended (86 Stat. 973; 89 Stat. 751; 7 U.S.C. 136(a) et seq.).

Dated: August 25, 1977.

DOUGLAS D. CAMPT,
Acting Director,
Registration Division.

[FRL 783-3; OPP-50322]

3M CO. ET AL.

Issuance of Experimental Use Permits

The Environmental Protection Agency (EPA) has issued experimental use permits to the following applicants. Such permits are in accordance with, and subject to, the provisions of 40 CFR Part 172, which defines EPA procedures with respect to the use of pesticides for experimental purposes.

No. 7182-EUP-17. 3M Company, St. Paul, Minnesota 55105. This experimental use permit allows the use of 1,260 pounds of the herbicide perfluidone on tobacco to evaluate control of nutsedge, annual grasses and broadleaf weeds. The experimental use permit is effective from July 21, 1977, to September 1, 1978.

No. 7182-EUP-18. 3M Company, St. Paul, Minnesota 55101. This experimental use permit allows the use of 280 pounds of the herbicide perfluidone on tobacco to evaluate control of nutsedge, annual grasses and broadleaf weeds. A total of 995 acres is involved for both this permit and the one above; the programs are authorized only in the States of Georgia, North Carolina, South Carolina, and Virginia. This experimental use permit is also effective from July 21, 1977, to September 1, 1978. The permits will use the same active ingredient, but different formulations.

No. 10065-EUP-9. Fisons Corporation, Bedford, Massachusetts 01730. This experimental use permit allows the use of 585 pounds of the insecticide 2,2-dimethyl-1, 3-benzodioxol-4-yl methylcarbamate on turf to evaluate control of turf insects. A total of 308 acres is involved. The experimental use permit is effective from July 18, 1977, to July 18, 1978.

No. 10065-EUP-10. Fisons Corporation, Bedford, Massachusetts 01730. This experimental use permit allows the use of 152 pounds of the insecticide 2,2-dimethyl-1, 3-benzodioxol-4-yl methylcarbamate on turf to evaluate control of turf insects. A total of 76 acres is involved. The experimental use permit is also effective from July 18, 1977, to July 18, 1978.

No. 10065-EUP-11. Fisons Corporation, Bedford, Massachusetts 01730. This experimental use permit allows the use of 152 pounds of the insecticide 2,2-dimethyl-1, 3-benzodioxol-4-yl methylcarbamate on turf to evaluate control of turf insects. A total of 76 acres is involved; this program and the two above are authorized only in the States of California, Florida, Georgia, Illinois, Indiana, Kansas, Maryland, Massachusetts, Mississippi, Nebraska, New Hampshire, New Jersey, New York, North Carolina, Ohio, Oklahoma, Pennsylvania, and Texas. This experimental use permit is also effective from July 18, 1977, to July 18, 1978. The permits will use the same active ingredient, but different formulations.

Interested parties wishing to review the experimental use permits are referred to Room E-315, Registration Division (WH-567), Office of Pesticide Programs, EPA, 401 M St. SW., Washington, D.C. 20460. It is suggested that such interested persons call 202/755-4851 before visiting the EPA Headquarters Office, so that the appropriate permits may be made conveniently available for review purposes. These files will be available for inspection from 8:30 a.m. to 4:00 p.m. Monday through Friday.

STATUTORY AUTHORITY: Section 5 of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended (86 Stat. 973; 89 Stat. 751; 7 U.S.C. 136(a) et seq.).

Dated: August 25, 1977.

DOUGLAS D. CAMPT,
Acting Director,
Registration Division.

STATE OF UTAH

Approval of State Plan for Certification of Pesticide Applicators

Section 4(a)(2) of the Federal Insecticide, Fungicide and Rodenticide Act (FIFRA), as amended 86 Stat. 973; 89 Stat. 751; 7 U.S.C. 136 et seq.) and the implementing regulations of 40 CFR Part 171, require each state desiring to certify applicators to submit a plan to EPA for its certification program. Any state certification program under this section shall be maintained in accordance with the State Plan approved under this section.

On January 31, 1977, a summary of the Utah State Plan for Certification of Pesticide Applicators (Utah State Plan) and a notice of intent of the Regional Administrator, EPA Region VIII, to approve the Utah State Plan were published in the FEDERAL REGISTER (42 FR 5747). This intent to approve the Utah State Plan was contingent upon promulgation of necessary regulations and enactment of amendments to the Utah Pesticide Control Act of 1971. The Utah State Plan was granted contingency approval on April 11, 1977 (42 FR 18893). The necessary amendments to the Utah Pesticide Control Act of 1971 became effective May 11, 1977 and the necessary regulations were promulgated on July 10, 1977. Having reviewed the revised Utah legal authorities and finding that all requisite legal authorities required by FIFRA and 40 CFR Part 171 are now enacted and promulgated, the Regional Administrator, EPA Region VIII, hereby gives notice that the Utah State Plan is now a fully approved State Plan.

Dated: August 22, 1977.

JOHN A. GREEN,
Regional Administrator,
Region VIII.

[FRL 782-5]

STATE OF TENNESSEE

Determination of Primary Enforcement Responsibility

This public notice is issued pursuant to section 1413 of the Safe Drinking Water Act, Pub. L. 93-523, December 16, 1974, and 142.10 of the National Interim Primary Drinking Water Regulations, published in the FEDERAL REGISTER on January 20, 1976.

An application, dated June 27, 1977, has been received from the Commissioner, Tennessee Department of Public Health, requesting that the Division of Water Quality Control of the Tennessee Department of Public Health be granted primary enforcement responsibility for water systems in the State of Tennessee, in accordance with the provisions of this Act.

In response, I have determined that the Division of Water Quality Control has met all conditions of the Safe Drinking Water Act and subsequent regulations for the assumption of primary enforcement responsibility for water systems in the State of Tennessee. The State—

(1) Has adopted drinking water regulations which are no less stringent than the National Interim Primary Drinking Water Regulations;

(2) Has adopted and will implement adequate procedures for the enforcemnet of such State regulations, including adequate monitoring and inspections;

(3) Will keep such records and make such reports as required;

(4) If it permits variances or exemptions from the requirements of its regulations, will issue such variances and exemptions in accordance with the provisions of the National Interim Primary Drinking Water Regulations;

(5) Has adopted and can implement an adequate plan for the provision of safe drinking water under emergency circumstances.

All documents relating to this determination are available for public inspection between the hours of 8 a.m. and 4:30 p.m., Monday through Friday, at the following offices:

Division of Water Quality Control, Department of Public Health, Cordell Hull Bldg., room 621, Nashville, Tenn. 37219.
Regional Administrator, Environmental Protection Agency, Region IV, 345 Courtland St. NE., Atlanta, Ga. 30308.

All interested parties are invited to submit written comments on this determination and may request a public hearing. Written comments and/or a request for a public hearing must be submitted on or before September 30, 1977. A request for a public hearing shall include the following information:

(1) The name, address, and telephone number of the individual, organization, or other entity requesting a hearing.

(2) A brief statement of the requesting person's interest in the Regional Administrator's determination and of information that the requesting person intends to submit at such hearing.

(3) The signature of the individual making the request; or, if the request is made on behalf of an organization or other entity, the signature of a responsible official of the organization or other entity.

Frivolous or insubstantial requests for a hearing may be denied by the Regional Administrator. However, if a substantial request for a public hearing is made on or before September 30, 1977, a public hearing will be held. The Regional Administrator will give further notice in the FEDERAL REGISTER and in a newspaper or newspapers of general circulation in the State of Tennessee of any hearing to be held pursuant to a request submitted by an interested person, or on his own motion. Notice of the hearing shall be given not less than fifteen (15) days prior to the time scheduled for the hearing. In addition to publication as described above, notice will be sent to the person requesting a hearing and to the State. Notice of the hearing will include a statement of the purpose of the hearing, information regarding the time and location for the hearing, and the address and telephone niumber of an office at which interested persons may obtain further information concerning the hearing.

After receiving the record of the hearing, the Regional Administrator will issue an order affirming or rescinding his determination. If the determination is affirmed, it shall become effective as of the date of this order.

If no timely and appropriate request for a hearing is received and the Regional Administrator does not elect to hold a hearing on his own motion, this determination shall become effective on September 30, 1977.

Please bring this notice to the attention of any persons known by you to have an interest in this determination.

Dated: July 21, 1977.

HOWARD ZELLER,
Deputy Regional Administrator,
Environmental Protection Agency, Region IV.

[FR Doc.77-25244 Filed 8-30-77;8:45 am]

[FRL 782-6]

STATE OF SOUTH CAROLINA

Determinant of Primary Enforcement Responsibility

This public notice is issued pursuant to section 1413 of the Safe Drinking Water Act, Pub. L. 93-523, December 16, 1974, and 142.10 of the National Interim Primary Drinking Water Regulations, published in the FEDERAL REGISTER on January 20, 1976.

An application, dated June 29, 1977, has been received from the Deputy Commissioner of the Office of Environmental Quality Control requesting that the Division of Water Supply of the South Carolina Department of Health and Environmental Control be granted primary enforcement responsibility for water systems in the State of South Carolina, in accordance with the provisions of this Act.

In response, I have determined that the Division of Water Supply has met all conditions of the Safe Drinking Water Act and subsequent regulations for the assumption of primary enforcement responsibility for water systems in the State of South Carolina. The State—

(1) Has adopted drinking water regulations which are no less stringent than the National Interim Primary Drinking Water Regulations;

(2) Has adopted and will implement adequate procedures for the enforcement of such State regulations, including adequate monitoring and inspections;

(3) Will keep such records and make such reports as required;

(4) If it permits variances or exemptions from the requirements of its regulations, will issue such variances and exemptions in accordance with the provisions of the National Interim Primary Drinking Water Regulations;

(5) Has adopted and can implement an adequate plan for the provision of safe drinking water under emergency circumstances.

All documents relating to this determination are available for public inspection between the hours of 8:30 a.m. and 4:45 p.m., Monday through Friday, at the following offices:

Office of Environmental Quality Control, Department of Health and Environmental Control, 2600 Bull Street, Columbia, S.C. 29201.
Regional Administrator, Environmental Protection Agency, Region IV, 345 Courtland Street, NE, Atlanta, Ga. 30308.

All interested parties are invited to submit written comments on this deter-

V 42169 AUG 31 77 UMI

mination and may request a public hearing. Written comments and/or a request for a public hearing must be submitted on or before September 30, 1977. A request for a public hearing shall include the following information:

(1) The name, address, and telephone number of the individual, organization, or other entity requesting a hearing.

(2) A brief statement of the requesting person's interest in the Regional Administrator's determination and of information that the requesting person intends to submit at such hearing.

(3) The signature of the individual making the request; or, if the request is made on behalf of an organization or other entity, the signature of a responsible official of the organization or other entity.

Frivolous or insubstantial requests for a hearing may be denied by the Regional Administrator. However, if a substantial request for a public hearing is made on or before September 30, 1977, a public hearing will be held. The Regional Administrator will give further notice in the FEDERAL REGISTER and in a newspaper or newspapers of general circulation in the State of South Carolina of any hearing to be held pursuant to a request submitted by an interested person, or on his own motion. Notice of the hearing shall be given not less than fifteen (15) days prior to the time scheduled for the hearing. In addition to publication as described above, notice will be sent to the person requesting a hearing and to the State. Notice of the hearing will include a statement of the purpose of the hearing, information regarding the time and location for the hearing, and the address and telephone number of an office at which interested persons may obtain further information concerning the hearing.

After receiving the record of the hearing, the Regional Administrator will issue an order affirming or rescinding his determination. If the determination is affirmed, it shall become effective as of the date of this order.

If no timely and appropriate request for a hearing is received and the Regional Administrator does not elect to hold a hearing on his own motion, this determination shall become effective on September 30, 1977.

Please bring this notice to the attention of any persons known by you to have an interest in this determination.

Dated: July 21, 1977.

HOWARD ZELLER,
Deputy Regional Administrator, Environmental Protection Agency, Region IV.

[FRL 785-2; OPP-180133A]

MICHIGAN DEPARTMENT OF AGRICULTURE

Amendment to Specific Exemption To Use Terramycin To Control Bacterial Spot on Peaches and Apricots

In May, 1977, the Environmental Protection Agency (EPA) granted a specific exemption to the Michigan Department of Agriculture (hereafter referred to as the "Applicant") for use of Terramycin by ground equipment to control bacterial spot caused by a pathogenic bacterium, *Xanthomonas pruni*, on 6,000 acres of peaches and apricots in the following counties of Michigan: Allegan, Berrien, Lapeer, Kent, Mason, Oceana, and Van Buren. Notice of the granting of the exemption was published in the FEDERAL REGISTER on July 6, 1977 (42 FR 37996).

The Applicant has requested a fifteen (15) day extension of the subject exemption. The Applicant states that in the case of the more northern counties and in those cases where growers have planted longer maturing varieties, applications must be made later than the July 31 expiration date. There will be no increase in the acreage treated, the number of applications or the amount of Terramycin applied, beyond that which was previously authorized by the subject exemption.

After reviewing the application and other available information, EPA has determined that the specific exemption granted may be amended to include the following:

1. The expiration date of the specific exemption is changed from July 31, 1977, to August 15, 1977; and

2. All other restrictions pursuant to the original specific exemption remain in force.

Dated: August 25, 1977.

EDWIN L. JOHNSON,
Deputy Assistant Administrator for Pesticide Programs.

[FR Doc.77-25372 Filed 8-30-77;8:45 am]

[OPP-180141, FRL 785-3]

WASHINGTON STATE DEPARTMENT OF AGRICULTURE

Issuance of a Specific Exemption To Use Carbofuran To Control Root Weevil on Cranberries

The Environmental Protection Agency (EPA) has granted a specific exemption to the Washington State Department of Agriculture (hereafter referred to as the "Applicant") to use a maximum of 560 pounds of carbofuran to control populations of root weevils which are threatening the commercial cranberry crop on 140 acres in Pacific and Grays Harbor Counties, Washington. This exemption was granted in accordance with, and is subject to, the provisions of 40 CFR Part 166, which prescribes requirements for exemption of Federal and State agencies for use of pesticides under emergency conditions.

This notice contains a summary of certain information required by regulation to be included in the notice. For more detailed information, interested parties are referred to the application on file with the Registration Division (WH-567), Office of Pesticide Programs, EPA, 401 M St. SW., Room E-315, Washington, D.C.

According to the Applicant, the primary pest is the Black Vine Weevil (*Otiorhynchus sulcatus*). Other weevils which may be present are the Strawberry Root Weevil (*O. ovatus*), the Rough Strawberry Weevil (*O. rugostriatus*), and the Obscure Root Weevil (*Sciopithes obscurus*). These pests occur principally in those cranberry bogs which are not flooded at harvest. Of the 1200 acres of cranberries grown in Washington State, about 700 acres are not flooded. The Applicant estimated that approximately twenty percent of the dry harvest bogs, about 140 acres, may need treatment with carbofuran this year.

These pests are indigenous to the area. Wildlands adjacent to the cranberry bogs contain alternate hosts which serve as reservoirs for new infestations. The larvae, which feed on the roots, may destroy virtually every cranberry plant as the pest spreads. Recovery can be expected only if the weevils are controlled before the damage becomes extensive. The Applicant stated that recent experience indicates that infestations will increase rapidly and cause widespread damage within the next two to five years.

There appear to be no alternative registered pesticides or non-chemical methods of control currently available to control these pests; malathion, registered for strawberry weevil control on cranberries, is of questionable efficacy, according to the Applicant. Flooding will control these pests, but bogs which are dry-harvested cannot be flooded because of slope or unevenness of the land. Prior to their cancellation, chlorinated hydrocarbon insecticides were registered for control of root weevils.

The Applicant proposed the use of two applications of the product Furadan 10G at a rate of two pounds of active ingredient per acre per application. A preharvest interval of at least sixty days will be observed. Broadcast applications will be made by State-certified commercial and private applicators using ground equipment in accordance with instructions provided by the Washington State University Cooperative Extension Service. Treatment will be limited to non-flooded bogs where infestations have been confirmed. According to the Applicant, nearly complete control can be obtained with two applications of the Furadan granules at the rate proposed.

Even with the carbofuran treatments this year, presently existing damage is expected to cause a 2 to 3 percent loss of production in the non-flooded bogs. Without the treatment in 1977, the loss is expected to increase to 10 or 15 percent by 1978, and probably much more in the next two to five years.

The Applicant estimated that if 15 percent of 700 acres of cranberries require replanting in 1978, the total loss over the next ten years to the industry could be as high as $1,900,000. These losses could force some growers out of business.

EPA has determined that cranberries bearing residues of carbofuran which do not exceed 0.2 part per million (ppm) will not pose a hazard to the public health. Cranberries comprise only about 0.1 percent of the human diet, and the request was for only 140 acres of the 25,000 acres of cranberries grown in the United States; therefore, actual risk is minimal. Although Furadan 10G poses a serious hazard to wildlife, particularly waterfowl, the treatment does not pose an unacceptable environmental hazard, due to the small acreage involved and the facts that (a) following application, the granules are expected to go through the thick mat of cranberry vines to the soil where they would be unavailable to birds, and (b) the application period should miss the time when nesting waterfowl will be utilizing nest sites.

After reviewing the application and other available information, EPA has determined that (a) a pest outbreak of root weevils has occurred; (b) there is no pesticide presently registered and available for use to control the root weevils threatening the cranberry crop in Pacific and Grays Harbor Counties; (c) there are no alternative means of control, taking into account the efficacy and hazard; (d) significant economic problems may result if the root weevils are not controlled; and (e) the time available for action to mitigate the problems is insufficient for a pesticide to be registered for this use. Accordingly, the Applicant has been granted a specific exemption to use the pesticide noted above until August 1, 1977, to the extent and in the manner set forth in the application. The specific exemption is also subject to the following conditions:

1. Carbofuran applications will be limited to non-flooded bogs, where infestations have been confirmed by Washington State University research or extension personnel or fieldmen from the Ocean Spray Cranberry Company;
2. The dosage rate shall not exceed two pounds of active ingredient per application;
3. A maximum of 560 pounds active carbofuran will be applied;
4. The number of applications shall not exceed two;
5. A sixty day pre-harvest interval will be observed;
6. The pesticide will be applied by broadcast ground equipment;
7. All applicable directions and precautions on the registered label will be observed;
8. All applications of carbofuran shall be restricted to cranberries which are watered by sprinkler irrigation;
9. EPA has determined that residues of carbofuran, its carbamate metabolite and its phenolic metabolites resulting from this use will not exceed 0.2 ppm, a level which has been determined adequate to protect the public health. The Food and Drug Administration of the U.S. Department of Health, Education, and Welfare, has been advised of this action;
10. All applications will be made by commercial and private applicators certified by the Applicant;
11. The EPA shall be immediately informed of any adverse effects resulting from the use of this pesticide in connection with this exemption; and
12. The pesticide will not be applied in bogs which are being utilized by waterfowl as nesting or feeding sites.

AUTHORITY: Section 18 of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended (86 Stat. 973; 89 Stat. 751; 7 U.S.C. 136 et seq.).

Dated: August 25, 1977.

EDWIN L. JOHNSON,
Deputy Assistant Administrator for Pesticide Programs.

[FR Doc.77-25379 Filed 8-30-77;8:45 am]

FEDERAL RESERVE SYSTEM

NATIONAL CITY CORP.

Order Approving Acquisition of Bank

National City Corporation, Cleveland, Ohio, a bank holding company within the meaning of the Bank Holding Company Act, has applied for the Board's approval under § 3(a)(3) of the Act (12 U.S.C. § 1842(a)(3)) to acquire all of the voting shares (less directors' qualifying shares) of the successor by merger to National Union Bank, Columbiana, Ohio ("Bank"). The bank into which Bank is to be merged has no significance except as a means to facilitate the acquisition of the voting shares of Bank. Accordingly, the proposed acquisition of shares of the successor organization is treated herein as the proposed acquisition of the shares of Bank.

Notice of the application, affording opportunity for interested persons to submit comments and views, has been given in accordance with § 3(b) of the Act. The time for filing comments and views has expired, and the Board has considered the application and all comments received in light of the factors set forth in § 3(c) of the Act (12 U.S.C. § 1842(c)).

Applicant, the third largest banking organization in Ohio, controls five banks with total deposits of $1.8 billion representing 5.5 per cent of total deposits in commercial banks in the State.[1] Consummation of the proposed acquisition would increase Applicant's share of Statewide deposits by 0.1 per cent without changing its ranking in the State. Thus, consummation of the proposal would have no appreciable effect upon the concentration of banking resources in Ohio.

Applicant proposes to enter the Salem banking market[2] by acquiring Bank $32.5 million in deposits), the third largest of eight banking organizations in the market, holding 16.3 per cent of total market deposits.[3] Inasmuch as Applicant's closest subsidiary bank is located 65 miles away in another banking market, approval of the application would not eliminate significant existing competition. The Salem market does not appear particularly attractive for de novo entry; moreover, following consummation additional points of entry would remain available. In light of the above, the Board concludes that the proposed acquisition would not have significant adverse effects on either existing or potential competition.

The financial and managerial resources of Applicant and Bank are regarded as satisfactory and the future prospects for each appear favorable. Although Applicant will incur debt in connection with this proposal, it appears that Applicant will be able to service the debt without placing an undue strain on Bank. Thus, banking factors are consistent with approval of the application.

It appears that the banking needs of the Salem banking market are being adequatly served at the present time. Although the acquisition of Bank by Applicant is not likely to result in any immediate changes in Bank's operations, the affiliation will enable Bank to offer its customers additional and improved services. Accordingly, convenience and needs considerations are consistent with approval of the proposed transaction. On the basis of all the facts of record, it is the Board's judgment that consummation of the proposed transaction would be in the public interest and that the application should be approved.

On the basis of the record, the application is approved for the reasons summarized above. The transaction shall not be made (a) before the thirtieth calendar day following the effective date of this Order or (b) later than three months after the effective date of this Order, unless such period is extended for good cause by the Board, or by the Federal Reserve Bank of Cleveland pursuant to delegated authority.

By order of the Board of Governors,[4] effective August 24, 1977.

GRIFFITH L. GARWOOD,
Deputy Secretary of the Board.

[FR Doc.77-25280 Filed 8-30-77;8:45 am]

UNITED ROCK CONSTRUCTION, INC.

Order Granting Determination Under the Bank Holding Company Act

United Rock Construction, Inc., Omaha, Nebraska ("United"), a bank holding company within the meaning of section 2(a) of the Bank Holding Company Act of 1956, as amended (12 U.S.C. § 1841(a)), by virtue of its ownership of over 99 percent of the issued and outstanding voting shares of National Security Bank of Superior, Superior, Nebraska, has requested a determination, pursuant to the provisions of section 2(g)(3) of the Bank Holding Company Act of 1956 (12 U.S.C. § 1841(g)(3)) ("the Act"), that United is not in fact capable of controlling either Harold S. Myers, or David C. Myers ("Myers Brothers"), individuals to whom it

[1] Unless otherwise indicated, all banking data are as of December 31, 1976, and reflect all bank holding company formations and acquisitions approved as of June 30, 1977.

[2] The Salem banking market is approximated by the northern two thirds of Columbiana County along with Green and Goshen Townships in Mahoning County.

[3] All market data are as of June 30, 1976.

[4] Voting for this action: Vice Chairman Gardner and Governors Wallich, Jackson, Partee, and Lilly. Absent and not voting: Chairman Burns and Governor Coldwell.

V 42 169 AUG 31 77 UMI

transferred its stockholdings in M&M Investment Company, Omaha, Nebraska ("M&M"), company engaged in farming operations, notwithstanding the fact that the individuals are officers and directors of United.

Under the provisions of section 2(g)(3) of the Act, shares transferred after January 1, 1966, by any bank holding company to a transferee that is indebted to the transferor or has one or more officers, directors, trustees, or beneficiaries in common with or subject to control by the transferor, are deemed to be indirectly owned or controlled by the transferor unless the Board, after opportunity for hearing, determines that the transferor is not in fact capable of controlling the transferee.

Notice of an opportunity for hearing with respect to United's request for a determination under section 2(g)(3) was published in the FEDERAL REGISTER (41 FR 28360). The time provided for requesting a hearing has expired. No such request has been received by the Board, nor has any evidence been received to show that United is in fact capable of controlling the two individual transferees.

It is hereby determined that United is not, in fact, capable of controlling the Myers Brothers. This determination is based upon the evidence of record in this matter, including the following facts. United is a closely-held Nebraska corporation in which the Myers Brothers, each hold a 50 percent stock interest and serve as its only officers and directors. Under § 4(a)(2) of the Bank Holding Company Act United is required to divest its farming operations by 1981. In anticipation of such a divestiture, M&M was organized to hold United's farming operations, and its shares were spun off to the Myers Brothers on a pro rata basis. Thus, United's interest in M&M has terminated. The Myers Brothers are the only stockholders in M&M and are also its only directors and officers, and the divestiture does not appear to have been a means for perpetuating United's control over the divested farming operations. On the basis of the above and other facts of record the Board concludes that control of both United and M&M resides with the Myers Brothers as individuals and that United does not control and is not in fact capable of controlling the Myers Brothers in their capacity as transferees of M&M's stock or otherwise.

Accordingly, it is ordered, That the request of United for a determination pursuant to section 2(g)(3) be and hereby is granted. This determination is based upon the representations made to the Board by United and the Myers Brothers. In the event the Board should hereafter determine that facts material to this determination are otherwise than as represented, or that United or the Myers Brothers has failed to disclose to the Board other material facts, this determination may be revoked, and any change in the facts or circumstances relied upon by the Board in making this determination could result in the Board reconsidering the determination made herein.

By order of the Board of Governors, acting through its General Counsel, pursuant to delegated authority (12 C.F.R. § 265.2(b)(1)), effective August 24, 1977.

THEODORE E. ALLISON,
Secretary of the Board.

[FR Doc.77-25281 Filed 8-30-77;8:45 am]

GENERAL ACCOUNTING OFFICE

REGULATORY REPORTS REVIEW

Receipt of Report Proposal

The following request for clearance of a report intended for use in collecting information from the public was received by the Regulatory Reports Review Staff, GAO, on August 24, 1977. See 44 U.S.C. 3512 (c) and (d). The purpose of publishing this notice in the FEDERAL REGISTER is to inform the public of such receipt.

The notice includes the title of the request received; the name of the agency sponsoring the proposed collection of information; the agency form number, if applicable; and the frequency with which the information is proposed to be collected.

Written comments on the proposed FEA request are invited from all interested persons, orangizations, public interest groups, and affected businesses. Because of the limited amount of time GAO has to review the proposed request, comments (in triplicate) must be received on or before September 19, 1977, and should be addressed to Mr. John M. Lovelady, Acting Assistant Director, Regulatory Reports Review, United States General Accounting Office, Room 5033, 441 G Street NW., Washington, D.C. 20548.

Further information may be obtained from Patsy J. Stuart of the Regulatory Reports Review Staff, 202-275-3532.

The FEA request clearance of new Form FEA-U535-A-O, Energy Savings Report. Form FEA-U535-A-O will be used to collect data on actual energy savings achieved each year as a result of State participation in the State Energy Conservation Program (SECP). Each State participating in the SECP will submit an annual Energy Savings Report consisting of one Form FEA-U535-A-O for each program measure in its State plan. FEA estimates a complete report will consist of approximately 5 to 100 forms per State depending on the number of program measures in the State's plan. The forms will be partially completed by FEA based on information available within the State plans and will then be distributed to participating States annually for final completion and submission to FEA by October 31 of each year.

Data from Form FEA-U535-A-O will be used to construct a data base for compilation and dissemination of information on SECP program measures, for use by the FEA and the States to evaluate the relative effectiveness of different conservation strategies, and for FEA's annual reporting requirements to the President and Congress. FEA estimates that respondents are the 50 States and 5 Territories and that reporting burden will average 540 hours per annual response.

NORMAN F. HEYL,
Regulatory Reports Review Officer.

GENERAL SERVICES ADMINISTRATION

[Federal Property Management Regs.: Temporary Reg. D-60]

SECRETARY OF THE INTERIOR

Delegation of Authority

1. *Purpose.* This regulation delegates authority to the Secretary of the Interior to appoint uniformed guards of the Department of the Interior as special policemen for duty in connection with the policing of the Haskell Indian Junior College, Lawrence, Kans.; Fort Sill Indian School, Lawton, Okla.; Riverside Indian School Reserve, Anadarko, Oklahoma; Concho Indian School Reserve, El Reno, Oklahoma; and Chilocco Indian School Reserve, Kay County, Okla., which are under the administration of the Department of the Interior.

2. *Effective date.* This regulation is effective immediately.

3. *Delegation.* (a) Pursuant to the authority vested in me by the Federal Property and Administrative Services Act of 1949 (63 Stat. 377), as amended, and the Act of June 1, 1948 (62 Stat. 281), as amended, authority is hereby delegated to the Secretary of the Interior to appoint uniformed guards as special policemen, to make all needful rules and regulations, and to annex to such rules and regulations such reasonable penalties (not to exceed those prescribed in 40 U.S.C. 318c) as will ensure their enforcement for the protection of persons and property at the Haskell Indian Junior College, Lawrence, Kans.; Fort Sill Indian School, Lawton, Okla.; Riverside Indian School Reserve, Anadarko, Okla.; Concho Indian School Reserve, El Reno, Okla.; and Chilocco Indian School Reserve, Kay County, Okla., over which the United States has exclusive jurisdiction.

(b) The Secretary of the Interior may redelegate this authority to the appropriate officers or employees of the Department of the Interior.

(c) This authority shall be exercised in accordance with the limitations and requirements of the above-cited acts and the policies, procedures, and controls prescribed by the General Services Administration.

Dated: August 22, 1977.

JOEL W. SOLOMON,
Administrator of General Services.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[AR 030451]

ARIZONA

Notice of Opportunity for Public Hearing and Republication of Notice of Proposed Withdrawal

The United States Army, Corps of Engineers, filed application Serial Number AR 030451 on February 28, 1961, for a withdrawal in relation to the following described lands:

GILA AND SALT RIVER MERIDIAN, ARIZONA

T. 5S., R. 28 E.,
Sec. 36, $SE\frac{1}{4}$, unsurveyed.
T. 6S., R. 28 E.,
Sec. 1, Lots 1 and 2, $S\frac{1}{2}NE\frac{1}{4}$, and unsurveyed $W\frac{1}{2}$, $SE\frac{1}{4}$;
Sec. 2, $S\frac{1}{2}$, unsurveyed;
Sec. 11, $N\frac{1}{2}$, unsurveyed;
Sec. 12, $N\frac{1}{2}NE\frac{1}{4}$, $NW\frac{1}{4}$, and $N\frac{1}{2}SW\frac{1}{4}$, unsurveyed.
T. 5 S., R. 29 E.,
Sec. 7, $W\frac{1}{2}E\frac{1}{2}$, $E\frac{1}{2}W\frac{1}{2}$, and $SW\frac{1}{4}NW\frac{1}{4}$;
Sec. 11, $E\frac{1}{2}NE\frac{1}{4}$, $S\frac{1}{2}SW\frac{1}{4}$, $SE\frac{1}{4}$;
Sec. 12, Lot 1, Lots 5 to 16 inclusive, $NW\frac{1}{4}NW\frac{1}{4}$, $S\frac{1}{2}NW\frac{1}{4}$, $SW\frac{1}{4}$, and Patented Mineral Survey 1029B to 1033B, inclusive;
Sec. 13, $NW\frac{1}{4}NW\frac{1}{4}$;
Sec. 14, $SW\frac{1}{4}NE\frac{1}{4}$, $N\frac{1}{2}NE\frac{1}{4}$, $W\frac{1}{2}$;
Sec. 15, $E\frac{1}{2}NE\frac{1}{4}$, $S\frac{1}{2}SW\frac{1}{4}$, $SE\frac{1}{4}$;
Sec. 16, $SE\frac{1}{4}SE\frac{1}{4}$;
Sec. 18, $N\frac{1}{2}$, $E\frac{1}{2}SW\frac{1}{4}$, $SE\frac{1}{4}$;
Sec. 19, $W\frac{1}{2}E\frac{1}{2}$, and $E\frac{1}{2}W\frac{1}{2}$;
Sec. 21, $NE\frac{1}{4}$, $E\frac{1}{2}SW\frac{1}{4}$, $SE\frac{1}{4}$;
Sec. 22, $N\frac{1}{2}$, $NW\frac{1}{4}SW\frac{1}{4}$, $S\frac{1}{2}S\frac{1}{2}$;
Sec. 25, Lots 2 and 3, Lots 5 to 16, inclusive, $S\frac{1}{2}NW\frac{1}{4}$, $SW\frac{1}{4}$;
Sec. 26, All;
Sec. 27, $N\frac{1}{2}$, $N\frac{1}{2}N\frac{1}{2}SW\frac{1}{4}$, $SE\frac{1}{4}$;
Sec. 28, $N\frac{1}{2}N\frac{1}{2}$;
Sec. 29, $NE\frac{1}{4}$, $S\frac{1}{2}NW\frac{1}{4}$, $W\frac{1}{2}SW\frac{1}{4}$, $N\frac{1}{2}SE\frac{1}{4}$;
Sec. 30, All;
Sec. 31, $N\frac{1}{2}NE\frac{1}{4}$, $W\frac{1}{2}$;
Sec. 32, $NW\frac{1}{4}NW\frac{1}{4}$;
Sec. 35, $N\frac{1}{2}N\frac{1}{2}$;
Sec. 36, Lots 1 and 2.
T. 6 S., R. 29 E.,
Sec. 6, $NW\frac{1}{4}$, $W\frac{1}{2}SW\frac{1}{4}$, unsurveyed;
Sec. 7, $NW\frac{1}{4}NW\frac{1}{4}$, unsurveyed.
T. 5 S., R. 30 E.,
Sec. 6, Lots 3 to 6, 8, 9, 12, 13, 14, 15, 16, 17, 19, 20, 23, and 24, inclusive, and Mineral Survey 1654B;
Sec. 7, Lots 1 to 4, inclusive, and $NE\frac{1}{4}NW\frac{1}{4}$;
Sec. 30, Lots, 2, 3, 4, $SE\frac{1}{4}NW\frac{1}{4}$, and $E\frac{1}{2}SW\frac{1}{4}$;
Sec. 31, Lot 1, $NW\frac{1}{4}NE\frac{1}{4}$, $S\frac{1}{2}NE\frac{1}{4}$, $E\frac{1}{2}W\frac{1}{2}$, $SE\frac{1}{4}$;
Sec. 32, $S\frac{1}{2}NW\frac{1}{4}$, $SW\frac{1}{4}$;
Sec. 33, $SE\frac{1}{4}NE\frac{1}{4}$, $S\frac{1}{2}$;
Sec. 34, $SW\frac{1}{4}NW\frac{1}{4}$, $W\frac{1}{2}SW\frac{1}{4}$.
T. 6 S., R. 30 E.,
Sec. 1, Lots 5 to 12, inclusive;
Sec. 2, Lots 1 to 12, inclusive;
Sec. 3, Lots 1 to 7, inclusive;
Sec. 4, Lots 1 to 6, inclusive, the North 9.44 acres of Lot 7, $SE\frac{1}{4}NW\frac{1}{4}$, and the Gila River between the meander lines of said lots of Secs. 1, 2, 3, and 4.

The area described above aggregates approximately 13,062.91 acres in Graham and Greenlee Counties.

The applicant desires that the lands be reserved for the construction operation and maintenance of the Camelback Dam and Reservoir, a structure designed to control floods on the Gila River.

A notice of the proposed withdrawal was published in the FEDERAL REGISTER on September 7, 1962, Volume No. 27, Page No. 8927, Document No. 62-8963.

Pursuant to section 204(h) of the Federal Land Policy and Management Act of 1976, 90 Stat. 2754, notice is hereby given that an opportunity for a public hearing is afforded in connection with the pending withdrawal application. All interested persons who desire to be heard on the proposed withdrawal must file a written request for a hearing with the State Director, Bureau of Land Management, 2400 Valley Bank Center, Phoenix, Arizona 85073, on or before October 10, 1977. Notice of the public hearing will be published in the FEDERAL REGISTER, giving the time and place of such hearing. The hearing will be scheduled and conducted in accordance with BLM Manual Sec. 2351.16 B. All previous comments submitted in connection with the withdrawal application have been included in the record and will be considered in making a final determination on the application.

In lieu of or in addition to attendance at a scheduled public hearing, written comments or objections to the pending withdrawal application may be filed with the undersigned authorized officer of the Bureau of Land Management on or before October 10, 1977.

The above described lands are temporarily segregated from the operation of the public land laws, including the mining and the mineral leasing laws, to the extent that the withdrawal applied for, if and when effected, would prevent any form of disposal or appropriation under such laws. Current administrative jurisdiction over the segregated lands will not be affected by the temporary segregation. In accordance with section 204(g) of the Federal Land Policy and Management Act of 1976 the segregative effect of the pending withdrawal application will terminate on October 20, 1991, unless sooner terminated by action of the Secretary of the Interior.

All communications (except for public hearing requests) in connection with the pending withdrawal application should be addressed to the Chief, Branch of Lands and Minerals Operations, Bureau of Land Management, Department of the Interior, 2400 Valley Bank Center, Phoenix, Arizona 85073.

MARIO L. LOPEZ,
Chief, Branch of Lands and Minerals Operations.

CHIEF, BRANCH OF RECORDS & DATA MANAGEMENT DIVISION OF MANAGEMENT SERVICES WYOMING STATE OFFICE

Redelegation of Authority by State Director

JULY 22, 1977.

Pursuant to the authority contained in section 1.1 of BLM Order No. 701 dated July 23, 1964, as amended, authority is hereby redelegated to the Chief, Branch of Records and Data Management to take action under section 2.6(k) as to mining claim instruments filed for record with BLM under 43 CFR 3833, as follows:

(1) Accept and record instruments meeting recording requirements;

(2) Notify owners to take curative actions to complete defective filings;

(3) Reject instruments and void claims not filed within the prescribed time periods; and

(4) Reject filings and void claims located on lands not available for mineral location on dates of location.

This delegation is effective May 31, 1977.

Dated: August 24, 1977.

DELMAR D. VAIL,
Associate State Director.

Approved:
GEORGE L. TURCOTT,
Acting Director.

DEPARTMENT OF JUSTICE

E. I. DUPONT DE NEMOURS & CO., INC., LAPLACE, LOUISIANA

Proposed Consent Decree (Federal Water Pollution Control Act)

In accordance with Departmental Policy, 28 C.F.R. § 50.7, 38 Fed. Reg. 19029, notice is hereby given that on August 9, 1977, a proposed consent decree in *United States v. E. I. duPont de Nemours & Company, Inc.*, C. A. 77-2258 Session G, was lodged with the United States District Court for the Eastern District of Louisiana. The proposed decree extends the deadline for compliance with certain effluent limitations until December 15, 1977, and provides for the payment to the United States of $210 for each day until that date that the discharge exceeds these effluent limitations.

The Department of Justice will receive for a period of thirty (30) days from the date of this notice written comments relating to the proposed consent decree. Comments should be addressed to the Assistant Attorney General, Land and Natural Resources Division, Department of Justice, Washington, D.C. 20530, and should refer to *United States v. E. I. duPont de Nemours & Company, Inc.*, D.J. Ref. 90-5-1-1-865.

The proposed amended consent decree may be examined at the office of the United States Attorney for the Eastern District of Louisiana, New Orleans, Louisiana 70130; at the Region VI office of the Environmental Protection Agency, Enforcement Division, 1201 Elm Street, Dallas, Texas 75270; and at the Pollution Control Section, Land and Natural Resources Division, Department of Justice, Room 2625, Ninth Street and Pennsylvania Avenue, NW., Washington, D.C. 20530. A copy of the proposed amended consent decree may be obtained in person or by mail from the Pollution Control Section, Land and Natural Resources Division, Department of Justice.

JAMES W. MOORMAN,
Acting Assistant Attorney General Land and Natural Resources Division.

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

[Notice (77-551)]

SPACE PROGRAM ADVISORY COUNCIL (SPAC), APPLICATIONS COMMITTEE

Meeting

The ad hoc informal Subcommittee on Satellite Telecommunications of the SPAC Applications Committee will meet on September 20, 1977, at NASA Headquarters, Federal Office Building 10B, Room 226A, 600 Independence Avenue SW., Washington, D.C.

Members of the public will be admitted to the meeting at 9:00 a.m. on a first-come first-served basis. The seating capacity of the room is 35 people. Visitors will be requested to sign a visitor's register.

This Subcommittee, comprised of 7 members including the Chairman, Mr. Thomas Rogers, serves in an advisory capacity only and will recommend a satellite telecommunications program to NASA.

For further information regarding the meeting, please contact Mr. Louis B. C. Fong, (202) 755-8617. The approved agenda for the meeting on September 20, 1977, is as follows:

Time	*Topic*
9 a.m.	Opening remarks by Chairman.
9 a.m.	Satellite telecommunications program. The subcommittee will continue its discussions on and review of the National Resource Council—Space Applications Board Report on Satellite Communications and will review its progress for the past meetings. The chairman will present a draft report covering the subcommittee's findings and conclusions to date for the member's approval.
4 p.m.	Adjourn.

KENNETH R. CHAPMAN,
Assistant Administrator for DoD and Interagency Affairs.

AUGUST 25, 1977.

[FR Doc.77-25275 Filed 8-30-77;8:45 am]

NATIONAL COMMISSION FOR MANPOWER POLICY

MEETING

Pursuant to the provisions of the Federal Advisory Committee Act (P.L. 92-463; 86 Stat. 770) notice is hereby given that the National Commission for Manpower Policy will conduct a field review on the net employment effects of the public service employment (PSE) program on September 20 and September 21, 1977. The meeting will be held in the Rainbow Plaza Room of the Seattle Airport Hilton Hotel located at 17620 Pacific Highway, South, Seattle, Wash. The reviews will commence at 9:00 a.m. and conclude at 4:00 p.m. on both days.

The National Commission for Manpower Policy was established pursuant to Title V of the Comprehensive Employment and Training Act of 1973 (P.L. 92-203). The Act charges the Commission with the broad responsibility of advising the Congress, the President, the Secretary of Labor, and other Federal agency heads on national manpower issues. The Commission is specifically charged with reporting annually to the President and the Congress on its findings and recommendations with respect to the Nation's manpower policies and programs. The Emergency Jobs Programs Extension Act of 1976 directs the Commission to study and report to Congress on the net employment effects of PSE programs under Title II and Title VI of the Comprehensive Employment and Training Act.

The purpose of the hearing is to elicit the views of those at the State and local level (in and out of government) on the effects and effectiveness of the public service employment program. Among the issues to be addressed are:

1. What goals and objectives are developed by State and local governments for the PSE programs? How are these goals developed so that they are supportive of national goals; provide needed public services; and are supportive of other public services?

2. To what extent has PSE resulted in an increase in the provision of services by State or local governments? Has PSE been instrumental in maintaining the level of services where they would have otherwise been curtailed due to revenue reductions, increased costs or other factors? What types of services are being provided through the PSE programs? What types of agencies (e.g., public safety, sanitation, education) received PSE jobs? If the PSE program were reduced or phased out, to what extent would these services also be reduced or terminated?

3. To what extent has PSE resulted in an increase in the services provided by nonprofit community organizations? How has this changed as a result of the requirements of the Emergency Jobs Programs Extension Act of 1976? What types of services are being provided by community organizations with the employment provided by PSE?

4. What is the ability of State and local governments to absorb additional PSE jobs? To what extent can this be expanded by increased utilization of nonprofit community organizations? What has been the experience in implementing and increasing the PSE programs to date? What are the constraints to further increasing the size of the program?

5. What effect has the presence of the PSE program had on the personnel practices of State and local governments? Have changes been made to provide PSE employees with improved access to regular (i.e., non-PSE) jobs? Has the PSE program resulted in any changes in the composition of the regular employment of the employing jurisdiction in terms of race, sex, education, experience, or other characteristics? Can PSE be used as a means of training the hard-to-employ and then obtaining access for them to permanent, unsubsidized employment?

6. What should be the areas of concern in consideration of phasing out or phasing down the current PSE programs? What areas should be considered if the target populations or mode of operation of the current programs are to be modified? To what extent and how do changes in the scale, mode of operation, target population and/or continuity of the program effect the delivery of needed public services?

Members of the general public or other interested individuals may attend the Commission field reviews. Members of the public desiring to submit written statements to the Commission that are germane to the agenda may do so, provided such statements are in reproducible form and are submitted to the Director no later than 2 days before and 7 days after the meeting.

Additionally, members of the general public may request to make oral statements to the Commission to the extent that the time available for the meeting permits. Such oral statements must be directly germane to the announced agenda items and written application must be submitted to the Director of the Commission 3 days before the meeting. This application shall identify the following: the name and address of the applicant, the subject of his or her presentation and its relationship to the agenda; the amount of time requested; the individual's qualifications to speak on the subject matter; and shall include a justifying statement as to why a written presentation would not suffice. The Chairman reserves the right to decide to what extent public oral presentation will be permitted at the meeting. Oral presentations shall be limited to statements of fact and views and shall not include any question of Commission members or other participants unless these questions have been specifically approved by the Chairman.

Minutes of the meeting, working papers, and other documents prepared for the meeting will be available for public inspection 5 working days after the field review at the Commission's headquarters located at 1522 K Street NW., Room 300, Washington, D.C.

Signed at Washington, D.C., this 26th day of August 1976.

ELI GINZBERG,
Chairman, National Commission for Manpower Policy.

[FR Doc.77-25321 Filed 8-30-77;8:45 am]

NATIONAL COMMISSION ON NEW TECHNOLOGICAL USES OF COPYRIGHTED WORKS

NOTICE OF MEETING

A meeting of the National Commission on New Technological Uses of Copyrighted Works (CONTU) will be held at 10:30 a.m. on Thursday, September 15, 1977, and at 9:30 a.m. on Friday, September 16, 1977, in room 2119 of the Federal Building located at 210 South Dearborn Street in Chicago, Ill. The proceedings will be devoted to testimony on the Commission reports concerned with copyright protection for computer software and automated data bases, and witnesses on the photocopying issue. The meeting will be open to the public.

Full transcripts of the meeting will be available for purchase from the National Technical Information Service in November 1977; ordering information may be obtained from the Commission.

All members of the public, including representatives of groups concerned, are invited to submit written comments relating to any matters under the Commission's consideration. All such comments should be addressed to Dolores K. Dougherty, Administrative Officer, National Commission on New Technological Uses of Copyrighted Works, Washington, D.C. 20558.

ARTHUR J. LEVINE,
Executive Director, National Commission on New Technological Uses of Copyrighted Works.

OFFICE OF MANAGEMENT AND BUDGET

CLEARANCE OF REPORTS

List of Requests

The following is a list of requests for clearance of reports intended for use in collecting information from the public received by the Office of Management and Budget on August 24, 1977 (44 U.S.C. 3509). The purpose of publishing this list in the FEDERAL REGISTER is to inform the public.

The list includes the title of each request received; the name of the agency sponsoring the proposed collection of information; the agency form number(s), if applicable; the frequency with which the information is proposed to be collected; the name of the reviewer or reviewing division within OMB, and an indication of who will be the respondents to the proposed collection.

Requests for extension which appear to raise no significant issues are to be approved after brief notice through this release.

Further information about the items on this daily list may be obtained from the Clearance Office, Office of Management and Budget, Washington, D.C. 20503 (202-395-4529), or from the reviewer listed.

NEW FORMS

DEPARTMENT OF HEALTH, EDUCATION AND WELFARE

DEPARTMENT OF THE TREASURY

Internal Revenue Service

COMMISSIONER'S ADVISORY GROUP

Notice of Open Meeting

There will be meeting of the Commissioner's Advisory Group on September 15 and 16, 1977, in Room 3313 of the Internal Revenue Service Building. The building is located at 1111 Constitution Avenue, NW., Washington, D.C. The meeting will begin at 10:00 a.m. on September 15 and 9:00 a.m. on September 16. The agenda will include the following topics:

THURSDAY, SEPTEMBER 15, 1977

Oversight and the IRS.
Administrative Appeals—Single Level of Appeals.
Use of Administrative Procedure Act Approach to the Issuance of Rulings and Other Policy Announcements.
Revision of Form W-4.
Regulation 9100. What standards should the Service adopt regarding elections?
Information Returns Program.

FRIDAY, SEPTEMBER 16, 1977

Image of the IRS.
Authorization for Payment of Attorneys Fees in Tax Cases.
Possible Excessive Requirement for Power of Attorney.
IRS and New Taxpayer Gambits—What techniques does IRS use to keep abreast of new taxpayer gambits.

The meeting, which will be open to the public, will be in a room that accommodates approximately 50 people. After the Committee members finish discussing the items on the agenda, there may be time for statements by non-members. If you want to make a statement at the meeting, please contact Thomas V. Glynn before the meeting, so that he can set up a schedule. If you would like the Committee to consider a written statement, please send it to the Executive Secretary, Room 3011, 1111 Constitution Avenue, NW., Washington, D.C. 20224.

EXEMPTION UNDER PROVISION OF RULE 19 OF THE MANDATORY CAR SERVICE RULES ORDERED IN EX PARTE NO. 241

Eleventh Revised Exemption No. 129

AUGUST 26, 1977.

It appearing, That the railroads named herein own numerous 40-ft. plain boxcars; that under present conditions, there is virtually no demand for these cars on the lines of the car owners; that return of these cars to the car owners would result in their being stored idle on these lines; that such cars can be used by other carriers for transporting traffic offered for shipments to points remote from the car owners; and that compliance with Car Service Rules 1 and 2 prevents such use of plain boxcars owned by the railroads listed herein, resulting in unnecessary loss of utilization of such cars.

It is ordered, That, pursuant to the authority vested in me by Car Service Rule 19, plain boxcars described in the Official Railway Equipment Register, I.C.C.-R.E.R. No. 404 issued by W. J. Trezise, or successive issues thereof, as having mechanical designation "XM", with inside length 44-ft. 6-in. or less, regardless of door width and bearing reporting marks assigned to the railroads named below, shall be exempt from the provisions of Car Service Rules 1(a), 2(a), and 2(b).

Chicago, West Pullman & Southern Railroad Company.
Reporting Marks: CWP.
Chicago, Rock Island and Pacific Railroad Company.
Reporting Marks: RI-ROCK.
Detroit and Mackinac Railway Company.
Reporting Marks: D&M-DM.
Illinois Terminal Railroad Company.
Reporting Marks: ITC.
Louisville, New Albany & Corydon Railroad Company.
Reporting Marks: LNAC.
Missouri-Kansas-Texas Railroad Company.
Reporting Marks: MKT.
Missouri Pacific Railroad Company.
Reporting Marks: CEI-MI-MP-TP.
New Hope and Ivyland Railroad Company.
Reporting Marks: NHIR.
Richmond, Fredericksburg and Potomac Railroad Company Reporting Marks: RFP.
St. Louis-San Francisco Railway Company.
Reporting Marks: SLSF.
Southern Railway Company.
Reporting Marks: CG-NS-SA-SOU.

Effective 12:01 a.m., September 1, 1977, and continuing in effect until further order of this Commission.

Issued at Washington, D.C., August 23, 1977.

INTERSTATE COMMERCE COMMISSION.
JOEL E. BURNS,
Agent.

[FR Doc.77-25356 Filed 8-30-77;8:45 am]

[I.C.C. Order No. 36; Rev. S.O. 1252]

GRAND TRUNK WESTERN RAILROAD CO.

Rerouting of Traffic

TO ALL RAILROADS:

In the opinion of Joel E. Burns, Agent, the Grand Trunk Western Railroad Company will be unable to transport traffic routed via its car ferry between Milwaukee, Wisconsin, and Muskegon, Michigan, because of necessary repairs to its boat to commence after completion of trips scheduled for September 2, 1977.

It is ordered, That:

(a) *Rerouting traffic.* The Grand Trunk Western Railroad Company being unable to transport traffic routed via its car ferry between Milwaukee, Wisconsin, and Muskegon, Michigan, because of necessary repairs to its boat to commence on September 19, 1977, that carrier is hereby authorized to divert and reroute such traffic over any available route to expedite the movement regardless of the routing shown on the waybill. The billing covering all such cars rerouted shall carry a reference to this order. Traffic necessarily diverted by authority of this order shall be rerouted so as to preserve as nearly as possible the participation and revenues of other carriers provided in the original routing.

(b) *Traffic which may be rerouted.* (1) This order shall apply to traffic routed via the ferry for movements via ferry trips scheduled to depart Milwaukee or Muskegon after September 16, 1977.

(c) *Concurrence of receiving roads to be obtained.* The railroad desiring to divert or reroute traffic under this order shall receive the concurrence of other railroads to which such traffic is to be diverted or rerouted, before the rerouting or diversion is ordered.

(d) *Notification to shippers.* Each carrier rerouting cars in accordance with this order shall notify each shipper at the time each car is rerouted or diverted and shall furnish to such shipper the new routing provided under this order.

(e) Inasmuch as the diversion or rerouting of traffic by said Agent is deemed to be due to carrier's disability, the rates applicable to traffic diverted or rerouted by said Agent shall be the rates which were applicable at the time of shipment on the shipments as originally routed.

(f) In executing the directions of the Commission and of such Agent provided for in this order, the common carriers involved shall proceed even though no contracts, agreements, or arrangements now exist between them with reference to the divisions of the rates of transportations applicable to said traffic. Divisions shall be, during the time this order remains in force, those voluntarily agreed upon by and between said carriers; or upon failure of the carriers to so agree, said divisions shall be those hereafter fixed by the Commission in accordance with pertinent authority conferred upon it by the Interstate Commerce Act.

(g) Effective date. This order shall become effective at 12:01 a.m., August 29, 1977.

(h) Expiration date. This order shall expire at 11:59 p.m., October 31, 1977, unless otherwise modified, changed, or suspended.

It is further ordered, That this order shall be served upon the Association of American Railroads, Car Service Division, as agent of all railroads subscribing to the car service and car hire agreement under the terms of that agreement, and upon the American Short Line Railroad Association; and that it be filed with the Director, Office of the Federal Register.

Issued at Washington, D.C., August 25, 1977.

INTERSTATE COMMERCE COMMISSION.
JOEL E. BURNS,
Agent.

IRREGULAR-ROUTE MOTOR COMMON CARRIERS OF PROPERTY

Elimination of Gateway Letter Notices

AUGUST 26, 1977.

The following letter-notices of proposals to eliminate gateways for the purpose of reducing highway congestion, alleviating air and noise pollution, minimizing safety hazards, and conserving fuel have been filed with the Interstate Commerce Commission under the Commission's Gateway Elimination Rules (49 CFR 1065), and notice thereof to all interested persons is hereby given as provided in such rules.

An original and two copies of protests against the proposed elimination of any gateway herein described may be filed with the Interstate Commerce Commission within 10 days from the date of this publication. A copy must also be served upon applicant or its representative. Protests against the elimination of a gateway will not operate to stay commencement of the proposed operation.

Successfully filed letter-notices of the same carrier under these rules will be numbered consecutively for convenience in identification. Protests, if any, must refer to such letter-notices by number.

No. MC 8973 (Sub-No. E34), filed May 16, 1974. Applicant: METROPOLITAN TRUCKING, INC., 2424 95th St., North Bergen, N.J. 07047. Applicant's representative: E. Stephen Heisley, 666 Eleventh St. NW., Washington, D.C. 20001. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Building materials* (except commodities in bulk), (A)(1) from points in Essex County, N.J., to points in Maine, New Hampshire, Vermont, Massachusetts, Rhode Island, Maryland, Virginia, District of Columbia, Ohio, and Delaware. (2) From points in Essex County, N.J., to points in that part of Connecticut on, north and east of a line beginning at the Connecticut-Massachusetts State line and extending along Connecticut Highway 12 and south through Grosvenordale thence through Putnam to junction U.S. Highway 44, thence east to the Connecticut-Rhode Island State line. (3) From points in Essex County, N.J., to that portion of Pennsylvania on and west of a line beginning at the New York-Pennsylvania State line near Sayre and extending south along U.S. Highway 220 to junction Pennsylvania Highway 487, thence along Pennsylvania Highway 487 to junction Pennsylvania Highway 239, thence along Pennsylvania Highway 239 to junction Pennsylvania Highway 93, thence along Pennsylvania Highway 93 to junction Pennsylvania Highway 309, thence along Pennsylvania Highway 309 to junction Pennsylvania Highway 143, thence along Pennsylvania Highway 143 to junction Pennsylvania Highway 73, thence along Pennsylvania Highway 73 to Boyertown, thence east along Pennsylvania Highway 73 to junction Pennsylvania Highway 29 to junction Pennsylvania Highway 63 to junction Pennsylvania Highway 463 to junction U.S. Highway 202 to Doylestown, thence along U.S. Highway 202 to junction Pennsylvania Highway 32 to the Pennsylvania-New Jersey State line near Washington Crossing. (4) From that part of Essex County, N.J. embracing the City of Newark; the City of East Orange; the Town of Irvington; the Town of Belleville; and Port Newark,

V42169 AUG 31 77 UMI

N.J., to points in Pennsylvania. (5) From points in Essex County, N.J., to points in that part of New York on, north, and west of a line extending from the New York-Pennsylvania State line near Waverly, thence north along New York Highway 34 to junction New York Highway 224, thence east along New York Highway 224 to junction New York Highway 96, thence north along New York Highway 96 to junction New York Highway 13, thence east on New York Highway 13 to New Woodstock, N.Y., thence northeast along unnamed creek to Peterboro, thence east along an unnumbered highway from Peterboro to junction New York Highway 46, thence north along unnumbered highway to junction New York Highway 12B, thence north along New York Highway 12B to junction New York Highway 8, thence north along New York Highway 8 to a point approximately eight (8) miles north of Griffin, N.Y., thence east along New York Highway 8 to junction unnumbered highway to Thurman, N.Y., thence east along unnumbered highway to junction New York Highway 28 to junction U.S. Highway 9 north of Warrensburg, thence east along U.S. Highway 9 to Bolton, thence east along Lake George to Pilot Knob, thence east along unnumbered highway to Comstock, N.Y., to junction U.S. Highway 4 to junction New York Highway 22, thence east along New York Highway 22 to the New York-Vermont State line near Granville.

(B) (1) From points in Hudson County, N.J., to points in Maine, New Hampshire, Maryland, Virginia, District of Columbia, Pennsylvania, Ohio, and Delaware. (2) From points in Hudson County, N.J., to that portion of New York on, north and west of a line commencing at the Pennsylvania-New York State line near Hale Eddy, thence north along New York Highway 17 to junction New York Highway 17 to junction New York Highway 8, thence north along New York Highway 8 to junction New York Highway 51, thence north along New York Highway 51 to junction New York Highway 205, thence north along New York Highway 205 to junction New York Highway 28, thence east along New York Highway 28 to junction New York Highway 80, thence north along New York Highway 80 to Van Hornesville, thence north along an unnamed creek to Newville, N.Y., thence east along an unnumbered highway to New York Highway 5–S, thence east along New York Highway 5–S to a point directly across the Mohawk River, from Saint Johnsville and New York Highway 5, thence north along an unnumbered highway to junction New York Highway 29, thence east along New York Highway 29 to junction New York Highway 10, thence north along New York Highway 10 to Caroga Lake, thence east along an unnumbered highway through Benson, N.Y., to junction New York Highway 30, thence south along New York Highway 30 to Northville, thence east along an unnumbered highway to Edinburg, thence north along unnumbered highway through Conklingville to junction New York Highway 9–N near Hadley, thence north on New York Highway 9–N to Lake George, thence north along New York Highway 9–L to Cleverdale, thence east along to Comstock, thence east on New York Highway 22 to New York-Vermont State line near Granville. (3) From points in that portion of Hudson County, N.J., embracing the city of Jersey City; Town of Kearny; Boro of East Newark; and Town of Harrison, to points in Rhode Island. (4) (a) From points in Hudson County, N.J., to that portion of Massachusetts on, south and east of an unnumbered highway commencing at Buzzards Bay and extending north to Cape Cod Bay at Sagamore. (b) From point in Hudson County, N.J., to points in Massachusetts, on, north, and east of a line beginning at the Massachusetts-New Hampshire State line near Winchendon, Mass., thence south and east along Massachusetts Highway 12 to junction Massachusetts Highway 2A to Lexington, thence east along Massachusetts Highway 60 to Revere, thence east to Massachusetts Bay. (5) From that portion of Hudson County, N.J., embracing the City of Bayonne; the Town of Harrison; the Town of Kearny; the Boro of East Newark; to points in Massachusetts.

(6) From points in Hudson County, N.J., to that portion of Vermont on, north and east of a line commencing at the New York-Vermont State line near West Arlington, Vt. and extending along Vermont Highway 313 to junction U.S. Highway 7 near Arlington, Vt., thence east on unnumbered highway to junction Vermont Highway 100, thence south on Vermont Highway 100 to junction Vermont Highway 112, thence south along Vermont Highway 112 to the Massachusetts-Vermont State line. (7) From points in that portion of Hudson County, N.J. that embraces the City of Jersey City; the Town of Kearny; and the City of Hoboken; the Town of Harrison; the City of Bayonne; and the Boro of East Newark; to points in Vermont. (C) (1) From points in Union County, N.J., to points in Maine, New Hampshire, Vermont, Massachusetts, Rhode Island, Maryland, Virginia, District of Columbia, Ohio and Delaware. (2) From points in Union County, N.J. to that portion of Connecticut on, north and east of a line commencing at the New York-Connecticut State line west of North Wilton, Conn., to Cannondale, Conn., thence south and east along Connecticut Highway 33 to junction U.S. Highway 7, to junction Connecticut Highway 53, to Southport on Long Island Sound. (3) From that part of Union County, N.J., embracing the Townships of Scotch Plains, Berkeley Heights, Cranford; and Clark; the Cities of Linden, Rahway, Plainfield, and Summit; and the Boroughs of New Providence, Mountainside, Garwood, Fanwood, and the Town of Westfield, to points in Connecticut. (4) From points in Union County, N.J., to points in that portion of New York, on, north and west of a line commencing at the New York-Pennsylvania State line near Hancock, N.Y., thence east along New York Highway 17 to junction New York Highway 30, thence north on New York Highway 30 to junction New York Highway 28, thence east along New York Highway 28 to Kingston, thence across the Hudson River to Rhinecliff, thence south and east along New York Highway 308 to junction unnumbered highway to Taconic State Parkway to junction U.S. Highway 44, thence south along the Taconic State Parkway to junction New York Highway 55, thence south and east along New York Highway 55 to junction New York Highway 22, thence south along New York Highway 22 to Patterson, N.Y., to the New York-Connecticut State line near Squantz Pond. (5) From that portion of Union County, N.J., embracing the Townships of Hillside and Clark and the City of Linden; the City of Rahway, and the City of Elizabeth, to points in New York.

(6) From points in Union County, N.J., to that part of Pennsylvania on south and west of a line commencing at the New York-Pennsylvania State line near Equinunk, thence south on unnumbered highway to junction Pennsylvania Highway 371, thence west along Pennsylvania Highway 371 to junction Pennsylvania Highway 247, thence south along Pennsylvania Highway 247 to junction Pennsylvania Highway 171, thence south along Pennsylvania Highway 171 to junction U.S. Highway 6, thence south along U.S. Highway 6 to junction Pennsylvania Turnpike Extension at Scranton, thence south along the Pennsylvania Turnpike Extension to junction unnumbered highway south of Bear Creek, thence south and west along said unnumbered highway to junction Pennsylvania Highway 93 to junction U.S. Highway 209 and thence west on U.S. Highway 209 to junction Pennsylvania Highway 309, thence south and east on Pennsylvania Highway 309 to junction Pennsylvania Highway 143, thence west on Pennsylvania Highway 143 to junction Pennsylvania Highway 863, thence south and west along Pennsylvania Highway 863 to junction Pennsylvania Highway 737, thence south on Pennsylvania Highway 737 to Pennsylvania Highway 73, thence south on Pennsylvania Highway 73 to junction Pennsylvania Highway 100, thence south along Pennsylvania Highway 100 to junction U.S. Highway 422, thence east and south on U.S. Highway 422 to junction with the Pennsylvania Turnpike at Norristown, thence east on the Pennsylvania Turnpike to the New Jersey-Pennsylvania State line north of Bristol, Pa. (7) From that portion of Union County, N.J. embracing the Boroughs of Mountainside, Garwood, Kenilworth, Roselle Park, and Roselle; Townships of Clark, Cranford, Union, and Hillside; and Cities of Elizabeth, Linden and Rahway; and the Town of Westfield, to points in Pennsylvania. (D) (1) From points in Somerset County, N.J., to points in Connecticut, Maine, New Hampshire, Vermont, Massachusetts, Rhode Island, Virginia and Ohio. (2) From that portion of Somerset County, N.J. embracing the Boroughs of Watchung, North Plainfield, Bounde Brook, Township of Green Brook, and Town of Somerset in Franklin Township, to points in Delaware.

(3) From points in Somerset County, N.J., to points in that part of Pennsylvania on and west of a line commencing at the New York-Pennsylvania State line at Austinburg, thence south along Pennsylvania Highway 349 to junction U.S. Highway 6, thence west along U.S. Highway 6 to junction Pennsylvania Highway 144, thence south along Pennsylvania Highway 144 to Hammersley Fork, thence south along Kettle Creek to Alvin R. Bush Dam, thence south along Alvin R. Bush Dam to Cooks Run, thence south and west along the Susquehanna River to Karthaus, Pa., thence south along an unmarked river between Karthaus and Phillipsburg, thence south along Pennsylvania Highway 350 to Sandy Ridge, thence south along Pennsylvania Highway 350 to Water Street, thence south on U.S. Highway 22 to junction Pennsylvania Highway 866, thence east and south along Pennsylvania Highway 866 to junction Pennsylvania Highway 36, thence east on Pennsylvania Highway 36 to junction Pennsylvania Highway 26, thence south along Pennsylvania Highway 26 to junction Interstate Highway 70, thence east and south along Interstate Highway 70 to the Maryland-Pennsylvania State line near Warfordsburg, Pa. (4) From points in Somerset County, N.J. to that portion of New York on, north and west of a line commencing at the Pennsylvania-New York State line at Lawrenceville, extending north along U.S. Highway to junction unnumbered highway to junction New York Highway 225, thence north on New York Highway 225 to junction New York Highway 414, thence north on New York Highway 414 to Beaver Dams, thence east on the Chemung County line to junction New York Highway 14, thence north on New York Highway 14 to junction New York Highway 414, thence north on New York Highway 414 to Romulus, thence east on an unnumbered highway to Cayuga Lake to Aurora, thence north along New York Highway 90 to Levanna, thence east on an unnumbered highway to New York 34, thence north on New York 34 to junction New York Highway 5 near Auburn, thence north and east along New York Highway 5 to Syracuse, N.Y., thence south and east along New York Highway 92 to junction U.S. Highway 20, thence along U.S. Highway 20 to junction New York Highway 51, thence south on New York Highway 51 to junction unnumbered highway at West Exeter, thence east on the unnumbered highway to junction New York Highway 28 at Schuyler Lake, thence south on New York Highway 28 to junction New York Highway 7, to junction New York Highway 23 to Prattsville, thence along New York Highway 23 to New York Highway 82, thence east and south on New York Highway 82 to Ancramdale, thence south on unnumbered highway to junction New York Highway 199 north of Millerton, thence south on New York Highway 199 to the Connecticut-New York State line near Millerton.

(5) From that portion of Somerset County, N.J., on, south and east of a line commencing at the Middlesex-Somerset County line, south and west on Cedar Grove Road to junction Amwell Road, thence east on Amwell Road to South Middlebush Road, thence south on South Middlebush Road, to junction Vliet Road, thence south and west to a joint on Copper Mine Road south of Griggs Town Heights, thence south along New Jersey Highway 533 to junction U.S. Highway 206, thence north and west along U.S. Highway 206 to junction Orchard Road, thence west on Orchard Road to junction Burnt Hill Road, thence north on Burnt Hill Road to junction Skillman Road, thence west on Skillman Road, when it becomes Camp Meeting Ave., and west on Camp Meeting Ave., to Hollow Road, thence west to the Somerset-Mercer County line; to points in New York. (6) (a) From points in Somerset County, N.J., to that part of Maryland on and west of a line commencing at the Pennsylvania-Maryland State line near the town of State Line, Pa., thence south along U.S. Highway 11 to Hagerstown, thence south on Maryland Highway 65 to the West Virginia-Maryland State line near Antietam, Md. (b) From points in Somerset County, N.J., to that part of Maryland on and south of a line commencing at the Potomac River, thence east to Marbury, to junction Maryland Highway 225, thence south and east along Maryland Highway 225 to junction Maryland Highway 6, thence east along Maryland Highway 6 to junction Maryland Highway 235 near Charlotte Hall, thence south on Maryland Highway 235 to California, thence east to Chance, Md., thence east along Maryland Highway 363 to junction U.S. Highway 13, thence south of Princess Anne, Md., thence east on U.S. Highway 13 to junction Maryland Highway 366, thence east on Maryland Highway 366 to Chincoteague Bay and the Atlantic Ocean.

(7) From the Town of Somerset in Franklin Township; the Boroughs of Bound Brook and South Bound Brook, and that part of Somerset County, N.J., located on and east of a line beginning at the Morris-Somerset County line south along New Jersey Highway 527 to Mt. Bethel, thence south on King George Road, to the Middlesex-Somerset County line, to points in Maryland. (8) From points in Somerset County, N.J. (except the Town of Blawenburg), to the District of Columbia. (E) (1) From points in Bergen County, N.J., to points in Maryland, Virginia, District of Columbia, Ohio, and Delaware. (2) From points in Bergen County, N.J., to points in that part of New Hampshire on, north and east of a line commencing at the Vermont-New Hampshire State line at or near Lyme, thence south on unnumbered highway to U.S. Highway 4, thence east on U.S. Highway 4, to junction U.S. Highway 3, thence east and south of U.S. Highway 3 to Concord, thence east on U.S. Highway 4 to New Castle to the Atlantic Ocean. (3) From that portion of Bergen County, N.J. embracing the Boroughs of Fairlawn, East Paterson, Wallington, Wood Ridge, Rutherford, and North Arlington; the townships of Saddle Brook, and Lyndhurst and the City of Garfield, to points in New Hampshire. (5) From that portion of Bergen County, N.J., embracing the Township of Lyndhurst; and the Boroughs of Rutherford and North Arlington, N.J., to points in Vermont. (6) From the Borough of North Arlington, Bergen County, N.J., to points in Rhode Island.

(7) From points in Bergen County, N.J., to points in that part of Pennsylvania on, south and west of a line commencing at the New York-Pennsylvania State line near Lawrenceville, thence south along U.S. Highway 15 to junction Pennsylvania Highway 14, thence north on Pennsylvania Highway 14 to junction unnumbered highway south of Bodines, thence east along unnumbered highway to junction Pennsylvania Highway 864, thence east on Pennsylvania Highway 864 to junction U.S. Highway 220, thence east on U.S. Highway 220 to junction Pennsylvania Highway 42; thence south on Pennsylvania Highway 42 to junction Pennsylvania Highway 61, thence east and south along Pennsylvania Highway 61 to junction Pennsylvania Highway 662, thence east on Pennsylvania Highway 662 to junction Pennsylvania Highway 29, thence south on Pennsylvania Highway 29 to junction Pennsylvania Highway 663, thence north and east along Pennsylvania Highway 663 to junction Pennsylvania Highway 313, thence south on Pennsylvania Highway 313 to Dublin, thence east on unnumbered highway from Dublin to New Hope to the Pennsylvania-New Jersey State line. (8) From points in Bergen County, N.J., to those points in New York on and west of a line commencing at the Pensylvania-New York State line near Lawrenceville, Pa., thence north along U.S. Highway 15 to junction New York Highway 17, thence south on New York Highway 17 to junction New York Highway 414, thence north on New York Highway 414 to junction New York Highway 14, thence north on New York 14 to junction New York Highway 96, thence south on New York Highway 96 to a point west of Waterloo, thence north along unnumbered highway to Clyde, thence east and north along unnumbered highway to Spring Lake, thence east along unnumbered highway to

V42169 AUG 31 77 UMI

Conquest, thence north on New York Highway 38 to junction New York Highway 104, at Hannibal, thence north along New York Highway 104 to Fruit Valley, and New York Highway 104 A, thence east on New York Highway 104A to Oswego and Lake Ontario. The purpose of this filing is to eliminate the gateway of the warehouse and plantsite facilities of Alcan Aluminum Corporation at Woodbridge, N.J.

No. MC 21170 (Sub-No. E190) (partial correction), filed February 3, 1975, published in the FEDERAL REGISTER issues of May 2, 1975 and June 11, 1975 and republished as corrected, this issue. Applicant: BOS LINES, INC., P.O. Box 68, Cedar Rapids, Iowa 52406. Applicant's representative: Gene R. Prokuski (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Fresh meats and packinghouse products.*

NOTE.—The purpose of this partial correction is to state the correct commodity description by deleting the restriction "except commodities requiring refrigeration" that was erroneously added when this gateway elimination letter-notice was published. The remainder of this letter notice remains as previously published.

No. MC 40215 (Sub-No. E25) (correction), filed May 17, 1974, published in the FEDERAL REGISTER issue of May 26, 1977, and partially republished, as corrected, this issue. Applicant RICHARDSON TRANSFER & STORAGE CO., INC., 246 North Fifth Avenue, Salina, Kans. 67401. Applicant's representative: James F. Flint, Suite 600, 1250 Connecticut Ave. NW., Washington, D.C. 20036. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Household goods*, as defined by the Commission, (4) from points in Oklahoma on and east of a line beginning at the Oklahoma-Kansas State line and extending along U.S. Highway 54/64, thence along U.S. Highway 54 to the Oklahoma-Texas State line, to points in Colorado (7A) from points in Oklahoma to points in Illinois on and north of a line beginning at the Missouri-Illinois State line, and extending east and southeast along Illinois Highway 177, to junction Illinois Highway 15, thence east along Illinois Highway 15 to the Illinois-Indiana State line. (16A) From points in Oklahoma and east and north of a line beginning at the Oklahoma-Kansas State line, and extending south along U.S. Highway 183 to junction Oklahoma Highway 51, thence east along Oklahoma Highway 51 to junction Oklahoma Highway 33, thence east along Oklahoma Highway 33 to the Oklahoma-Arkansas State line, to points in New Mexico. (B) From points in Oklahoma on and east of a line beginning at the Kansas-Oklahoma State line and extending south along U.S. Highway 183 to junction U.S. Highway 66, thence east along U.S. Highway 66 to junction U.S. Highway 281, thence south along U.S. Highway 281 to the Texas-Oklahoma State line, to points in New Mexico on and north of a line beginning at the New Mexico-Texas State line, and extending along U.S. Highway 60 to the New Mexico-Arizona State line. (18) From points in Oklahoma on and west and north of a line beginning at the Oklahoma-Arkansas State line, and extending along U.S. Highway 59, to junction U.S. Highway 259, thence south along U.S. Highway 259 to the Oklahoma-Texas State line, to points in North Carolina. (21) From points in Oklahoma on and north and west of a line beginning at the Oklahoma-Arkansas State line, and extending west along Oklahoma Highway 33, to junction U.S. Highway 75, to junction Interstate Highway 40, thence along Interstate Highway 40 to junction U.S. Highway 81, thence south along U.S. Highway 81 to the Oklahoma-Texas State line, to points in Tennessee. The purpose of this filing is to eliminate the gateways of points in Kansas and Ohio in Section 16, and in all other sections, points in Kansas.

NOTE.—The purpose of this partial republication is to correct the territorial descriptions. The remainder of this letter-notice remains as previously published.

No. MC 60014 (Sub-No. E154) (partial correction), filed August 28, 1976, published in the FEDERAL REGISTER issue of May 18, 1977, and republished, as corrected, this issue. Applicant: AERO TRUCKING, INC., P.O. Box 308, Monroeville, Pa. 15146. Applicant's representative: William J. Rorison (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Iron and steel angles, bars, channels, conduit, fencing, flooring, joists, lath, mesh, piling, pipe, posts, rails, rods, roof bolt mats, roofing, strip, structurals, tank parts, tubing, and wire in coils* (except commodities requiring special equipment), between: points in Wisconsin north and west of a line commencing on U.S. Highway 51 at Beloit, Wisconsin, thence north on U.S. Highway 51 to Janesville, thence north on Wisconsin Highway 26 to Fort Atkinson, thence east on Wisconsin Highway 106 to the intersection of Wisconsin Highway 106 to the intersection of Wisconsin Highway 107 and Wisconsin Highway 67, thence south on Wisconsin Highway 67 to Eagle, thence north on Wisconsin Highway 59 to Waukesha, thence east on Wisconsin Highway 59 to Milwaukee, Wisconsin, on the one hand, and, on the other, points in Massachusetts.

NOTE.—The purpose of this partial correction is to delete the (F) in the territorial description. The gateways to be eliminated should remain as previously published.

No. MC 60014 (Sub-No. E170) (partial correction), filed August 28, 1976, published in the FEDERAL REGISTER issue of May 18, 1977, and republished, as corrected, this issue. Applicant: AERO TRUCKING, INC., P.O. Box 308, Monroeville, Pa. 15146. Applicant's representative: William J. Rorison (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Iron and steel angles, bars, channels, conduit, fencing, flooring, joists, lath, mesh, piling, pipe, posts, rails, rods, roof bolt mats, roofing, strip, structurals, tank parts, tubing, and wire in coils*, (the transportation of which, because of their size or weight, require the use of special equipment), between points in Pennsylvania, on the one hand, and, on the other, points in Ohio on and southwest of a line beginning at Lake Erie, and extending along Ohio Highway 306 to junction U.S. Highway 322, thence along U.S. highway 322 to the Ohio-Pennsylvania State line. Gateways to be eliminated: (1) Pennsylvania, (2) Columbiana, Cuyahoga, Mahoning, Summit, and Trumbull Counties, Ohio, (3) points in that part of Ohio on and east of a line extending from Mansfield to Pomeroy, Ohio, along Ohio Highway 13 to junction thereof with U.S. Highway 33, thence along U.S. Highway 33 to Pomeroy, and on and south of U.S. Highway 30 extending from Mansfield to the Ohio-West Virginia State line (except points in Licking County, Ohio).

NOTE.—The purpose of this correction is to correct the gateways to be eliminated.

No. MC 60014 (Sub-No. E173) (correction), filed August 28, 1976, published in the FEDERAL REGISTER issue of May 18, 1977, and republished, as corrected, this issue. Applicant: AERO TRUCKING, INC., P.O. Box 308, Monroeville, Pa. 15146. Applicant's representative: William J. Rorison (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Iron and steel angles, bars, channels, conduit, fencing, flooring, joists, lath, mesh, piling, pipe, posts, rails, rods, roof bolt mats, roofing, strip, structurals, tank parts tubing and wire in coils* (the transportation of which, because of their size or weight, require the use of special equipment), between points in Indiana on and north of a line beginning at the Indiana-Illinois State line and extending along Indiana Highway 18 to juction U.S. Highway 52, thence along U.S. Highway 52 to junction U.S. Highway 18, thence along U.S. Highway 18 to junction U.S. Highway 421, thence along U.S. Highway 421 to junction U.S. Highway 25, thence along U.S. Highway 25 to junction U.S. Highway 24, thence along U.S. Highway 24 to junction Interstate Highway 69, to junction U.S. Highway 6, thence along U.S. Highway 6 to the Indiana-Ohio State line, on the one hand, and, on the other, points in Ohio on and west of a line beginning at the Kentucky-Ohio State line and extending along U.S. Highway 23 to junction U.S. Highway 22, thence along U.S. Highway 22 to junction Ohio Highway 37, thence along Ohio Highway 37 to junction U.S. Highway 40,thence along U.S. Highway 40 to junction Ohio Highway 79, thence along Ohio Highway 79 to junction Ohio Highway 13, thence along Ohio Highway 13 to junction U.S. Highway 30, thence along

U.S. Highway 30 to the Ohio-Pennsylvania State line. Gateways to be eliminated: Points in that part of Ohio on and east of a line extending from Mansfield to Pomeroy, Ohio, along Ohio Highway 13 to junction thereof with U.S. Highway 33, thence along U.S. Highway 33 to Pomeroy, and on and south of U.S. Highway 30 extending from Mansfield to the Ohio-West Virginia State line.

No. MC 60014 (Sub-No. E183) (correction), filed August 28, 1976, published in the FEDERAL REGISTER issue of May 18, 1977, and republished, as corrected, this issue. Applicant: AERO TRUCKING, INC., P.O. Box 308, Monroeville, Pa. 15146. Applicant's representative: William J. Rorison (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Iron and steel angles, bars, channels, conduit, fencing, flooring, joists, lath, mesh, piling, pipe, posts, rails, rods, roof bolt mats, roofing, strip, structurals, tank parts, tubing and wire in coils*, (except commodities requiring special equipment) between points in New Jersey on and east of a line beginning at the Pennsylvania-New Jersey State line, and extending along New Jersey Highway 94 to junction New Jersey Highway 521, thence along New Jersey Highway 521 to junction New Jersey Highway 519, thence along New Jersey Highway 519 to junction New Jersey Highway 23, thence along New Jersey Highway 23 to junction New Jersey Highway 284, thence along New Jersey Highway 284 to the New Jersey-New York State line, on the one hand, and, on the other, points in Vermont on and east of a line beginning at the International Boundary line between the United States and Canada and extending along Vermont Highway 105 to junction Vermont Highway 101, thence along Vermont Highway 101 to junction Vermont Highway 100, thence along Vermont Highway 100 to junction Vermont Highway 15/15A, thence along Vermont Highway 15/15A to junction Vermont Highway 15, thence along Vermont Highway 15 to junction U.S. Highway 2, thence along U.S. Highway 2 to junction U.S. Highway 302, thence along U.S. Highway 302 to junction Vermont Highway 110, thence along Vermont Highway 110 to junction Vermont Highway 14, thence along Vermont Highway 14 to junction Vermont Highway 107, thence along Vermont Highway 107 to junction Vermont Highway 12, thence along Vermont Highway 12 to junction Vermont Highway 106; thence along Vermont Highway 106; thence along Vermont Highway 106 to junction Vermont Highway 131, thence along Vermont Highway 131 to the Vermont-New Hampshire State line; points in New Hampshire on and northeast of a line beginning at the Vermont-New Hampshire State line and extending along New Hampshire Highway 12/103, thence along New Hampshire Highway 12/103 to junction New Hampshire Highway 11/103, thence along New Hampshire Highway 11/103 to junction New Hampshire Highway 31, thence along New Hampshire Highway 31 to junction New Hampshire Highway 10, thence along New Hampshire Highway 10 to junction New Hampshire Highway 12, thence along New Hampshire Highway 12 to the New Hampshire-Massachusetts State line, points in Rhode Island on and north of Interstate Highway 6. Gateways to be eliminated: (1) Points in New York, points in Connecticut, (2) within 10 miles of Greenwich, Connecticut, and (3) Points in Massachusetts on and east of U.S. Highway 5, (4) Between points in that part of Massachusetts, on and east of a line beginning at the Massachusetts-New Hampshire State line and extending southwardly along U.S. Highway 202 to junction Massachusetts Highway 68 (at or near Baldwinville, Mass.), thence along Massachusetts Highway 68 to junction Massachusetts Highway 56 (at or near Hubbardston, Mass.), thence over Massachusetts Highway 56 to junction Massachusetts Highway 12 (near Rochdale, Mass.), thence along Massachusetts Highway 12 to the Massachusetts-Connecticut State line, (except points in Barnstable, Dukes, and Nantucket Counties, Mass.).

NOTE.—The purpose of this correction is to state the correct territorial description and to include the gateway, Part (4), that was omitted in the May 18, 1977 publication.

No. MC 60014 (Sub-No. E197) (correction), filed August 28, 1976, published, in the FEDERAL REGISTER issue of May 18, 1977, and republished, as corrected, this issue. Applicant: AERO TRUCKING, INC., P.O. Box 308, Monroeville, Pa. 15146. Applicant's representative: William J. Rorison (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Iron and steel angles, bars, channels, conduit, fencing, flooring, joists, lath, mesh, piling, pipe, posts, rails, rods, roof bolt mats, roofing, strip, structurals, tank parts, tubing and wire in coils* (except commodities requiring special equipment), between points in New Jersey, on the one hand, and, on the other, points in Maine. Gateways to be eliminated: (1) New York, (2) Within 10 miles of Greenwich, Connecticut, (3) Points in Massachusetts on and east of U. S. Highway 5, (4) Between points in that part of Massachusetts, on and east of a line beginning at the Massachusetts-New Hampshire State line and extending southwardly along U.S. Highway 202 to junction Massachusetts Highway 68 (at or near Baldwinville, Mass.), thence along Massachusetts Highway 68 to junction Massachusetts Highway 56 (at or near Hubbardston, Mass.), thence over Massachusetts Highway 56 to junction Massachusetts Highway 12 (near Rochdale, Mass.), thence along Massachusetts Highway 12 to the Massachusetts-Connecticut State line, (except points in Barnstable, Dukes, and Nantucket Counties, Mass.).

NOTE.—The purpose of this correction is to state the correct gateway points.

No. MC 60014 (Sub-No. E201) (partial correction), filed August 28, 1976, published in the FEDERAL REGISTER issue of May 26, 1977, and republished, as corrected, this issue. Applicant: AERO TRUCKING, INC., P.O. Box 308, Monroeville, Pa. 15146. Applicant's representative: William J. Rorison (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Iron and steel angles, bars, channels, conduit, fencing, flooring, joists, lath, mesh, piling, pipe, posts, rails, rods, roof bolt mats, roofing, strip, structurals, tank parts, tubing, and wire in coils* (except commodities requiring special equipment), from points in New York on and south of a line beginning at Lake Erie extending along U.S. Highway 20 to the junction New York Highway 12, thence along New York Highway 12 to the junction New York Highway 23, thence along New York Highway 23 to the junction of New York Highway 8, thence along New York Highway 8 to the junction of New York Highway 206, thence along New York Highway 206 to the junction of New York Highway 30, thence along New York Highway 30 to the junction New York Highway 28, thence along New York Highway 28 to the Junction of New York Highway 199, thence along New York Highway 199 to junction of U.S. Highway 44, thence along U.S. Highway 44 to the New York-Connecticut State line, to points in Maine on and east of a line beginning at the International Boundary line between the United States and Canada along Maine Highway 11 to the junction of Interstate Highway 95, thence along Interstate Highway 95 to the junction of U.S. Highway Alternate 1, thence along U.S. Highway Alternate 1 to the junction of U.S. Highway 1, thence along U.S. Highway 1 to Penobscot Bay.

NOTE.—The purpose of this partial correction is to state the correct highway to read as "New York Highway 28" instead of "New York Highway 26." The gateways to be eliminated remains as previously published.

No. MC 60014 (Sub-No. E205) (partial correction), filed August 28, 1976, published in the FEDERAL REGISTER issue of May 26, 1977, and republished, as corrected, this issue. Applicant: AERO TRUCKING, INC., P.O. Box 308, Monroeville, Pa. 15146. Applicant's representative: William J. Rorison (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Iron and steel angles, bars, channels, conduit, fencing, flooring, joists, lath, mesh, piling, pipe, posts, rails, rods, roof bolt mats, roofing, strip, structurals, tank parts, tubing, and wire in coils*, between points in Michigan on the one hand, and, on the other, points in New York, New Jersey, Delaware, those in Pennsylvania south of a line beginning at the New York-Pennsylvania State line extending along Pennsylvania Highway 277 to the junction of Pennsylvania Highway 77, thence along Pennsylvania Highway 77 to the junction of U.S. Highway 6/322, thence along U.S. Highway 6/322 to the junction of U.S. Highway 322, thence along U.S. Highway 322 to the Pennsylvania-Ohio State line.

V42169 AUG 31 77 UMI

NOTE.—The purpose of this partial correction is to eliminate the District of Columbia as part of the destination point. The gateways to be eliminated remains as previously published.

No. MC 60014 (Sub-No. E238) (partial correction), filed August 28, 1976, published in the FEDERAL REGISTER issue of May 26, 1977, and republished, as corrected, this issue. Applicant: AERO TRUCKING, INC., P.O. Box 308, Monroeville, Pa. 15146. Applicant's representative: William J. Rorison (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Iron and steel angles, bars, channels, conduit, fencing, flooring, joists, lath, mesh, piling, pipe, posts, rails, rods, roof bolt mats, roofing, strip, structurals, tank parts, tubing, and wire in coils* (the transportation of which because of size or weight, requires the use of special equipment).

NOTE.—The purpose of this partial correction is to state the correct commodity description. The remainder of this letter-notice remains as previously published in the May 26 1977 FEDERAL REGISTER issue.

No. MC60014 (Sub-No. E232) (correction), filed August 28, 1976, published in the FEDERAL REGISTER issue of May 26, 1977, and republished, as corrected, this issue. Applicant: AERO TRUCKING, INC., P.O. Box 308, Monroeville, Pa. 15146. Applicant's representative: William J. Rorison (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Iron and steel angles, bars, channels, conduit, fencing, flooring, joists, lath, mesh, piling, pipe, posts rails, rods, roof bolt mats, roofing, strip, structurals, tank parts, tubing and wire in coils*, between points in West Virginia on and north of a line beginning at the West Virginia-Ohio State line extending along West Virginia Highway 95 to junction of West Virginia Highway 47, thence along West Virginia Highway 47 to junction of U.S. Highway 33/119, thence along U.S. Highway 33/119 to junction of U.S. Highway 33, thence along U.S. Highway 33 to the West Virginia-Virginia State line, on the one hand, and, on the other, points in Alabama on and west of a line beginning at the Alabama-Tennessee State line extending along U.S. Highway 231/431 to junction U.S. Highway Alternate 72 to junction of U.S. Highway 31, thence along U.S. Highway 31 to junction of Interstate Highway 65, thence along Interstate Highway 65 to junction of Alabama Highway 69, thence along Alabama Highway 69 to junction Alabama Highway 14, thence along Alabama Highway 14 to junction Alabama Highway 10, thence along Alabama Highway 10 to junction of Alabama Highway 47, thence along Alabama Highway 47 to junction Alabama Highway 83, thence along Alabama Highway 83 to junction Alabama Highway 84, thence along Alabama Highway 84 to the Alabama-Georgia State line. Gateways to be eliminated: (1) Wheeling, West Virginia.

NOTE.—The purpose of this correction is to correct the territorial description.

No. MC 60014 (Sub-No. E240) (partial correction) filed August 28, 1976, published in the FEDERAL REGISTER issue of May 26, 1977, and republished, as corrected, this issue. Applicant: AERO TRUCKING, INC., P.O. Box 308, Monroeville, Pa.. 15146. Applicant's representative: William J. Rorison (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Iron and steel angles, bars, channels, conduit, fencing, flooring, joists, lath, mesh, piling, pipe, posts, rails, rods, roof bolt mats, roofing, strip, structurals, tank parts, tubing, and wire in coils* (except commodities requiring special equipment) from points in Rhode Island to points in Tennessee on and west of a line beginning at the Kentucky-Tennessee State line extending along Tennessee Highway 216 to the junction of Tennessee Highway 52, thence along Tennessee Highway 52 to junction of Tennessee Highway 136, thence along Tennessee Highway 136 to the junction of Tennessee Highway 42, thence along Tennessee Highway 42 to the junction of U.S. Highway 70S, thence along U.S. Highway 70S to the junction of Tennessee Highway 55, thence along Tennessee Highway 55 to junction U.S. Highway Alternate 41, thence along U.S. Highway Alternate 41 to the junction of U.S. Highway 64, thence along U.S. Highway 64 to the junction of Tennessee Highway 97, thence along Tennessee Highway 97 to the Tennessee-Alabama State line.

NOTE.—The purpose of this partial correction is to correct the highway. The gateways to be eliminated remains as previously published.

No. MC 60014 (Sub-No. E246) (partial correction), filed August 28, 1976, published in the FEDERAL REGISTER issue of May 26, 1977, and republished, as corrected, this issue. Applicant: AERO TRUCKING, INC., P.O. Box 308, Monroeville, Pa. 15146. Applicant's representative: William J. Rorison, same as above). Authority sought to operate as a *common carrier*, by motor vehicle. over irregular routes, transporting: *Iron and steel angles, bars, channels, conduit, fencing, flooring, joists, lath, mesh, piling, pipe, posts, rails, rods, roof bolt mats, roofing, strip, structurals, tank parts, tubing and wire in coils* (except commodities requiring special equipment) from points in Massachusetts to points in Tennessee on and west of a line beginning at the Kentucky-Tennessee State line extending along U.S. Highway 31E/231 to the junction of U.S. Highway 231, thence along U.S. Highway 231 to the junction of U.S. Highway 41, thence along U.S. Highway 41 to the junction of Tennessee Highway 55, thence along Tennessee Highway 55 to the junction of U.S. Alternate Highway 41, thence along U.S. Alternate Highway 41 to the junction of U.S. Highway 64, thence along U.S. Highway 64 to the junction of Tennessee Highway 97, thence along Tennessee Highway 97 to the Tennessee-Alabama State line.

NOTE.—The purpose of this partial correction is to state the correct highway. The gateways to be eliminated remains as previously published.

No. MC 60014 (Sub-No. E248) (partial correction), filed August 28, 1976, published in the FEDERAL REGISTER issue of May 26, 1977, and republished, as corrected, this issue. Applicant: AERO TRUCKING, INC., P.O. Box 308, Monroeville, Pa. 15146. Applicant's representative: William J. Rorison (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Iron and steel angles, bars, channels, conduit, fencing, flooring, joists, lath, mesh, piling, pipe, posts, rails, rods, roof bolt mats, roofing, strip, structurals, tank parts, tubing and wire in coils* (except commodities requiring special equipment) from points in Massachusetts on and east of a line beginning at the Vermont-Massachusetts State line, extending along Massachusetts Highway 8A to the junction of Massachusetts Highway 116, thence along Massachusetts Highway 116 to the junction of Massachusetts Highway 112, thence along Massachusetts Highway 112 to the junction of U.S. Highway 20, thence along U.S. Highway 20 to the junction of U.S. Highway 202, thence along U.S. Highway 202 to the junction of Massachusetts Highway 10, thence along Massachusetts Highway 10 to the Massachusetts-Connecticut State line, to points in Kentucky.

NOTE.—The purpose of this partial correction is to state the correct highway. The gateways to be eliminated remains as previously published.

No. MC 60014 (Sub-No. E249) (partial correction), filed August 28, 1976, published in the FEDERAL REGISTER issue of May 26, 1977, and republished, as corrected, this issue. Applicant: AERO TRUCKING, INC., P.O. Box 308, Monroeville, Pa. 15146. Applicant's representative: William J. Rorison (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Iron and steel angles, bars, channels, conduit, fencing, flooring, joists, lath, mesh, piling, pipe, posts, rails, rods, roof bolt mats, roofing, strip, structurals, tank parts, tubing and wire in coils* (except commodities requiring special equipment) from points in Massachusetts on and east of a line beginning at the Vermont-Massachusetts State line extending along Massachusetts Highway 8A, to the junction of Massachusetts Highway 116, thence along Massachusetts Highway 116 to the junction of Massachusetts Highway 112, thence along Massachusetts Highway 112 to the junction of U.S. Highway 20, thence along U.S. Highway 20 to the junction of U.S. Highway 202, thence along U.S. Highway 202 to the Massachusetts-Connecticut State line, to points in Alabama.

NOTE.—The purpose of this partial correction is to state the correct highway. The

gateways to be eliminated remains as previously published.

No. MC 60014 (Sub-No. E260) (correction), filed August 28, 1976, published in the FEDERAL REGISTER issue of May 18, 1977, and republished, as corrected, this issue. Applicant: AERO TRUCKING, INC., P.O. Box 308, Monroeville, Pa. 15146. Applicant's representative: William J. Rorison (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Iron and steel angles, bars, channels, conduit, fencing, flooring, joists, lath, mesh, piling, pipe, posts, rails, rods, roof bolt mats, roofing, strip, structurals, tank parts, tubing and wire in coils*, between points in Vermont on the one hand, and, on the other, points in Connecticut on and east of a line beginning at the Connecticut-Massachusetts State line extending along Connecticut Highway 12 to the junction of Connecticut Highway 2, thence along Connecticut Highway 2 to the Connecticut-Rhode Island State line. Gateways to be eliminated: (1) between points in that part of Massachusetts, on and east of a line beginning at the Massachusetts-New Hampshire State line and extending southwardly along U.S. Highway 202 to junction Massachusetts Highway 68 (at or near Baldwinville, Mass.), thence along Massachusetts Highway 68 to junction Massachusetts Highway 56 (at or near Hubbardston, Mass.), thence over Massachusetts Highway 56 to junction Massachusetts Highway 12 (near Rochdale, Mass.), thence along Massachusetts Highway 12 to the Massachusetts-Connecticut State line (except points in Barnstable, Dukes, and Nantucket Counties, Mass.)

NOTE.—The purpose of this correction is to state the correct territorial description.

No. MC 60014 (Sub-No. E263) (partial correction), filed August 28, 1976, published in the FEDERAL REGISTER issue of May 18, 1977, and republished, as corrected, this issue. Applicant: AERO TRUCKING, INC., P.O. Box 308, Monroeville, Pa. 15146. Applicant's representative: William J. Rorison (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Iron and steel angles, bars, channels, conduit, fencing, flooring, joists, lath, mesh, piling, pipe, posts, rails, rods, roof bolt mats, roofing, strip, structurals, tank parts, tubing and wire in coils*, between points in Barnstable, Dukes, and Nantucket Counties, Mass.).

NOTE.—The purpose of this partial correction is to state the correct highway territory. The gateway to be eliminated remains as previously published.

No. MC 60014 (Sub-No. E267) (partial correction), filed August 28, 1976, published in the FEDERAL REGISTER issue of May 18, 1977, and republished, as corrected, this issue. Applicant: AERO TRUCKING, INC., P.O. Box 308, Monroeville, Pa. 15146. Applicant's representative: William J. Rorison (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Iron and steel angles, bars, channels, conduit, fencing, flooring, joists, lath, mesh, piling, pipe, posts, rails, rods, roof bolt mats, roofing, strip, structurals, tank parts, tubing and wire coils*, between points in New Hampshire on the one hand, and, on the other, points in Pennsylvania north and west of a line beginning at the Ohio-Pennsylvania State line and extending along Pennsylvania Highway 58, thence along Pennsylvania Highway 58 to junction U.S. Highway 322, thence along U.S. Highway 322 to junction of Pennsylvania Highway 77, thence along Pennsylvania Highway 77 to junction U.S. Highway 6, thence along U.S. Highway 6 to junction of Pennsylvania Highway 27, thence along Pennsylvania Highway 27 to the Pennsylvania-New York State line and those points in Pennsylvania north and east of a line beginning at the New York-Pennsylvania State line extending along Interstate Highway 84, thence along Interstate Highway 84 to junction of Pennsylvania Highway 6, thence along Pennsylvania Highway 6 to junction of Pennsylvania Highway 590, thence along Pennsylvania Highway 590 to junction of Pennsylvania Highway 435, thence along Pennsylvania Highway 435 to junction of U.S. Highway 11, thence along U.S. Highway 11 to junction of U.S. Highway 6, thence along U.S. Highway 6 to junction of U.S. Highway 220, thence along U.S. Highway 200 to the Pennsylvania-New York State line.

NOTE.—The purpose of this partial correction is to state the correct highway territory. The gateway to be eliminated remains as previously published.

No. MC 60014 (Sub-No. E280) (partial correction), filed August 28, 1976, published in the FEDERAL REGISTER issue of May 18, 1977, and republished, as corrected, this issue. Applicant: AERO TRUCKING, INC., P. O. Box 308, Monroeville, Pa. 15146. Applicant's representative: William J. Rorison (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Iron and steel angles, bars, channels, conduit, fencing, flooring, joists, lath, mesh, piling, pipe, posts, rails, rods, roof parts, tubing, and wire coils*, between points in New York on and north of a line beginning at the St. Lawrence River and extending along New York Highway 58, thence along New York Highway 58 to junction New York Highway 184, thence along New York Highway 184, to junction of New York Highway 68, thence along New York Highway 68 to junction U.S. Highway 11, thence along U.S. Highway 11 to junction of New York Highway 374, thence along New York Highway 374 to the New York-Canada International Boundary, on the one hand, and, on the other, points in Connecticut on and east of a line beginning at the Massachusetts-Connecticut State line and extending along Interstate Highway 91, thence along Interstate Highway 91 to the Atlantic Ocean.

NOTE.—The purpose of this partial correction is to state the correct highway. The remainder of this letter remains as previously published. (The gateways to be eliminated).

No. MC 60014 (Sub-No. E290) (partial correction), filed August 28, 1976, published in the FEDERAL REGISTER issue of June 2, 1977, and republished, as corrected, this issue. Applicant: AERO TRUCKING, INC., P.O. Box 308, Monroeville, Pa. 15146. Applicant's representative: William J. Rorison (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Iron and steel angles, bars, channels, conduit, fencing, flooring, joists, lath, mesh, piling, pipe, posts, rails, rods, roof parts, tubing, and wire coils*, between points in New York on and north of a line beginning at the St. Lawrence River and extending along New York Highway 58, thence along New York Highway 58 to junction New York Highway 184, thence along New York Highway 184, to junction of New York Highway 68, thence along New York Highway 68 to junction U.S. Highway 11, thence along U.S. Highway 11 to junction of New York Highway 374, thence along New York Highway 374 to the New York-Canada International Boundary, on the one hand, and, on the other, points in Connecticut on and east of a line beginning at the Massachusetts-Connecticut State line and extending along Interstate Highway 91, thence along Interstate Highway 91 to the Atlantic Ocean.

NOTE.—The purpose of this partial correction is to state the correct territorial description. The gateways to be eliminated should remain as previously published.

No. MC 60014 (Sub-No. E296) (partial correction), filed August 28, 1976,

V 42 169 AUG 31 77 UMI

published in the FEDERAL REGISTER issue of June 2, 1977, and republished, as corrected, this issue. Applicant: AERO TRUCKING, INC., P.O. Box 308, Monroeville, Pa. 15146. Applicant's representative: William J. Rorison (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Iron and steel angles, bars, channels, conduit, fencing, flooring, joists, lath, mesh, piling, pipe, posts, rails, rods, roof bolt mats, roofing, strip, structurals, tank parts, tubing, and wire in coils*, between points in New York on and west of a line beginning at the Pennsylvania-New York State line extending along New York Highway 14, thence along New York Highway 14 to junction of New York Highway 13, thence along New York Highway 13 to junction U.S. Highway 20, thence along U.S. Highway 20 to junction of New York Highway 12, thence along New York Highway 12 to junction New York Highway 5, thence along New York Highway 5 to junction of New York Highway 30A, thence along New York Highway 30A to junction of New York Highway 29, thence along New York Highway 29 to junction of New York Highway 22, thence along New York Highway 22 to the New York-Vermont State line, on the one hand, and, on the other, points in Connecticut on and east of a line beginning at the Connecticut-Massachusetts State line extending along Connecticut Highway 12, thence along Connecticut Highway 12 to junction of Connecticut 2, thence along Connecticut Highway 2 to junction of Connecticut Highway 1A, thence along Connecticut Highway 1A to the Atlantic Ocean.

NOTE.—The purpose of this partial correction is to state the correct territorial description. The remainder of the letter-notice stating the gateways to be eliminated remains as previously published.

No. MC 92983 (Sub-No. E58) (correction), filed June 4, 1974, published in the FEDERAL REGISTER issue of April 28, 1976 partially republished, as corrected, this issue. Applicant: AMERICAN BULK TRANSPORT CO., 818 Grand Ave., P.O. Box 2508 Kansas City, Mo. Applicant's representative: H. B. Foster (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (A) *Inedible animal oils*, in bulk, in tank vehicles (10) (a) From points in Wyoming on and north of a line beginning at the Wyoming-Nebraska State line, and extending along U.S. Highway 20, to junction U.S. Highway 26, thence along U.S. Highway 26 to junction Wyoming Highway 22, thence along Wyoming Highway 22 to the Wyoming-Idaho State line, to points in Michigan in and east of Dickinson, Menominee, Delta and Algar Counties, and those points in Wisconsin in, and east and south of Vernon, Monroe, Juneau, Wood, Portage, Shawano, Menominee, Oconto and Marinette Counties. (10) (b) From points in Wyoming on and south of a line beginning at the Wyoming-Nebraska State line, and extending along U.S. Highway 20 to junction U.S. Highway 26, thence along U.S. Highway 26 to junction Wyoming Highway 22, thence along Wyoming Highway 22 to the Wyoming-Idaho State line, to points in Michigan, and points in Wisconsin located in, and east and south of Trempleaeau, Eau Claire, Clark, Taylor, Price and Iron Counties. The purpose of this filing is to eliminate the gateway of East Dubuque, Ill (in the Dubuque, Iowa Commercial zone).

NOTE.—The purpose of this republication is to insert Section 10, previously omitted. The remainder of this letter-notice remains as previously published.

No. MC 114019 (Sub-No. E258), filed May 25, 1974, Applicant: MIDWEST EMERY FREIGHT SYSTEM, INC., 7000 South Pulaski Road, Chicago, Ill. 60629. Applicant's representative: Arthur J. Sibik (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Canned goods*, from points in that part of New York on and east of a line beginning at Windsor Beach, N.Y., and extending to Rochester, N.Y., thence along U.S. Highway 15 to Wayland, N.Y., thence along New York Highway 245 to Dansville, N.Y., thence along New York Highway 36 to junction New York Highway 21, thence along New York Highway 21 to Andover, N.Y., and thence along New York Highway 17 to the New York-Pennsylvania State line, to points in the Lower Peninsula of Michigan. Gateway to be eliminated: points in Ohio. (2) *Foodstuffs*, from points in that part of New York on and east of a line beginning at Windsor Beach, N.Y., and extending to Rochester, N.Y., thence along U.S. Highway 15 to Wayland, N.Y., thence along New York Highway 245 to Dansville, N.Y., thence along New York Highway 36 to junction New York Highway 21, thence along New York Highway 21 to Andover, N.Y., and thence along New York Highway 17 to the New York-Pennsylvania State line, to Detroit and Grand Rapids, Mich. Gateway to be eliminated: Toledo, Ohio.

No. MC 114019 (Sub-No. E396), filed May 31, 1974. Applicant: MIDWEST EMERY FREIGHT SYSTEM, INC., 7000 South Pulaski Road, Chicago, Ill. 60629. Applicant's representative: Arthur J. Sibik (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Glass containers, glass covers, glass caps and glass accessories* for glass containers (1) from points in Indiana on and south of a line beginning at the Illinois-Indiana State line and extending along U.S. Highway 24 to Huntington, Ind., thence along U.S. Highway 224 to the Indiana-Ohio State line and points in Indiana on and north of a line beginning at the Illinois-Indiana State line at or near Terre Haute, Ind. and extending along Indiana Highway 46 to junction Indiana Highway 7 at Columbus, Ind., thence along Indiana Highway 7 to the Indiana-Kentucky State line and from points in Ohio on and South of a line beginning at the Indiana-Ohio State line and extending along U.S. Highway 224 to Van Wert, Ohio, thence along U.S. Highway 30 to Delphos, Ohio, thence along U.S. Highway 30N to Mansfield, Ohio, thence along U.S. Highway 30 to Massillon, Ohio, thence along U.S. Highway 21 to the Ohio-West Virginia State line, to points in Iowa, Minnesota, Nebraska, North Dakota and South Dakota. Gateway to be eliminated: Streator, Ill. (2) from Sparrows Point and Baltimore, Md., New York, N.Y., and points within 30 miles of New York, N.Y., points in that part of New Jersey, Delaware, and Maryland, which are located within 30 miles of Philadelphia, Pa., points in that part of New York on and west of a line beginning at Windsor Beach, N.Y., and extending to Rochester, N.Y., thence along U.S. Highway 15 to Wayland, N.Y., thence along New York Highway 245 to Dansville, N.Y., thence along New York Highway 36 to junction New York Highway 21, thence along New York Highway 21 to Andover, N.Y., and thence along New York Highway 17 to the New York-Pennsylvania State line, and points in West Virginia and Pennsylvania, to points in Iowa, Minnesota, Nebraska, North Dakota, and South Dakota. Gateways to be eliminated: points in Ohio on and south of a line beginning at the Indiana-Ohio State line and extending along U.S. Highway 224 to Van Wert, Ohio, thence along U.S. Highway 30 to Delphos, Ohio, thence along U.S. Highway 30N to Mansfield, Ohio, thence along U.S. Highway 30 to Massillon, Ohio, thence along U.S. Highway 21 to the Ohio–West Virginia State line and Streator, Ill.

No. MC 114019 (Sub-No. E481), filed May 31, 1974. Applicant: MIDWEST EMERY FREIGHT SYSTEM, INC., 7000 South Pulaski Road, Chicago, Ill. 60629. Applicant's representative: Arthur J. Sibik (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Drugs, toilet preparations and toilet articles*, from New York, N.Y. and points within 30 miles of New York, N.Y., to Kansas City, Mo. The purpose of this filing is to eliminate the gateways of Conneaut, Ohio and Buffalo, N.Y.

No. MC 114019 (Sub-No. E482), filed May 31, 1974. Applicant: MIDWEST EMERY FREIGHT SYSTEM, INC., 7000 South Pulaski Road, Chicago, Ill. 60629. Applicant's representative: Arthur J. Sibik (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Dairy products*, as described in the Appendix to the report in *Modification of Permits of Motor Contract Carriers of Packing House Products*, 46 M.C.C. 23, between points in Minnesota, on the one hand, and, on the other, points in Pennsylvania on and east of a line beginning at Lake Erie, and extending along Pennsylvania Highway 8 to junction Interstate Highway 80, thence along Interstate Highway 80 to junction U.S. Highway 219, thence along U.S. Highway 219 to junction U.S. Highway 22, thence along U.S. Highway 22 to junction Pennsylvania Highway 34, thence along Pennsylvania Highway 34 to the Pennsylvania-Maryland State line.

The purpose of this filing is to eliminate the gateways of Muscatine, Iowa and Cutting, N.Y.

No. MC 124211 (Sub-No. E48) (partial correction), filed May 7, 1974, published in the FEDERAL REGISTER issue of September 17, 1975, and republished as corrected, this issue. Applicant: HILT TRUCK LINE, INC., P.O. Box 988 D.T.S., Omaha, Nebr. 68101. Applicant's representative: Thomas L. Hilt (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (7) *foods and food products* (except frozen foods, meat by-products, dairy products, and articles distributed by meat packinghouses, as described in Sections A, B, and C of Appendix I to the report in *Descriptions in Motor Carrier Certificates*, 61 M.C.C. 209 and 766 and commodities in bulk), from St. Paul, Minn., to those points in Alabama on and south of U.S. Highway 84 and points in Florida on and south of U.S. Highway 90. The purpose of this filing is to eliminate the gateways of Waverly and Milford, Nebr.

NOTE.—The purpose of this partial correction is to state the correct territorial description. The remainder of this letter-notice remains as previously published.

No. MC 124211 (Sub-No. E60), filed May 13, 1974. Applicant: HILT TRUCK LINE, INC., P.O. Box 988 D.T.S., Omaha, Nebr. 68101. Applicant's representative: Thomas L. Hilt (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Unfrozen bakery goods* (except commodities in bulk), (1) between Sioux City, Iowa, on the one hand, and, on the other, points in Arkansas, Kansas, Louisiana, Mississippi, Oklahoma, Texas, and Tennessee (except Bells, Humboldt, Jackson, Milan, and Memphis, and points in its commercial zone as defined by the Commission); and (2) from Sioux City, Iowa, to points in Alabama, Arkansas, Connecticut, Delaware, District of Columbia-Florida, Georgia, Kentucky, Maine, Maryland, Massachusetts, Missouri, New Hamsphire, New Jersey, New York, North Carolina, Ohio, Pennsylvania, Rhode Island, South Carolina, Vermont, Virginia, and West Virginia, and to points in Indiana (except points on and west of Indiana Highway 19 and north of U.S. Highway 24), points in Michigan (except points in the upper peninsula and points in Michigan on and west of of U.S. Highway 131 and south of Michigan Highway 43), and to those points in Iowa on and south of Interstate Highway 80, those points in Wisconsin on and east of a lie beginning at the Illinois-Wisconsin State line, thence north over U.S. Highway 51 to Madison, Wis., thence over U.S. Highway 151 to junction U.S. Highway 41 at Fond du Lac, thence over U.S. Highway 41 to the Wisconsin-Michigan State line, and to Bells, Humbolt, Jackson, Milan, and Memphis, Tenn. The purpose of this filing is to eliminate the gateways of points in Dakota County, Nebr. and Lincoln and Omaha, Nebr.

No. MC 124211 (Sub-No. E89), filed August 3, 1977. Applicant: HILT TRUCK LINE, INC., P.O. Box 988 D.T.S., Omaha, Nebr. 68101. Applicant's representative: Thomas L. Hilt (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Feed*, as described in Sections A and C of Appendix I to the report in *Descriptions in Motor Carrier Certificates*, 61 M.C.C. 209 and 766 (except commodities in bulk and except hides and liquid commodities in bulk, in tank vehicles), (a) from Topeka, Kans., to points in Nebraska on, west and north of a line beginning at the Nebraska-South Dakota State line, and extending south along U.S. Highway 81 to junction Nebraska Highway 84, thence west along Nebraska Highway 84 to junction Nebraska Highway 14, thence south along Nebraska Highway 14 to junction U.S. Highway 30, thence west along U.S. Highway 30 to junction U.S. Highway 281, thence south along U.S. Highway 281 to junction U.S. Highway 6, thence west along U.S. Highway 6 to junction U.S. Highway 183, thence north along U.S. Highway 183 to junction Nebraska Highway 23, thence west along Nebraska Highway 23 to the Nebraska-Colorado State line. The purpose of this filing is to eliminate the gateway of Grand Island, Nebr. (b) from Topeka, Kans., to points in South Dakota on and west of a line beginning at the South Dakota-North Dakota State line and extending south along South Dakota Highway 65 to junction U.S. Highway 212, thence west along U.S. Highway 212 to junction South Dakota Highway 79, thence south along South Dakota Highway 79 to junction Interstate Highway 90, thence along Interstate Highway 90 to Rapid City, thence along South Dakota Highway 79 to Hot Springs, thence south along South Dakota Highway 71 to the South Dakota-Nebraska State line. The purpose of this filing is to eliminate the gateways of Grand Island, Nebr. and points in Saunders County, Nebr. (c) from Topeka, Kans., to points in North Dakota on, west and north of a line beginning at the United States-Canada International Boundary near Maida, N. Dak., and extending south along North Dakota Highway 1 to junction North Dakota Highway 17, thence west along North Dakota Highway 17 to junction North Dakota Highway 20, thence south along North Dakota Highway 20 to Devils Lake, thence west along U.S. Highway 2 to junction North Dakota Highway 14, thence south along North Dakota Highway 14 to junction U.S. Highway 10, thence west along U.S. Highway 10 to junction North Dakota Highway 6, thence south along North Dakota Highway 6 to the North Dakota-South Dakota State line. The purpose of this filing is to eliminate the gateways of Grand Island, Nebr. and points in Saunders County, Nebr.

No. MC 124211 (Sub-No. E90), filed August 3, 1977. Applicant: HILT TRUCK LINE, INC., P.O. Box 988 D.T.S., Omaha, Nebr. 68101. Applicant's representative: Thomas L. Hilt (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Meats, meat products, meat by products*, and *articles distributed by meat packinghouses*, as described in Sections A and C of Appendix I to the report in *Descriptions in Motor Carrier Certificates* 61 M.C.C. 209 and 766 (except hides and commodities in bulk and except liquid commodities, in bulk, in tank vehicles), (a) from points in Nebraska on, west and south of a line beginning at the Nebraska-Kansas State line and extending along U.S. Highway 281 to junction Nebraska Highway 2, thence along Nebraska Highway 2 to Alliance, Nebr., thence south along U.S. Highway 385 to junction U.S. Highway 26, thence west along U.S. Highway 26 to the Nebraska-Wyoming State line, to points in Wisconsin. The purpose of this filing is to eliminate the gateways of the plant sites of Cornland Dressed Beef Company at or near Lexington and Minden, Nebr. (b) from points in Nebraska on and west of U.S. Highway 281 to (except points in Franklin and Webster Counties), to points in Missouri on and south of U.S. Highway 50. The purpose of this filing is to eliminate the gateway of the plant site of Cornland Dressed Beef Company at or near Minden, Nebr. (c) from points in York County, Nebr., on and west of U.S. Highway 81, to points in Missouri on and south of U.S. Highway 50. The purpose of this filing is to elimiate the gateway of the plant site of Cornland Dressed Beef Company at or near Minden, Nebr. (d) from Fairbury, Nebr., to Milwaukee, Wis. The purpose of this filing is to eliminate the gateway of the plant site of Cornland Dressed Beef Company at or near Minden, Nebr.

No. MC 124211 (Sub-No. E91), filed August 3, 1977. Applicant: HILT TRUCK LINE, INC., P.O. Box 988 D.T.S., Omaha, Nebr. 68101. Applicant's representative: Thomas L. Hilt (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Meats, meat products, meat byproducts, and articles distributed by meat packinghouses*, as described in Sections A and C of Appendix I to the report in *Descriptions in Motor Carrier Certificates*, 61 M.C.C. 209 and 766 (except hides and commodities in bulk, and except liquid commodities, in bulk), (a) from points in Nebraska (except points in Nemaha and Richardson Counties, Nebr., to points in Kentucky. (b) From points in Nemaha County, Nebr., to points in Kentucky on and east of U.S. Highway 41. (c) From points in Richardson County, Nebr., to points in Kentucky on and east of U.S. Highway 23. The purpose of this finding is

V 42169 AUG 31 77 UMI

to eliminate the gateway of Lincoln, Nebr.

By the Commission.

FEDERAL COMMUNICATIONS COMMISSION.

TIME AND DATE: Follows 10:30 a.m. Open Meeting, Wednesday, August 31, 1977.

PLACE: Room 856, 1919 M Street, N.W., Washington, D.C.

STATUS: Closed Commission Meeting.

MATTERS TO BE CONSIDERED:

Agenda, Item No. and Subject

Hearing—1—Appeals from interlocutory ruling of Administrative Law Judge that Commission is not authorized by statute to award punitive damages in common carrier actions under Section 206 of the Communications Act (Docket No. 20831).

Hearing—2—Petitions (1) to re-admit licensee's counsel, Benedict P. Cottone, (2) to set aside all proceedings conducted by former Administrative Law Judge Nash, and (3) for immediate action on (1) and (2) in the Puyallup, Washington, standard broadcast renewal proceeding (Docket No. 18929).

Hearing—3—Appeals from interlocutory orders of Administrative Law Judges in the San Diego, California, FM license renewal proceeding (Docket No. 20971) and the Lancaster, Pennsylvania, TV license renewal proceeding (Docket No. 21034).

General—1—Discussion of litigation of the Execunet case, *MCI v. FCC* (Case No. 75-1635).

CONTACT PERSON FOR MORE INFORMATION:

Samuel M. Sharkey, FCC Public Information Officer, telephone 202-632-7260.

Issued: August 24, 1977; August 26, 1977.

[S-1198-77; Filed 8-26-77;4:52 pm]

2

FEDERAL COMMUNICATIONS COMMISSION.

TIME AND DATE: 10:30 a.m., Wednesday, August 31, 1977.

PLACE: Room 856, 1919 M Street NW., Washington, D.C.

STATUS: Open Commission Meeting.

MATTERS TO BE CONSIDERED:

Agenda, Item No. and Subject

General—1—Request for oral argument filed by American Radio Relay League, Inc., in the proceeding concerning marketing of external frequency amplifiers (Docket No. 21116).

General—2—Request for oral argument filed by American Radio Relay League, Inc., in the proceeding concerning type acceptance of equipment marketed for use in the Amateur Radio Service (Docket No. 21117).

General—3—International radiotelephone and radiotelegraph regulations for fishing vessels: Draft of (IMCO) Convention on Safety of Fishing Vessels (Docket No. 20122).

General—4—Zero-Based Budgeting—Commission-wide Priorities.

Common Carrier—1—Notice of Proposed Rule Making relating to amendment of Annual Report Forms M for telephone companies, O for wire-telegraph and ocean-cable carriers and R for radiotelegraph carriers (RM-2765).

Common Carrier—2—Request filed on June 21, 1977 by Carpenter Radio that the Commission furnish it hearing transcripts without charge (Docket No. 21256).

Cable Television—1—Petition for special relief filed by Lower Bucks Cablevision, Inc., operator of a cable television system serving discrete areas of Bristol Borough, Bristol Township and Middletown Township, Pennsylvania.

Cable Television—2—Application[s] for Certificate[s] of Compliance (CAC-6504-6509), filed by Mid-Hudson Cablevision, Inc., operator of existing cable systems at the Village and Town of Catskill, the Village and Town of Athens, City of Hudson, and Town of Greenport, New York.

Assignment of License and Transfer of Control—1—Application for consent to voluntary transfer of control of Westport Television, Inc., licensee of UHF station KBMA-TV, Kansas City, Missouri, from Benno C. Schmidt and BMA Properties, Inc., to Scripps-Howard Broadcasting Company (BTC-8303).

Renewal—1—Petition to deny, filed by Vincent L. Hoffart against the pending broadcast license renewal applications of Dena Pictures, Inc. and Alexander Broadcasting Co., d.b.a. Kaye-Smith Enterprises, for Stations WUBE and WUBE-FM, Cincinnati, Ohio (BR-278, BRH-471).

Complaints and Compliance—1—Petition for reconsideration, filed May 31, 1977, by Musical Heights, Inc., licensee of station WZYQ-FM, Braddock Heights, Maryland, of a Commission By Direction letter granting a short-term license renewal to radio station WZYQ-FM (BRH-2761).

CONTACT PERSON FOR MORE INFORMATION:

Samuel M. Sharkey, FCC Public Information Officer, telephone 202-632-7260.

Issued: August 24, 1977; August 26, 1977.

CIVIL AERONAUTICS BOARD.

Notice of addition to the September 1, 1977 meeting agenda.

TIME AND DATE: 10:00 a.m., September 1, 1977.

PLACE: Room 1027, 1825 Connecticut Avenue, Washington, D.C. 20428.

SUBJECT: 11a. Board comments on Interstate Commerce Commission rulemaking, "Motor Transportation of Property Incidental to Transportation by Aircraft," No. MC-C-3437, and "Motor Transportation of Passengers Incidental to Transportation by Aircraft," No. MC-C-4000 (Memo No. 7380, OGC, BE, BOR)

STATUS: Open.

PERSON TO CONTACT:

Phyllis T. Kaylor, The Secretary, ((202) 673-5068).

SUPPLEMENTARY INFORMATION: This item concerns Board comments that are to be submitted to the Interstate Commerce Commission on September 7, 1977. The only scheduled meeting of the Board before September 7, 1977, is September 1, 1977. Therefore, the following Board Members have voted that agency business requires the addition of item 11a. to the meeting agenda for the September 1, 1977 meeting and that no earlier announcement of the addition was possible:

Chairman Alfred E. Kahn
Vice Chairman Richard J. O'Melia
Member G. Joseph Minetti
Member Lee R. West

NATIONAL FLOOD INSURANCE PROGRAM

Final Flood Elevation Determinations for Various Communities

V 42169 AUG 31 77 UMI

Title 24—Housing and Urban Development

CHAPTER X—FEDERAL INSURANCE ADMINISTRATION

SUBCHAPTER B—NATIONAL FLOOD INSURANCE PROGRAM

[Docket No. FI-2496]

PART 1917—APPEALS FROM PROPOSED FLOOD ELEVATION DETERMINATIONS

Final Flood Elevation Determination for the City of Marysville, Calif.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Final rule.

SUMMARY: Final base flood elevations (100-year flood) are listed below for selected locations in the City of Marysville, Calif. These base flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

EFFECTIVE DATE: On publication of the Flood Insurance Rate Map for the City of Marysville, Calif.

ADDRESS: Maps and other information showing the detailed outlines of the flood-prone areas and the final elevations for the City of Marysville are available for review at City Hall, Marysville, Calif.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202-775-5581 or toll free line 800-424-8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of his final determinations of flood elevations for the City of Marysville.

This final rule is issued in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added Section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR Part 1917).

An opportunity for the community or individuals to appeal this determination to or through the community for a period of ninety (90) days has been provided. No appeals of the proposed base flood elevations were received from the community or from individuals within the community.

The Administrator, to whom the Secretary has delegated the statutory authority, has developed criteria for flood plain management in flood-prone areas in accordance with 24 CFR Part 1910.

The final 100-year flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Feather River	10th St.	71
	5th St.	70
Yuba River	Simpson Lane	72

[Docket No. FI-2715]

PART 1917—APPEALS FROM PROPOSED FLOOD ELEVATION DETERMINATIONS

Final Flood Elevation Determination for the City of Novato, Calif.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Final rule.

SUMMARY: Final base flood elevations (100-year flood) are listed below for selected locations in the City of Novato, Calif. These base flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

EFFECTIVE DATE: On publication of the Flood Insurance Rate Map for the City of Novato, Calif.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581 or toll free line 800-424-8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of his final determinations of flood elevations for the City of Novato.

This final rule is issued in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added Section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR Part 1917).

An opportunity for the community or individuals to appeal this determination to or through the community for a period of ninety (90) days has been provided. No appeals of the proposed base flood elevations were received from the community or from individuals within the community.

The Administrator, to whom the Secretary has delegated the statutory authority, has developed criteria for flood plain management in flood-prone areas in accordance with 24 CFR Part 1910.

Maps and other information showing the detailed outlines of the flood-prone areas and the final elevations for the City of Novato are available for review at City Hall, Sherman and DeLong, Novato, Calif.

The final 100-year flood elevations for selected locations are:

[Docket No. FI-2701]

PART 1917—APPEALS FROM PROPOSED FLOOD ELEVATION DETERMINATIONS

Final Flood Elevation Determination for the Township of Frenchtown, Mich.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Final rule.

SUMMARY: Final base flood elevations (100-year flood) are listed below for selected locations in the Township of Frenchtown, Mich. These base flood elevations are the basis for the flood plain management measures that the commu-

V 42169 AUG 31 77 UMI

nity is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

EFFECTIVE DATE: On publication of the Flood Insurance Rate Map for the Township of Frenchtown, Mich.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202–755–5581 or toll free line 800–424–8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of his final determinations of flood elevations for the Township of Frenchtown.

This final rule is issued in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93–234), 87 Stat. 980, which added Section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90–448), 42 U.S.C. 4001–4128, and 24 CFR Part 1917).

An opportunity for the community or individuals to appeal this determination to or through the community for a period of ninety (90) days has been provided. No appeals of the proposed base flood elevations were received from the community or from individuals within the community.

The Administrator, to whom the Secretary has delegated the statutory authority, has developed criteria for flood plain management in flood-prone areas in accordance with 24 CFR Part 1910.

Maps and other information showing the detailed outlines of the flood-prone areas and the final elevations for the Township of Frenchtown are available for review at Frenchtown Township, 2744 Vivian Road, Monroe, Mich.

The final 100-year flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
River Raisin	7,800 ft from mouth	600
	20,500 ft from mouth	602
	30,700 ft from mouth	604
	31,600 ft from mouth	605
Saddy Creek	North Dixie Highway	581
	Interstate 75	592
	Vivian Rd	595
	U.S. 25	601
Stony Creek	North Dixie Highway	578
	Interstate 75	595
	War Rd	595
	U.S. 24 (U.S. 25)	598
	C&O RR	600

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended (42 U.S.C. 4001–4128); and Secretary's delegation of authority to Federal Insurance Administrator, 34 FR 2680, February 27, 1969, as amended (39 FR 2787, January 24, 1974).)

Issued: June 24, 1977.

PATRICIA ROBERTS HARRIS,
Secretary.

PART 1917—APPEALS FROM PROPOSED FLOOD ELEVATION DETERMINATIONS

Final Flood Elevation Determination for the City of Springfield, Nebr.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Final rule.

SUMMARY: Final base flood elevations (100-year flood) are listed below for selected locations in the City of Springfield, Nebr. These base flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

EFFECTIVE DATE: On publication of the Flood Insurance Rate Map for the City of Springfield, Nebr.

ADDRESS: Maps and other information showing the detailed outlines of the flood-prone areas and the final elevations for the City of Springfield are available for review at City Hall, Springfield, Nebr.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202–755–5581 or toll free line 800–424–8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of his final determinations of flood elevations for the City of Springfield.

This final rule is issued in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93–234), 87 Stat. 980, which added Section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90–448), 42 U.S.C. 4001–4128, and 24 CFR Part 1917).

An opportunity for the community or individuals to appeal this determination to or through the community for a period of ninety (90) days has been provided. No appeals of the proposed base flood elevations were received from the community or from individuals within the community.

The Administrator, to whom the Secretary has delegated the statutory authority, has developed criteria for flood plain management in flood-prone areas in accordance with 24 CFR Part 1910.

The final 100-year flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Springfield Creek	County Road Bridge (south of Main St.).	1,642
	Main Street Bridge	1,651
	County Road Bridge (north of Main St.).	1,658

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended (42 U.S.C. 4001–4128); and Secretary's delegation of authority to Federal Insurance Administrator, 34 FR 2680, February 27, 1969, as amended (39 FR 2787, January 24, 1974).)

Issued: July 28, 1977.

PATRICIA ROBERTS HARRIS,
Secretary.

An opportunity for the community or individuals to appeal this determination to or through the community for a period of ninety (90) days has been provided. No appeals of the proposed base flood elevations were received from the community or from individuals within the community.

The Administrator, to whom the Secretary has delegated the statutory authority, has developed criteria for flood plain management in flood-prone areas in accordance with 24 CFR Part 1910.

The final 100-year flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum 1929
Roanoke River	Downstream corporate limit.	885.0
	Upstream corporate limit.	904.0
Tinker Creek	N&W RR	904.0
	Virginia Ave.	911.0
	Wise Ave.	914.3
	Upstream corporate limit.	918.3
Glade Creek	At mouth	911.3
	Vinton Mill Rd.	913.0
	N&W RR.	922.5
	do.	905.0
Wolf Creek	Niagara Rd.	996.5
	Virginia Route 631 bridge.	1,057.5
	Highway 24 (west line).	1,057.5

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended (42 U.S.C. 4001–4128); and Secretary's delegation of authority to Federal Insurance Administrator, 34 FR 2680, February 27, 1969, as amended (39 FR 2787, January 24, 1974).)

Issued: July 28, 1977.

PATRICIA ROBERTS HARRIS,
Secretary.

RIGHTS-OF-WAY

General Provisions

V 42169 AUG 31 77 UMI

Title 50—Fish and Wildlife

CHAPTER I—FISH AND WILDLIFE SERVICE, DEPARTMENT OF THE INTERIOR

PART 29—LAND USE MANAGEMENT

Rights-of-Way General Regulations

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Final rule.

SUMMARY: The purpose of this amendment is to incorporate requirements of two acts passed since the initial publication of the regulations in 1969. These are the act to amend section 28 of the Mineral Leasing Act of 1920 (Pub. L. 93–153; 87 Stat. 576), and the National Wildlife Refuge System Administration Act Amendments Act of 1974 (Pub. L. 93–509; 88 Stat. 1603). The amendment to section 28 of the Mineral Leasing Act establishes special requirements for pipeline rights-of-way for oil, natural gas, synthetic liquid or gaseous fuels, or any refined product produced therefrom. The requirement in this law for reimbursement to the United States for costs incurred in processing applications, monitoring construction and terminating rights-of-way is extended to cover all rights-of-way requests over lands administered by the Fish and Wildlife Service. The National Wildlife Refuge System Administration Act Amendments Act establishes criteria for payment for rights-of-way. Previously, special requirements for electric power transmission line rights-of-way were included in the regulation by reference to 43 CFR 2851.1–1. These requirements are now written into the regulation. A new requirement for applicants to furnish environmental information so as to enable the Fish and Wildlife Service to comply with section 102(2)(C) of the National Environmental Policy Act of 1969 has been included. Other amendments have been included to clarify the regulation.

EFFECTIVE DATE: These regulations shall become effective on September 30, 1977.

FOR FURTHER INFORMATION CONTACT:

Richard E. Corthell, Division of Realty, U.S. Fish and Wildlife Service, Department of the Interior, Washington, D.C. 20240 (202–343–6649).

SUPPLEMENTARY INFORMATION: On March 18, 1976, the Fish and Wildlife Service published in the FEDERAL REGISTER a notice and text of proposed miscellaneous amendments to Part 29, Subpart B, of Title 50, Code of Federal Regulations. Interested persons were given until April 19, 1976, to submit comments, suggestions, or objections to the proposed amendments. Fourteen comments were received and considered in the final rulemaking process.

Five of the comments objected to the method whereby the United States would recover costs for processing and monitoring easements or permits as being open ended and without limitation as to probable charges for the recovery of costs. Initially it was proposed to charge an application fee of $100, plus actual costs for processing over and above that amount, and to charge actual costs for monitoring the construction of facilities. Previously, on April 23, 1975, the Bureau of Land Management of the Department of the Interior, did publish regulations in 40 FR 17842 for the recovery of costs for processing applications and for monitoring the construction, operation, maintenance and termination of facilities on lands administered by the Bureau of Land Management. These regulations provide for a schedule of fees based on length and/or size, except that actual costs may be recovered when such costs exceed the scheduled amount plus the costs to keep actual cost records. They also provide for an estimate of costs in advance upon request. The proposed regulation in § 29.21–2(a) (2) and (3) has been changed to adopt the same schedule and method of recovery of costs as was published by the Bureau of Land Management.

Six comments objected to the requirement that applicants furnish an environmental assessment, primarily on the ground that duplication may be required of applicants when an environmental impact assessment may be available from a "lead agency." Also one comment pointed out the Regional Directors' responsibility to protect historic, architectural, archeological, and cultural resources. Accordingly, the proposed regulation § 29.21–2(a) (4) has been changed to permit the Regional Director, at his discretion, to rely on an environmental impact statement and/or assessment prepared by a "lead agency," and to include citation of the various acts, regulations, and Executive Orders relating to the protection of historic, architectural, archeological, and cultural features.

One comment objected to the limitation of an easement or permit to 30 years for pipelines for the transmission of oil, natural gas synthetic liquid or gaseous fuels, or any refined product therefrom and to the limitation of the width of the right-of-way to 50 feet plus the width of the pipe when section 28 of the Mineral Leasing Act as amended (Pub. L. 93–153) provides for the right-of-way to also include related facilities. The 30-year limitation on rights-of-way is statutory, 30 U.S.C. 185(n). The proposed regulation, § 29.21–3(a), has been changed to include related facilities in the right-of-way width.

One comment expressed concern that the Regional Director, under the proposed regulation, would be authorized to impose additional stipulations and/or conditions on a holder after an easement or permit had been granted. The proposed regulation, § 29.21–4(b), has been clarified by making the stipulations and/or conditions applicable in the "right-of-way, easement, or permit document."

Two comments objected to the strict liability requirement in § 29.21–4(b)(7) of the proposed regulation. The regulation has been changed to provide that for lands under the exclusive jurisdiction of the United States, the holder, or his employees, contractors, or agents shall be liable to third parties for injuries incurred in connection with the easement or permit area. The regulation is further changed to provide, in the case of special hazards, a limitation of $1,000,000 for liability without fault for injury and damage to land of the United States.

Two comments express concern that the proposed regulation provided for occupancy by the Fish and Wildlife Service of rights-of-way, easement or permit areas not actually occupied by facilities. This is presently a requirement of 50 CFR 29.21–4(b)(13). However, we have changed the regulation to provide for occupancy and use by the Fish and Wildlife Service only "to the extent that it does not interfere with the full and safe utilization thereof by the holder."

Three comments expressed concern that the requirement in § 29.21–4(b)(14) of the proposed regulation would require a holder to modify or adapt a facility if such were found to be necessary by the Regional Director. This condition is included in the existing regulation in 50 CFR 29.21–4(b)(14). It was suggested that such modifications, if necessary, not unduly interfere with the continuity of energy transportation and delivery requirements. The proposed regulation has been modified to add a new sentence at the end stating: "Any such modifications will be planned and scheduled so as not to unduly interfere with or to have minimal effect upon continuity of energy transportation and delivery requirements."

Three comments expressed concern about the requirement for, and system of making, charges for rights-of-way, easement, and permits. This is a requirement of the present regulation in 50 CFR 29.21–7 (a) and (b) and the proposed change is primarily editorial in nature to include statutory requirements of Pub. L. 93–509. Four comments objected to a new § 29.21–7(c) which would authorize the Regional Director to require mitigation measures adjacent to or within the right-of-way, or replacement land, to make the proposed use compatible with the purposes for which the area was established. We believe this section is in the interest of industry. Otherwise, there may be instances where the Secretary or his designee (Regional Director) would be prohibited by law from granting an easement or permit. However, to make the purpose clear, the last sentence has been modified to read * * * "Such mitigation measures and/or the replacement of land are solely for the purpose of complying with the requirement of the National Wildlife Refuge System Administration Act that the use be compatible with the purpose for which the area was established and shall be in addition to the payment of fair market value."

One comment requested that gathering lines and associated structures used in the production of oil and gas under valid leases be excluded from the regulations. A new sentence has been added to the end of the proposed regulation § 29.21–9—"Gathering Lines and associated structures used solely in the production

of oil and gas under valid leases on the lands administered by the Fish and Wildlife Service are excepted from the provisions of § 29.21–9." An added provision has been included, § 29.21–9(a), that provides, in cases where pipelines, etc., will cross lands administered by more than one Federal agency and/or more than one Bureau or Office of the Department of the Interior, a single application shall be filed with the appropriate State Director of the Bureau of Land Management, Department of the Interior. This provision is statutory in Pub. L. 93–153.

A few other comments were received concerning certain regulatory requirements as they relate to pipelines, § 29.21–9(a)(2), 29.21–9(b), 29.21–9(c), and 29.21–9(d). The letter designations in these sections have been changed (a) to (b), (b) to (c), (c) to (d), and (d) to (e). These requirements are statutory pursuant to Pub. L. 93–153. Therefore, the proposed regulation cannot be changed as to those matters.

One comment suggested that the requirement for a bond in § 29.21–9(f) be limited as to time in some manner. This letter designation has been changed from (f) to (g) and the proposed regulation is changed by adding the following words at the end—"not to exceed the period of construction plus one year or longer period if necessary for the pipeline to stabilize."

Two comments obected to the authority of the Regional Director to suspend activity within the right-of-way or permit area if necessary to protect public health and safety or the environment prior to an administrative hearing. This provision is permitted by statute, 30 U.S.C. 185(o)(2). We interpret such a suspension to be exercised in an emergency and, as such, the Project Manager should have the authority to act in an emergency. The regulation in § 29.21–9(g), now (h), has been changed by substituting "Project Manager" for "Regional Director" in the first sentence and by adding the following two sentences at the end—"The Regional Director must make a determination and notify the holder in writing within 15 days from the date of the suspension as to whether the suspension should continue and list actions needed to terminate the suspension. Such suspension shall remain in effect for only so long as the emergency condition continues."

Two comments expressed concern that additional rights-of-way could be granted that may overlap rights-of-way previously granted without consulting with the holder. Section 29.21–9(h), now (i) has been changed by adding the following words at the end—"after giving notice to the holder and an opportunity to comment."

Four comments objected to the common carrier requirements in the proposed regulation in §§ 29.21–9(i), 29.21–9(i)(A), 29.21–9(ii)(B), and 29.21–9(iii). The numbering of the section is not clear and is therefore corrected as follows: Paragraph "(i)(A)" is changed to "(j)(2)(A)"; paragraph "(ii)(A)" to "(j)(3)(A)"; and paragraph "(iii)" to "(j)(4)." Since the requirements of § 29.21–9(i), now (j), are statutory pursuant to Pub. L. 93–153, no further change is made.

Several comments objected to §§ 29.21–9 (j), (k), and (l) of the proposed regulation. These letter designations have been changed, (j) to (k), (k) to (l), and (l) to (m). Since the requirements are statutory pursuant to Pub. L. 93–153, no change is made.

Several comments objected to the hearings and appeals procedures in §§ 29.22, 29.22–1, 29.22–2, 29.22–3, and 29.22–4 as being narrow and restrictive and that except for certain specified instances the actions of the Regional Director could not be appealed. These sections are deleted and the old procedures in 50 CFR 29.22 are retained with editorial changes to bring it in line with current citations.

The Fish and Wildlife Service has prepared an environmental assessment concerning these regulations. Based on a review and evaluation of the information contained in the assessment, it has been determined that the proposed amendments to the general right-of-way regulations of 50 CFR, Chapter I, Part 29, Subpart B, do not constitute a major Federal action which would signficantly affect the quality of the human environment within the meaning of section 102(2)(C) of the National Environmetnal Policy Act of 1969, 42 U.S.C. 4332(2)(C). Therefore, the preparation of an environmental impact statement on this action is not required.

The Fish and Wildlife Service has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11949 and OMB Circular A–107.

The primary author of this document is Richard E. Corthell, Division of Realty, Fish and Wildlife Service.

Accordingly, Title 50 CFR, Part 29, Subpart B, Chapter I is amended as follows:

Section 29.21 is amended by revising paragraph (h) and by adding new paragraph (i).

§ 29.21 Definitions.

* * * * *

(h) "Compatible" means that the requested right-of-way or use will not interfere with or detract from the purposes for which units of the National Wildlife Refuge System are established. The term "inconsistent" in section 28(b)(1) of the Mineral Leasing Act of 1920, as amended by Pub. L. 93–153, shall be deemed to mean a use that is "not compatible", as "compatible" is defined herein.

(i) "Department" means U.S. Department of the Interior unless otherwise specified.

Section 29.21–1 is amended by revising paragraphs (a) and (c) to read as follows:

§ 29.21–1 Purpose and scope.

* * * * *

(a) *National Wildlife Refuge System lands.* Applications for all forms of rights-of-way on or over such lands shall be submitted either under authority of Pub. L. 89–669 (80 Stat. 926; 16 U.S.C. 668dd), as amended, or for oil and gas pipelines under section 28 of the Mineral Leasing Act of 1920 (41 Stat. 449; 30 U.S.C. 185) as amended by Pub. L. 93–153, following application procedures set out in § 29.21–2. No right-of-way will be approved unless it is determined by the Regional Director to be compatible. See section 29.21–8 for additional requirements applicable to rights-of-way for electric power transmission lines and section 29.21–9 for additional requirements applicable to rights-of-way for pipelines for the transportation of oil, natural gas, synthetic liquid or gaseous fuels, or any refined product produced therefrom.

* * * * *

(c) *Other lands outside the National Wildlife Refuge System.* Rights-of-way on or over other lands will be granted in accordance with controlling authorities cited in 43 CFR Part 2800, or for oil and gas pipelines under section 28 of the Mineral Leasing Act of 1920 (41 Stat. 449; 30 U.S.C. 185) as amended by Pub. L. 93–153. See section 29.21–8 for additional requirements applicable to rights-of-way for electric power transmission lines and section 29.21–9 for additional requirements applicable to rights-of-way for pipelines for the transportation of oil, natural gas, synthetic liquid or gaseous fuels, or any other refined product produced therefrom. Applications will be submitted in accordance with procedures set out in section 29.21–2.

Section 29.21–2 is amended by revising paragraph (a)(2), and by adding new paragraphs (a)(3), and (a)(4).

§ 29.21–2 Application procedures.

(a)(1) * * *

(2)(i) All applications filed pursuant to this subpart in the name of individuals, corporations, or associations must be accompanied by a nonreturnable application fee. No application fee will be required of (A) State or local governments or agencies or instrumentalities thereof except as to rights-of-way, easements, or permits under section 28 of the Mineral Leasing Act of 1920, as amended by Pub. L. 93–153, or (B) Federal Government agencies.

(ii) Application fees will be in accordance with the following schedule:

(A) For linear facilities (e.g., powerlines, pipelines, roads, etc.).

Length	*Payment*
Less than 5 miles	$50 per mile or fraction thereof.
5 to 20 miles	$500.
20 miles and over	$500 for each 20 miles or fraction thereof.

(B) For nonlinear facilities, $250 for each 40 acres or fraction thereof.

(C) Where an application includes both linear and nonlinear facilities, payment will be the aggregate of amounts under paragraphs (a)(2)(ii) (A) and (B) of this section.

(D) When an application is received, the Regional Director will estimate the

V42169 AUG 31 77 UMI

costs expected to be incurred in processing the application. If the estimated costs exceed the payments under paragraphs (a)(2)(ii) (A), (B), or (C) above by an amount greater than the cost of maintaining actual cost records, the Regional Director shall require the applicant to make periodic payments in advance of the incurrence of such costs by the United States except for the last payment which will reflect final reimbursement for actual costs of the United States in processing the application. Overpayments may be refunded or adjusted by the Regional Director as appropriate.

(E) The Regional Director shall, on request by an applicant or prospective applicant, give an estimate based on the best available cost information, of the costs which would be incurred by the United States in processing an application. However, reimbursement will not be limited to the estimate of the Regional Director if the actual costs exceed the estimate. Prospective applicants are encouraged to consult with the Regional Director in advance of filing an application in regard to probable costs and other requirements.

(3)(i) By accepting an easement or permit under this subpart, the holder agrees to reimburse the United States for reasonable costs incurred by the Fish and Wildlife Service in monitoring the construction, operation, maintenance, and termination of facilities within or adjacent to the easement or permit area. No reimbursement of monitoring costs will be required of (A) State or local governments or agencies or instrumentalities thereof except as to rights-of-way, easements, or permits granted under Section 28 of the Mineral Leasing Act of 1920 as amended by Pub. L. 93-153, or (B) Federal Government agencies.

(ii) Within 60 days of the issuance of an easement or permit the holder must submit a nonreturnable payment in accordance with the following:

(A) For linear facilities (e.g., powerlines, pipelines, roads, etc.).

Length	*Payment*
Less than 5 miles	$20 per mile or fraction thereof.
5 to 20 miles	$200.
20 miles and over	$200 for each 20 miles or fraction thereof.

(B) For nonlinear facilities, $100 for each 40 acres or fraction thereof.

(C) Where an easement or permit includes both linear and nonlinear facilities, payment will be the aggregate amounts under paragraphs (a)(3)(2)(ii) (A) and (B) of this section.

(D) When an easement or permit is granted the Regional Director shall estimate the costs, based on the best available cost information, expected to be incurred by the United States in monitoring holder activity. If the estimated costs exceed the payments under paragraphs (a)(3)(2)(ii), (A), (B), or (C) of this section by an amount which is greater than the cost of maintaining actual cost records for the monitoring process, the Regional Director shall require the holder to make periodic payments of the estimated reimbursable costs prior to the incurrence of such costs by the United States. Overpayments may be refunded or adjusted by the Regional Director as appropriate.

(E) Following the termination of an easement or permit, the former holder will be required to pay additional amounts to the extent the actual costs to the United States have exceeded the payments required by paragraphs (a)(3)(ii)(A), (B), and (C) of this section.

(4) All applications filed pursuant to this subpart must include a detailed environmental analysis which shall include information concerning the impact of the proposed use of the environment including the impact on air and water quality; scenic and esthetic features; historic, architectural, archeological, and cultural features; wildlife, fish and marine life, etc. The analysis shall include sufficient data so as to enable the Service to prepare an environmental assessment and/or impact statement in accordance with Section 102(2)(C) of the National Environmental Policy Act of 1969 (42 U.S.C. 4321 et seq.) and comply with the requirements of the National Historic Preservation Act of 1966 (16 U.S.C. 470 et seq.), the Archeological and Historic Preservation Act of 1974 (16 U.S.C. 469 et seq.), Executive Order 11593 "Protection and Enhancement of the Cultural Environment" of May 13, 1971 (36 FR 8921), and "Procedures for the Protection of Historic and Cultural Properties" (36 FR 800). Concerning the National Environmental Policy Act, the Regional Director may, at his discretion, rely on an environmental assessment or impact statement prepared by a "lead agency."

(b) * * *

(c) * * *

Section 29.21-3(a) is revised to read as follows:

§ 29.21-3 Nature of interest granted.

(a) Where the land administered by the Secretary is owned in fee by the United States and the proposed use is compatible with the objectives of the area, a permit or easement may be approved and granted by the Regional Director. Generally an easement or permit will be issued for a term of 50 years or so long as it is used for the purpose granted, or for a lesser term when considered appropriate. For rights-of-way granted under authority of Section 28 of the Mineral Leasing Act of 1920, as amended, for pipelines for the transportation of oil, natural gas, synthetic liquid or gaseous fuels, or any refined product produced therefrom, the grant may be for a term not to exceed 30 years and the right-of-way may not exceed 50 feet, plus the area occupied by the pipeline and its related facilities unless the Regional Director finds, and records the reasons for his finding, that, in his judgment, a wider right-of-way is necessary for operation and maintenance after construction, or to protect the environment or public safety. Related facilities include but are not limited to valves, pump stations, supporting structures, bridges, monitoring and communication devices, surge and storage tanks, terminals, etc. However, a temporary permit supplementing a right-of-way may be granted for additional land needed during construction, operation, maintenance, or termination of the pipeline, or to protect the natural environment or public safety.

* * * * *

Section 29.21-4 is amended by revising paragraphs (b), (b)(1), (b)(2), (b)(4)-(b)(7), (b)(9), (b)(10), and (b)(13)-(b)(15).

§ 29.21-4 Terms and conditions.

* * * * *

(b) An applicant, by accepting an easement or permit agrees to such terms and conditions as may be prescribed by the Regional Director in the granting document. Such terms and conditions shall include the following, unless waived in part by the Regional Director, and may include additional special stipulations at his discretion. See § 29.21-8 for special requirements for electric powerlines and § 29.21-9 for special requirements for oil and gas pipelines.

(1) To comply with State and Federal laws applicable to the project within which the easement or permit is granted, and to the lands which are included in the easement or permit area, and lawful existing regulations thereunder.

(2) To clear and keep clear the lands within the easement or permit area to the extent and in the manner directed by the project manager in charge; and to dispose of all vegetative and other material cut, uprooted, or otherwise accumulated during the construction and maintenance of the project in such a manner as to decrease the fire hazard and also in accordance with such instructions as the project manager may specify.

* * * * *

(4) To take such soil and resource conservation and protection measures, including weed control on the land covered by the easement or permit as the project manager in charge may request.

(5) To do everything reasonably within his power, both independently and on request of any duly authorized representative of the United States, to prevent and suppress fires on or near lands to be occupied under the easement or permit area, including making available such construction and maintenance forces as may be reasonably obtainable for the suppression of such fires.

(6) To rebuild and repair such roads, fences, structures, and trails as may be destroyed or injured by construction work and, upon request by the Regional Director, to build and maintain necessary and suitable crossings for all roads and trails that intersect the works constructed, maintained, or operated under the easement or permit.

(7) To pay the United States the full value for all damages to the lands or other property of the United States caused by him or his employees, contractors, or agents of the contractors, and to indemnify the United States against any liability for damages to life, person, or property arising from the occupancy or use of the lands under the easement or permit, except where the easement or permit is granted hereunder to a State or other governmental agency which has no legal power to assume such a liability with respect to damages caused by it to lands or property, such agency in lieu thereof agrees to repair all such damages. Where the easement of permit involves lands which are under the exclusive jurisdiction of the United States, the holder or his employees, contractors, or agents of the contractors, shall be liable to third parties for injuries incurred in connection with the easement or permit area. Grants of easements or permits involving special hazards will impose liability without fault for injury and damage to the land and property of the United States up to a specified maximum limit commensurate with the foreseeable risks or hazards presented. The amount of no-fault liability for each occurrence is hereby limited to no more than $1,000,000.

* * * * *

(9) That all or any part of the easement or permit granted may be suspended or terminated by the Regional Director for failure to comply with any or all terms and conditions of the grant, or for abandonment. A rebuttable presumption of abandonment is raised by deliberate failure of the holder to use for any continuous 2-year period the easement or permit for the purpose for which it was granted or renewed. In the event of noncompliance or abandonment, the Regional Director will notify in writing the holder of the easement or permit of his intention to suspend or terminate such grant 60 days from the date of the notice, stating the reasons therefor, unless prior to that time the holder completes such corrective actions as are specified in the notice. The Regional Director may grant an extension of time within which to complete corrective actions when, in his judgment, extenuating circumstances not within the holder's control such as adverse weather conditions, disturbance to wildlife during breeding periods or periods of peak concentration, or other compelling reasons warrant. Should the holder of a right-of-way issued under authority of the Mineral Leasing Act, as amended, fail to take corrective action within the 60-day period, the Regional Director will provide for an administrative proceeding pursuant to 5 U.S.C. 554, prior to a final Departmental decision to suspend or terminate the easement or permit. In the case of all other right-of-way holders, failure to take corrective action within the 60-day period will result in a determination by the Regional Director to suspend or terminate the easement or permit. No administrative proceeding shall be required where the easement or permit terminates under its terms.

(10) To restore the land to its original condition to the satisfaction of the Regional Director so far as it is reasonably possible to do so upon revocation and/or termination of the easement or permit, unless this requirement is waived in writing by the Regional Director. Termination also includes permits or easements that terminate under the terms of the grant.

* * * * *

(13) That the grant of the easement or permit shall be subject to the express condition that the exercise thereof will not unduly interfere with the management, administration, or disposal by the United States of the land affected thereby. The applicant agrees and consents to the occupancy and use by the United States, its grantees, permittees, or lessees of any part of the easement or permit area not actually occupied for the purpose of the granted rights to the extent that it does not interfere with the full and safe utilization thereof by the holder. The holder of an easement or permit also agrees that authorized representatives of the United States shall have the right of access to the easement or permit area for the purpose of making inspections and monitoring the construction, operation and maintenance of facilities.

(14) That the easement or permit herein granted shall be subject to the express covenant that any facility constructed thereon will be modified or adapted, if such is found by the Regional Director to be necessary, without liability or expense to the United States, so that such facility will not conflict with the use and occupancy of the land for any authorized works which may hereafter be constructed thereon under the authority of the United States. Any such modification will be planned and scheduled so as not to interfere unduly with or to have minimal effect upon continuity of energy and delivery requirements.

(15) That the easement or permit herein granted shall be for the specific use described and may not be construed to include the further right to authorize any other use within the easement or permit area unless approved in writing by the Regional Director.

Section 29.21-5 is revised as follows:

§ 29.21-5 Construction.

(a) If construction is not commenced within two (2) years after date of right-of-way grant, the right-of-way may be canceled by the Director of the U.S. Fish and Wildlife Service at his discretion.

(b) Proof of construction: Upon completion of construction, the applicant shall file a certification of completion with the Regional Director.

Section 29.21-6(b) is revised to read as follows:

§ 29.21-6 Disposal, transfer or termination of interest.

* * * * *

(b) *Transfer of easement or permit.* Any proposed transfer, by assignment, lease, operating agreement, or otherwise, of an easement or permit must be filed in triplicate with the Regional Director and must be supported by a stipulation that the transferee agrees to comply with and be bound by the terms and conditions of the original grant. A $25 nonreturnable service fee must accompany the proposal. No transfer will be recognized unless and until approved in writing by the Regional Director.

* * * * *

§ 29.21-7 is revised to read as follows:

§ 29.21-7 Payment required.

(a) Payment for use and occupancy of lands under the regulations of this subpart will be required and will be for fair market value as determined by appraisal by the Regional Director. At the discretion of the Regional Director, the payment may be a lump sum payment or an annual fair market rental payment, to be made in advance. If any Federal, State or local agency is exempted from such payment by and any other provision of Federal law, such agency shall otherwise compensate the Service by any other means agreeable to the Regional Director, including, but not limited to, making other land available or the loan of equipment or personnel, except that any such compensation shall relate to, and be consistent with the objectives of the National Wildlife Refuge System. The Regional Director may waive such requirement for compensation if he finds such requirement impracticable or unnecessary.

(b) When annual rental payments are used, such rates shall be reviewed by the Regional Director at any time not less than 5 years after the grant of the permit, right-of-way, or easement or the last revision of charges thereunder, The Regional Director will furnish a notice in writing to the holder of an easement or permit of intent to impose new charges to reflect fair market value commencing with the ensuing charge year. The revised charges will be effective unless the holder files an appeal in accordance with § 29.22.

(c) In instances where damage to a unit of the National Wildlife Refuge System will result, the Regional Director may require mitigation measures, as determined by him, within the easement or permit area or on adjacent Service land or replacement land to make the proposed use compatible with the purposes for which the unit of the system was established. Such mitigation measures, and/or the replacement of land, are solely for the purpose of complying with the requirement of the National Wildlife Refuge System Administrative Act that the use be compatible with the purpose for which the area was established and shall be in addition to the payment of fair market value.

Section 29.21-8 is revised to read as follows:

§ 29.21-8 Electric power transmission line rights-of-way.

By accepting a right-of-way for a power transmission line, the applicant thereby agrees and consents to comply with and be bound by the following terms and conditions, except those which the Secretary may waive in a particular case, in addition to those specified in Section 29.21-4(b).

(a) To protect in a workmanlike manner, at crossings and at places in prox-

V 42 169 AUG 31 77 UMI

imity to his transmission lines on the right-of-way authorized, in accordance with the rules prescribed in the National Electric Safety Code, all Government and other telephone, telegraph and power transmission lines from contact and all highways and railroads from obstruction and to maintain his transmission lines in such manner as not to menace life or property.

(b) Neither the privilege nor the right to occupy or use the lands for the purpose authorized shall relieve him of any legal liability for causing inductive or conductive interference between any project transmission line or other project works constructed, operated, or maintained by him on the servient lands, and any radio installation, telephone line, or other communication facilities now or hereafter constructed and operated by the United States or any agency thereof.

(c) Each application for authority to survey, locate, commence construction work, and maintain a facility for the generation of electric power and energy or for the transmission or distribution of electric power and energy of 66 kilovolts or higher under this subpart shall be referred by the Regional Director to the Secretary of the Interior to determine the relationship of the proposed facility to the power marketing program of the United States. Where the proposed facility will not conflict with the program of the United States, the Regional Director, upon notification to that effect, will proceed to act upon the application. In the case of necessary changes respecting the proposed location, construction, or utilization of the facility in order to eliminate conflicts with the power marketing program of the United States, the Regional Director shall obtain from the applicant written consent to, or compliance with, such requirements before taking further action on the application: *Provided, however*, That if increased cost to the applicant will result from changes to eliminate conflicts with the power marketing program of the United States, and it is determined that a right-of-way should be granted, such changes will be required upon equitable contract arrangements covering costs and other appropriate factors.

(d) The applicant shall make provision, or bear the reasonable cost (as may be determined by the Secretary) of making provision, for avoiding inductive or conductive interference between any transmission facility or other works constructed, operated, or maintained by it on the right-of-way authorized under the grant and any radio installation, telephone line, or other communication facilities existing when the right-of-way is authorized or any such installation, line or facility thereafter constructed or operated by the United States or any agency thereof. This provision shall not relieve the applicant from any responsibility or requirement which may be imposed by other lawful authority for avoiding or eliminating inductive or conductive interference.

(e) An applicant for a right-of-way for a transmission facility having a voltage of 66 kilovolts or more must, in addition to the requirements of § 29.21–2, execute and file with the application a stipulation agreeing to accept the right-of-way grant subject to the following conditions:

(1) In the event the United States, pursuant to law, acquires the applicant's transmission or other facilities constructed on or across such right-of-way the price to be paid by the United States shall not include or be affected by any value of the right-of-way granted to the applicant under authority of the regulations of this part.

(2) The Department of the Interior shall be allowed to utilize for the transmission of electric power and energy any surplus capacity of the transmission facility in excess of the capacity needed by the holder of the grant (subsequently referred to in this paragraph as "holder") for the transmission of electric power and energy in connection with the holder's operations, or to increase the capacity of the transmission facility at the Department's expense and to utilize the increased capacity for the transmission of electric power and energy. Utilization by the Department of surplus or increased capacity shall be subject to the following terms and conditions:

(i) When the Department desires to utilize surplus capacity throught to exist in the transmission facility, notification will be given to the holder and the holder shall furnish to the Department within 30 days a certificate stating whether the transmission facility has any surplus capacity not needed by the holder for the transmission of electric power and energy in connection with the holder's operations and, if so, the amount of such surplus capacity.

(ii) Where the certificate indicates that there is no surplus capacity or that the surplus capacity is less than that required by the Department, the authorized officer may call upon the holder to furnish additional information upon which its certification is based. Upon receipt of such additional information, the authorized officer shall determine, as a matter of fact, if surplus capacity is available and, if so, the amount of such surplus capacity.

(iii) In order to utilize any surplus capacity determined to be available, or any increased capacity provided by the Department at its own expense, the Department may interconnect its transmission facilities with the holder's transmission facility in a manner conforming to approved standards of practice for the interconnection of transmission circuits.

(iv) The expense of interconnection will be borne by the Department, and the Department will at all times provide and maintain adequate protective equipment to insure the normal and efficient operation of the holder's transmission facilities.

(v) After any interconnection is completed, the holder shall operate and maintain its transmission facilities in good condition, and, except in emergencies, shall maintain in a closed position all connections under the holder's control necessary to the transmission of the Department's power and energy over the holder's transmission facilities. The parties may by mutual consent open any switch where necessary or desirable for maintenance, repair or construction.

(vi) The transmission of electric power and energy by the Department over the holder's transmission facilities will be effected in such manner as will not interfere unreasonably with the holder's use of the transmission facilities in accordance with the holder's normal operating standards, except that the Department shall have the exclusive right to utilize any increased capacity of the transmission facility which has been provided at the Department's expense.

(vii) The holder will not be obligated to allow the transmission of electric power and energy by the Department to any person receiving service from the holder on the date of the filing of the application for a grant, other than statutory preference customers including agencies of the Federal Government.

(viii) The Department will pay to the holder an equitable share of the total monthly cost of that part of the holder's transmission facilities utilized by the Department for the transmission of electric power and energy, the payment to be an amount in dollars representing the same proportion of the total monthly cost of such part of the transmission facilities as the maximum amount in kilowatts of the power transmitted on a scheduled basis by the Department over the holder's transmission facilities bears to the total capacity in kilowatts of that portion of the transmission facilities. The total monthly cost will be determined in accordance with the system of accounts prescribed by the Federal Power Commission, exclusive of any investment by the Department in the part of the transmission facilities utilized by the Department.

(ix) If, at any time subsequent to a certification by the holder, or determination by the authorized officer, that surplus capacity is available for utilization by the Department, the holder needs for the transmission of electric power and energy in connection with its operations the whole or any part of the capacity of the transmission facility theretofore certified or determined as being surplus to its needs, the holder may request the authorized officer to modify or revoke the previous certification or determination by making application to the authorized officer not later than 36 months in advance of the holder's needs. Any modification or revocation of the certification or determination shall not affect the right of the Department to utilize facilities provided at its expense or available under a contract entered into by reason of the equitable contract arrangements provided for in this section.

(x) If the Department and the holder disagree as to the existence or amount of surplus capacity in carrying out the terms and conditions of this paragraph, the disagreement shall be decided by a board of three persons composed as follows: The holder and the authorized officer shall each appoint a member of the board and the two members shall appoint a third member. If the members appointed by the holder and the authorized officer are unable to agree on the designation of the third member, he shall be designated by the Chief Judge of the United States Court of Appeals of the circuit in which the major share of the facilities involved is located. The board shall determine the issue and its determination, by majority vote, shall be binding on the Department and the holder.

(xi) As used in this section, the term "transmission facility" includes (A) all types of facilities for the transmission of electric power and energy and facilities for the interconnection of such facilities, and (B) the entire transmission line and associated facilities, from substation or interconnection point to substation or interconnection point, of which the segment crossing the lands of the United States forms a part.

(xii) The terms and conditions prescribed in this paragraph may be modified at any time by means of a supplemental agreement negotiated between the holder and the Secretary of the Interior or his designee.

Section 29.21–9 is added as follows:

§ 29.21–9 Rights-of-way for pipelines for the transportation of oil, natural gas, synthetic liquid or gaseous fuels, or any refined product produced therefrom.

(a) Application procedure. Applications for pipelines and related facilities under this section are to be filed in accordance with § 29.21–2 of these regulations with the following exception:

When the right-of-way or proposed facility will occupy Federal land under the control of more than one Federal Agency and/or more than one Bureau or Office of the Department of the Interior, a single application shall be filed with the appropriate State Director of the Bureau of Land Management in accordance with regulations in 43 CFR Part 2800.

Any portion of the facility occupying land of the National Wildlife Refuge System will be subject to the provisions of these regulations.

(b) Right-of-way grants under this section will be subject to the special requirements of Section 28 of the Mineral Leasing Act of 1920 (30 U.S.C. 185), as amended, as set forth below. Gathering lines and associated structures used solely in the production of oil and gas under valid leases on the lands administered by the Fish and Wildlife Service are excepted from the provisions of § 29.21–9.

(1) *Pipeline safety.* Rights-of-way or permits granted under this section will include requirements that will protect the safety of workers and protect the public from sudden ruptures and slow degradation of the pipeline. An applicant must agree to design, construct, and operate all proposed facilities in accordance with the provisions of Parts 192 and/or 195 of Title 49 of the Code of Federal Regulations and in accordance with the Occupational Safety and Health Act of 1970, Pub. L. 91–596, including any amendments thereto.

(2) *Environmental protection.* An application for a right-of-way must contain environmental information required by section 29.21–2(a)(4) of this subpart. If the Regional Director determines that a proposed project will have a significant affect on the environment, there must also be furnished a plan of construction, operation, and rehabilitation of the proposed facilities. In addition to terms and conditions imposed under § 29.21–4, the Regional Director will impose such stipulations as may be required to assure: (i) restoration, revegetation and curtailment of erosion of the surface; (ii) that activities in connection with the right-of-way or permit will not violate applicable air and water quality standards or related facilities siting standards established by law; (iii) control or prevention of damage to the environment including damage to fish and wildlife habitat, public or private property, and public health and safety; and (iv) protection of the interests of individuals living in the general area of the right-of-way or permit who rely on the fish, wildlife, and biotic resources of the area for subsistence purposes.

(c) *Disclosure.* If the applicant is a partnership, corporation, association, or other business entity it must disclose the identity of the participants in the entity. Such disclosure shall include where applicable (1) the name and address of each partner, (2) the name and address of each shareholder owning 3 percentum or more of the shares, together with the number and percentage of any class of voting shares of the entity which such shareholder is authorized to vote, and (3) the name and address of each affiliate of the entity together with, in the case of an affiliate controlled by the entity, the number of shares and the percentage of any class of voting stock of that affiliate owned, directly or indirectly, by that entity, and in the case of an affiliate which controls that entity, the number of shares and the percentage of any class of voting stock of that entity owned, directly or indirectly, by the affiliate.

(d) *Technical and financial capability.* The Regional Director may grant or renew a right-of-way or permit under this section only when he is satisfied that the applicant has the technical and financial capability to construct, operate, maintain, and terminate the facility. At the discretion of the Regional Director, a financial statement may be required.

(e) *Reimbursement of costs.* In accordance with Section 29.21–2(a)(3) of this subpart, the holder of a right-of-way or permit must reimburse the Service for the cost incurred in monitoring the construction, operation, maintenance, and termination of any pipeline or related facilities as determined by the Regional Director.

(f) *Public hearing.* The Regional Director shall give notice to Federal, State, and local government agencies, and the public, and afford them the opportunity to comment on right-of-way applications under this section. A notice will be published in the FEDERAL REGISTER and a public hearing may be held where appropriate.

(g) *Bonding.* Where appropriate the Regional Director may require the holder of a right-of-way or permit to furnish a bond, or other security satisfactory to him, to secure all or any of the obligations imposed by the terms and conditions of the right-of-way or permit or by any rule or regulation, not to exceed the period of construction plus one year or a longer period if necessary for the pipeline to stabilize.

(h) *Suspension of right-of-way.* If the Project Manager determines that an immediate temporary suspension of activities within a right-of-way or permit area is necessary to protect public health and safety or the environment, he may issue an emergency suspension order to abate such activities prior to an administrative proceeding. The Regional Director must make a determination and notify the holder in writing within 15 days from the date of suspension as to whether the suspension should continue and list actions needed to terminate the suspension. Such suspension shall remain in effect for only so long as an emergency condition continues.

(i) Joint use of rights-of-way. Each right-of-way or permit shall reserve to the Regional Director the right to grant additional rights-of-way or permits for compatible uses on or adjacent to rights-of-way or permit areas granted under this section after giving notice to the holder and an opportunity to comment.

(j) *Common carriers.* (1) Pipelines and related facilities used for the transportation of oil, natural gas, synthetic liquid or gaseous fuels, or any refined product produced therefrom shall be constructed, operated, and maintained as common carriers.

(2)(i) The owners or operators of pipelines subject to this subpart shall accept, convey, transport, or purchase without discrimination all oil or gas delivered to the pipeline without regard to whether such oil or gas was produced on Federal or non-Federal lands. (ii) In the case of oil or gas produced from Federal lands or from the resources on the Federal lands in the vicinity of the pipeline, the Secretary may, after a full hearing with due notice thereof to the interested parties and a proper finding of facts, determine the proportionate amounts to be accepted, conveyed, transported or purchased.

(3)(i) The common carrier provisions of this section shall not apply to any natural gas pipeline operated by any person subject to regulation under the Natural Gas Act or by any public utility subject to regulation by a State or municipal regulatory agency having jurisdiction to regulate the rates and charges for the sale of natural gas to consumers within the State or municipality. (ii) Where natural gas not subject to State regulatory or conservation laws governing its purchase by pipelines is offered for sale, each such pipeline shall purchase, without discrimination, any such

V42169 AUG 31 77 UMI

natural gas produced in the vicinity of the pipeline.

(4) The Regional Director shall require, prior to granting or renewing a right-of-way, that the applicant submit and disclose all plans, contracts, agreements, or other information or material which he deems necessary to determine whether a right-of-way shall be granted or renewed and the terms and conditions which should be included in the right-of-way. Such information may include, but is not limited to: (i) conditions for, and agreements among owners or operators, regarding the addition of pumping facilities, looping, or otherwise increasing the pipeline or terminal's throughput capacity in response to actual or anticipated increases in demand; (ii) conditions for adding or abandoning intake, offtake, or storage points or facilities; and (iii) minimum shipment or purchase tenders.

(k) *Limitations on export.* Any domestically produced crude oil transported by pipeline over rights-of-way granted pursuant to Section 28 of the Mineral Leasing Act of 1920, except such crude oil which is either exchanged in similar quantity for convenience or increased efficiency of transportation with persons or the government of an adjacent foreign state, or which is temporarily exported for convenience or increased efficiency of transportation across parts of an adjacent foreign state and reenters the United States, shall be subject to all of the limitation and licensing requirements of the Export Administration Act of 1969.

(l) *State standards.* The Regional Director shall take into consideration, and to the extent practical comply with, applicable State standards for right-of-way construction, operation, and maintenance.

(m) *Congressional notification.* The Secretary shall notify the House and Senate Committees on Interior and Insular Affairs promptly upon receipt of an application for a right-of-way for a pipeline 24 inches or more in diameter, and no right-of-way for such a pipeline shall be granted until 60 days (not including days on which the House or Senate has adjourned for more than three days) after a notice of intention to grant the right-of-way together with the Secretary's detailed findings as to terms and conditions he proposes to impose, has been submitted to the Committees, unless each Committee by resolution waives the waiting period.

Section 29.22 is revised to read as follows:

§ 29.22 **Hearing and appeals procedure.**

An appeal may be taken from any final disposition of the Regional Director, to the Director, U.S. Fish and Wildlife Service and from the latter's decision to the Secretary of the Interior. Such appeals may be taken pursuant to 43 CFR Part 4, Subpart G.

Dated: August 16, 1977.

LYNN A. GREENWALT,
Director, Fish and Wildlife Service.

FEDERAL ENERGY ADMINISTRATION

ENERGY CONSERVATION PROGRAM FOR APPLIANCES

Notice of Proposed Rulemaking and Public Hearing

V42169 AUG 31 77
UMI

FEDERAL ENERGY ADMINISTRATION

[10 CFR Part 430]

ENERGY CONSERVATION PROGRAM FOR APPLIANCES

Notice of Proposed Rulemaking and Public Hearing

AGENCY: Federal Energy Administration.

ACTION: Proposed rule.

SUMMARY: The Federal Energy Administration hereby proposes to amend its regulations in order to prescribe test procedures for vented home heating equipment under the Energy Policy and Conservation Act. The Act requires that standard methods for testing vented home heating equipment a class within the type "home heating equipment not including furnaces," be prescribed as part of the energy conservation program for appliances. The intended effect of this proposal is to implement the Act's requirements for the solicitation of public comments before the test procedures are prescribed. The Federal Energy Administration is hereby also scheduling a further public hearing on the proposed energy efficiency improvement target for home heating equipment, not including furnaces.

DATES: Comments by October 25, 1977, 4:30 p.m.; requests to speak by October 21, 1977, 4:30 p.m.; statements by November 1, 1977, 4:30 p.m.; hearing for proposed test procedures to be held on November 2, 1977, at 9:30 a.m., and for proposed energy efficiency improvement target on November 2, 1977, at 1:30 p.m.

ADDRESSES: Requests to speak at the hearings to: Executive Communications, Room 3317, Federal Energy Administration, Box OQ (for the proposed test procedures) or Box NU (for the proposed target), Washington, D.C. 20461. Oral Statements to: Regulations Management, Room 2214, Federal Energy Administration, 2000 M Street NW., Washington, D.C. 20461.

HEARINGS HELD AT: Federal Energy Administration, Room 2105, 2000 M Street NW., Washington, D.C. 20461.

FOR FURTHER INFORMATION CONTACT:

James A. Smith (Program Office), Old Post Office Building, Room 307, 12th and Pennsylvania Avenue NW., Washington, D.C. 20461 (202–566–4635).

Robert C. Gilette (Hearing Procedures), 2000 M Street NW., Room 222A, Washington, D.C. 20461 (202–566–5201).

Jim Merna (Media Relations), 12th and Pennsylvania Avenue NW., Room 3104, Washington, D.C. 20461 (202–566–9833).

Laurence J. Hyman (Office of the General Counsel), 12th and Pennsylvania Avenue NW., Room 7146, Washington, D.C. 20461 (202–566–9750).

SUPPLEMENTARY INFORMATION:

A. *Background.*

The Federal Energy Administration (FEA) proposes to amend Chapter II of title 10, Code of Federal Regulations, in order to prescribe test procedures for vented home heating equipment, a class within the product type "home heating equipment, not including furnaces," pursuant to section 323 (42 U.S.C. 6293) of the Energy Policy and Conservation Act (Act) (Pub. L. 94–163). The adoption of test procedures does not mean that actual testing must be conducted. The procedures merely establish standard methods for testing when testing is otherwise required by the Act itself or by regulations implementing other parts of the program. For example, the Federal Trade Commission (FTC) may require that all or part of the test procedure be conducted in exercising its appliance energy efficiency labeling authority regarding a particular appliance type.

By notice issued May 10, 1976 (41 FR 19977, May 14, 1976), FEA proposed to establish Part 430, entitled "Energy Conservation Program for Appliances," in Chapter II of Title 10 of the Code of Federal Regulations. That notice proposed a Subpart A to Part 430, containing general program provisions, and a Subpart C, containing proposed energy efficiency improvement targets. By notice issued July 22, 1976 (41 FR 31237, July 27, 1976), FEA proposed an amendment to proposed Part 430 to add a Subpart B which would contain the appliance test procedures required to be prescribed by section 323 of the Act. Subparts A and B were established by notice issued on May 24, 1977 (42 FR 36648, July 15, 1977) withdrawing the original proposal of Subpart C and reproposing a new Subpart C containing proposed energy efficiency improvement targets for the products listed in 1–10 of section 322(a) of the Act. Energy efficiency improvement targets for the products listed in 11 and 12 of section 322(a) were proposed by separate notice (42 FR 40701, August 11, 1977).

Proposed test procedures for each product listed in 1–10 of section 322(a) of the Act were published prior to the hearing on the proposed energy efficiency improvement target for each product with the exception of vented home heating equipment. Because FEA believes that reference to proposed test procedures can facilitate public comment on the proposed targets, FEA has, by recent FEDERAL REGISTER notice (42 FR 42361, August 23, 1977), extended the deadline for written comment on the improvement target for home heating equipment (not including furnaces) to October 25, 1977 and has announced the holding of an additional hearing. This hearing, to be held at the time and place specified above, supplements the hearing on the home heating equipment (not including furnaces) improvement target held on August 19, 1977.

The notice issued on May 24, 1977 included final test procedures for room air conditioners. By notice issued March 17, 1977 (42 FR 15423, March 22, 1977) FEA proposed test procedures for dishwashers. This notice also included certain program definitions which have not yet been finalized. Proposed test procedures for water heaters, television receivers, refrigerators and refrigerator-freezers, freezers and clothes dryers were issued on April 21, 1977 (42 FR 21576 et seq., April 27, 1977). Proposed test procedures for unvented home heating equipment were issued on May 4, 1977 (42 FR 23860, May 11, 1977), and proposed test procedures for automatic and semi-automatic clothes washers were issued on May 11, 1977 (42 FR 25329, May 17, 1977), including a determination that test procedures cannot be developed for any other class of clothes washers. Proposed test procedures for humidifiers and dehumidifiers were issued on May 25, 1977 (42 FR 27941, et seq., June 1, 1977). Proposed test procedures for central air conditioners were issued on June 7, 1977 (42 FR 30401, June 14, 1977), and were followed by proposed test procedures for conventional ranges, cooking tops and ovens, as well as microwave ovens, which were issued on June 9, 1977 (42 FR 30627, June 16, 1977). The latter notice included a determination to delay the publication of test procedures for any other class of the type "kitchen ranges and ovens." The proposed test procedures for furnaces were issued on July 28, 1977 (42 FR 40826, August 11, 1977). By this notice, FEA is proposing test procedures for vented home heating equipment.

Section 323(a)(2) of the Act requires FEA to direct the National Bureau of Standards (NBS) to develop, for specifically named types of covered products, test procedures for the determination of the estimated annual operating costs and at least one other useful measure of energy consumption which FEA determines is likely to assist consumers in making purchasing decisions. Pursuant to the Act, FEA directed NBS to develop test procedures for FEA's use in prescribing test procedures under the Act. As part of this undertaking, NBS evaluated existing test procedures for measuring energy consumption of vented home heating equipment.

Current testing and rating requirements for vented home heating equipment are described in a number of standards, including: American National Standards Institute (ANSI) Z21.48–1976 for gas fueled gravity and fan type floor furnaces; ANSI Z21.49–1975 for gas fueled gravity and fan type vented wall furnaces; Z21.11.1–1976 for gas fueled vented room direct vent wall furnaces; Underwriters Laboratory (UL) 729–1974 for oil fueled floor furnaces; and UL 730–1974 for oil fueled wall furnaces. These standards measure the steady state efficiency of vented home heating equipment but do not account for any part load or seasonal performance effects. In order to estimate the seasonal efficiency and annual operating cost of fossil fuel vented home heating equipment, it is

necessary to account for the various heating system losses under cyclic or part load operating conditions and for the effect of combustion and draft control air on infiltration. The test procedures and calculation methods formulated by NBS and proposed herein today, account for these factors.

Under the requirements of section 32 of the Federal Energy Administration Act of 1974 (15 U.S.C. 761 et. seq.), as amended by section 9 of the Federal Energy Administration Authorization Act of 1977 (Pub. L. 95–70), the Administrator must name in the notice of rulemaking any non-governmental organization which promulgated commercial standards contained in, authorized by, or required to be used by, a proposed rule. Additionally, the Administrator must ascertain the extent to which the named organization is structured, in membership and in standards-development procedures, to allow for public participation and representation, and render a determination as to whether or not the organization achieves the degree of public participation called for by section 32 (b) of the Act.

Following recommendations made by NBS, the FEA has incorporated commercial standards promulgated by the following organizations in this proposed rulemaking: American National Standards Institute, American Society for Testing and Materials, and Underwriters Laboratory. An additional standard, American Wire Gauge, which was developed by the now defunct Brown and Sharpe Company, has also been incorporated. None of these orgaizations had memberships, at the time of the promulgation of the standards, which were sufficiently balanced as to allow effective representation of all interested persons within the meaning of section 32(b). In this regard, the Administrator has determined that these organizations do not provide for the full range of public participation that section 32(b) sets forth.

In this rulemaking, FEA is providing interested persons an opportunity to comment on the appropriateness of these standards as used in the vented home heating equipment test procedure. Comments are specifically requested on any specific changes the person commenting believes are necessary to make the standards appropriate for the purposes of testing vented home heating equipment.

Today's proposal adds to § 430.2 a definition of "vented home heating equipment" and amends the definition in § 430.2 of "Basic Model" by adding a subparagraph (15) applying specifically to vented home heating equipment. In addition, § 430.2 contains definitions promulgated or proposed previously (42 FR 15423, March 22, 1977) some of which are applicable to the test procedures for vented home heating equipment. Comments on these definitions are timely as provided below.

B. *Measures of Energy Consumption.*

The Act requires FEA to prescribe test procedures for the determination of estimated annual operating costs and at least one other useful measure of energy consumption which the Administrator determines is likely to assist consumers in making purchasing decisions. The estimated annual operating cost for vented home heating equipment in proposed § 430.22(o) is based upon the average annual energy consumption of the vented home heating equipment and the representative average unit cost of energy.

NBS has developed a method of calculating a typical annual cost of operation for vented home heating equipment which takes into account the annual fuel utilization efficiency, the heating load hours, the residence design heat loss, the auxiliary electrical energy used by circulating air fan motors, powered burner motors, and the pilot input rate if applicable.

Also proposed in § 430.22(o) are test procedures regarding the estimated annual operating cost by geographic region of the United States, since energy consumption and annual operating cost of vented home heating equipment are directly related to geographic location. Annual cost of operation by geographic location may be useful for consumers in making purchasing decisions with respect to vented home heating equipment in addition to the single national average value applicable to any specific unit under proposed § 430.22(o). Also proposed in § 430.22(o) are test procedures for calculating annual operating costs for several standardized design heating requirements for each region in order to facilitate the comparison of operating costs of different sizes of vented home heating equipment.

The proposed test procedures for regional costs will incorporate a map of the continental United States with regional "heating load hours" for adjusting the representative average use cycle (typical annual usage) of vented home heating equipment by geographic location. These regional values of "heating load hours" are based on the average number of degree days and the outdoor design temperature for each region.

An additional proposed measure of energy consumption in § 430.22(o) that is likely to assist consumers in making purchasing decisions is the fuel utilization efficiency. This efficiency is the ratio of the heater's annual output of useful energy to the annual fuel energy input of the heater multiplied by 100. The test procedures are designed to measure the fuel utilization efficiency at a part load operating condition in order to account for both on-cycle energy losses and off-cycle energy losses. Both types of losses can be influenced by the design characteristics and features of the heating equipment.

On-cycle losses include:

(1) Energy contained in the combustion gases which are discharged outdoors through the flue;

(2) The loss of heated room air used for combustion at the burner and for dilution of hot combustion gases through the integral draft diverter or barometric draft regulator.

Off-cycle losses include:

(1) The loss of heat stored in the metal of the heat exchanger when the burner and circulating warm air blower shuts off;

(2) The loss of heated room air which escapes through the open heater stack pipe to the outdoors;

(3) Fuel input to a continuously burning gas pilot.

FEA recognizes that there may be additional useful measures of energy consumption for vented home heating equipment other than the measures described above. Accordingly, today's proposal, in proposed § 430.22(o), provides for the addition of other useful measures which the Administrator determines are likely to assist consumers in making purchasing decisions. These measures, however, must be derived from the application of the uniform test methods proposed today as Appendix O to Subpart B. Vented home heating equipment manufacturers would, if required, only have to perform different computations with the data generated by the existing test methods contained in Appendix O.

C. *Laboratory Methodology.*

The proposed test procedures are based upon the heat loss method, in which the sensible and latent heat losses through the stack are determined. Since these losses will depend upon such factors as load, cycling rate, chimney height, oversizing, the type of draft control device, the infiltration characteristics of a residence and the weather profile, it is desirable to measure in the laboratory quantities which characterize the performance of a vented heater under standardized laboratory test conditions and then to calculate its performance under typical field conditions. This has the advantage of simplifying the amount of experimental laboratory data required and thereby reducing the costs of testing.

The test procedures require measurement of the steady-state performance of a vented heater in order to calculate a steady-state efficiency. For vented heaters without integral draft diverters, this is accomplished by measuring the steady-state flue gas temperature and the concentration by volume of carbon dioxide in the flue gas. For vented heaters utilizing integral draft diverters, the steady-state performance is determined by measuring the steady-state stack gas temperature and the concentration by volume of carbon dioxide in the dry stack gas. This latter method is employed because of the difficulty in accurately measuring flue gas temperatures and concentrations of carbon dioxide in units with integral draft diverters.

The test procedures account for cyclic effects by measuring flue gas temperatures during warm-up from a cold start (for gas fueled heaters) and during cool-down from steady-state operation. As noted above, actual flue gas temperature measurements on vented heaters with integral draft diverters are difficult to make. However, for purposes of accounting for transient effects, it was determined that flue gas temperatures could be measured by blocking the integral draft diverter relief opening, replacing

V42169 AUG 31 77 UMI

the 5 foot stack with a 2 foot length of pipe, and measuring the temperature and CO_2 concentration of the flue gas. The flue gas temperature profiles are determined by making two discrete flue gas temperature measurements during warm-up and three discrete measurements during cool-down. The use of discrete warm-up and cool-down temperature measurements reduces the amount of data required and greatly simplifies the process of data reduction. The times at which these discrete flue gas temperature measurements are made were chosen to minimize the errors involved in calculating the on-cycle losses.

In addition to the above mentioned tests, certain factors, which describe the flow rates through the flue and stack during the on and off-periods, are assigned according to the type of equipment under test. The factor S/F, which is the ratio of stack gas mass flow rate to flue gas mass flow rate under steady-state operation and at an average outdoor temperature of 42° F (5.56° C), is used to estimate the infiltration losses during both the on and off-cycles. By assigning values which are based upon field data, the need to simulate field conditions in the laboratory (e.g., a high chimney, a low outdoor temperature, a typical barometric draft regulator setting, etc.) is avoided. A factor D_F represents the ratio of the gas mass flow rate through the flue during the off-cycle to the gas mass flow rate through the flue during the on-cycle at identical temperatures. A similar quantity, D_S, is the ratio of the stack gas mass flow rates during the on-period to the stack gas mass flow rate during the off-period at identical temperatures. The values of D_F and D_S depend upon whether the system being tested employs a stack damper and/or a power burner. If a unit is equipped with a stack damper, its effectiveness is determined by measuring the amount of stack area which the damper blocks during the off-cycle. Vented heaters using power burners may employ an assigned power burner factor of D_P=0.30 or measure D_P directly by employing a tracer gas to determine the mass flow rate in the flue while the power burner is off.

Wherever possible the test methods recommended herein have been based upon existing consensus standards and procedures presently employed by manufacturers to evaluate the performance of vented home heating equipment. This was done to reduce the amount of duplicate testing required and to obtain a set of performance tests which would be within the capabilities of the entire home heating industry.

A step-by-step calculation procedure for determining fuel utilization efficiency based upon an average U.S. weather pattern is given in sections 4.1 and 4.2 for gas and oil fueled vented heaters. This efficiency factor is used to estimate the annual cost of operation in different climatic regions and an average operating cost for the country. The technical background, assumptions and equations which form the basis for the fuel utilization efficiency calculation and annual operating cost calculation are contained in Appendix A of the NBS test procedure review document. A worksheet is illustrated which may be used to keep track of the experimental data and the various step-by-step calculations.

Assigned values of the factors S/F, D_F and/or D_S are given in Tables 1 and 2. The factor ϕ is the fraction of combustion and draft control air which contributes to additional residential infiltration. NBS has determined this factor typically equals 0.70 for vented heaters using indoor air. The quantity $(1+\alpha)$ is the ratio of the heater's steady-state output to the design heating requirement of a typical residence and is set equal to 1.70 for the purpose of calculating a fuel utilization efficiency and an average national operating cost.

The steady-state latent and sensible heat losses and the steady-state efficiency, η_{ss}, are also calculated in section 4.1. The flue-gas and stack-gas temperature profiles, corresponding to warm-up from a cold start and cool-down from steady-state operation, are then approximated by simple exponential functions having the form

$$(ae^{-t/\tau}+b).$$

The parameters in these functions

$$\tau_{ON},\ \tau_{OFF},\ \theta_{F,0,X},\ \psi_{F,0,X},\ \psi_{F,\infty,X},\ \psi_{S,0,X},$$

and

$$\psi_{S,\infty,X}$$

are determined from the warm-up, cool-down and steady-state flue temperature measurements and are corrected for the effect of cycling to obtain the flue-gas and stack-gas temperature-vs-time profiles which would exist if the unit were operating in the field at a heating load factor equal to 22.5 percent. For units designed to use outdoor air for combustion and draft control, a further adjustment to these profiles are made using a correction factor C, to account for the fact that the air used to combustion has an average temperature of 42° F (5.56° C).

The flue-gas and stack-gas temperature-vs-time profiles are employed, along with the factors describing the on- and off-cycle air flow rates, to calculate the dynamic system losses $L_{E,on}$, $L_{E,off}$, $L_{I,on}$, and $L_{I,off}$ at the average heating load factor and the average outdoor temperature of 22.5 percent and 42° F (5.56° C), respectively. These losses, together with the latent heat loss, jacket loss on outdoor units, and the pilot light energy loss during the nonheating season, are then used to calculate an annual fuel utilization efficiency, $EFFY_A$.

D. *Representative Average Use Cycle.*

Section 323(b)(2) (42 U.S.C. 6293(b)(2)) of the Act provides that test procedures for determining estimated annual operating costs of any covered product shall be calculated from measurements of energy use in a representative average-use cycle (as determined by the Administrator) and from representative average unit costs (as provided by the Administrator) needed to operate such product during such cycle. FEA has determined that the representative average-use cycle for vented home heating equipment is 2,080 heating load hours per year. This determination is based upon an NBS recommendation to FEA. The NBS recommendation is included in the NBS test procedure review document which is available for inspection as provided for later in this notice.

The average use cycle of 2,080 heating load hours for vented heaters was derived in an analysis performed by NBS which considered outdoor temperature data extending over a 25 year period at locations in each of the 48 states in the continental United States and the District of Columbia. In addition, the number of housing units in each state using gas or oil as the primary fuel for heating as reported in the 1970 U.S. Census, was also used in the analysis.

Using the number of housing units by state as a weighting factor, and the average outdoor design temperature at each location, a national average outdoor design temperature was calculated to be 5° F. A similar computation was performed using average annual heating degree day values for each state resulting in a national average of 5,200 heating degree days. The average annual heating load hours was then calculated by multiplying the average number of degree days by 24 and dividing that result by the temperature difference between 65° F and the average outdoor design temperature; the result being 2,080 heating load hours per year.

FEA has developed representative average unit costs of energy needed to calculate the annual operating cost for the representative average use cycle. This information was provided by notice issued July 11, 1977 (42 FR 36549, July 15, 1977).

E. *Number of Units to be Tested.*

Proposed § 430.23(o) would provide for sampling of each basic model to be tested when testing of vented home heating equipment is required by the Act or by program regulations of agencies responsible for administering the Act. This provision is intended both to provide an acceptable level of assurance that test results are applicable to any entire basic model for which testing is required and to minimize the testing burden on manufacturers. FEA believes that the sampling approach proposed today will enable consumers to make meaningful comparisons of information appearing on appliance labels, and also will meet the requirements of section 323(b) of the Act that test procedures not be unduly burdensome to conduct.

Under proposed § 430.23 (o), a sample of sufficient size of each basic model would be tested to assure that, for each measure of energy consumption described in § 430.22(o), there is a 95 percent probability that the mean of the values of these measures of the sample is within 5 percent of the true mean of these measures of the basic model. The size of the sample of a particular basic model will depend upon the following factors:

(1) the level of confidence required (set at 95 percent in the proposed regulations);

(2) the maximum allowable difference between the sample mean and the mean of the basic model (expressed in the proposal as a percent of the true mean and set at 5 percent); and

(3) the relationship of the mean and standard deviation of the basic model.

The relationship of the mean and standard deviation of the basic model can be determined from data available to manufacturers. With this information and using standard statistical techniques, manufacturers can determine the number of units required to be tested. In any case, at least 1 unit of each basic model must be tested. Sample units would be selected randomly from the production stream.

Manufacturers and other interested persons are encouraged to comment on the sampling approach. Manufacturers are especially encouraged to submit any data which relates to the size of the samples which the provision would require to be tested. Comments alleging that the sampling provision is burdensome should include a full discussion of the facts upon which such allegation is based.

F. *Request for Particular Comments.*

While FEA is soliciting comments on all aspects of the proposed test procedures for vented heaters, FEA is particularly interested in receiving comments on the following subjects:

1. Other useful measures of energy consumption or data on typical consumer usage of vented home heating equipment in addition to those proposed today.

2. Definitions already promulgated or proposed in § 430.2 which may affect the testing of vented home heating equipment. Comments with respect to such definitions are timely until the close of the written record as specified below.

In addition to the definition of basic model for vented home heating equipments, the following definitions are proposed today: vented home heating equipment; vented wall furnace; vented floor furnace; vented room heater; and direct vent system.

The following definitions previously proposed in § 430.2 (41 FR 19377) are hereby withdrawn: vented gas and oil fired room heater; vented circulator; fan type vented circulator; and vented overhead heater.

G. *Comment Procedure.*

1. *Written Comment.* Interested persons are invited to participate in this rulemaking by submitting data, views or arguments with respect to the proposed test procedures for vented home heating equipment or the proposed target hearing set forth in this notice to Executive Communications, Room 3317, Federal Energy Administration, Box OQ, (proposed test procedure) or Box NU (proposed target), Washington, D.C. 20461.

Comments should be identified on the outside of the envelope and on documents submitted to FEA with the designation "Vented Home Heating Equipment—Proposed Test Procedures" or "Home Heating Equipment—Proposed Target," respectively. Fifteen copies should be submitted. Comments received by October 25, 1977, before 4:30 p.m., and all other relevant informaion, will be considered by FEA before final action is taken on the proposed test procedures.

Any information or data considered confidential by the person furnishing it must be so identified in writing, and only one copy of the information need be submitted. FEA reserves the right to determine the confidential status of the information or data and treat it according to its determination.

2. *Public Hearings.* (a) *Request procedure.* The time and place of these public hearings are indicated at the beginning of this preamble. The hearings will be continued, if necessary, on November 3, 1977.

FEA invites any person who has an interest in the proposed rulemaking issued today, or who is a representative of a group or class of persons that has an interest, to make a written request for an opportunity to make an oral presentation. Such a request should be directed to the address indicated at the beginning of this preamble and must be received before 4:30 p.m., on October 21, 1977. Such a request may be hand delivered to such address, between the hours of 8:00 a.m. and 4:30 p.m., Monday through Friday. A request should be labeled both on the document and on the envelope "Venter Home Heating Equipment—Proposed Test Procedures" or "Home Heating Equipment—Proposed Target", respectively.

The person making the request should briefly describe the interest concerned; if appropriate, state why she or he is a proper representative of a group or class of persons that has such an interest; and give a concise summary of the proposed oral presentation and a telephone number where she or he may be contacted through November 2, 1977

FEA will notify each person selected to appear at the hearing before 4:30 p.m., October 26, 1977. Each person selected to be heard must submit 50 copies of her or his statement to the address and by the date given in the beginning of this preamble. In the event any person wishing to testify cannot meet the 50 copy requirment, alternative arrangements can be made with the Office of Regulations Management in advance of the hearing by so indicating in the letter requesting an oral presentation or by calling the Office of Regulations Management at 202-254-3345.

(b) *Conduct of Hearings.* FEA reserves the right to select the persons to be heard at these hearings, to schedule their respective presentations and to establish the procedures governing the conduct of the hearings. The length of each presentation may be limited, based on the number of persons requesting to be heard.

An FEA official will be designated to preside at the hearings. These will not be judicial or evidentiary-type hearings. Questions may be asked only by those conducting the hearings, and there will be no cross-examination of persons presenting statements. Any decision made by FEA with respect to the subject matter of the hearings will be based on all information available to FEA. At the conclusion of all initial oral statements at each hearing, each person who has made an oral statement will be given the opportunity if she or he so desires, to make a rebuttal statement. The rebuttal statements will be given in the order in which the initial statements were made and will be subject to time limitations.

Any interested person may submit questions to be asked of any person making a statement at the hearings to Executive Communications, FEA, before 4:30 p.m., October 25, 1977. FEA will determine whether the question is relevant, and whether the time limitations permit it to be presented for answer.

Any person who makes an oral statement and who wishes to ask a question at the hearings may submit the question, in writing, to the presiding officer. The presiding officer, will determine whether the question is relevant, and whether the time limitations permit it to be presented for answer.

Any further procedural rules needed for the proper conduct of the hearings will be announced by the presiding officer.

A transcript of each hearing will be made and the entire record of each hearing, including the transcript, will be retained by FEA and made available for inspection at the FEA Freedom of Information Office, Room 2107, Federal Building, 12th and Pennsylvania Avenue NW., Washington, D.C., between the hours of 8:00 a.m. and 4:30 p.m., Monday through Friday. Any person may purchase a copy of the transcript from the reporter. A copy of NBS's recommendations concerning test procedures for vented home heating equipment, and technical and economic papers relating to the proposed efficiency improvement target will be made available for inspection at the FEA Freedom of Information Office.

H. *Environmental and Inflationary Review.*

As required by section 7(c)(2) of the Federal Energy Administration Act of 1974 (Pub. L. 93-275), a copy of this notice has been submitted to the Administrator of the Environmental Protection Agency for his comments concerning the impact of this proposal on the quality of the environment. The Administrator has no comments.

The National Environmental Policy Act of 1969 requires FEA to assess the environmental impacts of any proposal by the Agency for "major Federal actions significantly affecting the quality of the human environment." Since test procedures under the conservation program for appliances will be used only to standardize the measurement of energy usage and will not affect the quantity or distribution of energy usage, FEA has determined that the action of prescribing test procedures, by itself, will not result in any environmental impacts. On this basis, FEA has determined that, with

V 42 169 AUG 31 77 UMI

respect to prescribing test procedures under the conservation program for appliances, no environmental impact statement is required.

The proposal has been reviewed in accordance with Executive Order 11821 as amended by Executive Order 11949, and OMB Circular No. A-107 and has been determined not to be a major proposal requiring evaluation of its economic impact as provided for therein.

(Energy Policy and Conservation Act, Pub. L. 94-163, as amended by Pub. L. 94-385; Federal Energy Administration Act of 1974, Pub. L. 93-275, as amended by Pub. L. 94-385; E.O. 11790, 39 FR 23185.)

In consideration of the foregoing, it is proposed to amend Chapter II of Title 10, Code of Federal Regulations, as set forth below.

Issued in Washington, D.C., August 22, 1977.

ERIC J. FYGI,
Acting General Counsel,
Federal Energy Administration.

1. Section 430.2 is amended by adding a subparagraph (15) as part of the definition of "basic model" and by adding the definitions of "vented home heating equipment," "vented wall furnace," "vented floor furnace," "vented room heater" and, "direct vent system," to read as follows:

§ 430.2 Definitions.

* * * * *

"Basic model" means all units of a given type of covered product manufactured by one manufacturer and:

* * * * *

(15) With respect to furnaces, having the same primary energy source and essentially identical functional physical and electric characteristics.

* * * * *

"Vented home heating equipment" or "vented heater" means a class of home heating equipment, not including furnaces, designed to furnish warmed air to the living space of a residence, directly from the device without duct connections (except that boots not to exceed 10 inches beyond the casing may be permitted) and includes: vented wall furnace, vented floor furnace, and vented room heater.

"Vented wall furnace" means a self-contained vented heater complete with grilles or the equivalent, designed for incorporation in or permanent attachment to the structure of a residence and furnishing heated air circulated by gravity or by a fan directly into the space to be heated through openings in a casing.

"Vented floor furnace" means a self-contained vented heater suspended from the floor of the space being heated, taking air for combustion from outside this space. The vented floor furnace supplies heated air circulated by gravity or by a fan directly into the space to be heated through openings in the casing.

"Vented room heater" means a self-contained, free standing, nonrecessed, vented heater for furnishing warmed air to the space in which it is installed. The vented room heater supplies heated air circulated by gravity or by a fan directly into the space to be heated through openings in the casing without duct connections.

"Direct vent system" means a system consisting of a vented heater and combustion air and flue gas connections between the vented heater and the outside atmosphere, and constructed so that all air for combustion is obtained from the outside atmosphere and all flue gases are discharged to the outside atmosphere.

2. Section 430.22 is amended by adding paragraph (o), to read as follows:

§ 430.22 Test Procedures for Measures of Energy Consumption.

* * * * *

(o) *Vented home heating equipment.* (1) The estimated annual operating cost for vented home heating equipment shall be the sum of: (i) the product of the average annual fuel energy consumption in Btu's per year, determined according to 4.7 of Appendix O of this subpart, and the representative average unit cost in dollars per Btu for gas or oil, as appropriate as provided by the Administrator plus (ii) the product of the average annual auxiliary electric energy consumption in kilowatt-hours per year, determined according to 4.8 of Appendix O of this subpart, and the representative average unit cost in dollars per kilowatt-hour as provided by the Administrator, the resulting sum then being rounded off to the nearest dollar per year.

(2) The annual fuel utilization efficiency for vented home heating equipment, expressed in percent, shall be the ratio of annual output of useful energy delivered to the heated space to the annual fuel energy input to the vented heater determined according to 4.1.33 of Appendix O of this subpart.

(3) The estimated regional annual operating costs for vented home heating equipment computed for minimum and maximum standardized design heating requirements shall be the sum of: (i) the product of the regional annual fuel energy consumption for the minimum or maximum standardized design heating requirement, as appropriate, in Btu's per year for gas or oil vented heaters determined according to 4.16 or 4.17 of Appendix O of this subpart, and the representative average unit cost in dollars per Btu for gas or oil, as appropriate, as provided by the Administrator plus (B) the product of the regional annual auxiliary electrical energy consumption in kilowatt-hours per year determined according to 4.18 or 4.19, as appropriate, of Appendix O of this subpart, and the representative average unit cost in dollars per kilowatt-hour as provided by the Administrator, the resulting sum then being rounded off to the nearest dollar per year.

(4) The estimated regional annual operating cost for vented home heating equipment shall be the sum of: (i) the product of the regional annual fuel energy consumption in Btu's per year determined according to 4.10 of Appendix O of this subpart, and the representative average unit cost in dollars per Btu for gas or oil, as appropriate, as provided by the Administrator plus (ii) the product of the regional auxiliary electrical energy consumption in kilowatt-hours per year, determined according to 4.11 of Appendix O of this subpart, and the representative average unit cost in dollars per kilowatt-hour as provided by the Administrator, the resulting sum then being rounded off to the nearest dollar per year.

(5) Other useful measures of energy consumption for vented home heating equipment shall be those measures of energy consumption which the Administrator determines are likely to assist consumers in making purchasing decisions and which are derived from the application of Appendix O of this subpart.

3. Section 430.23 is amended by adding a paragraph (o) to read as follows:

§ 430.23 Units to be tested.

* * * * *

(o) *Vented home heating equipment.* (1) When testing of vented home heating equipment is required for a measure or measures of energy consumption described in § 430.22(o) of this subpart, a sample of sufficient size of each basic model shall be tested to ensure that, for each such measure of energy consumption, there is a 95 percent probability that the mean of the sample is within 5 percent of the true mean of such measures of the basic model, except that a minimum of 1 unit of each basic model shall be tested.

(2) The sample selected for paragraph (o)(1) of this section shall be a simple random sample drawn from the production stream of the basic model being tested.

(3) A basic model having dual voltage ratings shall be separately tested at each design voltage such that the requirements of paragraph (o)(1) of this section is satisfied at each rating.

* * * * *

APPENDIX O—UNIFORM TEST METHOD FOR MEASURING THE ENERGY CONSUMPTION OF VENTED HOME HEATING EQUIPMENT

1.0 DEFINITIONS.

1.1 "Steady-state conditions for vented home heating equipment" means equilibrium conditions in the flue or stack gas as indicated by temperature changes of not more than plus or minus 5° F (2.8° C) in three successive temperature readings taken 15 minutes apart.

1.2 "Flue gases" means reaction products resulting from the combustion of a fuel with the oxygen of the air, including the inerts and any excess air.

1.3 "Excess air" means air which passes through the combustion chamber and the vented heater flues in excess of that which is theoretically required for complete combustion.

1.4 "Flue" means a conduit between the flue outlet of a vented heater through which the flue gases pass prior to the point of draft relief.

1.5 "Flue outlet" means the opening provided in a vented heater for the exhaust of the flue gases from the combustion chamber.

1.6 "Flue losses" means the sum of sensible and latent heat losses above room temperature (70° F) of the flue gasses leaving a vented heater.

1.7 "Stack" means the portion of the exhaust system downstream of the barometric draft regulator or integral draft diverter.

1.8 "Stack gases" means the flue gases combined with dilution air that enters at the barometric draft regulator or integral draft diverter.

1.9 "Barometric draft regulator" means a mechanical device designed to maintain a constant draft in a vented heater.

1.10 "Air shutter" means an adjustable device for varying the size of the primary air inlet(s) to the combustion chamber.

1.11 "Power burner" means a burner which supplies either gas or air or both at pressures exceeding, for gas, the line pressure, and for air, atmospheric pressure, or a burner which depends on the draft induced by a fan for proper operation.

1.12 "Vent limiter" means a device which limits the flow of air from the atmospheric diaphragm chamber of a gas pressure regulator to the atmosphere. A vent limiter may be a limiting orifice or other limiting device.

1.13 "Exhaust air intake terminal" means a device which is located on the outside of a building and is connected to a vented heater by a system of vents. It is composed of an air intake terminal through which the air for combustion is taken from the outside atmosphere, and a vent terminal from which flue gases are discharged.

1.14 "Induced draft" means a method of drawing air into the combustion chamber by mechanical means.

1.15 "Plenum" means an air compartment, that is attached to, or is an integral part of, a vented heater and which is designed to either distribute the heated air after it leaves the heat exchanger in the case of a supply plenum, or collects the air which enters the return inlet in the case of a return plenum.

1.16 "Heat input" (Q_{in}) means the rate of energy supplied in a fuel to a vented heater, operating under steady state conditions, expressed in Btu's per hour. It includes any input energy to the pilot light and is obtained by multiplying the measured rate of fuel consumption by the measured higher heating value of the fuel.

1.17 "Higher heating value" (HHV) means the heat produced per unit of fuel when complete combustion takes place at constant pressure and the products of combustion are cooled to the initial temperature of the fuel and air and the water vapor formed during combustion is condensed. The higher heating value is usually expressed in Btu's per cubic foot for gaseous fuel, or Btu's per gallon for liquid fuel.

1.18 "Integral draft diverter" means a device which is an integral part of a vented heater, which is designed to (1) provide for the exhaust of the products of combustion in the event of no draft, back draft, or stoppage beyond the draft diverter, (2) prevent a back draft from entering the vented heater, (3) neutralize the effect of stack action of the chimney or gas vent upon the operation of a vent heater.

1.19 "Vent damper" means a device intended for installation in the exhaust system of a vented heater, and which is designed to open the exhaust system when the vented heater is in operation and to close off the exhaust system when the vented heater is in a stand-by condition.

1.20 "Vent pipe" means passages and conduits in a direct vent system through which gases pass from the combustion chamber to the outdoor air.

1.21 "Infiltration parameter" means that portion of unconditioned outside air drawn into the heated space as a consequence of loss of conditioned air through the exhaust system of a vented heater.

1.22 "Vaporizing type oil burner" means a device consisting of an oil vaporizing bowl or other receptacle into which liquid fuel oil may be fed in controllable quantities, the heat of combustion being used to vaporize the fuel, with provision for admitting air and mixing it with the oil vapor in combustible proportions.

1.23 "Air tube" means a tube which carries combustion air from the fan to the burner nozzle, for combustion.

2.0 TESTING CONDITIONS.

2.1 *Installation of Test Unit.*

2.1.1 Vented Wall Furnaces (including direct vent systems). Gas fueled vented wall furnaces shall be installed for test as specified in Sections 2.1.3 and 2.1.4 of ANSI Z21.49-1975. Gas fueled wall furnaces with direct vent systems shall be installed for test as described in 2.1.2 and 2.1.4 of ANSI Z21.44-1973. Oil fueled vented wall furnaces shall be installed as specified in UL-730-1974, Section 33. Oil fueled vented wall furnaces with direct vent systems shall be installed as specified in UL-730-1974, section 34.

2.1.2 Vented Floor Furnaces. Vented floor furnaces shall be installed for test as specified in Sections 35.1 through 35.5 of UL standard 729-1974.

2.1.3 Vented Room Heaters. Installation shall be made in accordance with manufacturer's instructions.

2.2 *Flue and Stack Requirements.*

2.2.1 Gas fueled vented home heating equipment employing integral draft diverters.

For the steady state performance test described below, gas fueled vented home heating equipment employing integral draft diverters with vertically discharging outlets shall have attached to and vertically above the outlet, a stack having a diameter the same size as the outlet and shall be covered with insulation having an R value of not less than 7 (°F-HR-FU/Btu) and an outer layer of aluminum foil. The stack shall extend not less than 5 feet nor more than five feet six inches above the highest point of the outlet. Vented heaters having a horizontally discharging outlet shall have attached to an insulated 90 degree elbow, the same size as the outlet, and sufficient vertical insulated black iron pipe so that the pipe outlet is not less than five feet nor more than five feet six inches above the highest point of the heater outlet. A horizontal section of pipe may be used on the floor furnace between the diverter and the elbow if necessary to clear any framing used in the installation. The length of this section of pipe shall be the minimum needed. The stack and elbow shall be covered with insulation having an R value of not less than 7 (°F-HR-Ft²/Btu) and an outer layer of aluminum foil.

The tests for measuring flue gas temperatures during warmup and cooldown, and for the steady state test of section 3.1.1.3, shall be conducted by replacing the five to five feet six inch pipe of the previous paragraph with a two foot vertical pipe. The pipe shall be covered with insulation having an R value of not less than 7 (°F-HR-Ft²/Btu) and an outer layer of aluminum foil.

2.2.2 Gas fueled vented home heating equipment which does not employ integral draft diverters. Gas fueled vented home heating equipment which does not employ integral draft diverters shall have a two foot long insulated pipe attached to the vertically discharging flue outlet for the steady state test and the tests to measure flue temperatures during warm-up and cool-down. For units having a horizontally discharging outlet, an elbow and a two foot long vertical insulated pipe shall be attached to the outlet. All insulation shall have an R value not less than 7 (°F-HR-FT²/Btu) and an outer layer of aluminum foil.

2.2.3 Oil Fueled Vented Home Heating Equipment. Flue connections for oil fueled vented floor furnaces shall be specified in Section 35 of UL-729-1974, Section 34.10 through 34.18 of UL-730-1974 for oil fueled vented wall furnaces and Sections 36.2 and 36.3 of UL-896-1973 for vented room heaters.

There shall be no opening on the oil heater between the heater and the point where the flue gas sample is to be taken or the flue gas temperature is to be measured. If a barometric draft regulator is incorporated in the heater, it shall be sealed during all tests.

2.2.4 Direct Vent Systems. The exhaust/air intake system supplied by the manufacturer shall be in place during all tests. A vented heater employing a direct vent system shall not be connected to a chimney or induced draft source, but shall depend for venting of the gas solely on the provision for venting incorporated in the heater and the exhaust/air intake system supplied with it. On units which are not designed to preheat the incoming air, the first 18 inches of vent pipe downstream of the heater outlet shall be insulated with a layer of insulation having an R value of 7 (°F-HR-FT²/Btu) and the insulation material covered by a layer of aluminum foil.

2.3 *Fuel Supply.*

2.3.1 Natural Gas. For a vented heater utilizing natural gas, maintain the gas supply to the unit under test at a normal inlet test pressure immediately ahead of all controls at 7 to 10 inches water column. The regulator outlet pressure at normal test pressure shall be approximately that recommended by the manufacturer. Use natural gas having a specific gravity of approximately 0.6 and a higher heating value within ±5% of 1025 Btu per standard cubic foot. Determine the actual higher heating value in Btu's per standard cubic foot for the natural gas to be used in the test with an error no greater than one percent.

2.3.2 Propane Gas. For a vented heater utilizing propane gas, maintain the gas supply to the unit under test at a normal inlet pressure of 11 to 13 inches water column and a specific gravity of 1.55. The regulator outlet pressure at normal test pressure shall be approximately that recommended by the manufacturer. Use propane having a specific gravity of approximately 1.55 and a higher heating value within ±5% of 2500 Btu's per standard cubic foot. Determine the actual higher heating value in Btu's per standard cubic foot for the propane to be used in the test with an error no greater than one percent.

2.3.3 Other Test Gas. The characteristics of other test gases shall be maintained as described in Section 2.2, Table VII, of ANSI Standard Z21.11.1-1974. Their measured higher heating value shall be within ±5% of the values specified in the above ANSI standard.

2.3.4 Oil Supply. For a vented heater utilizing fuel oil, the fuel oil type used shall be No. 1 fuel oil for vaporizing type burners and as specified by the manufacturer for mechanical atomizing type burners. The No. 1 fuel oil viscosity shall be as specified in UL-730-1974, Section 36.9. The specification of other fuel oils shall be as defined in ANSI Z11.203-1970.

The higher heating value of the test fuel oil shall be measured with an error no greater than one percent.

2.3.5 Electrical Supply. For an auxiliary electric component of a vented heater, maintain the electrical supply to the test unit within one percent of the nameplate voltage for the entire portion of the test cycle. If a voltage range is used for nameplate voltage, maintain the electrical supply within one percent of the center of the nameplate voltage range.

2.4 *Burner Adjustments.*

2.4.1 Gas Burner Adjustments. Burners of gas fueled vented heaters shall be adjusted to their maximum Btu ratings at normal test pressure. All such adjustments shall be within ±2 percent of the hourly Btu rating specified by the manufacturer as measured after 15 minutes of operation starting with all parts of the furnace at room temperature. The primary air shutters shall be set for proper combustion, or as determined by manufacturer's recommendation, and the burner input flow rate shall be corrected to standard conditions of 60° F and 30 inches mercury barometric pressure.

If a vent limiting means is provided on a gas pressure regulator, it shall be in place during all tests.

2.4.2 Oil Burner Adjustments. The burners of oil fueled vented heaters shall be adjusted to give the best CO_2 reading and a hourly Btu input, during the steady-state performance test described below, which is within plus or minus 2 percent of the heater manufacturer's specified normal hourly Btu input rating. Smoke in the flue shall not exceed a No. 2 smoke during the steady-state performance test as measured by the procedure in ANSI Standard Z11.182-1965 (R1971) (ASTM D 2156-65 (1970)). The averge draft over the fire and in the flue during the steady-state performance test shall be that recommended by the manufacturer and draft fluctuations shall not exceed 0.005 inches of water gauge. No additional adjustments to the burner shall be made during the required series of performance tests. The instruments and measuring apparatus for this test are described in Section 6.3 of ANSI Standard Z91.1-1972.

2.5 *Circulating Air Adjustments.*

2.5.1 Forced Air Vented Wall Furnaces (including direct vent systems). During tests the air flow through the heater shall be as specified by the manufacturer and the heater shall be operated with the outlet air temperature between 80°F and 130°F above room temperature. If adjustable air discharge registers are provided, they shall be adjusted so as to provide the maximum possible air restriction. Air discharge temperature shall be measured as specified in Section 2.14 of ANSI Z21.49-1975.

2.5.2 Fan Type Vented Room Heaters and Floor Furnaces. During tests on fan type furnaces and heaters, the air flow through the heater shall be as specified by the manufacturer.

2.6 *Thermocouple Installation.*

2.6.1 Gas Fueled Vented Home Heating Equipment (not including direct vent systems). For units employing an integral draft diverter, install nine thermocouples in a horizontal plane in the five foot length stack at 4 feet 6 inches above the highest point of the heater outlet.

Install one thermocouple in the center of the stack. Install eight thermocouples along imaginary lines intersecting at right angles in this horizontal plane at points one third and two thirds of the distance between the center of the stack and the stack wall.

For those tests requiring a 2 foot length of pipe install one thermocouple in the center of the 2 foot length of insulated flue pipe at the midpoint (i.e., one foot of from the end).

For units which do not employ an integral draft diverter, install nine thermocouples in a horizontal plane 12 inches from the outlet of the 2 foot length of insulated pipe. Install one thermocouple in the center of the pipe and eight thermocouples along imaginary lines intersecting at right angles in this horizontal plane at points one third and two thirds of the distance between the center of the pipe and the pipe wall.

"Use bead-type thermocouples having wire size not greater than No. 24 American Wire Gauge (AWG).

Thermocouples whall be installed for measuring conditioned warm air in the numbers and locations decribed in ANSI Z21.49-1975, section 2.14. The temperature of the inlet air shall be established by means of a single No. 24 AWG bead-type thermocouple, suitably shielded from direct radiation and located in the center for the plane of each inlet air opening.

2.6.2 Oil Fueled Vented Home Heating Equipment (not including direct vent systems). Thermocouples shall be installed as described in Section 37.16 of UL 896 "Oil Burning Stoves" for vented room heaters or Section 36.11 of UL 729 for oil fueled vented floor furnaces, or 35.11 or UL 73 for oil fueled vented wall furnaces.

2.6.3 Vented Wall Furnaces with Direct Vent Systems. For vented heaters that are designed to preheat combustion air, install nine thermocouples along two imaginary lines intersecting at right angles inside the vent pipe in a plane parallel to and one inch (25.4mm) from the outlet of the vent pipe. The lines shall be oriented so that they will divide the internal area into quadrants. One thermocouple shall be located at the intersection of the two lines. Eight thermocouples shall be located in sets of two along each line at points one third and two thirds of the distances from the intersection to the periphery. Use beadtype thermocouples not larger than 24 AWG, at the specified locations.

For units not designed to preheat combustion air, locate the nine thermocouples in a plane one foot from the outlet of the heater and in the configuration described above.

2.7 *Combustion Measurement Instrumentation.* The samples of stack and flue gases for vented heaters shall be analyzed to determine the concentration by volume of carbon dioxide present in the dry gas with instrumentation which will result in a reading having an accuracy of ±3 percent.

2.8 *Energy Flow Instrumentation.* Install one or more energy flow instruments to measure the quantity of gas flow or fuel oil supplied to the vented heater, and electrical energy, if appropriate, with an error no greater than one percent.

2.9 *Room Ambient Temperature.* Maintain the test room at an ambient air temperature between 65°F and 75°F. Use the procedure outlined in section 2.1.14 of ANSI Standard Z21.47-1973 to measure room temperature.

2.10 *Equipment Used to Measure Mass Flow Rate in Flue and Stack.* The tracer gas chosen for this task should have a density which is approximately equal to the density of air. It shall be of different chemical species or different concentration from the flue or stack gas to be measured and shall be unreactive with the environment to be encountered. Instrumentation used to measure the concentration of tracer gas may be either the batch or continuous type with an accuracy of ±2% of the value of the concentration measured.

3.0 TESTING AND MEASUREMENTS.

3.1 *Steady-State Testing*

V 42 169 AUG 31 77 UMI

3.1.1 Gas Fueled Vented Home Heating Equipment (not included direct vent systems).

3.1.1.1 Stack Gas Temperature and CO_2 Measurements. The vented heater shall be set up as specified in sections 2.1, 2.2, and 2.3. Begin the steady-state performance test by operating the burner and the circulating air blower with the adjustments specified in 2.4 and 2.5 until a steady-state temperature is attained in the stack gas as measured by the center thermocouple located in the 5 foot stack as specified in 2.6.1 for units employing integral draft diverters.

On units employing integral draft diverters, record the steady-state stack gas temperature ($T_{v,ss}$). Measure a sample of dry stack gasses for CO_2 ($Xco_{2,s}$) in the plane of measurement used for measuring flue gas temperature in accordance with ANSI Z21.48 1976, section 2.1.2., Z21-49-1975 section 2.1.2., Z21-11-1976 section 2.8, and Z21-44-1973 section 2.1.1. Measure heat input rate (Q_{in}) including the pilot input and the electrical power input at steady-state conditions and record.

The steady-state heat input rate (Q_{in}) including pilot gas shall be determined by multiplying the measured higher heating value of the test gas by the steady-state gas input rate corrected to standard conditions of 60° F and 30 inches of mercury. Measure gas input temperature and pressure at the meter and the barometric pressure. Correct the metered gas flow rate to standard conditions of 60° F and 30 inches mercury.

Measure the steady-state electric power to the circulating air blower (BE) and to the power burner (PE) on units so equipped and record the data.

3.1.1.2 Flue Gas Temperature and CO_2 Measurements. After the above test measurements have been completed on units employing integral draft diverters, the 5 to 5½ foot long black iron pipe used in the steady state test shall be removed, the draft diverter relief opening shall be blocked and a 2 foot length of pipe installed as described in section 2.2.1. A single bead-type thermocouple not larger than No. 24 AWG shall be located in the center of the flue pipe and 12 inches from its top. After equilibrium conditions are again achieved, as indicated by changes in the flue gas temperature of not more than 5° F (2.8° C) between readings 15 minutes apart, the steady-state flue gas temperature ($T_{F,ss}$) shall be measured using this single thermocouple and a sample of the flue gases shall be taken in the same plane of measurement. The sample of the flue gases shall be analyzed to determine the concentration by volume of CO_2 ($Xco_{2,F}$) present in the dry flue gas.

On units not employing an integral draft diverter, the steady-state flue gas temperature shall be measured in the 2 foot long flue pipe as described in Section 2.6 and a sample of the flue gas shall be taken in the plane of measurement. The sample of flue gases shall be analyzed to determine the concentration of CO_2 ($Xco_{2,F}$), present in the dry flue gas.

3.1.2 Vented Wall Furnaces with Direct Vent Systems. The vented heater shall be set up and adjusted as specified in sections 2.1, 2.2.4, 2.3, 2.4, 2.5 and 2.6. Flue temperature ($T_{F,ss}$) and CO_2 ($Xco_{2,F}$) measurements shall be performed at steady-state conditions as prescribed in 3.1.1. with the following exception:

Temperature measurements shall be made at a location which is determined by the design provisions of the vented heater for preheating the incoming air as prescribed in section 2.6.3 for thermocouple location.

3.1.3 Oil Fueled Vented Home Heating Equipment (not including direct vent systems). The vented heater shall be set up and adjusted as specified in sections 2.1, 2.2.3 and 2.3.4. Begin the steady-state performance test by operating the burner and the circulating air blower with the adjustments specified by 2.4.2 and 2.5.1. When steady-state temperature ($T_{F,ss}$) is attained in the flue gas, measure the average flue gas temperature and measure CO_2 ($Xco_{2,F}$) in a sample of the flue gas at the location described in figure 37.4 of UL Std. 896. There shall be no opening between the heater and the point where the flue gas sample is to be measured. If a barometric draft regulator is incorporated in the heater, it shall be sealed during all tests.

Measure and record the steady-state heat input rate (Q_{in}). Measure steady-state electrical power to the air blower (BE) and to the power burner (PE) and record these data.

3.2 *Flue Temperature Measurements—Cool Down Test.*

3.2.1 Vented Home Heating Equipment (not including direct vent systems). After steady-state testing is completed, all units shall have the main burner turned off and the flue gas temperature measured at 1.5 ($T_{F,OFF(t_1)}$) and 9.0 ($T_{F,OFF(t_2)}$) minutes after the burner shuts off. Units employing stack dampers shall have the damper control by-passed so that the damper remains open during the cool down test. During this off-period the indoor air circulating blower shall be made to operate during the first three minutes of the off period and shall then be turned off unless the vented heater employs a single motor to drive a power burner and an indoor air circulating blower in which case both shall be turned off together. The main burner(s) shall remain off until equilibrium conditions are attained, as indicated by temperature changes in the flue gas of not more than 3°F (2.8°C) between readings 15 minutes apart. For units employing a continuously burning pilot light, a third flue gas temperature measurement shall then be made to determine the off-period minimum flue gas temperature ($T_{F,OFF(\infty)}$). For units not employing a continuously burning pilot light, $T_{F,OFF(\infty)}$ is assumed to equal 70° F (21.1° C). During this cool down test, the energy input rate to the pilot light (Q_p), if the unit is so equipped, shall also be measured to within an accuracy of ±3%. Record all measured values.

3.2.2 Vented Home Heating Equipment with Direct Vent Systems. After steady-state testing has been completed, turn the main burner off and measure the flue gas temperature at 1.5 ($T_{F,OFF(t_1)}$) and 9.0 ($T_{F,OFF(t_2)}$) minutes after the burner is shut off using nine bead-type thermocouples, not larger than 24 AWG, in the locations prescribed in section 2.6.3. During this off-period, the indoor air circulating blower shall be made to operate during the first 3 minutes of the off-period and shall then be shut off unless the vented heater employs a single motor to drive a power burner and an indoor air circulating blower, in which case both shall be turned off. The main burner(s) shall remain off until equilibrium conditions are attained, as indicated by changes in the flue gas temperature of not more than 3°F (2.8°C) between readings 15 minutes apart. For units employing a continuously burning pilot light, a third flue gas temperature measurement shall then be made to determine the off-period minimum flue gas temperature ($T_{F,OFF(\infty)}$). For units not employing a continuously burning pilot light $T_{F,OFF(\infty)}$ is assumed to equal 70° F (21.1° C). During this cool down test, the energy input rate to the pilot light (Q_p), if the unit is so equipped, shall also be measured to within an accuracy of ±3%. Record all measured values. If a vented heater with a direct vent system employs an automatic stack damper, it shall be closed during this cool down test.

3.3 *Flue Gas Temperature Measurements Heat Up Test for Vented Home Heating Equipment.* After equilibrium conditions are achieved following the cooldown test and the required measurements performed, the vented heater shall be turned on and the flue gas temperature measured at the locations specified in section 3.2 of this Appendix, at 0.5 ($T_{F,ON(t_1)}$) and 2.5 ($T_{F,ON(t_2)}$) minutes after the main burner(s) comes on. The indoor air circulating fan shall remain off during the first 1.5 minutes of this warm up test and shall then be turned on unless the vented heater employs a single motor to drive a power burner and an indoor air circulating blower, in which case both shall be started together. Record the measured temperatures. Vaporizing type oil burners need not have this test performed.

3.4 *Jacket Loss Measurement.* A jacket loss test is specified only for vented floor furnaces. Measure the jacket loss (L_J) in accordance with the ANSI standard Z21.48-1976 Section 2.12, and record the total jacket loss and the ambient room temperature during the test.

3.5 *Measurement for Determining Effectiveness of Automatic Stack Damper.* The effectiveness of an automatic stack damper (D_F), in vented heaters so equipped shall be determined by measuring the cross sectional area of the stack (A_S), the net area of the damper plate (A_D) (the area of the damper plate minus the area of any holes in the plate), and the angle Ω which is the angle the damper plate makes when closed with a plane perpendicular to the axis of the stack. The equation in section 4.2 is then employed to calculate D_F.

3.6 *Measurement for Determining D_F for Systems Equipped with Power Burners.* On power burner systems not employing automatic stack dampers or power burner systems with a stack damper and an integral draft diverter, the flue gas temperature during the off-period ($T_{F,OFF}$) may be measured during the cool-down test described in section 3.2. The procedures to be used for measuring ($T_{F,OFF}$) are described below.

On systems equipped with both power burners and stack dampers, and not employing an integral draft diverter, D_F (the ratio of the rate of flue gas mass flow through the vented heater during the off-period to the rate of flue gas mass flow through the vented heater during the on-period) shall be measured during a separate cool-down test. This separate cool-down test shall be conducted after the warm-up test described in Section 3.3 for determining the on-period flue gas temperature. It shall be conducted by letting the unit run after the warm-up test is completed until steady-state conditions are reached, as indicated by temperature changes in the flue gas or not more than plus or minus 5° F (2.8° C) between readings 15 minutes apart, and then shutting the unit off with the stack damper controls by-passed or adjusted so that the stack damper remains open during the resulting cool-down period. If a draft was maintained in the flue during the steady state performance test described in Section 3.1 the same draft (within ±0.01 inches of water gauge of the average value measure during the steady-state tests) shall be maintained during this cool-down period.

The flue gas mass flow rate during the off-period ($m_{F,OFF}$) may be measured at a specific off-period flue gas temperature and then corrected to obtain its value at a flue gas temperature at steady-state ($T_{F,SS}$), using the procedure described below.

Within one minute after the unit is shut off to start the cool down test for determining D_F, begin feeding a tracer gas into the combustion chamber at a constant flow rate of $\dot{V}_T$, and at a point which will allow for the best possible mixing with the air flowing through the chamber. On units equipped with an oil fueled power burner, the best location for injecting this tracer gas is through a hole drilled in the air tube. The value of $\dot{V}_T$ shall be periodically measured with an instantaneously reading flow meter having an accuracy of ±3 percent of the quantity measured and shall be less than 1 percent of the air flow rate through the vented heater. If a combustible tracer gas is used, there should be a delay period between the time the unit is shut off and the time the tracer gas is first injected to prevent ignition of the tracer gas.

Between 5 and 6 minutes after the unit is shut off to start the cool-down test, the percent volumetric concentration of tracer gas, C_T, in the flue gas and the flue gas temperature, $T_{F,OFF}$, shall be measured in the center of the flue pipe on the vented heater side of the draft regulator and not more than 12 inches from the heater flue-gas outlet. In addition, the barometric pressure, P_S, shall also be determined. A single bead-type thermocouple, not larger than No. 24 AWG, shall be used to make the temperature measurement. The concentration of tracer gas shall be obtained using an instrument which will result in an accuracy of ±2 percent in the value of C_T measured and may be either a batch or continuous reading type instrument. If the sampling arrangement for the instrument results in a delay time between the drawing of a sample and its analysis, this delay should be taken into account so that the temperature measurement and the measurement of tracer gas concentration coincide.

The rate of the flue gas mass flow through the vented heater and the factors D_F, D_S, and D_S are calculated by the equations in sections 4.3.1, 4.3.2 and 4.3.3 of this Appendix.

4.0 CALCULATION OF DERIVED RESULTS FROM TEST MEASUREMENTS.

4.1 *Annual Fuel Utilization Efficiency for Gas or Oil Vented Home Heating Equipment.* The following calculations are to be performed to determine the annual fuel utilization efficiency of gas or oil vented home heating equipment. Figure 10 provides an illustration of a worksheet which may be used to tabulate the results of test measurements and calculations.

4.1.1 System number. Determine the system number for the type of vented heater being tested in accordance with Table 1 or 2.

4.1.2 Ratio of combustion air mass flow rate to stoichiometric air mass flow rate. Determine the ratio of combustion air mass flow rate to stoichiometric air, mass flow rate, $R_{T,F}$, from Figure 1 for the test fuel, by using the value of dry flue gas CO_2 concentration, $Xco_{2,F}$, determined in accordance with section 3.1 of this Appendix.

4.1.3 Ratio of combustion and relief air mass flow rate to stoichiometric air mass flow rate. For systems 1, 2, 5, or 6, employing an integral draft diverter, determine the ratio of the sum of combustion and relief air mass flow rate to stoichiometric air mass flow rate $R_{T,S}$, from Figure 1 for the type of test fuel, by using the value of dry stack gas CO_2 concentration, $Xco_{2,S}$, determined in accordance with section 3.1 of this Appendix.

4.1.4 Average sensible heat loss at full-load steady state operation. For systems 1, 2, 5, or, 6, employing an integral draft diverter, determine the average sensible heat loss at full-load steady-state operation, $L_{S,SS,A}$, expressed as a percent, from Figure 2 using the value of $R_{T,S}$ determined in 4.1.3, the type of test fuel, and $\Delta T_{S,SS}$, where

$$\Delta T_{S,SS} = T_{S,SS,X} - 70,$$

where

$T_{S,SS,X}$ = measured stack gas temperature at full-load steady-state operation determined in accordance with section 3.1 of this Appendix, in degrees Fahrenheit.

70 = assumed indoor average conditioned air temperature, in degrees Fahrenheit

For systems 3, 4, or, 7 through 12, determine the average sensible heat loss at full-load steady-state operation, $L_{S,SS,A}$, expressed as a percent; from Figure 2 using the value of $R_{T,F}$ determined in 4.1.2, the type of test fuel, and $\Delta T_{S,SS}$, where

$$\Delta T_{F,SS} = T_{F,SS} - 70$$

where

$T_{F,SS}$ = flue gas temperature at full-load steady-state operation determined in accordance with section 3.1 of this Appendix, in degrees Fahrenheit.

70 = as defined above

4.1.5 Steady-state efficiency. Calculate the steady-state efficiency (excluding jacket loss), η_{SS}, expressed in percent and defined as

$$\eta_{SS} = 100 - L_{L,A} - L_{S,SS,A}$$

where

$L_{L,A}$ = average latent heat loss of the test fuel determined in accordance with Table 3, in percent.

$L_{S,SS,A}$ = as defined in 4.1.4.

4.1.6 Average ratio of stack gas mass flow rate to flue gas mass flow rate at full-load steady-state operation. Determine the average ratio of stack gas mass flow rate to flue gas mass flow rate at full-load steady-state operation, $S/_F$, from Table 1 or 2 for the system number to be tested.

4.1.7 Equivalent field stack gas temperature at full-load steady-state operation. Calculate the equivalent field stack gas temperature at full-load steady-state operation, $T_{S,SS}$, expressed in degrees Fahrenheit and defined as:

$$T_{S,SS} = \frac{1}{S/_F}[T_{F,SS} - 70] + 70,$$

where

$T_{F,SS}$ as defined in 4.1.4

70 as defined in 4.1.4

$S/_F$ as defined in 4.1.6

4.1.8 On-cycle time constant. Calculate the on-cycle time constant, τ_{on}, expressed in minutes and defined as:

$$\tau_{on} = \frac{t_2 - t_1}{\ln\left[\frac{T_{F,SS} - T_{F,on(t_1)}}{T_{F,SS} - T_{F,on(t_2)}}\right]}$$

where

t_1 = 0.5 minutes

t_2 = 2.5 minutes

$T_{F,on(t_1)}$ = flue gas temperature measured at time (t_1) from a cold start-up of the system burner determined in accordance with section 3.3 of this Appendix, in degrees Fahrenheit

$T_{F,on(t_2)}$ = flue gas temperature measured at the time (t_2) from a cold start-up of the system burner determined in accordance with section 3.3 of this Appendix, in degrees Fahrenheit

$T_{F,SS}$ = as defined in 4.1.4

For vaporizing type oil burners, $\tau_{on} = 0$.

4.1.9 Effective gas temperature difference at start-up. Calculate the effective flue gas temperature difference at start-up of the system burner, $\Theta_{F,O,X}$, expressed in degrees Fahrenheit and defined as:

$$\Theta_{F,O,X} = [T_{F,SS} - T_{F,on(t_1)}]\, e^{\frac{t_1}{\tau_{on}}}$$

where:

$T_{F,SS}$ as defined in 4.1.4

$T_{F,on(t_1)}$ as defined in 4.1.8

t_1 as defined in 4.1.8

on as defined in 4.1.8

For vaporizing type oil burners, $\Theta_{F,O,X} = 0$.

4.1.10 Off-cycle time constant. Calculate the off-cycle time constant, τ_{off}, expressed in minutes and defined as

$$\tau_{OFF} = \frac{t_4 - t_2}{\ln\left[\frac{T_{F,OFF(t_2)} - T_{F,OFF(\infty)}}{T_{F,OFF(t_1)} - T_{F,OFF(\infty)}}\right]}$$

where

t_2 = 1.5 minutes

t_4 = 9.0 minutes

$T_{F,OFF(t_2)}$ = flue gas temperature measured at time (t_2) after shut-down from steady-state operation of the system burner determined in accordance with section 3.2 of this Appendix, in degree Fahrenheit.

$T_{F,OFF(t_1)}$ = flue gas temperature measured at time (t_4) after shut-down from steady-state operation of the system burner determined in accordance with section 3.2 of this Appendix, in degree Fahrenheit.

4.1.11 Effective flue gas temperature difference at shut-down. Calculate the effective flue gas temperature difference at shut-down of the system burner, $\Psi_{F,O,X}$, expressed in degrees Fahrenheit and defined as:

$$\Psi_{F,O,X} = T_{F,OFF(t_3)} - T_{F,OFF(\infty)}\, e^{\frac{t_3}{\tau_{OFF}}}$$

where

$T_{F,OFF(t_3)}$ as defined in 4.1.10

$T_{F,OFF(\infty)}$ as defined in 4.1.10

t_3 as defined in 4.1.10

τ_{OFF} as defined in 4.1.10

4.1.12 Minimum flue gas temperature difference above room temperature. Calculate the minimum flue gas temperature difference above room temperature, $\Psi_{F,\infty,T}$, expressed in Fahrenheit and defined as:

$$\Psi_{F,\infty,X} = T_{F,OFF(\infty)} - 70,$$

where

$T_{F,OFF(\infty)}$ as defined in 4.1.10

70 as defined in 4.1.4

4.1.13 Minimum stack gas temperature difference above room temperature. Calculate the minimum stack gas temperature difference above room temperature, $\Psi_{S,\infty,X}$ expressed in degrees Fahrenheit and defined as:

For systems numbered 1-4

$$\Psi_{S,\infty,X} = \frac{(D_F)\,(\Psi_{F,\infty,X})}{(S/_F)\,(D_S)}$$

where

D_F = off-cycle flue gas draft factor selected from Table 1, for units with power burners where D_F is measured, determined in accordance with section 4.4.2 of this Appendix, in degrees Fahrenheit.

D_S = off-cycle stack gas draft factor selected from Table 1, or, for units with power burners where D_F is measured, determined in accordance with section 4.4.3 of this Appendix, in degrees Fahrenheit.

$S/_F$ = as defined in 4.1.6

$\Psi_{F,\infty,X}$ = as defined in 4.1.52

for systems numbered 5-8:

$$\Psi_{S,\infty,X} = \Psi_{F,\infty,X}$$

where

$\Psi_{F,\infty,X}$ as defined in 4.1.12

4.1.14 Effective stack gas temperature difference at shut-down. Calculate the effective stack gas temperature difference at shut-down, $\Psi_{S,O,X}$ expressed in degrees Fahrenheit and defined as:

for systems numbered 1-4:

$$\Psi_{S,O,X} = \frac{(D_F)\,(\Psi_{F,O,X})}{(S/_F)\,(D_S)}$$

where

D_F as defined in 4.1.13

$\Psi_{F,O,X}$ as defined in 4.1.11

$S/_F$ as defined in 4.1.13

D_S as defined in 4.1.13

for systems numbered 5-8:

$$\Psi_{S,O,X} = \Psi_{F,O,X}$$

where

$\Psi_{F,O,X}$ as defined in 4.1.11

4.1.15 Correction factors for direct vent systems. Calculate a correction factor which corrects for the use of outdoor air for combustion instead of air at room temperature, C_S, defined as

$$C_S = 1 + \frac{(70-42)\,\eta_{SS}}{(T_{F,SS} - 70)\,100}$$

where

42 = average outdoor temperature corresponding to 5200 degree day location, in degrees Fahrenheit

η_{SS} as defined in 4.1.5

T_F as defined in 4.1.4

70 as defined in 4.1.4

The correction factor which corrects for the effect of outdoor air passing through the heat exchanger during the off-period, C'_S, defined as:

$$C'_S = 1.22$$

4.1.16 Multiplication factor for sensible heat loss during burner on-cycle. Calculate a multiplication factor for sensible heat loss during burner on-cycle, $K_{S,on}$, defined as:

$$K_{S,on} = \frac{100\; C_P[1 + (R_{T,F})\,(A/F)]}{HHV_A}$$

Where

C_P = 0.24 Btu per pound-degree Fahrenheit, specific heat of air as defined in 4.1.2

$R_{T,F}$

$A/_F$ = stoichiometric air/fuel ratio determined in accordance with Table 3

HHV_A = average higher heating value of the test fuel determined in accordance with Table 3, in Btu's per pound.

4.1.17 Multiplication factor for sensible heat loss during burner off-cycle. Calculate a multiplication factor for sensible heat loss during burner off-cycle, $K_{S,OFF}$, defined as:

for systems numbered 1-4:

$$K_{S,OFF} = \frac{(T_{F,SS} + 460)^{1.19}\,(D_F)\,(K_{S,on})}{(T_{F,SS} - 70)^{0.56}}$$

where

460 = conversion factor to convert degrees Fahrenheit to degrees Rankine

$T_{F,SS}$ as defined in 4.1.4

70 as defined in 4.1.4

D_F as defined in 4.1.13

$K_{S,on}$ as defined in 4.1.16

for systems numbered 5-8:

$$K_{S,OFF} = \frac{(T_{S,SS} + 460)^{1.19}\,(D_S)\,(S/_F)\,(K_{S,on})}{(T_{S,SS} - 42)^{0.56}}$$

where

$T_{S,SS}$ as defined in 4.1.7

D_S as defined in 4.1.13

$S/_F$ as defined in 4.1.6

$K_{S,on}$ as defined in 4.1.16

460 as defined in 4.1.17

42 as defined in 4.1.15

for systems numbered 9-12:

$$K_{S,OFF} = \frac{(T_{S,SS} + 460)^{1.19}\,(D_F)\,(K_{S,on})}{(T_{S,SS} - 42)^{0.56}}$$

where

$T_{S,SS}$ as defined in 4.1.7

D_F as defined in 4.1.13

$K_{S,on}$ as defined in 4.1.16

460 as defined in 4.1.17

42 as defined in 4.1.15

4.1.18 Multiplication factor for infiltration loss during burner on-cycle. Calculate a multiplication factor for infiltration loss during burner on-cycle, $K_{I,on}$, defined as:

for systems numbered 1-18:

$$K_{I,on} = (\Phi)\,(S/_F)\,(K_{S,on})$$

where

Φ = 0.7 infiltration parameter

$S/_F$ as defined in 4.1.6

$K_{S,on}$ as defined in 4.1.16

4.1.19 Multiplication factor for infiltration loss during burner off-cycle. Calculate a multiplication factor for infiltration loss during burner off-cycle $K_{I,on}$, defined as:

for systems numbered 1-8:

$$K_{I,OFF} = \frac{(T_{S,SS} + 460)^{1.19}\,(K_{I,on})\,(D_S)}{T_{S,SS} - 42)^{0.56}}$$

where

$T_{S,SS}$ as defined in 4.1.7

460 as defined in 4.1.17

42 as defined in 4.1.15

$K_{I,on}$ as defined in 4.1.18

D_S as defined in 4.1.13

4.1.20 Ratio of average burner on-time per cycle to on-cycle time constant. Calculate the ratio of average burner on-time per cycle to on-cycle time constant, T_{on}/τ_{on}, defined as:

$$\frac{t_{on}}{\tau_{on}}$$

where

t_{on} = 3.87 minutes, the average burner on-time per cycle, based on 5 cycles per hour at half load.

τ_{on} = as defined in 4.1.8

4.1.21 Ratio of average burner off-time per cycle to off-cycle time constant. Calculate the ratio of average burner off-time per cycle to off-cycle time constant, T_{off}/τ_{off}, defined as:

$$\frac{t_{off}}{\tau_{off}}$$

where

t_{off} = 13.3 minutes, the average burner off-time per cycle, based on 5 cycles per hour at half load.

τ_{off} = as defined in 4.1.10

4.1.22 Effective flue gas temperature difference at burner start-up, corrected for burner cycling effect. Calculate the effective flue gas temperature difference at burner start-up, corrected for burner cycling effect, $\Theta_{F,O}$, expressed in degrees Fahrenheit and defined as: when

$$(t_{on}/\tau_{on}) \leq (t_{off}/\tau_{off})$$

for systems numbered 1-8:

$$\Theta_{F,O} = \Theta_{F,O,X}$$

for systems numbered 9-12:

$$\Theta_{F,O} = (C_S)\,(\Theta_{F,O,X})$$

when

$$(t_{on}/\tau_{on}) > (t_{off}/\tau_{off});$$

for systems numbered 1-8:

$$\Theta_{F,O} = \Theta_{F,O,X}\left(1 - e^{-\frac{t_{off}}{\tau_{off}}}\right)$$

for systems numbered 9-12:

$$\Theta_{F,O} = (C_S)\,(\Theta_{F,O,X}\left(1 - e^{-\frac{t_{off}}{\tau_{off}}}\right)$$

where

t_{on}/τ_{on} as defined in 4.1.20

t_{off}/τ_{off} as defined in 4.1.21

$\Theta_{F,O,X}$ as defined in 4.1.9

C_S as defined in 4.1.15

4.1.23 Effective flue gas temperature difference at burner shut-down, corrected for burner cycling effect. Calculate the effective flue gas temperature difference at burner shut-down, corrected for burner cycling effect, $\Psi_{F,O}$.

when

$$(t_{on}/\tau_{on} \leq (t_{off}/\tau_{off}):$$

for systems numbered 1-8:

$$\Psi_{F,O} = (\Psi_{F,O,X})\left(1 - e^{-\frac{t_{on}}{\tau_{on}}}\right)$$

for systems numbered 9-12:

$$\Psi_{F,O} = (C'_S)\,(\Psi_{F,O,X})\left(1 - e^{-\frac{t_{on}}{\tau_{on}}}\right)$$

where

$(t_{on}/\tau_{on})\;(t_{off}/\tau_{off})$

for systems numbered 1-8:

$$\Psi_{F,O} = \Psi_{F,O,X}$$

for systems numbered 9-12:

$$\Psi_{F,O} = (C'_S)\,(\Psi_{F,O,X})$$

V 42 169 AUG 31 77 UMI

where
t_{on}/τ_{on} as defined in 4.1.20
t_{off}/τ_{off} as defined in 4.1.21
$\Psi_{F,O,\ X}$ as defined in 4.1.11
C_S as defined in 4.1.15

4.1.24 Effective minimum flue gas temperature difference above room temperature, corrected for burner cycling effect. Calculate the effective minimum flue gas temperature difference above room temperature, $\Psi_{F,\infty}$, corrected for burner cycling effect, expressed in degrees Fahrenheit and defined as:

for systems numbered 1-8:

$$\Psi_{F,\ \infty} = \Psi_{F,\ \infty,\ X}$$

for systems numbered 9-12:

$$\Psi_{F,\ \infty} = (C_S)\ (\Psi_{F,\ \infty,\ X})$$

where
C_S as defined in 4.1.15
$\Psi_{F\ \infty,X}$ as defined in 4.1.12

4.1.25 Effective stack gas temperature difference at burner shut-down, corrected for burner cycling effect. Calculate the effective stack gas temperature difference at burner shut-down, corrected for burner cycling effect, $\Psi_{S,O}$, expressed in degrees Fahrenheit and defined as:

when

$$(t_{on}/\tau_{on}) \leq (t_{off}/\tau_{off})$$

for systems numbered 1-8:

$$\Psi_{S,\ O} = \Psi_{S,\ O,\ X}\left(1-e^{-\frac{t_{on}}{\tau_{on}}}\right)$$

when

$$(t_{on}/\tau_{on}) \leq (t_{off}/\tau_{off})$$

For systems numbered 1-8:

$$\psi_{S,\ O} = \psi_{S,\ O,\ X}\left(1-e^{-\frac{t_{on}}{\tau_{on}}}\right)$$

when

$$t_{on}/\tau_{on} > (t_{off}/\tau_{off})$$

for systems numbered 1-8:

$$\Psi_{S,\ O} = \Psi_{S,\ O,\ X}$$

when
t_{on}/τ_{on} as defined in 4.1.20
t_{off}/τ_{off} as defined in 4.1.21
$\Psi_{S,O,X}$ as defined in 4.1.14

4.1.26 Off-cycle sensible heat loss integration factors. For systems numbered 1-4, determine off-cycle sensible heat loss integration factors, *F3* and *F4*, from Figures 3 and 4, respectively, using values of $\Psi_{F,O}$ defined in section 4.2.23, and t_{off}/τ_{off} defined in section 4.1.21.

For systems numbered 5-12, determine, off-cycle sensible heat loss integration factors, *F5* and *F6*, from Figures 5 and 6, respectively, using values of $\Psi_{F,O}$ defined in section 4.1.23, and t_{off}/τ_{off} defined in section 4.1.21.

4.1.27 Off-cycle infiltration heat loss integration factors. For systems numbered 1-8, determined off-cycle infiltration heat loss integration factors, *F7* and *F8*, from Figures 7 and 8, respectively, using values of $\Psi_{S,O}$ defined in section 4.1.25, and t_{off}/τ_{off} defined in section 4.1.21.

4.1.28 On-cycle sensible heat loss. Calculate the on-cycle sensible heat loss of the system, $L_{S,ON}$, expressed in percent and defined:

for systems numbered 1-8:

$$L_{S,\ ON} = L_{S,\ SS} - (K_{S,\ ON})\ (\Theta_{F,O})\left(\frac{1}{t_{on}/\tau_{on}}\right)\left(1-e^{-\frac{t_{on}}{\tau_{on}}}\right),$$

for systems numbered 9-12:

$$L_{S,\ ON} = (C_S)\ (L_{S,\ SS,\ A}) - (K_{S,\ ON})\ (\Theta_{F,\ O})\left(\frac{1}{t_{on}/\tau_{on}}\right)\left(1-e^{-\frac{t_{on}}{\tau_{on}}}\right)$$

where
C_S as defined in 4.1.15
$L_{S,\ SS,\ A}$ as defined in 4.1.4
$K_{S,ON}$ as defined in 4.1.16
$\Theta_{F,O}$ as defined in 4.1.22
t_{on}/τ_{on} as defined in 4.1.20

4.1.29 Off-cycle sensible heat loss. Calculate the off-cycle sensible heat loss of the system, $L_{S,\ OFF}$, expressed in percent and defined as:

for systems numbered 1-4:

$$L_{S,\ OFF} = (K_{S,\ OFF})\left(\frac{t_{off}}{t_{on}}\right)(F3) + (\Psi_{F,\ \infty})\ (F4),$$

for systems numbered 5-12:

$$L_{S,\ OFF} = (K_{S,\ OFF})\left(\frac{t_{off}}{t_{on}}\right)(F5) + (\Psi_{F,\ \infty})\ (F6),$$

where
$K_{S,OFF}$ as defined in 4.1.17
t_{off} as defined in 4.1.21
t_{on} as defined in 4.1.20
F3, *F4*, *F5*, and *F6* as defined in 4.1.26
$\Psi_{F,\infty}$ as defined in 4.1.24

4.1.30 On-cycle infiltration heat loss. Calculate the on-cycle infiltration heat loss of the system, $L_{I,ON}$, expressed in percent and defined as:

for systems numbered 1-8:

$$L_{I,\ ON} = K_{I,\ ON}\ (70-42),$$

where
$K_{I,ON}$ as defined in 4.1.18
70 as defined in 4.1.4
42 as defined in 4.1.15

for systems numbered 9-12:

$$L_{I,\ ON} = 0$$

4.1.31 Off-cycle infiltration heat loss. Calculate the off-cycle infiltration heat loss of the system $L_{I,\ OFF}$, expressed in percent and defined as:

for systems numbered 1-8:

$$L_{I,\ OFF} = K_{I,\ OFF}\ (70-42)\left(\frac{t_{off}}{t_{on}}\right)(F7) + (\Psi_{S,\ \infty,\ X})\ (F8)$$

where
$K_{I,\ OFF}$ as defined in 4.1.19
70 as defined in 4.1.4
42 as defined in 4.1.15
t_{off} as defined in 4.1.21
t_{on} as defined in 4.1.27
F7, *F8* as defined in 4.1.27
$\Psi_{S,\infty,X}$ as defined in 4.1.13

for systems numbered 9-12:

$$L_{I,\ OFF} = 0$$

4.1.32 Part-load fuel utilization efficiency. Calculate the part-load fuel utilization efficiency, expressed in percent and defined as:

for indoor units—

$$\eta_u = 100 - L_{L,\ A} - \left[\frac{t_{on}}{t_{on}+\frac{Q_P}{Q_{in}}\ (t_{off})}\right] \times [L_{S,\ ON}+L_{S,\ OFF}+L_{I,\ ON}+L_{I,\ OFF}],$$

for vented floor furnaces

$$\eta_u = 100 - L_{L,\ A} - C_i(L_i) - \left[\frac{t_{on}}{t_{on}+\left(\frac{Q_P}{Q_{in}}\right)(t_{off})}\right] \times [L_{S,\ ON}+L_{S,\ OFF}+L_{I,\ ON}+L_{I,\ OFF}]$$

where
C_i =3.3 for vented floor furnaces
Q_P =pilot flame fuel input rate determined in accordance with section 3.2 of this Appendix, in Btu's per hour
Q_{IN} =full-load input rate (including pilot flame fuel input rate) determined in accordance with section 3.1 of this Appendix, in Btu's per hour
L_i =jacket loss determined in accordance with section 3.4 of this Appendix, in percent
$L_{L,A}$ as defined in 4.1.5
t_{on} as defined in 4.1.20
t_{off} as defined in 4.1.21
$L_{S,ON}$ as defined in 4.1.28
$L_{S,OFF}$ as defined in 4.1.29
$L_{I,ON}$ as defined in 4.1.30
$L_{I,OFF}$ as defined in 4.1.31

4.1.33 Annual fuel utilization efficiency. Calculate the annual fuel utilization efficiency, $EFFY_A$, defined as:
where

$$EFFY_A = \frac{(\eta_{SS})\ (\eta_u)\ (5200)}{(\eta_{SS})\ (5200)+(2.5)\ (\eta_u)\left(\frac{Q_P}{Q_{in}}\right)(1.7)\ (4600)}$$

where
5200 = the average number of annual heating degree days for the United States
4600 = the average number of non heating season hours per year that the energy to the pilot light is assumed wasted
1.7 =average vented heater sizing factor
η_{SS} =as defined in 4.1.5
η_u =as defined in 4.1.32
Q_P =as defined in 4.1.32
Q_{IN} =as defined in 4.1.32

4.2 *Additional Requirements for Vented Home Heating Equipment Utilizing a Stack (or Flue) Damper.* Calculate the stack (or flue) damper effectiveness, D_e, defined as:

when $A_D \cos\Omega > 0.59\ A_S$:

$$D_e = \frac{2.24\left[1-\frac{A_D\cos\Omega}{A_S}\right]}{\sqrt{1-\left[1-\frac{A_D\cos\Omega}{A_S}\right]^2}}$$

when $A_D \cos\Omega \leq 0.59\ A_S$:
$D_e = 1$,
where
A_S = cross sectional area of the stack determined in accordance with section 3.5 of this Appendix, in square inches
A_D = net area of the damper plate determined in accordance with section 3.5 of this Appendix, in square inches
Ω = the angle the damper plate makes when closed with a plane perpendicular to the axis of the stack

4.3 *Additional Requirements for Vented Home Heating Equipment Utilizing Indoor Air for Combustion and Draft Control.* For units obtaining combustion air and draft control air from inside the residence, the appropriate factor describing the ration of on-cycle stack flow to on-cycle flue flow (S/F), the ratio of off-cycle flue flow to on-cycle flue flow at identical temperatures (D_F), and the ratio of off-cycle stack flow to on-cycle stack flow at iednticaI temperatures (D_S) shall be determined from Table 2.

4.3.1 Optional procedure for determination of D_F for vented home heating equipment employing a power burner. Calculate the ration (D_F), of the rate of flue gas mass flow through the vented heater during the off period, $m_{F,OFF}$ ($T_{F,SS}$), to the rate of flue gas mass flow during the on-period, $\dot{m}_{F,SS}$ ($T_{F,SS}$), and defined as:

$$D_P = \frac{\dot{m}_{F,\ OFF}\ (T_{F,\ SS})}{\dot{m}_{F,\ SS}\ (T_{F,\ SS})},$$

where

$$m_{F,OFF}\ (T_{F,\ SS}) = m_{F,\ OFF}\ (T_{F,\ OFF}) \times \left[\frac{T_{F,\ SS}-42}{T_{F,\ OFF}-42}\right]^{0.56}\left[\frac{T_{F,\ OFF}+460}{T_{F,\ SS}+460}\right]^{1.19}$$

where
$T_{F,SS}$ as defined in 4.1.4
$T_{F,\ OFF}$ = flue gas temperature during the off-period measured in accordance with section 3.6 of this Appendix, in degrees Fahrenheit

$$\dot{m}_{F,\ OFF}\ (T_{F,\ OFF}) = \frac{100\dot{V}_T}{C_T}\ q_F,$$

where
$\dot{V}_T$ = flow rate of tracer gas through the vented heater measured in accordance with section 3.6 of this Appendix, in cubic feet per minute
C_T = concentration by volume of tracer gas present in the flue gas sample measured in accordance with section 3.6 of this Appendix, in percent
$q_F = \frac{1.325\ P_B}{460+T_{F,OFF}}$

where
$T_{F,OFF}$ as defined above
P_B = barometric pressure measured in accordance with section 3.6 of this Appendix, in inches of mercury

$$m_{F,\ SS}\ (T_{F,\ SS}) = \left[(R_{T,\ F})\ \frac{A}{F}+1\right]\frac{Q_{in}}{HHV_A},$$

where
$R_{T,F}$ as defined in 4.1.2
A/F as defined in 4.1.16
Q_{in} as defined in 4.1.32
HHV_A as defined in 4.1.16

4.3.2 Optional procedure for determination of off-cycle draft factor for flue gas flow for vented home heating equipment employing a power burner. Calculate the off-cycle draft factor for flue gas flow, D_F, defined as:

for systems numbered 2, 4, or 10: $D_F = (D_F)$

for system number 12: $D_F = (D_F)\ (D_e)$,

where
D_F as defined in 4.3.1
D_e as defined in 4.2

4.3.3 Optional procedure for determination of off-cycle draft factor for stack gas flow for vented home heating equipment employing a power burner. Calculate the off-cycle draft factor for stack gas flow, D_S, defined as:

for system number 2: $D_S = D_F = 0.55$

for system number 4: $D_S = D_F = .40$

for system number 8: $D_S = (D_F)\ (D_e)$

where
D_P as defined in 4.3.1
D_e as defined in 4.2

4.4 *Additional Requirements for Vented Home Heating Equipment Utilizing a Direct Vent System.* For vented heaters utilizing a direct vent system or intended for outdoor installation, the appropriate S/F factor and D_F factor shall be determined from Table 2. If a unit is equipped with a power burner, D_F, may be calculated using the value of D_F determined in section 4.3.1 of this section.

4.5 *Additional Requirements for Vented Home Heating Equipment which Modulate or Vary Fuel Input without Controlling Excess Combustion Air.* A vented heater which is equipped with a mechanism for reducing the rate of fuel input but does not provide a means for controlling excess combustion air, shall be tested at its maximum firing rate in accordance with test procedures in section 3. These test results shall be used to calculate a seasonal efficiency and an annual operating cost which is based upon a single fixed fuel input rate.

4.6 *National Average Number of Burner Operating Hours.* Calculate the average number of burner operating hours, BOH, defined as:

$BOH = (A)\ (2080)$ (design heating requirement) $- B$,
where
2080 = national average annual heating load hours design heating requirement

$$= \frac{(Q_{in})\ (0.5)}{1000}$$

0.5 =approximate value for the ratio of steady state efficiency to 100 times the average heater sizing factor.
1000 = conversion factor to convert Btu's per hour to kilo-Btu's per hour
Q_{IN} = as defined in 4.1.32

$$A = \frac{100{,}000}{(341{,}300)\ (PE+yBE)+(Q_{in}-Q_F)\ \eta_u}$$

$B = (0.0416)\ (Q_P)\ (\eta_u)\ (A)$
PE = power burner electrical energy input rate at full-load steady-state operation determined in accordance with section 3.1 of this Appendix, in kilowatts.
BE = circulating-air blower (or circulating water pump electrical energy input rate at full-load steady-state operation determined in accordance with section 3.1 of this Appendix, in kilowatts
y = 1.00 for vented heaters employing a single motor to drive a power burner and air circulating fan or blower, (i.e., the ratio of average blower or pump on-time to average burner on-time) and 1.38 for all other vented heaters.
Q_{IN} = as defined in 4.1.32
Q_P = as defined in 4.1.32
η_u = as defined in 4.1.32

4.7 *Average Annual Fuel Energy Consumption for Vented Home Heating Equipment.* Calculate the average annual fuel energy consumption for vented heaters, E_F, expressed in Btu's per year, and defined as:

$$E_F = (Q-Q_{INP})\ (BOH)+(8760)\ (Q_P),$$

where
Q_{IN} as defined in 4.1.32
Q_P as defined in 4.1.32
BOH as defined in 4.6
8706 as defined in 4.1.33

4.8 *Average Annual Auxiliary Electrical Energy Consumption for Vented Home Heating Equipment.* Calculate the average annual auxiliary electrical energy consumption, E_{AE}, expressed in kilowatt-hours per year and defined as:

$$E_{AE} = (PE+y\ BE)\ (BOH)$$

where
PE as defined in 4.6
BE as defined in 4.6
y as defined in 4.6
BOH as defined in 4.6

4.9 *Average Number of Burner Operating Hours in Different Geographic Regions of the United States.* Calculate the average number of burner operating hours by geographic region of the United States, BOH_R, defined as:

$BOH_R = (A)\ (HLH)$ (design heating requirement) $- B$,
where
A as defined in 4.6
HLH = heating load hours for a specific geographic region determined in accordance with the heating load hour map in Figure 9

Design heating requirement = as defined in 4.6

$$B = \frac{(2)\ (HLH)\ (A)\ (Q_P)\ (\eta_u)}{100{,}000},$$

where
100,000 = Factor that accounts for percent and KBTU.
(2) = ratio of average length of heating season to heating load hours.
HLH = as defined above
A as defined in 4.6
Q_P as defined in 4.1.32
u as defined in 4.1.32

4.10 *Average Annual Fuel Energy Consumption for Vented Home Heating Equipment by Geographic Region of the United States.* Calculate the average annual fuel energy consumption by geographic region of the United States, $E_{F,R}$, expressed in Btu's per year, and defined as:

$$E_{F,\ R} = (Q_{IN}-Q_P)\ (BOH_R)+(8760)\ (Q_P),$$

where
Q_{in} as defined in 4.1.32
Q_P as defined in 4.1.32
BOH_R as defined in 4.9
8760 as defined in 4.1.33

4.11 *Average Annual Auxiliary Electrical Energy Consumption for Vented Home Heating Equipment in Different Geographic Regions of the United States.* Calculate the average annual auxiliary electrical energy consumption for different geographic regions of the United States, $E_{AE,\ R}$, expressed in kilowatt-hours per year and defined as:

$$E_{AE,\ R} = (PE+y\ BE)\ (BOH_R),$$

where
PE as defined in 4.6
BE as defined in 4.6
Y as defined in 4.6
BOH_R as defined in 4.9

4.12. *Minimum Standardized Design Heating Requirement.* Calculate the minimum standardized design heating requirement, DHR_{MIN}, expressed in Btu's per-hour for which a regional annual operating cost could be computed, defined as:

$$DHR_{MIN} = \frac{(\eta_{ss})\ (Q_{in})}{200}$$

4.13 *Maximum Standardized Design Heating Requirement.* Calculate the maximum standardized design heating requirement, DHR_{MAX}, expressed in Btu's per-hour, for which a regional annual operating cost could be computed, defined as:

$$DHR_{MAX} = \frac{(\eta_{ss})\ (Q_{in})}{110}$$

4.14 *Average Number of Burner Operating Hours by Geographic Region of the United States for the Minimum Standardized Design Heating Requirement.* Calculate the average number of burner operating hours by geographic region of the United States for the minimum standardized design heating requirement, $BOH_{R\text{-}MIN}$, defined as:

$$BOH_{R\text{-}MIN} = A(HLH)\ (DHR_{MIN}) - B$$

where
A as defined in 4.6.
HLH as defined in 4.9
DHR_{MIN} as defined in 4.12
B as denfied in 4.9

4.15 *Average Number of Burner Operating Hours by Geographic Region of the United States for the Maximum Standardized Design Heating Requirement.* Calculate the average number of burner operating hours by geographic region of the United States for the maximum standardized design heating requirement, $BOH_{R\text{-}MAX}$, defined as:

$$BOH_{R\text{-}MAX} = A(HLH)\ (DHR_{MAX}) - B,$$

where
A as defined in 4.6
HLH as defined in 4.9
DHR_{MAX} as defined in 4.13
B as defined in 4.9

4.16 *Average Annual Fuel Energy Consumption for Vented Home Heating Equipment by Geographic Region of the United States for the Minimum Standardized Design Heating Requirement.* Calculate the average annual fuel energy consumption by geographic region of the United States for the minimum standardized design heating requirement, $E_{F,R\text{-}MIN}$ expressed in Btu's per year and defined as:

$$E_{R,\ R\text{-}MIN} = (Q_{in}-Q_F)\ (BOH_{R\text{-}MIN}) + (8760)\ (Q_P),$$

where
Q_{in} as defined in 4.1.32
Q_P as defined in 4.1.32
$BOH_{R\text{-}MIN}$ as defined in 4.14
8760 as defined in 4.1.33

4.17 *Average Annual Fuel Energy Consumption for Vented Home Heating Equipment by Geographic Region of the United States for the Maximum Standardized Design Heating Requirement.* Calculate the average annual fuel energy consumption by geographic region of the United States for the maximum design heating requirement, $E_{F,\ R\text{-}MAX}$ expressed in Btu's per year and defined as:

$$E_{F,\ R\text{-}MAX} = (Q_{IN}-Q_P)\ (BOH_{R\text{-}MAX}) + (8760)\ (Q_P),$$

where
Q_{IN} as defined in 4.1.32
Q_P as defined in 4.1.32
$BOH_{R\text{-}MAX}$ as defined in 4.15
8760 as defined in 4.1.33

4.18 *Average Annual Auxiliary Electrical Energy Consumption for Vent Home Heating Equipment by Geographic Region of the Minimum Standardized Design Heating Requirement.* Calculate the average annual auxiliary electrical energy consumption by geographic region of the United States for the minimum standardized design heating requirement, $E_{AE,R\text{-}MIN}$, expressed in kilowatt-hours per year and defined as:

$$E_{AE,\ R\text{-}MIN} = (PE+y\ BE)\ (BOH_{R\text{-}MIN}),$$

where
PE as defined in 4.6
Y as defined in 4.6
BE as defined in 4.6
$BOH_{R\text{-}MIN}$ as defined in 4.9

4.19 *Average Annual Auxiliary Electrical Energy Consumption for Vented Home Heating Equipment by Geographic Region of the United States for the Maximum Standardized Design Heating Requirement.* Calculate the average annual auxiliary electrical energy consumption by geographic region of the United States for the maximum standardized design heating requirement, $E_{AE,R-MAX} = (PE+y\ BE)\ (BOH_{R-MAX})$,
where
PE as defined in 4.6
y as defined in 4.6
BE as defined in 4.6
BOH_{R-MAX} as defined in 4.15

PRIVACY ACT OF 1974

Systems of Records

V42169 AUG 31 77 UMI

FEDERAL DEPOSIT INSURANCE CORPORATION

[26887]

PRIVACY ACT OF 1974

Notice of New Systems and Changes to Existing Systems of Records

Pursuant to the requirements of the Privacy Act of 1974, 5 U.S.C. 552a(e)(4), 88 Stat. 1896, 1899-1900, the Federal Deposit Insurance Corporation ("FDIC") published, on October 6, 1975, final notice of thirteen systems of records maintained by the FDIC (40 FR 46288). On December 3, 1975, the FDIC published notice of one additional system of records, thereby increasing its total number of systems to fourteen (40 FR 56479).

Since that time, the FDIC has discovered various needed changes in its systems of records. Therefore, on April 12, 1977, notice was published in the Federal Register (42 FR 19209) by the FDIC proposing to adopt two new systems of records, to withdraw one existing system of records, to adopt new routine uses for existing systems of records, and to revise the format of some existing systems of records. Interested parties were given the opportunity to submit, not later than May 12, 1977, data, views, and recommendations regarding the proposed notices. No unfavorable comments were received.

The FDIC's changes and amendments are numerous and, therefore, to avoid a piecemeal approach that may be confusing to the public, the FDIC is republishing its entire systems of records. Although no substantive changes have occurred to many of the systems, the format and wording have been revised in many instances. These changes are intended to clarify and more accurately reflect the information pertaining to the various systems.

Besides structural changes to the existing systems, the FDIC has found that one system, the "Employee Confidential Statements of Employment and Financial Interests," is encompassed by the Civil Service Commission's published notice of its systems of records (See 41 FR 42158). In order to avoid duplication and the resulting confusion to the public, this system is, therefore, being withdrawn from the FDIC's published notice of systems of records.

The FDIC also is publishing two new systems of records. The first new system is the "Medical Records and Emergency Contact Information System." This system was inadvertently overlooked when the FDIC originally published its systems of records. The system contains information compiled in the course of an FDIC employee's visit to the nurse's station of the Health Unit for medical aid. The information contained in this system is accessed only by the nurse and her substitute, and is maintained in order to aid the nurse in prescribing medical treatment.

The second system is titled the "Municipal Securities Principals and Representatives System." For many years participants in the offer and sale of municipal securities were exempted from regulation under the securities laws. In 1975, Congress changed this with the addition of a new Section 15B of the Securities Exchange Act of 1934 (15 U.S.C. 78o-4). The amendments established a Municipal Securities Rulemaking Board ("MSRB"), and vested it with authority to promulgate rules for the municipal securities industry. However, the MSRB does not have authority to enforce its rules. This authority is distributed among several agencies, and the FDIC is responsible for enforcing compliance by insured State-chartered banks that are not members of the Federal Reserve System, and any subsidiaries, departments or divisions thereof, which are municipal securities dealers. 15 U.S.C. 78r. Under the amendments to the Securities Exchange Act, the MSRB is directed to promulgate rules regarding persons associated with municipal securities dealers as either municipal securities principals or representatives. Pursuant to this directive, the MSRB requires each municipal securities dealer to obtain certain background information on the individuals who are currently, or are seeking to be, associated with the dealer. The FDIC proposes to require each dealer, which is under FDIC supervision, to file with the FDIC a form explaining the background information for each person associated with the dealer as a municipal securities principal or representative. The "Municipal Securities Principals and Representatives System" will be the result of the data collection. In addition to using this system for its own enforcement, the FDIC, along with the Comptroller of the Currency and the Board of Governors for the Federal Reserve System for their respectively supervised dealers, would forward the information to the National Association of Securities Dealers ("NASD") for computer processing. The NASD currently maintains data on personnel in the securities industry, and it is expected that portions of disciplinary and qualification data supplied by the bank regulatory agencies will be interfaced with the existing NASD securities personnel data bank. Under this arrangement, the FDIC would have access to disciplinary, qualification and employment information on individuals who have moved between banking institutions or between banking institutions and general securities firms or nonbank municipal securities dealers. Access to such information would assist the FDIC in determining if a person is qualified to act as a municipal securities principal or representative. The FDIC also would provide a municipal securities dealer, for which the FDIC is the appropriate regulatory agency, with any disqualifying information contained in the system about a person seeking to be associated with the dealer as a principal or representative.

In addition to these new systems, there are two new routine uses for information contained in certain of the existing FDIC systems of records. The first of these will allow disclosure to the Civil Service Commission of personnel related records necessary to fulfill its program management responsibilities. In order to permit this disclosure, it is necessary for the Corporation to amend the routine use of each of its personnel related systems to provide for transmission to the Commission of personnel information necessary for its governmentwide studies of personnel management. The second new use will allow disclosure to a Congressional office in response to any inquiry from that office regarding the individual initiating that inquiry. This routine use is in order to assure that the Corporation's notices do not have the effect of denying individuals the benefit of Congressional assistance which they may request. It will be permitted only where the individual has initiated the inquiry in question.

A few technical corrections have been made to the systems of records as proposed on April 12, 1977. These proposed systems, with the corrections, are adopted as set forth below and are effective August 31, 1977.

By Order of the Board of Directors, June 27, 1977.

[SEAL]

Alan R. Miller,
Executive Secretary.

Systems of Records Maintained by the Federal Deposit Insurance Corporation

30—64—0001 Attorney-Legal Intern Applicant System. (This system is subject to exemption pursuant to 12 CFR Sec. 310.13(b), to the extent it contains information provided by confidential sources.)

30—64—0002 Bank, and Proposed Bank Irregularity Record System. (This system is subject to exemption pursuant to 12 CFR Sec. 310.13(a), to the extent it contains material compiled for law enforcement purposes.)

30—64—0003 Board of Directors' Actions System.

30—64—0004 Changes in Bank Control Ownership Records.

30—64—0005 Consumer Complaint and Inquiry Records.

30—64—0006 (Reserved)

30—64—0007 Employee Education System.

30—64—0008 (Reserved)

30—64—0009 Examiner Training and Education Records. (This system is subject to exemption pursuant to 12 CFR Sec. 310.13(c).)

30—64—0010 Graduate Fellowship Applications.

30—64—0011 Legal Compliance and Enforcement Records (This system is subject to exemption pursuant to 12 CFR Sec. 310.13(a), to the extent it contains material compiled for law enforcement purposes.)

30—64—0012 Payroll and Employee Financial Records.

30—64—0013 Savings Bond Payroll Deduction System.

30—64—0014 Travel Voucher System.

30—64—0015 Unofficial Personnel System.

30—64—0016 Municipal Securities Principals and Representatives System.

30—64—0017 Medical Records and Emergency Contact Information System.

30—64—0001

System name: Attorney—Legal Intern Applicant System—FDIC.

System location: Office of the General Counsel, FDIC, 550 17th Street, NW., Washington, D.C. 20429.

Categories of individuals covered by the system: Applicants for the position of attorney or legal intern with the General Counsel's office of the FDIC.

Categories of records in the system: Contains correspondence from the applicants and individuals whose names were provided by the applicants as references, applicants' resumes, application forms, and, in some instances, comments of individuals who interviewed applicants.

Authority for maintenance of the system: Sec. 9 of the Federal Deposit Insurance Act (12 U.S.C. 1819).

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: Disclosure of information may be made: (1) in requesting information of individuals or concerns whose names were supplied by the applicant as references and/or past or present employers; (2) to the Civil Service Commission concerning pay, benefits, retirement deductions, and other information necessary for the Commission to carry out its government-wide personnel management functions; (3) to a Congressional office from the record of an individual in response to an inquiry from the Congressional office made at the request of the individual.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: File folders.

Retrievability: Indexed by name.

Safeguards: Maintained in locked metal file cabinets.

Retention and disposal: Records of unsuccessful applicants are retained two years after their submission; records of successful applicants are retained four years after the successful applicant leaves the employ of FDIC.

System manager(s) and address: General Counsel, Legal Division, FDIC, 550 17th Street, NW., Washington, D.C. 20429.

Notification procedure: Executive Secretary, Records Unit, FDIC, 550 17th Street, NW., Washington, D.C. 20429.

Record access procedures: Same as "Notification" above.

Contesting record procedures: Same as "Notification" above.

Record source categories: The information is obtained from the applicants, references supplied by the applicants, current and/or former employers of the applicants, and FDIC employees who interviewed the applicants.

Systems exempted from certain provisions of the act: Pursuant to section 310.13(b) of the FDIC's Rules and Regulations, investigatory material compiled solely for the purpose of determining suitability, eligibility, or qualifications for Corporation employment may be withheld from disclosure to the extent that disclosure of such material would reveal the identity of a source who furnished information to the Corporation under a promise of confidentiality.

30—64—0002

System name: Bank and Proposed Bank Irregularity Record System—FDIC.

System location: Operations Branch, Division of Bank Supervision, FDIC, 550 17th Street, NW., Washington, D.C. 20429.

Categories of individuals covered by the system: Directors, officers and employees of FDIC insured banks who have been involved in reported irregularities. Directors and officers of noninsured banks and organizers of proposed banks which have applied for Federal deposit insurance and who have been involved in reported irregularities. Customers of FDIC insured banks, and other individuals, who have been involved in reported irregularities at such banks. In addition, the system may contain information on individuals who have been the subject of background checks designed to uncover irregularities bearing on these individuals' fitness to be directors, officers, or employees of the banks or to control its management. These individuals may include the following: directors, officers and employees of FDIC insured banks; directors and officers of uninsured banks and organizers of proposed banks which have applied for Federal deposit insurance; and controlling shareholders of banks endeavoring to gain control over FDIC insured banks.

Categories of records in the system: Contains interagency correspondence, intra-agency memoranda and reports of investigation. May contain newspaper clippings. May contain Federal or State criminal law enforcement agency investigatory and/or arrest and conviction reports.

Authority for maintenance of the system: Secs. 5, 6, 9, 18 and 19 of the Federal Deposit Insurance Act (12 U.S.C. 1815, 1816, 1819, 1828, 1829).

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: (1) In the event that information contained in this system indicates a violation or potential violation of law, whether civil, criminal or regulatory in nature, and whether arising by general statute or particular program statute, or by regulation, rule or order issued pursuant thereto, the relevant records may be referred to the appropriate agency, whether Federal or State, charged with the responsibility of investigating or prosecuting such violation or charged with enforcing or implementing the statute, or rule, regulation or order issued pursuant thereto; (2) In the event of litigation, the appropriate records may be presented to the appropriate court, magistrate, or administrative tribunal as evidence, or to counsel for the presentation of evidence and/or in the course of discovery; (3) Disclosure may be made to a Congressional office from the record of an individual in response to an inquiry from the Congressional office made at the request of the individual; (4) Disclosure may be made to the bank affected by a discovered irregularity.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Maintained on file cards and in file folders.

Retrievability: Indexed by name.

Safeguards: Indexed cards and file folders are maintained in lockable metal cabinets.

Retention and disposal: Permanent retention with periodic review of contents of record and destruction, by shredder, of excess or outdated information.

System manager(s) and address: Director, Division of Bank Supervision, FDIC, 550 17th Street, NW., Washington, D.C. 20429.

Notification procedure: Executive Secretary, Records Unit, FDIC, 550 17th Street, NW., Washington, D.C. 20429. Inquiries must provide the full name of the inquirer. All inquiries must include a notarized statement attesting to the identity of the inquirer.

Record access procedures: Same as "Notification" above.

Contesting record procedures: Same as "Notification" above.

Record source categories: FDIC insured banks and applicants for Federal deposit insurance; Federal and State banking supervisory authorities; Newspapers; Federal and State criminal law enforcement and prosecutorial agencies.

Systems exempted from certain provisions of the act: Pursuant to section 310.13(a) of the FDIC's Rules and Regulations, investigatory material compiled for law enforcement purposes, concerning irregularities involving officers, directors, employees, customers, or other individuals at FDIC insured banks; directors and officers of noninsured banks; or organizers of proposed banks which have applied for Federal deposit insurance, is exempted from the accounting provisions of section 310.10(d)(2) of the FDIC's Rules and Regulations and may be withheld from disclosure to the extent that such disclosure may interfere with the investigation and preparation of any civil, criminal, or administrative law enforcement proceedings. Federal criminal law enforcement investigatory reports maintained as part of this system may be the subject of exemptions imposed by the originating agency pursuant to 5 U.S.C. 552a(j)(2).

30—64—0003

System name: Board of Directors' Actions System—FDIC.

System location: Office of the Executive Secretariat, FDIC, 550 17th Street, NW., Washington, D.C. 20429.

Categories of individuals covered by the system: Individuals who have been subject to administrative actions by the FDIC Board of Directors.

Categories of records in the system: Contains minutes of the FDIC Board of Directors' meetings, intra-agency memoranda, orders of the Board of Directors, and correspondence with the subject individual.

Authority for maintenance of the system: Sec. 2, 8, and 19 of the Federal Deposit Insurance Act of (12 U.S.C. 1812, 1818, 1829); Sec. 506 of the Federal Records Act of 1950 (44 U.S.C. 3101).

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: Disclosure may be made to a Congressional office from the record of an individual in response to an inquiry from the Congressional office made at the request of the individual.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Card file index and minute ledger.

Retrievability: Card files indexed alphabetically by name.

Safeguards: Card files are stored in lockable metal filing cabinets, minute ledgers are stored in vault.

V42169 AUG 31 77 UMI

Retention and disposal: Permanent.

System manager(s) and address: Executive Secretary, Records Unit, FDIC, 550 17th Street, NW., Washington, D.C. 20429.

Notification procedure: Same as System manager above.

Record access procedures: Same as System manager above.

Contesting record procedures: Same as System manager above.

Record source categories: Intra-agency records.

Systems exempted from certain provisions of the act: None.

30—64—0004

System name: Changes in Bank Control Ownership Records—FDIC.

System location: Operations Branch, Division of Bank Supervision, FDIC, 550 17th Street, NW., Washington, D.C. 20429.

Categories of individuals covered by the system: Individuals who have been involved in the change of bank control or ownership in FDIC insured banks and/or have obtained loans from insured banks, when such loans are secured by 25 percent or more of the outstanding stock of an insured bank.

Categories of records in the system: Contains the name of the individual seller or purchaser of shares of stock, the number of shares of stock involved and outstanding, the name of the bank whose control has changed, the purchase price of the stock, the names of beneficial owners if the shares are registered in another name, the total number of shares owned by the seller, purchaser, or beneficial owner both before and after the transaction. In the case of loans, contains the name and location of the lending bank, the name and address of the borrower, the amount of the loan and the name of the bank issuing the stock securing the loan and the number of shares securing the loan.

Authority for maintenance of the system: Sec. 7(j) of the Federal Deposit Insurance Act (12 U.S.C. 1817(j)).

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: (1) The name of the bank whose control has changed, the seller and purchaser, and the number of shares involved may be distributed to periodicals for publication; (2) In the event that the system of records indicates a violation or potential violation of law, whether civil, criminal or regulatory in nature, and whether arising by general statute or particular program statute, or by regulation, rule or order issued pursuant thereto, the relevant records in the system of records may be referred to the appropriate agency, whether Federal or State, charged with the responsibility of investigating or prosecuting such violation or charged with enforcing or implementing the statute, or rule, regulation or order issued pursuant thereto; (3) In the event of civil, criminal, or administrative law enforcement proceedings, the relevant records may be disclosed to the appropriate court and/or counsel for purposes of discovery and the development of the proceedings; (4) Disclosure may be made to a Congressional office from the record of an individual in response to an inquiry from the Congressional office made at the request of the individual.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Maintained in file folders and on index cards.

Retrievability: Indexed by name.

Safeguards: Maintained in lockable metal filing cabinets.

Retention and disposal: Permanent retention.

System manager(s) and address: Director, Division of Bank Supervision FDIC, 550 17th Street, NW., Washington, D.C. 20429.

Notification procedure: Executive Secretary, Records Unit, FDIC, 550 17th Street, NW., Washington, D.C. 20429.

Record access procedures: Same as "Notification" above.

Contesting record procedures: Same as "Notification" above.

Record source categories: The bank in which control has changed and the bank which makes a loan secured by 25 percent or more of the outstanding voting stock of an insured bank.

Systems exempted from certain provisions of the act: None.

30—64—0005

System name: Consumer Complaint and Inquiry Records—FDIC.

System location: Office of Bank Customer Affairs, FDIC, 550 17th Street, NW., Washington, D.C. 20429.

Categories of individuals covered by the system: Consumers who have filed complaints or inquiries concerning activities and practices of FDIC insured banks.

Categories of records in the system: Contains consumers names and the nature of their complaints or inquiries. Contains correspondence and records of other communications between the FDIC and the customer, and may contain correspondence between the FDIC and the bank in question and/or Federal or State bank supervisory authorities. May contain copies of supporting documents supplied by the complainant and intra-agency memoranda.

Authority for maintenance of the system: Sec. 202 of Title II of the Federal Trade Improvement Act (15 U.S.C. 57a(f)); Sec. 8 of the Federal Deposit Insurance Act (12 U.S.C. 1818).

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: (1) Since records are compiled and used for investigation and resolution of consumer inquiries and complaints, disclosure may be necessary to the institution which is the subject of the complaint; (2) Resolution of the complaint or inquiry may also require disclosure limited to the name of the inquirer and the nature of the inquiry, to third party sources during the course of the investigation; (3) Transmittal may be made to the Federal or State supervisory authority that has direct supervision over the financial institution that is the subject of the complaint; (4) In the event that the system of records indicates a violation or potential violation of law, whether civil, criminal, or regulatory in nature, and whether arising by general statute or particular program statute, or by regulation, rule or order issued pursuant thereto, the relevant records in the system may be referred to the appropriate agency, whether Federal or State, charged with the responsibility of investigating or prosecuting such violations or charged with enforcing or implementing the statute, or rule, regulation or order issued pursuant thereto; (5) In the event of civil, criminal or administrative proceedings, the relevant records may be disclosed to the appropriate court and/or counsel for purposes of discovery and the development of the proceedings; (6) Disclosure may be made to a Congressional office from the record of an individual in response to an inquiry from the Congressional office made at the request of the individual.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Maintained in file folders and on computer discs and tapes.

Retrievability: Indexed by name.

Safeguards: Maintained in lockable metal filing cabinets; computer tapes and discs are accessed only by authorized personnel.

Retention and disposal: Records are retained for three years after resolution or answer of the complaint and then correspondence files are destroyed by shredder, computer tapes and discs are erased.

System manager(s) and address: Director, Office of Bank Customer Affairs, FDIC, 650 17th Street, NW., Washington, D.C. 20429.

Notification procedure: Executive Secretary, Records Unit, FDIC, 550 17th Street, NW., Washington, D.C. 20429.

Record access procedures: Same as "Notification" above.

Contesting record procedures: Same as "Notification" above.

Record source categories: The information is obtained from the individual on whom the record is maintained; institutions that are the subject of the complaint; the appropriate agency, whether Federal or State, with supervisory authority over the institution; Congressional offices that may initiate the inquiry; and other third party sources mentioned in "Routine use" above.

Systems exempted from certain provisions of the act: None.

(Reserved)

30—64—0007

System name: Employee Education System—FDIC.

System location: Office of Education, FDIC, 550 17th Street, NW., Washington, D.C. 20429.

Categories of individuals covered by the system: All present and former FDIC employees.

Categories of records in the system: Contains the educational history of employees prior to their employment with the FDIC, and educational progression of employees while employed by the FDIC. Information includes employee's schools of attendance, courses completed or enrolled in, dates of attendance, tuition fees and expenses, and may include per diem and travel expenses.

Authority for maintenance of the system: Sec. 9 of the Federal Deposit Insurance Act (12 U.S.C. 1819); Exec. Order No. 9397, "Numbering System for Federal Accounts Relating to Individual Persons" (Nov. 22, 1943).

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: Disclosure may be made to: (1) the Civil Service Commission concerning pay, benefits, retirement deductions, and other information necessary for the Commission to carry out its government-wide personnel management functions; (2) to a Congressional office from the record of an individual in response to an inquiry from the Congressional office made at the request of the individual; (3) to educational institutions for purposes of enrollment and verification of employee attendance and performance.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: File folders and computer discs.

Retrievability: File folders—alphabetically by name; computer discs—social security number.

Safeguards: File folders are stored in lockable metal cabinets, computer discs are accessed by only authorized personnel.

Retention and disposal: Permanent retention.

System manager(s) and address: Director, Office of Employee Relations, FDIC, 550 17th Street, NW., Washington, D.C. 20429.

Notification procedure: Executive Secretary, Records Unit, FDIC, 550 17th Street, NW., Washington, D.C. 20429.

Record access procedures: Same as "Notification" above.

Contesting record procedures: Same as "Notification" above.

Record source categories: The information is obtained from the employee on whom the record is maintained and the training institution in which the employee is enrolled.

Systems exempted from certain provisions of the act: None.

30—64—0008

(Reserved)

30—64—0009

System name: Examiner Employment, Training, and Education Records—FDIC.

System location: Division of Bank Supervision Training Center, FDIC, 1701 N. Fort Myer Drive, Arlington, Virginia 22200.

Categories of individuals covered by the system: FDIC assistant examiners who have been candidates for determination of progress to become a commissioned bank examiner (Progress Evaluation Candidates). FDIC examiners who attend, or have attended, graduate schools of banking (Graduate School of Banking Students).

Categories of records in the system: Progress Evaluation Candidates—contains a statement of the candidate's education, home address, date and place of birth, and experience, a Report of Evaluation of a Progress Evaluation Panel, the consolidated findings of each Progress Evaluation Panel member, the candidate's case studies, basic work papers, and responses, and, in the case of an unsuccessful candidate, the candidate's complete work papers and responses, as well as the individual findings of each Progress Evaluation Panel member.

Graduate School of Banking Students—contains the student's name, enrollment data, record of attendance, record of completion or graduation and general correspondence between the FDIC and the student's school of enrollment.

Authority for maintenance of the system: Sec. 10(b) of the Federal Deposit Insurance Act (12 U.S.C. 1820(b)).

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: Disclosure may be made to: (1) the Civil Service Commission concerning pay, benefits, retirement deductions, and other information necessary for the Commission to carry out its government-wide personnel management functions; (2) to a Congressional office from the record of an individual in response to an inquiry from the Congressional office made at the request of the individual; (3) to educational institutions for purposes of enrollment and verification of employee attendance and performance.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: All categories are stored in file folders.

Retrievability: All categories are indexed by name.

Safeguards: All categories are maintained in lockable metal filing cabinets.

Retention and disposal: Progress Evaluation Candidates' records maintained two years for the successful candidate and then destroyed by shredder, records of unsuccessful candidate retained until the candidate's successful completion or until the candidate leaves the FDIC's employ. Graduate School of Banking student records are permanently retained.

System manager(s) and address: Director, Division of Bank Supervision, FDIC, 550 17th Street, NW., Washington, D.C. 20429.

Notification procedure: Executive Secretary, Records Unit, FDIC, 550 17th Street, NW., Washington, D.C. 20429. Inquirers must provide their full name and identify the category or categories of which they are inquiring.

Record access procedures: Same as "Notification" above.

Contesting record procedures: Same as "Notification" above.

Record source categories: Progress Evaluation Candidates—the candidate, the candidate's personnel record, and members of the candidate's Progress Evaluation Panel. Graduate School of Banking Students—the student, the student's school, and the student's personnel record.

Systems exempted from certain provisions of the act: Pursuant to section 310.13(c) of the FDIC's Rules and Regulations, testing material used solely to assess individual qualifications for appointment or promotion, the disclosure of which would compromise the objectivity or fairness of the testing, evaluation or examination process, may be withheld from disclosure.

30—64—0010

System name: Graduate Fellowship Applications—FDIC.

System location: Division of Management Systems and Economic Analysis, FDIC, 550 17th Street, NW., Washington, D.C. 20429.

Categories of individuals covered by the system: Applicants for FDIC fellowships for graduate study in banking, finance and economics.

Categories of records in the system: Contains correspondence from applicants and from individuals whose names were provided by the applicants as references, application forms, applicants' grade transcripts, samples of written work, and, in some instances, comments of individuals who interviewed applicants.

Authority for maintenance of the system: Section 9 of the Federal Deposit Insurance Act (12 U.S.C. 1819); Sec. 506 of the Federal Records Act of 1950 (44 U.S.C. 3101).

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: Disclosure of information on the applicant may be made: (1) in requesting information of individuals or concerns whose names were supplied by the applicant as references and/or past or present employers; (2) to the Civil Service Commission concerning pay, benefits, retirement deductions, and other information necessary for the Commission to carry out its government-wide personnel management functions; (3) to a Congressional office from the record of the individual in response to an inquiry from the Congressional office made at the request of the individual.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: File folders.

Retrievability: Indexed by name.

Safeguards: Maintained in metal file cabinets with a combination lock.

Retention and disposal: Supporting documents in applications of unsuccessful applicants are retained until completion of review and then destroyed. Complete files of fellowship winners are retained until the expiration of the fellowship grant periods.

System manager(s) and address: Director, Division of Management Systems and Economic Analysis, FDIC, 550 17th Street, NW., Washington, D.C. 20429.

Notification procedure: Executive Secretary, Records Unit, FDIC, 550 17th Street, NW., Washington, D.C. 20429.

Record access procedures: Same as "Notification" above.

Contesting record procedures: Same as "Notification" above.

Record source categories: Information is obtained from the applicants, references supplied by the applicants, college documents, current and/or former employers, and FDIC employees who interviewed the applicants.

V 42 169 AUG 31 77 UMI

Systems exempted from certain provisions of the act: None.

30—64—0011

System name: Legal Compliance and Enforcement Records—FDIC.

System location: Office of the General Counsel, FDIC. 550 17th Street, NW., Washington, D.C., 20429.

Categories of individuals covered by the system: Directors or officers of FDIC insured State nonmember banks who have been the subject of an indictment, information or complaint for a felony involving dishonesty or breach of trust. Directors or officers of FDIC insured State nonmember banks who are suspected of committing violations of law, rule or regulation, or of a final cease-and-desist order, or of committing acts, omissions or practices constituting a breach of fiduciary duty. Individuals who have sought FDIC consent to serve as an officer, director, or employee of an FDIC insured State nonmember bank after having been convicted of a crime involving dishonesty or breach of trust.

Categories of records in the system: Contains the indictment, information, or complaint filed against the subject individual, and any court order or resolution of such indictment, information, or complaint. Contains newspaper clippings on subject individuals. Contains affidavits of the subject individual and bank employees. Contains intra-agency memoranda and general correspondence between the FDIC and the subject individual and/or his/her attorney. Contains final administrative orders issued by the FDIC.

Authority for maintenance of the system: Secs. 8 and 19 of the Federal Deposit Insurance Act (12 U.S.C. 1818, 1829).

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: (1) In the event that the system of records indicates a violation or potential violation of law, whether civil, criminal, or regulatory in nature, and whether arising by general statute or particular program statute, or by regulation, rule or order issued pursuant thereto, the relevant records in the system may be referred to the appropriate agency, whether Federal or State, charged with the responsibility of investigating or prosecuting such violation or charged with enforcing or implementing the statute, or rule, regulation or order issued pursuant thereto; (2) In the event of civil, criminal or administrative proceedings, the relevant records may be disclosed to the appropriate court, magistrate, or administrative tribunal as evidence, or to counsel for the presentation of evidence and/or in the course of discovery; (3) Disclosure may be made to a Congressional office from the record of an individual in response to an inquiry from the Congressional office made at the request of the individual.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Maintained in a file folder and on computer discs.

Retrievability: Indexed by name.

Safeguards: Maintained in lockable metal filing cabinets in a secured room; computer discs are accessed by only authorized personnel.

Retention and disposal: Permanent retention.

System manager(s) and address: General Counsel, Legal Division, FDIC, 550 17th Street, NW., Washington, D.C. 20429.

Notification procedure: Executive Secretary, Records Unit, FDIC, 550 17th Street, NW., Washington, D.C. 20429. Inquirers must provide their full name and the name of the bank with which they were associated. Inquiries must include a notarized statement attesting to the individual's identity.

Record access procedures: Same as "Notification" above.

Contesting record procedures: Same as "Notification" above.

Record source categories: Information is obtained from the individual on whom the record is maintained, the employer of the individual, newspaper articles, and individuals interviewing during the investigation. Federal and State prosecuting authorities and Federal and State financial institution supervisory authorities are also sources of information.

Systems exempted from certain provisions of the act: Pursuant to section 310.13(a) of the FDIC's Rules and Regulations, investigatory material compiled as a part of this system for law enforcement purposes is exempted from the accounting provision of section 310.10(d)(2) of the FDIC's Rules and Regulations and may be withheld from disclosure, to the extent that such disclosure may interfere with the investigation and preparation of any civil, criminal or administrative law enforcement proceedings.

30—64—0012

System name: Payroll and Employee Financial Records—FDIC.

System location: Accounting and Budget Branch, FDIC, 1709 New York Ave., NW., Washington, D.C. 20429 and the appropriate FDIC Regional Office for employees working out of field offices. (See Appendix A for the location of FDIC Regional Offices).

Categories of individuals covered by the system: All current and former FDIC employees.

Categories of records in the system: Consists of various forms and computer retrievable data which disclose employee: mailing address and home address; rate and amount of pay, leave, and hours worked, and leave balances; life insurnace, health insurance and retirement deductions; tax exemptions; and payroll deduction authorizations.

Authority for maintenance of the system: Section 9 of the Federal Deposit Insurance Act (12 U.S.C. 1819): Exec. Order 9397, "Numbering System for Federal Accounts Relating to Individual Persons" (Nov. 22, 1943).

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: (1) Information developed from these records is routinely provided to State, City, and Federal income tax authorities, including, at the Federal level, the Internal Revenue Service and the Social Security Administration, and, to other recipients, as authorized by the employee, including the United States Treasury Department, savings institutions, insurance carriers and charity funds; (2) Records are periodically made available for inspection to auditors employed by the General Accounting Office; (3) Relevant records in this system of records may be referred, as a routine use to the appropriate agency, whether Federal or State, charged with the responsibility of investigating or prosecuting any violation of law, rule or regulation: (4) In the event of litigation, relevant records may be presented to the appropriate court, magistrate, or administrative tribunal as evidence or to counsel for the presentation of evidence and/or in the course of discovery; (5) Disclosure may be made to the Civil Service Commission concerning pay, benefits, retirement deductions, and other information necessary for the Commission to carry out its government-wide personnel management functions; (6) Disclosure may be made to a Congressional office from the record of an individual in response to an inquiry from the Congressional office made at the request of the individual.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: File folders, record cards and computer discs.

Retrievability: File folders and record cards indexed by name; computer discs are indexed by social security number.

Safeguards: File folders and record cards are stored in lockable metal cabinets; computer discs are accessed only by the authorized personnel.

Retention and disposal: Year-end trial balances (the individual earnings record) are retained during the employment and then transferred to the Federal Records Center, where the records are maintained indefinitely. Deduction authorizations and documents used to develop the records are retained for the period of use and up to an additional three years after which they are disposed of by shredding or burning.

System manager(s) and address: Controller, Office of the Controller, FDIC, 550 17th Street, NW., Washington, D.C. 20429.

Notification procedure: Executive Secretary, Records Unit, 550 17th Street, NW., Washington, D.C. 20429.

Record access procedures: Same as "Notification" above.

Contesting record procedures: Same as "Notification" above.

Record source categories: The information is obtained from the employee on whom the record is maintained.

Systems exempted from certain provisions of the act: None.

30—64—0013

System name: Savings Bond Payroll Deduction Systems—FDIC.

System location: Accounting and Budget Branch, FDIC, 1709 New York Ave., NW., Washington, D.C. 20429.

Categories of individuals covered by the system: All current and former FDIC employees who have authorized payroll deductions for the purchase of United States Savings Bonds.

Categories of records in the system: Consists of the name and address of the employee; the amount of the employee's salary to be

withheld; the denomination of bond to be purchased; the series of the bond; the owner's name, address and social security number; the designated co-owner or beneficiary, and their social security number.

Authority for maintenance of the system: section 9 of the Federal Deposit Insurance Act (12 U.S.C. 1819); Exec. Order 9397, "Numbering System for Federal Accounts Relating to Individual Persons" (Nov. 28, 1943).

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: Disclosure may be made to: (1) the United States Treasury Department for the preparation of savings bonds; (2) to the Civil Service Commission concerning pay, benefits, retirement deductions, and other information necessary for the Commission to carry out its government-wide personnel management function; (3) to a Congressional office from the record of an individual in response to an inquiry from the Congressional office made at the request of the individual.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: File folders, index cards, and computer discs.

Retrievability: File folders and record cards are indexed by name; computer discs are indexed by social security number.

Safeguards: File folders and record cards are stored in lockable metal cabinets; computer discs are accessed only by authorized personnel.

Retention and disposal: Records are retained for two years and then destroyed.

System manager(s) and address: Controller, Office of the Controller, FDIC, 550 17th Street, NW., Washington, D.C. 20429.

Notification procedure: Executive Secretary, Records Unit, FDIC, 550 17th Street, NW., Washington, D.C. 20429.

Record access procedures: Same as "Notification" above.

Contesting record procedures: Same as "Notification" above.

Record source categories: The information is obtained from the employee on whom the record is maintained.

Systems exempted from certain provisions of the act: None.

30—64—0014

System name: Travel Voucher System—FDIC.

System location: Accounting and Budget Branch, FDIC, 550 17th Street, NW., Washington, D.C. 20429.

Categories of individuals covered by the system: FDIC employees who travel on official business.

Categories of records in the system: Contains records relating to employee's claims for reimbursement of official travel expenses including travel authorizations, advances, and vouchers showing amounts claimed, exceptions taken as a result of audit, advance balances applied, and amounts paid.

Authority for maintenance of the system: Sec. 10(a) of the Federal Deposit Insurance Act (12 U.S.C. 1820(a)); Travel Expense Act of 1949 (5 U.S.C. 5701-5709); Exec. Order 9397, "Numbering System for Federal Accounts Relating to Individual Persons" (Nov. 22, 1943).

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: (1) Records are periodically made available for inspection to auditors employed by the General Accounting Office; (2) In the event that information contained in this system of records indicates a violation or potential violation of the law, whether civil, criminal, or regulatory in nature, and whether arising by general statute or particular program statute, or by regulation, rule or order issued pursuant thereto, the relevant records in the system of records may be referred, as a routine use, to the appropriate agency, whether Federal, or State, charged with the responsibility of investigating, or prosecuting such violation or charged with enforcing or implementing the statute, or rule, regulation or order issued pursuant thereto; (3) In the event of litigation, the records may be presented to the appropriate court, magistrate, or administrative tribunal as evidence or to counsel for the presentation of evidence and/or in the course of discovery; (4) Disclosure may be made to the Civil Service Commission concerning pay, benefits, retirement deductions, and other information necessary for the Commission to carry out the government-wide personnel management function; (5) Disclosure may be made to a Congressional office from the record of an individual in response to an inquiry from the Congressional office made at the request of the individual.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: File folders and computer discs.

Retrievability: Files indexed by name; computer discs by social security number.

Safeguards: File folders stored in a lockable room; computer discs are accessed by only authorized personnel

Retention and disposal: Records are maintained for seven years, then file folders are shredded and computers discs are erased.

System manager(s) and address: Controller, Office of the Controller, FDIC, 550 17th Street, NW., Washington, D.C. 20429.

Notification procedure: Executive Secretary, Records Unit; FDIC, 550, 17th Street, NW., Washington, D.C. 20429.

Record access procedures: Same as "Notification" above.

Contesting record procedures: Same as "Notification" above.

Record source categories: The information is obtained from the employee on whom the record is maintained.

Systems exempted from certain provisions of the act: None.

30—64—0015

System name: Unofficial Personnel System— FDIC.

System location: Personnel Branch, FDIC, 1709 New York Avenue, NW., Washington, D.C. 20429. In addition records are maintained at the Division or Office levels in the FDIC Washington Office and at the FDIC Regional Offices. (See Appendix A for the location of FDIC Regional Offices.)

Categories of individuals covered by the system: All current and former FDIC employees.

Categories of records in the system: This system consists of personnel-related records that are maintained in addition to those kept in the Official Personnel folder pursuant to the Federal Personnel Manual Suppl. 296-31, Table 8, Sec. 1. (The records contained in the Official Personnel Folder are covered, with regard to the Privacy Act of 1974, by the Civil Service Commission's published "General Personnel Records," C.S.C./Gov.-3, notice.) This system contains records of various types. They are: (1) records maintained in the Washington and regional offices which may contain information on individuals relating to: birthday; Social Security Number; past and present salaries, grades, and position titles; home address and telephone number; emergency contacts, addresses and telephone numbers; employment history; original applications, resume, and letters of reference; statement of bank loans and stock ownership; record of equipment and material issued to the individual; record of leave and time-and-attendance; written notes or memoranda on employee performance; counseling; and data documenting reasons for personnel actions, decisions, or recommendations made about an employee; (2) parking permit records containing information (name, address, and type of automobile) about FDIC employees who have applied for (or are members of the applicants' carpool) a parking permit in the FDIC's Washington Office garage; (3) American Red Cross blood donor records containing information including donors name, Social Security Number, date of birth, age, sex, home address and phone number, whether the donation was accepted, and whether the Red Cross would recruit the donor again for blood; (4) FDIC personnel awards including information supporting the employee's nomination for one of these awards; (5) dental insurance records including information on earnings, number and name of dependents, sex, birth date, home address, and Social Security Number; and (6) employee locator records containing the employee's name, Social Security Number, Division or Office assignment, office telephone number and office room number.

Authority for maintenance of the system: Sec. 9 of the Federal Deposit Insurance Act (12 U.S.C. Sec. 1819); Sec. 506 of the Federal Records Act of 1950 (44 U.S.C. Sec. 3101).

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: With regard to category (1) above, the records are primarily maintained to be used by the employee's supervisor for preparation of general personnel action; however, in the case of categories (1), (2), and (4) disclosure may be made, where relevant:

(a) to financial and credit institutions for loan and credit reference purposes (solely to verify the employee's employment with the FDIC, date of employment, and pay grade);

(b) to the Civil Service Commission in the event of any grievance procedures;

V 42169 AUG 31 77 UMI

(c) to the Civil Service Commission concerning pay, benefits, retirement, deductions, and other information necessary for the Commission to carry out its government-wide personnel management functions;

(d) in the levent of litigation, to the appropriate court, magistrate, or administrative tribunal as evidence, or to counsel for the presentation of evidence and/or in the course of discovery;

(e) to a Congressional office from the record of an individual in response to an inquiry from the Congressional office made at the request of the individual;

(f) to State authorities regarding reasons for a former employee's separation from FDIC service, where the inquiry is made pursuant to the former employee's application for unemployment compensation;

(g) to Federal and State regulatory agencies, for reasons related to FDIC business, as to the temporary work location of FDIC bank examiners.

In the case of category (3) above, disclosure may be to the American Red Cross from the information contained in the blood donor records. Disclosure may be made, in the case of category (5) above, to the dental insurance carrier in support of a claim for dental insurance benefits. In category (6) above, except for the employee's Social Security Number, all information in the record is available to the public.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Maintained on file cards and in file folders. Category (6) is maintained on computer discs.

Retrievability: Indexed alphabetically by name.

Safeguards: Maintained in lockable metal cabinets.

Retention and disposal: Records are destroyed when no longer relevant to the purpose for which they were compiled and maintained. Generally, records are destroyed when the employee no longer works in the Division or Office which compiled and maintained the information. Parking permit records are kept for one year and then destroyed. American Red Cross blood donor records are kept for four years and then destroyed.

System manager(s) and address: Director, Office of Employee Relations, FDIC, 550 17th Street, NW., Washington, D.C. 20429, for Corporation level records. For FDIC Division or Office levels, the Head of the appropriate Division or Office; for FDIC Regional Offices, the Regional Director. (See Appendix A for the location of FDIC Regional Offices); For Parking Permit Records and Employee Locator Records, the Controller, Office of the Controller, FDIC, 550 17th Street, NW., Washington, D.C. 20429.

Notification procedure: Executive Secretary, Records Unit, FDIC, 550 17th Street, NW., Washington, D.C. 20429.

Record access procedures: Same as "Notification" above.

Contesting record procedures: Same as "Notification" above.

Record source categories: Individuals to whom the records pertain; their immediate supervisors or persons at other supervisory levels; other fellow employees.

Systems exempted from certain provisions of the act: None.

30—64—0016

System name: Municipal Securities Principals and Representative System—FDIC.

System location: Operations Branch, Division of Bank Supervision, FDIC, 550 17th Street, NW., Washington, D.C. 20429. Records stored in computerized files are maintained off premises on a contract basis with the National Association of Securities Dealers, 1735 L Street, NW., Washington, D.C. 20036.

Categories of individuals covered by the system: Persons who are or seek to be a municipal securities principals or municipal securities representatives associated with municipal securities dealers which are FDIC insured State banks, not members of the Federal Reserve System, or are a subsidiary, a department, or a division of such bank.

Categories of records in the system: These records may contain identifying information as well as educational, employment, and disciplinary information, if any, and, where applicable, information regarding termination of employment of individuals covered by the system. Identifying information includes name, addresses, date and place of birth, and may include social security account number.

Authority for maintenance of the system: Sections 15B, 23 and 32(a) of the Securities Exchange Act of 1934, as amended (15 U.S.C. Sec. 78), and Section 2 of the Federal Reports Act of 1942 (44 U.S.C. Sec. 3501).

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: Information in these records may be used: (1) To refer, where there is an indication of a violation or potential violation of law, whether civil, criminal, or regulatory in nature, to the appropriate governmental authority, whether Federal, State, local, or foreign, or a self-regulatory organization, as defined in Section 3(a)(26) of the Securities Exchange Act of 1934 (15 U.S.C. Sec. 78c(a)(26)); (2) To refer, in the event of litigation, whether civil, criminal, or regulatory in nature, to the appropriate court, magistrate, or administrative law judge as evidence, or to counsel for the presentation of evidence and/or in the course of discovery; (3) To assist in any proceeding in which the Federal securities or banking laws are in issue or a proceeding involving the propriety of a disclosure of information contained in the information, in which the FDIC or one of its past or present employees is a party; (4) To disclose to a Federal, State, local, or foreign governmental authority or a self-regulatory organization if necessary in order to obtain information relevant to a Federal Deposit Insurance Corporation inquiry concerning a person who is or seeks to be associated with a municipal securities dealer described in Categories of individuals covered by the system as as municipal securities principal or representative; (5) To respond to a request from a Federal, State, local, or foreign government authority or a self-regulatory organization for information in connection with the issuance of a license or other benefit to the extent that such information is relevant and necessary; (6) To disclose to a Congressional office from the record of an individual in response to an inquiry from the Congressional office made at the request of that individual; (7) To disclose to a registered dealer, a registered broker or a registered municipal securities dealer that is a past or present employer of an individual that is the subject of a record, or to which such individual has applied for employment, for purposes of identity verification or for purposes of investigating the qualifications of the subject individual.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Records are maintained in file folders and on computer discs.

Retrievability: Indexed by name.

Safeguards: File folders are stored in locked metal cabinets and computer discs are accessed only by authorized personnel.

Retention and disposal: Permanent retention with periodic review of contents of record and destruction of excess and dated information.

System manager(s) and address: Director, Division of Bank Supervision, FDIC, 550 17th Street, NW., Washington, D.C. 20429.

Notification procedure: Executive Secretary, Records Unit, FDIC, 550 17th Street, NW., Washington, D.C. 20429. Inquirers must provide the full name, date, and place of birth of the inquirer. Inquirers may be required to include a notarized statement attesting to identity.

Record access procedures: Same as "Notification" above.

Contesting record procedures: Same as "Notification" above.

Record source categories: Individuals on whom the records are maintained as well as municipal securities dealers described in Categories of individuals covered by the system and Federal, State, local, and foreign governmental authorities and self-regulatory agencies which regulate the securities industry.

Systems exempted from certain provisions of the act: None.

30—64—0017

System name: Medical Records and Emergency Contact Information System—FDIC.

System location: Health Unit, FDIC, 550 17th Street, NW., Washington, D.C. 20429.

Categories of individuals covered by the system: Medical records of the employee, including the date of visit to the Health Unit, the diagnosis, and the treatment administered. Attached to this record is a separate sheet containing the name and telephone number of the person to contact in the event of an emergency involving the employee.

Authority for maintenance of the system: Sec. 9 of the Federal Deposit Insurance Act (12 U.S.C. Sec. 1819); Sec. 506 of the Federal Records Act of 1950 (44 U.S.C. Sec. 3101).

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: No disclosure (including intra-agency disclosure) of information contained in the medical files is made without the prior written consent of the employee concerned. In the event of an emergency, the emergency contact would be notified.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: On 8" x 10" cards with a separate emergency contact sheet attached to it.

Retrievability: Indexed alphabetically by name.

Safeguards: Kept in lockable metal cabinets in the nurse's office of the Health Unit. Only the nurse and substitute nurse are allowed access to the files. The Health Unit is locked whenever the nurse is absent.

Retention and disposal: Kept for the duration of the employee's tenure with the FDIC, and for 5 years thereafter, then destroyed.

System manager(s) and address: Director, Office of Employee Relations, 550 17th Street, NW., Washington, D.C. 20429.

Notification procedure: Executive Secretary, Records Unit, FDIC, 550 17th Street, NW., Washington, D.C. 20429.

Record access procedures: Same as "Notification" above.

Contesting record procedures: Same as "Notification" above.

Record source categories: The medical records are compiled by the employee and the nurse during the course of visits to the Health Unit for treatment. The information on the emergency contact sheet is supplied by the employee.

Systems exempted from certain provisions of the act: None.

would you like to know

if any changes have been made in certain titles of the CODE OF FEDERAL REGULATIONS without reading the Federal Register every day? If so, you may wish to subscribe to the "Cumulative List of CFR Sections Affected," the "Federal Register Index," or both.

Cumulative List of CFR Sections Affected
$10.00
per year

The "Cumulative List of CFR Sections Affected" is designed to lead users of the Code of Federal Regulations to amendatory actions published in the Federal Register, and is issued monthly in cumulative form. Entries indicate the nature of the changes.

Federal Register Index **$8.00**
per year

Indexes covering the contents of the daily Federal Register are issued monthly, quarterly, and annually. Entries are carried primarily under the names of the issuing agencies. Significant subjects are carried as cross-references.

A finding aid is included in each publication which lists Federal Register page numbers with the date of publication in the Federal Register.

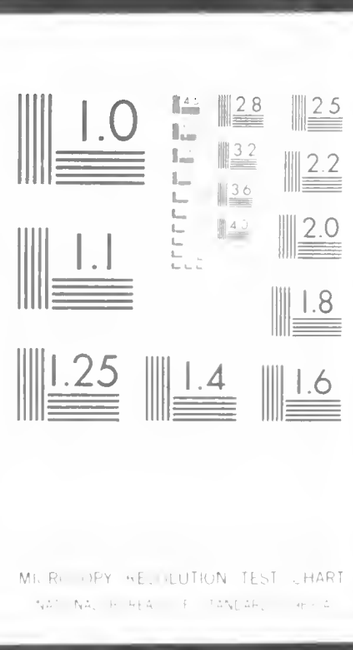
Note to FR Subscribers: FR Indexes and the "Cumulative List of CFR Sections Affected" will continue to be mailed free of charge to regular FR subscribers.

Mail order form to:
Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402

There is enclosed $_____ for _____ subscription(s) to the publications checked below:

..... **CUMULATIVE LIST OF CFR SECTIONS AFFECTED ($10.00 a year domestic; $12.50 foreign)**
..... **FEDERAL REGISTER INDEX ($8.00 a year domestic; $10.00 foreign)**

Name _____



Street Address _____

City _____ **State** _____ **ZIP** _____

Make check payable to the Superintendent of Documents

RESOLUTION CHART

100 MILLIMETERS

INSTRUCTIONS Resolution is expressed in terms of the lines per millimeter recorded by a particular film under specified conditions. Numerals in chart indicate the number of lines per millimeter in adjacent "T-shaped" groupings.

In microfilming, it is necessary to determine the reduction ratio and multiply the number of lines in the chart by this value to find the number of lines recorded by the film. As an aid in determining the reduction ratio, the line above is 100 millimeters in length. Measuring this line in the film image and dividing the length into 100 gives the reduction ratio. Example: the line is 20 mm. long in the film image, and 100 ÷ 20 = 5.

Examine "T-shaped" line groupings in the film with microscope, and note the number adjacent to finest lines recorded sharply and distinctly. Multiply this number by the reduction factor to obtain resolving power in lines per millimeter. Example: 7.9 group of lines is clearly recorded while lines in the 10.0 group are not distinctly separated. Reduction ratio is 5, and 7.9 x 5 = 39.5 lines per millimeter recorded satisfactorily. 10.0 x 5 = 50 lines per millimeter which are not recorded satisfactorily. Under the particular conditions, maximum resolution is between 39.5 and 50 lines per millimeter.

Resolution, as measured on the film, is a test of the entire photographic system, including lens, exposure, processing, and other factors. These rarely utilize maximum resolution of the film. Vibrations during exposure, lack of critical focus, and exposures yielding very dense negatives are to be avoided.
